SEC. 4. For the purpose of carrying out the provisions of this act the sum of $30,000, or so much thereof as may be necessary, is hereby appropriated from the general fund, to be disbursed upon vouchers approved by the commissioner of public lands.

Passed the senate February 26, 1913.
Passed the house March 7, 1913.
Approved by the governor March 18, 1913.

APPENDIX E.

[From the Seattle Post-Intelligencer.]

TRYING TO GET STATE LANDS.

The State land commissioner and the attorney general have gone to Washington City for the purpose of trying to effect some arrangement with the Forestry Service and the Department of the Interior through which, as the State is denied the right to take the lands which Congress granted it for school purposes, it may be at least given the privilege of exchanging its school lands for others of equal value.

The case is simple. Congress made this State a direct grant of two sections out of every township of the public lands for school purposes. The grant was specifically of sections 16 and 36. Before the lands were surveyed, however, great forest reserves were created by Executive order, which include within their limits 730,000 acres of the State's school lands. Since the creation of these reservations the State has been denied any right to its granted lands. The Forest Service has, indeed, sold to private individuals, in instances, the timber growing on school lands within the limits of the reservations.

Failing to secure the lands which Congress granted it, owing to the refusal of the executive branch of the Government to recognize the validity of those grants as conveying full title, the alternative has been suggested for the State to abandon its claim and take an equal area of lands in compact form on the edges of the forest reserves. This arrangement was, in fact, made between the State of Idaho and the Forestry Service. It is a similar arrangement which the authorities of this State hope to be able to effect. If not the specific lands which Congress granted, the State will yet be able, should the arrangement go through, to recover property of the value of not less than $7,000,000 belonging to the State schools, of which the Forest Service has successfully deprived it.

The legislature appropriated $30,000 to be used to get the Government to give us our State lands now lost in the forest reserves.

APPENDIX F.

STATEMENT IN RE EXCHANGE OF LANDS IN THE STATE OF WASHINGTON.

By section 10 of the act admitting the States of North and South Dakota, Montana, and Washington into the Union each of those States was granted sections 16 and 36 in every township for common-school purposes (25 Stat., ch. 180). Under that act and under the act of 1891 (26 Stat., 796) the States were authorized to select indemnity lands where those sections were otherwise appropriated or disposed of by the United States.

There is a deficiency of some 730,000 acres in the school-land grant to the State of Washington, due to the following causes:

1. Sections incomplete in area because of natural causes, such as water.
2. Sections mineral in character.
3. Sections included within the boundaries of Indian, military, and other governmental reservations.
4. Sections settled upon prior to survey.
5. Sections within the boundaries of the national forests.
6. Indemnity lands selected by the State and afterwards included within the boundaries of reservations.

The approximate areas of the larger losses are shown by the following table:

Cause of loss.	Area lost.	Areas offered as base for selections made elsewhere, and approved.	Area available as base.
Settlement	61,122.39	37,930.34	23,192.05
Natural causes	79,641.99	61,912.95	17,729.04
National forests	666,040.00	104,747.05	561,292.95
Indian reservations	159,721.26	31,328.12	128,393.14
Total	966,525.64	235,918.46	730,607.18

The State is unable to select lands in lieu of the lands lost as aforesaid, because there are now no lands in the State outside of the boundaries of the forest reserves that are worth $10 an acre, which is the minimum price for which the lands may be sold under the provisions of the enabling act and the State constitution.

The State of Washington desires to relinquish to the United States or to its grantee the lands unavailable to it by reason of the causes stated and to select in lieu thereof lands to be eliminated from the forest reserves in a block or blocks on the margins of such reserves, the lands selected to be as nearly as may be of equal area and value to the lands lost.

Chapter 102 of the Laws of Washington for 1913 empowers the commissioner of public lands of the State to enter into an agreement with the proper authorities of the Federal Government to the end that an exchange of lands may be effected and appropriates the sum of $30,000 for the purpose of carrying out the agreement.

APPENDIX G.

REPORT AND EXPLANATION OF THE 1901 WITHDRAWALS IN THE OLYMPIC RESEVE.

It is true that lands eliminated from the Olympic National Forest are now in the hands of private persons and corporations, some of these logging corporations. Being so, they are of some use to society. Had they remained in the national forests, according to the showing that has been made by the Forest Service, they would have stagnated; their timber would have rotted. As it is, they are paying part of the tax burdens of the State, are contributing to the settlement and upbuilding of the Commonwealth, and are performing that duty which nature intended them to perform.

Stress is laid on the fact that people living in the State wanted these lands eliminated. The implication is that their desire in this respect was inherently vicious. It is insinuated that there was something wrong in it all.

There was some deceit practiced, it is true, but it was practiced by those forces in control of the Federal Government. Let me tell you about it.

By reason of the enormous Federal reservations created in the State of Washington—they total about 30 per cent of the total area—the State never has been able to fill its grants made to it by Congress in the enabling act by which it became a State. These grants were for sections 16 and 36 in each township and for certain other lands. Before the gift was completed came the reservations, which prevented the State getting all that it had been promised.

When there was talk of lands being eliminated from the Olympia Forest the State thought it saw an opportunity to get some land to satisfy the debt owed it. The State authorities got in behind the movement to secure the elimination.

But when the elimination was secured the State found that it had been deceived. The Department of the Interior ruled that the State must stand back and not attempt to file selection lists on any of these lands until settlers, be they homesteaders or timberland entrymen, had had 30 days to initiate their efforts to secure title. The rule declared that "filings" could be received not before a certain date, but that "entry" might be initiated 30 days prior thereto. The State can not "enter"; it can only "file." The excuse was that this order was in the interest of the legitimate settler. How it worked out is shown in the list of present-day owners. Before the 30 days' handicap on the State had expired there was nothing left for the State to file on.

So, if any deceit was practiced in this matter of the elimination, it was practiced by those in charge of the Federal Government's operations, and the State, rather than the Nation, was the victim.

I may state further that the State never yet has been able to secure the lands promised it in the enabling act of 1889. It is some 800,000 or 900,000 acres short.

The promise of Congress that it should have these grants has been annulled by Executive orders creating reservations.

APPENDIX H.

[From Daily Consular and Trade Reports, July 11, 1913.]

PHILIPPINE COAL CONTRACT.

The Japanese firm, Mitsui Bussan Kaisha, has been awarded the contract for 80,000 tons of coal, aggregating in value over half a million dollars, to be used by the Army of the Philippines during the fiscal year beginning July 1. The Mitsui bid was $6.20 per ton for delivery ex-ship to Manila Bay, of approximately 20,000 tons of Milke washed nut coal, or Tagawa lump coal, and $5.85 per ton for 60,000 tons Mineji best screened lump coal.

For delivering and piling on dock the company will be paid 20 to 88 cents gold per ton in advance of the above figures, the amount differing according to the kind of coal concerned, discharging facilities at various ports, and similar conditions. The company agrees to discharge its vessels at Manila of 500 tons per weather working day, excepting Sundays and holidays. Demurrage will be charged against the Government at the rate of 12 cents gold per day and per the net registered tonnage of the vessel concerned.

For delivery to Iloilo and Cebu the price for Tagawa best screened lump coal will be $6.90, while to the ports at which Pettit Barracks, Augur Barracks, Warwick Barracks, Camp Connell, Ludlow Barracks, Camp Overton, and Camp Downes are situated the price will be $7.60 per ton, ex-ship and duty paid. This is said by Manila journals to be the largest contract for coal ever awarded by the Army in the Philippines, being 20,000 tons in excess of the amount ordered for any previous fiscal year.

Two other firms made bids, one being $7.70 per ton for Australian coal and another $6.45 per ton for Chinese coal.

SUGGESTED LAND-LAW CHANGES.

Mr. Speaker, in connection with the speech on "Conservation at Close Range," which I have delivered this afternoon on the floor, I desire to take advantage of the permission granted to me June 3, page 2130 of the CONGRESSIONAL RECORD, to extend my remarks on the subject of the forest reserves by placing in the RECORD, adjoining my address of to-day some statements which will exemplify and verify the statements I have put forth.

I desire first to make some modest suggestions as to changes which many westerners think necessary in the land laws. In the preparation of these suggestions I have been aided by some of the brightest legal minds in western Washington. Particularly do I refer to Hon. Maurice D. Leehy, of Seattle, and to Hon. Loren H. Brewer, of Hoquiam, and I am proud to give credit to them and to thank them.

LET FOREST SERVICE BE A SCIENTIFIC BUREAU.

The Forest Service, we believe, should be relieved from the administration of the national forests. The Forest Service should be a purely scientific bureau, such as the Bureau of Plant Industry and other bureaus in the Department of Agriculture. That department is engaged in scientific work, and the work of the Forest Service can best be done along scientific lines, not limited to publicly owned forests, as it practically is at present. The other departments are administrative. The General Land Office is an administrative bureau, and should have full charge of the administration of public lands. It will

never be satisfactory to divide that administration with the Forest Service, as at present. We now have one bureau to sell lands and another to sell the timber off the more valuable portion of those lands, lease grazing, water-power, and other privileges, and so forth. I need not comment upon the confusion resulting constantly from this divided authority and responsibility. It should all be concentrated in the General Land Office.

Mr. Speaker, I have presented a bill, H. R. 6923, to transfer the Bureau of Forestry from the Department of Agriculture to the Department of the Interior. I hope the Committee on Public Lands will give this service consideration. The suggestions given above are an improvement on the plan offered in the bill. At any rate, something should be done, not only to give the Chief Forester a chance but to reduce the doubled labor of the two departments involved.

MORE LOCAL LAND OFFICE POWER.

The General Land Office would, in my opinion, be made a more efficient administrative bureau if more power and authority were vested in the local officials in each land district. The divided responsibility of the register and receiver should be vested in the register, as the administrative officer and judge of land contests. The office of receiver should be abolished and his duties transferred to a clerk or cashier. The register should sit as a trial judge in all land contests, including contests upon charges filed in behalf of the Government. His decision should have the same effect, in contests only, as that of the trial judge in our courts. I mean by that he should render final judgment upon such contests, subject to review upon appeal to the department, and the practice in this respect could be similar to that upon appeals from trial to appellate courts. I do not mean that the register should pass upon all the details as to whether patent should issue, but he should sit as the judicial officer, hearing the evidence from witnesses who appear before him, and should enter judgment as to the merits of all contests, whether instituted by other claimants or on behalf of the Government. The clerical details prior to issuance of a patent can well be conducted as at present.

This plan would invest more authority in the register. The office would be made more important and should command a larger salary. This would not increase the expense, as the present salary of the receiver would be saved. Of course it would be necessary to pay a larger salary to the clerk or cashier than is at present paid to such clerks, but the amount at present paid receivers could be divided between them. Then, too, a reduction could be made in the number of land offices by consolidation or a better distribution of territory. For instance, the seven land offices in my State of Washington could be merged into five, and even into four, without injury to the service.

A POSSIBLE REMEDY.

I appreciate the opposition which this suggestion will encounter. Indeed, I fear it will produce such opposition as to indefinitely delay its adoption. This will be especially so as to the suggestion that the Forest Service be relieved from the administration of the national forests. I have given much thought to the whole subject and have satisfied myself that the solution most likely of early adoption is a law permitting a trial in the Federal courts of all contests instituted by the Government upon entries of lands within any Government reservation. This system has worked well for 40 years in the determination of contests arising over adverse claims under the mineral laws. The plan suggested is simply to permit claimants to demand a trial in the Federal courts of any contest filed by any bureau over lands within any Government reservation. The officials of the Government have some interest in retaining such lands within such reservation, and hence they should be disqualified from rendering judicial decision thereon.

There is a very general demand throughout the public-land States and Alaska for reform in the present procedure, which compels officials of the General Land Office to serve in the triple capacity of detective, prosecutor, and judge. Then, too, there is at present no method of obtaining a judicial review of the department decisions, even upon questions of law. It is sometimes done indirectly in contests between private claimants, and actions in our courts are quite common whereby patentees are sought to be declared as trustees. The courts have frequently decreed land grants to be in trust or, in effect, that the patent was issued to the wrong party, by declaring the patented ground to be the property of another. No such action is possible, however, where Government contests have been upheld, and hence there is a lack of uniformity in the decisions.

The suggestion that an appeal be allowed from the decision of the Secretary of the Interior to the courts would not afford the necessary relief. It would be cumbersome, expensive, and ineffectual. It would increase the delay; it would not be practicable; and it could not very well provide for more than a review of departmental decisions upon questions of law. Even such questions are frequently so interwoven with questions of fact that only a trial de novo in the appellate court could afford relief, and this presents difficulties in the matter of obtaining testimony. On the other hand, if such contests were tried in the Federal courts, the Government can be represented by the district attorney, who, in turn, will receive the same assistance from the Field Service, Forest Service, and other Government agencies as is now given the district attorney by the Post Office inspectors in prosecutions for the violation of the postal laws.

It would not increase the expense to claimants, but, on the other hand, would materially reduce the same, saving much in the cost of transcripts of testimony and the employment of counsel in Washington. It would facilitate final action and greatly reduce the expenses of the General Land Office, and, above all, it would afford the claimants a fair trial in court and give them the resulting satisfaction which will be impossible from a distant tribunal, no matter how impartial and efficient.

The suggestion that a court trial be allowed only when the lands involved are within a Government reservation would afford such relief to comparatively few homesteaders. Hence, it might be well to include all contests filed by the Government against homestead claimants. The law should not require all such contests to be referred to the courts, but simply give the claimant permission to transfer the trial of such contests to the courts.

Comparatively few cases would be taken to the courts, but sufficient to establish a more uniform policy, and, above all, to afford claimants an avenue of relief which will leave them without substantial grounds of complaint against the present system.

The result would be fewer contests and quite as general satisfaction with the administration of the public lands as our people now have with the decisions of our courts.

THE SEATTLE RIOTS.

The SPEAKER. The gentleman from Washington [Mr. BRYAN] is recognized.

Mr. BRYAN. Mr. Speaker, with some of the things which my colleague has just said I heartily agree, and particularly one proposition, namely, the construction of a railroad in Alaska by the Government, to be maintained by the Government, and operated by the Government. I believe that ought to be an accomplished fact in this next session of Congress.

I had handed to me a day or two ago a clipping from the Seattle Times in reference to some incidents that occurred out there, and the editor of that paper wound up his article by saying that "BRYAN had hollered 'nuff in his fight with the Times." How he got that idea I do not know. But I do know that there is no truth in the statement.

Mr. Speaker, it will be remembered by some of the gentlemen present that a few weeks ago my colleague, Mr. JOHNSON, objected to my speaking to this House in answer to my colleague, Mr. HUMPHREY, concerning the Seattle riots conducted by enlisted men on the 18th of last July. It will also be remembered that except for Mr. JOHNSON'S objection I was accorded the unanimous consent of this body to proceed with my discussion, although what I had to say did not refer to the then pending bill and was, of course, out of order. I left for my home State just after being refused unanimous consent.

I returned a few days ago, and yesterday, when my colleague, Mr. JOHNSON, asked unanimous consent to speak, I thought it a good time to reserve my right to object to his proceeding out of order unless he would grant like consent to me, so I now find myself enjoying the unanimous-consent courtesy of this body which my friend and colleague enjoyed a few minutes ago but which he denied me a few weeks ago.

There lives at Seattle a former resident of Minneapolis, Alden J. Blethen, who owns a big newspaper, which has a large daily and Sunday circulation. The people of Seattle had been outraged by the Seattle riots of July 18, and there was widespread contempt for this man Blethen and his newspaper for encouraging and staging the riots.

Blethen had grossly misrepresented in the Times a speech of Secretary Daniels made at the Rainier Club in Seattle, and his newspaper, the Times, had made the enlisted men think their acts were approved both by the public and by the Navy officers. There was nothing in Secretary Daniels's speech to warrant this.

The mayor of Seattle, after laying the blame for inciting the riots to the editor of the Times, made his unsuccessful attempt to suppress the Times and prevent its publishing any further riot-inciting articles. While the mayor was unsuccessful in his effort to suppress the newspaper, still the people were enraged against the Times. Public feeling ran high.

The mayor published a statement denouncing Blethen and the Times. In order to convince all that Blethen was of an indescribably low type and that his raving and frothing about patriotism and the flag was the cheapest and most intolerable form of advertising, the mayor published over his signature the following, which I had made part of my speech delivered in this House on July 29:

Alden J. Blethen was bitter in his denunciation of Dr. Matthews, Prosecuting Attorney Murphy, and others connected with the grand jury which had indicted him. With singular boldness he forced upon my attention two disgraceful photographs bearing the heads of the two gentlemen above named upon human figures in indescribably loathsome relations. He—Alden J. Blethen—explained in detail how and why he had conceived the idea of these vile photographs, secured foundation pictures by searching out some indecencies from a Paris collection, engaged one of our best Seattle artists to combine them with perfect photographic skill with the heads and faces of Dr. Matthews and of Prosecuting Attorney Murphy. The name of the photographer and the price he paid him for the making of these faked exhibitions of degeneracy was part of the Blethen recital. The memory of that disgusting and criminal conception has been a constant reminder of public danger from a source capable of conjuring and perpetrating such an infamy.

In commenting on this incident, I had said in my speech:

I call special attention to the fact that a congressional committee from this House went to Seattle and investigated Judge Hanford. The gentleman from Illinois [Mr. GRAHAM] and the gentleman from New Jersey [Mr. MCCOY] were members of that committee. If any Member of this House desires to verify the diabolical act of Editor Blethen, of the Times, referred to by the mayor in his statement published as part of these remarks, as an incident to show the character of the man, let him go to Congressman GRAHAM, who has in his possession a description of the low, vulgar pictures. Dr. Matthews was a man of piety, courage, and civic faithfulness, who was at the time urging a grand jury which later caused Blethen-supported dives to be put out of business and a Blethen chum, Chief of Police Wappenstein, to be put in the State penitentiary, where he is now serving his term. The dirty, filthy pictures manufactured by this "patriot" exhibits an awful crime against nature. I can not here give even a suggestion of the filthy details.

Well, my colleagues, as strange as it may seem to you when considering a man who would do such an act as this—and he has been forced to admit the truth of the statement—Alden J. Blethen got mad at me for merely referring to and making a permanent record of his own admitted act. He had caused Judge Humphries to expunge from the record of the King County grand jury a portion of a report in which he was referred to in connection with these red-light investigations. But there was no expunging the record here, and he got mad.

When I got to Billings, Mont., on my way home, I bought a copy of the Sunday Times, and I found in that paper the bitterest, most vitriolic, and libelous statement ever published about myself.

I had been invited to deliver a speech at the King County fair at Seattle and had made all arrangements to be in Seattle for that appointment. Of course I did not know what Blethen had published till I got his paper, but as soon as I read his editorial I determined to go after him at my first opportunity.

When I arrived in Seattle on Saturday morning I was informed by the fair officials that Blethen or some one on his behalf had filed a protest against my speaking unless I would agree not to say anything personal or political.

The King County fair officials were right in their request, but I was determined to roast Blethen in my first speech. I knew another opportunity would be afforded, so I declined to amend my remarks, and it was announced in the afternoon papers that I would deliver the speech at the Dreamland Rink the following Monday night. This was a building of about 5,000 seating capacity.

In his editorial, referred to a moment ago, Blethen had demonstrated the fact that he is as expert at faking in word painting as he is in portraiture. His language was full of the vilest epithets. He declared I had delivered my speech in Congress behind my constitutional privilege, which protected me from attack. He told how I would have been punished by indignant citizens if I had delivered that speech in Seattle. I would have contempt for any Member of Congress who would thus take advantage of his protection in debate on this floor, and, of course, I was anxious to get into the open, where I could throw off all such protection.

In the issue of the Times of the day before the Dreamland Rink meeting he published the following:

This fellow has declared in the Halls of Congress that the editor of the Times is immoral, dishonest, and a profligate.

Then he challenged me to offer any evidence that would be accepted in court against him, and said:

This fellow BRYAN is hereby challenged to produce any legal proof that will amount to the shadow of the violation of the criminal laws during the editor's entire residence in this city covering a period of 17 years, and if he can produce a single item of proof that in any way indicates that the editor of the Times ever violated any law, either of God or man, the Times will pay $1,000 in gold for the proof.

Next morning I addressed to him and made public the following letter:

ALDEN J. BLETHEN, *Seattle, Wash.*

DEAR SIR: In the last issue of the Sunday Times, under the heading "J. W. BRYAN—An assassin of character," you said that I declared in Congress that the editor of the Times is immoral, dishonest, and a profligate.

You further denounced me in the most sweeping terms. You then addressed to me a direct challenge.

I accept your challenge. I will speak at the Dreamland Rink to-night. You are invited to be present. I am willing to divide equally with you a portion of my time before the audience to-night and to agree not to refer to you after that time has expired. After the audience has heard your statements and my statements we will submit the issue to a vote of those present. This decision I am willing to consider final.

You said in your editorial that you have lived in Seattle for 17 years, and that during that time you have not violated any law, either of God or man.

You have the Seattle Times at your disposal and will be able to thoroughly advertise your presence.

If your statement on behalf of yourself is true and what you say I said about you is untrue, you surely will not hesitate to submit your cause to a majority vote of a large assembly of the citizens of the city of Seattle with whom you have lived so long. I will further give you the privilege of setting forth in your remarks on this occasion any facts that warrant your attack upon me as a citizen, a representative, and a man.

Yours, very truly, J. W. BRYAN.

The old fellow has average ability as a speaker. He is a hard hitter and is ordinarily well able to take care of himself. But he did not show up.

The meeting was a splendid success. The immense auditorium was crowded with people assembled to give vent to their contempt of Blethen and the Times. I will refer to the three daily newspapers published in Seattle for the report of the meeting.

The Seattle Sun said in part:

A crowd of 5,000 persons, forming the largest mass meeting ever held in Seattle, jammed into Dreamland last evening, heard a scathing attack by Congressman J. W. BRYAN on Alden J. Blethen, the Times, and Blethenism, then rising showed itself openly and squarely an enemy of those forces.

Time and again BRYAN was interrupted in his remarks by cheers and applause; time and again when he started to outline portions of manuscript he had made a part of his speech the crowd called, "read it all"; time and again his auditors shouted their approval as he scored Blethen as a flag-flapper and a mock patriot, and as he charged that Blethen staged the Potlatch riots for the "cheapest of advertising purposes."

At the close of his address resolutions unanimously were adopted which called on the citizens of Seattle to discontinue all support of the Times and Blethen.

They declared the Times, "with its terrorist tactics and criminal methods, is a menace to Seattle, and is an unrelenting creator of civic discord and debauchery," and that "its existence is made possible by the support of its enemies, who, curious to know the latest victim of its vicious attacks and whether or not the limit of audacity had been reached, continue, unwillingly and apologetically, to buy and read the same."

Therefore, the resolution went, "all fair-dealing and liberty-loving citizens should unite to withdraw their support from the Times and the advertisers who make its existence possible."

The Seattle Star said in part:

Dreamland pavilion was crowded to capacity Monday night with an audience of over 5,000 to hear Congressman J. W. BRYAN attack Blethenism.

BRYAN was given a great ovation when he appeared upon the platform. Blethen failed to show up in acceptance of BRYAN'S challenge.

BRYAN'S speech dealt chiefly with references to his remarks in Congress in which he charged Blethen with staging the Potlatch riots for cheap advertising, the mayor's open letter accusing Blethen with faking immoral photographs of Dr. M. A. Matthews, Blethen's record in Minneapolis, Blethen's "My dear Wap" letter to the ex-chief of police, now in the penitentiary, in which Blethen portrayed a keen interest in the welfare of the notorious Arcade dance hall, and Blethen's continued defense of the wide-open vice régime.

I give below the entire report of the Post-Intelligencer, Seattle's only morning paper, a conservative publication:

BRYAN DECLARES BLETHEN STAGED POTLATCH RIOTS—MASS MEETING OF 4,500 PERSONS PASSES RESOLUTIONS TO WITHDRAW SUPPORT FROM THE TIMES—APPLAUDS SPEECH ATTACKING EDITOR.

Characterizing Alden J. Blethen as an evil and sinister influence, the creator of civic discords, and a menace to the reputations of upright and honest citizens, Congressman J. W. BRYAN addressed an audience of 4,500 persons at Dreamland pavilion last night. The speech was the one which Congressman BRYAN announced in the House of Representatives he would deliver at the King County fair, and which was designed to reply to an attack made upon him by the Seattle Times a little more than a week ago.

The audience indicated its approval of Congressman BRYAN'S denunciation of the editor, and frequently encouraged him with cheers and handclapping. When Congressman BRYAN spoke of the faked photographs of Rev. M. A. Matthews, which were prepared upon the order of Col. Blethen and exhibited to Mayor Cotterill and to others, the audience gave expression to its feelings in a roar that shook the building.

ANTI-BLETHEN RESOLUTION ADOPTED.

At the close of the meeting Glenn E. Hoover, who presided, read a resolution calling upon the opponents of Col. Blethen to withdraw their support from his newspaper. The resolution was adopted with a roar of ayes.

Congressman BRYAN spoke under the auspices of the Free Speech Defense League, and a collection was taken in the crowd to defray the

expenses of the ball. The pavilion was crowded and circus seats erected in the rear and the balconies seated those who could not find chairs on the dancing floor. A fringe of auditors along the four walls stood to hear the address.

Congressman BRYAN announced that he was speaking in answer to an attack printed in the Times following his speech regarding the Potlatch riots and in answer to a challenge of Congressman HUMPHREY to set forth the facts on which he based his statements made in the House.

SAYS HUMPHREY WAS AFRAID.

He said that Mr. HUMPHREY'S speech was made because of pressure brought to bear on him. "HUMPHREY was afraid to go on record in defense of Blethen," Mr. BRYAN said, "and he was afraid to go home unless he did make some kind of a fake attempt at answering my remarks.

"One morning I picked up the morning paper in Washington and I read about anarchy in Seattle, about lawlessness on the public streets so gross and violent that the enlisted men of the United States Army and Navy were compelled, through self-respect for the flag, to take up the cudgel and loot and destroy valuable property. An article was published in the Seattle Times which had been sent out by wire calling the mayor of Seattle, among other things, a loathsome louse, a leader of anarchists.

DISCUSSES JOHNSON INTERVIEW.

"On the next morning an interview appeared from Congressman ALBERT JOHNSON, in one of the papers of the National Capital, in which he likewise censured the city of Seattle and its officers for permitting the red-flag demonstration. Among other things he stated that the American flag had been trampled in the mud in the streets of Seattle by the I. W. W.'s and anarchists. I knew this to be false and that the slanders against the city which had been circulated ought to be met and answered in as public a way as possible.

"After introducing the resolution calling for the facts in the case I delivered a speech on the floor of the House July 29, and inserted in the RECORD following the speech a statement that had been published by the mayor of Seattle and two or three newspaper articles.

BLAMES BLETHEN FOR RIOTS.

"I stated in this speech and I say now that the riots were not an outburst of patriotic sentiment, but they were staged and brought about by the Seattle Times for the cheapest kind of advertising purposes.

"I denounced Alden J. Blethen and the Times as an enemy to Seattle; and after detailing to Congress some of the features of the terrific struggles that the people of this city and State have had against special interests and the agencies of evil, I said that we had finally won in the city and had dethroned a great many of these interests, and the fight Blethen was now making was to restore these old conditions and cause a return to the wide-open town policies of a bygone day."

BRYAN'S SPEECH IN HOUSE.

Reading from his speech delivered in the House of Representatives, Congressman BRYAN recited the incident of the photographs in the statement of Mayor Cotterill over his own signature following the Potlatch riots, in which the mayor declared that Blethen showed him a loathsome picture of Dr. Matthews, made by a cunning composition of one photograph with another. In his speech Mr. BRYAN said:

"I call special attention to the fact that a congressional committee from this House went to Seattle and investigated Judge Hanford. The gentleman from Illinois [Mr. GRAHAM] and the gentleman from New Jersey [Mr. MCCOY] were members of that committee. If any Member of this House desires to verify the diabolical act of Editor Blethen, of the Times, referred to by the mayor in his statement published as part of these remarks as an incident to show the character of the man—I refer to the photograph episode—let him go to Congressman GRAHAM, who has in his possession a description of the low, vulgar pictures of a naked human base to which this corrupt advertiser, at the expense of the flag and of order, this 'patriot' who foams and froths about socialism, caused the head of Dr. M. A. Matthews, the moderator of the Presbyterian Church in America, to be affixed so as to form a new composite portrait—Dr. Matthews, a man of piety, courage, and civic faithfulness, who was at the time urging a grand jury which later caused Blethen-supported dives to be put out of business and a Blethen chum, Chief of Police Wappenstein, to be put in the State penitentiary, where he is now serving his term. The dirty, filthy picture manufactured by this 'patriot' exhibits an awful crime against nature. I can not here give even a suggestion of the filthy details.

"Is it any wonder that a man who could invent such a scheme to discredit a zealous and faithful pastor of national renown, engaged in a splendid work of reform, would consider the mayor of Seattle 'loathsome'?

BLETHEN AND THE FAIR SPEECH.

"When Col. Blethen attacked me in connection with my proposed speech at the fair, it was perfectly natural for any board of managers to believe that my speech would involve personalities, and so far as I am concerned I have no criticism for the King County fair refusing to go into that kind of business; but I would criticize local conditions that would permit a man of the Blethen type to be so enthroned in power and so fortified in the privileges which he asserts as to enable him to control a situation of this kind.

"To be sure, his objection to the fair would hurt the fair, but I believe that there will come in the city of Seattle a public sentiment that will change this kind of thing, and make such objection a benefit to the fair.

"The public have read the vicious attacks Blethen has made upon me within the last few days. To-day I addressed a challenge to him to reply to me at this meeting.

"I have received no answer from Blethen and do not expect to receive one. I therefore consider myself at liberty to present some of the reasons why Alden J. Blethen and the Seattle Times constitute a menace to every decent undertaking in the city of Seattle. The editor very properly interprets the photo episodes as involving immorality on his part.

ACCUSES BLETHEN OF BLASPHEMY.

"All I said in my congressional speech was that they had manufactured these awful pictures, which are so low and filthy and corrupt that no reputable speaker could possibly describe them before an audience of this kind. Yet with that superb effrontery that has characterized his operations in this city since he became publisher of his paper he blasphemously asserts that he has never violated a single law of God or man.

"Read, if you will, his Wappy letter. Remember that the officials of the city of Seattle here exposed an awful corrupt situation involving the lewest forms of vice, and that Wappenstein was later convicted and sent to the penitentiary because of his part in these proceedings.

"Why should a man be permitted by the public in a community such as the city of Seattle to own and operate a newspaper on behalf of such interests as this? Consider the Minneapolis activities of Blethen. Consider his association, with that of his paper, with all forms of vice in the city of Seattle, and then answer why he should not be condemned, why any organization should not be encouraged to protest against his continued power.

"In politics his paper has always favored the lowest measures that could be proposed. He hates reform; he despises civic decency."

At the close of the meeting by a tremendous acclamation and without opposition the following resolution was adopted:

Whereas the Seattle Daily and Sunday Times as now conducted with its terroristic tactics and criminal methods is a menace to the liberties and the reputations and even the lives of the residents of Seattle and is an unrelenting creator of civic discord and debauchery; and

Whereas its existence is continued and made possible by the support of its enemies, who, curious to know the latest victim of its false and vicious attacks and whether or not the limit of audacity has been reached by the owners and editors of the Times, continue to unwillingly and apologetically buy and read the same: now, therefore, be it

Resolved by the citizens of Seattle in mass meeting assembled, That all progressive, fair-dealing, and liberty-loving citizens unite to withdraw their support from the Times and the advertisers who make its existence possible.

It will be seen that I read from the speech I had delivered here and thus reiterated the statements that Blethen said I had made only because I was protected in what I had to say here on the floor.

Blethen did not make good his threat of violence, but reverting to his ability to fake with words as well as with pictures, he published a lot of false and libelous stuff, impugning my honesty and fitness to occupy a seat in this body. His accusation could have no influence with those who knew me, but I believe it a personal privilege, to which I am entitled as a matter of right, to denounce these publications and show to the Members of this House and to such of my constituents as may read this RECORD wherein his publications are false and thus divert the calumny which those who do not know me might attach to my name and reputation on account of the publications. I have been informed that copies of these publications have been circulated here, and I demand the right to show their utter falsity.

The gravest part of his charges were these: He said that the court records show me charged with the crime of perjury and various acts of professional delinquency, which he enumerated. It is true that the record did once show me charged with perjury, but I was fully vindicated by an acquittal that fastened infamy upon the corrupt political judge who ordered the prosecution.

It is also true that I was once charged with professional delinquency by this same corrupt judge and his friends of the bar in the little county where I was engaged in a political life and death struggle in the State of Washington.

The charges of professional delinquency were investigated and tried by a coordinate judge, and I was again fully vindicated by the court's finding.

The judge who ordered the prosecution has lost his place on the bench and left the State. His name is John B. Yakey. He now resides in Los Angeles, Cal.

The judge who vindicated me has been advanced since the trial by popular vote from superior judge of King County to supreme judge of the State of Washington. His name is John F. Main, and he has made a record for impartiality and integrity that ranks him as one of the foremost judges of the Northwest.

In the alleged perjury proceeding I was trying to obtain from this Judge Yakey a change of venue in a murder case where an officer of the Navy, whom I was defending, was accused of murder. He ordered the trial to be proceeded with and said he would again take up the affidavit for change of venue after the trial was over.

My client was convicted of manslaughter, but I reversed the judge in the supreme court, and when the case was tried again I obtained a dismissal from a coordinate judge on account of the defendant's insanity, which had existed all the time. His name is John Stokes. He is out here at the St. Elizabeth asylum now.

Immediately upon the termination of this first trial of John Stokes, Judge Yakey ordered me prosecuted for perjury. The papers were not to be served till the next day, but the Seattle Times had an enlarged picture of myself and the news of my coming trial, with most prejudicial and false statements, on the street within a few minutes after the judge had made the order. The news had evidently been prepared and held subject to release.

When the case came to trial the judge who was called in to conduct the trial directed the jury, in the usual form, when they had arrived at a verdict, to appoint a foreman, who would sign

same and report it into court. When the jury came in a most unusual thing happened. The judge looked at the verdict, and then leaned over toward me and said: "All the members of the jury have signed the verdict. Is there objection to receiving it in this form?"

Of course I had no objection. Every member of the jury had signed the verdict and was proud to have his name on my vindication against the crooked political job they had tried to put up on me.

In about three days I was served with a motion for disbarment by certain Yakey underlings at the bar, who had been taught to obey orders. Three of these have since left the State.

I had whipped the sawmill political organization in my State senatorial district by being elected over their idol to the State senate. I had been in a red-hot fight with the whisky crowd at the navy-yard town. They had determined to eliminate me. Three of the saloons at the county seat were renting their saloon buildings from his honor, Judge Yakey, who had been put on the bench through the political pull of the State senator I had defeated. The judge was to drive me out of court and the rest would speed me on out of the county.

I was without funds and they all knew it. Politics and the fight with the judge had taken from me the major portion of my business. I was really up against it, but I took a second breath and started a newspaper, The Navy Yard American. I had the paper printed each week in Seattle. It was an eight-page paper. We got out the paper at nights.

My disrespect to the court in these publications was the main dependence of the judge and his underlings in their effort at disbarment. They raked my court record thoroughly, and made a cause of action out of every case where either client was mad enough to complain. They accused me of soliciting business—barratry—and renewed their perjury charge. The case was assigned to Judge John F. Main, who was sitting in Seattle, for trial. He was a perfect stranger to me, but he had been a university instructor and was a man of splendid reputation. He was a Presbyterian and hated crooks.

When my disbarrers came before the court they opened up with the barratry charges. The evidence consumed the best part of three days, when the judge said: "If you have any substantial testimony or charges to present, you had better get at them."

Then they took up the perjury charge. Judge Main, after a day's testimony and before I had begun to defend, said: "There's no perjury in it. Go to something else."

Then they took up some miscellaneous charges fathered by Judge Yakey, but they made no headway. Nearly six days had been consumed, and they placed in evidence the files of the Navy Yard American, showing my unquestioned and admitted disrespect for the judge. They wanted the court to disbar me for not respecting him. But by this time it seemed apparent that Judge Main had no more respect for Judge Yakey than I had.

I had defended my own case. Judge Main looked to me and asked what would be my defense as to these publications. I told him I had witnesses to prove the truth of every publication.

"Well," said the judge, "that would take a long time, and I do not care to go into that. These publications arose from a condition between two factions that is indescribable in the English language."

As to the barratry charges, he said: "The whole array, taken all together, are not worthy of the consideration of the court for one moment."

And thus he gave to me the fullest vindication and dismissed the proceedings, finding that I had committed no act which should subject me to any punishment whatever.

In the meantime I had procured the enactment of a law through my position as State senator, which enabled me to get one change of judge upon filing an affidavit of prejudice. The court had no option about granting it. This put an end to Judge Yakey, for it was seldom that both sides were willing to try a case before him. It amounted to judicial recall.

All through these fights the Seattle Times has aided Judge Yakey and the crowd against me, publishing false stories in an effort to humiliate me. Blethen knows of my vindication. He knows the charges are false. Yet he publishes that they are pending of record against me. I shall be glad of the closest scrutiny of my record.

As soon as these publications were made I filed a libel suit against Blethen, hoping thereby to get him before court at an early date and expose in that way to those not already informed his falsehood and corruption. I tried to get a stipulation to try the case during the month of November, so that it could be presented to a jury before the December session of Congress required my attendance. His attorneys refused to do this.

In his answer to this suit Blethen declared under oath that it was his opinion that I had attacked the Times in Congress merely to get the support, in a political way, of the enemies of the Times, and he further declared that the attacks in the Times on me had not damaged me in any particular whatever.

This declaration in itself is a vindication and a confession of pusillanimity incomprehensible. In other words, the old fellow will go into court and attempt to show that an attack on me by the Times, howsoever vicious, does not injure me, and he will thereby assert and try to prove that his paper, although it enjoys a large circulation, is held in such contempt by the public that its editorial utterances are disregarded and its knocks are boosts.

I thank the Members for their courtesy in listening so kindly to these remarks. I am glad to have answered the charges. I believe it was a duty as well as a privilege. It takes patience, nerve, and a good shot to fight these gangsters in the West as well as in New York City.

Blethen has always fought with them and aided them. They try to destroy any man who gets in their way. But there is a new element asserting itself now. Women figure in the movement, and I tell you we are going to mow this old crowd down like bitter weeds. Their day is past. No man with a clean record need fear them. [Applause.]

Mr. MURRAY of Oklahoma. Mr. Speaker, I desire to make a parliamentary inquiry. I wish to know whether there is any other special order just now?

The SPEAKER. Yes; there is a special order for the gentleman from Montana [Mr. EVANS] to speak for 40 minutes on corporal punishment, and he is now recognized.

CORPORAL PUNISHMENT.

Mr. EVANS. Mr. Speaker, on November 8 the press of the country carried the following dispatch:

WILMINGTON, DEL., *November 8, 1913.*

Six prisoners—two white men and four negroes—all convicted of robbery, were whipped on their bare backs with a total of 95 lashes at the Newcastle County workhouse to-day. James Bayard and William Reason, negroes, each received 20 lashes for burglary. Next Saturday they will each receive a similar number of lashes. In addition Bayard will serve 14 years in prison and Reason 11 years. The court divided the administration of the lashes for fear the victims could not stand the penalty all at once.

On November 11 I introduced in the House the following resolution:

Whereas it appears from dispatches published in the public prints that six prisoners—two white men and four negroes—all convicted of robbery, were whipped on their bare backs with a total of 95 lashes, at the Newcastle County workhouse, in the State of Delaware, on November 8, 1913; and

Whereas it further appears that two of said prisoners, James Bayard and William Reason, negroes, each received 20 lashes for burglary; and

Whereas it further appears that on Saturday next, November 15, these two men will each receive a similar number of lashes on the bare back, and in addition Bayard is sentenced to serve 14 years in prison and Reason 11 years; and

Whereas it further appears that the court divided the administration of the lashes for fear the victims could not stand the penalty all at once; and

Whereas the eighth amendment to the Constitution of the United States of America provides that "cruel and unusual punishments shall not be inflicted"; and

Whereas it is manifest from the fact that the court divided the imposition of the number of lashes for fear of causing the death of the victims that such punishment is cruel; and

Whereas such method of punishment is a relic of medieval barbarism and is not generally practiced in civilized countries and is therefore unusual: Therefore be it

Resolved, That the President of the United States and the Attorney General of the United States are hereby authorized and directed to cause to be brought in the Federal courts an injunction proceeding against the State of Delaware, or the officials and employees of such State who may be responsible for the condition of affairs above set forth, or that the President and Attorney General take such other action as in their judgment may be proper to enforce the provisions of the Federal Constitution and prevent the infliction of this cruel and unusual punishment upon these prisoners on Saturday next, November 15, and to prevent the practice of such cruelties hereafter in said State of Delaware or elsewhere in the United States of America.

It will be observed from the above dispatch that it is alleged that the punishment imposed upon the men in question was by the court divided for fear the victims could not endure the penalty all at once. The resolution was based very largely upon the statements contained in that dispatch. I know it is now denied that the punishment inflicted upon these and other men in the State of Delaware is a cruel punishment, but I submit that any punishment must be cruel if it be necessary in inflicting that punishment that it be divided into two parts because in the opinion of the court the victims could not stand all the punishment inflicted at one time. If it be said that it is not unusual, then I suggest that any punishment is unusual if it be a punishment inflicted by one State only and not inflicted by any other civilized country. It must of necessity be unusual.

Believing, therefore, that this punishment was both cruel and unusual, I introduced the resolution as above set forth. When it was ascertained that no action could be or would be taken by the House on the passage of this resolution because of the absence of a quorum; and believing firmly in the merit of my contention that something should be done to stop and stay the hand that was within four days again to lay stripes upon the backs of two human beings, I appealed to the Attorney General of the United States, calling his attention to the matter of the introduction of the resolution and of its temporary disposition, and asked that he take such steps as in his judgment the matter merited. The Attorney General advised me that it was his understanding that the courts had decided that the eighth amendment to the Constitution of the United States, providing against the infliction of cruel and unusual punishment, applied to the Federal courts and not the State courts, and that he therefore felt there was no action he could take in the premises. So far as I am concerned, I am perfectly willing to abide by the decision of the Attorney General, and I have no doubt he is correct in his views on the subject. Notwithstanding that, I still feel that somewhere, at some time, a remedy will be found which will forever put a stop to the practice of the courts of Delaware, which are so realistically described in an article by Mr. Bond P. Geddes, that I take the liberty of reading it in full:

NEWCASTLE COUNTY WORKHOUSE,
Wilmington, Del., November 15.

(By Bond P. Geddes, staff correspondent of the United Press.)

Pinioned to a "whipping post," with backs bared to freezing winds, two prisoners were publicly flogged here to-day. Each was grilled with 20 lashes. There were 20 last Saturday; 20 more to-day. Thus was the "peace and dignity of the State of Delaware" upheld.

The flagellation was the refinement of "modern medievalism." It was the twentieth century observance of Puritanical punishment. The flogging was "for men only." It was "guaranteed bloodless."

The guaranty was kept by Warden Leonard Crawford, whose hand has flogged a hundred men, according to his own account, within a few years. With scant ceremony—almost in haste—the backs of the two prisoners were beaten until they clung in silent anguish to the "posts" to which they were fastened, with arms upraised and flesh quivering, writhing convulsively.

A feeble moan from one of the victims was the only outward sign of their torture. Their faces were distorted, their fingers clutched convulsively, but they attempted to bear the pain stoically.

A tiny courtyard, with walls of gray stone 15 feet high, was the scene of the scourging. The "stockade" is its official name. Its victims call it the "torture pen." Scarcely 20 feet square, with two iron doors, one for spectators and one for the victims of the "cat," a stone walk to-day divided two dozen spectators and the actors in the grim penance.

The "shrine" of Delaware's penal code was the "whipping post" and a pillory—both heirlooms of a century ago—but both newly built. Both were under a wide roof projecting over one corner. They were painted green, the post alone showing evidence of use, the pillory having been in disuse for a decade.

Forty seconds of excruciating pain was the toll taken by the "post" to-day. William Reason and James Bayard, colored burglars, were its victims. Each received 20 lashes. Less than seven minutes were required for the floggings. Reason was led into the yard at 10.20. At 10.27 Warden Crawford turned to the morbid group of spectators as Bayard was led away with a half apologetic smile and said, "All over."

Assured that all newspaper men were present, Warden Crawford gave the signal for the public punishment. The two men had been brought to the stockade by two bailiffs from the workhouse, 50 yards away. A silent sign was given, and Reason walked in with Reason, the first victim. His hands were shackled. His bare back was covered with a rough blanket. With faltering, shuffling steps he was led before the post.

The man's face blanched visibly as he straddled the post. At an unspoken order from the turnkey he raised his hands outstretched above his head to two iron manacles fastened on either side of the wooden pillar. The refinement of cruelty was the placing of two heavy woolen gloves on his knuckles to keep the heavy iron hasps from biting in.

The turnkey whisked the blanket from his shoulders, exposing his nakedness to the waist. Not until then did the man flinch. He bowed his head and leaned heavily for support upon his fettered wrists, while the turnkey stood off and read the sentence of the court that he be flogged. Behind his back Warden Crawford held the "cat." It had nine leather thongs, 2 feet in length, attached to a slim hickory handle as long as the thongs.

"One," the turnkey began counting, and the whip whisked through the air. It landed across the small of the prisoner's shoulders. Livid marks, turning to a slimy, smoky white against the skin, were its records.

"Two," said the turnkey, and with monotonous counting, about one second apart, the warden flayed the quivering, cringing torso. Reason's hand clenched at each blow. He seemed to shrink, with escape impossible, from each stroke.

At the count of "twenty" the prisoner sighed. The blanket, replaced on his shoulders, shut out the grim work of white lashes from the fangs of the "cat," with which he was covered from neck to waist. The warden apparently exercised care to distribute the lashes over the man's back, but the whole back was a net work of whip marks when he concluded.

Bayard was led in immediately. He showed less "gameness," jail attaches said, than Reason. Bayard showed faint traces of the 20 lashes he had received a week ago. He also showed a deeper recollection of his former ordeal. His eyes remained in a spasm of mental fear when he entered the stockade. He leaned heavily upon the turnkey when his eyes turned to the "post." He almost fell when his hands were being shackled to the pillory. After the reading of the flogging sentence by the turnkey, the man frantically hugged the post, awaiting the count of "one."

As the lash fell his shoulders contorted his whole back into a writhing mass of twitching muscles. At each stroke his shoulder blades met, opening when the lash was swishing through the air and meeting, like clockwork, when it fell. The first stroke hit over his kidneys; the second lapped his neck.

At the final count of "twenty" from his lips came a long, low moan—a hissing sigh—his whole body relaxed and he wilted wearily and heavily, suspended by his pinioned wrists.

Neither man made an outcry. But both were half bent when they left the stockade. Reason was able to walk alone. Bayard leaned upon the turnkey's arm. The "straight-arm" stroke was used by Warden Crawford. He said the law prohibited "brutal beating" of men sentenced to the "post." His arm was not flexed. It was outstretched, with the goad applied lightly but firmly. That the warden did not use the force to-day that has often been used before was the statement of several spectators who claimed to be "repeaters" at Delaware floggings.

"It's a farce to-day," one said.

Although the warden denied that his touch was lighter to-day because of the agitation in Congress and elsewhere for abolishment of the whipping post, and because a larger crowd of spectators and newspaper reporters than usual were present, some spectators insisted that the floggings to-day lacked their usual "punch."

Like all floggings, those to-day were public, except that women and cameras were barred. Just 27 men, including a half dozen newspaper men, saw the punishment to-day. Among them were a bunch of actors playing at a local theater.

"It's an old story to the people of Delaware; they don't have any interest in it, and don't turn out any more," said Warden Crawford.

In addition to the flogging for their crimes, Bayard must serve 14 years in prison and Reason 11.

Lest it be suggested that I am assuming an air of "holier than thou" or I am attempting to make some invidious comparison between the State of Delaware and some other State, permit me to say that at no time during this discussion has anyone heard me utter one harsh word or one word bearing the slightest spirit of vindictiveness or asper. toward the State of Delaware. The State of Delaware was one of the original thirteen States. She has furnished her quota of men when great problems and crises have arisen in this country. She does not need any defense from me, and she does not need any defense from any other man. Her own deeds are her best defenses. But notwithstanding all the great things the State of Delaware has done, there are millions of people who feel that there is one thing she has left undone which does not add to her credit, and that is her failure to keep abreast of the times and abolish the last relic of cruelty incorporated in her laws before even the adoption of the Constitution of the United States.

In a discussion of this question a few days ago by the gentleman from Delaware [Mr. BROCKSON] he assumed to discuss the matter, not upon the high plane of whether or not the great State of Delaware was inflicting cruel and unusual punishment in the execution of its penal laws, but rather discussed the question of whether or not the particular victims of that law were guilty of the offense of which they were charged, and even suggested that they were guilty not only of the offense of burglary, of which they were charged, but were guilty of an offense against the womanhood of the State of Delaware. All that appeals to me to be but a begging of the question. It is immaterial whether these individual men were guilty or not, or of what they were guilty. The question is, Does the State violate the fundamental law of the land when it inflicts corporal punishment for any offense committed? I recall that in the discussion of this matter by the gentleman from Delaware he made the statement that corporal punishment is never inflicted upon a woman in that State.

Now, I submit the question, Why is a woman not flogged in Delaware? If the fundamental law of the land is correct, that all men are equal before the law, and using the term "men" in its generic sense, why should not a woman be flogged if a man be flogged? And the answer comes back immediately: To flog a woman would be cruel, so cruel that the good citizens of Delaware would not sit complacently by and permit it. All of which appeals to me to prove that corporal punishment as inflicted in the great State of Delaware is cruel and in direct violation of the best sentiments of the country, whether the eighth amendment to the Constitution applies only to the Federal Government or applies to all the people of the Federal Government.

During the past week I have received scores of letters commenting upon the whipping post, and I beg to quote from one of these letters. It reads:

You are entirely right in protesting against the brutal whipping post in Delaware. It would make your blood boil if I were to tell you of some of the cruel whippings I have witnessed. I have lived in Delaware for 43 years and have seen the brutal lash wielded many times. One time I recall a young negro was manacled to the post. He was whipped with 20 lashes. The first time the sheriff struck him he screamed in agony; the second stroke the poor victim pulled himself up as far as his clasped hands would allow and kicked both feet at the sheriff. That gentleman (?)—the sheriff—jumped to one side, and then getting on his tiptoes struck the helpless creature 18 times more with all the brutal strength he could master. The negro was almost in a state of collapse as he was led from the post. The sheriff who did the whipping was a man who at that time weighed 250 pounds. He died a few years ago.

This is the comment of a man who informs me that he is a business man in the State of Delaware, where he has resided for 43 years; and yet it is suggested that to mention the matter

of whipping in that State is to give evidence of the fact that some one is for the time being afflicted with a spasm of virtue.

Since this agitation was begun the press of the country generally has commented upon the whipping post, and most of the papers have characterized this instrument of torture as a relic of barbarism now entirely outgrown by civilized countries. I find, however, some exceptions, the most notable one that has come under my observation being the Philadelphia Inquirer, which, under date of November 13, spoke editorially as follows:

DELAWARE'S WHIPPING POST.

[From the Philadelphia Inquirer, November 13, 1913.]

It was certainly very kind and humane for a Member of Congress from Montana to show such interest in Delaware as to introduce a bill to abolish the whipping post, the time-honored institution of the three counties below us. His interest in the Constitution is commendable. His idea is that the whipping post comes under the constitutional prohibition of "cruel and unusual punishments." It is much to be regretted that the gentleman from Montana is not better versed in history.

When the Constitution was adopted the whipping post, stocks, and other methods of punishment now forgotten were quite usual, and none of them was considered cruel. What the Constitution aimed at was dismemberment—as of the hand for theft—and other choice methods which were usual but cruel, and it was provided that no unusual methods should be devised to replace them. The whipping post is not cruel or unusual under the Constitution, and its survival in Delaware is due to peculiar geographical circumstances. Many efforts have been made to abolish this form of punishment, and they would have succeeded were it not for the fact that the northern part of Delaware contained first the highways and later the railways which form the trunk line of travel from New York and Philadelphia to Baltimore and Washington. Along this line every year travel thousands of tramps and crooks of various kinds, who occasionally commit crime and "make a getaway," but the truth is most of them give Wilmington and Newark a wide berth, because they fear the whipping post more than any other punishment.

As a fact, the whippings of ordinary offenders are generally innocuous. It is only when a rank offender, especially one from outside the State, bares his back to the sheriff that he feels the rigors of the cat-o-nine-tails, and he rarely gets more than he deserves. The whipping post is simply Delaware's warning to criminals to keep out, and usually they keep out. More whipping posts in the country for certain criminals would be desirable. The gentleman from Montana should rest his soul in peace.

The author of this editorial, speaking for the great city of Philadelphia and for the people of Pennsylvania, tells us that the reason why they do not abolish the whipping post in Delaware is because Wilmington is on the great highway of travel from New York to Washington, and therefore they can not abolish it. Well, I thought that Philadelphia was on the highway, too. I have heard that Philadelphia was very quiet sometimes, but I supposed it was at least on the highway, and if for that reason they needed a whipping post at Wilmington they surely needed it in Philadelphia, where the Inquirer is published. That does not seem to be an argument at all on the whipping post. It is begging the question to say that the whipping post is retained because Delaware is on the line of railway and the line of travel.

In contrast with the utterances of the Inquirer, the Philadelphia Public Ledger, likewise published in the City of Brotherly Love, makes the following comment:

[From the Philadelphia Ledger, Nov. 12, 1913.]

DELAWARE AND THE WHIPPING POST.

If Congressman EVANS, of Montana, shall persist in his attack in the House upon the Delaware whipping post as a punishment for her prisoners, he may force the Diamond State to abolish that relic of a bygone age and civilization.

Mr. EVANS offered a resolution directing Attorney General McReynolds to enjoin the authorities of the Commonwealth from lashing her culprits on the bare back with a knout, on the ground that the whipping post violates the prohibition in the Federal Constitution against "cruel and unusual punishments."

Several hundred years ago flogging was not unusual and was not deemed cruel; in earlier days the use of the thumbscrew and the rack and breaking upon the wheel were not unusual, and there was a time when the untamed instincts of the world tolerated the drawing and quartering of felons and traitors, but the world has moved along. The cat-o'-nine-tails has had its day, physical suffering and cruelty are not accepted means of correction or punishment, yet Delaware clings tenaciously to the ancient practices.

The State should abolish its anachronistic device. It does not reform prisoners, it degrades them. It does not uplift the community; it shames and brutalizes it. The whipping post is a relic of barbarism more adapted to the civilization of Russia than to that of the United States.

The question naturally arises, What punishment should be visited upon the petty offender? And I confess that I am not prepared to say. But I do feel confident that progress is not being made by clinging to a system which has been repudiated and abandoned for a hundred years by other States. The great problem of penology is one of the questions now engaging the master minds of the country, and I have no doubt will in time be solved. I give it as my personal conviction that much more progress is being made in the solution of this question by some of the newer States of the West, such as Oregon, California, and Colorado, than is being made in the East.

A man is a human being, whether he be a criminal or an honest, law-abiding citizen, and in the judgment of men who are to-day making a success in the handling of criminals of the country, those criminals must be treated as human beings regardless of what laws they have violated. In the State of Montana four or five guards control 100 prisoners building roads through the mountains of that State. These prisoners consist of men serving terms all the way from a few months to life, and yet comparatively no trouble is encountered with them, not 1 per cent of them attempting to escape. They are treated like human beings. They know the penalty of an effort to escape, and they know that so long as they obey they will be treated like human beings. How long, in the judgment of any Member of this House, do you think five men would have control over 100 criminals if for some offense one of those criminals was manacled to a post and lashed in the presence of his comrades? In my judgment, only long enough for the helpless victim to shriek with pain when the first lash was laid upon his back, when the animal instinct would be aroused in every man within the sound of his voice. That shriek would simply be a "call of the wild."

Mr. Wines, in his excellent work on Punishment and Reformation, says:

The basis of legal punishment may be reduced to a single principle, that of the protection of society. Society is protected, first, by the removal and isolation of the offender, who is thus disarmed and made a prisoner of war, hors de combat; second, by the exemplary and deterrent influence upon others exerted by the spectacle of his discomfiture and suffering; but the third, and most effective, way in which this result can be obtained is by reformation, which converts an enemy into a friend, and a destructive into a constructive social force. The right of society to defend itself is indubitable, yet it is not without limits. Might is not always right, and the will of the majority is not always just. The individual has rights, and his immolation upon the altar of a supposed public exigency may react against the majority in the same way in which disregard for the rights of the community by an individual reacts against the individual. * * * The history of criminal jurisprudence is the reflection in miniature of the history of the human intellect and conscience. With advancing morality, measures indispensable in a former age become repugnant to the popular sense of right, and therefore obsolete. * * * The criminal law is, when it is rational and equitable, and is administered with intelligence and humanity, designed and adapted to effect the amendment of those subjected to its afflictive penalties. The model of human government is found in the divine order, in which we are chastened to our profit. The judgments of God are designed to lead us to repentance.

The whipping post degrades not only its victim but society that exacts such punishment. Humanity never has been reformed by a punishment that tends to degrade the victim of the law. When you manacle a man to a post and beat him across the back you make of him an enemy to society. You have degraded him and you degrade society. Malice and hatred toward all the world are sown in his heart, and sooner or later the seed must bear fruit.

If there is any justification for the whipping post to-day, is there not equal justification for the pillory, the stocks, the rack, and a hundred other devices formerly used as instruments of torture? You will all readily recall that men were punished by branding, mutilating, disemboweling; that they were staked upon the sands of the sea that they might be drowned by the slowly rising tide; and that every means known to the human mind were employed for the purpose of inflicting pain upon the helpless victim who was so unfortunate as to fall within the pale of the law. But as our civilization advanced, all these cruel forms have been discarded, and we find to-day only one of all that host of medieval relics of barbarism remaining, and that is the whipping post in the neighboring State of Delaware.

To resort to the whipping post in this the twentieth century is simply a "call of the wild." It is the brute instinct again taking possession of our people. No crime was ever deterred by the commission of another crime. To take a helpless human being, bind him to a post, and beat him to the extremity of human endurance is revolting to all the finer feelings and passions of humanity and must of necessity degrade both the helpless victim, the man who applies the lash, the mob who look upon the crime, and the State or Nation that sits idly by and does nothing to prevent its commission. [Applause.]

Mr. BROCKSON. Mr. Speaker, I ask unanimous consent to address the House for 15 minutes in reply to the gentleman from Montana [Mr. EVANS].

Mr. DONOVAN. I am going to object, Mr. Speaker.

The SPEAKER. The gentleman from Connecticut [Mr. DONOVAN] objects.

ADJOURNMENT UNTIL NEXT WEDNESDAY.

Mr. RUSSELL. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on Wednesday next.

The SPEAKER. The gentleman from Missouri [Mr. RUSSELL] asks unanimous consent that when the House adjourns to-day it adjourn to meet on Wednesday next. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

Mr. RUSSELL. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. Will the gentleman from Missouri [Mr. RUSSELL] reserve his motion to adjourn for a moment?

Mr. RUSSELL. I will.

The SPEAKER. The Chair desires to correct a ruling that he made on Thursday, November 20. On that day the gentleman from Kentucky [Mr. THOMAS] offered the following privileged resolution:

Resolved by the House of Representatives (the Senate concurring), That the President of the Senate and the Speaker of the House of Representatives be authorized to close the present session by adjourning their respective Houses on the 22d day of November, 1913, at 1 o'clock p. m.

In answer to a parliamentary inquiry, the Chair ruled that the resolution was debatable. That ruling was made hurriedly, without opportunity to examine the authorities and without time for reflection, and the question had never been raised before during the 19 years in which the present occupant of the chair has been in the House.

It turns out that on March 23, 1871, Mr. Speaker Blaine held a similar resolution to be not debatable. That is the only decision on the point that the Chair has been able to find after thorough investigation, but that decision of Mr. Speaker Blaine has been accepted by the House for 42 years. But aside from that decision, upon mature reflection and reasoning from analogy, the Chair thinks the resolution is not debatable, because if declared debatable such resolutions might be converted into instruments of troublesome filibustering, just as a motion to recess was used until deprived of its privileged character. Therefore the decision of Mr. Speaker Blaine is affirmed.

Mr. CLARK of Florida. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CLARK of Florida. I would like to know, Mr. Speaker, in view of the Speaker's ruling that the resolution is not debatable, whether it is not in order to put the resolution to a vote.

The SPEAKER. Nobody had asked to put it to a vote——

Mr. CLARK of Florida. I do now——

The SPEAKER. And the gentleman from Missouri [Mr. RUSSELL] had moved to adjourn, and withheld his motion for the accommodation of the Chair.

Mr. CLARK of Florida. Mr. Speaker, one further parliamentary inquiry. Does a simple motion to adjourn take precedence of a concurrent resolution to adjourn at a certain day?

The SPEAKER. The concurrent resolution is not pending.

Mr. CLARK of Florida. I thought it was unfinished business.

Mr. MANN. It is pending as unfinished business, but the other motion takes precedence.

The SPEAKER. There is no use in discussing whether it is unfinished business. The Chair has been investigating to see if there can not be some substantial fixed limits to unfinished business; but the motion to adjourn was made, and the resolution which the gentleman refers to is not before the House.

Mr. CLARK of Florida. If it is unfinished business, it is pending.

The SPEAKER. Not necessarily.

Mr. RUSSELL. Mr. Speaker, other business has intervened since that resolution was before the House.

Mr. CLARK of Florida. The gentleman from Kentucky was here this morning to call it up.

The SPEAKER. He could not call it up this morning, under the ruling of the Chair—whether right or wrong—that these gentlemen had the right under the special order to first address the House.

Mr. CLARK of Florida. I noticed that the Speaker said that as soon as these speeches were finished the resolution would be in order.

The SPEAKER. That is true, but the gentleman from Missouri [Mr. RUSSELL] has moved to adjourn, and his motion is pending.

Mr. CLARK of Florida. But is not the resolution in order under the ruling of the Chair this morning, that the House having made the special order for addresses of these gentlemen, as soon as they had finished the Speaker would recognize the concurrent resolution?

The SPEAKER. The Chair said that he would recognize the gentleman from Kentucky to call it up.

Mr. CLARK of Florida. Does not his attempt to call it up make it unfinished business?

The SPEAKER. No. There are two or three resolutions now pending in exactly the same parliamentary status as the one the gentleman refers to and which have been pending longer.

Mr. MANN. I have one pending which is a privileged resolution.

The SPEAKER. Yes; and the gentleman from Missouri [Mr. HENSLEY] has one in the same situation.

Mr. DONOVAN. Mr. Speaker, I call for the regular order.

The SPEAKER. The regular order is the question on the motion to adjourn.

Mr. MURRAY of Oklahoma. Mr. Speaker, I wish the gentleman from Missouri would withhold his motion for a minute.

Mr. RUSSELL. I will withhold it if the gentleman wishes to ask unanimous consent.

Mr. MURRAY of Oklahoma. Mr. Speaker, I ask unanimous consent to address the House for not exceeding 10 minutes.

Mr. RUSSELL. I can not consent to that. I thought the gentleman was going to ask unanimous consent to extend his remarks.

Mr. BROWNING. Will the gentleman from Missouri withhold his motion for me to ask unanimous consent to insert something in the RECORD?

Mr. RUSSELL. I will.

MATERIAL FOR CONSTRUCTION OF SHIPS OF WAR.

Mr. BROWNING. Mr. Speaker, I ask unanimous consent to insert in the RECORD a short article from the Army and Navy Register, dealing with economy in the administration of Army and Navy affairs, a subject of deep interest to the multitude of men who earn their living in the navy yards and in the shipbuilding plants of the country. The article referred to is instructive as well as illuminating.

The SPEAKER. The gentleman from New Jersey asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. RUSSELL. Mr. Speaker, I now renew my motion to adjourn.

The SPEAKER. The gentleman from Missouri moves to adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 34 minutes p. m.) the House, under its order previously agreed to, adjourned until Wednesday, November 26, 1913, at 12 o'clock noon.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 3260) granting an increase of pension to John McMahon, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. FRENCH: A bill (H. R. 9393) to protect the rights of women citizens of the United States to register and vote for Senators of the United States and for Members of the House of Representatives; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. LEVY: A bill (H. R. 9394) to amend section 6 of the act entitled "An act to regulate commerce," approved February 4, 1887, and amendments thereto; to the Committee on Interstate and Foreign Commerce.

By Mr. SMITH of Idaho: A bill (H. R. 9395) providing for an appropriation for the extermination of jack rabbits, ground squirrels, and prairie dogs; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 9396) granting an increase of pension to Mary Ann Elson; to the Committee on Invalid Pensions.

By Mr. DONOVAN: A bill (H. R. 9397) granting an increase of pension to Harriet C. Price; to the Committee on Invalid Pensions.

By Mr. HENSLEY: A bill (H. R. 9398) granting an increase of pension to James Brown; to the Committee on Invalid Pensions.

By Mr. HILL: A bill (H. R. 9399) granting an increase of pension to Lucinda Kennedy; to the Committee on Invalid Pensions.

By Mr. LANGHAM: A bill (H. R. 9400) granting a pension to Frank M. Frey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9401) granting a pension to Anna E. Hetherington; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9402) granting an increase of pension to Elizabeth Hamilton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9403) granting an increase of pension to George W. Weaver; to the Committee on Invalid Pensions.

By Mr. REILLY of Connecticut: A bill (H. R. 9404) granting an increase of pension to Emily L. Barnes; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 9405) granting a pension to Johanna Miller; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Alabama: A bill (H. R. 9406) granting a pension to Winona Hawthorne Buck; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. CARY: Memorial of Lake Michigan Steamboat Line, protesting against the passage of the La Follette seamen's bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. CURLEY: Petition of the Boston Central Labor Union, favoring congressional investigation of conditions in the mining district of Colorado; to the Committee on the Judiciary.

By Mr. CURRY: Memorial of the Sacramento Federated Trades Council, favoring the passage of House bill 7207, relative to water rights of the Hetch Hetchy Lake; to the Committee on the Public Lands.

By Mr. DALE: Petitions of Hull, Crippen & Co. and H. F. Hadden, of New York, N. Y., protesting against the passage of the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. LA FOLLETTE: Memorial of the Spokane Chamber of Commerce, Spokane, Wash., favoring the recommendation of military officials for the strengthening of the United States Army; to the Committee on Military Affairs.

By Mr. REILLY of Connecticut; Petition of the New Haven Political Equality Club, of New Haven, Conn., protesting against the action of the Russian Government in the ritual murder charge; to the Committee on Foreign Affairs.

By Mr. SUTHERLAND: Papers in support of House bill 5567, for the relief of the estate of John Snyder; to the Committee on War Claims.

SENATE.

MONDAY, *November 24, 1913.*

Rev. H. H. Hoss, D. D., of Nashville, Tenn., bishop of the Methodist Episcopal Church South, offered the following prayer:

Oh, gracious God, our heavenly Father, Thou art enthroned in the heavens. Thy sway extends over all things, material and immaterial, in Thy wide universe. Thou art of all men and of all nations. We give Thee sincere and hearty thanks for the providence which Thou hast had over us as a nation and a people, for the fact of Thy intervention in history, for the fact of Thy sustaining power in the great crises which have come and gone in the years that are past.

And now we invoke Thy continued blessing upon us. May Thy great grace rest upon this body of legislators, sent here by sovereign States for the enactment of laws and the framing of policies that shall control and govern our future destiny. Give to them the wisdom that cometh from above, simple minds, a clear vision, the open heart, the patriotic purpose.

And let Thy blessing, we earnestly beseech Thee, abide upon us this day and all the days. As Thou hast been with us in the past be with us in the years that are to come, so that through whatever experience we may be called upon to pass, whatever difficulties we may have to encounter, we shall be sure of Thy providential aid.

Our Father, who art in heaven, hallowed be Thy name. Thy kingdom come, Thy will be done, in earth as it is in heaven. Give us this day our daily bread. Forgive us our trespasses as we forgive those who trespass against us. And lead us not into temptation, but deliver us from evil, for Thine is the kingdom, and the power, and the glory, forever and ever. Amen.

EDWIN C. BURLEIGH, a Senator from the State of Maine, appeared in his seat to-day.

NAMING A PRESIDING OFFICER.

The Secretary (James M. Baker) read the following communication:

PRESIDENT PRO TEMPORE UNITED STATES SENATE,
Washington, November 24, 1913.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. JOHN RANDOLPH THORNTON, a Senator from the State of Louisiana, to perform the duties of the Chair during my absence.

JAMES P. CLARKE,
President pro tempore.

Mr. THORNTON thereupon took the chair as Presiding Officer and directed that the Secretary read the Journal of the proceedings of the last legislative day.

THE JOURNAL.

The Journal of the proceedings of Saturday last was read and approved.

SAN FRANCISCO WATER SUPPLY.

Mr. GALLINGER presented the memorial of Lucius Waterman, rector of St. Thomas Church, Hanover, N. H., remonstrating against the enactment of legislation granting to the city of San Francisco the use of the waters of Hetch Hetchy Valley, which was ordered to lie on the table.

MISSISSIPPI RIVER BRIDGE.

Mr. SHERMAN. I present a telegram in the nature of a petition from sundry citizens of Hamilton, Ill., opposite Keokuk, Iowa. It relates to granting additional bridge facilities between these two cities and concerns a bill that is pending before the Committee on Commerce. I ask that the telegram be printed in the RECORD and referred to the Committee on Commerce.

There being no objection, the telegram was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

HAMILTON, ILL., *November 20, 1913.*

Senator L. Y. SHERMAN,
Washington, D. C.:

Senate bill No. 1618 is up for hearing this morning before Senate Committee on Commerce. Will you please attend that meeting and, if possible, secure the attendance of Senator LEWIS and do all you properly can to bring about a favorable report on the bill, because we think our community sorely needs additional bridge facilities. Along in the latter sixties the Keokuk & Hamilton Bridge Co. obtained from Congress a grant to build a bridge across the Mississippi River between Keokuk and Hamilton. They are not contending that their charter gave "the exclusive right, privilege, and power between the city of Warsaw and the city of Nauvoo, in the county of Hancock and State of Illinois, to build, construct, and maintain a bridge or bridges for railroad and other purposes on the Mississippi River to the State of Iowa." That the franchise of this company is exclusive we deny, and as our present and future development will be seriously interfered with unless we have greater bridge facilities, we favor a bridge across the power dam, which dam now extends across the Mississippi River from Hamilton, Ill., to Keokuk, Iowa. The facts are that this bridge was not designed to carry present day railroad equipment, and for about 15 years has refused passage to the heavier locomotives used by the Toledo, Peoria & Western Railroad Co. The heavy equipment for the power house was not shipped until the dam was completed and the tracks laid from the Hamilton depot up to the Illinois end of the dam and across on the dam. The reason stated was that it was unsafe to ship this heavy tonnage over the old bridge. Even granting that this bridge could carry present equipment, we would still have great need for a second bridge, because this bridge is not designed to carry railroad trains or interurban and wagon traffic at same time; and under the present schedule it is in the service of the railroads and interurbans and closed to wagon traffic a large part of the time. You are at liberty and we will be glad to have you bring this telegram to attention of Senator LEWIS, Senator CUMMINS, and Senator KENYON, and to Congressman TAVENNER and Congressman KENNEDY, and to use it in any way that seems proper to you or them.

HAMILTON BUSINESS CLUB,
By J. A. GORDON, *President.*
By H. E. RAYBURN, *Secretary.*

BANKING AND CURRENCY.

Mr. SHERMAN. I present a telegram, in the nature of a petition, from W. T. Fenton, vice president of the National Bank of the Republic, of Chicago, Ill., which I ask to have referred to the Committee on Banking and Currency and to be printed in the RECORD.

There being no objection, the telegram was referred to the Committee on Banking and Currency and ordered to be printed in the RECORD, as follows:

CHICAGO, ILL., *October 15, 1913.*

Hon. L. Y. SHERMAN,
United States Senate, Washington, D. C.:

The Boston meeting of bankers was not a called convention. It was the annual meeting of the American Bankers' Association, an organization which has had a consecutive existence for nearly 40 years. The date and place of meeting for the year 1913 was fixed by the executive committee before the national presidential election last year. It is a well-known fact, and the names on its executive committee will show, that the association has been controlled and dominated for the last 10 or 15 years by bankers outside of reserve cities. The subject of the currency bill was a natural one, as was the indorsement of the action of the Chicago conference, which conference in its preamble recognized the earnestness of the administration in its efforts to bring about currency reform and offered its cooperation. It is not true that the bankers are opposing legislation. On the contrary, they themselves have brought about the demand for currency reform, and there has been, and is now, a general apathy on the part of the public on this question. The Chicago conference recommended certain amendments by unanimous action and the meeting at Boston simply indorsed the Chicago recommendations unanimously. Where there is so much misunderstanding, I think this explanation due both to the bankers and the Members of Congress, believing that a spirit of fairness on both sides is essential at this time.

W. T. FENTON,
Vice President, National Bank of the Republic, Chicago, Ill.

LANDS IN IDAHO.

Mr. BRADY. I present resolutions adopted by the Farmers' Educational and Cooperative Union of Nez Perce, Lewis, and

Clearwater Counties, Idaho, calling attention to the fact that there are large bodies of lieu land unimproved and large bodies of railroad-grant land unsurveyed in the State of Idaho that have escaped taxation for years by reason of the delay of the National Government in clear listing these lands. There are thousands of acres of land in Idaho belonging to the great timber syndicates and the Northern Pacific Railroad Co. that have escaped taxation, for the reason that title has not been conveyed to these corporations by the National Government. This is an injustice to the people of our State, and I am glad to have the farmers' organization call attention to this matter. The resolutions are short and to the point. I ask that they may be printed in the RECORD and referred to the Committee on Public Lands.

There being no objection, the resolutions were referred to the Committee on Public Lands and ordered to be printed in the RECORD, as follows:

Resolutions adopted at Lewiston, Idaho, October 22, 1913, by the Farmers' Educational and Cooperative Union.

At a convention of the Farmers' Educational and Cooperative Union, including the counties of Nez Perce, Lewis, and Clearwater, held at the city of Lewiston, State of Idaho, on Monday, October 22, 1913, the following resolutions were discussed and adopted:

Whereas in the matter of the taxation we believe in justice being given to all and special favors to none; and

Whereas that large bodies of lieu land unapproved and large bodies of railroad grant land unsurveyed in the State of Idaho by reason of delay of the National Government in determining definite title thereto have never been subject to taxation; and

Whereas the title to all such lands in this State, so far as we can learn, is claimed wholly by the great timber syndicates of the Northwest or by the Northern Pacific Railroad Co.; and

Whereas all such lands have for many years been closed to homestead and every form of individual entry; and

Whereas the evasion of taxation of such lands to the amount of approximately 2,000,000 acres for many years have added greatly to the heavy burden already borne by the farmers and other individual taxpayers of the State of Idaho; and

Whereas we believe in the absolute publicity of the conduct of our public affairs, and that it is the duty of our congressional Representatives and Senators to make known to us conditions that are detrimental to our best interests and financial welfare: Therefore be it

Resolved, That it is the sense of this organization that to longer permit conditions of title to exist which causes land situated within the limits of the State of Idaho to evade taxation is an injustice needlessly permitted by the National Government to be imposed upon the people of this State; that by so doing the development of the whole State in general and of the counties containing such land in particular is being retarded: Therefore be it further

Resolved, That in order to remedy the unsatisfactory conditions existing regarding these lands that an order for the survey of all these lands that are unsurveyed, including railroad grants and lieu lands, should be made, and the selection of all such lieu lands in the State of Idaho should either be approved or rejected at once; and be it further

Resolved, That a copy of these resolutions be sent to the Hon. Franklin K. Lane, Secretary of the Interior, Senators WILLIAM E. BORAH, JAMES H. BRADY, and Congressmen BURTON L. FRENCH and ADDISON T. SMITH, as an expression of the will of the people of this State directly affected by the present condition of these lands.

C. W. BOOTH,
President of the Tricounty Union of Nez Perce, Lewis, and Clearwater Counties, Idaho.

Attest:
R. L. ANDERSON, *Secretary.*

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH of Arizona:

A bill (S. 3470) for the relief of the water users under what is known as the Yuma irrigation project, in Yuma County, Ariz.; and

A bill (S. 3471) to authorize payment of damages caused by operations of the Reclamation Service; to the Committee on Irrigation and Reclamation of Arid Lands.

AMENDMENT TO THE CURRENCY BILL.

Mr. BORAH submitted an amendment intended to be proposed by him to the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes, which was ordered to lie on the table and to be printed.

PROPOSED FINAL ADJOURNMENT.

The PRESIDING OFFICER. The introduction of concurrent or other resolutions is in order.

Mr. MYERS. I call up the concurrent resolution I offered on Saturday.

The PRESIDING OFFICER. The Chair will state to the Senator that that resolution comes over in regular order and will be laid before the Senate by the Chair as soon as it is reached.

Mr. MYERS. All right.

The PRESIDING OFFICER. Are there concurrent or other resolutions? If not, the next business in order is the consideration of a concurrent resolution coming over from a previous day. The Chair lays it before the Senate, and the Secretary will read it.

The Secretary read concurrent resolution No. 10, submitted by Mr. MYERS on the 22d instant, as follows:

Resolved by the Senate (the House of Representatives concurring), That the President of the Senate and the Speaker of the House of Representatives be authorized to close the present session by adjourning their respective Houses on the 24th day of November, 1913, at 2 o'clock p. m.

Mr. MYERS. I ask for the adoption of the concurrent resolution.

Mr. CLAPP. Will the Senator from Montana yield to me for a moment to prefer a request?

Mr. MYERS. I yield to the Senator.

BANKING AND CURRENCY.

Mr. CLAPP. Mr. President, I find on my desk this morning a print of House bill 7837, being the banking bill, and also a print of what purports to be the amendment proposed by the chairman of the committee. I think there should be printed for our use House bill 7837 showing that amendment in italics and the House text. Of course, I understand that this large document has been issued, but we have a great many requests for copies of the bill and proposed amendments. We have the House bill, with the amendments suggested by the Senator from Nebraska [Mr. HITCHCOCK] printed in italics, but as representing the amendment of the Senator from Oklahoma I do not find a print with the bill as passed by the House.

Mr. OWEN. I advise the Senator that it has been printed and is already on his desk.

Mr. STONE. I understood that on Saturday——

The PRESIDING OFFICER. What is the request of the Senator from Minnesota?

Mr. CLAPP. I yield to the Senator from Missouri.

Mr. STONE. On Saturday I understood that a document was to be printed, for the use of the Senate, by to-day containing in three columns the House bill, which was referred to the Committee on Banking and Currency——

Mr. CLAPP. That is right, and there has been a mistake made there, I think.

Mr. STONE. There was a print ordered in three columns.

Mr. CLAPP. Yes; in three columns.

Mr. STONE. This document has but two columns.

Mr. CLAPP. I know, but I should like to complete this request of mine first. It is that there be printed of House bill 7837, with the amendment proposed by the chairman in italics, at least 20,000 copies, or so many copies as can be printed within the requirement of the rule allowing $500 to be expended under the order of the Senate.

Mr. SMOOT. I think that order has already been made.

Mr. CLAPP. No; an order was made with reference to the bill as proposed to be amended by the Senator from Nebraska.

Mr. STONE. The Senator from Minnesota is right about that.

Mr. CLAPP. There is no question about it.

Mr. OWEN. The request related to the printing of the report and not to the bill itself.

Mr. CLAPP. The usual number for the Senate will certainly not be sufficient to supply the demand, and it seems to me there ought to be as many copies of the one as of the other. The order was made on Saturday to print as many as $500 would print of the bill as proposed to be amended by the Senator from Nebraska, but the Senator from Oklahoma did not make a similar request with reference to the bill and his amendment.

Mr. SMOOT. I understood that he had done so.

Mr. STONE. No.

Mr. OWEN. I made the request to include the views of the chairman and his colleagues.

The PRESIDING OFFICER. The Chair will suggest to the Senator that the Secretary read exactly what has been ordered, and perhaps that will throw some light on the question.

Mr. CLAPP. Very well.

The Secretary read from the CONGRESSIONAL RECORD, proceedings of the Senate, of November 22, 1913, page 5964, as follows:

Mr. OWEN. I ask unanimous consent that the reported bill be printed, showing the changes proposed by the amendments suggested by myself and those Senators agreeing with me.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oklahoma?

Mr. SMOOT. Mr. President, I did not hear the request. Let it be again stated.

Mr. OWEN. I simply asked for a print of the bill as proposed to be amended by my section of the committee.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oklahoma? The Chair hears none, and it is so ordered.

Mr. OWEN. Mr. President, I ask that, within the $500 limit of cost, copies of the report containing the individual views of the chairman of the Committee on Banking and Currency and the members agreeing with him be printed for the use of the Senate document room.

There being no objection, the order was agreed to and reduced to writing, as follows.

Mr. CLAPP. Mr. President, it seems to me very clear that that omits the printing of the proposed amendments themselves in italics as a part of House bill 7837 in excess of the ordinary number for the Senate. If the Senate is of the opinion that it does not, that ends this discussion. All I desire is to get more copies if I can.

Mr. STONE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Missouri?

Mr. CLAPP. With pleasure.

Mr. STONE. What has been read by the Secretary does not quite clear the situation.

Mr. CLAPP. No.

Mr. STONE. I think subsequent to the part that has been read the Senator from Nebraska [Mr. HITCHCOCK] asked first that 25,000 copies of the bill or substitute or whatever it may be called, reported by the section of the committee on Banking and Currency which he represents, should be printed. The Senator from Utah raised the question as to whether that could be done by the order of the Senate or whether it would have to be done by the order of the joint committee of the two Houses. Then the Senator from Nebraska asked for 20,000 copies, and on the assurance that that would not exceed the $500 limit that was ordered. But as the Senator from Minnesota says there was, as I recall, no order for the printing of a like number of the proposal reported by the other section of the committee headed by the chairman of the committee, and that I understand is what the Senator from Minnesota desires to have done.

Mr. SMOOT. Mr. President, I simply want to say that the request made by the Senator from Oklahoma, that the views of himself and five other members of the committee be printed as a public document up to and including $500 worth, also included the bill itself. If the Senator will look at the RECORD he will see that that is the case.

Mr. CLAPP. Mr. President, the trouble now is that we have to send out to our constituents a document that contains the original House bill as proposed to be amended by the Hitchcock bill—to use that term for brevity's sake—in one document in plain print. We have no similar document as representing the House bill with the amendments proposed by the Senator from Oklahoma [Mr. OWEN]. Instead of requiring our constituents to dig them out of this report, it does seem to me it would simplify the situation to have printed a document with reference to the bill as proposed by the Senator from Oklahoma corresponding to the one in the case of the Senator from Nebraska. I know it is in the report, but a man has to take that report and dig out the proposals contained in that report, when we have already one document that shows the House bill with the proposed amendments of the Hitchcock bill. That ought to be accompanied, it seems to me, to our constituents by a similar document showing in plain type the House bill with the proposed amendments of the Owen bill in italics; and that is the request I make.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Minnesota?

Mr. SMOOT. Mr. President, what is the request? Let it be stated.

The PRESIDING OFFICER. The Senator from Minnesota will please again state his request for the information of the Senate.

Mr. CLAPP. The request is that there be printed of House bill 7837, 20,000 copies, or as many as can be printed within the $500 limit of cost, showing in italics the amendment proposed by the Senator from Oklahoma [Mr. OWEN].

The PRESIDING OFFICER. Is there objection? If not, it will be so ordered.

Mr. CLARK of Wyoming. I should like the attention of the Senator from Oklahoma for one moment. I desire to call attention to the report, with the appendix, which was printed as a Senate document at the request of the Senator from Oklahoma on Saturday. When the request was made for the printing of that document I for one, at least, understood that the appendix to the report was to include the views of the chairman of the committee and those who agree with him, and in the same document the views of the remaining members of the committee who disagree. That is what I understood to be the purpose. Now, if I have not been careless in my examination, the document includes only as an appendix the views of the chairman of the committee and those who agree with him.

Mr. OWEN. Mr. President, the only cause of confusion is that the copies have not been stitched together in one volume, but the index will show it is the same thing, and they are both on the Senator's desk.

Mr. CLARK of Wyoming. Yes; I know that; but it seems to me they should be stitched together, Mr. President——

Mr. OWEN. Yes.

Mr. CLARK of Wyoming. Because they appear, on casual observation, as two documents, one of which——

Mr. OWEN. They are both marked "Calendar No. 107," one part being No. 1 and the other part No. 3.

Mr. CLARK of Wyoming. I know; but one of the documents contains the report of the committee.

Mr. OWEN. I desire to remind the Senator from Wyoming that the request of the Senator from Nebraska [Mr. HITCHCOCK] was that there should be printed a certain number of his report with his bill, and that is the reason why they were not stitched together.

Mr. CLARK of Wyoming. I know; but that was not the unanimous consent to which I gave my assent. The unanimous consent that I supposed I was giving my assent to was that the report should be printed as a Senate document, together with the views of the chairman of the committee and the views of the other branch of the committee—that was what the discussion started on—so that they would be all together in one document, and the views of the two branches of the committee should appear to the same document, stitched together as appendices to the report of the committee.

Mr. OWEN. Anyone asking for "Report 133, Calendar No. 107," will get, of course, both of these documents. It is really the same thing whether they are stitched together or not.

Mr. CLARK of Wyoming. It is really the same thing, only they do not appear to be the same thing. One is an appendix to a report and the other is not an appendix to a report. To that I was calling attention. The views of the chairman of the committee and those agreeing with him are published as an appendix to the report.

Mr. OWEN. The point made by the Senator from Wyoming may easily be accomplished by simply having the reports stitched together.

Mr. CLARK of Wyoming. That is what I think should be done, so that the whole matter can be sent out as one document.

Mr. OWEN. The reason they were printed separately was because the Senator from Nebraska wished to send out his report separately.

Mr. CLARK of Wyoming. I understood that his request had nothing whatever to do with the request made by the chairman of the committee. I understood that there were two separate propositions.

Mr. OWEN. Both requests could be complied with by simply having the reports stitched together. If the Senator would like, I see no reason why the document could not be furnished with the parts stitched together.

Mr. CLARK of Wyoming. I understood that is what the document was intended to be.

Mr. OWEN. I think nothing was said with regard to their being stitched together; but, of course, they are one document.

Mr. CLARK of Wyoming. There is no particular object in making a document of that size in two volumes.

Mr. OWEN. They are both Report No. 133.

Mr. CLARK of Wyoming. That is perfectly true, but one is marked "Part 1" and the other marked "Part 3." Part 2 is the first appendix, which is printed with the report; part 3 is the second appendix, which is not printed with the report. My proposition now is to have the whole thing complete in one small document.

Mr. OWEN. I ask for an order that they be stitched together as one document.

Mr. CLARK of Wyoming. That is what I desire.

Mr. BRISTOW. Mr. President, I have no objection to their being stitched together if any Senator wishes them stitched together, but I desire to have a large number of them not stitched together.

Mr. CLARK of Wyoming. That has already been provided for.

Mr. MYERS. Mr. President, I call for the regular order.

The PRESIDING OFFICER. The regular order is the consideration of the resolution of the Senator from Montana [Mr. MYERS], but that was interrupted by two motions, which the Chair would first like to have disposed of.

Mr. MYERS. I am perfectly willing for that to be done, if it can be done before 2 o'clock.

The PRESIDING OFFICER. The Senator from Montana yielded to the Senator from Minnesota [Mr. CLAPP], who made a motion which has not yet been disposed of.

Mr. MYERS. I did not suppose it would take so long.

The PRESIDING OFFICER. Is there objection to agreeing to the motion of the Senator from Minnesota [Mr. CLAPP]? Without objection, the motion is agreed to.

Mr. HITCHCOCK. Mr. President, before the motion is agreed to I should like it distinctly understood that the change proposed is to add to the document which has been printed at the request of the chairman of the committee [Mr. OWEN] the document which has been printed at my request, and that this change does not involve impairing or destroying the printing of the 20,000 copies of the document which have been ordered separately at my request.

Mr. WILLIAMS. Mr. President, the request does involve just exactly what the Senator from Nebraska objects to. As I understand, the Senator from Nebraska wants to distribute his document without sending with it the other document, so as to make an ex parte showing on his side. If the request of the Senator from Wyoming is agreed to, the two documents, being stitched together, will have to go out together.

The PRESIDING OFFICER. The Chair will state to the Senator from Mississippi that the question now before the Senate is not on the motion of the Senator from Wyoming [Mr. CLARK], but on the motion of the Senator from Minnesota [Mr. CLAPP], which the Chair was about to rule had been agreed to when the Senator from Nebraska rose and interposed an objection, as the Chair thought. The question is on the motion of the Senator from Minnesota. Without objection, it will be agreed to.

Now the question is on the motion of the Senator from Wyoming [Mr. CLARK].

Mr. WILLIAMS. Mr. President, I rose merely to respond to what had been stated by the Senator from Nebraska. I have no sort of objection to the request of the Senator from Minnesota, and it would be more in order to get rid of that first, I think.

Mr. CLARK of Wyoming. That is now disposed of.

The PRESIDING OFFICER. It has been disposed of, the Chair will advise the Senator from Mississippi.

Mr. WILLIAMS. Very well.

The PRESIDING OFFICER. Now the question is on the motion of the Senator from Wyoming [Mr. CLARK].

Mr. WILLIAMS. I was addressing myself to that question.

Mr. CLARK of Wyoming. Mr. President, in order that there may be no misunderstanding in the mind of the Senator from Mississippi or in the mind of the Senator from Nebraska, it might be well just for a moment to review the proceedings on Saturday. The Senator from Oklahoma asked unanimous consent that the report of the committee, together with the views of the two branches of the committee as appendices, be printed as a document. That was one request. Unfortunately, in the discussion there was so much confusion in the Chamber that the request as finally made, according to the RECORD, included only the report of the committee and, as an appendix, the views of the chairman and his colleagues on that committee. That is what the RECORD shows; but the intention of the whole proposition, both of the chairman of the committee and of those who took part in the discussion, was that this document should contain the report of the committee with appendices consisting of the views of each branch of the committee. That was the intention.

Mr. WILLIAMS. That was what I thought was done.

Mr. CLARK of Wyoming. That is what I thought was done; but that was not done, and the report has not been printed in that way. The purpose of my rising was that the unanimous consent might be made to cover exactly what the chairman of the committee first asked for.

Mr. WILLIAMS. Now, Mr. President——

Mr. CLARK of Wyoming. Just a moment. That having been agreed to, unanimous consent was given to the Senator from Nebraska that as many copies as $500 would print should be printed separately of the report of himself and those who agreed with him; but, unfortunately, the RECORD does not really bear out the understanding of the Senate as it occurred to me, and the consequence is that we have the report of the committee, and attached to that an appendix consisting only of the views of the chairman of the committee and those who agree with him. It occurred to me that there ought to be an appendix containing the views of both sides.

Mr. WILLIAMS. Mr. President, I understood what was done just as the Senator from Wyoming did; but I also understand that we have got to go by the RECORD and that nothing was done which the RECORD does not show was done.

Mr. CLARK of Wyoming. That is right.

Mr. WILLIAMS. I did not intend to consent the other day, and I am not willing to consent to-day, that one of these two diverse statements of opinion, with the amendments accompanying it, should go to the country as an ex parte document. I think the two documents ought to go together, and I think $500 ought to cover the printing of both. I think it would be foolish for virtually the majority side of this Chamber to consent to distribute as an ex parte document $500 worth of the minority report and statement and argument while it did not make the same provision for the report and statement of the Democratic members of the committee. I did not rise for the purpose of objecting to the request of the Senator from Wyoming; on the contrary, I agree with him; but I did rise to object to having it understood that the construction just placed upon the request by the Senator from Nebraska should go into the RECORD without notice by somebody that it was not the understanding of the Senate.

Mr. CLARK of Wyoming. Mr. President, I have nothing to say in regard to the report of the Senator from Nebraska; neither have I anything to say in regard to the report of the Senator from Oklahoma and those associated with him. I am not entirely agreed with the Senator from Mississippi. I am perfectly willing that the two reports, as the views of certain Senators, should go separately, if the Senate makes an order for that purpose; but when the report of the committee is circulated as showing the reason of that report, to wit, a report that they are unable to come to a conclusion and that they report the bill back without recommendation, I want, with that failure to agree, to give the reasons why there was a failure to agree; and that can only be evidenced by the individual views of those taking different positions on the bill.

Mr. WILLIAMS. And in that I agree perfectly with the Senator from Wyoming. I think that is the only fair way to do it. I think the country ought to see both together.

Mr. CLARK of Wyoming. I do, and I go further than the Senator from Mississippi, and think that if those agreeing with the chairman of the committee want to send out their views to the country they should be allowed to do so, and if those agreeing with the Senator from Nebraska want their views sent out they should be allowed to do so.

Mr. WILLIAMS. But that is not involved in this proposition.

Mr. CLARK of Wyoming. Only as the Senator——

Mr. WILLIAMS. It is not involved rather in the construction put upon it by the Senator from Nebraska; but what is involved in his construction is that there shall be $500 appropriated for the free distribution of his side of the matter——

Mr. CLARK of Wyoming. Oh no.

Mr. WILLIAMS. And the statement of it, while there is no $500 appropriated for a distribution of the views of the other side.

Mr. CLARK of Wyoming. No; the two propositions are not related, because the proposition of the Senator from Nebraska was a separate and distinct unanimous-consent agreement from the one proposed by the Senator from Oklahoma.

Mr. WILLIAMS. But the RECORD does not show that.

Mr. CLARK of Wyoming. I think it does.

Mr. WILLIAMS. Then, of course, if the RECORD does show it, I am making an objection too late; but I did not think it did; I did not so understand; I had no idea we were standing here and letting one side of this subject be distributed to the country at the public expense to the extent of $500 worth while the other side was not.

Mr. CLARK of Wyoming. No; but the Senator still misapprehends. There was permission given to each side.

Mr. WILLIAMS. I will ask that the RECORD be read.

Mr. CLARK of Wyoming. I will read it to the Senator.

Mr. WILLIAMS. If that is so, then what I thought——

Mr. CLARK of Wyoming. I will read it to the Senator. On the second column of page 5964 it was—

Ordered, That there be printed approximately 20,000 copies of Senate Report No. 123, part 3, being the views and report of facts by Senators HITCHCOCK, NELSON, BRISTOW, CRAWFORD, WEEKS, and MCLEAN, and following the same, in the same document, the bill as proposed to be amended by the Senators, such printing not to exceed the sum of $500.

That was the request made by the Senator from Nebraska, which was agreed to. Then, farther down on page 5964, about the middle of the first column——

Mr. WILLIAMS. If the Senator will pardon me just for a moment, I thought from what the Senator said a moment ago that what I thought the Senate had done the RECORD did not show, but the Senator from Utah [Mr. SMOOT] has just shown to me that while the two propositions came separately there was a request granted for the publication of $500 worth of the Hitchcock views and $500 worth of the Owen views, so that the two——

Mr. CLARK of Wyoming. Neither of them had anything to do with the proposition which I have made, which was that the report of the committee——

Mr. WILLIAMS. If the Senator will allow me to finish the sentence, so that the two differing views should go to the country under the same identical provision of expenditure. That is what I thought was done and that is what I thought I was agreeing to; but a moment ago I either misunderstood the Senator when he said the RECORD did not show the agreement, or he misunderstood the RECORD. In any event, I am wrong about it. I have no sort of objection to the views of the minority going to the country separately, provided the views of the majority can have exactly the same advantage on exactly the same footing at the same expenditure; and the RECORD shows that that is the case.

Mr. CLARK of Wyoming. The only difficulty is that the Senator entirely misapprehended my request. My request did not relate either——

Mr. WILLIAMS. No; I did not misunderstand the Senator's request. What I misunderstood was the Senator's statement that the RECORD did not show——

Mr. CLARK of Wyoming. Well, the RECORD does not show what I want it to show.

The PRESIDING OFFICER. The question is on the request of the Senator from Wyoming [Mr. CLARK]. Is there objection? The Chair hears none, and it is so ordered.

PROPOSED FINAL ADJOURNMENT.

The PRESIDING OFFICER. The order of business now is the consideration of a concurrent resolution coming over from a previous day, proposed by the Senator from Montana [Mr. MYERS].

Mr. MYERS. I ask that the resolution be modified by striking out "24th" and inserting "26th."

The PRESIDING OFFICER. The Senator from Montana asks permission to modify the concurrent resolution by striking out "24th" and inserting "26th" in lieu thereof. Is there objection? The Chair hears none, and the resolution is modified as requested.

Mr. MYERS. I move the adoption of the resolution.

Mr. GALLINGER. Let the resolution be read, Mr. President.

The PRESIDING OFFICER. The Secretary will read the concurrent resolution as modified.

The Secretary read the concurrent resolution (S. Con. Res. 10) as follows:

Resolved by the Senate (the House of Representatives concurring), That the President of the Senate and the Speaker of the House of Representatives be authorized to close the present session by adjourning their respective Houses on the 26th day of November, 1913, at 2 o'clock p. m.

Mr. THOMAS. Mr. President, I move to lay the concurrent resolution on the table.

The motion was agreed to.

BANKING AND CURRENCY.

Mr. HITCHCOCK. Mr. President, I desire to give notice that to-morrow at the proper time, when the banking and currency bill is laid before the Senate, I shall address the Senate on the subject of banking and currency legislation.

Mr. OWEN. Mr. President, I ask that the print in parallel columns of House bill 7837 be printed further so as to show, on the left-hand page, the House bill as it stands without amendment. I make the request at the instance of a number of Senators who are not quite content with this form of the print.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oklahoma?

Mr. NORRIS. Mr. President, I have no objection to the Senator's request; but it occurred to me that while he was making that request he could add to the usefulness of this document if instead of these blank spaces where simply a note is printed he would have printed the section of the bill reported by one of the branches of the committee, the same as is done on the other side.

For instance, turn to page 3. I call the Senator's attention to the fact that one side of the page is blank, with simply a note there. I think that is rather misleading. When you examine this document, it does not give you an idea as to just exactly what the other section of the committee has reported. On these pages why are not both bills printed instead of one side being left blank?

Mr. OWEN. They are both printed. The only thing is that the language in one case is longer than in the other, which obviously makes necessary certain blank spaces.

Mr. NORRIS. I can see how that might occur; but from the notes that are printed in the blank spaces I judge that is not the case here. I have not had time to examine the print in detail.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Minnesota?

Mr. OWEN. I do.

Mr. NELSON. I call the attention of the Senator from Nebraska to the next page, which gives him exactly what he wants. On the left-hand side, under the heading "Owen substitute," the Senator will find section 2 as amended by the Owen section of the committee, and on the other side he will find the same section as amended by the Hitchcock section of the committee, if I may use those terms.

Mr. NORRIS. Right on that point, that page calls to our attention another thing.

Mr. OWEN. There is so much conversation going on that it is impossible for me to hear the Senator.

The PRESIDING OFFICER. Will the Senate please preserve order? The Chair does not wish to have the business of the Senate again suspended in order to obtain order; but he will be compelled to do it unless Senators preserve order, as requested.

Mr. NORRIS. This is the suggestion I wish to make to the Senator from Oklahoma: One column is headed "Owen substitute," and the other "Hitchcock amendment." As I understand, the two reports occupy the same position. One is just as much a report as the other. Why are they not named the same? They ought either to be both called amendments or both called substitutes.

Mr. OWEN. The reason of that, Mr. President, is that on Saturday I gave notice that I should offer the amendment as a substitute, and ask that the substitute be printed and lie on the table. It being desired that all three of the proposals should be laid before the Senate, this proposed substitute is printed along with the House bill, showing the interlineations, by which it is made to give both the House bill, the amendments proposed by the section of the committee agreeing with me, and the amendments proposed by the Senator from Nebraska and the members agreeing with him. In order to make it still more obvious what the bill is, I have proposed to have the House bill printed on the opposite page, section by section, in accordance with the request of various Senators on the floor.

Mr. NORRIS. As I have stated, I have no objection to the Senator's request; but I think the Senator did not understand just what I was attempting to do, at least, on the particular point to which I am now calling his attention. One column is headed "Owen substitute." The other parallel column is headed "Hitchcock amendment." Why should they not be both called substitutes or both called amendments?

Mr. OWEN. I have no objection to the use of any word the Senator may desire. I intended to move this amendment as a substitute, and gave notice to that effect.

Mr. NORRIS. Will not the Senator include that change in his request? It is immaterial to me what he calls them, but they ought to be designated in the same way.

Mr. OWEN. This use of the terms was not at my instance. I did not have anything to say about it. I simply asked that these provisions should be printed in parallel columns, so that the Senate would have before it all three proposals. I gave notice on Saturday that I should offer to-day my amendment as a substitute; and I suppose because of that notice the printers designated this as a substitute.

Mr. NORRIS. I am not criticizing the Senator from Oklahoma.

Mr. OWEN. Oh, no; I do not so understand the Senator's remarks.

Mr. NORRIS. I simply call his attention to the two headings there. I think he will see at once that they ought to be the same, and I suggest that he include that in his request.

Mr. OWEN. No; I have no request to make on the subject. I do not know whether the Senator from Nebraska [Mr. HITCHCOCK] desires to move to strike out my proposed substitute and insert his own, or not.

Mr. NORRIS. Mr. President, it is not a question of what the Senator from Oklahoma wants, nor of what the Senator from Nebraska wants. We shall be sending out these documents at the request of citizens who are interested in the matter, and we want to convey to them the correct idea.

Mr. OWEN. I ask, then, that in the reprint the term "substitute" be struck out of the print, and it be made to read "Owen amendment."

Mr. NORRIS. All right; that is perfectly satisfactory.

Mr. OWEN. I think that will meet the proposal.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oklahoma? The Chair hears none, and it is so ordered.

Mr. OWEN. I now ask that within the limit of $500 a sufficient number of these documents (S. Doc. No. 242) be printed for the use of the country, in order to supply the demand for them, which, I am told, will be very considerable.

Mr. STONE. The Senator means containing the three propositions?

Mr. OWEN. The three propositions; yes.

The PRESIDING OFFICER. Without objection, it is so ordered. Morning business is closed. The consideration of the calendar under Rule VIII is in order.

Mr. OWEN. Mr. President, I ask unanimous consent to take up for consideration House bill 7837, known as the banking and currency bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. OWEN. Mr. President, House bill 7837 has been reported by the Committee on Banking and Currency without recommendation, the committee having divided into two sections—six on one side and six on the other. There has been printed, first, the House bill without amendment; second, the House bill as proposed to be amended by the chairman of the committee and his Democratic associates; and, third, the House bill as proposed to be amended by the Senator from Nebraska [Mr. HITCHCOCK] and his Republican associates. The views of each section of the committee have been printed in Report 133 as appendices.

On Saturday last I gave notice that to-day I should move to amend the House bill by striking out all after the enacting clause and substituting the House bill as amended by the Democratic section of the committee.

I have proposed this substitute merely as a matter of parliamentary convenience, the proposed substitute being merely the House bill with numerous unimportant changes in phraseology, with some changes of considerable importance. It will greatly facilitate the consideration of the bill to use the substitute in lieu of considering every one of the changes made in the House bill.

This bill probably is the most important measure that has been presented to the country since the Civil War. The American banking system has had some very serious defects. The principal defect of our system has been that the country has had no adequate protection against panics, so that from time to time the country has been shaken to its foundations by the severest financial panics, throwing into chaos our commerce, our manufactures, and our industries, from which the recovery in some cases has taken as much as four or five years. This bill is intended to correct the chief defects in our system.

The last great panic which shocked this country was that of 1907, in which, beginning in January with some measure of unrest, interest rates began to go through violent fluctuations, running on the New York Stock Exchange from as low as 1½ per cent to as high as 45 per cent in January, 1907; a like fluctuation in March from 2 to 25 per cent; and in October going through such fluctuations so that on the New York Stock Exchange money commanded as high as 125 per cent interest, with the most tremendous fluctuations in the price of stocks, and, indeed, in the price of other forms of property which apparently had no relation whatever to the stock exchange, because of the interruption of the credit system of the country.

These extreme disturbances in the interest rates were attended with the most tremendous changes in the selling price of the principal stocks, a few examples of which I present:

Fluctuation of principal stocks during 1907.

The beneficiaries of this panic were those who could command cash and who had prepared themselves for the cataclysm which engulfed everybody but themselves.

Because of the tremendous national catastrophe of 1907, which Senator Aldrich estimated to have cost us over two thousand millions of dollars, the entire country demanded some prompt relief. A measure was brought in in Congress by Mr. Aldrich which finally culminated in the legislation known as the Vreeland-Aldrich Act, which undertook to give some measure of temporary relief by the organization of credit associations, by which currency to the possible extent of $500,000,000 could be obtained against the combined assets of the associations. While that measure was very defective in numerous particulars, and while it did not at all reach the fundamental defects of our banking system, it at least afforded some measure of protection in abating a panic and in moderating its injurious effects.

The responsibility of the authorities then in charge of the Government for the panic of 1907 I pointed out on the floor of the Senate on Tuesday, February 25, 1908, showing that they

had rejected a plan offered as an amendment to the act amending the national-bank act of 1900, known as the Aldrich bill of that date.

Senator James K. Jones, on the 6th of February, 1900 (CONGRESSIONAL RECORD, p. 1534), offered the following proposed amendment, which I had the honor to draft and which would have given the country protection from the panic of 1907 if Mr. Aldrich had had the wisdom to have adopted it:

That the Secretary of the Treasury is hereby directed to have printed and to keep on hand United States Treasury notes under a special account to be called the "emergency circulation fund." Such notes shall be full legal tender. Any citizen of the United States shall have the right to deposit United States bonds under rules and regulations to be prescribed by the Secretary of the Treasury, and to receive from such fund 90 per cent of the face value of such bonds in United States Treasury notes, and shall have the right at any time within 12 months to redeem such bonds by repaying in United States Treasury notes the amount so received by him on account of such bonds, with interest at the rate of 6 per cent per annum on such amount. Failure to redeem such bonds within the limit of 12 months shall operate as a forfeiture of such bonds to the United States, and such bonds shall be sold to the highest bidder in the open market, and the balance, after the payment of the principal of the amount advanced, the interest on the same, and the expenses, shall be paid to the former owner of such bonds. Any moneys received from such sale may be exchanged with other moneys in the Treasury, so that this fund shall consist alone of Treasury notes. The principal of all sums so advanced when repaid shall be returned to the "emergency circulation fund," and all interest upon such sums shall be passed to the credit of the Treasury under miscellaneous receipts.

His refusal to accept it made him and his party associates directly responsible for the panic of 1907, or at least for the sin of omission which permitted this panic to occur.

The Vreeland-Aldrich bill of 1908 took the preliminary steps, however, looking to a thoroughgoing investigation of the banking system of the United States. The National Monetary Commission was authorized to make a searching investigation and inquiry and to make proper report to the Congress of the United States as to suitable remedies. This commission made a careful and searching investigation of the banking systems of the entire civilized world, giving a complete report of the banking systems of the German Empire, of France, of Belgium, of Holland, of England, of the European countries, and also of Japan, Canada, and Mexico, giving a full account of the banking systems of the various States and of the United States.

The report of the National Monetary Commission was published during several years in 33 volumes and a vast amount of literature assembled, making a library of between 2,500 and 3,000 volumes. This work involved a public expenditure of nearly $300,000. At its conclusion the National Monetary Commission recommended a central bank controlled by the banks of the country, a voluntary association, however, with numerous powers, which I will not here recount. See Senate bill 7, present session.

This measure was presented throughout the country in the various States before numerous gatherings of bankers and business men and credit men. It was urged very strongly by a vigorous propaganda, and finally was approved by the American Bankers' Association.

The matter became a question of public concern. It became a question of party division, and the Democratic National Party in Baltimore passed a resolution condemning the proposed central bank plan, condemning it in the following words, which I wish to call to the attention of Senators:

We oppose the so-called Aldrich bill or the establishment of a central bank.

These words appear in the record of the official proceedings of the Democratic national convention. Strangely enough, in the campaign book following the letter "f" was inserted in some way unknown, so as to make the language read, "We oppose the so-called Aldrich bill for the establishment of a central bank," making a complete change of meaning.

Mr. HITCHCOCK. Mr. President——

Mr. OWEN. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. In this connection it may be interesting to the Senator from Oklahoma and others also to know that I caused an examination of the daily papers printed the day following the convention, and that some of them printed the word "for" and others published it "or." Possibly the most accurate paper in the United States, the New York Herald, published it "for."

Mr. OWEN. Mr. President, the official record said "or," and who was responsible for the insertion of the letter "f," making it read "for" instead of "or," has not been sufficiently disclosed. But there are interests in the country standing strongly for a central bank that might be able to account for this sin of commission, if it be a sin of commission.

At all events, Mr. President, the people of the United States profoundly objected to the Aldrich plan of a central bank because the plan proposed to put into the hands of private persons the control of the credit system of the United States, which already had been so far concentrated in private hands as to have become a national scandal and a national danger of vast importance.

The bill was condemned by public sentiment so far that although it was presented to the Senate of the United States, with the party in power supposed to be very friendly to those who were advancing the bill, that measure never received any consideration in the last Congress and has not been seriously advanced in this Congress, although it was introduced into the Senate as Senate bill No. 7.

Mr. President, not only has this matter, therefore, been considered during the last five years, but during the summer before last, beginning in May, 1912, there was a very careful examination made by one branch of the Committee on Banking and Currency of the House of Representatives, under the management of Mr. Pujo, acting as chairman of that subcommittee of the Committee on Banking and Currency of the House of Representatives, into the so-called Money Trust. It was a very remarkable investigation, covering several thousand pages of printed matter, with a most illuminating report, prepared under the direction of the committee and drafted by one of the ablest and most patriotic men in the United States—Samuel Untermyer, of New York—showing that a fraction over a hundred men exercised dominating control over property amounting to $22,000,000,000, an unthinkable sum, practically a third of the national wealth, excluding the land of the country.

The Pujo examination verified what was generally well understood, that so far had the concentration of financial and commercial power proceeded in this country that a handful of men exercised practically commercial and financial supremacy over the people of the United States; that they could at their will shake the foundations of the country; that they could at their pleasure cause not only stringency, but, what is far more dangerous, could carry those stringencies of credit to a point of absolute and overwhelming panic that could close the doors of the banks of this country from the Atlantic to the Pacific in a single day.

I shall not pretend to believe for one moment that the panic of 1907 was an accident. It is a long story. I can not at this time go into that story, but I profoundly believe that the result in October, 1907, was a part of a concerted plan by which a few men did two things, first, enriched themselves on the one hand at the expense of the Nation, and administered what they conceived to be a terrifying political rebuke to the administration then in power.

I have always contended that a drastic congressional investigation of this panic should have been made and its promoters and beneficiaries exposed to full public view.

The Pujo investigation did not end this inquiry into our banking system. The chairman of another branch of the Committee on Banking and Currency of the House of Representatives, Mr. GLASS, of Virginia, who is justly entitled to very great credit in preparing and helping to perfect this bill, began the consideration of the question with a view to framing a bill to afford adequate remedy to this country against the exercise of individual unrestrained and irresponsible power over the business men of this country. That committee patiently heard the representatives of the great banking institutions of the country, of the great commercial houses of the country, of financial experts, and their investigations were printed in a volume of over 700 printed pages.

Nor was that the end of the investigation. I refer to these investigations because it has been given out to the country in various ways that the Congress of the United States was dealing with this matter with extreme haste, that Congress was rushing through a measure affecting the interests of the country without suitable inquiry or examination. I remind Senators that when the Aldrich bill was proposed to be submitted to the Senate the very men who recently have said "do not be in haste" were at that time urging haste on a proposal which would have concentrated in private hands the control of the credit system of the United States.

But this was not all. In addition to the investigation of the Monetary Commission, the investigation of the Pujo committee, of the Glass committee, numerous hearings were extended to representatives of the American Bankers' Association by those who were charged with the duty of making a preliminary draft for the consideration of their colleagues, and when these hearings had been much extended finally there was a preliminary draft made of this bill.

But before it was ever submitted it was considered by many thoughtful, careful men, various amendments suggested, various amendments made, and finally it was brought into the

Committee on Banking and Currency of the House of Representatives and there discussed. It was afterwards discussed in the Democratic conference of Members of the House of Representatives, and then discussed on the floor of the House of Representatives, and finally came to this body on the 18th of September last. But before it came here the members of the Banking and Currency Committee of the Senate had been giving this matter attention, had been studying it, had been considering it, and they began their formal hearings on the 2d of September last. Sixteen days before the bill reached the Senate they began to take evidence upon this question, and finally concluded the taking of evidence on the 25th of October, and submitted it to the Senate in three volumes, including something over 3,200 printed pages of matter. We heard at length the representatives of the banks, the representatives of business interests, of credit associations, of clearing houses, of financial experts, and of interested citizens not claiming to be experts. The committee, with great patience and industry, gave a careful consideration to various groups of people, and finally submitted to the Senate as a Senate document these hearings.

So, Mr. President, it is impossible for anyone to contend that the Congress of the United States has not given this matter the most infinite pains and considerate care.

It finally transpired that the members of the Committee on Banking and Currency of the Senate could not come to an agreement on the amendments which they thought should be made to the bill. But, Mr. President, I think the country is to be congratulated on the extent to which the members of the committee did agree. They did agree upon many questions of fundamental and far-reaching importance.

They agreed upon the necessity for a greater concentration of the banking reserves of the country;

They agreed upon the extent to which the volume of these reserves should be concentrated;

They agreed substantially upon the volume of the capital of the proposed banks;

They agreed upon the mobilization of such reserves;

They agreed upon the promotion of an open discount market;

They agreed upon the provision for elastic currency;

They agreed upon the issuance of Federal reserve notes;

They agreed that the Federal reserve notes should be the obligations of the United States;

They agreed that the system should be the regional Federal reserve bank system, instead of a central bank; and, finally,

They agreed that the control of the system itself should be in the hands of the Government.

The points of disagreement were as to the number of banks. One-half of the committee, I think it may be fairly stated, believed as an economic proposition that it would be better to have a central bank; and their point of view was, of course, necessarily influenced by that opinion, and naturally in drawing a bill they would be influenced in drafting the bill by that consideration.

The points of difference between the two sections of the committee were upon the number of the banks, the method of subscribing for the stock of such banks, the method of electing the directors of such banks, the method of administering the regional reserve banks. These differences arose, as I have said, because there were two schools of thought in the committee, one believing in a central bank, administered by the Government, and the other believing with the House of Representatives and with the President that these banks should be regional banks, controlled by the banks under supervisory control of the Government.

Mr. President, the purposes of this great measure should be kept steadily in mind in considering the bill.

PURPOSES OF THE MEASURE.

The purposes of this measure are:

First. To insure the stability of our commerce, of our manufacturing enterprises, of our industries, and the safety of our merchants and manufacturers and business men generally.

Second. To make available effective commercial credit for individuals engaged in manufacture, in commerce, in finance, and in business to the extent of their just deserts.

Third. To put an end to the pyramiding of the bank reserves of the country and the use of such reserves for gambling purposes on the stock exchange.

Fourth. To keep constantly employed the productive energies of the Nation. And this consideration is of vital importance to the laboring men of the country who are dependent for their daily bread upon constant, regular employment. Our crimes, our vices, our chief social evils come from lack of regular remunerative employment.

In order to accomplish these purposes of the bill, there are certain great fundamentals recognized by the best experts as essential and necessary:

First. The proper concentration and mobilization of the bank reserves of the country under the control of the banks themselves, safeguarded by a strong governmental supervision.

Second. A suitable banking capital, with a double liability as a margin of safety of the reserves of the Nation, as a margin of safety of the Government deposits which are expected to be placed in the Federal reserve banks.

Third. The authorizing of the issuance of elastic currency against liquid commercial bills under proper safeguards.

Fourth. The establishment of an open market for liquid commercial bills by providing through the reserve banks a constant and unfailing market for such bills at a steady rate of interest.

And, finally, for the protection of the gold reserve of the United States by the ability, through the Federal reserve board, to raise the rate of interest through the Federal reserve banks and to require them, if necessary, to provide against the contingency of gold shipments by buying foreign bills in advance (when rates are low and credits expanding), which can be sold to avoid gold shipments, and in that way stabilize the gold reserves of this country and prevent them from being withdrawn. I remind you our great credit system, which has now 25,000 independent banks and approximately twenty thousand million dollars of deposits, rests at last upon certain reserves of actual money; and if that money, which is fundamentally gold or its equivalent, be withdrawn from this country our commercial fabric would crumble, because every dollar of lawful money is the basis of over $12 of credit. Therefore it is of supreme importance that we should be able to protect the gold of this country against being drawn away from the banks, where it now operates as a reserve upon which credits are built up. The withdrawal of reserve money means compulsory contraction of twelve times as much credit, loans, and deposits.

This consideration is of supreme importance in dealing with our national banking system and in affording it adequate protection.

MECHANISM OF THE SYSTEM.

Mr. President, the mechanism of this system by which we propose to accomplish these beneficent results is a system of 8 regional banks. The House of Representatives provided for not less than 12 regional banks. Some have believed that the smaller number would be better; it is a matter upon which men divide; but I call to your attention that England is only a very small geographical area, and yet they have one of these great public utility banks—the Bank of England. Scotland has its own system; Ireland has its own system; the Netherlands has its own system, its own public utility bank.

The Bank of Belgium serves as a public utility bank for Belgium. France has its own public utility bank; the German Empire has its own great public utility bank, serving the functions which we expect to be served for this country by these Federal reserve banks. But I call to your attention that the area of France is less than that of Texas; that the German Empire is smaller in area than Texas; that England and Belgium and Holland, which have three of these great public utility banks, has a smaller area than Oklahoma. So in this country of ours, which is 3,000 miles from east to west, and which is 1,500 miles from north to south, if it shall have 8 of these regional banks, or if it shall have 12 of these regional banks, it will still have a less number many times over, considering the distances to be traveled, than has Europe. Eight banks in the United States would give an area of about 700,000 square miles to each on an average, an area about 20 times the size of the great State of Indiana.

These proposed Federal banks are intended to be controlled by a board of nine directors of three classes—class A, class B, and class C. It is proposed that class A shall be chosen by the bankers, to consist of bankers in touch with the banking business, experts in their line. It is proposed that class B shall be chosen also by the bankers, but they shall be business men and not bankers, representative of the commercial and industrial interests of the section from which they are chosen; and class C, consisting of three members to be chosen by the Federal reserve board, representing the interests of the United States, one of the members of class C to be the chairman of the board and to be Federal reserve agent in charge of the interests of the Government, thus assuring complete publicity to the action of the banks, insuring fairness of dealing on the part of the directors of the banks, protecting the Government in its interests in furnishing Federal reserve notes to the Federal reserve banks, safeguarding the collateral upon which these notes will be based, and retiring the notes when they

come back, having served their purpose. Another member of class C would be a deputy chairman and a deputy Federal reserve agent, so as to have at all times at hand a proper representative of the Government of the United States in dealing with these regional reserve banks.

Moreover, in order that the members of class A and class B directors should be judiciously chosen, to avoid any attempt on the part of any particular set of banks to control the whole six directors, it is proposed to classify these banks into the banks of the largest size, the banks of medium size, and the banks of the smallest size, allowing the small banks to choose one of class A and one of class B, the medium-sized banks to choose one of class A and one of class B, and the larger banks to choose one of class A and one of class B. In that way each one of the classes of the banks will have their proper representation upon the board. Each bank has one vote.

The entire board and all the officers may be removed by the Federal reserve board for cause. The supervisory and examining power by the Government is complete. The bank rate may be fixed by the Government board and Government deposits may be made or withdrawn. Federal reserve notes may be loaned or refused, and at such rates as the Government may fix. The public interests are completely and most abundantly protected.

The point has been raised—and that is in issue between the two sections of the committee—that we ought not to allow the banks to have a majority of directors, but that the Government ought to name a majority of the directors. The reason why those agreeing with me and with the House of Representatives believed it was wiser to have the banks name a majority of these directors was this: We are requiring of the banks to put their reserves into these reserve banks; we are requiring the national banks to put approximately $400,000,000 into these great reserve banks and inviting the State banks and trust companies to contribute in proportion, for their own safeguarding, it is true, but also for the safeguarding of the national financial system and our national commerce; but we are requiring them to put in $400,000,000. When we do that, it is going too far to say to the men from whom we require these reserves to be so placed that they shall not be permitted to safeguard those funds. It is our duty to them, it is our duty to the country, to put upon them the responsibility of safeguarding their own funds by giving them a majority of the board of directors in those banks. Moreover, we must rely upon the friendly cooperation of these banks in order to induce them to put these reserves in the hands of the Federal reserve banks.

I remind the Senate that there are now over 18,000 State banks and trust companies and only a little over 7,000 national banks. If we impose conditions too harsh and too unjust we will be met in all human likelihood with the wholesale withdrawal from the national-bank system of the national banks from whom we are asking $400,000,000 of reserves. Shall we permit this system to become a failure by imposing conditions so harsh and so ungenerous as to alienate those whose cooperation and friendly sympathy is necessary to the best development of this system?

Moreover, we are proposing to put approximately $200,000,000 of Government funds in the Federal reserve banks, and if the banks are not stockholders, if they have no double liability as stockholders, we go before the country as placing the Government funds in the hands of the Federal reserve banks without a sufficient safeguard of capital and double liability of responsible stockholders. It is a serious consideration.

That is the reason, again, why the division occurred in the committee, those agreeing with the chairman of the committee and with the House of Representatives believing that the banks should be the stockholders, that the banks should have a double liability, and that the banks should be charged with the safeguarding of this system and with its success as stockholders, while, on the other hand, those disagreeing with us have believed that it was better to let this stock be sold to the miscellaneous public in order, as they would say, to popularize the stock. The value of the double liability of stockholders belonging to the miscellaneous public is a questionable matter. Some of them would be good and some of them would not, perhaps. Furthermore, it would be difficult in the extreme to enforce a liability of that character because of the multiplicity of stockholders and because of the possibilities of evasion.

The plan and purpose of this bill to give stability, to prevent panics, to make credit available, to end pyramiding of reserves, to abate stock gambling—all of those considerations urge that the Federal reserve banks should be banks for banks; bankers' banks; and not a public bank competing with the banks for business.

Our system in this country is entirely different from that of Europe. We have pursued in this country the system of developing independent banks. We have 25,000 individual independent competitive banks, while in Europe they have joint-stock company banks, gigantic in size, with thousands of branches. In this country each bank stands upon its own foundation. In that way we have developed in this country a wonderful banking system, which now, in the light of time, is shown to be far outstripping the European system. We have built up in this country the most gigantic banking capital and resources of any country in the world, and that is because of the independence and of the liberty of the little bank which springs up in a country village, which there safeguards the savings of the citizens at the crossroads and there takes the savings and invests them in local enterprises.

If the 25,000 banks were merely branches of some gigantic institution, it would abstract the earnings from the country village, from the small town, and from the cities and concentrate them in the great centers. The American system is to develop the immediate locality, to build up every section of the country; and our American banking system is better than the European system for that reason; but it carries with it the frailty of having made each bank dependent upon itself and upon its own reserve, and that has proven to be the dangerous weakness of the American banking system, because whenever any exigency threatens every one of the 25,000 banks begins to protect itself as well as it can by increasing its own reserves at the expense of others and by bringing its reserves home and concentrating them where they really have no need for them, but where they concentrate cash as reserves because they are afraid of panics, afraid of stringency—and they may well have fears if there be no place under the Government patronage and safeguard where they can get accommodation when they need it. They thus accentuate and bring about the very danger they fear. It must be remembered that under the credit system the banks owe about twelve times as much money as there is money in the banks.

They are credit merchants; they take credit from their depositors; they lend it on negotiable notes; they lend it on securities; and they are both debtors and creditors on a gigantic scale, and their welfare is inextricably interwoven with the welfare of the commerce and industry of this Nation. They deserve well of the country; they deserve the safeguards of their own Government; and nothing should be done, in my judgment, that would in any degree be unfair to the banks of the country; but, at the same time, the representatives of the great American people should frame a system by which it will be impossible for men intrusted with the credits of the country using their power injuriously, wrongfully, tyrannically, and with unseemly selfishness. Banks can kill any enterprise they choose if they deny credit. No man can build a railroad without bank credit; no man can build a manufacturing enterprise for any of the great necessities of life without relying upon the banks. We had brought before our committee some very striking evidence bearing upon this subject; but no evidence is necessary, because it is perfectly obvious that where there is a concerted denial of credit the banks can destroy any enterprise.

CONCENTRATION AND MOBILIZATION.

Mr. President, we are proposing to concentrate these funds; and there will be concentrated in the hands of these eight regional banks, or reserve banks, approximately $400,000,000 of reserves. We propose a capital of $106,000,000, amounting to 6 per cent of the capital and surplus of the national banks of the country, of which we propose that one-half shall be paid in during a period of six months after the system is established, making a total payment of $53,000,000 on capital stock. We propose that the Government funds shall be concentrated in these banks to a certain extent, amounting probably to one hundred and fifty or two hundred million dollars. Then we propose by this system to mobilize these reserves.

I call the attention of the Senate to the important difference between mobilization and concentration. The terms are sometimes in error used synonymously. They are not synonymous at all. In reality you may have complete concentration without any mobility whatever. You may have these reserves concentrated and put in investment bonds, where they will have no mobility. The mobility of the great public-utility banks of Europe consists in their holding their resources in liquid form, as gold, as legal-tender money, as short-time liquid commercial bills, self-liquidating because drawn against commercial goods which have found a purchaser and which will be paid in cash upon short maturities. In that way they have made mobile the reserves of Europe.

More than that, as a part of this mobility of reserves they have built up a great, open discount market, which we have not in

the United States—an open discount market in which there are many dealers, private bankers as well as joint-stock companies and banks of all classes, handling acceptances drawn against actual shipments of goods, so that they carry in their portfolios, as if they were cash, these bills of short maturities. They are not accommodation bills. They are not investment securities. They are liquid commercial bills, acceptances, drawn against the shipment of actual products which have found a purchaser and which absolutely will be paid on the day when they fall due. In these bills the great public-utility banks of Europe deal by wholesale.

The president of the Crédit Lyonnais, for instance, said that he could liquidate his entire bank as fast as the physical work could be performed because of the liquid character of its assets and because the Bank of France stood ready to take those liquid bills off its hands.

The value of keeping these reserves in a mobile form and the value of this open discount market is that it will always—not sometimes, not in good times only, but always and without fail—afford to a business man entitled to credit the opportunity to get credit according to his just deserts.

It is unnecessary for me to point out how in the United States this has so far failed that in times of stringency, much more in times of panic, men go trembling, with hat in hand, seeking credit to which they are entitled and which they ought to have merely for the asking upon the class of securities which they can offer.

But we have gone further in proposing this plan of mobilization in the present bill. We have provided for the issuance of elastic currency, by which the Government of the United States places its strong hand behind the banking system of the United States in the support of our commerce and industry. These elastic Federal reserve notes are the best-secured notes that ever have been devised in any banking system in the world. I call attention to the character of the safeguards of these notes.

The first safeguard behind these notes is a commercial bill—a commercial bill of short maturity; a commercial bill drawn against an actual commercial transaction, against an actual shipment of goods which have found a purchaser. I remind you that in the case of such a commercial bill approved by a solvent bank, extending credit to a citizen whose credit is deemed good by that bank, on a note maturing within 90 days, the chance of the failure of such a man or such a note is not one in ten thousand. But the second security is that the commercial bill put up as collateral for these Federal reserve notes has the indorsement of the member bank. In view of the fact that under this bill the member bank is subjected to frequent examinations of a thoroughgoing kind, the chance of the member bank so indorsing such a commercial bill failing within the same 90 days is not one chance in twenty-five thousand; and the chance of the individual who signed the bill and the member bank both failing within 90 days is as ten thousand multiplied by twenty-five thousand, or about one chance in two hundred and fifty millions.

But in addition to that there is the fourth safeguard—the member bank's stock in the Federal reserve bank. There is a fifth safeguard—the amount of the reserve of the member bank in the Federal reserve bank. There is a sixth safeguard—the double liability of the stockholders of the member bank, if the member bank itself be deficient in meeting its obligation. There is a seventh safeguard—the 33⅓ per cent gold reserve required to be kept against the Federal reserve notes put in circulation by a Federal reserve bank. There is an eighth safeguard—the earning power upon the stock of the Federal reserve bank. There is a ninth safeguard—the Federal reserve note is a first lien upon all the assets of the Federal reserve bank. It has a tenth safeguard—the surplus of the Federal reserve bank. It has an eleventh safeguard—the double liability of all the member banks belonging to a Federal reserve bank. It has a twelfth safeguard—the double liability of the stockholders of the member banks belonging to a Federal reserve bank. And, finally, if that were not enough, it has behind it the taxing power of the United States and it is made receivable for public dues.

There never has been a note so safeguarded by any Government in the world. Yet these safeguards are thrown around these notes without any complicated machinery whatever. It is perfectly simple and perfectly plain. If a member bank wants to get these notes, it comes to the Federal reserve bank and brings its qualified bills, and gets against those bills Federal reserve notes to meet the seasonal demand.

I do not believe there will be any urgent demand for these notes for some time; but if there should be any demand by our national commerce, this bill provides, to meet the exigency, money of the highest class, an obligation of the United States safeguarded in the 12 ways I have described.

The banks very urgently contended that these notes should not be the notes of the Government; that they should be the notes of the Federal reserve bank only. I do not think it expedient to take the time of the Senate to discuss that feature now. Probably there will be abundant opportunity to bring up that matter at a later time. Democrats and most Republicans believe in the Government issuing the money of the country. The Democratic national platform has three times declared the doctrine in the last dozen years or so.

INTEREST RATE.

Another very important feature of the bill is that it places in the hands of the Federal reserve board the power to fix the rate of interest. This power primarily is placed in the hands of the Feedral reserve bank directors; but the final determination of the rate is put in the hands of the Federal reserve board, in order to obtain the power which is necessary to protect the country as to the gold reserve by raising the rate where necessary; to protect the country against undue inflation; against undue expansion; against a speculative fever, by raising the rate, and, by forecasting the future, to protect the country in advance against any dangerous improvidence that might be brought about, by whatever cause.

Another very important feature is that allowing the Federal reserve board to fix the interest rate enables a standard to be set by which the business men of the country can hope to ascertain and know reasonably in advance what money will cost them in their enterprises, and, by knowing that they will have a stable rate of interest, to forecast the future with some degree of certainty.

One of the great injuries to this country has been that business men have been deterred from going into enterprises of various kinds because they could not foresee the future. They could not foretell what violent fluctuations of interest rates might occur. They could not tell when some tremendous stringency of credit might take place. I have placed before the Senate, in the RECORD and in these appendices, the astonishing record of the violent fluctuation of interest rates in the United States as compared with the stability, the uniformity, the steadfastness of rates in Europe. These tables I have laid before you. I placed them in the RECORD a month ago. I repeat them now in the appendices to my report on this bill; and I solicit from Senators their careful and conscientious attention to these interest rates. Let it be understood that in the American Republic we are going to have, in the future, the same stability of interest rates that prevails in Europe.

I call your attention, for example, to the fact that for 75 per cent of the time the rate of the Bank of France has not exceeded 3 per cent, and over 85 per cent of the time has not exceeded 4 per cent; that the Bank of Belgium has not exceeded 6 per cent in 50 years, even with a panic affecting the interest rates in England or in Germany; but that the interest rates in Germany and in England have been of wonderful stability.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Nebraska?

Mr. OWEN. I yield to the Senator from Nebraska.

Mr. NORRIS. I should like to inquire of the Senator whether the bill he proposes provides that the interest rate must be the same all over the country, or will it be different in different reserve regions?

Mr. OWEN. No, Mr. President; it is left primarily to the local board, and then to the final determination of the Federal reserve board. The reason for that is that it was believed that the conditions in one section of the country might be sufficiently different from those in another to justify at times a different rate of interest.

I call the Senator's attention to the fact that out on the frontier what purports to be the interest rate is something more than the interest rate. It also involves the element of insurance, because in some classes of loans on the frontier there is greater jeopardy than in the portions of the country where conditions are more settled.

It was thought that occasions might arise in some particular section when there might grow up, for some reason not now foreseen, a spirit of speculation which it might be desirable to control to some extent by the rate of interest; or an occasion might arise where a section was languishing for want of proper support, which would justify a lower rate of interest.

Mr. NORRIS rose.

Mr. OWEN. I yield to the Senator from Nebraska.

Mr. NORRIS. I should like to inquire of the Senator further whether this is one of the points of difference or agreement between his section of the committee and the other section. In other words, does the other section propose that the rate of discount shall be the same in all Federal reserve banks?

Mr. OWEN. At this moment I do not recall as to that. I remind the Senator that the print has come out only during the last day or two, and I have not had an opportunity to inspect it sufficiently to be thoroughly advised as to its contents.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Nebraska?

Mr. OWEN. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. The question raised by my colleague from Nebraska is hardly a practical question as it relates to the bill I have reported, for the reason that we divide the country into only four districts—one headed in New York, one in Chicago, one in St. Louis, and one in San Francisco. The remote regions of the country which might fall in one of the eight districts proposed by the bill reported by the Senator from Oklahoma will be included in our bill in either New York, St. Louis, Chicago, or San Francisco, and just as low rates as prevail in New York, Chicago, St. Louis, or San Francisco will prevail throughout the whole region covered by the reserve banks in those cities. So it is not a very important question in the bill which I had the honor to report whether any provision of that sort is made or not. We think the rate in Chicago will probably be as low as in New York, and in St. Louis it will probably be as low as in Chicago.

Mr. OWEN. I take it that under either proposal there would be substantially a uniform rate; but in the proposal which I had the honor to submit to the Senate there was the power, if the exigency should justify it, to make a different rate in a different district.

EARNINGS.

Now, Mr. President, we propose in this measure also that in the matter of the division of earnings the earnings for the bank stockholders should be 6 per cent and no more, and that all the remaining portion of the earnings should be used for building up the surplus and should belong to the Government. The reason of that policy is that we believe these great public-utility banks should not have as their motive or as their moving policy money-making for the stockholders; and, indeed, that is the policy which is pursued by the Bank of England, the Bank of France, and the Bank of Germany. They do not pursue the policy of taxing the commerce of the country "as much as the traffic will bear," to use the old phrase, in order to earn dividends and pay dividends to their stockholders, but they regard themselves as great public-utility banks. They do earn a satisfactory interest for the stockholders, but they do not pursue the policy of merely earning money for the stockholders. They regard themselves as the guardian of the public interest, the public welfare, the general welfare.

STATE BANKS AND TRUST COMPANIES.

We have provided in this measure that the State banks and trust companies desiring to avail themselves of the privileges of this act should have the right to come into the system upon the same terms, substantially, as the national banks, requiring them, however, to submit to a proper examination, to be assured that they were solvent, requiring them to comply with certain reasonable rules that now rest upon the national banks and which are set forth in some detail in the report which I have had the honor to submit.

I will call the attention of the Members of the Senate to the probable readjustments of cash under the reserve requirements of this bill, which have been worked out in some detail and submitted in the report. I will not trouble the Senate with going into the details of that mathematical calculation, although it is a very important one, and it is of the highest importance to the banks of the country that the questions involved should be intimately and analytically considered. I will call attention only to the final result.

If the national banks going into this system should avail themselves of one-third of the funds of the Federal reserve banks by rediscount, there would be a cash margin of $18,000,000. If they avail themselves of one-half of the resources of the Federal reserve banks, there would be $114,000,000 of cash surplus. If there should be two-thirds of the fund of the central reserve banks borrowed, there would be $219,000,000 of cash surplus.

But I call the attention of the Senate to the very important fact that the State banks, which have not in their vaults anything like so large a proportion of cash as the national banks, would have a possible deficit of $239,000,000 in cash, if every one of them should come in and if they should only avail themselves of the right of rediscount to the extent of one-half of the reserves which they themselves put into the system. But this, of course, could be offset by the Federal reserve notes—if they might be emitted and if they might be used as reserves—could be offset by a somewhat larger supply of Government funds which are available, because the Government has, in fact, more than $150,000,000 that could be placed with these banks. I have only made the estimate upon the basis of $150,000,000 of United States deposits. The Government, in fact, has over $250,000,000 it could use, not to mention $175,000,000 of Panama bonds due the general fund.

The cash could be further supplemented by the national bank notes which are now not used as reserves by the national banks, but which are used as reserves by the State banks, the State banks having about $60,000,000 of the national-bank notes as reserves, while the national banks have about $40,000,000 which are not used as reserves, and there is about $45,000,000 in transit through the Treasury of the United States. So taking the whole amount outside of the pockets of the people of the issue of $722,000,000 of national-bank notes, there is outstanding in the hands of the banks and in the hands of the Treasury only about $145,000,000, and I see no reason why they might not be made reserves under that state of facts, remembering that those notes are in reality not mere asset notes against the credit of the banks emitting them, but that they are secured in every instance by the bonds of the United States, dollar for dollar.

Now, the power to permit the banks to count as reserves the national-bank notes and the Federal reserve notes, we propose to put into the hands of the Federal reserve board, so if it is found that there is need for additional cash when these banks come into the system there may be available sufficient cash. There is no question in this bill of more vital consequence than that subject.

Some of the banks have urged that we should lower the reserves in the reserve cities from 18 per cent, as proposed in this bill, to 15 per cent. Mr. Reynolds, of the Commercial Bank of Chicago, who is a representative banker of a very high class, has insisted upon that. I received a telegram this morning from the national banks of Kansas City urging that that should be done. I think it should be done, thus releasing a somewhat larger amount of actual cash, nearly sixty millions, which otherwise would be locked up in the vaults of the banks or in the Federal reserve banks.

The powers of the central reserve board are general supervisory powers.

POWERS OF THE FEDERAL RESERVE BOARD.

To readjust districts created by the organization committee and create new ones.

To regulate the establishment of branches of Federal reserve banks within Federal reserve district in which bank is located.

To designate three (class C) of the nine members of the board of directors of each Federal reserve bank, one of these to be chairman of the board with the title of "Federal reserve agent," and one "deputy Federal reserve agent."

The Federal reserve agent to maintain a local office of the Federal reserve board on the premises of the Federal reserve bank. He shall make regular reports to Federal reserve board and be its official representative.

To remove any director or officer of a Federal reserve bank for cause stated.

To remove chairman of Federal reserve bank without notice.

To establish by-laws governing applications from State banks and trust companies.

"Of the six persons * * * appointed (by the President), one shall be designated governor and one vice governor of the Federal reserve board." The governor, subject to supervision of the Secretary of the Treasury and board, shall be the acting managing officer of the Federal reserve board.

To levy a semiannual assessment upon the Federal reserve banks for estimated expenses for succeeding six months, together with deficit carried forward.

To examine at its discretion the accounts, books, and affairs of each Federal reserve bank or member bank and to require such statements and reports as it may deem necessary.

To permit or require a Federal reserve bank to rediscount the paper of any other Federal reserve bank.

To suspend for a period not exceeding 30 days (and to renew such suspension for periods not to exceed 15 days) any and every reserve requirement specified in this act.

To supervise and regulate the issue and retirement of Treasury notes to Federal reserve banks.

To add to the number of cities classified as reserve and central reserve cities under existing law in which national banking associations are subject to the reserve requirements set forth in section 21 of this act, or to reclassify existing reserve or central reserve cities and to designate the banks therein situated as country banks, at its discretion.

To require the removal of officials of Federal reserve banks.

To require the writing off of doubtful or worthless assets upon the books and balance sheets of Federal reserve banks.

To suspend the further operations of any Federal reserve bank and appoint a receiver therefor.

To perform the duties, functions, or services specified or implied in this act.

To determine or define (subject to stipulations) the character of paper eligible for discount for member banks.

To prescribe regulations for purchase and sale by Federal reserve banks of bankers' bills, etc.

To review and determine the minimum rate of discount for member banks established by Federal reserve banks and fix weekly the discount rate reserve banks may discount for each other.

To authorize establishment of correspondents and agencies of Federal reserve banks in foreign countries.

To authorize the issue of Federal reserve Treasury notes.

To receive, through the local Federal reserve agent, applications from Federal reserve banks for notes, such applications to be accompanied by rediscounted notes for deposit as collateral security.

To require Federal reserve banks to maintain deposits in Treasury of United States in gold of 5 per cent or more of notes issued.

To grant in whole or in part or to reject entirely the application from Federal reserve banks for notes.

To establish rate of interest on notes issued.

To prescribe regulations for substitution of collateral.

To make and promulgate regulations governing the transfer of funds among Federal reserve banks.

To act, if desired, as clearing house for Federal reserve banks.

To require, in its discretion, Federal reserve banks to act as clearing houses for shareholding banks.

To require extra examinations of national banks when deemed necessary.

To determine and report annually to Congress fixed salaries of all bank examiners.

To assess upon banks in proportion to assets or resources the expenses of examinations.

To fix a date for such assessment.

To arrange for special or periodical examinations of member banks for account of Federal reserve banks.

To receive from Federal reserve banks information concerning the condition of any national bank in its district.

To order examinations of national banks in reserve cities as often as necessary.

To add to the list of cities in which national banks shall not be permitted to loan on real estate as described.

To receive applications from national banks having $1,000,000 or more capital for the establishment of branches in foreign countries, to reject or accept such applications, and to prescribe conditions under which such branches may be opened.

To require examinations of foreign branches as it may deem best.

I do not think that it is necessary to take the time of the Senate at this general presentation of the bill to discuss in detail those powers, except to say in a broad way that the powers are intended to cover the complete supervisory control of this system. It is perfectly obvious that these powers make it entirely unnecessary to deprive the banks of six directors on the Federal reserve bank board on any theory that the banks could use such powers injuriously. The Federal reserve board even has the power to remove the directors of the Federal reserve banks or any of their officers for cause, so that the supervisory control of the United States will be complete. But we have not believed it wise to charge the United States with the technical detailed administration of the banking business by making the Government entirely itself responsible by giving the United States a majority of the directors and charging the United States with the duty directly of extending credits to member banks through these directors and administering this gigantic system by purely public functionaries.

The sympathetic cooperation of the banks, the membership of the banks, is essential and should not be jeopardized.

Mr. BRADY. Mr. President——

Mr. OWEN. I yield to the Senator from Idaho.

Mr. BRADY. I understand the bill provides that the directors elected by the different banks of the association elect the main director and that he is designated as the agent of the Government.

Mr. OWEN. The Federal reserve board names three of class C, one of them being the chairman of the board.

Mr. BRADY. And it is one of the three named by the Federal reserve board who is named as the agent of the Government?

Mr. OWEN. Yes. In order to bring the Federal reserve board into intimate touch with the conditions of the country we have provided for a Federal advisory counsel, each Federal reserve bank electing a man to represent them and to confer with the Federal reserve board, to obtain information from the Federal reserve board, and in that way to give complete publicity to the actions of the Federal reserve board, but more, to give the Federal reserve board the intimate knowledge of the conditions of business in each and every section of the country where there is established a Federal reserve bank. In that way it is hoped to make the Federal reserve board more efficient.

I need not say, Mr. President, that no one can have any doubt that the members of the Federal reserve board should be men of the most distinguished attainments, men who should rank favorably in comparison with members of the Supreme Court of the United States, because in reality this Federal reserve board will be a supreme court of American finance, safeguarding the commercial interests of this Nation, protecting our gold reserve, protecting our banking system, protecting our commercial system, protecting the individual credit of the private citizen, and giving him a fair deal in the struggle of commercial and business life, and seeing to it that every citizen shall receive the just amount of credit to which he is entitled by character and by resources.

ABATEMENT OF STOCK GAMBLING.

Mr. President, one of the most far-reaching results which will follow will be the abatement of the nuisance of the national menace of the stock-gambling operations in this country, because this measure proposes to gradually withdraw these reserves, which have heretofore been pyramided in the three great central reserve cities. I call the attention of the Senate to the peculiar situation in which a banker in a Federal reserve city finds himself. These reserves are pyramided there; under the custom 2 per cent is paid for the use of the funds; and he finds himself in an attitude where he is compelled to keep liquid, at whatever expense, a considerable volume of his resources over and above his 25 per cent reserve. He has no great public utility bank in this country to which he can go for credit. He has no open discount market in this country. He can not convert quickly into cash his liquid commercial bills. The only place that he can get his resources quickly in cash is upon the stock market. Therefore these men have been forced by the conditions surrounding them to lend money by hundreds of millions upon the stock exchange. When the time comes and they need the funds, under the hard rule which prevails on the New York Stock Exchange, that stock held on call can be sold on the stock market for cash. It may ruin the borrower; it may wipe out his margin; it may reduce him to bankruptcy; it may cause the most violent fluctuations of the interest rate; it may upset the interest rate, affecting the commercial life of the Nation; it may bring on a wholesale stringency of credit; it may involve the whole country in a disastrous panic; but it does bring the money; it does give the relief to the man who needs the money against that collateral.

So I think it is of great value to the great banks of the central reserve cities that they may have these Federal reserve banks established, and that they may get cash on their commercial bills in a quantity sufficient to meet whatever exigencies may arise.

We have been assured by some of the bankers of New York that they would be glad of the opportunity to withdraw their funds from the call market and place their funds at the service of the commerce and industry of our great Nation, and they will do that gladly and safely now, when these Federal reserve banks are established, where they can get the accommodation against their commercial bills.

Indeed, this bill goes further. It provides that a member bank, with the consent of the reserve board, may get accommodation against other classes of securities. That is an emergency measure, but it is an emergency measure of the highest importance. A bank may be subjected to some sudden demand. I remind you that the passing of a rumor around the country that a bank is not in a good condition may cause a run to be made upon the bank. I call your attention to the extraordinary spectacle at Kansas City a few years ago, when the National Bank of Commerce, one of the strongest and most powerful and solvent banks in the country, was compelled to stand up and be bled to death by a circular sent out by the Waters-Pierce Oil Co. to its agents throughout the country not to take any exchange on the National Bank of Commerce. It was a simple little circular; but they had thousands of agents, and every single corner of the country trembled immediately with the suggestion that the Bank of Commerce was in a failing condition.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Colorado?

Mr. OWEN. I yield.

Mr. THOMAS. I should like to inquire of the Senator what excuse or pretense was given by the Waters-Pierce Oil Co. for sending out such a circular? It is a most remarkable statement. If I had ever heard it before, I had forgotten it.

Mr. OWEN. It is a fact.

Mr. THOMAS. I have no doubt of it on the Senator's statement.

Mr. OWEN. I called the attention of the Senate to it five years ago.

Mr. REED. Mr. President, I think I can answer the question.

Mr. OWEN. I yield to the Senator from Missouri.

Mr. REED. If my recollection serves me correctly, the only explanation ever made was that the company had the right to direct its agents to accept or refuse paper drawn upon any bank, and that it was within its constitutional rights. That, I think, is the only excuse that was ever offered.

Mr. THOMAS. If my statement is incorrect, I hope I will be corrected; but I assume that this is the same Waters-Pierce Oil Co. which has an enormous oil concession in the Republic of Mexico and which is said to be behind one or the other of the parties engaged in revolution there.

Mr. OWEN. Mr. President, it is difficult to ascertain the motives of men, but the motive which seemed to be behind this remarkable performance would suggest the ancient story of Naboth's vineyard. At all events, that circular led to the National Bank of Commerce, with $35,000,000 of deposits, standing there and paying out between $17,000,000 and $18,000,000 of cash before it finally failed and went into the hands of a receiver. Under such circumstances the Federal reserve bank system would make impossible the ruin of a great institution of that kind, and I pause to say that the institution afterwards proved to be solvent and is now a going concern in good condition.

But this bill provides, and it rightly provides, that in case of an emergency the Federal reserve bank, with the approval of the Federal reserve board, may extend the accommodation to a bank against its assets of whatever character, provided they are a good security. The central reserve city banks have little or no use for their present legal 25 per cent reserve, but work around a margin of 1 or 2 per cent reserve. This bill makes the whole reserve available.

REFUNDING 2 PER CENT BONDS.

Mr. President, the bill as passed by the House provided a method of refunding the bonds, providing that the Secretary of the Treasury might issue 3 per cent bonds, without the circulation privilege, in lieu of the 2 per cent bonds held by the national banks with the circulation privilege. The theory of that was that the Government would gain as much out of the interest on the Federal reserve notes issued through the Federal reserve banks as would compensate the Government for the payment of the 3 per cent interest on such bonds.

I think that calculation is properly made. But we have made a proposed change in this bill, allowing the Federal reserve banks to buy those 2 per cent bonds—that might be offered on the market by national banks not desiring to continue their circulation—and allowing the Federal reserve banks to issue Federal reserve bank notes against those bonds in lieu of the national-bank notes retired.

There is no additional security, because the security is practically the same as now. At present the national bank that issues its notes against 2 per cent bonds does so against its own credit and bonds of the United States, the credit of the banks making amends for any supposed deficit of value in the 2 per cent bonds, if there be conceived to be any lack of value in the 2 per cent bonds. But in this case the Federal reserve bank, having probably an average of 2,000 member banks, and all those banks being good for such notes if emitted, the security is even better than under the old national-bank system, without requiring any additional security.

Of course there would be in all human probability considerable gold reserve always available in addition. We expect by this system to have drift into these Federal reserve banks a very large part of the gold supply of the country. It will drift in by gravity, not only because the people are satisfied with the national-bank notes as pocket money, but would be satisfied with the Federal reserve bank notes as pocket money; and naturally as these gold certificates flow through these Federal reserve banks, since it is a condition upon which they may emit Federal reserve notes that they have a gold reserve, they will probably retain those gold certificates and gold, and in that way the Federal reserve banks will steadily acquire a very large gold holding.

CLEARING CHECKS.

Mr. President, there is one other item that I think the attention of the Senate should be called to, and that is the clearing and collecting of checks. The House bill provided that the Federal reserve banks might clear checks at par for member banks. We have changed that so as to provide that the cost shall be ascertained and fixed by the Federal reserve board. We believe that it will serve a very great and useful purpose to provide for the clearing of checks to the extent that the member banks desire to send checks through the Federal reserve banks. Take one reserve bank, for instance, at St. Louis, with 2,500 member banks, each bank keeping its reserve there, each bank remitting to that center its checks, due from other banks, belonging to the same system, and all that will be necessary will be to make a cross entry upon the books of the Federal reserve bank, and a most economical adjustment of credits could be arranged in that way without loss of time. It would greatly increase the velocity of the check system. It would make a check more valuable. It would enable the banks to increase their deposits, because their checking deposits would be more valuable, and at the same time the complaint of the country banks that these banks would be in competition with them would be abated, because if the reserve bank could not make its exchanges of credit less than the actual cost and a small profit which ought to be allowed, it would not be in competition with the country banks.

Moreover, the amendment which we propose provides that the country banks shall not be interfered with in their present method of selling exchanges against collection, from which some of them make a considerable profit.

SAVINGS BANK SECTION.

We have struck out section 27, providing for savings banks, because the banks of the country are unanimously against it. The national banks at present have a system of time deposits, upon which they conduct practically a savings-bank business very economically, and they use the funds collected in the banks in that way for local enterprises. They get a good rate of interest out of the savings deposits, which they collect in that way; and they all desire that they be left undisturbed in their present method.

So both sections of the committee have struck out the savings-bank section, and, indeed, I understand there is no great support of that section, even on the House side. It was put in as a last thought, thinking perhaps it might be useful.

There are, of course, other important improvements in our banking system which may be expected to be worked out, particularly the question of agricultural credits.

There is another system which I think will prove useful, and it will be discussed at the proper time, but this great measure for the Federal reserve bank system is of such urgent importance that it was not thought wise to bring into this bill questions relating to agricultural credits, nor the question of character banks, which have been worked out in Italy to a very high degree, or other considerations that might impede the discussion of this matter. So we have brought nothing into it that is not germane.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Nebraska?

Mr. OWEN. I yield.

Mr. NORRIS. Right on that point I wish to inquire of the Senator whether the bill he has proposed as a substitute makes any change in the House bill in relation to farm loans?

Mr. OWEN. It does. We have extended the time from nine months to five years, so as to enable some of the country banks that would like to handle these farm mortgages as merchants to buy them and turn them over and sell them.

Mr. NORRIS. Out of what fund does the bill permit the banks to make farm loans?

Mr. OWEN. It would be up to a certain limit; one-quarter of its capital and surplus is the provision, not to exceed one-half of the value of the property against which the mortgage is placed; 25 per cent of the capital and surplus would make a total of $400,000,000, possibly, although the city banks are not likely to invest in farm mortgages, unless there should be built up a system by which these mortgages would be safeguarded

Mr. NORRIS. As I understand it, the other branch of the Banking and Currency Committee has provided for a loan of some portions of the time deposits?

Mr. OWEN. Yes; and I thought that suggestion was an advisable one. I will say that in the proposals made by the other section of the committee—I have read them through somewhat hurriedly—I have seen several things that I thought were meritorious and which at the proper time could be accepted. The differences between the two sections of the committee, I think, can be reconciled by the Senate without any great difficulty. I only want to conclude my remarks in presenting this bill, made now for the purpose of opening the discussion, by saying that I think it is of very great importance to the business interests of the country that as soon as we can dispose of these differences between the two sections of the committee, as soon as we can get this matter passed, it is of the most urgent importance to do it, because the whole country is waiting; the business men are waiting, and the banks are waiting. The banks are piling up their reserves, because they do not know exactly what this bill is going to be, and they are doing the thing which would be natural for men to do to protect themselves against some exigency that they can not fully foresee. For that reason the banks are hesitating, and the business men of the country are finding it difficult to get the accommodations they ought to have. That aspect of it, of course, reaches Democratic business men, Republican business men, and business men who have no politics. It reaches everybody alike. It is a matter of the most urgent importance, and I do hope that the Senate will give, and I appeal to the Senate to give, the most urgent and immediate attention to the bill. I ask the Members of the Senate to read these bills presented to them, to read these reports as quickly as possible, and to give the time necessary to thoroughly comprehend this matter. I do not think it is a difficult matter. There are only a few elements in these bills—the concentration of these reserves, making them mobile, providing an elastic currency through the simple mechanism of these banks. That is not difficult. There is no particular difficulty about the bill. It is easily

understood by any thoughtful mind. Members of the committee have already heard so much of the discussion that I see no reason why the bill should take any very great time. The whole country has been waiting with a great degree of impatience upon us.

I thought it necessary to explain some of the history of the examination of this matter in opening my remarks, because there are some who have contended that we ought not to be unduly in haste about this matter; but we have spent all the time necessary, and I think it is of the most urgent importance to the country now that we should waste no more time with regard to it.

I hope also that Members of the Senate will take the pains to look through the tables which have been printed as a part of this report, because they will find them bearing directly upon the problem involved.

I wish now to express my appreciation of the patience of the Senate in waiting for this report. I will say that, as chairman of the committee, I have done what I could to bring it before the Senate as quickly as possible; but there were many men who wanted to be heard, and there were many interests of very great importance that had a right to be heard. If the committee has seemed to have been somewhat longer than was absolutely necessary, at the same time the question was of such great importance, it was of such vast import to the country, that the committee has felt that it was best to give as thorough an examination into the matter as possible. You have before you now the views of both sections of the committee and the full record.

I will now move the amendment which I proposed on Saturday. The subject is now before the Senate; Senators desiring to speak upon it may do so, though I do not suppose we shall arrive at immediate action upon the bill.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Iowa?

Mr. OWEN. I yield to the Senator.

Mr. CUMMINS. I rose to ask a little further explanation of one part of this bill.

Mr. OWEN. I shall be very glad to answer any questions the Senator may ask.

Mr. CUMMINS. I should like to learn from the Senator from Oklahoma whether he attaches great importance to section 10. That section deals with the admission of State banks to membership in the Federal reserve bank. That is a mere prelude to asking whether the Senator has examined the laws of the several States and whether he knows the situation sufficiently to be able to advise the Senate as to the practicability of the admission of State banks as stockholders in the Federal reserve banks or the Federal reserve bank. I do not believe there is a State in the Union under whose laws a State bank could become a stockholder in a Federal reserve bank. I do not believe there is a State in the Union under whose laws a State bank could agree to conform to provisions of the law creating and regulating national banking associations. I apprehend that if that section is to become of great importance it will be necessary that the laws of all the States be revised. I have therefore asked the Senator from Oklahoma whether the cooperation of the State banks in this manner is a vital thing in the administration of the system which is here proposed.

Mr. OWEN. I should say that it was a very desirable thing, and, so far as we could open the door we did so, assuming that the States which had laws which would preclude the State banks of that State from entering the system would within the three years change such laws so as to make it permissible.

Mr. CUMMINS. But the Senator from Oklahoma, I assume, believes that the system would be operative and helpful even though the State banks were not admitted as stockholders of the Federal bank?

Mr. OWEN. Oh, yes.

Mr. CUMMINS. A very curious relationship is here proposed between the State institutions and a Federal institution. I shall have occasion later on to consider that relation. I have had grave doubts whether it could be made practicable or helpful.

Mr. OWEN. I will state that I have not put the microscope upon the point which the Senator raises, and I assume that there might be a number of States where it could not be done, and that they would then, if they approved the system, modify the State law so as to enable their banks to come in under this provision; so we open the door for them to come in when they can under the permission of the State laws.

Mr. CUMMINS. Mr. President, I am not opposed to it if it can be done practicably; but it not only involves the authority on the part of a State corporation—that is, a State bank—to become a stockholder in a Federal corporation, with all the liabilities that the law imposes upon a stockholder, but it involves the joint operation upon the same institution of laws that are radically different and must remain different so long as we have as great varieties of views upon great public questions as we now have.

Mr. OWEN. Yes; that is true, of course.

Mr. CUMMINS. And I merely wanted to begin my inquiry into it with the assurance of the Senator from Oklahoma that the system proposed would be operative and would be efficient even though no State bank entered it.

Mr. OWEN. Oh, yes; we have simply opened the door to invite the State banks in that could come in; and I will say that I have had assurances from Chicago and Kansas City and St. Louis that many of the State banks and trust companies expect to come in. I think that almost every State bank and trust company in the country will come into the system and that they expect to do so; but the system is, of course, for the national banks and not necessarily for the State banks, but it was thought desirable to have the State banks provided for if they wished to enter the system.

Mr. CUMMINS. It is perfectly evident that they could not come in until they had further legislation, not only because they have no power to subscribe for stock in this new system, but the bill provides that—

> Any bank becoming a member of a Federal reserve bank under the provisions of this section shall, in addition to the regulations and restrictions hereinbefore provided, be required to conform to the provisions of law imposed on the national banks.

Mr. OWEN. As to examinations and special points only.

Mr. CUMMINS. We all know—or, at least I assume—that the laws of Illinois with regard to her trust companies and her banks are very different from the laws of the United States relating to national banks. I know they are in my State. It would be impossible for a State bank in Iowa—I think it would be impossible—to conform to both the national law governing national banks and the State law governing State banks at the same time.

Mr. OWEN. Mr. President, I direct the attention of the Senator from Iowa to the fact that he did not read the next few words of the bill.

Mr. CUMMINS. Perhaps I have omitted something that ought to have been read. The bill further provides:

> And to such rules and regulations as the Federal reserve board may, in pursuance thereof, prescribe respecting the limitation of liability which may be incurred by any person, firm, or corporation to such banks, the prohibition against making purchase of or loans on stock of such banks, and the withdrawal or impairment of capital or the payment of unearned dividends.

I see nothing there that would modify what I have stated.

Mr. OWEN. I suggest that they could comply with it if they would, just by their own agreement. They could do that by contract.

Mr. CUMMINS. I do not think so.

Mr. PAGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Vermont?

Mr. OWEN. I yield to the Senator from Vermont.

Mr. PAGE. I should like to inquire, Mr. President, of the Senator from Oklahoma if it is not true that under the laws of all the States—it certainly is of all the Eastern States—that a savings bank or a trust company is limited in its investments to certain specified lines, and that all other lines are excluded?

Mr. OWEN. I think that is true in most of the States; but we do not expect savings banks to enter the system, as they do not need to do so.

Mr. PAGE. And is it not true that under this bill the State inspectors of banks would come in conflict with the national inspectors of banks?

Mr. OWEN. No; I think not, because this bill provides that the reports of the State banks may be accepted if they are carefully made, and the banks can readily agree to have an examination made that is not required by the State law, just as they do agree to have themselves examined by the clearing-house examiners.

Mr. PAGE. Is it not true that under the State laws it is expected that nearly all of the State banks and trust companies will loan their money on real estate, while under the provisions of this bill it is expected that only a limited sum shall be so loaned?

Mr. OWEN. Of course, that is true; but that inhibition does not run against the savings banks nor trust companies, either, under this system.

Mr. PAGE. But, for all that, the National Government, through Congress or the managers of the Federal reserve banks, will have the power to dictate, it seems to me, as to what investments the State banks may make.

Mr. OWEN. Oh, no; the purpose of this bill is only to impose a few very limited provisions upon the State banks; that is to say, that they shall not extend credits unduly to single individuals; that is, not over 10 per cent of their capital and surplus, just as in the case of the national banks. No further provision is proposed to be imposed upon State banks entering into the system than will merely safeguard their credit and make their credit as good as that of a national bank.

Mr. PAGE. To do that will it not be supposed that the National Government will ask for an inspection and examination of State banks?

Mr. OWEN. Yes; and very properly.

Mr. PAGE. But the regulations of the Federal Government or of the Federal reserve board may come in conflict with the State regulations, may they not?

Mr. OWEN. I should not think so. I think that if the bank was willing to have itself examined by a chartered accountant the bank would have a perfect right to do so. I have had my own bank examined by a chartered accountant, regardless of the examination of the comptroller's office; and I did so because I wanted to know, independently of the comptroller's report, exactly what the condition of the bank was. There is no reason why a State bank should not have itself examined by a chartered accountant, so far as I can see.

Mr. PAGE. So far as I know, no State bank—certainly not in my State—would be inclined to object to the examination of a national-bank examiner. Indeed, it is provided in the laws of Vermont that when two banks are intimately associated or are in the same building, one a national bank and the other a savings bank or a trust company, the national-bank examiner and the State-bank examiner shall meet and examine them together; but it seems to me that you would have to draw this bill with a great deal of care in order to prevent a conflict between the National and State examinations.

Mr. OWEN. Since the matter is entirely optional with the State bank whether it wants to come in or not, of course the State bank would exercise its own pleasure with regard to that. It is not at all compulsory; it is just a matter of grace on their part, if they desire to enter the system, to give assurance to the Federal reserve bank or the authorities of the United States that their examination is properly made. We have provided in the bill that if the examination of the State authorities is carefully made it may be accepted as sufficient.

Mr. BRADY. Mr. President——

Mr. OWEN. I yield to the Senator from Idaho.

Mr. BRADY. I should like to inquire of the Senator from Oklahoma whether or not both branches of the committee have agreed upon this section of the bill, or is there a difference of opinion between the two branches of the committee?

Mr. OWEN. I think there is no difference of opinion as to the propriety of inviting the State banks to come in and offering them an open door.

Mr. BRADY. I will inquire of the Senator from Nebraska [Mr. HITCHCOCK] if that is his understanding?

Mr. HITCHCOCK. There is a considerable practical difference by reason of other sections of the bill. The objection raised by the Senator from Iowa [Mr. CUMMINS] that a State bank must become a stockholder in the system under the draft of the bill presented by the Senator from Oklahoma does not apply so strongly to the draft which I had the honor to present, for the reason that in the draft presented by the Senator from Oklahoma each bank is required to take a certain amount of stock in order to become a member of the association, and, once taken, that stock can not be sold; it is not a liquid asset of the bank and, no matter how great the needs of the bank to pay depositors or to meet other obligations, it can not sell that stock; it is impounded. Under the draft, however, which I had the honor to present, if the bank takes any stock at all, it is simply because some has not been taken by the public and the bank takes it and holds it like any other investment, having the power to part with it at any time, to realize cash upon it, and to use that cash for its needs.

Mr. BRADY. That, Mr. President, answers that question fully. While the Senator from Oklahoma is on his feet, I should like to ask him a question relative to the fixing of the rate of interest by the reserve board and whether the same will be controlled by the board of control?

Mr. OWEN. The method provided——

Mr. BRADY. As an illustration, let us assume that the reserve board of a district fixes a rate of interest different from the rate of interest in some other district. Is that subject to review by the board of control?

Mr. OWEN. Yes.

Mr. BRADY. Now, does your bill give the board of control power to require the district or regional reserve bank board to accept the rate of interest fixed by the board of control?

Mr. OWEN. It has the power finally to determine the rate and fix it.

Mr. BRADY. And a bank in that district will be compelled to accept that rate?

Mr. OWEN. It will be compelled to accept it.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from North Dakota?

Mr. OWEN. I yield to the Senator from North Dakota.

Mr. McCUMBER. I wish to direct the attention of the Senator from Oklahoma to a feature of his bill which he has not discussed at all, and that is the feature of redemption. I think we will all agree that both of the bills which have been presented to the Senate are very simple in the method provided for inflating the currency of the country, but I do not understand that either of them is quite as efficient in deflating it after it has once been inflated. With the present increase in the volume of currency, due mostly to the increase in the volume of gold and the necessary depreciation of the purchasing value of every dollar, I assume that the Senator agrees with me that we ought not further to exaggerate this injustice to the savings of our industrious people by further depreciating the value of our dollars; and that, if we necessarily inflate the currency one single dollar by the issue of a dollar that is not based upon gold itself, we ought to deflate it just as soon as possible. We ought not to have any system of what might be called an elastic currency which will pull out 3 feet and will come back only 1 foot.

The $300,000,000 or $500,000,000 that may be issued by the reserve banks as an independent currency will add that much to the currency of the country, and will in a very short time be scattered among 95,000,000 people. Now, I should like to see some system—I confess that I have not read over the bills since they have been reported and amended, but only the original House bill—I should like to see some system that would be just as efficient under the law in bringing this money out of circulation as it is in putting it into circulation for the purpose of meeting any contingency of the country.

I should like to know further from the Senator himself what his bill provides in this respect, and how he is going to get these dollars, scattered among all of the people, out of circulation when the needs of the country no longer demand it?

Mr. OWEN. Mr. President, in answer to the observations of the Senator I very freely concur as to the importance of having the notes retired which are called "elastic currency." If they were merely to become a part of the permanent currency, that would be one thing, but having them as a temporary expedient is a different thing. I will answer the Senator directly by saying that the Federal reserve notes, when drawn out by the Federal reserve banks, are drawn from the hands of the Federal reserve agent who has an office on the premises of the Federal reserve bank and has his own safe. He keeps the Federal reserve notes available. When he lets out $100,000 of those notes, he does so on commercial bills due within 90 days. When those bills are paid they must be withdrawn from his hands for payment, and they can not be withdrawn from his hands unless Federal reserve notes of like volume or other forms of money in the same volume used by the United States are replaced in his hands and in his safe, where they go out of circulation.

I agree that the Federal reserve notes as individual notes passing into the hands of the citizens of the country and passing current outside of the bank will not return immediately to the banks, so that the individual notes can be returned; but what is equal to the same thing is that a volume of notes or money or gold, as the case may be, must be returned into the vault of the Federal reserve agent to take the place of the $100,000 which was drawn out of that safe; and, therefore, the contraction would be identical in amount, although not identical in the notes.

The notes themselves, however, are required to be returned to the bank through which they were emitted by any other Federal reserve bank which may receive them or by the Federal Government if it receives them, and in that contingency, when the individual notes are returned—and they are earmarked, with the number of the district plainly marked on the notes—then those notes would come into the hands of the reserve agent and he would return the lawful money which had been put into his hands in lieu of the notes when the commercial bills were taken down.

Mr. McCUMBER. But with 8 of these reserve banks, and there being 25,000 banks in the United States, the chance of the identical bills getting back into the hands of the reserve bank would be the equivalent of about eight to twenty-five thousand, which is not a very important matter to consider at all in the method of getting this money back.

Mr. OWEN. I call the attention of the Senator, however, to the fact that it does not make any difference whether these particular notes come back or not if a like volume is retired.

Mr. McCUMBER. That is true if a like volume is returned and can not be used for any purpose.

Mr. OWEN. They can not be, because they are retired.

Mr. McCUMBER. Is that the provision of the bill?

Mr. OWEN. It is.

Mr. McCUMBER. Or can they be issued again and again?

Mr. OWEN. They can not, except upon like conditions or in exchange for the Federal reserve notes emitted by such bank. They go back into the hands of the Federal reserve agent, to be held by him.

Mr. McCUMBER. Are they destroyed?

Mr. OWEN. No; they are not destroyed; there is no need to destroy them unless they are mutilated.

Mr. McCUMBER. They are simply held for any subsequent issue?

Mr. OWEN. They can be used in like manner again.

Mr. McCUMBER. I say for a subsequent issue?

Mr. OWEN. Yes.

I will be very glad to answer any other questions any Senator would like to ask me.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Utah?

Mr. OWEN. I yield to the Senator from Utah.

Mr. SMOOT. Did I understand the Senator to say that there will be no inflation of the currency? All of the currency that is issued upon commercial paper will not be redeemed at the same time, either by reserve currency or lawful money of the United States, so that whatever the volume of business done in the country under this plan amounts to there will be that much of an inflation from the present circulation.

Mr. OWEN. If you choose to use the term "inflation." There would be a temporary expansion of currency against these commercial bills; but the important feature which I wanted to call the attention of the Senator to was that it is measured and absolutely controlled by the volume of the commercial demand. The commercial demand must exist: the member bank must need currency for its constituency, and the member bank needing currency comes with its bills and asks for currency and can get currency. As soon as the seasonal demand is over then, of course, it would return them, because it is paying interest on them.

Mr. WILLIAMS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Mississippi?

Mr. OWEN. I yield to the Senator from Mississippi.

Mr. WILLIAMS. I think there is one point, which, if I understand correctly, the Senator did not state, that would make the position clearer. Suppose that instead of returning these particular asset currency notes the bank which had deposited the commercial bills were to bring in $100,000 of greenbacks, let us say. Then the question was asked the Senator as to whether that $100,000 of greenbacks should be destroyed. The Senator properly replied "no," and there was no use in destroying them. Now, when a man came in and wanted to borrow another $100,000, let us say, on more commercial bills of some other bank, then, as I understand, the $100,000 in greenbacks could be put out against the $100,000 of commercial bills instead of $100,000 of commercial-asset circulation?

Mr. OWEN. Yes. In either contingency, however, there is a further very important control provided in the bill, and that is that the Federal reserve board can raise the rate of interest if they find that abuse is extending to the use of these Federal reserve notes. It is of great importance that the Federal reserve board should have that power in order to prevent inflation.

In fact, there are several checks; First, the demand of citizens for cash—actual cash; second, the demand of a member bank for cash—actual cash; third, the demand of the reserve bank; fourth, the putting up of commercial bills of the qualified class; fifth, the minimum gold reserve of 33 per cent; sixth, the interest rate imposed by the Federal reserve bank; seventh, the interest rate that can be raised by the Federal reserve board.

If there is no further question that any Senator would like to ask me, I yield the floor.

APPENDIX.

The report submitted by Mr. OWEN on November 22, 1913, is as follows:

[Senate Report 133, part 1, Sixty-third Congress, first session.]

BANKING AND CURRENCY.

Mr. OWEN, from the Committee on Banking and Currency, submitted the following report to accompany H. R. 7837:

The Committee on Banking and Currency, to which was referred the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, for furnishing an elastic currency, affording means of rediscounting commercial paper, and to establish a more effective supervision of banking in the United States, and for other purposes, having considered the measure, report the same to the Senate without recommendation.

[Senate Report 133, part 2, Sixty-third Congress, first session.]

BANKING AND CURRENCY.

Mr. OWEN (for himself, Messrs. O'GORMAN, REED, POMERENE, SHAFROTH, and HOLLIS), from the Committee on Banking and Currency, submitted the following views (to accompany H. R. 7837):

The chairman (Mr. OWEN), on behalf of himself and his colleagues, Messrs. O'GORMAN, REED, POMERENE, SHAFROTH, and HOLLIS, submit the following memorandum:

The Committee on Banking and Currency, to which was referred the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, etc., received the bill on September 18, 1913, and the members thereof, having been unable after two months to agree upon a report, the committee having divided into two sections, were compelled, finally, to agree to report the bill back to the Senate without recommendation from the committee acting as a committee, but submitting separately the respective views of the two sections of the committee.

The views of the Democratic section of the committee are embraced in the House bill, with certain interlined amendments submitted herewith (Exhibit A), and the following observations are made to explain the origin and principles of the measure, give a general outline of the changes which have been proposed in the House bill, the reasons therefor, etc.

AN OUTLINE OF THE INVESTIGATION MADE AFFECTING THE PRINCIPLES AND CONSTRUCTION OF THE PENDING MEASURE.

So many persons have been under the impression that Congress was inclined to act without sufficient consideration of the pending measure and the principles involved in it, that attention is called to the work which has been done preliminary to the drafting of the present bill.

It has been long understood that the American banking system was seriously defective in having no adequate safeguard against financial panic, against financial emergencies and violent fluctuations of interest rates, so that immediately after the panic of 1907 a temporary measure providing against panic was passed by Congress in the Vreeland-Aldrich Act, approved May 30, 1908. This bill established the National Monetary Commission. The act gave authority and instruction to the commission as follows:

"It shall be the duty of this commission to inquire into and report to Congress, at the earliest date practicable, what changes are necessary or desirable in the monetary system of the United States or in the laws relating to banking and currency, and for this purpose they are authorized to sit during the session or recess of Congress at such times and places as they may deem desirable; to send for persons and papers; to administer oaths; to summon and compel the attendance of witnesses. * * * The commission shall have the power, through subcommittee or otherwise, to examine witnesses, and to make such investigations and examinations, in this or other countries, of the subjects committed to their charge as they shall deem necessary."

Under this instruction the National Monetary Commission conducted the most extensive and far-reaching investigation of the banking systems of the entire world, and published a series of reports including over 30 volumes and a vast compilation of literature involving over 2,500 volumes, and finally resulting in the recommendation of a central bank, privately controlled, which was submitted to the Senate of the United States under the title of "A bill to incorporate the National Reserve Association of the United States, and for other purposes." (Vol. I, p. 43.) This bill was introduced during the preceding Congress and was not considered. It was, however, reintroduced in the present Congress (63d Cong., 1st sess., S. 7), on April 13, 1913, and has been commonly referred to as "the Aldrich bill."

This bill provided substantially that the national reserve association should be established for 50 years with an authorized capital equal to 20 per cent of the capital of all the national banks in the ownership, with one-half paid in. It was provided that the Secretary of the Treasury, the Secretary of Agriculture, the Secretary of Commerce and Labor, and the Comptroller of the Currency should be a committee to organize the national reserve association. It was to have a capital of $200,000,000 and 15 branches in 15 districts of the United States. Each branch was to be controlled by a board of directors chosen by the member banks, with power to make by-laws, etc., and the central national reserve association was to have 39 directors, elected by the directors of the 15 branches, and 7 additional ex officio members of the board of directors, to wit, a governor of the national reserve association, 2 deputy directors, the Secretary of the Treasury, the Secretary of Agriculture, the Secretary of Commerce and Labor, and the Comptroller of the Currency, so that the Government had 4 representatives out of 46 members of the board of directors of the national reserve association. An executive committee of 9 members was provided, with 1 representative of the Government, the Comptroller of the Currency, ex officio a member. Each branch bank was to have a manager and a deputy manager, appointed by the governor of the association.

The earnings of the association were to be 4 per cent annual dividend, cumulative, a 20 per cent surplus provided, and a division of the remainder between the United States and the shareholders.

The reserve association was made the principal fiscal agent of the United States. Provision was made for rediscounting notes and bills of exchange drawn for agricultural, industrial, and commercial purposes, having a maturity of not more than 28 days. The reserve association was given various powers to deal in gold coin or bullion, to purchase from subscribing banks bills of exchange, open foreign banking accounts, transfer deposit balances from one bank to another, etc.

It was required to keep 50 per cent reserve against demand liabilities, including deposit and circulating notes, with a tax upon any reserve deficiency.

It was authorized to purchase for a limited time the 2 per cent bonds of national banks, assume the redemption of the notes of such banks, and issue its own notes in lieu of such national-bank notes. It was authorized to have a cover for such note issues, either of 50 per cent of gold or other money of the United States, or bills of exchange arising out of commercial transactions, as defined by the act. These notes could be issued up to nine hundred millions without a gold cover under a special tax of 1½ per cent, and any notes in excess of $1,200,000,000 not covered by gold or lawful money could be taxed at 5 per cent, provided that the outstanding national-bank notes should be computed as a part of such issue. Its circulating notes were to be redeemed in lawful money and maintained at a parity.

The circulating notes of this association were to be received at par in payment of all taxes, excises, and other dues to the United States, and of all salaries and other debts and demands due by the United States, except obligations specifically payable in gold, and for all debts due from or by one bank or trust company to another, and for all obligations due to any bank or trust company.

The 2 per cent bonds purchased were to be exchanged for 3 per cent bonds payable in 50 years, and the association was to hold such bonds during its corporate existence, with the right, at the option of the Secretary of the Treasury to sell fifty millions of such bonds annually after five years. It provided for the establishment of branches of banks to do a foreign banking business.

The Government of the United States was required absolutely to deposit all of its general funds with the national reserve association and its branches, after the organization of the association, and thereafter all receipts of the Government except its trust funds.

This bill was made a matter of general debate throughout the United States, was vigorously pressed by the friends of the measure, and discussed in all of the large cities of the Nation. It was indorsed by the American Banking Association, but, after abundant discussion, was condemned by the Democratic national convention at Baltimore on July 3, 1912, in the following language:

"We oppose the so-called Aldrich bill or the establishment of a central bank; and we believe the people of the country will be largely freed from panic and subsequent unemployment and business depression by such a systematic revision of our banking laws as will render temporary relief in localities where such relief is needed with protection from control or domination by what is known as the Money Trust."

The obvious reason for public disapproval of this bill was that the comparative independence of the various districts of the country was ignored, the concentration of banking power was very extreme, and finally it placed the national credit system in the control of private persons, without any adequate supervision or control by the Government of the United States, and proposed to allow these banks to issue the currency of the country as private corporations.

THE PUJO INVESTIGATION.

Under House resolutions 429 and 504, Sixty-second Congress, second session, the so-called "Money Trust investigation" was conducted by the House of Representatives, beginning May 16, 1912. These hearings were published in three parts, consisting of thousands of pages, and with a most illuminating report showing the existence, substantially, of a vast concentration of power in the hands of a few men over the credit system of the United States.

THE GLASS INVESTIGATION.

These investigations were further continued by a subcommittee of the Committee on Banking and Currency of the House of Representatives, beginning on Tuesday, January 7, 1913, and directed by Hon. CARTER GLASS, chairman, according to the leading bankers and financial experts of the country extended hearings, comprising a volume of 745 pages of printed testimony.

In addition to these extensive examinations by the National Monetary Commission, the Pujo investigation, and the Glass investigation various representatives of the American Banking Association were in frequent consultation with Chairman GLASS of the House Committee on Banking and Currency, with the chairman of the Senate Committee on Banking and Currency, with the Secretary of the Treasury, and others who were concerned in the primary framing of the pending measure, so that the plea of some of the interests opposing the bill that the matter had not been properly investigated had no just foundation of fact. But in addition to these investigations and discussions the bill, when finally introduced in the House of Representatives, was discussed for many weeks in the Committee on Banking and Currency of the House, in the Democratic conference, and for many days in the House of Representatives, finally passing September 17, 1913.

THE SENATE INVESTIGATION.

Anticipating the action of the House of Representatives upon this bill, the Committee on Banking and Currency of the United States Senate began hearings on the bill September 2, 1913, holding their sessions from 10 o'clock in the morning to 5 and 6 in the evening and listening to various representatives of the American Banking Association, of credit associations, of business men, and of financial experts. These hearings when concluded and presented to the Senate in Senate Document No. 232, Sixty-third Congress, first session, on November 6, 1913, in three volumes, with index, making 3,259 pages. It is therefore obvious that great pains have been taken by the authorities of the United States and by the committees in Congress to proceed with the greatest caution and upon the fullest information in the adjustment of this very important measure.

When the hearings before the Senate Committee on Banking and Currency were concluded, the members of the committee discussed the bill for over two weeks, finally agreeing to submit their separate views in the form of the House bill, H. R. 7837, with certain amendments thereto, representing the respective views of the two sections of the committee.

Both sections of the committee, however, agreed on the great fundamentals of the bill—that is:

First. On the necessity for greater concentration of the banking reserves of the country.

Second. The volume of such reserves.

Third. The volume of the capital of the proposed banks.

Fourth. The mobilization of such reserves.

Fifth. The promotion of an open discount market.

Sixth. The provision for elastic currency; the issuance of Federal reserve notes.

Seventh. That the Federal reserve notes should be the obligations of the United States.

Eighth. That the system should be the regional Federal reserve bank system instead of a central bank.

Ninth. The control of the system itself by the Government.

The two sections of the committee disagree upon the number of the Federal reserve banks, the method of subscribing for the stock of such banks, the method of electing the directors of such banks, the method of administering the regional reserve banks, and these differences arise, in the main, because of two schools of thought, one part of the committee believing in a central bank administered by a central board and the other part of the committee proposing to establish a number of comparatively independent district banks administered by boards of directors chosen from and representing the several districts, but under the strict supervisory control of the Government. The interests of the public are thus protected by Government supervision, the vast and intricate technical detail of bank administration being placed in the hands of the bankers whose funds and whose business is involved.

THE PURPOSES OF THE BANKING AND CURRENCY BILL.

The chief purposes of the banking and currency bill are to give stability to the commerce and industry of the United States; prevent financial panics or financial stringencies; make available effective commercial credit for individuals engaged in manufacturing, in commerce, in finance, and in business to the extent of their just deserts; put an end to the pyramiding of the bank reserves of the country and the use of such reserves for gambling purposes on the stock exchange.

In order to accomplish these results there are certain great fundamentals recognized by all experts as essential and necessary, to wit:

First. The proper concentration of the bank reserves of the country under the control of the banks themselves, safeguarded by governmental supervision.

Second. A suitable banking capital as a margin of safety.

Third. Placing the larger part of the Government funds with such banks, where they may be used in the service of the national commerce.

Fourth. Authorizing the issuance of elastic currency against liquid commercial bills under proper safeguards.

Fifth. Establishing an open market for liquid commercial bills, by providing through the reserve banks a constant and unfailing market for such bills at a steady rate of interest.

Sixth. Finally, protecting the gold reserve of the United States by the same methods adopted in Europe, to wit, raising the rate of interest through the Federal reserve banks and authorizing such banks to acquire foreign bills when gold shipments are anticipated and taking other precautionary measures.

THE MECHANISM OF THE FEDERAL RESERVE BANK SYSTEM.

These important national ends are proposed to be obtained by the mechanism of eight Federal reserve banks organized with a capital equal to 6 per cent of the capital and surplus of the National and State banks in the several districts.

The eight districts are proposed to be laid off by an organization committee, who shall organize a Federal reserve bank with headquarters in a central city of each district, each bank to establish as many branches in its district as may be found expedient.

It is proposed that each Federal reserve bank shall have nine directors, six elected by the banks and three chosen by the Federal reserve board.

The entire system is proposed to be under the supervisory control of the Federal reserve board, consisting of the Secretary of the Treasury and six other members of such board appointed by the President and confirmed by the Senate.

The Federal reserve board is given very broad powers of supervision and is assisted by a Federal advisory council, consisting of one representative from each of the Federal reserve banks.

The details of the organization and the principles of the bill will be hereinafter more fully set forth.

FEDERAL RESERVE DISTRICTS.

The Federal reserve districts are proposed to be organized by the Secretary of the Treasury and not less than two members of the Federal reserve board (sec. 2), who shall summon expert aid and take testimony and lay out such Federal reserve districts, eight in number, according to the convenience and customary course of business, designating the city in which the district Federal reserve bank shall be located (p. 2).

When the districts shall have been laid out and the city determined in which such Federal reserve banks shall be located, five of the subscribing banks in such district are authorized to take out a charter in the same manner and with similar powers as a national bank (pp. 11 to 14), except that the business of the Federal reserve bank is confined to member banks and other Federal reserve banks and to the United States, except its open-market operations, which may be with any responsible concern.

These banks are given, as a part of the charter rights, the right to issue Federal reserve bank notes against United States bonds in the same manner as a national bank, the purpose being to permit said banks to absorb as much of the 2 per cent bonds as the national banks may care to dispose of.

STOCK SUBSCRIPTION.

The amount of possible stock is placed at a sum equal to 6 per cent of the capital and surplus of national banks and State banks and trust companies, exclusive of savings banks, a possible total of about $150,000,000, one-half of which will be required to be paid in during a period of six months after the organization of said banks and one-half subject to call, with a double liability resting upon the subscribers against the amount subscribed.

The reasons for requiring the banks to subscribe to this stock with a double liability are—

First. To protect the large deposits of general funds which the United States will probably place with such banks.

Second. To protect the United States against the extension of credit through the Federal reserve notes, the obligations of the United States loaned to the Federal reserve banks against commercial bills.

Third. To safeguard the system itself, to protect the large volume of reserves placed with such banks, and give to such banks the confidence of the world.

Fourth. To justify the Government in putting on the banks the prime responsibility of administering these banks and safeguarding their own reserves and their own capital stock, and making them responsible to the country for safeguarding the welfare of the national banking system, protecting the national gold supply under the safeguard of governmental supervision.

Every national bank located in a given district is required within 60 days after the passage of the act to signify its acceptance of the terms of the act, and every State bank eligible for membership is permitted to signify its assent in like manner.

Any national bank within such district failing to signify its assent may be discontinued as a reserve agent upon 30 days' notice by the organization committee or the Federal reserve board. And should any national bank within one year after the passage of the act fail to become a member bank of the system, it is required to cease to act as a national bank.

In the contingency that the capital stock is not fully subscribed by the banks of a given district, provision is made (p. 7) to offer such stock to public subscription, and on the contingency that such stock is not subscribed by the public the balance of the necessary capital

may be allotted to the United States and sold by the Government at proper times and places.

All stock held by the public or by the Government will be voted by the directors of the Federal reserve bank of class C, representing the Government.

CONTROL OF THE FEDERAL RESERVE BANKS.

Each Federal reserve bank will be controlled by a board of nine directors—three of class A, elected by the banks; three of class B—business men—elected by the banks; and three of class C, appointed by the Federal reserve board to represent the United States.

One director of class C will be a Federal reserve agent and chairman of the board, and one a deputy Federal reserve agent and deputy chairman, representing expressly the interests of the United States at such bank and issuing Federal reserve notes to the reserve bank, holding the security therefor, and receiving such notes for safe-keeping when returned by the bank.

PROBABLE RESOURCES OF FEDERAL RESERVE BANKS.

The capital stock of 25,195 banks in the United States, including savings banks, amounts to $2,010,000,000; surplus, $1,585,000,000. Six per cent of this sum would be something over $200,000,000, and the total liability would make over $400,000,000. Assuming that one-half of these concerns enter the system, it would give a capital of $100,000,000, with over $50,000,000 paid in.

The total reserves which would be paid into the Federal reserve banks by 7,120 national banks, outside of reserve or central reserve cities, would be $193,000,000 (Exhibit B, p. 1); from 315 reserve city banks, $110,000,000; and from 52 central reserve city banks, $96,000,000, which, including an estimated deposit of $150,000,000 from the Government, would make an amount equal to $672,000,000.

If the State banks and trust companies come in, omitting the savings banks, it would add $279,000,000 of reserves and $21,000,000 of capital stock (Exhibit B, p. 6), making a total of $972,000,000.

These funds would not include any optional deposits that might be voluntarily placed with the Federal reserve bank by member banks.

DIVISION OF EARNINGS.

It is proposed in the pending bill to give the stockholders 6 per cent dividends, lay up a surplus of 20 per cent, and give the United States the additional earnings. The policy of limiting the dividends to 6 per cent is based upon the theory that these great public utility banks are not intended to be merely money-making banks, but that they are guardians of the public welfare, primarily safeguarding the member banks, protecting their reserves, safeguarding their credit, protecting them from panic or financial stringency, and being always prepared to furnish them with accommodation at a reasonable rate of interest. But these Federal reserve banks will also be charged with the duty of protecting the national gold reserve, protecting the national commerce, and in this way give stability to the manufacturing, industrial, commercial, and transportation enterprises of the United States. For this reason these banks ought to have no other motive than the public welfare, and the moving policy of the banks should not be to earn as much dividends as the commerce of the country could endure but to protect our national commerce and our national-banking system at a fair profit.

STATE BANKS AND TRUST COMPANIES.

The bill (pp. 5 and 27) invites the State banks to become members where the capital stock, sound condition, subscription, and compliance with the rules of the system justify. The State banks and trust companies, however, will be subjected to the same rules governing the national banks in regard to the limitation of liability which may be incurred by any one person to such banks, the prohibition of making purchase of or loans upon the stock of such banks, or withdrawal or impairment of capital, the payment of unearned dividends, the making of reports to the comptroller, and the right of examination of such banks, as if they were national banks, with the right, however, to accept the State examinations in lieu of the comptroller's examination where such examinations are satisfactorily made.

BANK EXAMINATIONS.

Under the proposed system the bank examinations are made much more carefully, the bank examiners put on salaries (p. 60). Loans, gratuities, or commissions are forbidden to either bank examiners or to officers or directors of member banks.

BANK RESERVES.

Very important changes are made in the matter of bank reserves (p. 39) by requiring the withdrawal of the legal reserves from other national banks after a period of three years, making the change that the country banks are required to keep 12 per cent of their demand liabilities and 5 per cent of their time deposits as reserves—two-twelfths in the Federal reserve bank for 14 months, and thereafter five-twelfths—leaving seven-twelfths after three years to be optionally kept either in the bank's own vaults or in the Federal reserve bank (p. 62). The reserve city banks are required to keep 18 per cent of their demand liabilities and 5 per cent of time deposits; three-eighteenths of such reserve for the first 14 months being kept in the Federal reserve banks, and thereafter six-eighteenths of said reserve, leaving twelve-eighteenths of such reserve to be kept after three years either in the bank's own vaults or in the Federal reserve bank, at its option (p. 63).

The central reserve city banks are required to maintain a reserve equal to 18 per cent of their demand liabilities and 5 per cent of their time deposits; for 14 months three-eighteenths of such reserves and thereafter six-eighteenths of such reserves with the Federal reserve bank, leaving twelve-eighteenths optional to be kept in the bank's own vaults or with the Federal reserve bank.

The State banks are permitted to keep their surplus legal reserves for three years with other State banks if the State law requires.

It is proposed that the reserves of the Federal reserve banks shall be not less than 35 per cent of gold or lawful money against their demand liabilities or Federal reserve notes in circulation (pp. 48 and 65).

Some of the banks have objected that they would lose 2 per cent interest on so much of the deposits as they keep with the Federal reserve bank, and they seem to think they would not be sufficiently compensated by the obvious benefits of the Federal reserve banking system.

The answer to such objections is that the compensations in a financial way will far more than outweigh the loss of the 2 per cent interest, while the stability of the business of the bank, and the peace of mind it will give to the bankers in having freedom from constant anxiety, would more than compensate them, even if the financial advantages did not do so. The financial advantages are obvious—

First. The capital stock put into the system will be merely a transfer of funds obtained by taking a certain portion of the present deposits (however invested) into the form of this capital stock, earning 6 per cent net, free from tax, making the earning on such stock between 7 and 8 per cent, which is a higher return than any bank can possibly average upon its deposits.

Second. The reserves placed with the Federal reserve banks would not bear interest under the present bill (although this may possibly be found expedient at some future time when the system is established), but an average bank with a hundred thousand dollars ($100,000) capital and $550,000 average individual deposits, if it carried 5 per cent of its deposits as reserves with the Federal reserve bank, would carry only $27,500 with the Federal reserve bank, which it might use, if it saw fit, as a checking account for exchange purposes if it kept the account up to the required standard.

The earning power on $27,500 at 2 per cent would only be $550, and since the bank could borrow back an equal sum, at probably 4 per cent and lend it at 6 or 8 per cent, it could earn as much or more out of such rediscount as the interest at 2 per cent amounts to.

But it has a far larger earning power, because, under the old system, where every bank had to protect itself by keeping a high individual reserve, the country banks have carried on an average of over 21 per cent, and under this system they would have available the difference between 12 per cent legal reserve and 21 per cent actual reserves, which, in the deposits of an average bank of $550,000, would amount to $49,000, and which they could lend at 6 per cent instead of 2 per cent, as at present, giving such bank an additional earning power of $1,980 above its present earning power, if it saw fit to use these surplus reserves which they now carry, because of the fear of panic and financial stringency.

A very important consideration, however, would result from this improved system in giving an increased public confidence in the banks and which would attract a considerable amount of money which is not now deposited in banks at all and would thus enlarge the deposits of the bank and enlarge substantially their money-earning power.

Another important financial advantage to the bank would be that the larger use of their reserves would also result in an enlargement of deposits, entirely justified and on a safe basis, which would give them increased earning power. It is extremely short-sighted for a bank to imagine that its financial earnings would be in any wise harmed by the proposals of this measure. A very great psychological advantage is in giving peace of mind to the entire banking world, so long as business is conducted upon an honest, sensible basis.

PROBABLE READJUSTMENT OF CASH UNDER REQUIREMENT OF THE FEDERAL RESERVE ACT.

If all national banks enter the system and subscribe at the rate of 6 per cent of their capital ($1,056,345,780) and surplus ($725,333,629), or $106,900,764.90, paying one-sixth in cash, one-sixth in three months, and one-sixth in six months, the Federal reserve banks will have in six months a paid-up capital of $53,450,382, to which should be added about $150,000,000 of Government funds which will be deposited with the Federal reserve banks, making a total of $203,450,382 cash, of which two-thirds could be used for discounting.

The relative proportion of subscription to the Federal reserve bank is as follows: Country banks, 55 per cent; reserve city banks, 26 per cent; and central reserve cities, 19 per cent.

Assuming that the banks will immediately avail themselves of the discounting privilege to the extent of one-third of this fund in the Federal reserve banks, the country banks will be entitled to 55 per cent of (one-third of $203,450,382) $67,816,794=$37,299,236; the reserve city banks 26 per cent, or $17,632,366; and the central reserve cities 19 per cent, or $12,885,190.

Should the banks avail themselves of this privilege to the extent of one-half of this fund, the country banks will be entitled to 55 per cent of (one-half of $203,450,382) $101,725,191=$55,948,855; the reserve city banks 26 per cent, or $26,448,549; and the central reserve city banks 19 per cent, or $19,327,787.

In the event the banks should avail themselves of the discount privilege to the extent of two-thirds of the fund in the Federal reserve banks, the country banks would be entitled to 55 per cent of (two-thirds of $203,450,382) $135,633,588=$74,598,472; the reserve city banks 26 per cent, or $35,264,732; and the central reserve city banks 19 per cent or $25,770,380.

The reserve requirement and the probable readjustment of cash in the several classes, respectively, under the Federal reserve act are as follows:

7,120 banks not in a reserve or central reserve city.

RESERVES.

12 per cent of demand liabilities ($3,136,229,730.27)		$376,359,567.63
5 per cent of time deposits ($459,377,757.19)		22,968,887.86
Total		399,328,455.49
Cash in the banks' own vault:		
First 14 months	4/12=	$133,109,485
Between 14 and 36 months	4/12=	133,109,485
Cash in the Federal reserve bank:		
First 14 months	2/12=	66,554,742
Between 14 and 36 months	5/12=	166,386,855
After 36 months	5/12=	166,386,855
Optional, own vault or Federal reserve bank:		
After 36 months	7/12=	232,941,597
Optional, in own vault, in Federal reserve bank, reserve city bank, or in central reserve city bank:		
First 14 months	6/12=	199,664,228
Between 14 and 36 months	3/12=	99,832,114

PROBABLE READJUSTMENT OF CASH, COUNTRY BANKS.

(First 14 months.)

Cash on hand (Aug. 9, 1913), specie and legal tender	$250,702,980
Cash available by discount of commercial paper (one-third basis)	37,299,236
	288,002,216
Cash required for stock subscription to Federal reserve banks	29,397,710
Cash reserve required in own vault (four-twelfths)	133,109,485
Cash reserve required in Federal reserve banks (two-twelfths)	66,554,742
Cash surplus	[1]58,940,279
	288,002,216

[1] The above table does not include cash from possible rediscounts of reserve put in Federal reserve banks.

One-third basis: between 14 and 36 months, amount reserve required in the Federal reserve banks is increased three-twelfths, or $99,832,114, making a deficit of $40,891,835, and after 36 months, three-twelfths additional, or $99,832,114, must be kept either in Federal reserve banks or in banks' own vaults, making the total deficit after 36 months $140,723,940.

One-half basis: Should the banks discount to the extent of one-half of the available fund in the Federal reserve banks (i. e., capital stock and United States funds) this deficit will be reduced by the difference between $37,299,236 (one-third basis) and $55,948,855 (one-half basis), or $18,649,619, leaving a deficit of $122,074,330.

Two-thirds basis: If the banks discount to the extent of two-thirds of the fund in the Federal reserve banks, the deficit will be reduced by the difference between $37,299,236 (one-third basis) and $74,598,472 (two-thirds basis), or $37,299,236, leaving a deficit of $103,424,713.

Three hundred and fifteen reserve city banks.

RESERVES.

18 per cent of demand liabilities ($1,821,413,780.14)		$327,854,480.43
5 per cent of time deposits ($60,233,520.52)		3,011,676.03
Total		330,866,156.46
Cash in the banks' own vault:		
First 14 months	6/18=	$110,288,719
Between 14 and 36 months	6/18=	110,288,719
Cash in the Federal reserve bank:		
First 14 months	3/18=	55,144,359
Between 14 and 36 months	6/18=	110,288,719
After 36 months	6/18=	110,288,719
Optional, own vault or Federal reserve bank:		
After 36 months	12/18=	220,577,438
Optional, in own vault, in Federal reserve bank, reserve city bank, or in central reserve city bank:		
First 14 months	9/18=	165,433,078
Between 14 and 36 months	6/18=	110,288,719

PROBABLE READJUSTMENT OF CASH.

(First 14 months.)

Cash on hand (Aug. 9, 1913), specie and legal tender	$240,947,005
Cash available by discount of commercial paper (one-third basis)	17,632,366
	258,579,371
Cash required for stock subscription to Federal reserve banks	13,897,099
Cash reserve required in own vault (six-eighteenths)	110,288,719
Cash reserve required in Federal reserve banks (three-eighteenths)	55,144,359
Cash surplus	79,249,194
	258,579,371

One-third basis: Between 14 and 36 months, amount of reserve required in Federal reserve banks is increased three-eighteenths, or $55,-144,359, leaving still a surplus of $24,104,835, and after 36 months an additional six-eighteenths, or $110,288,719, must be kept either in banks' own vaults or in Federal reserve banks, causing a deficit of $86,183,884.

One-half basis: Should the banks discount to the extent of one-half of the available fund in the Federal reserve banks, this deficit will be reduced by the difference between $17,632,366 (one-third basis) and $26,-448,549, or $8,816,183, leaving a deficit of $77,367,701.

Two-thirds basis: If the banks discount to the extent of two-thirds of the funds in the Federal reserve banks, the deficit will be reduced by the difference between $17,632,366 (one-third basis) and $35,264,732, or $17,632,366, leaving a deficit of $59,735,355.

Fifty-two central reserve city banks.

RESERVES.

18 per cent of demand liabilities ($1,605,579,970.29)		$289,004,394.65
5 per cent of time deposits ($13,755,310.58)		687,765.53
Total		289,692,160.18
Cash in the banks' own vaults:		
First 14 months	6/18=	$96,564,053
Between 14 and 36 months	6/18=	96,564,053
Cash in the Federal reserve bank:		
First 14 months	3/18=	48,282,027
Between 14 and 36 months	6/18=	96,564,053
After 36 months	6/18=	96,564,053
Optional, own vault or Federal reserve bank:		
First 14 months	9/18=	$144,846,080
Between 14 and 36 months	6/18=	96,564,053
After 36 months	12/18=	193,128,107

PROBABLE READJUSTMENT OF CASH.

(First 14 months.)

Cash on hand (Aug. 9, 1913) specie and legal tender	$407,519,380
Cash available by discount of commercial paper (one-third basis)	12,885,190
	420,404,579
Cash required for stock subscription in Federal reserve banks	10,155,572
Cash reserve required in own vaults (six-eighteenths)	96,564,053
Cash reserve required in Federal reserve banks (three-eighteenths)	48,282,026
Cash reserve required in own vault or Federal reserve banks (nine-eighteenths)	144,846,080
Cash surplus	120,556,848
	420,404,579

Although the percentages of cash reserve required in the banks' own vaults and in the Federal reserve banks change after 14 months and after 36 months, inasmuch as at all times the full reserve requirement must be either in the banks' own vaults or in the Federal reserve banks, the surplus cash remains the same.

One-half basis: Should the banks discount to the extent of one-half of the available fund in the Federal reserve banks, this surplus would be increased by the difference between $12,885,190 (one-third basis) and $19,327,787 (one-half basis), or $6,442,597, making a surplus of $126,999,445.

Two-thirds basis: If the banks discount to the extent of two-thirds of the funds in the Federal reserve banks, the surplus will be increased by the difference between $12,885,190 (one-third basis) and $25,770,380 (two-thirds basis), or $12,885,190, making a surplus of $133,442,038.

In addition to the paid-up capital of the Federal reserve banks ($53,450,382) and the deposit of Government funds ($150,000,000) the Federal reserve banks will have available for discount purposes the funds held by them as reserves of the member banks to within 33⅓ per cent, viz:

Reserves deposited—Available for loans to member banks.

FIRST 14 MONTHS.

Amount of reserve deposited with Federal reserve banks first 14 months:		
Country banks (two-twelfths of reserve requirement)		$66,554,742
Reserve city banks (three-eighteenths of reserve requirement)		55,144,359
Central reserve city banks (three-eighteenths of required reserve)		48,282,027
Total		169,981,128

If one-third of this fund is used for rediscounting purposes, the additional cash would amount to $56,660,376; if one-half is used, $84,940,564; and if two-thirds, $113,320,752.

BETWEEN 14 AND 36 MONTHS.

Amount of reserves deposited with Federal reserve banks 14 to 36 months:		
Country banks (five-twelfths of reserve requirement)		$166,386,855
Reserve city banks (six-eighteenths of reserve requirement)		110,288,719
Central reserve city banks (six-eighteenths of reserve requirement)		96,564,053
Total		373,239,627

Additional available cash as follows: One-third basis, $124,413,209; one-half basis, $186,619,814; and two-thirds basis, $248,826,418.

AFTER 36 MONTHS.

Country banks (five-twelfths of reserve requirement)		$166,386,855
Reserve city banks (six-eighteenths of reserve requirement)		110,288,719
Central reserve city banks (six-eighteenths of reserve requirement)		96,564,053
Total		373,239,627

Additional available cash as follows: One-third basis, $124,413,209; one-half basis, $186,619,814; and two-thirds basis, $248,826,418.

SUMMARY.

Condition of all national banks with respect to cash after probable redistribution under Federal reserve act.

FIRST 14 MONTHS.

[This table does not include cash obtained from rediscounting reserve money in Federal reserve banks.]

National bank system.	When one-third of Federal reserve bank funds are discounted.		When one-half of Federal reserve bank funds are discounted.		When two-thirds of Federal reserve bank funds are discounted.	
	Surplus.	Deficit.	Surplus.	Deficit.	Surplus.	Deficit.
Country banks	$58,940,279		$77,589,893		$96,239,515	
Reserve city banks	79,249,194		88,065,377		96,881,560	
Central reserve city banks	120,556,848		126,999,445		133,442,038	
Surplus	258,746,321		292,654,720		326,563,113	
Additional cash available if reserves ($169,981,128) of member banks are used for rediscount	56,660,376		84,940,564		113,320,752	
Total surplus	315,406,697		377,595,284		439,883,865	

Condition of all national banks with respect to cash after probable redistribution under Federal reserve act—Continued.

BETWEEN 14 AND 30 MONTHS.

National bank system.	When one-third of Federal reserve bank funds are discounted.		When one-half of Federal reserve bank funds are discounted.		When two-thirds of Federal reserve bank funds are discounted.

Total surplus		18,062,224		114,177,228		219,108,400
	124,413,209	124,413,209	186,619,814	186,619,814	248,826,418	248,826,418
Total deficit or surplus for system where cash is obtained from rediscounting reserves as well as capital and United States deposits	[2]18,062,224		[3]114,177,228		[4]219,108,400	

[1] The total reserve deposits are $373,239,627; one-third equals $124,413,209; one-half equals $186,619,814; two-thirds equals $248,826,418.
[2] $18,062,224 surplus is on theory of discounting one-third of capital, United States funds, and reserves.
[3] $114,177,228 surplus is on theory of discounting one-half of capital, United States funds, and reserves.
[4] $219,108,400 surplus is on theory of discounting two-thirds of capital, United States funds, and reserves.

All the capital could be loaned out, but only two-thirds of United States funds and of reserves.

These figures above relate only to the national banks. The State banks and trust companies must be provided with reserve money in sufficient quantity to enable them to enter the system without contracting loans.

Memorandum prepared by Robert L. Owen, showing amount of reserve money available by statement of Aug. 9, 1913.

	Number.	Demand liabilities.	Time deposits.	Cash on hand.	Date of report.
National banks	7,488	$6,563,335,480.70	$538,364,588.39	[1]$999,109,374.00	Aug. 9, 1913
State banks	14,011	2,444,100,836.73	[2]626,910,746.06	[3]246,247,125.00	June 4, 1913
Trust companies	1,515	2,600,505,985.19	[2]970,855,018.71	[4]285,384,815.00	Do.

[1] National banks have also, not included in these figures, $42,637,771 national-bank notes and $3,650,042.38 minor coins; total, $46,287,813.38, which can not be counted as reserves under present laws.
[2] Represent savings deposits; time deposits not given.
[3] Includes $35,521,522 national-bank notes and minor coins.
[4] Includes $26,732,928 national-bank notes and minor coins.

The capital stock of State banks and trust companies excluding savings banks equals $450,000,000, with a surplus fund of $271,000,000, making a total of $730,000,000, which, upon a 6 per cent basis, would give an addition to the capital stock of the Federal reserve banks, if the State banks and trust companies entered it, of $43,000,000, which, if one-half were paid in cash, would add to the initial capital stock in cash $21,000,000 above the capital stock heretofore considered, and would therefore add a further deficit of $21,000,000 to the total net deficit of $239,000,000, making a total deficit of $260,000,000, as far as the State banks and trust companies are concerned.

It is insisted, however, that this contingency is not likely to arise, as many of the small State banks will not enter the system, and if it did arise, it could be taken care of—

First, by the discounting of the funds of the Federal reserve banks.

Second, by an additional deposit of United States funds above the $150,000,000 heretofore estimated.

Third, or finally, by the issuance of Federal reserve notes, which should be counted as reserves for member banks if the Federal reserve board find it necessary.

Moreover, it might further be provided for by making the national-bank notes available for reserve money, since they are based on Government bonds and are already used by State banks under the present State laws as reserves. This contingency has been provided for by a proposed amendment giving the Federal reserve board (p. 38, line 15) the right to authorize the use as reserves of member banks Federal reserve notes or bank notes based on United States bonds.

FEDERAL RESERVE BOARD—ITS POWERS.

The Federal reserve board, consisting of the Secretary of the Treasury and six members appointed by the President of the United States and confirmed by the Senate for terms of six years (p. 31), are given the following powers:

To readjust districts created by the organization committee and create new ones.

To regulate the establishment of branches of Federal reserve banks within Federal reserve district in which bank is located.

To designate three (class C) of the nine members of the board of directors of each Federal reserve bank, one of these to be chairman of the board with the title of "Federal reserve agent," and one "deputy Federal reserve agent."

The Federal reserve agent to maintain a local office of the Federal reserve board on the premises of the Federal reserve bank. He shall make regular reports to Federal reserve board and be its official representative.

To remove any director or officer of a Federal reserve bank for cause stated.

To remove chairman of Federal reserve bank without notice.

To establish by-laws governing applications from State banks and trust companies.

"Of the six persons * * * appointed (by the President), one shall be designated governor and one vice governor of the Federal reserve board." The governor, subject to supervision of the Secretary of the Treasury and board, shall be the acting managing officer of the Federal reserve board.

To levy a semiannual assessment upon the Federal reserve banks for estimated expenses for succeeding six months, together with deficit carried forward.

To examine at its discretion the accounts, books, and affairs of each Federal reserve bank or member bank and to require such statements and reports as it may deem necessary.

To require, or on application to permit, a Federal reserve bank to rediscount the paper of any other Federal reserve bank.

To suspend for a period not exceeding 30 days (and to renew such suspension for periods not to exceed 15 days) any and every reserve requirement specified in this act.

To supervise and regulate the issue and retirement of Treasury notes to Federal reserve banks.

To add to the number of cities classified as reserve and central reserve cities under existing law in which national banking associations are subject to the reserve requirements set forth in section 21 of this act, or to reclassify existing reserve or central reserve cities and to designate the banks therein situated as country banks, at its discretion.

To require the removal of officials of Federal reserve banks.

To require the writing off of doubtful or worthless assets upon the books and balance sheets of Federal reserve banks.

To suspend the further operations of any Federal reserve bank and appoint a receiver therefor.

To perform the duties, functions, or services specified or implied in this act.

To determine or define (subject to stipulations) the character of paper eligible for discount for member banks.

To prescribe regulations for purchase and sale by Federal reserve banks of bankers' bills, etc.

To review and determine the minimum rate of discount for member banks established by Federal reserve banks and fix weekly the discount rate reserve banks may discount for each other.

To authorize establishment of correspondents and agencies of Federal reserve banks in foreign countries.

To authorize the issue of Federal reserve Treasury notes.

To receive, through the local Federal reserve agent, applications from Federal reserve banks for notes, such applications to be accompanied by rediscounted notes for deposit as collateral security.

To require Federal reserve banks to maintain deposits in Treasury of United States in gold of 5 per cent of notes issued.

To grant in whole or in part or to reject entirely the application from Federal reserve banks for notes.

To establish rate of interest on notes issued.

To prescribe regulations for substitution of collateral.

To make and promulgate regulations governing the transfer of funds among Federal reserve banks.

To act, if desired, as clearing house for Federal reserve banks.

To require, in its discretion, Federal reserve banks to act as clearing houses for shareholding banks.

To require extra examinations of national banks when deemed necessary.

To determine and report annually to Congress fixed salaries of all bank examiners.

To assess upon banks in proportion to assets or resources the expenses of examinations.

To fix a date for such assessment.

To arrange for special or periodical examinations of member banks for account of Federal reserve banks.

To receive from Federal reserve banks information concerning the condition of any national bank in its district.

To order examinations of national banks in reserve cities as often as necessary.

To add to the list of cities in which national banks shall not be permitted to loan on real estate as described.

To receive applications from national banks having $1,000,000 or more capital for the establishment of branches in foreign countries, to reject or accept such applications, and to prescribe conditions under which such branches may be opened.

To require examinations of foreign branches as it may deem best. (Pages 31–38, 40, 45.)

FEDERAL ADVISORY COUNCIL.

In order to keep the Federal reserve board in intimate touch with the banking business of the country, the Federal advisory council is established, consisting of one representative from each Federal reserve bank with power to confer directly with the Federal reserve board, make proper representations and recommendations, call for information, etc. (p. 39). Many of the big banks quite urgently insisted that the bankers should have representation upon the Federal reserve board. This was denied for the obvious reason that the function of the Federal reserve board in supervising the banking system is a governmental function in which private persons or private interests have no right to representation except through the Government itself. The precedents of all civilized governments is against such a contention. It was believed that the Federal reserve board itself, consisting entirely of officers of the Government, might be made more efficient if it had the advice freely available of the Federal advisory council. Moreover, the operations of the Federal reserve board would in this way be subject to greater publicity and enable the banks of the country to have a greater measure of confidence in all of the operations of the Federal reserve board.

It was further believed that the banks of the country, which are invited or required to contribute a very large sum to the Federal reserve banks, would be more content by having an easy and convenient means provided by law of frequent conferences with the Federal reserve board and the opportunity to advise the board with regard to the financial, commercial, and industrial needs of the country.

CONCENTRATION OF RESERVES.

The reserves of the banks of the United States are now scattered without any system among over 25,000 individual banks. The present law permits the national banks in the country to keep nine-fifteenths of their reserves in the banks of reserve cities and permits banks of the reserve cities to keep one-half of their reserves in the central reserve cities, and permits the banks in the central reserve cities to keep only *one-fourth of these reserves of the reserves* in cash. The effect of this system—the necessary effect of this system—is to concentrate in the hands of a few banks in the central reserve cities (who have diligently sought the reserves of other banks) to such an extent that the Nation's bank reserves are pyramided in a dangerous fashion in the hands of a few banks in the three central reserve cities and chiefly in certain banks in New York City. These central reserve city banks have been accustomed to pay 2 per cent on the deposit of these bank reserves placed with them, and having no place to which they themselves might go for rediscount they have fallen into the habit of placing very large sums out of these reserves, amounting to hundreds of millions, upon call on the New York Stock Exchange, for the simple reason that under the law of the stock exchange they can sell the stock collateral immediately on any day when money is actually needed. It may be ruinous to the borrower—it may wipe out his margin—it may cause him a disastrous loss; it may upset the interest rates of the country, excite alarm, and result in final panic; but it does furnish the money when needed.

We are advised by representative bankers in New York that the great banks there would be glad to improve the system by the establishment of Federal reserve banks strong enough to furnish money quickly on demand against good commercial bills, and thus enable the New York banks to withdraw their funds from the stock exchange (which has become the most gigantic gambling establishment in the world) and place such funds in the service of legitimate industry and commerce. This will be one of the great benefits of the pending measure—that is, that it will withdraw from gambling enterprises on the stock exchange the bank reserves of the country and enable such reserves to be used for the commerce of the Nation.

Attention is respectfully called to the fact that while in 1896 the shares sold on the New York Stock Exchange amounted to only a little over $3,000,000,000, in 1905 it was $21,000,000,000, in 1906 it was $23,000,000,000, in 1907—the year of the panic—the amount fell to $14,000,000,000, increasing in 1908 to $15,000,000,000, and in 1909 to $19,000,000,000. (National Monetary Commission Reports, vol. 21, p. 9.)

MAKING STABLE THE INTEREST RATES.

The extremely injurious character of this gambling on the stock market with the reserves of the country is shown by Table 29, National Monetary Commission Reports (vol. 21, p. 136), where during the year 1907 the range of interest for money was from 2 to 45 per cent in January, from 3 to 25 per cent for March, from 5 to 125 per cent in October, from 3 to 75 per cent in November, and from 2 to 25 per cent in December, with currency bringing a premium from 1 to 4 per cent during November and December. The blighting effect of these violent fluctuations of the interest rates is demonstrated by the rate charged for 90-day time loans, which during November and December, 1907, were running as high as 12 to 16 per cent, with no business done in time loans of a longer period during the entire month of November and no business being done at times on prime commercial bills during the same months. (Ibid.)

These violent fluctuations are the more astounding when compared with the extremely stable rates of interest which have long prevailed in Europe, as shown by the rates of discount for 50 years in England, France, Germany, Holland, and Belgium, where the rate has been steadily around 3 to 4 per cent. (See Senate hearings before Banking and Currency Committee, pp. 536–542, an abstract of which is submitted.)

Moreover, in Europe manufacturers, merchants, and business men could always get money, while in the United States they have been absolutely ruined by thousands because of the denial of merited credit. This act will put an end to this deadly peril to American business.

"It will thus be seen that these great banks holding the national reserves have been able to furnish commerce with a very low rate of discount for nearly all the time and only occasionally have been compelled to raise the rate to a high point.

"These low rates illustrate the enormous value of these great banks to European commerce and the urgent necessity for action by the United States along similar lines."

The stabilizing of the rate of interest in the United States will be one of the very important functions of the proposed Federal reserve system. The right of the Federal reserve board to fix the rate of interest which may be charged member banks by the Federal reserve banks and which the Federal reserve banks may charge each other would have a steadying effect upon the interest rate throughout the United States, and will enable the banks of the country to extend accommodation at a comparatively stable rate of interest upon a lower basis than heretofore, because the element of hazard of panic and of financial stringency will be removed by the proposed system.

MOBILIZATION OF RESERVES.

In addition to concentrating in the Federal reserve banks a substantial part of the reserves of the National and State banks and trust companies of the country and placing in such banks a respectable capital by stock subscriptions and a considerable volume of Government funds—approximately a total of about $700,000,000—it is proposed to make them perfectly mobile. In order to have these funds meet the purpose for which they were intended they must be kept in a liquid condition and made instantly mobile by keeping the investments of such banks either in actual gold and lawful money or in short-time commercial bills drawn against actual commercial transactions which are readily converted into money on short notice. (Sec. 14, p. 40, and sec. 16, p. 44.)

In pursuing this policy we have followed the experience of the great public-utility banks of Europe. The European systems confine in large measure the holdings of the public-utility banks to cash and liquid bills of very short maturities, the average length of time of the bills of the Bank of France not exceeding 28 days and the Reichsbank of Germany having no paper of longer maturity than 90 days, and a large part of its paper very short-time paper. The Bank of England handles quite a large volume of paper running 7 to 14 days. These public-utility banks carefully avoid putting the funds in their custody in the form of investments which are not instantly convertible into money. This consideration is of the highest importance, because the Federal reserve banks holding the reserves of the reserves must be in a position to extend instant accommodation to any member bank requiring cash.

With a view to enlarging the volume of liquid paper based on actual shipments of goods, the reserve bank is authorized to discount acceptances and the member banks are authorized to accept bills of exchange against actual shipments of goods.

ELASTIC CURRENCY—FEDERAL RESERVE NOTES.

In order to render still more mobile and liquid the reserves held by the Federal reserve banks, elastic currency has been provided (sec. 17, p. 47) in the form of Federal reserve notes issued as obligations of the United States, redeemable in gold at the Treasury, or in gold or lawful money at the reserve banks, and receivable for all taxes and public dues, except customs. The exception of customs was intended to enable the Federal Government to command a supply of gold through the customhouses, if it should prove to be necessary, by compelling the customs to be paid in gold by foreign shippers.

These Federal reserve notes, while the obligations of the United States and made redeemable in gold or lawful money at the Federal reserve banks and in gold only at the Treasury of the United States, are carefully surrounded by very numerous safeguards to make assurance doubly sure that they shall not at any time in reality tax the credit of the United States itself. The securities behind these notes are:

First. Commercial bills drawn against actual commercial transactions which have goods and merchandise behind the notes.

Second. Such notes have the credit of the maker of the commercial bill deemed good by the member banks.

Third. The indorsement by the member bank of such commercial bills.

Fourth. The double liability of the stockholders of the member bank so indorsing.

Fifth. Thirty-three and a third per cent of gold reserves in the Federal reserve bank.

Sixth. A first lien on all the assets of the Federal reserve bank.

Seventh. The stock of the indorsing member bank in the Federal reserve bank.

Eighth. The reserve balance of the indorsing member bank in the Federal reserve bank.

Ninth. A double liability of the member banks of the Federal reserve bank.

Tenth. The double liability of the stockholders of the member banks of the Federal reserve bank.

Eleventh. The surplus of the Federal reserve bank.

Twelfth. The earning power of such reserve bank, and finally the United States. There has never been issued a note with such safeguards surrounding it by any banking system of the world.

The commercial bills alone would never fail, because of their liquid character and short maturity. No apprehension whatever need be felt with regard to these notes ever taxing the Federal Treasury.

Since each bank is required to keep a gold reserve with the Treasury of the United States against such note issues, it is necessary to keep a record of the outstanding circulation emitted through each Federal reserve bank, and for this reason a descriptive number is placed upon the notes emitted through any Federal reserve bank so as to keep the record of notes outstanding issued through such banks. The effect of issuing Federal reserve notes against commercial bills is to make intensely mobile the assets of the Federal reserve bank and enable such bank at all times to respond instantly to the needs of national commerce. The emission of these notes is controlled by the Federal reserve board, which is authorized to control the volume of these notes and the terms upon which they shall be advanced to the Federal reserve bank and the conditions of retirement.

The Federal reserve board is authorized to tax the issue of the notes and also to fix the rate of interest on the discounts of the Federal reserve banks, and in this way keep a double check on the issuance of the Federal reserve notes.

While the Federal reserve notes are extremely well secured, it is made easy for member banks needing currency for seasonable demands or for any extraordinary emergency to obtain Federal reserve notes from the Federal reserve banks. The Federal reserve bank has only to deposit liquid commercial bills of a qualified class with the Federal reserve agent and obtain from him such Federal reserve notes, keeping, however, a minimum deposit of 33 per cent of gold against such Federal reserve notes as may be put in actual circulation. It is believed that in actual practice the gold reserves against such notes in circulation will be very large, much larger than the minimum requirement, especially if our proposed amendment is placed in the House bill, permitting the reserves against deposits and against the notes to be kept as a common fund. It is obvious that if a minimum requirement of 33 per cent against deposits and 33 per cent against notes in circulation is held as a common fund, anyone observing the statement merely from the standpoint of a depositor, if the deposits and the notes in circulation happened to be equal, would perceive that the reserves against deposits would appear as 66 per cent, and anyone looking at the reserves against the notes from that point of view would observe a reserve equal to 66 per cent of the notes in circulation.

It also is obvious that when there is a surplus reserve against the deposits far above 33 per cent there is no reason why the bank should not have the credit of this surplus appearing also in its favor as a reserve against notes in circulation, and it was upon the best advice obtainable that an amendment was proposed to section 17 permitting these reserves to be carried as a common fund, but in no contingency less than a 33 per cent gold reserve against the notes, as required in the House bill.

The retirement of these Federal reserve notes would, of course, be accomplished wherever the commercial bills were withdrawn by the member bank or by the Federal reserve bank from the hands of the Federal reserve agent, the Federal reserve agent in such contingency either receiving the notes back or a like volume of lawful money.

OPEN-MARKET OPERATIONS.

One of the most important features of this bill is the establishment of what is called an open market for bills of exchange and bankers' acceptances such as has long prevailed in Europe, but which has not existed to any great extent in the United States. In Europe the various banks and private bankers carry on a very large scale commercial bills of exchange and acceptances based on actual commercial transactions of short maturities and which are regarded as self-liquidating. Such bills have behind them actual merchandise for which a purchaser has been found, and these bills are held in their portfolios as almost the exact equivalent of cash, for the reason that the security of such bills is regarded as substantially perfect, their uniform and certain payment constant, and therefore there is an "open market" for such bills maintained by the great public banks, such as the Bank of France, the Reichsbank, the Bank of Belgium, the Bank of Netherlands, the Bank of England, etc., at a very low rate of interest.

It is now proposed that a constant market at a fairly uniform rate of interest be established in this country by establishing the Federal reserve bank with a large capital and large reserves and with the express power to discount for member banks commercial bills and acceptances of the qualified liquid class, and also to buy and sell in the open market such bills and bankers' acceptances as have been found merchantable and liquid by the experience of European banking systems. It is anticipated that the effect of this method will be to encourage banking houses to buy commercial bills of the qualified class, and in this way that we may greatly enlarge the market for the bills of manufacturers, merchants, and business men who are handling the actual commerce of the country. (Secs. 14 and 15, pp. 40–44.)

GOVERNMENT DEPOSITS WITH FEDERAL RESERVE BANKS.

It has been deemed of the highest importance to maintain the independent Treasury of the United States and not compel the Secretary of the Treasury to deposit every dollar of the public funds in the Federal reserve banks, but to provide that he may do so. The argument in favor of maintaining the independence of the Federal Treasury is overwhelmingly in favor of an independent Treasury and need not be recounted here.

The Government of the United States can advantageously to the banks and to itself place with the Federal reserve banks $150,000,000, or even a larger sum, but the process of collecting the revenue through revenue collectors scattered throughout the Nation, making local deposits, and the right of the Treasury Department to make disbursements in every part of the country through its numerous disbursing officers, makes it highly necessary to maintain the independence of the Treasury. We have therefore thought it proper to change the provision of section 16 in such a way as to accomplish this object (p. 46).

REFUNDING BONDS.

The House measure (sec. 19, p. 56) provided for retiring 5 per cent of the outstanding 2 per cent bonds held for national-bank circulation by the exchange of 3 per cent bonds without circulation privilege for such 2 per cent bonds, justly assumes that the Government will be compensated by the interest earned upon a like amount of Federal reserve notes.

We have preferred to absorb such of these bonds as would be offered on the market by permitting the Federal reserve banks to buy such 2 per cent bonds and issue Federal reserve bank notes against them just as the national banks do (p. 14), and have further permitted such Federal reserve banks, in section 19, to assume the redemption of not exceeding $36,000,000 of national-bank notes issued against such bonds and to take over such bonds and issue Federal reserve notes against such bonds, leaving the bonds with the Treasurer of the United States in trust in the form of 3 per cent bonds or 3 per cent annual notes, in this way assuring to the Government the earning power upon the circulation taking the place of the retired national-bank circulation (p. 58).

CLEARING CHECKS AND DRAFTS.

The House bill proposed to clear checks and drafts at par, but we propose an amendment providing that checks and drafts sent to the Federal reserve banks by member banks may be cleared, allowing the Federal reserve board to fix the charge which may be imposed for the service of clearing or collection rendered either by the Federal reserve bank or by the member banks, and with a provision that the act should not be construed to prohibit member banks from making reasonable charges for checks and drafts debited to their account, or for collecting and remitting drafts, or for exchange sold to its patrons. In this way the reserve banks are not put in competition with the country banks, but can serve them and their customers at a fair price. This amendment should remove the very serious objection of many of the country banks to the House provision, which they thought would interfere with their right to charge for exchange in making remittances (p. 55).

SAVINGS-BANK SECTION.

Your committee has struck out entirely the savings-bank section No. 27, for the reason that the national banks now, through the system of time deposits, carry on a savings-bank business very economically and at the same time use the funds in promoting the local enterprises. It was the practical judgment of all the small banks of the country that this section should not remain in the bill.

CHANGES IN THE NATIONAL-BANK ACT.

Several changes of importance in the national-bank act have been made, to which attention should be called:

First. Section 21 (p. 65) provides that the 5 per cent fund placed with the Secretary of the Treasury for the redemption of national-bank notes shall no longer be construed to be a part of the bank's reserves. This is justified because the reserves of the national banks have been made decidedly lower than they have been in the past.

Second. The law requiring bonds of national banks to be deposited before any national bank association shall be authorized to commence the banking business, as provided in section 5159 of the Revised Statutes, etc., is repealed by section 18 (p. 56). The obvious purpose of this section is to ultimately do away with the bond-secured circulation, which is inelastic and unscientific. The way to establish an improved system is thus made open.

Third. The bank examinations are more thoroughly provided for in section 23 (p. 66).

Fourth. The loans, gratuities, and commissions to bank officers or bank examiners are penalized by section 24 (p. 69).

Fifth. The stockholders' liabilities of national banks and of member banks is modified to establish the double liability and to prevent its evasion. (Sec. 25, p. 71.)

Sixth. Loans on farm lands are permitted to the extent of 25 per cent of the capital and surplus of a national bank and for a period of five years. This would make available possibly $400,000,000, but in actual practice it would not be likely to exceed a hundred million dollars under the terms of the bill, for the reason that the city banks do not make such loans, and where the banks have the authority they will probably not exercise it with any uniformity.

Seventh. The change of the reserves in the national banking law is a very important change, heretofore described, and which will be found set forth in section 20 (p. 59).

The House provision was changed so as to make the language more compact and to simplify it.

Eighth. Foreign branches were also provided for national banks having a capital and surplus of a million dollars or more, with the approval of the Federal reserve board. (Sec. 28, p. 77.)

This is a very important amendment and one of far-reaching importance to the foreign commerce of the United States, the purpose of which is so obvious as to need no explanation.

Many other amendments are needed in the national-bank act which this bill does not undertake to deal with, for the reason that it was of great importance that this bill should not be embarrassed by the consideration of questions which were not necessarily germane to the bill itself in establishing the Federal reserve system.

The National Monetary Commission did a very large amount of work looking toward the codification of the national-bank act, and this work has so far progressed that it may be easily submitted to the Senate during the next regular session, in such a form as to enable the matter to be disposed of and to make any other amendments which are necessary to the national-bank act, without embarrassing the present measure by considerations which are not necessarily a part of the Federal reserve system.

The proposed changes recommended by the undersigned are best set forth by submitting a print of the House bill with the parts struck out being placed in brackets and the amendments proposed being inserted in italics. (See Exhibit A.) The other exhibits are necessary to justify the amendments recommended.

Very respectfully submitted.

ROBERT L. OWEN, *Chairman.*
JAMES A. O'GORMAN.

ATLEE POMERENE.
JOHN F. SHAFROTH.
HENRY F. HOLLIS.

EXECUTIVE SESSION.

Mr. O'GORMAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 55 minutes spent in executive session the doors were reopened, and (at 3 o'clock and 55 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, November 25, 1913, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate November 24, 1913.

UNITED STATES MARSHAL.

Edgar H. James, of Kentucky, to be United States marshal, western district of Kentucky, vice George W. Long, resigned.

MEMBERS OF THE PHILIPPINE COMMISSION.

Henderson S. Martin, of Kansas, to be a member of the Philippine Commission, secretary of public instruction, and vice governor of the Philippine Islands, vice Newton W. Gilbert, resigned.

Clinton L. Riggs, of Maryland, to be a member of the Philippine Commission and secretary of commerce and police, vice Charles B. Elliott, resigned.

Winifred T. Denison, of New York, to be a member of the Philippine Commission and secretary of the interior, vice Dean C. Worcester, resigned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate November 24, 1913.

CONSULS GENERAL.

Stuart J. Fuller to be consul general at large.
William W. Handley to be consul general at Callao, Peru.
Michael J. Hendrick to be consul general at Christiania, Norway.
Carl Bailey Hurst to be consul general at Barcelona, Spain.
Henry H. Morgan to be consul general at Hamburg, Germany.
Ransford S. Miller to be consul general at Seoul, Chosen.
Thomas Sammons to be consul general at Shanghai, China.
George H. Seidmore to be consul general at Yokohama, Japan.
Robert P. Skinner to be consul general at Berlin, Germany.
John Q. Wood to be consul general at Adis Ababa, Abyssinia.

CONSULS.

Henry D. Baker to be consul at Bombay, India.
John K. Baxter to be consul at Maracaibo, Venezuela.
Harold D. Clum to be consul at Corinto, Nicaragua.
William Dawson, jr., to be consul at Rosario, Argentina.
W. Roderick Dorsey to be consul at Tripoli, Libya.
William F. Doty to be consul at Nassau, Bahamas.
Julius D. Dreher to be consul at Toronto, Ontario, Canada.
Cornelius Ferris, jr., to be consul at Port Antonio, Jamaica.
Charles Forman to be consul at Moncton, New Brunswick.
Paul H. Foster to be consul at Jerez de la Frontera, Spain.
Arsinius T. Haeberle to be consul at St. Michaels, Azores.
Lewis W. Haskell to be consul at Belgrade, Servia.
Charles M. Hathaway, jr., to be consul at Hull, England.
Frank Anderson Henry to be consul at Puerto Plata, Dominican Republic.
Charles A. Holder to be consul at Cologne, Germany.
Douglas Jenkins to be consul at Riga, Russia.
Milton B. Kirk to be consul at St. Johns, Quebec, Canada.
Myrl S. Myers to be consul at Swatow, China.
Kenneth S. Pattou to be consul at Cognac, France.
Albert W. Pontius to be consul at Nanking, China.
John A. Ray to be consul at Sheffield, England.
Emil Sauer to be consul at Goteborg, Sweden.
Maddin Summers to be consul at Santos, Brazil.
Robert J. Thompson to be consul at Aix la Chapelle, Germany.
Frederick Van Dyne to be consul at Lyon, France.
Charles L. L. Williams to be consul at Dalny, Manchuria.
Jay White to be consul at Naples, Italy.

NAVAL OFFICER OF CUSTOMS.

William Brown to be naval officer of customs in the district of Chicago.

APPRAISER OF MERCHANDISE.

Seth F. Clark to be appraiser of merchandise in the district of Maine and New Hampshire.

COLLECTOR OF INTERNAL REVENUE.

John M. Rapp to be collector of internal revenue for the thirteenth district of Illinois.

POSTMASTERS.

FLORIDA.

L. M. Caswell, Perry.

INDIANA.

William S. Tindall, Paoli.

MISSISSIPPI.

Myrtle A. McKay, Pelahatchee.

MISSOURI.

Sterling S. Ball, Kahoka.

NORTH DAKOTA.

W. W. Anderson, Edgeley.

OHIO.

Addie E. Joseph, Nottingham.

OKLAHOMA.

A. L. Kates, Claremore.
Julia P. Montgomery, Valliant.
H. W. Warrick, Lehigh.

SOUTH DAKOTA.

J. F. Kelley, Aberdeen.

SENATE.

TUESDAY, *November 25, 1913.*

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D.

NAMING A PRESIDING OFFICER.

The Secretary (James M. Baker) read the following communication:

PRESIDENT PRO TEMPORE UNITED STATES SENATE,
Washington, November 25, 1913.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. JOHN RANDOLPH THORNTON, a Senator from the State of Louisiana, to perform the duties of the Chair during my absence.

JAMES P. CLARKE,
President pro tempore.

Mr. THORNTON thereupon took the chair as Presiding Officer and directed that the Secretary read the Journal of the proceedings of the last legislative day.

THE JOURNAL.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

The PRESIDING OFFICER presented resolutions adopted by the Kapahulu Improvement Club, of Honolulu, Hawaii, favoring the enactment of legislation for the extension of the franchise of the Honolulu Rapid Transit & Land Co., which were referred to the Committee on Pacific Islands and Porto Rico.

Mr. TOWNSEND presented a petition of the Michigan Patent Law Association, praying for the repeal of the copyright law, which was referred to the Committee on Patents.

He also presented a memorial of sundry citizens of Kalamazoo, Mich., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. WEEKS presented a memorial of the Social Science Club of Newton, Mass., remonstrating against the enactment of legislation authorizing the city of San Francisco to use the waters of Hetch Hetchy Valley, which was ordered to lie on the table.

Mr. WEEKS (for Mr. LODGE) presented the memorial of L. B. R. Briggs, president of Radcliffe College, and of William Z. Ripley and sundry other professors of Harvard University, Cambridge, Mass., and the memorial of William D. Parkinson, superintendent of schools, and other sundry citizens of Waltham, Mass., remonstrating against the enactment of legislation authorizing the city of San Francisco to use the waters of Hetch Hetchy Valley, which were ordered to lie on the table.

Mr. CHAMBERLAIN. I present a petition from citizens of the State of Oregon relative to the passage of a pension bill for the membership of the United States Military Telegraph Corps, which I ask may be printed in the RECORD, together with the signatures, and referred to the Committee on Pensions.

There being no objection, the petition was referred to the Committee on Pensions and ordered to be printed in the RECORD, together with the signatures, as follows:

NOVEMBER 11, 1913.

To the Congress of the United States:

The undersigned citizens of Portland, in the State of Oregon, believing that the members of the United States Military Telegraph Corps, who rendered exceptional military service in the Civil War, 1861-1865, have heretofore been overlooked in the distribution of the rewards meted out to the soldiers of that war, do most earnestly petition the Congress to pass remedial legislation in the form of the pension bills now before it.

W. A. Robb, 641 Mountain Boulevard; W. E. Brooks, 758 East Couch; J. A. Paquette, 590 Division; C. R. Parkinson, 1830 Clackamas Street; Robert A. Montgomery, Gardner Avenue and Cooper Street; J. A. Carter, 730 Hoyt Street; B. M. Brents, 414 Mill Street; F. Springer, 181 Green Avenue; H. B. Nesbit, Hotel Congress; A. Schoepper, 835 Tenth Street; L. E. Anderson, 150 North Twenty-fourth Street; C. J. Gotthelf, 350 Salmon Street; R. R. Bates, 207 Fourteenth Street; L. B. Kline, 363 East Forty-ninth Street; S. J. Johnston, 380 East Fiftieth Street; George W. Hann, 964 Corbett Street; W. A. Humphrey, 8 East Eleventh Street; Ira Greenwood, 6810 Forty-third Avenue SE.; W. Butler, Franklin Hotel; Frank C. Routledge, Orlando Apartments, Twentieth and Washington Streets; Harry A. Whitson, 912 East Nineteenth Street N.; J. W. Holt, 433 Broadway S.; C. E. Christie, 302 East Forty-sixth; I. E. Hickey, 591 East Twentieth Street; E. G. Nixon, 6105 Forty-eighth SE.; M. M. Swearingen, 1157 East Morrison; C. A. Cook, Park Rose; H. G. Dorr, 1888 Stanton Street; P. F. Schnur, 816 Clackamas Street; L. H. Kluge, 183 East Thirty-third; C. W. Browne, 1477 Fern Street; E. G. Gray, 1550 Vincent Avenue; R. G. Gray, 1550 Vincent Avenue; N. A. Slocum, 251 East Thirty-ninth Street; B. Howell, 311 Eleventh Street; C. M. Trimble, 260 Nartilla; C. B. Sweet, Grandesta Apartments; C. A. Leppere, 1900 East Taylor Street; G. B. Flood, 231 East Seventy-second N.

Mr. GALLINGER presented the memorial of R. M. Shurtleff, of New York, N. Y., remonstrating against the enactment of legislation authorizing the city of San Francisco to use the waters of the Hetch Hetchy Valley, which was ordered to lie on the table.

WOMAN SUFFRAGE.

Mr. GALLINGER. Mr. President, I have a memorial signed by Mrs. George S. Edgell, of Newport, N. H., daughter of the late Austin Corbin, and 204 other women of the State of New Hampshire, protesting against granting the suffrage to women.

In transmitting the memorial Mrs. Edgell very modestly suggests that she would be pleased to have it appear in the RECORD. I will therefore ask that the heading of the memorial be read, and that the names be not inserted in the RECORD, as that is contrary to our custom. As the joint resolution on the subject has been reported to the Senate, I ask that the memorial lie on the table.

There being no objection, the memorial was read and ordered to lie on the table, as follows:

To the Federal Congress of the United States of America in Washington assembled:

We, the undersigned citizens of Newport, in the county of Sullivan, and State of New Hampshire, representing women of every station in life, trusting in God and vitally interested in the preservation of the traditional American home, are opposed to the extension of suffrage to our sex.

With the demands of society, the calls of charity, the church, and philanthropy constantly increasing, we feel that to add the distracting forces of political campaigns would wreck our constitutions and destroy our homes.

At all times we are ready to give our full portion of love and sacrifice for the life of the Nation and the good of mankind, but we look upon the attempt now being made by some to crowd the obligations of suffrage upon us as a move to change our natures and destroy us for that wider field of influence and usefulness which in America has always belonged to woman.

Therefore we respectfully petition your honorable body, and ask that you will vote against all measures which may come before you looking to the extension of the franchise to women.

Dated at Newport, N. H., this 7th day of July, 1913.

SAN FRANCISCO WATER SUPPLY.

Mr. PITTMAN. Mr. President, I have here a resolution of the California Camera Club, of California, in regard to the bill commonly known as the Hetch Hetchy water bill, referring to the San Francisco water system. In presenting the resolution to the Senate and asking that it may be read by the Secretary I wish to make a preliminary statement. This club is composed of members from the whole State of California. It has a very large membership and nearly every member of the club has been in the Hetch Hetchy Valley. They made a trip there as a club about a year and a half or two years ago. I should like to have the resolution read.

There being no objection, the resolution was read and ordered to lie on the table, as follows:

No organization in California has as keen an appreciation of natural beauties as the California Camera Club. This organization has always been identified with the movement to preserve natural beauties, and its members, more numerously than any other group of people, have visited the Sierras. At a special meeting of the board of directors held November 10 to discuss the Hetch Hetchy project the following was unanimously adopted:

"Whereas it is the policy of the California Camera Club to take an interest in everything that is for the benefit of the community; and

"Whereas at a recent lecture given under the auspices of this club the speaker directed criticism at the effort of San Francisco to secure a water supply from Hetch Hetchy for municipal consumption; and

"Whereas the views expressed by this lecturer were his own personal views and not those of the California Camera Club; and

"Whereas the members of the California Camera Club are primarily true lovers of nature, and as such believe that the addition of a lake in Hetch Hetchy Valley will enhance its scenic beauties, will cause the development of a system of roads, and will permit visitors a more ready access to the natural beauties of this now almost inaccessible region; and

"Whereas the California Camera Club recognizes that even now the water supply of San Francisco is inadequate and with the growth of the city will become more inadequate; and

"Whereas the water of the Hetch Hetchy is well known to be of the very purest: Now, therefore, be it

"*Resolved*, That the California Camera Club, recognizing that a sufficient and perfectly pure water supply is one of the most valuable assets of any large and growing municipality, desires to express its approval of any action taken toward the securing of the Hetch Hetchy watershed as a permanent source of a municipality-owned water supply."

Mr. PITTMAN. I have another resolution here addressed to the Senate by the California Club of California, which is, I believe, the largest woman's club in California. It is composed of members from all over the State. I should like to have the Secretary also read this resolution.

There being no objection, the resolution was read and ordered to lie on the table, as follows:

Whereas San Francisco has been for 12 years appealing to the Federal Government for such rights in the high Sierras as will enable it to provide the people of the bay counties with a pure and adequate supply of water; and

Whereas the Hetch Hetchy region offers the only source to which San Francisco can look for such an uncontaminated supply as will provide for not only the immediate but the future needs of its people; and

Whereas San Francisco already owns outright more than half the land in the floor of the Hetch Hetchy Valley which will be flooded by the proposed reservoir, and has in good faith spent one and one-half million dollars in the development of its proposed municipal water system; and

Whereas all that San Francisco asks of the Federal Government is the right to construct a dam and the grant of the use as a reservoir of part of the Hetch Hetchy Valley, which will in no wise be impaired in its natural beauty by the creation of a lake; and

Whereas the natural beauties of the Hetch Hetchy region will be made more easily accessible to thousands of nature lovers by the building of roads and trains, which San Francisco will construct into this entire region; and

Whereas human consumption is the highest use to which the Hetch Hetchy water can be put, in that it will safeguard the health and supply the present needs of a community of 800,000 people and the future needs of many times that number; Therefore be it

Resolved by the California Club of California (450 members), That we most earnestly go on record as approving of San Francisco's petition to Congress for the grant of certain rights in the Hetch Hetchy region; and be it further

Resolved, That we declare our firm conviction that human needs are paramount to sentimental objection of so-called "nature lovers," who profess to see in San Francisco's project a desecration of nature; although the work of San Francisco in the high Sierras will in reality bring this wonder region closer to the real lovers of nature and will in no wise impair the grandeur of the scenery there to be found; and be it further

Resolved, That we regret the campaign of misrepresentation that has been made in the effort to prevent San Francisco from obtaining that pure and adequate supply of water to which every community should be entitled; and be it further

Resolved, That we petition the Senate of the United States to grant to San Francisco the rights for which it has so long appealed and which are embodied in the Raker bill, heretofore passed by the House of Representatives of the United States.

MRS. A. P. BLACK, *President.*
MRS. J. S. A. MACDONALD, *Secretary.*

Mr. PITTMAN. I have here a list of clubs throughout the country that have indorsed the last resolution read. I ask leave to have it printed in the RECORD, without reading.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

The following have also adopted the resolution:

The Rhode Island Woman Suffrage Association; Elizabeth Upham Gates, president; Sara L. G. Flitz, secretary, 197 Longfellow Street, Providence, R. I.

The Pacific Coast Women's Press Association, San Francisco; Mrs. I. Lowenberg, president; Mrs. W. C. Morrow, corresponding secretary; Mrs. A. J. Stowell, recording secretary.

The North Carolina Society; R. G. Lewis, president; William P. Hubbard, secretary.

The Waitresses' Union, Local No. 48, San Francisco; Gertie Benton, president; Laura Molleda, secretary.

The civic department of California Club, of California; Mrs. Louis Hertz, president; Mrs. John S. Phillips, secretary.

The South Park Mothers' Club, San Francisco; M. McFarlane, secretary.

The Woman's Club of Redondo Beach; Mrs. John Steward, president; Mrs. Perry Long, secretary.

The Richmond Women's Club; Mrs. E. H. O'Donnell, secretary; Mrs. J. W. Felt, president; Mrs. E. G. Ely and Mrs. F. Menz, executive committee.

The Lois Art Club, of Grass Valley; Edna D. Sampson, president; Mignotte Grant, secretary.

The Thursday Reading Club, of Oakland; Helen L. Courteau, president; Helen H. Barnes, secretary.

The Mountain View Woman's Club; Mrs. Eliza J. Farrell, president; Miss E. J. Stevens, secretary.

To Kalon Club, San Francisco; Maybelle Worth Stevens, corresponding secretary.

The Alta Mira Club, of San Leandro; Gainor G. Aitken, president; Alma Pauline Spurr, secretary.

The Tamalpais Center Woman's Club; Mrs. Margaret Hamilton, president.

The Sonoma Valley Woman's Club; Carrie A. Burlingam, president; Alice Wagnon, secretary.

The Woman's Civic Club, San Luis Obispo, Cal.; Mrs. Eliza Miller, president; Grace A. Van Scoy, secretary.
The Laurel Hall Club; Christine Hart, president; Grace Guild Palmer, secretary.
The San Francisco Colony of New England Women; Mrs. G. B. Miller, president; Mrs. Martin C. Walton, secretary.
The Improvement Club of Auburn, Cal.; Mrs. Cora E. Tabor, president; Harriet J. Lewis, secretary.
The Vittoria Colonna Club; Mariana Bertola, president; Iride D. Martini, secretary.
The Monticola Club, Susanville, Cal.; Mrs. Atawa McKinsey, president; Mrs. Ada L. Hart, secretary.
The Western Development Co.; W. S. Gray, president; A. M. Enewold, secretary.
The Texas Club; Dr. R. E. Bering, president; A. J. Hockwald, secretary.

Mr. PITTMAN. I also have here a letter from the State engineer of the State of California as to the legal rights of San Francisco to this water. I ask leave to have it printed also in the RECORD without reading.

There being no objection, the letter was ordered to lie on the table and to be printed in the RECORD, as follows:

STATE OF CALIFORNIA,
DEPARTMENT OF ENGINEERING,
Sacramento, November 12, 1913.

To whom it may concern:

Concerning San Francisco, and San Francisco Bay district and an adequate water supply, the writer believes that the Hetch Hetchy project is the best and also believes that this district is entitled to the best source of supply available.

I am quite familiar with the whole State of California, and have a very full knowledge of the Bay district, having resided there during the past 13 years. As commissioner of public works of the city of Berkeley, it was my duty, in connection with the governing bodies of neighboring cities, to give the matter of water supply considerable study three or four years ago.

Have given a careful reading to the report of a hearing of the Committee on Public Lands of the Sixty-third Congress, first session, H. R. 6281, and had there been any lingering doubt in my mind as to the legitimate claim of San Francisco to this source of water supply it would have been entirely dissipated by the testimony and speeches made at that hearing.

W. F. MCCLURE, *State Engineer.*

Mr. PITTMAN. I also have here resolutions adopted by the League of California Municipalities, favoring the passage of the Raker bill. I ask leave to have the resolutions printed also in the RECORD without reading.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

Whereas there is now pending in the Senate of the United States a bill known as the Raker Act, which measure has already passed the House of Representatives; and
Whereas the Raker Act is a grant from the United States to the city and county of San Francisco and the other cities on San Francisco Bay, wherein the subject of the grant is reservoir sites in the Hetch Hetchy Valley, Cherry River Valley, and Lake Eleanor Basin, said sites to be used for the purpose of supplying water to the communities around San Francisco Bay; and
Whereas the needs of San Francisco and adjoining cities are such that immediate relief is necessary to insure adequate supplies of water for domestic purposes: Therefore be it

Resolved, That the League of California Municipalities, representing 185 cities and towns, in its sixteenth annual convention assembled in the city of Venice, does hereby approve the said Raker bill, and respectfully urges its passage in the Senate of the United States.

I hereby certify the foregoing to be a true copy of a resolution adopted by the League of California Municipalities October 10, 1913.

H. A. MASON, *Secretary.*

Mr. SMOOT. Mr. President, in connection with the Hetch Hetchy water bill, so called, I wish to give notice to the Senate that I have received many, many thousands of protests against it. I have not felt it proper or right to encumber the RECORD with all these protests, but I am frank to say that I believe I have in my office at least 5,000 letters from different parts of the country protesting against the passage of the bill.

I merely wish to make this statement, Mr. President, because parties protesting to me and noticing that other communications on the subject are put in the RECORD may think that I have neglected a duty. I simply call the attention of the Senate to the fact without asking that the RECORD be encumbered with them.

Mr. WORKS. Mr. President, while we are on this subject I desire to give notice that on Thursday, the 4th of December, I will submit some remarks on the Hetch Hetchy bill.

Mr. GALLINGER. Mr. President, in connection with the observations of the Senator from Utah [Mr. SMOOT] I desire to put in the RECORD a statement of the fact that I am also in receipt of almost innumerable letters on the subject. This morning a lengthy article from the pen of Frederick Law Olmsted, jr., one of the most celebrated landscape gardeners of the world, came to me with a letter asking that I should have it inserted in the RECORD. It is a very long communication. Mr. Olmsted is opposed to the project. I have not felt like asking to have it printed in the RECORD, as I have not asked to have any of the letters on this subject printed.

The matter is to come up for debate very soon, and I will venture to express the hope that letters and resolutions on one or the other side or on both sides of this important question, inasmuch as we individually receive them through the mail, ought not to encumber the RECORD to a greater extent than is absolutely necessary.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. DILLINGHAM:

A bill (S. 3472) granting an honorable discharge to Franklin Martin; to the Committee on Military Affairs.

A bill (S. 3473) granting a pension to Helen M. Gleed (with accompanying papers); to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 3474) to remove the charge of desertion from the record of Almon L. McNich (with accompanying paper); to the Committee on Military Affairs.

A bill (S. 3475) granting an increase of pension to Charles M. Walker (with accompanying papers);

A bill (S. 3476) granting a pension to Fidelia M. Waffles (with accompanying papers);

A bill (S. 3477) granting an increase of pension to Henry Eaton (with accompanying papers);

A bill (S. 3478) granting an increase of pension to James K. Brooks (with accompanying paper);

A bill (S. 3479) granting a pension to Ambrose A. Link (with accompanying paper);

A bill (S. 3480) granting a pension to Elizabeth A. Tice (with accompanying papers); and,

A bill (S. 3481) granting a pension to Henry F. Baldwin (with accompanying papers); to the Committee on Pensions.

By Mr. GALLINGER:

A bill (S. 3482) relating to the sale of bichloride of mercury in the District of Columbia; to the Committee on the District of Columbia.

MILITARY HIGHWAY, EL PASO, TEX.

Mr. SHEPPARD. I introduce a joint resolution and ask that it be read and referred to the Committee on Military Affairs.

The joint resolution (S. J. Res. 81) authorizing the survey and estimate of cost for the construction of a military road from El Paso, Tex., to the mouth of the Rio Grande, was read twice by its title and referred to the Committee on Military Affairs, as follows:

Whereas conditions along the Rio Grande border of the United States have demonstrated beyond question the necessity of a military highway from El Paso to the mouth of the Rio Grande; and
Whereas the difficulty of reaching many sections of this border with troops and munitions of war makes that portion of our country comparatively easy of invasion, exposes many thousands of our people to untold dangers in time of war, prevents the proper policing of the border against smugglers and other lawless classes, and imperils the security both of life and property: Therefore be it

Resolved, etc., That the Secretary of War is hereby directed to cause to be made a survey for such highway at the earliest possible date, together with an estimate of cost.

That for the purpose of defraying the cost of said survey and estimate the sum of $25,000, or so much thereof as may be necessary, is hereby appropriated out of any moneys in the Treasury not otherwise appropriated.

BUZZARDS BAY BUOY.

Mr. ROOT submitted the following resolution (S. Res. 219), which was read, considered by unanimous consent, and agreed to:

Resolved, That the Secretary of Commerce be directed to inform the Senate what steps have been taken or are contemplated to buoy and mark that part of the public navigable waters of the United States in Buzzards Bay which will become a much-frequented trade route upon the opening of the Cape Cod Canal.

HOUR OF MEETING TO-MORROW.

The PRESIDING OFFICER. Morning business is closed. The calendar under Rule VIII is in order.

Mr. KERN. I desire to inquire of Members on both sides of the Chamber whether any Senator is ready to proceed or will be ready to proceed with the discussion of the currency bill on to-morrow?

Mr. GALLINGER. No Senator is ready to proceed on this side of the Chamber.

Mr. NELSON. In reply to the Senator from Indiana, I beg leave to state that with the exception of the Senator from Nebraska [Mr. HITCHCOCK], who intends to discuss the bill to-day, I am aware of no Senator on this side of the Chamber who desires to go on with the debate.

Mr. KERN. Then, Mr. President, I move that when the Senate adjourns to-day it adjourn to meet to-morrow at 2 o'clock p. m.

The motion was agreed to.

BANKING AND CURRENCY.

Mr. HITCHCOCK obtained the floor.

Mr. OWEN. May I ask the Senator from Nebraska just for a moment of time? I wish to call the attention of the Senate to the condition of the calendar and to the unanimous-consent agreements which are on the calendar. One is for December 1, 1913, providing for the disposition of the Hetch Hetchy bill, and the other is for December 8, relating to the Alaska railroad bill. I should like to have it understood that, in so far as those unanimous-consent agreements do not require the time of the Senate, I shall feel it my duty to ask the Senate to consider the banking and currency bill. I suppose there will not be very much time taken up on the Hetch Hetchy bill, and I should be very glad to know from the Senator from Nevada [Mr. PITTMAN], in charge of that bill, what time he anticipates will be consumed by debate upon that measure.

Mr. PITTMAN. Mr. President, at present there are only two addresses noted to be made on that subject. One is by the Senator from Colorado [Mr. THOMAS] for the 3d of December, and the other is by the Senator from California [Mr. WORKS] for the 4th of December. I do not know how many Senators desire to discuss that matter. It is set, however, for the 1st of December, and it may be considered from that time until the 6th, with a unanimous-consent agreement that it shall be voted upon on or before the 6th day of December. Of course it could not be voted on prior to the 4th day of December, because the Senator from California has announced that on that day he will address himself to the subject; but I suggest that it may serve convenience if Senators who desire to discuss the matter will make some announcement as to the time when they desire to discuss it. Then we shall be able to confer with those in charge of the currency bill, so as to notify them of the time between the 1st and 6th proximo that can be allotted to that measure. I simply make this as a suggestion.

Mr. SMOOT. Mr. President, I desire to state to the Senator from Nevada that there will be other Senators than those mentioned by him who will desire to discuss the bill to which he refers.

Mr. PITTMAN. I have no doubt of that at all.

Mr. OWEN. I wish to give notice that, in so far as the time of the Senate may not be required for the discussion of the Hetch Hetchy bill, I shall ask the Senate to proceed with the consideration of the banking and currency bill until 6 o'clock in the evening of each day. It is a matter of the most urgent importance.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from North Dakota?

Mr. OWEN. I do.

Mr. GRONNA. Does the Senator from Oklahoma mean by that to set aside the unanimous-consent agreement for the purpose of considering the currency bill?

Mr. OWEN. No; not at all.

Mr. GRONNA. That is not the Senator's request?

Mr. OWEN. Not at all. The unanimous-consent agreement, I take it, will consume so much of the time as the Senate desires to consume, even if it consumes it all; but, to the extent that it is not used, I wish to give notice that I shall ask the Senate to continue with the consideration of the banking and currency bill. That is all.

Mr. GRONNA. If the Senator from Oklahoma will permit me, I wish to say that my impression is that the six days allowed for the consideration of the Hetch Hetchy bill will be taken up. I do not know how much time I shall take in discussing the bill, but I desire to give notice that I shall wish at least some time to discuss it before it is placed upon its final passage.

Mr. OWEN. I assume that the Senator will speak upon the Hetch Hetchy bill. I only desire to give this notice and also to call attention to the unanimous-consent agreement with reference to the Alaska railroad bill, which involves taking that measure up for consideration; but, having taken it up for consideration, even the unanimous-consent agreement may be laid aside. I understand those in charge of that bill will make no objection to its being laid aside. It is costing the country, in my judgment, in the neighborhood of $5,000,000 a day to delay the banking and currency bill.

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Kansas?

Mr. OWEN. I yield to the Senator.

Mr. BRISTOW. I have no desire, of course, to in any way delay the currency bill, but I do not wish it to be regarded that the Alaska railroad bill is to be taken up simply pro forma. I think that bill is just as important legislation as is the currency bill. It is one of the great measures that this Congress ought to pass, and it ought to have been passed before this time. I do not wish anything to interfere with it, and I do not think anything should interfere with it. The needs of Alaska and of the people who live there are more pressing in regard to the development of that Territory and the construction of railroads than any other measure that is before the American Congress to-day.

Mr. CHAMBERLAIN. May I interrupt the Senator?

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Oregon?

Mr. OWEN. Certainly.

Mr. CHAMBERLAIN. With reference to the Alaska railroad bill I have not heard as yet that there will be any very general discussion of it. I may be misinformed as to that, but I do not think that there will be any disposition to press it against the consideration of the currency bill—that is, there will not be very much discussion of it, I think, and there will be times during the discussion of the currency bill when no Senator will be prepared to discuss it—so that I think there will be ample opportunity to submit the Alaska railroad bill at the time fixed on the calendar. I hope so, at any rate.

Mr. OWEN. Mr. President, I merely wish to give notice to the Senate that, in so far as it lay within the power of the chairman of the Committee on Banking and Currency to press the banking and currency bill, it is the intention to do so, and I wish to ask Senators who desire to speak upon the banking and currency measure to be ready to address the Senate upon that bill at the earliest possible date. That is the only purpose I had in rising.

PLAN FOR A FEDERAL RESERVE SYSTEM.

Mr. NEWLANDS. Mr. President, I desire to give notice that to-morrow I will, if the opportunity presents itself, address the Senate regarding a Federal reserve system, which it is my purpose to present as a modification of the pending bill.

There are three systems that have been considered—first, the central-bank system suggested by Mr. Aldrich; second, the regional-bank system presented by both sections of the Committee on Banking and Currency; and third, a Federal system, which I presented some years ago in opposition to the Aldrich plan, and which I desire to urge now.

I wish to state briefly that I realize the great importance of speedy action upon the subject of banking and currency, but the system which I propose does not involve very material changes in the regional system proposed by the Banking and Currency Committee. It simply means a regional reserve association in every State and the federation of the various State reserve associations in one Federal reserve association at Washington. My view is that we ought to act decisively upon the basic plan that is to control this bill, and that before the discussion closes it will be necessary for the party that is in power to determine through a party conference what that basic plan shall be. When that determination is reached, the details can be easily adjusted. I believe that any of the plans proposed are superior to the existing system, and that the commercial and industrial conditions of the country require very speedy action.

I do not propose the modification suggested as a means of delaying consideration or action. I am ready at any time to acquiesce in any basic plan which has the assent of the majority of this body, but I should like to present the plan which I have advocated before and which I advocate now, and have it fully considered. It embraces simply the following suggestions, namely: First, the strengthening of the individual banks of the country engaged in interstate commerce, whether State or National banks, by adequate provisions regarding the relation which their capital shall bear to their deposit obligations and the relation which their reserves shall bear to their deposit obligations; secondly, the unionizing of all banks within the boundaries of a State, whether National or State, that are engaged in interstate commerce in a State reserve association through which one-third of their reserves can be unionized under the control of this association and so mobilized as to enable them to be used with advantage and with purpose at any point of attack within the State where a panic or a stringency threatens; third, to provide for a Federal reserve association at Washington, the members of which shall be the State reserve associations, with which shall be deposited one-third of the reserves that are deposited with the State reserve associations, and which shall have the deposit of Government funds and the power to issue Federal reserve notes.

Under this system about one-third of the entire reserves of the country, aggregating in all one billion and a half of dollars, namely $500,000,000, would go into the various State reserve associations and would be held there in a mobilized form. Of this $500,000,000 one-third would go to the Federal reserve association at Washington, giving it $166,000,000 of concentrated reserves, which it could use provided the local difficulty reached proportions beyond the control of a State reserve association and assumed interstate or national proportions. That

$166,000,000 would be supplemented by nearly $300,000,000 of Government deposits and the power also to issue Federal reserve notes. Under this system the power of rediscount would be given to the State reserve associations with reference to their member banks, and the power of rediscount would be given to the Federal association with reference to its member State associations. That power could be extended, if thought advisable, to individual banks.

A SYSTEM IN HARMONY WITH OUR SCHEME OF GOVERNMENT.

Under such a system, absolutely in harmony with our scheme of government and our political system, we would have the federated powers of the banks in every State in local associations for the purpose of meeting local difficulties and the federated powers of all the local associations exercised in one Federal association for the purpose of meeting difficulties which are likely to become of interstate and national extent and character.

I wish to call attention to the fact that this plan would also embrace no requirement of capital whatever from any of the member banks of the country, but would simply apportion between the State reserve associations and the Federal reserve association the reserves which the local banks both National and State are required to keep under the law. I offer the following resolution embracing the modification suggested, and which I request shall be read. I also request that it be printed and lie on the table. I will address the Senate upon this resolution at to-morrow's session.

There being no objection, the resolution (S. Res. 220) was read and ordered to lie on the table, as follows:

Resolved, That it is the sense of the Senate that the pending banking and currency bill should be modified by providing—

First. That within five years the capital of every commercial bank, National and State, engaged in interstate commerce shall be required to be equal to at least 12 per cent of its deposits, and that acceptance of deposits beyond this proportion shall be forbidden, except upon a proportionate increase of capital.

Second. That within five years the reserve of such banks shall be required to be equal to at least 12 per cent of the deposits, except in reserve cities, where it shall equal 15 per cent.

Third. That of such reserve held by county banks one-third may be deposited in reserve city banks and in central reserve city banks.

Fourth. That of such reserve one-third shall be deposited in the State reserve associations hereafter referred to.

Fifth. That there shall be organized in every State a State reserve association, in which the membership of all commercial banks, both National and State, shall be compulsory, as a condition of the continued existence of the national banks and of the privilege of continuing in interstate commerce as to the State banks.

Sixth. That each member bank shall deposit and forever maintain in such State reserve association at least one-third of its cash reserve. Such State reserve association shall have powers of supervision and regulation of its member banks, and also the power of rediscount of commercial paper, guaranteed by the member bank; the reserve of such member bank to stand as additional security for its guaranty.

Seventh. That a Federal reserve association at Washington shall be organized, whose members shall be the State reserve associations; that each of such member association shall deposit and forever maintain in the Federal reserve association one-third of the reserves deposited with it by the member banks; that such system shall also provide for the deposit in such Federal reserve association of Government funds, and also for the issue to it of Federal reserve notes.

Eighth. That power be given to such Federal reserve association to rediscount indorsed commercial paper held by any State reserve association and indorsed by it, and to use therefor the cash deposited by the member associations, the Government funds deposited with it, and the Federal reserve notes.

Mr. OWEN. I ask unanimous consent that House bill 7837 be now laid before the Senate.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, for furnishing an elastic currency, affording means of rediscounting commercial paper, and to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. HITCHCOCK obtained the floor.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. The Senator from Nebraska [Mr. HITCHCOCK] is entitled to the floor.

Mr. SMOOT. Will the Senator from Nebraska yield to me for just a moment?

Mr. HITCHCOCK. Certainly.

Mr. SMOOT. Mr. President, I notice that the amendment intended to be proposed by the Senator from Nebraska [Mr. HITCHCOCK] to H. R. 7837 has not been printed in bill form, I have had a number of requests for it, and have been unable to obtain a copy.

Therefore I ask, if the Senator does not object, that the usual number of copies of the bill H. R. 7837 be printed in bill form, showing the changes suggested by the amendments intended to be proposed by the Senator from Nebraska [Mr. HITCHCOCK].

There being no objection, the order was agreed to, and it was reduced to writing, as follows:

Ordered, That the usual number of H. R. 7837, "An act to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes," be printed in bill form, showing the changes suggested by the amendments intended to be proposed by the Senator from Nebraska [Mr. HITCHCOCK] and as shown in Senate Document 242, Sixty-third Congress, first session.

Mr. HITCHCOCK. Mr. President, we have now begun the consideration of what is likely to prove the most important legislation that has been before Congress for many years. It would be hard to overestimate the great changes in banking circles and in the business world which may be produced by the bill now before us. It affects primarily, of course, and directly the 25,000 banks of the United States, large and small. It affects their tens of thousands of stockholders; and it affects, also, their vast number of borrowers and their unnumbered depositors. It would be hard, indeed, to find any class of society, whether employers or employed, whether rich or poor, not affected by this bill. It affects also the credit of the United States. It affects our international relations through the channels of commerce, and it is likely to affect to a large degree our position in the finance of the civilized world.

I have felt, Mr. President, from the very start, that the possibilities of this legislation are too vast to justify hasty action; and I rejoice that after two months of thorough discussion and consideration in committee the pending bill is to be subjected to the acid test of a public debate in the Senate of the United States.

First, Mr. President, let me draw attention to the genesis of this bill, its evolution, and its present condition. Banking and currency reform has been the subject of agitation in the United States for many years. There has been a growing realization that our banking and currency system was lacking in certain respects. This sentiment has been in part academic, being led by political economists and publicists, but in part it has also been practical, having the anxious support of banking interests which have been pinched by several currency stringencies and shaken by several bank panics.

Possibly this condition of agitation and discussion might have continued for some time had it not been for the action of President Wilson in bringing the matter before Congress, thus making banking and currency reform an administration measure. In so doing, the President has merited and received the praise of the whole country. His wisdom and his courage in bringing this needed reform to a practical issue is to be highly commended. Nothing less than presidential influence would have made banking and currency reform possible for some time.

I yield this tribute to the President of the United States the more readily because I have frankly opposed and criticized him when he urged hasty action, which I deemed dangerous.

The bill before us reached the Senate on the 18th of September, having passed the other House after several months of discussion in committee, caucus, and in the full House. As I look upon it now, Mr. President, I am disposed to think it somewhat remarkable that the House succeeded in sending to the Senate so good a bill, considering the difficulties of the situation. In the first place, it was formative and original legislation. It dealt with a difficult problem which to some extent has puzzled the civilized world for many years. It was pushed through the House in a hurry. It is but fair to its authors to say that it represented much hard work, great study, and original thought. To some extent, of course, it was an adaptation of the European system of a central bank, with such modifications as political exigencies and American institutions made necessary.

But, Mr. President, excellent as the bill was, it contained some very serious defects and some fundamental errors. Had these been enacted as they came from the House most serious consequences might and probably would have followed. The best proof that the House bill needed revision is found in the fact that every member of the Banking and Currency Committee, which has examined the bill and considered it for two months, voted for changes which amount in the aggregate to more than one-half of the original measure.

I have caused an examination to be made of the bill as Senator OWEN and his section of the committee proposed to amend it. I find that 60 per cent of the bill as he now recommends it to the Senate is new or rewritten matter, while only 40 per cent of his bill appears as it originally passed the House. In other words, the bill he presents is 40 per cent old and 60 per cent amended. In the case of the report which I have had the honor to make on behalf of six members of the committee, 64 per cent is the new or revised matter, and 36 per cent is the original matter of the bill. Thus, Mr. President, do both wings of the committee concur quite closely as to the proportion of the bill which should be changed.

I say this with no spirit of criticism of the bill, for I have already stated my belief that considering the circumstances and the difficulties the bill which was passed by the House showed great constructive genius.

It is perhaps fortunate, Mr. President, that Senator OWEN'S section of the committee and the section of the committee which I have the honor to represent have to a considerable extent proposed amendments to the same sections. If it had chanced that we had selected different sections to amend, I fear there would be no part at all of the original House bill here for consideration. It then would have presented somewhat the spectacle that was presented by the farmer boy's trousers when he awoke in the morning to try them on. Upon going to bed at night he had asked his mother if she would not please cut off an inch of his new trousers, as they were too long. She had plead that she had too much to do. He had then asked his sister to do so, and she had some excuse. Then he had asked an aunt to do so, and she had an excuse. So finally the poor boy went to bed feeling that his trousers would still be too long in the morning. But one after another these members of the family relented, and out of sympathy they each cut off an inch of the boy's trousers; so that when he awoke to try them on in the morning they were very much shorter than they really ought to be. [Laughter.]

Such, I think, possibly would have been the condition of the House bill if it had not happened that Senator OWEN'S section of the committee and the section which I represent applied our amendments largely to the same portions of the bill.

Now, Mr. President, we come naturally to the points of difference between the section of the committee which I represent and the section represented by the chairman, Mr. OWEN. I shall not go into the circumstances or the causes which led up to a split of our committee. At the present time I shall content myself by testifying my esteem for and good feeling toward the chairman of the committee. I have not hesitated to differ with him in the consideration of the pending bill; but I desire in this public way to testify my appreciation of his great industry, his remarkable patience under irritating conditions, and his equally marked ability.

Mr. President, I do not think it a misfortune that this measure is brought to the Senate by an equally divided and equally balanced committee, presenting sharply defined issues. On the other hand, I think it a highly favorable start to make. I think the Senate will be in a position to consider the bill with better results in prospect than if we presented to you a unanimous and compromise report, because the Senate can now judge, after the two sides have been duly and properly presented, which of the differing views is the one most likely to lead to favorable results.

The first matter of difference between the two sections of the committee is in the number of reserve banks. The House bill proposed to divide the country into 12 districts, and to establish in each a regional reserve bank. The hearings had not progressed far when every member of the committee realized that to cut up the country into 12 districts and to establish 12 regional banks meant to defeat the very purpose of the legislation, which is to mobilize the banking reserves of the United States for the common use of all the land. So instead of 12 regional banks, as proposed by the House, Senator OWEN'S section of the committee has presented to you 8 regional banks, and the section of the committee which I represent presents to you for your consideration an amendment to establish 4 regional banks, and 4 only.

The agitation for banking and currency reform in the United States has always led us to look upon the countries of Europe, where bank panics are practically unknown, where the rate of interest has few fluctuations, where the discount of commercial paper is easy, and where the currency has an elastic character, expanding at the seasons of the year when business requires it and contracting as credits are reduced. Looking at those countries and taking, for instance, Great Britain, France, and Germany we find that each has a central bank, and we find that in each the deposits of all the banks are mobilized and concentrated into the central bank. We find a central reservoir in each of those countries, drawn upon at all times by all the banks in case of necessity. So if there is any lesson at all to be learned from the experience of European countries it is that the mobilization of reserves is perhaps the one greatest need above all others.

In Great Britain the Bank of England performs the function of a central bank. In that case it is mobilization and nothing else which enables the Bank of England to control the gold supply, to regulate the rate of interest, to supply the great joint-stock banks with necessary funds, and to perform generally the functions of a central bank. It has no note-issuing power except against gold.

We go to France, and we find a central bank, the Bank of France, under Government control; and in the Bank of France we find mobilized all the reserves of all the banks of France. We find the Bank of France endowed with the power to issue currency in case of need to banks that discount their paper with it.

We go to Germany, and we find a similar condition. The great Reichsbank of Germany, established almost within our own recollection, performs for Germany the functions which the Bank of France performs for France. It holds the reserves of the great banks of Germany, discounts their paper, supplies them with currency, hoards the gold in a central reservoir, controls the rate of interest, and influences the gold supply.

Now, I say if we are to profit by the experience of Europe we must in adopting a system adopt a system that will accomplish some of the things that are accomplished by those central banks.

Mr. President, I do not believe, and I doubt whether it can be shown, that it will be safe to attempt to mobilize the reserves of the banks of the United States with any number of reserve banks greater than 4. There is no more logical argument for 8 banks than for 10 or for 12, and there is an argument and a reason for 4.

In the first place, we have three great central reserve cities of the United States to-day—New York, Chicago, and St. Louis. In those cities are concentrated a large portion of the reserves of the American banks. Gradually there has grown up a banking custom and a commercial habit which have fixed those three great cities as the reserve centers. They have their tributary territory, and it is natural to establish in each of them a great reserve bank. The great distance of the Pacific coast cities renders it highly desirable, if not necessary, that a reserve bank should be established on the Pacific coast. San Francisco is the natural point.

Mr. President, no one claims that the aggregate capital of the reserve banks of the United States, however many we establish, can be or ought to be more than about $105,000,000. There is substantial agreement upon that point. Divide the $105,000,000 among four great reserve banks, and in the natural proportions of capital and surplus you will have a great reserve bank in the city of New York with about $50,000,000 capital and $250,000,000 of deposits, a bank so large and so powerful that it will compare favorably with any of the great banks of Europe, and large enough in international transactions to hold its own with any of the great institutions of the Old World.

Coming to Chicago, the natural division of the territory will make it possible to organize in Chicago a reserve bank with $20,000,000 of capital and $200,000,000 of deposits to serve a territory that is naturally tributary to Chicago.

Coming to St. Louis, and taking also again the banks organized in the St. Louis territory, we find that a bank can be organized there with about $16,000,000 capital and something like $100,000,000 of deposits.

Going farther, to the Pacific coast, it will be possible in San Francisco to organize a bank of $10,000,000 capital and about $65,000,000 deposits.

Now, can anyone tell what is to be gained by cutting up that territory into smaller units, demobilizing the reserves, when our purpose is to mobilize them?

Moreover, my friends in the South and the West and in the central part of the United States should remember this. New York constitutes an irreducible minimum. No matter how many reserve banks are organized in the United States, the reserve bank of New York City will not be less than $40,000,000 of capital and about $300,000,000 of deposits. The subdivision of the country into a larger number of reserve banks will simply result in magnifying New York and reducing to insignificance the rest of the reserve banks of the country.

I want to draw attention to a comparison of the practical operations of a large reserve bank, covering a great area of territory, and a small reserve bank in a limited region. Suppose, for instance, we should have a regional reserve system of eight banks, with one established at the city of New Orleans, in the heart of the cotton country. The time comes to move the cotton. An enormous sum of money is required. Every bank in that district would be affected by the same cause. Every bank in that district would want money at the same time, and almost immediately the balances in the reserve bank of New Orleans would be drawn down to the very minimum and still be unable to accommodate their customers, and that reserve bank would be compelled to apply to the Federal board for asset currency. What is true of New Orleans would be true of a bank in the corn country and a bank in the wheat country and a bank in the manufacturing center of New England.

On the other hand, if you have a great reserve bank at New York, having the territory extending down the Atlantic coast and possibly reaching New Orleans, or if you have a bank in St. Louis extending down through the great Mississippi Valley and reaching New Orleans, whichever way the Federal board might arrange it, when the banks of the cotton country at the proper season desired currency, desired a discount of their paper in order to serve their customers, they would procure it from the great reserves of the great bank in St. Louis or New York, at a season when the other customers were not demanding money, when there was an accumulation of reserves from the manufacturing regions or from the mining regions, which reserve bank would be able to discount the paper of the cotton-country banks simply by the use of money actually on hand.

So I say that the result of dividing this country into eight reserve districts instead of four would be to magnify the demand for currency, and any number of small reserve banks would be calling for currency of the Federal board here at Washington when there would be idle funds in other parts of the country. It is a matter of mobilization, the very thing we are attempting to escape by passing this legislation.

Now, Mr. President, I come to the next item of difference, which is the control of these reserve banks. The section of the committee to which I belong proposes that the Government of the United States, through its Federal board, shall select five of the directors of each reserve bank, and the bank of the district shall select four. We defend that upon the ground that this reserve bank is established as a public utility. It is not to make money; it is to protect the depositors against loss; and it is to give the borrowing public a stable and uniform low rate of interest.

We realize that the banking interests should be represented upon each board, because the banks have their reserves in these reserve banks, and by giving them the power to elect four members they will have sufficient representation of their own selection there to cooperate with five men chosen by the Federal board.

We think, Mr. President, that it is an unwise experiment to create a banking trust in the United States, and therefore we come to another point of difference with the section of the committee represented by Senator OWEN. He proposes, as the House proposed, although in a slightly modified form, that the reserve banks shall be owned by the individual banks. We think that would be a mistake for several reasons. We think it would tend to build up a banking trust in this country. We think, moreover, it would tend to endanger the success of this system, because there are many thousands of banks in the United States whose capital is now earning 10, 12, and 15 per cent, and they do not want to take one-tenth of their capital out of their own community and put it into a reserve bank where it is limited to earn 5 or 6 per cent and where it is beyond their control.

So we say that public ownership is desirable not only because it is a poor investment for the banks but because it is a good investment for the people of the United States. We propose that each bank shall be required to underwrite its proper share of the stock in the regional bank and for 60 days offer it to the public. We believe the public will take it. A 5 per cent investment in a Government institution of this sort, particularly if there are only four regional banks, will in all human probability prove a good one. Five per cent dividends can be earned with four regional reserve banks, and people who are receiving only 3 and 4 per cent, or possibly 5 per cent, on investments now will gladly take this stock, using sometimes also funds which they have hidden away. They will take this stock because it carries a 5 per cent cumulative dividend and also because it is made free from all taxes, National, State, and municipal. And so, Mr. President, we propose public ownership of these banks, which are public utilities, and Government control for the same reason.

I realize that if we are to have eight regional banks public ownership is almost impossible, because the puny and weak banks which would inevitably be organized if we had as many as eight would in all human probability not pay a dividend. They might not pay operating expenses.

The next point of difference to which I come is not so great, although I think it is important, and that is the matter of reserves. The section of the committee which I represent recommends that the reserves required of the individual banks of the country shall be 12 per cent for country banks and 15 per cent for city banks. We suggest that four-twelfths of the country-bank reserves shall be required to be placed in the reserve banks, four-twelfths kept in their own vaults, and the remaining four-twelfths of the reserves kept in either place, at the country bank's option. With city banks we recommend that the 15 per cent reserve shall be kept, six-fifteenths in the regional banks and the remainder in their vaults or in the regional banks, as they prefer.

The chief change, however, which we have recommended in this section relates to the transfer of reserves. It should be remembered that the reserves at the present time are deposited in 350 national banks, in 47 reserve, and 3 central reserve cities. This bill will require the transfer of those reserves into new banks. When the order of transfer comes it would be a serious matter for this country, and likely to produce a shock which might result in a panic, if the transfer is made so sudden or so rapid as to compel the banks to call their loans in order to get the money to make the transfer with, because these banks in central reserve cities have not kept the funds idle. They have loaned them out, and if they are to turn them over to the reserve banks they must call in their paper in order to get the money to turn over. So we have provided that the transfer from the country banks to the reserve banks shall cover a period of 24 months, one-fourth each 6 months, and we have provided for city banks a similar gradual transfer of 1 per cent each 6 months.

We believe that this will avoid the awful shock that would have been produced had the provisions of the House bill been carried out, a shock which the banks of the country have evidently dreaded, because they have been accumulating cash and calling loans for the purpose of meeting it, and have therefore produced a stringency which is already felt all over the United States.

The next item of difference to which I desire to call the attention of the Senate is in the discounting of paper for member banks. As the bill came from the House, everything was left optional with the regional bank. A bank might offer paper for discount, and the directors of the regional bank might say, "No; we will not take it." Another bank might present paper for discount, and the directors of the regional bank might take the whole portfolio. There was danger of gross discrimination on one side and great favoritism on the other. So, to guard against that, we have provided that every individual bank, as a matter of right, shall have the privilege of discounting eligible paper to the amount of its capital stock. That is a moderate discount. That is a discount which is common under the present practice to-day, an amount of discount paper equal to the amount of its capital stock. We have provided that no bank shall be permitted to discount paper at any one time in excess of twice its capital stock. Thus we have guarded against favoritism on one side and discrimination on the other, and we have left a period for the discretion of the board of directors. But in order to check undue discount we have provided that whenever a bank discounts more than the amount of its own capital stock it shall pay a higher rate of interest, which of itself is an automatic brake on excessive discounts.

There is, then, another difference, in the character of paper as provided in the House bill, which limited the maturity of paper to 90 days.

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Nebraska yield to the Senator from Kansas?

Mr. HITCHCOCK. I do.

Mr. BRISTOW. The Senator will remember that there is a provision also that where a bank desires to discount to an amount more than twice its capital stock by obtaining permission from the Federal board the regional bank can increase the discount beyond double the amount.

Mr. HITCHCOCK. Yes; that is an omission I made which I am glad the Senator from Kansas has called to my attention. It is possible that there might be an emergency—a run upon a bank might produce an emergency and cause a need for a great supply of funds. In that case the Federal board has power to order the reserve bank to discount additional amounts of paper for that bank so that it can meet the emergency.

Mr. SMOOT. Without a penalty?

Mr. HITCHCOCK. That is left discretionary with the board, and, I think, properly so. As the bill came from the other House the discount privileges for banks were practically so restricted and limited that they could be used only by the city banks; that is to say, they were limited to paper which had a maturity of 90 days. We found, by taking testimony, that there were thousands of banks in the South and in the far West that take paper for six months, and that they are just as much in need of discounts, and they are contributing as large a portion of their resources to this system as are the city banks. So we have provided that a limited amount of paper having a maturity of six months may be taken.

The six months' paper is just as legitimately a commercial paper as is the 90-day paper of the East, where the processes of

manufacturing and mercantile business are perfected in 90 days, and the man who gives his note for 90 days is able to pay it out of the proceeds which come from the sale of his property, his stock. In the West the man who buys cattle to feed during the winter months and borrows money for the purpose of buying them is not able to meet his paper in 90 days, but at the end of six months his paper is liquidated just as naturally, just as fully, and just as freely as is the mercantile and manufacturing paper of the East. The same conditions exist in the South. So we have provided in our bill that a limited amount of six months' paper may be taken, and that of the paper which a bank discounts not more than one-half of it may have a maturity exceeding 90 days.

On the rate of discount there is a considerable difference between the two wings of the committee. It is not a difference which appears in the bill, but it is a difference which will appear in operation. Each regional reserve bank may have a different rate of discount. If you have eight regional reserve banks it is inevitable that the regional reserve banks in the South, in the West, and in the Central West will have a higher rate of discount, because that section of country naturally commands a higher rate of discount. If you have only four regional reserve banks, you have only four rates of discount.

It is natural to suppose that the rate of discount in New York for the whole New York area, the rate of discount in Chicago for her whole area, and the rate of discount in St. Louis for her vast area will be very nearly the same rate of discount. San Francisco, by reason of entirely different surroundings, might have a higher rate of discount, but the bill as we propose it with only four regional banks will almost inevitably result in making a flat rate of discount for the whole country. The rate of discount in Chicago will not be higher to any degree than that in New York, and the rate of discount in St. Louis will not be higher than that in Chicago. So I say that, so far as the borrowing world is concerned, it is much better to have four regional banks with a practically flat rate of discount than to have the larger number with a higher rate of discount by reason of local conditions.

Now I come to a difference which is quite radical in the two bills.

Mr. BACON. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Georgia.

Mr. HITCHCOCK. I do.

Mr. BACON. I am not familiar with the bill and am asking for information not only as to the bill presented by the wing of the committee represented by the Senator from Nebraska, but generally as to the bill. Does this bill provide a rate of interest at which banks shall be required to loan to private borrowers?

Mr. HITCHCOCK. No.

Mr. BACON. I did not suppose the bill did so provide, of course, but I asked that question, having reference to the last statement made by the Senator as to the advantage to the people of my section of the larger regional banks. How would the rate of interest be to the advantage of the private borrower if it did not affect him?

Mr. HITCHCOCK I will illustrate that to the Senator. I am hurrying along and condensing a good deal, so that I have not elaborated. With a great regional bank, with enormous deposits and great reserves, it will be in the same position as is a central bank in Europe, able to buy paper on the very closest margin, to allow the bank which discounts the paper to do so at the least possible loss, and the bank, being able to practically turn its commercial paper into money at almost no sacrifice, will be able to extend its borrowing to its customers at a lower rate of interest in consequence, and always able to get additional funds to loan to its customers. It will not be compelled to say to John Smith when he comes, "We can not lend you this money because we are down to our reserves." It will be able to say, "Yes, we will take your paper if it is good." So the establishment of great reserve banks with enormous resources will mean in this country, as it has meant in Europe, not only a very low rate of interest, but a rate of interest which will have very few changes from season to season.

Now, Mr. President, I come to the matter of the division of the profits of these reserve banks. We feel confident in our section of the committee that, with four regional banks, they will not only pay operating expenses, earn 5 per cent dividends for stockholders, and accumulate the 20 per cent surplus which the bill requires, but that they will have profits over and above those requirements. Then we propose that one-half of those excess profits shall go into the Treasury of the United States as Uncle Sam's share for the use of his deposits. The other half we propose shall constitute a trust fund for the insurance of the depositors of the member banks which fail.

Mr. President, we are establishing this system for the purpose of preventing bank failures. We believe that it will largely accomplish that purpose; but occasionally there will be a bank which, either through mismanagement or misfortune, will go down. When it goes down, its depositors will be reimbursed out of this accumulated fund, a fund not raised by the taxation of other banks, but a fund produced by the use of the depositor's money in the reserve banks; and we believe that the establishment of this fund will add another note of confidence to this new system which we propose to establish and that it will render bank runs absolutely impossible.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Colorado?

Mr. HITCHCOCK. I do.

Mr. THOMAS. I consider that feature of this bill—I mean the one which is recommended by the Senator's section of the committee—as one of its most admirable and necessary features, but I should like to ask, in that connection, whether the bill makes proper provision, or any provision, for giving the reserve banks a lien upon the assets of the failed bank, the bank which suspends, for the purpose of reimbursing its guaranty fund? If not, it seems to me that that is a subject which should be treated by way of amendment to the bill before it is finally determined upon.

Mr. HITCHCOCK. Mr. President, in reply to the Senator from Colorado I will say that no such provision is made. Although the evidence may seem to be against us, we have really endeavored, so far as possible, to make as few changes in the House bill as might be. I think the suggestion of the Senator from Colorado, however, is worthy of consideration. I should like to see him elaborate it with some amendment for further consideration of the Senate when that section is reached. We merely endeavored to put into the bill the principle, to make use of a fund which was there, and any elaboration or perfection of the idea will be very welcome, I assure the Senator from Colorado.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. HITCHCOCK. I do.

Mr. SMOOT. In hurriedly reading the bill last night my attention was called to this particular subject. As I remember, there was to be no limit to the amount set aside for guaranteeing deposits, or, in other words, if the bank proceeds to run for 20 years and proves profitable—and I believe it will be profitable—one-half of all the actual gains made, after paying 5 per cent to the stockholders and after providing a 20 per cent reserve, may amount to an exceedingly large sum. Has the Senator thought of any limitation as to the amount collected for that purpose, or does he think it best to accumulate that vast sum of money and let it grow continually?

Mr. HITCHCOCK. No. Mr. President, the section of the committee cooperating with me considered that, as the Senator from Utah has stated, in the course of time this fund might grow to excessive proportions; and I think the Senator will find in the bill a provision that, if it becomes excessive, the reserve board may discontinue it until such time as its replenishment becomes necessary.

Mr. BRISTOW. Mr. President, if it will not interfere with the Senator's discussion, I will be glad to read the provision in the bill on that very point. On page 37 of the print which I have, in line 10, the amendment provides:

> When, in the judgment of the board, there has been accumulated in such depositors' insurance fund a sufficient sum fully to insure the payment of the depositors of insolvent member banks, the board shall have power to suspend the setting aside and accumulation of the said 37½ per cent of such earnings, and thereafter such 37½ per cent of such earnings shall be paid to the United States.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield further to the Senator from Utah?

Mr. HITCHCOCK. I do.

Mr. SMOOT. That covers the exact point. I missed it last night in reading the bill. I was trying to read all three bills by way of comparison and get all the provisions of the bills in my mind at once, as I thought we had little time to prepare for the discussion.

Mr. HITCHCOCK. Mr President, the next matter of difference relates to the issue of currency. We have proceeded naturally in the consideration of this matter up to a point where the reserve bank has loaned out of its cash reserve all that it can safely advance to the bank and there is still a demand of mem-

ber banks for the discount of paper. Then the House bill provided that the Federal reserve bank might apply to the Federal reserve board for currency, and it left it in the power of the Federal reserve board to grant or to refuse the application. Our bill makes a radical departure from that. We provide that when a Federal reserve bank in all respects complies with the law by maintaining a 45 per cent gold reserve against note issues, by maintaining a 35 per cent reserve against deposits, and by obeying the regulations of the Federal board and other provisions of the act, then when it presents eligible paper to the agent of the Government, the Federal reserve board shall issue the currency which the needs of the business require. That is necessary, because we have given the right to each bank to secure a discount of paper to a certain extent. It is necessary to carry out the purpose of this legislation. It is unheard of in France, for instance, that the Bank of France will refuse to discount eligible paper, and it is practically unheard of in Germany under the system of the Reichsbank. So, we have provided that the reserve board shall issue currency when it is required by the reserve banks.

It should be remembered that this is in entire harmony with the genius of this legislation. Each reserve bank is a part of the Government; each reserve bank is controlled by the Government; each reserve bank is a public utility and responding to the natural demands of business; and, so, when the time comes that it needs currency, we feel that it should secure it from the Federal reserve board, providing it deposits 100 per cent of good commercial paper and maintains the 45 per cent reserve of gold against the currency.

There is, however, a restraining power which the Federal reserve board in Washington holds. At any time it can order a Federal reserve bank to raise its rate of discount. That power enables it to put a restraining hand upon the reserve banks, which will then raise their rate of discount to member banks, and the member banks will raise it to their customers, and that will check the excessive inflation of bank credit.

Mr. President, there is another quite important change which we have made in this bill, to which I desire to call attention. As the bill came from the House it provided for a reserve against currency of 33⅓ per cent. In my opinion that is inadequate. It is inadequate if we judge by the great reserves kept by the banks of Europe; it is inadequate if we judge by the great gold reserve which we have been compelled to accumulate in the Treasury against our own greenbacks—42½ per cent. So we have provided that the reserve against currency shall be 45 per cent.

Mr. President, we have changed the provision regarding the redemption of the Federal reserve notes. As provided in the House bill, the new bank currency might be redeemed in gold or lawful money. We think that unsound; we think that this new currency should not be paid in anything but gold. We do not think that the Government of the United States in issuing its obligations, its promises to pay, should reserve the right to pay those obligations in other obligations. We do not think it should permit banks to reserve the right to pay their obligations in other obligations. So we have stricken "lawful money" from the section of the bill relating to the redemption of the new currency and have provided that it shall be paid in gold or gold certificates.

Senator OWEN'S bill is, in a measure, a compromise between the two. It provides that the new currency shall be redeemed in gold at the Treasury of the United States when presented, but that it may be redeemed in gold or lawful money at a reserve bank, a distinction which I am not able to understand, but which, it seems to me, might throw a great burden upon the Treasury of the United States.

We have also provided that the reserve banks must keep in the Treasury in gold at least 5 per cent of their note issues, to be used in redeeming notes that are presented there. We have also provided that the Secretary of the Treasury may compel them to increase this amount to 10 per cent if the needs of redemption require it.

In the matter of reserves against deposits we have made a change. The House bill provided for a reserve of 33⅓ per cent against deposits. We have raised that reserve to 35 per cent, but have taken away its rigid character by providing that reserve banks may permit their reserves to fall below 35 per cent down as low as 25 per cent in cases of emergency to give relief to member banks; but for each 2½ per cent deficiency the reserve banks are required to pay a tax or penalty of 1 per cent, which is to be in turn charged to the banks borrowing the money, which will be a check upon those banks.

In the matter of the refunding of bonds quite a radical change has been made in the House bill. We have outstanding at the present time some $750,000,000 of 2 per cent bonds, largely owned by the national banks of the country and by them deposited in the Treasury as security for the notes which the banks issue. It seems to be desired to retire this currency. At times it is considered redundant. It can not be retired under the present system. So Senator OWEN'S section of the committee and the one I represent have united in proposing a scheme different from that of the House bill. The one which my section of the committee has proposed provides that after the reserve banks are organized each reserve bank shall begin the purchase of 2 per cent bonds at par, with accrued interest. This is not done for the benefit of the banks. It is done to maintain the credit of the United States, for the reason that the 2 per cent bonds are now selling below par. Each bank is required to purchase each year an amount of the 2 per cent bonds not exceeding one-half of its capital stock. When it has purchased them it may present them to the Treasury of the United States and secure from the Treasury 3 per cent one-year gold notes. Those notes it may keep in its treasury as an investment. The 3 per cent interest will make the notes a fair investment for some of the surplus funds of the reserve banks. It is designed particularly, however, to give the reserve banks this great quantity of 3 per cent one-year gold notes so as to equip the reserve banks with a means of securing gold. It is an adaptation of the experience of European countries in the use of exchequer bills or treasury notes.

A reserve bank holding, say, fifty or seventy-five million dollars of these one-year 3 per cent gold Treasury notes finds that the gold supply of the country is becoming depleted. It finds that by reason of some great foreign war or some great emergency gold is being withdrawn from this country and that possibly some impairment may come to the banking interests of this country on that account. It can then sell those 3 per cent gold notes abroad or in this country and procure gold for them, which it will hold in its vaults or use in its business as a necessary basis of credit.

In one year those notes, of course, come due; but we provide in our bill that the reserve banks shall be under a contract with the Treasury to renew them year by year for 20 years if the Treasury desires. The Treasury may retire them from time to time, but if the Treasury desires to have them renewed the banks are under compulsion to renew them. They will constantly have use for them, for the purpose of selling them abroad to procure gold from time to time.

It may be said that this is substituting a 3 per cent note for a 2 per cent bond, and therefore may subject Congress to criticism. I have been a little slow to come to any action of that sort, but I have been reconciled to it not only by the fact that it is useful to control the gold supply of the country, but also by the fact that the Government of the United States gets a large part of the net profits which these banks are to make, and those profits act as an offset to the 1 per cent additional interest on the notes.

Mr. President, I have covered this subject somewhat hastily——

Mr. BACON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Georgia?

Mr. HITCHCOCK. Certainly.

Mr. BACON. I understood the Senator to say that the bond matter, about which he has just spoken, is one upon which both wings of the committee agree. Is that true?

Mr. HITCHCOCK. There is agreement in the purpose, but in carrying out that purpose there is considerable difference between the two wings of the committee. I shall not undertake at this time to explain the plan proposed by the other wing of the committee. I am not entirely familiar with it, and hardly feel competent to do so. We think, however, that our plan of proceeding through the reserve banks has the approval of all the better practice. Great Britain encountered some difficulties after the Boer War through selling directly her one-year treasury or exchequer notes. We think it would be a mistake for the Treasury of the United States to undertake to discount its own paper. A bank can do it, and can suffer the loss of one-half of 1 per cent or 1 per cent at times in order to get gold; but it would not be proper for the Treasury of the United States to do it.

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Georgia?

Mr. HITCHCOCK. I do.

Mr. SMITH of Georgia. The Senator says these notes would run for one year?

Mr. HITCHCOCK. One year.

Mr. SMITH of Georgia. Would the effect of that be, as rapidly as the bonds are purchased by the regional banks, to require the Government to redeem them in 12 months?

Mr. HITCHCOCK. No; the regional banks first buy the 2 per cent bonds, and the national-bank currency is proportionately retired. The regional banks then can use these 2 per cent bonds and issue currency against them, or it can present them at the Treasury and secure one-year 3 per cent notes. The 2 per cent bonds in that event are canceled, and the one-year 3 per cent Treasury notes then are in the hands of the reserve bank. It will hold them there as an investment, except at such times as it needs to procure gold to strengthen its reserves. At each maturity each year the bank is under compulsion to renew the note for another year with the Treasury or to accept a new note for 20 years. So the Treasury of the United States has a contract with the reserve banks to renew the notes.

Mr. SMITH of Georgia. It was the necessity for such a provision as the one which the Senator has just mentioned, and which he had not mentioned before, that caused my question. Under your provision the 2 per cent bonds can be used by the regional bank as a basis for the issuance of regional or reserve notes?

Mr. HITCHCOCK. For the issuance of reserve notes; yes.

Mr. President, I have gone over this matter rather hastily, and in so doing I have necessarily omitted a good deal. I thank the Senate very deeply for the attention it has given me.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from North Dakota?

Mr. HITCHCOCK. I do.

Mr. McCUMBER. Is the Senator tired, so that he does not feel like answering a question or two?

Mr. HITCHCOCK. Oh, no; not at all.

Mr. McCUMBER. If not, I wish to propound one or two questions.

I should like to know any good reason for compelling a bank, or even the public, to invest in one of these regional banks, where the assurance of profit is never greater than 5 or 6 per cent, and to take all the risk, while the Government, which does not put one penny into the institution, is to get everything there is in the way of profit above 5 or 6 per cent. In addition to giving to those who are intrusted with the direction of one of these banks the inducement to make it a good, paying institution, why should not those who are compelled to invest in it under one bill, or invited to invest in it under the other bill, if they take all of the risk, at least have some of the benefits of getting a profit greater than 5 or 6 per cent?

I appreciate that in the bill the Senator has presented a provision is inserted whereby a certain portion of these notes will be set aside for the guaranty of the deposits in the particular bank investing, and I think certainly that is a very good provision. If that is done for safety, however, what reason can the Senator give for not allowing the bank at least to have the benefit, above that which is reserved for its own protection, of any profits in excess of 5 per cent, if the bank should earn more than 5 per cent?

Mr. HITCHCOCK. That is a rather long and somewhat complicated question. I can assure the Senator that it is far from my purpose to compel anybody to buy this stock. In fact, one of my chief objections to the bill as it came from the House was that it practically seized 20 per cent of the capital of every national bank in the United States, requiring one-half of it to be paid in cash, and compelling that bank to give up its charter and lose a large share of its bonds unless it did so. For that reason we have removed the compulsory feature. We do require the national banks to underwrite this stock and require and permit them to take such as the public fails to take, but we are confident the public will take it all.

Mr. McCUMBER. But if the public does not take it the bank is compelled to take it; is it not?

Mr. HITCHCOCK. Yes; it is required to take it, but it is not required to impound it. It is permitted to sell it, which is not possible under either the House bill or the bill presented by Senator OWEN. That is a defect which I think is very obvious, for a bank having this stock among its assets might, by reason of the demands of business, desire to sell it and realize on it; but under the House bill and under Senator OWEN'S bill it is impounded and is not a liquid asset of the bank.

As far as the voluntary subscribers to the stock are concerned, they are merely the small investors, who are glad to have a 5 per cent dividend. I think if a higher rate of dividend were permitted the stock would go to a premium, and no good could be attained by that. It would become a speculative proposition. I am satisfied the stock will be oversubscribed if issued on a 5 per cent cumulative basis. We have provided for public ownership of the stock and Government control of the banks, and in that way have freed the thousands of banks in the South and West who do not want to be compelled to invest their capital in this way.

I may say, furthermore, that there is another matter which I omitted to mention. One of the great defects of our national banking system to-day is that it has an inadequate capital. Every bank is trying to do as large an amount of business as possible on a small amount of capital, so as to have as high dividends as possible. The result of that process over a period of years has been a constantly growing disparity between capital and deposits. To take 10 per cent of the capital, or 6 per cent of the surplus and capital, away from those banks and put it into the reserve banks is to increase the evil; whereas if we sell this stock to the public we bring into the banking world $100,000,000 of new capital, which of itself will serve to strengthen the system and render the margin of safety for depositors greater than ever.

Mr. GRONNA. Mr. President, I should like to ask the Senator a question in connection with the question propounded by my colleague relative to section 7. As I understand, the provisions of section 7 in no way guarantee the deposits. They simply provide that when surplus and profits go above a certain rate the excess shall be set aside for the purpose of paying depositors, but in no way does the bill guarantee deposits. Am I correct?

Mr. HITCHCOCK. That is correct.

Mr. McCUMBER. Mr. President, I do not think the Senator from Nebraska fully answered the question I asked. I assume that the one I asked him was rather long; but the particular feature of the question was this: What justification is there for the Government, which puts in no capital, which invests nothing, sharing in the profits, as against the public, which does put its money into the enterprise and takes all of the chances, having the benefits of such profits as may arise?

Mr. HITCHCOCK. I did overlook that branch of the Senator's question. The justification of it is that Government deposits, running from $150,000,000 to possibly $250,000,000, will be placed in these banks and given to the business world for use, just as the reserves of the banks are used.

Mr. McCUMBER. Without any interest being paid?

Mr. HITCHCOCK. Without any interest being paid.

Mr. SHAFROTH. Mr. President, in proposing a banking and currency measure such as is presented to the Senate the natural inquiry arises, What is the necessity for this legislation?

While our banking system has many admirable features, there are yet certain defects which call for speedy and positive action. We have at the present time 7,500 national banks and about 18,000 State banks and trust companies. In the ordinary transactions of banking business they are independent, competing with each other in making loans and in fixing the rates of interest. This independent competitive banking system is one result of the liberal provisions of the law under which a bank can be organized and incorporated by five or more persons, without any restrictions or qualifications whatever upon the incorporators. These 25,000 banks constitute the people's banks and afford splendid competition in supplying accommodations for merchants, farmers, manufacturers, and others engaged in commerce.

Any number of persons dissatisfied with banking conditions in any community have a perfect right to organize a competing bank either under the national-bank act or under the State laws. Thus they form the people's banks, both State and National, of this country.

While independent banks such as now exist are ample to meet the demands of commerce in ordinary times, yet there come periods in the history of every nation when panics occur and depositors, without reason, withdraw their moneys from these institutions. The inability of banks at such times to meet strains upon their cash reserves arises from the fact that each is then standing on its own bottom; that is, there is no place to which the bank in trouble can go to demand and secure cash for its commercial paper. The law's requirements as to reserves are totally inadequate and cause what is termed the pyramiding of reserves.

RESERVES OF NATIONAL BANKS.

Under the national-bank act the country bank must keep 15 per cent of its deposits as reserves, of which 6 per cent must be in its own vaults and 9 per cent in a bank or banks of the 47 reserve cities of the Union. Each of the 315 national banks in the 47 reserve cities is required by law to keep a reserve of 25 per cent of its deposits, one-half of which is to be in cash in its own vaults and one-half to be kept in the vaults of a bank or banks among the 52 national banks of the three central reserve

cities of New York, Chicago, and St. Louis. Each of the national banks of the central reserve cities is required to keep in cash in its own vaults 25 per cent of its deposits. The reserves deposited in the reserve city banks and central reserve city banks are treated under the law as simply deposits and not as reserves. It can be readily seen that the 9 per cent of the deposits of the country bank deposited in a reserve city bank has behind it in the reserve city bank only a reserve in cash of 12½ per cent of the same, or, in other words, only one-eighth of the amount, and the credit portion of that same reserve when transferred to the central reserve city bank is only one-fourth of the one-eighth, namely, one thirty-second, of the same. Upon these reserves, of course, is built an enormous amount of credits.

Mr. John B. Forgan, president of the First National Bank of Chicago, Ill., in his testimony before the Senate Committee on Banking and Currency, stated that his bank built credits to the extent of 8 to 1 upon capital and surplus; that is, that it loaned out eight times as much money of its deposits as its capital and surplus. In many banks the credits created are 10 to 1 and 12 to 1.

These reserves in ordinary times are amply sufficient to maintain a good banking system, but in times of panic they become totally inadequate, a condition which is accelerated by the policy which has been pursued of discouraging the use of the reserves, except to a very small per cent, in meeting demands of depositors and in prohibiting the making of any new loans when the reserves are to any extent below the percentage required. This policy and prohibition when money becomes tight increases the stringency and helps to precipitate the panic. These banks being independent, knowing that each must stand on its own bottom, begin to withdraw their credits in order to meet the threatening storm, and that compels every other bank to do the same. Thus the banks, in order to prevent their own suspension, withdraw their loans and make credits so tight that people owing money sacrifice their collateral and property in order to pay their debts. This, of course, produces an enormous depreciation in the value of all property, especially of stocks and bonds hypothecated as collateral to secure the loans. This condition is due to a very serious defect in our national banking system and is remedied in my judgment by the provisions of the pending bill.

LOSSES FROM PANICS.

The panic of 1893 was one of the most disastrous that ever occurred in the history of the world. Thousands of banks that were perfectly solvent and able in time to meet all of their liabilities closed their doors, but they did not have and could not get the money with which to meet the checks of their depositors.

When money becomes tight and there is a strain upon the banks that knowledge is acquired immediately by the people, and unreasoning fear that they may lose the money they have on deposit seizes them. Consequently, any little rumor, though totally unfounded, may precipitate a run upon a bank.

A story of the panic of 1893 well illustrates the hair-trigger tension of the public mind at that time. In a little town out West a tinner was fixing the roof of a one-story building in which the First National Bank of that town was doing business. A gust of wind blew his hat from his head, and in endeavoring to recover it before it went off the roof he pursued it rapidly. The wag of the town happened to be standing on an opposite corner and, seeing the incident, said in a very loud voice: "There is a run on the First National Bank." There were many people on the street who heard his words, but when they looked at the bank the tinner had caught his hat and was standing still, and hence the humorous significance of the remark was not appreciated. The word was spread from one to the other, and in less than two hours' time there was a line of depositors extending for more than a block making demands for their money at the bank.

The losses to depositors from bank failures have been very light, not exceeding one-fortieth of 1 per cent per annum, and that shows the unreasonableness of people in making runs upon banks, but the losses otherwise from panics have been tremendous.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to his colleague?

Mr. SHAFROTH. I do.

Mr. THOMAS. I should like to inquire of the Senator if the amount of one-fortieth of 1 per cent is based upon the estimate of deposits or the capital?

Mr. SHAFROTH. I think on deposits. It represents a loss on the average to the depositors of one-fortieth of 1 per cent. When banks fail absolutely the loss is sometimes great, but taking the entire amount of deposits in the United States and estimating the losses that have occurred for a series of years, the losses, not of the State banks but the National banks, have been only one-fortieth of 1 per cent.

Mr. SMOOT. The losses from State banks have been no higher.

Mr. SHAFROTH. The Senator from Utah says the losses from State-bank failures have been no higher, and I presume that is correct.

It is stated that there resulted from the panic of 1907 a destruction of values in stocks, bonds, securities, and other property that would measure greater than a loss resulting from the burning and destroying of every particle of property and crops upon a strip of land 100 miles wide extending from the Atlantic to the Pacific Ocean.

UNIVERSAL DEMAND FOR REFORM.

No solvent bank can meet the demands of all of its depositors if presented within a few days, because the very life of banking is the lending out by the bank at interest of most of its deposits. Any bank which keeps in cash in its own vaults all of its deposits would soon become insolvent by reason of having no profits with which to meet its running expenses, and it would be of very little, if any, benefit to the community in facilitating its commerce and accommodating its people.

It is for these reasons that there has been a universal demand that our banking system be reformed and these defects therein remedied.

The Secretary of the Treasury, Hon. Franklin MacVeagh, in his annual report, December 2, 1912, used this language:

> One of the most important facts in connection with banking and currency legislation is its urgency. As long as our banking and currency system remains as it is the immeasurable disaster of a panic will remain a possibility. The system under which we are living not only will not prevent a panic, but after a certain point in the generation of panic conditions is reached will make it inevitable. So that as long as the financial system created by our Federal laws remains unchanged and unreformed the Government will be exclusively responsible for the commercial, industrial, and social disasters which flow from panics. This responsibility is a fixed one. It is unavoidable, and ought to be frankly recognized and acknowledged. The people are helpless. The character of this responsibility is better understood when it is realized that the effects of financial panics are not at all confined to the banks and the larger business world. A panic such as that of 1907, or a lesser panic, reaches, directly or indirectly, every town and hamlet of the country and every family and individual. It nationalizes itself long before it has gone far, and its interruption of the business movements, large and small, its fracture of the organization under which commercial and industrial life go on, and the resulting social suffering are prolonged into years. These facts intensify the significance of the delays and postponements of the Government.

DEFECTS IN OUR CURRENCY SYSTEM.

The defects in our present currency system are also very plain and clear. While at times we have sufficient money to meet the demands of commerce and of the banks, yet at other times, and particularly in times of panic, there is total inadequacy of the quantity of money legitimately demanded. That arises from the fact that our currency is all fixed in amount and has no quality of elasticity in it whatever. The circulating medium is practically the same amount each year, whether it is during a dull season or the active season when crops are being moved. During the seasons of each year there is a difference in the demand for money amounting to several hundred millions of dollars.

Our national-bank currency is especially defective, because it can not serve as reserve money of national banks, and in my judgment it should be supplanted by currency that could be used as reserve money. This defect is manifested in the redemptions of national-bank currency in lawful money, which are continually being made at the Treasury at Washington. There was expressed by the national banks during the year ending October 31, 1913, $683,431,000 of national-bank notes to the Treasury and redemption thereof made in lawful money. The obligation of each national bank to redeem its own notes at its counter consequently caused the United States Treasurer to separate these national-bank notes into piles against each national bank and to send them to the national bank that issued them for repayment of the amount in lawful money to the Federal Treasury. The total amount of national-bank notes outstanding October 31, 1913, was $758,825,471.

When we realize that the sum of $2,000,000 in national-bank notes each day is expressed into the City of Washington for redemption and nearly $2,000,000 of legal-tender money is shipped back to the banks each day you can readily see that there is being suffered an enormous loss in express charges and in interest upon the money during transmission, besides the hazard of loss from wrecks, fires, and train robberies.

For these reasons there should be substituted for our national-bank notes a currency which can be used as bank reserves, and there should be added an elastic currency which will expand or contract in compliance with the demands of commerce. As remedies for these defects in our banking and currency system the bill before the Senate is presented.

EIGHT FEDERAL RESERVE BANKS.

The pending measure provides for the establishment of eight Federal reserve banks in eight districts, each to be located at a city convenient to the banks of its district.

Many witnesses before the Banking and Currency Committee have objected to the number of such banks, many preferring one central bank. The Democratic platform upon which the present administration was elected declared against a central bank. The following language was used:

> We oppose the so-called Aldrich bill or the establishment of a central bank.

It is therefore useless to argue for a central bank during this administration.

The Democratic Party is opposed to a central bank, and well it should be, because of the fact that it would concentrate in one place such a combination of wealth as could be used to the disadvantage of the entire people of the United States.

We find that, as the result of combinations, great injury has been done to gigantic enterprises in the United States, which have been thereby permanently halted in their growth. The Pujo committee, as the chairman of this committee has said, investigated the matter, and found that there was a combination among the great banks of New York City interested in railway and industrial corporations that prevented competing corporations from undertaking most excellent enterprises in the United States.

Mr. OWEN. I wish to ask the Senator from Colorado if he did not have in his own State, in the Moffat road, a very striking example of that.

Mr. SHAFROTH. I do know that, as far as the Moffat road was concerned, there was a continual effort in New York for five or six years to get a loan upon which the road could be financed, and that Mr. Moffat put some $9,000,000 of his own money in the enterprise, and he was not able to accomplish the end desired.

Mr. THOMAS. I would like to state, if my colleague will permit me, that the promoters of the Moffat road, so called, not only made efforts in the city of New York to finance that enterprise, but also made them in the older countries of the world, and in several instances were successful up to the point of the formal execution of a contract, when some mysterious and invisible influence always intercepted the arrangement about the time it was to be consummated. The Union Pacific Co. on the north and the Rio Grande and Gould interests on the south, through their banking connections all over the world, were the upper and nether millstones that ground the promoters of that enterprise to powder between them, in consequence of which the original promoter of the road, whose name it bears, beginning with an amount of wealth that would easily make him the wealthiest man in the State of Colorado, ended in virtual bankruptcy.

Mr. SHAFROTH. That statement of what occurred was current in Colorado. Of course I know nothing about the exact facts, but the general impression there is as my colleague has stated.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Nebraska?

Mr. SHAFROTH. I yield.

Mr. NORRIS. I would like to inquire of the Senator if there is anything in either one of the bills now before the Senate that would meet that kind of a situation?

Mr. SHAFROTH. I think so. I will discuss that as I proceed.

SINISTER EFFECT OF COMBINATION.

Now, what are the difficulties under those circumstances? As my colleague has suggested, on account of this great combination of banks, with their interlocking directors controlling great industrial and commercial corporations, they can easily turn down an application that is made for funds to inaugurate a new enterprise that would come in competition with theirs; and the difficulty is not only that it is turned down, but whenever one appears who is willing to finance an enterprise of that kind he uses the argument that it has been turned down by the big bankers as a reason for extorting an enormous commission for his services in financing the same. Upon an application for, say $30,000,000, necessary to construct the enterprise the answer of the financiers is, in substance: "We will make you a loan of the $30,000,000 to be used in the construction of the enterprise, take bonds secured by mortgage upon the same, but we will ask you to issue $60,000,000 of stock, and we will divide the stock between you and us." The result is that most of these companies having the feature of a utility corporation, such as a railroad, extract from the people dividends to be paid on the full $60,000,000 of capital, when the total construction cost very little more than $30,000,000, on which the people also pay the interest.

That is the great injury to the people that the concentration of wealth in one place produces. The people of New York are no worse than the people anywhere else would be where such an enormous amount of money might be concentrated.

Mr. SMOOT. Does the Senator believe that if we had one great central bank, whose stock was subscribed by the people of the United States, whose affairs were governed by a board appointed by the President of the United States, such a thing could happen through the organization of such a bank as he has just been describing?

Mr. SHAFROTH. Of course, safeguards may be thrown around it, but where you have concentrated in one place enormous amounts of money you must accept the fact that influences will naturally be sought for the use of that money, and this in all likelihood will to some extent be accomplished.

Mr. SMOOT. Mr. President, I understand the whole theory of this proposed law is to provide means to relieve the business interests of this country in times of distress——

Mr. SHAFROTH. Yes, sir.

Mr. SMOOT. And to prevent panics; but in order to do that there has got to be a mobilization of the resources of this Government.

Mr. SHAFROTH. Yes, sir.

Mr. SMOOT. It does seem to me, Mr. President, the proper way to do that would be to have one great, strong central institution, the same as all foreign countries have to-day.

Mr. SHAFROTH. We have tried that twice, and each time the people of the United States have condemned it.

Mr. SMOOT. No, Mr. President; we did not try that kind of a bank. I am fully aware of the kind of Government banks that we have had in the past and the way that they were controlled and managed; but they were not organized the way that I would have a great central institution organized, managed, or controlled by the Government of the United States to-day.

Mr. SHAFROTH. But aside from that, a number of Federal reserve banks will be vastly more convenient than one such bank.

One of the objects of this bill is to require the banks of the different sections of the country to keep their reserves in a Federal reserve bank, located in an easily accessible city of the district.

ACCESSIBILITY A PRIME REQUISITE.

As one witness stated, the Federal reserve bank should be at a distance of not to exceed one night's run from each of the banks of that district, the purpose being such that at the closing hour of the bank its president could determine whether there would likely be a run upon its deposits next day. He could then gather the 30, 60, and 90 day commercial paper he wanted cashed, take the train for the city where the Federal reserve bank is situate, and be able to wire by the time of the opening of his bank that he had cashed sufficient securities to meet the demands of all depositors. That would be a great advantage over attempting to cash securities at one central bank located several days' run from many of the interior banks. Nor could branch banks answer that purpose as well. Branch banks are always subservient to the will and policy of the central bank, and there are always communications and hesitations as to transactions of the branch bank which produce delays. Such delays in times of emergency might be fatal to the member bank. The policy of a central bank might be against lending money in some section of the country, but the policy of a reserve bank will always be loyal to its district.

Accommodations are more certainly and speedily given on account of personal acquaintance. Such personal acquaintance would likely exist among the presidents of banks of a district and the directors of the Federal reserve bank of that district. There is not one chance in a hundred that a country banker would know a director of a central reserve bank, located in New York City or Washington, in one of which places in all likelihood it would be established. It seems to me country bankers everywhere would prefer that the concentration of their reserves should be near them instead of far from them.

Another reason why there should be eight or more Federal reserve banks instead of one central institution, as advocated by the Senator from Utah, is to prevent the money belonging to the 25,000 banks throughout the country being transferred to and concentrated in New York City, as it is at present.

The concentration of reserves in that city produces, as I have stated, a surplus of many hundreds of millions of dollars of deposits there, which can not be used in making ordinary loans, as such loans can not be realized upon immediately to meet drafts by country banks upon their deposits. Hence

these hundreds of millions are loaned to stock brokers for gambling upon the exchange. The money so loaned by the New York banks is secured by the stock purchased by the broker and is designated a "call loan," because it can be called by the bank any day, and if not paid the collateral may be sold immediately. The rate of interest is usually very low, 2 or 3 per cent per annum, but being influenced by gambling transactions it sometimes rises to 20 per cent and 100 per cent, and at the time of the attempted corner on Northern Pacific stock it rose on one day to 1,000 per cent per annum.

The gambling which results from the ability of brokers to get call loans at low rates of interest is most tempting and demoralizing to our people. The ticker works not only in New York City, but in every city of 50,000 population in the United States. Fortunes are made or swept away in a few days. If made, the sudden success unfits the winner for his ordinary business and leads to extravagance in living, which produces dissatisfaction if it can not be maintained. Loss of fortune, of course, leads to embezzlement, forgery, and suicide.

The New York bankers realize this and want to abandon that line of business, but they contend they can not, because call loans are the only liquid assets they have, and that, being the custodians of so much reserve money of other banks, which may be demanded at any moment, they must have call loans, which they can collect on short notice. They welcome the establishment of a reserve bank or banks which will discount their 30, 60, and 90 day paper on presentation and thus dispense with the necessity of making call loans. They generally prefer one central reserve bank, or as few a number as can be obtained, but they desire the opportunity of getting out of the call-loan business.

Mr. Vanderlip, president of the National City Bank of New York, the greatest institution of that kind in the world, stated before the Banking and Currency Committee that his bank would lose in deposits by the Owen-Glass bill $50,000,000, but that, nevertheless, he would welcome its passage, with modifications, if thereby it could get out of the call-loan business; that on account of the Federal reserve bank cashing its commercial paper it would enable his bank, with fewer deposits, to lend money in commercial transactions, which pay a larger rate of interest, and thus permit a recoup, to a large extent, of losses of deposits.

PERSONAL CONTACT DESIRABLE FACTOR.

While no one can say that eight Federal reserve banks is the exact number which should be established, yet it is safe to say that such a number would cause the directors of each to come in personal contact with the officers of country banks and thereby serve their needs very satisfactorily. It would keep the reserve money that belongs to the banks of each district at home and thus be more responsive to the demands of the people of such district.

Of course New York City is and always will be the great financial center of this country, and banks all over the United States will keep some money with their correspondents there in order to meet their drafts, but New York should not complain if the country banks should keep part of their money in reserve banks near home. It unquestionably is to the best interest of the entire country.

As to whether we should have one or four reserve banks, while eight would be far superior to four. The Senator from Nebraska [Mr. HITCHCOCK] has said the four would be likely to be located at New York, at Chicago, at St. Louis, and at San Francisco. That broad stretch of territory extending from St. Louis to San Francisco, covering 2,000 miles, would not be accorded such facilities that the banks in that region would be able to secure relief within the time when it might be needed.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Missouri?

Mr. SHAFROTH. I do.

Mr. REED. I do not rise for the purpose of engaging in any debate or of opposing what the Senator is saying, but I should like to ask him, in view of his last statement, under a system of eight regional banks where he expects any bank to be located west of St. Louis except at San Francisco?

Mr. SHAFROTH. In answer to the Senator I will say——

Mr. REED. And what reason he has to expect a bank to be located west of St. Louis, except at San Francisco?

Mr. SHAFROTH. In answer to the Senator, I will say that he has the right to guess where these banks will be located just as well as I. Under the bill of the Senator from Oklahoma the matter is left to a commission consisting of the Secretary of the Treasury and the two members of the Federal reserve board, and what they will determine nobody can foresee. Consequently, it is nothing but mere speculation as to what cities will get the reserve banks. It is better that they should not be determined in this bill, because an incessant wrangle would arise among us as to whether one section or another should get one. It is left to an independent body, and they will establish them according to where they think the needs of commerce demand.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield further to the Senator from Missouri?

Mr. SHAFROTH. I do.

Mr. REED. I do not want for a moment to be misunderstood in my object. Nevertheless, I do not think that the Senator appreciated my thought, at least in asking the question. He states now that they would be located where the board saw fit to locate them, and that he can not, of course, look into the future; but the Senator does know the number of banks, where they are located, the amount of banking capital, the centers of commerce and trade, and the course of the streams of trade, and I wanted to ask him if he could tell us any city west of St. Louis, excluding San Francisco, that would by reason of these conditions be entitled to receive, or likely to receive, the location of a regional bank?

Mr. SHAFROTH. I do not know. I must say, however, that if there are to be only four reserve banks, I think that St. Louis would be too close to Chicago, and I would prefer that the fourth bank should be in Kansas City instead of St. Louis; but if there are to be eight banks I can not tell where they will be located; and on that account the Senator from Missouri is just as much entitled to guess at it as I am; and as I am not going to make a guess, he can.

Under this system, if we were to have only four Federal reserve banks, the great South would not have one and a bank in Florida would have to get its discounts in Washington or in New York City. That would also be true, of course, if there were only one Federal reserve bank. That being the case, the Florida banker would have to go a distance of 1,500 or 1,800 miles in order to get discounts, and the banker from Texas would obviously have to go to St. Louis, a distance from some parts of Texas of more than 1,500 miles.

Mr. WEEKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Massachusetts?

Mr. SHAFROTH. I do.

Mr. WEEKS. I wish to ask the Senator if he does not recognize the fact that it would be possible to establish branches of the reserve banks and that very much of the business done at a distance will be done through the branches; so that his statement that it will be necessary to go 1,500 or 2,000 miles is not strictly correct?

BRANCH BANKS INADEQUATE.

Mr. SHAFROTH. Oh, I have said that you can have branch banks. It is true that you can obviate the inconvenience to some extent, but I have said the greatest asset in the way of procuring a loan is personal acquaintance with the directors of the reserve bank, and consequently when you go to one of the reserve banks and happen to know personally men on the directorate you are apt to get your discounts without question; but if you go to a branch bank, which is always subservient to the policy of the central bank, the president of that central bank might say to the agent in charge of the branch bank: "Oh, we need reserves here, and we need discounts over in this end of the country most; be careful about it; discount just as little as you can." And then there would follow the red tape that is necessary in communications between the agent and the principal. Such a system of branch banks does not answer the purpose as does a Federal reserve bank with a directorate that is independent, working upon its own footing in the interest of the very community where the stringency occurs. Under those circumstances a system of branch banks is not to be compared with a system establishing a number of Federal reserve banks.

It has been said that the European banks are central banks. Yes; but there are in Europe, which is no larger than the United States, fully 25 central banks instead of merely eight, and consequently in considering the illustration which is given of having a central bank for each nation you must take into account the territory and the area that would be supplied by central reserve banks. On that account it seems to me the fact that Germany has a central reserve bank, that Belgium has a central reserve bank, that Holland has a reserve bank, is simply illustrative of the fact that it is wise to have a number of reserve banks, because those banks are only within a few hours' ride of every part and portion of their territory, and every one of those banks is responsive to local conditions. When you have a bank that is independent, a Federal reserve bank, knowing and watching the interest of every portion of the district over which it has jurisdiction, you can readily see that it will extend its power of discount and will aid the banks under circumstances when a central reserve bank, whose officers perhaps are not known or likely to be known by any of the presidents of the local banks, would refuse such assistance. No one would think of suggesting one central bank for all Europe, although its territory is no greater than that of the United States.

We have in this country 40 per cent of the banking capital of the world, and when you compare the balance of the European banks and divide it among their 25 or 30 banks you will readily see that we are not asking for enough banks in the United States in order to do the business of this country well and in order to furnish accommodations to the country banks whenever needed.

It seems to me, therefore, that the position taken by the Senator from Utah [Mr. SMOOT] and by the Senator from Nebraska [Mr. HITCHCOCK] that this great mobilization should take place in one bank or in a few banks is not well taken. The Senator from Nebraska states that if New Orleans needed money at a certain season of the year its limited bank, if it were to have a Federal reserve bank in any one of six or eight districts, would be subjected to such a demand that it would exhaust the amount of reserves which that bank had, and the result would be that it would have to apply to the Federal reserve board for currency; that is, new currency to be issued.

Our bill does not provide that it should necessarily be an application for currency, because the Federal reserve board, if it finds that there is a surplus of funds in one Federal reserve bank and a small quantity in another, has a right to order that that Federal reserve bank, where it has a surplus of funds, shall rediscount the paper of the Federal reserve bank of the weak district, and it is perfectly safe to do so. When the districts are smaller it must be remembered the demands for rediscounts will be less. The New Orleans Federal reserve bank, while possessing less capital and reserves than that of New York City, will be just as strong, because the demands upon it will be proportionately smaller.

CONTROL OF FEDERAL RESERVE BANKS.

The Senator from Nebraska [Mr. HITCHCOCK] has said that the second great difference between the two sections of the Committee on Banking and Currency is as to the control of these Federal reserve banks. That is true.

The Owen bill provides that the bankers shall have representation on each of the boards of directors of the several Federal reserve banks. Three of the nine directors shall be selected by and represent the stock-holding banks, three members shall be representative of the agricultural, commercial, and industrial interests, the latter three being subject to removal by the Federal reserve board, and the remaining three members are to be chosen by the Federal reserve board. Thus the banks elect six out of the nine directors of each Federal reserve bank. These Federal reserve banks are the ones that deal with the individual banks, pass upon the securities presented, direct what paper shall be discounted, and attend to all matters involving the care and investment of the enormous sums of money which will be held by them. It is upon the boards of directors of these Federal reserve banks that bankers should be placed, as is provided in the bill.

The amendment of the section of the committee represented by the Senator from Nebraska provides that there shall be five directors appointed by the Government of the Federal reserve bank and that four shall be elected by the member banks. That very amendment, if adopted, would destroy the entire character of this bill; it would make an entirely different kind of a bill, upon an entirely different theory. The theory of the bill as it came from the House and as it is preserved by our section of the committee is that there should be a bank of banks; that the banks should be required to take the stock in the Federal reserve bank. It can not be possible that banks would come into a system which creates a Federal reserve bank and provides that member banks shall deposit their reserves, aggregating $400,000,000, and not have a majority of the board of directors. It is absurd to think that any bank on earth would come into a system of that kind. Does anyone imagine that if the present national banking law had prescribed that of its board of directors five should be appointed by the Government and four should be appointed by the bank, that there ever would have been organized a national bank? Certainly not; and yet there is more reason for the Government insisting upon that than there is for insisting that a majority of the board of directors of the Federal reserve bank should be Government appointees. Why? Because the national bank deals with other people's money. The national bank has the people's money to the extent of 10 to 1 of its own, and the Government might well determine that as so much money of the people of the United States is in their custody that a majority of the board of directors should be appointed by the Government to determine where loans should be placed and how much money should be loaned. No one who has any knowledge of banking or of human nature would ever think that bankers would go into and organize a national bank under those circumstances. So member banks say as to representation upon the board of directors of the Federal reserve bank, and they have a right to say, "It is our money; it is our capital; it is our reserve; and we should have a right to control the Federal reserve bank by a majority of the board of directors." But the amendment of the Senator from Nebraska puts this control into the hands of the Government by a majority of one, without giving the banks that own and control the assets upon which the reserve bank operates a majority representation.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Utah?

Mr. SHAFROTH. I do.

Mr. SMOOT. The Senator will admit, however, that the object of the Hitchcock amendment is to make the regional banks Government banks; and if they are Government banks the Government ought to have a majority of the directors, whereas the amendment of the Senator from Oklahoma provides that they shall be banks of banks.

Mr. SHAFROTH. Yes sir.

Mr. SMOOT. Not being Government banks, the Senator from Colorado argues that being banks for banks or a bank of banks, the banks ought to have a majority of the directors.

Mr. SHAFROTH. Certainly. That is my contention exactly; and it seems to me that it is proper.

Mr. POMERENE. I rose for the purpose of asking the Senator from Utah whether or not he favored a Government-controlled bank.

Mr. SMOOT. If it is a Government bank, I certainly believe the Government ought to control the bank, or control it through its directors.

Mr. POMERENE. Did not the Senator favor the Aldrich plan, which was for an entirely bank-controlled bank?

Mr. SMOOT. Mr. President, no man ever heard me say that I was in favor of the Aldrich bill in its entirety. I favor a central bank, but I would require that bank to be owned by the people. The Government should have absolute control of its management. It should be one great bank, with the power of the Government back of it to put in any part of the country money sufficient to help in case of stress or in case of panic.

Mr. POMERENE. If the Senator will pardon me, with all due respect, I do not think the Senator has yet answered my question. The question was, or at least was intended to be, directed to one particular feature of the Aldrich bill, namely, the bankers' control of the bank. I asked the Senator whether he favored that feature of it.

Mr. SMOOT. No, Mr. President; I will say frankly that I did not, and that is one of the amendments I would have offered to the bill.

Mr. SHAFROTH. Mr. President, it sounds awfully well to say that we should establish a great people's bank. It seems to appeal to some. When we consider the matter closely, however, we realize the fact that we have now 7,500 people's banks, and hence that there is no occasion for a people's bank in which to keep reserves of banks. The name Federal reserve bank implies that it is a bank for reserves of banks and not for deposits of the money of the people.

Mr. POMERENE. Mr. President, will the Senator allow me to make a suggestion?

Mr. SHAFROTH. Yes, sir.

Mr. POMERENE. The Senator is now referring simply to the number of national banks?

Mr. SHAFROTH. Yes, sir.

Mr. POMERENE. There are more than 25,000 of these banks throughout the country.

Mr. SHAFROTH. That includes the State banks. I was speaking of the national-bank system. Every one of the national banks is a people's bank; and why? Because any five persons in the United States can incorporate a bank. If the inhabitants of a city, town, or hamlet think there is a combination to raise the rate of interest and oppress the people, any five men can organize a bank, and it therefore constitutes a people's bank.

What would be the result of having a great people's bank? If this stock is issued and taken by the people, do you suppose they will not say, "We want our paper discounted"? Should they not and would they not have a right to say, "I am a stockholder of this bank. Why can not I have a right of discount in it?" You have not the safeguards against an individual's discount that you have against a bank's discount, and it is the bank's money you are dealing with.

Mr. WILLIAMS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Mississippi?

Mr. SHAFROTH. I do.

Mr. WILLIAMS. I dislike to interrupt the Senator from Colorado; but if he will permit me, I should like to suggest that the shareholders of no bank that ever existed in the world were the people.

Mr. SHAFROTH. Yes, sir.

Mr. WILLIAMS. They were some of the people.

Mr. SHAFROTH. And generally some of the rich people, because, as a usual rule, the others are not the ones that invest in the stock of any corporation.

Mr. SMOOT. Under the amendment proposed by the Senator from Nebraska [Mr. HITCHCOCK] the stockholders of the Government bank provided for in the amendment would not be the rich people. Provision is made that no person shall own more than $10,000 of the stock.

Mr. SHAFROTH. Yes; but we think $10,000 is a pretty big sum of money out our way.

Mr. SMOOT. And provision is made that if the stock is oversubscribed, it shall be given to those subscribing for the lowest amounts.

Mr. SHAFROTH. I want to remind the Senator that not more than 5 per cent of the people of the United States are worth $10,000. That being the case, it seems to me the theory that this is a people's bank must of necessity cause at least an agitation to this effect: "If we are stockholders of this concern, we should have the right of discount at the concern."

Mr. SMOOT. I hope the Senator did not think I intimated or thought that no one could take stock unless it was $10,000 in amount.

Mr. SHAFROTH. No; I recognize that; but, as a usual rule, it is men of means who invest in the capital stock of a corporation, or even of a Government bank.

Mr. SMOOT. Well, Mr. President, I do not want to interrupt the Senator further.

REASON FOR BANK PARTICIPATION.

Mr. SHAFROTH. Mr. President, I want to call attention now to the fact that even under the Hitchcock amendment this Federal reserve bank will not have any funds from individuals. Nothing is permitted to be deposited there except reserves of member banks and money in the Treasury of the United States which the Secretary of the Treasury may deem it proper to deposit there. So the Hitchcock amendment imposes the condition that a private stockholder in a Federal reserve bank is not even to be permitted to deposit with the bank any sum of money whatever. Upon the other hand, what do we find with relation to the interest of the member banks? We find that they are required to put into the Federal reserve banks $400,000,000 from their reserves, and that they are required to subscribe for $106,000,000 of the capital stock of the Federal reserve banks. To further require that the Government shall appoint five directors to their four would mean that there would not be a single National or State bank come into the system, and that would produce a failure of the entire scheme.

Is it possible that we are going to defeat this bill simply by making an impossible condition? Is it possible that anybody would want to force such an amendment, when in all likelihood the banks would not come into the system?

It simply means, Mr. President, that if we adopt the amendments proposed by the Senator from Nebraska [Mr. HITCHCOCK] we will have no system at all, and there will be no effective legislation whatever in relation to either eight reserve banks or four reserve banks.

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Kansas?

Mr. SHAFROTH. I do.

Mr. BRISTOW. I should like to inquire of the Senator if he has heard any banker say that his bank would not go into the system if the stock would be owned by the people instead of by the banks?

Mr. SHAFROTH. Mr. President, I have heard banker after banker, as representing conventions of bankers, say that they are most bitterly opposed to the bill because they have no representation on the Federal reserve board and that the bankers wanted a bill that gave them representation in the Federal reserve banks. I have heard them object on that ground. They appeared before our committee, and in the first few days of the hearings they asserted and claimed that by reason of the fact that their moneys were to be placed in these banks and the capital was to be composed of their moneys they should not only have representation upon the board of directors of the Federal reserve banks, but they should also have representation upon the Federal reserve board which meets in Washington. When we examined the matter we found that they were wrong. We found that they should not have any representation on the Federal reserve board; that it would place them in an incompatible position. It was a matter which was discussed before the committee during the hearings. I wish to call attention to the reasons why they should have no representation upon the Federal reserve board.

Mr. BRISTOW. Mr. President, may I ask the Senator, if I am not interrupting him, another question?

Mr. SHAFROTH. Yes, sir.

Mr. BRISTOW. Will the Senator please state what bankers have said to him that they will not come into the system if the public is permitted to own the stock?

Mr. SHAFROTH. Oh, I think every man who said he would not come into the system unless he had representation upon the Federal reserve board would say with ten times the vehemence that he would not consider the proposition of coming in where the banks were denied a majority directorship in the Federal reserve bank.

Mr. BRISTOW. But the Senator can not give me the name of a single man who has made such a statement or point to a single letter to that effect?

Mr. SHAFROTH. No; I have not read all the letters I have received; but it is my judgment that they would not do so, because men will not turn over funds that belong to them to the control of people who have no interest in those funds.

THE FEDERAL RESERVE BOARD.

The Federal reserve board is the governmental part of this system, and no person directly or indirectly interested in banks should be a member of that board, because the duties of such a man would be incompatible with his private interests.

The Bank of England, the Bank of France, and the Imperial Bank of Germany do not permit a man who is connected with a bank which receives deposits and pays checks to become a member of their boards of directors.

The reason bankers engaged in the active business should not be upon the Federal reserve board is because of the conflict of interest which they would have as bankers and as members of the Federal reserve board. This board is vested with the power to raise or lower the rate of discount. Every time the rate of interest is increased or decreased it means the contracting or accelerating of credits, which means the fall or rise in the price of securities, which means that there will follow a bear or bull movement on the exchanges. As banks deal in bonds, stocks, and other securities, it is presumed that the knowledge upon the part of a banker on the Federal reserve board that the rate of discount will be raised or lowered would be taken advantage of by the interests which he represents, and thereby stocks and bonds would be either bought or sold by them with almost absolute certainty of a profit being realized.

The check-paying banks of the European countries would object most strenuously to a banker having such advantage over them, and so they are thoroughly satisfied that no banker is permitted to become a director of any of the European central banks.

The bankers, in their Chicago convention in August last, passed resolutions claiming they should have representation on the Federal reserve board. In the discussion they made the argument that as it was their reserves and capital that created the concern they should have such representation. In the hearings before the committee Mr. Festus J. Wade, of St. Louis, a good banker and most excellent gentleman, contended for the same right, and had the other impression as to the practice of the Bank of England. I happened to have the authorities near at hand and read into the record the following from Mr. Walter Bagehot in his book on Lombard Street:

> In London no banker has a chance of being bank (of England) director, or would ever think of attempting to be one. I am here speaking of bankers in an English sense (of those who accept deposits subject to check). * * * Not only no private banker is a director of the Bank of England, but no director of any joint-stock bank would be allowed to become such. The two situations would be taken to be incompatible. * * * The mass of the bank directors are merchants of experience, employing a considerable capital in trade in which they have been brought up and with which they are well acquainted. * * * The direction of the Bank of England has for many generations been composed of such men. (Senate Banking and Currency Hearings, p. 130.)

I also called attention to the fact that Mr. Hartley Withers, an English writer, in his book on The Meaning of Money, explains the matter very satisfactorily, as follows:

> When we come to consider the bank's organization, its most striking features are the constitution of its court of directors and its system of government by rotation, and these are points on which the bank's critics have fastened with the keenest energy and determination.
>
> The bank court is a committee recruited chiefly from the ranks of the accepting houses and merchant firms, and its members are nominated by itself, subject to the purely formal confirmation of the shareholders; and it is an unwritten law that no banker in the ordinary sense of the word—that is, no one connected with what we call the check-paying banks—can be a member of it.

> At first sight, this is one of those anomalous absurdities so common in England, and so puzzling to the intelligent foreigner, who can not understand why we suffer them. A court of directors ruling the Bank of England, and so performing most important banking functions, and yet disqualifying for membership any one with an expert knowledge of banking, is a tempting subject for an epigrammatically minded satirist. But, in fact, this anomaly, like many of our others, not only works excellently well in practice, but is, when calmly considered, clearly based on sound common sense. For in the first place it would obviously be undesirable that a member of one of the outer ring of banks should have the insight into the position of his rivals which membership of the Bank of England court could give him, unless all the others were similarly privileged. But if all the outer banks were represented on the bank court, it would become a committee of unwieldly dimensions, perhaps reproducing or reflecting in the bank parlor the rivalries and jealousies that stimulate the outer banks to work against one another, but are not conducive to their working together.
>
> And the question of proportionate representation would be difficult to settle. As it is, the bank court, being free from connection with the outer banks except by keeping their balances, is able to watch their proceedings with a wholly impartial eye, and, on occasion, to make suggestions with salutary effect. (Senate Banking and Currency Hearings, p. 133.)

I also call attention to the fact that the governor of the Bank of England, in his answers to the questions of the Monetary Commission in 1908, used the following language:

CUSTOM EXCLUDES BANKERS FROM BOARD.

> Q. Is there any custom restricting the class from which the directors may be selected?—A. There is no legal restriction as to the class from which directors may be selected, except that they must be "natural-born subjects of England or naturalized," but in actual practice the selection is confined to those who are or have been members of mercantile or financial houses, excluding bankers, bill discounters, or directors of other banks operating in the United Kingdom. (Senate Banking and Currency Hearings, p. 135.)

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER (Mr. THORNTON in the chair). Does the Senator from Colorado yield to his colleague?

Mr. SHAFROTH. I do.

Mr. THOMAS. Mr. President, my colleague has given a great deal of time and study to this question, and to practically all its details. I should like to inquire at this juncture whether the directors of these banks in European countries are permitted to serve as directors upon the boards of industrial corporations and transportation companies. I ask the question largely, perhaps, for my own information; but it may become of some importance with reference to an amendment that may be offered by me to one of the sections of the bill.

Mr. SHAFROTH. I will say to the Senator that the qualification for a member of the court of directors of the Bank of England—it is called "court of directors"—is that he shall have £500 worth of stock in the Bank of England and that he shall be the owner of an establishment having at least £20,000 invested in mercantile business. I do not know whether there are any other qualifications or not. I have read one or two books on the subject of the Bank of England, one of which is by Mr. Hartley Withers, in which he treats of it exclusively. It is a fine volume, giving details of the operation of the bank; but I remember no requirement prescribed in that book excluding merchants who are directors of other corporations.

Mr. WILLIAMS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Mississippi?

Mr. SHAFROTH. Yes, sir.

Mr. WILLIAMS. If the Senator will pardon the suggestion, there is another reason why the great public banks in Europe do not permit the directorate to be composed of bankers, and that is because they intrust those banks, all of them, with the power of issuing currency.

Mr. SHAFROTH. Yes, sir.

Mr. WILLIAMS. In that connection it seems to me that one of the beauties of your plan here, so far as the banking part of the scheme is concerned, is that you give a majority to bankers who are shareholders in the venture, and then you give ultimately to the public board, the reserve board, the board of control, which is the official body, control of the currency and of the rate of interest.

Mr. SHAFROTH. Yes, sir.

Mr. WILLIAMS. So that it is a public body which makes the rate of discount or interest, controlling the fluctuations of gold to the extent that it will do it, and it is this public body that holds its hand upon the throttle so far as the issuance of currency is concerned, while the private business of the bank for the benefit of the stockholders who are banks is conducted by a directorate with a majority of bank-chosen people. Then you go further than that and make one of the directors in each regional bank, who is the chairman of the board of directors of the regional bank, the man who takes care of the portfolio of commercial assets, and determines whether or not they are good.

Mr. SHAFROTH. Yes, sir. I will state to the Senator that I intended to cover that very suggestion in another part of my speech.

So the bankers who came before the committee from Chicago and who adopted a resolution at their convention insisting that they should have representation upon the Federal reserve board have ceased their agitation, because they have found from the practice of the European banks that not one banker is upon the board of directors of any of those banks.

Of course, men who have been bankers, possessed of all the knowledge of banking in this country, are eligible, and some should be selected upon the Federal reserve board, provided they have severed all connection, directly and indirectly, with banks and trust companies. I have no doubt the President in naming the members of the board will consider the qualifications of such applicants and appoint at least some of them on the boards of directors of the Federal reserve banks.

STRENGTH OF THE FEDERAL RESERVE BANK.

The third point touched upon by the Senator from Nebraska [Mr. HITCHCOCK] was in relation to the reserves. He said there was a difference between the two bills as to the amount of the reserves. That is true. Their section of the committee has reduced the reserves of city and central reserve city banks to 15 per cent, whereas in our bill it is 18 per cent in reserve city banks.

The Senator from Nebraska says there will be considerable difficulty in conforming to the new system, and that there is considerable difference between the two bills in that respect. If he examines the bills, however, he will find that each of them carefully preserves the right of depositing in the Federal reserve banks only limited amounts for a long period. Our bill gives a period of 36 months in which to make this transmission of currency to the Federal reserve banks, while their bill gives only 24 months.

The amount of money which these Federal reserve banks will have will be sufficient, without the issuance of any new money, to serve the ends of commerce at almost all times, except when there is a great panic sweeping the country. These banks will have in their control $400,000,000 of the reserves of the national banks, the capital of the Federal reserve banks, amounting to $106,000,000, and the cash balance of the Federal Government, amounting on November 24, 1913, to $289,790,160.81. Thus nearly $800,000,000 will be in the control of the Federal reserve banks to lend to the member banks when the demands of the country in crop-moving time require it.

If all of the State banks and trust companies come into the system, there will be much more at the disposal of the Federal reserve banks to meet the same conditions throughout the country.

The provisions with respect to the lending of this money to the member banks are very conservative, and it is difficult to conceive how any loss can occur to the Federal reserve banks. The measure provides that any bank desiring to procure a loan from the Federal reserve bank must present 30, 60, or 90 day paper, usually in the form of drafts which represent a transaction in commerce. Such drafts, according to the experience of the world, constitute the best security, whether a bill of lading is attached or not. Notes representing a loan by a national bank to an individual to go into permanent improvements, though made payable in 90 days, are seldom intended to be paid at that time, and hence such notes are not considered liquid—that is, certain of payment at the time of maturity—and therefore can not, under the provisions of the bill, be taken by the Federal reserve bank.

The paper prescribed by the bill which is eligible for rediscount by the Federal reserve bank usually represents a shipment of wheat, cotton, or merchandise by a dealer; it is a draft drawn by the seller upon the purchaser, who may be a manufacturer, or larger dealer. This is accepted by the purchaser in writing upon the draft, under arrangement with his bank, that on presentation by the seller it will be paid immediately. The bill of lading can be attached and perhaps in many instances will be attached. It is presumed that when the draft falls due the purchaser will have converted his purchase into cash by resale or by manufacture and thus have the money to pay the same.

It is stated that inasmuch as these drafts may be in the hands of persons whom the acceptor does not even know there is never an effort to extend the same, but the purchaser, with the receipts from resale, always is ready to pay at maturity.

When the member bank desires to get more money it guarantees the payment of this gilt-edge paper and presents the same to the Federal reserve bank for rediscount.

The Senator from Nebraska says, further, as the fourth great reason why his system is better than the one recommended by the section of the committee represented by the Senator from Oklahoma [Mr. OWEN], that there should be a compulsory discount system, and that his bill contains it. In other words, there is a clause in the amendment offered by the Senator from

Nebraska to the effect that when commercial paper is presented it shall be recognized as a matter of right to the full amount of its capital stock.

RIGHT OF APPEAL TO FEDERAL RESERVE BOARD.

The provision of the bill reported by Senator OWEN is to the effect that all of this is subject to the control of the Federal reserve board, and that if any discriminations are made the banks have a right to appeal and have a review of everything that is done there. It is impossible to foresee what conditions will arise in the operation of this bill. We do not know whether it will be a success at all. We do know that we passed the Aldrich-Vreeland bill four or five years ago, and expected that it would give relief; but not a single dollar of the currency authorized by that bill has been taken out of the Treasury. Something intervened to prevent its operation, just in the same way that this bill will become inoperative if you say that the bankers shall not have control of the directorates of the Federal reserve banks.

So we find, as to the compulsory-discount feature, that there may be many reasons why the banks should stop discounting in a certain district. There may be a condition that we can not foresee. Of course the object of the Senator from Nebraska is good. He is afraid there will be discrimination against some person or some bank, and therefore that equal justice will not be administered. But we must consider the fact that in the administration of this bill many unlooked-for conditions may arise. It may be that we will have too much currency, and that it should be restricted, no matter who asks for it. It may be that the reserves will be depleted, and that the bank prefers to keep a little larger reserve than 33⅓ per cent, and therefore should make no more discounts. Various conditions may arise. But it seems to me that to put upon the statute books an act which provides that the paper presented by any member bank shall be discounted might work a great hardship and militate against the successful operation of the system.

THE CHANCE OF LOSS ON NEW CURRENCY IS INFINITESIMAL.

The chances of a reputable dealer in merchandise failing within 90 days are very remote, not being more than 1 in 1,000. The chances of the purchaser who is a larger dealer or manufacturer failing within the same 90 days are not more than 1 in 1,000. The chances of both failing within that time therefore are not more than 1 in 1,000,000. If a bill of lading is attached to the draft, the chances of loss in course of shipment without insurance are not more than 1 in 1,000.

Thus the member bank is fortified with paper in which there is a chance of all three failing within the same 90 days of not exceeding 1 in 1,000,000,000. The member bank before it can get any money from the Federal reserve bank must guarantee that paper, and there is not 1 chance in 1,000 that the member bank will fail within the same 90 days, so that the paper, duly indorsed by the member bank, represents a security that will not fail more than 1 time out of 1,000,000,000,000. Thus the chance of loss by the Federal reserve bank being limited to this kind of paper and requiring all the indorsements makes it as safe a transaction as it is possible to conceive.

Federal reserve banks, therefore, will have no hesitancy in supplying the member banks with money when the demands are greater than in ordinary times. Of course, in ordinary times the member bank will prefer to keep the paper and gain all of the interest thereon instead of rediscounting it at the Federal reserve bank and letting the latter make the interest, and that very motive will tend to regulate the discounting and payment of drafts.

The remedy proposed in this measure as to our currency provides that in times of emergency, even if all of the reserves, capital, and deposits of the Federal reserve bank have been loaned to the member banks, they can still procure new currency with which to prevent runs upon the member banks. The same character of paper must be presented to the agent of the Federal reserve board by the Federal reserve bank, which, as I have shown before, is liable to a loss within 90 days of only 1 chance in 1,000,000,000,000.

The Federal reserve bank must then guarantee that paper to the Government, and then the agent of the Federal reserve board delivers new currency to the Federal reserve bank, which, in turn, delivers it to the member bank which presented the security.

There is not 1 chance in 1,000,000 that the Federal reserve bank, with the enormous reserves and capital above mentioned, all of which are subject to a first lien to the Federal reserve board, will fail within the same 90 days; so, taking the case of a particular draft, by the time it reaches the agent of the Federal reserve board, with the liability of the maker, the acceptor, the bill of lading attached, the member bank with its capital and double liability of its stockholders, and the Federal reserve bank with its capital and reserves and double liability of its stockholders—the member banks—the chance of loss to the Government for issuing the currency would not be more than 1 in 1,000,000,000,000,000,000.

Such combination of coincident failures by all of the signers and indorsers of this paper within the same 90 days would be almost impossible, and thus the new currency, which must retire within 90 days, becomes absolutely safe.

Another objection made by the Senator from Nebraska is to the clauses of our bill which provide that the Federal reserve notes shall be redeemable at the reserve banks in gold or lawful money, and as to the quantity of the gold reserve provided in our bill.

REDEMPTION OF FEDERAL RESERVE NOTES.

The bill under consideration, as it came from the House, provided that the Federal reserve notes issued should be redeemable at the United States Treasury in gold or lawful money or at the Federal reserve banks in gold or lawful money. The Aldrich bill, which was approved by the bankers generally, provided for the redemption of the circulating notes of its central bank in gold or lawful money. The pending bill, as it passed the House, provided that there should be a gold or lawful-money reserve to the extent of 33⅓ per cent against the Federal reserve notes, and that the Federal reserve banks should maintain as a redemption fund at the United States Treasury 5 per cent of such notes in gold or lawful money, and the balance they should keep in their own vaults. The present national-bank notes are redeemable only in lawful money.

The bill as amended by Senator OWEN strikes out the words "lawful money" when the notes are presented for redemption at the Treasury, strikes out the 5 per cent clause as to the amount of gold or lawful money the bank shall keep in the redemption fund at the Treasury, and provides that they shall keep such an amount of gold in the redemption fund at the Treasury as the Federal reserve board may from time to time direct, and leaves the redemptions at Federal reserve banks as passed by the House, namely, in gold or lawful money. The Hitchcock bill provides for the redemption of the Federal reserve notes both at the Treasury and at the Federal reserve bank in gold alone.

The object of striking out the 5 per cent clause was because a similar provision is contained in the statutes of the United States with respect to the redemption of the national-bank notes in lawful money, and it has been found to be not quite adequate to meet the redemptions that are presented.

While I do no believe that the Federal reserve notes will be presented at the Treasury in any such number as the national-bank notes have been for redemption in lawful money, yet, in order to avoid the possibility that 5 per cent may not be adequate, it was deemed proper to let the Federal reserve board call for gold from the Federal reserve banks in any quantity that may be required.

Senator HITCHCOCK'S amendment to the bill provides that no less than 35 per cent of gold shall be kept as a reserve and that the amount ordinarily to be kept shall be 45 per cent, with a permit to let the reserve be depleted to 35 per cent upon there being paid an interest charge of 1 per cent on each 2½ per cent exhaustion of the gold reserve. In other words, under normal conditions the reserve required under the Hitchcock amendment will be 45 per cent in gold, and the amount required according to the House bill and the Owen amendment will be 33⅓ per cent.

In most of the issue banks of Europe there is no minimum reserve required. The Bank of France, while it usually holds a very large reserve in gold, has no minimum fixed by law. The Reichsbank of Germany prescribes that a reserve of 33⅓ per cent shall be maintained in gold. The Bank of Belgium maintains a gold reserve of 19 per cent.

STRAIN ON GOLD.

The result of requiring the maintenance of a very large gold reserve will be to produce increased demands for gold; and as gold is the international money of the world, any increase by one nation necessarily makes the struggle for gold which is now going on a little more severe.

The flow of gold to or from a country is regulated by the banks of issue of the various countries raising or lowering the rate of discount. In order to attract gold the bank of issue of a European country will raise the rate of discount; that is, raise the rate of interest which the banks charge. That tempts money from other countries to make investments at the higher rate of interest, and therefore brings the money with which to pay for such securities; and as international balances must be paid in gold, the transaction therefore brings gold to the country that raises the rate of discount.

The other nations that have lost gold by that process must, in order to get it back, raise their rate of discount a little higher. Thus this seesaw in raising the interest rates with the object of attracting gold continues until interest rates become very high. This competition and raising the rate of discount among the various nations of the world to get more gold is counteracted only when enterprises that are contemplated are confronted with a rate of interest too high to make such enterprises profitable, and thus a less demand sets in for money, which, according to the principle of supply and demand, effects the lowering of the rate of interest.

HIGH DISCOUNT RATE PRODUCES STAGNATION.

When the rate of discount gets high throughout the world it generally produces stagnation in business, commerce, and enterprise. Consequently, the least strain upon gold that can safely be made and yet maintain the gold standard comes nearest permitting business and enterprises to continue in a prosperous way.

It is said that at the present time there is less gold in circulation in proportion to the credits outstanding than ever existed at any other period in the history of the world. That means that there is more of a strain upon gold for reserve and redemption purposes in proportion to the business conducted than at any other time in the world's history. In the general policy, therefore, of relieving the strain on gold there is a tendency to let commerce thrive, while requiring large reserves increases the strain on gold and thereby makes a depressing effect on business and commerce.

At the end of the first six months of the present year the aggregate gold reserves of all the principal banks and treasuries of the world amounted to $4,693,104,000.

At the end of the first six months of the year 1911 the gold holdings of the various institutions were $466,867,000 less than in 1913. Notwithstanding this increase within the last two years in the gold holdings of the treasuries and banks of the gold-standard nations, the great banks of issue assert that they have not gold enough and vie with each other in raising their discount rates, so that they may jealously protect their holdings.

This struggle for gold among the nations of the earth in the last 15 years has produced great increases in the rates of interest.

At the close of the nineteenth century the discount rate of the Bank of England remained normally in the vicinity of 2 to 2½ per cent per annum, but has since been gradually climbing to 4 per cent, which it reached in 1912; and recently the rate has gone still higher to 4½ per cent, and later still to 5 per cent per annum.

According to Mr. Paul Leroy-Beaulieu, an eminent French economist, the following advances in the rates of discount charged by the banks of issue of various countries have been made from June 30, 1911, to June 30, 1913:

	1911	1913
	Per ct.	Per ct.
Bank of France	3	4
Bank of England	3	4½
National Bank of Belgium	3½	5
National Bank of Switzerland	3½	5
Imperial Bank of Germany	4	6
Bank of Austro-Hungary	4	6
National Bank of Denmark	4½	5
National Bank of Norway	4½	5½
National Bank of Spain	4½	4½
Russian State Bank	4½	6
Bank of Issue of Italy	5	5½
Bank of Japan	4.74	6.54

In the Banking Law Journal, of New York, for September, 1913, there is stated the following important information:

Europe needs gold and buys it at a premium. Imports of gold to Europe are necessary to recoup the waste of capital from the Balkan wars and the devastation of the agricultural countries which furnish so much food to continental countries. Egyptian reserves have been depleted by demands for capital in the Far East and must have more gold. India, favored by great balances of trade, has within two years purchased over $250,000,000 of gold, besides silver, and as much more within the next two years will have to go into the "sink hole" of precious metals.

The Washington Post of November 16, 1913, contained a very able editorial, in which the following language was used:

The facts are that for nearly two years now every country in Europe has been in financial straits, and if European banking systems have withstood financial strain, they have not been sufficient in any way to meet the demands of Europe, of Africa, of Asia, or of the Americas for funds to carry out profitable and legitimate business enterprises.

Great Britain to-day confesses its inability to finance India with gold. France places estoppel upon all foreign loans until its own governmental needs are financed.

Germany was only saved from bankruptcy 18 months ago through the gold furnished by American bankers.

Where are the funds necessary to carry on the increasing business of the world coming from when these highly lauded systems of European finance fail to provide them for their own continent or the needs of others?

The ablest railway manager in the world has told the people of the United States repeatedly during the last two years that our railways require $5,000,000,000 for proper development.

No one doubts the correctness of that statement.

Every business man in the United States wishes that development to proceed.

The most active and powerful of New York financial managers has told the Congress, the bankers, and the people of this country that the electrical development of the United States will during the next few years call for the expenditure of $2,000,000,000.

The populace and the business interests of the country earnestly approve of this development at the earliest possible time.

In an editorial of the Washington Post of November 19, 1913, the following information is given:

It was not our tariff legislation which caused the Bank of England to hoist its bank rate of discount to extremely high figures for the past year to keep its gold at home.

It was not our antitrust talk that forced the German banks to issue millions of dollars' worth of notes of small denominations that they might gather in and retain gold to strengthen their reserves of primary money.

Sound as are our own financial conditions, the insufficiency of gold, the primary money, is to-day a veto upon the ability of the banks to aid the business men; it is a ban upon enterprise in every form; it is a bar to general prosperity, a fearful handicap upon safe finance and legitimate business.

It can be readily seen from these extracts that the higher the gold reserves are fixed the greater the strain upon gold will become, and that the way to retain gold will be by increasing the rate of discount. This may be very satisfactory to the bankers, because they reap more profits when they lend out their money at a higher rate of interest, but it is not to the interest of the people who are compelled to pay the higher rate of interest fixed by banks of issue under the claim that they are trying to get more gold.

"LAWFUL MONEY" REDEMPTION RELIEVES STRAIN ON GOLD.

In this bill we have retained the House provision that the Federal reserve notes may be redeemed by the bank in either gold or lawful money. It takes the strain off gold at the eight reserve banks and does not impair the redemption feature of the note in gold, because it provides that the Federal reserve note may be redeemed at the Treasury in gold. In other words, it obviates the necessity of each of these reserve banks competing with each other and with the United States Treasury for gold and thereby permits a smaller quantity of gold to make the redemptions, which, of course, relieves the strain on gold to that extent.

Mr. THOMAS. I think it is pertinent to the discussion of the Senator to state here that the drain upon the world's supply of gold which India has been constantly making for some 10 years past has caused the Parliament to provide for the appointment of an Indian currency commission charged with the duty of ascertaining its definite causes, and whether the Government can safely persist in its effort to force a gold standard upon India. The attempt is about 12 years old now, and its principal result has been to educate the East Indian in the hoarding of gold instead of silver, since he is no longer able to take his hoarded silver to the mint and exchange it for rupees at the rupee legal value. Eighty-eight million pounds sterling in gold have been diverted from the channels of international trade into India during the last three years, equivalent, of course, to $440,000,000 of our currency.

That gold is no longer available, nor is any part of it for monetary needs, and the total of withdrawals, I think, amounts to £175,000,000 during the last 10 years. It is no longer available for the uses of commerce, because gold which goes to India, like silver which formerly went to India, absolutely disappears and is hoarded by the natives in various ways. Some of it is hidden away as coins, but most of it is melted and is changed into articles of personal adornment. But the startling fact is that it disappears as completely as though it were sunk in the middle of the sea, and the drain is constantly increasing.

This presents to my mind one of the most serious menaces to international trade and to international currency conditions that at present exists. It is one reason, which I will endeavor to elaborate before this discussion ends, why I believe it is dangerous for any nation to pivot all its currency and credit conditions upon a single metal.

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Kansas?

Mr. SHAFROTH. Yes, sir; I yield.

Mr. BRISTOW. Does not the Hitchcock amendment provide that the reserves shall be in gold or gold certificates, and have we not $1,100,000,000 of gold certificates in addition to the free gold?

Mr. SHAFROTH. Oh, yes; and the very fact that the national-bank notes are sent down here to Washington by express,

$600,000,000 each year, or at the rate of $2,000,000 every day, running the risk of train wreck, fire, and robbery that might occur, shows that——

Mr. BRISTOW. I understand; but that has nothing whatever to do with it.

Mr. SHAFROTH. It shows that there are not enough of these gold certificates to act as reserves for the banks. That is what it means. It means that they are short of currency which will answer that purpose.

Mr. BRISTOW. Does not the Senator know that the reason why the national banks send the national-bank notes for redemption is because they can not be used as reserves?

Mr. SHAFROTH. Certainly; and when gold is reserve money, and gold certificates are reserve money, and greenbacks are reserve money, of course it shows that still there is a shortage in that, or else this redemption would not take place to the extent of over $600,000,000 a year.

Mr. BRISTOW. I can not see the line of reasoning which the Senator presents, for it is not because of a shortage in gold that these certificates are sent, but it is because the law does not permit them to be used as reserves.

SHORTAGE OF RESERVE MONEY FORCES BANK-NOTE REDEMPTION.

Mr. SHAFROTH. But if there was a sufficient quantity of gold certificates and a sufficient quantity of those other moneys that are used for reserves, they would pay out this bank currency just as they would in ordinary transactions, and they would not ask redemption for it. It is because of the shortage in that money—that is, the reserve money—that the national-bank notes come to Washington for reserve money. When you cite to me that there is a quantity of gold represented by certificates, I say, yes; but where is it? I saw a statement the other day that there are $114,000,000 of American gold certificates in Canada. I have been told that there are many millions of our gold certificates scattered all over Europe, acting as warehouse receipts, which shows they have confidence that gold will be at their demand whenever they want it. How much there is one can not tell. We can not tell how much of the $346,000,000 of United States notes there are, because we know that the retirement of them was stopped in 1878, and there were $346,000,000 then. There has been no way of determining how many of those notes have been burned or destroyed or taken out of the country.

Mr. BRISTOW. May I ask the Senator, is it not because the national-bank note is an inferior note that it is sent for redemption, the banks retaining that which is the best?

Mr. SHAFROTH. No; except that it can not be used as reserve money.

Mr. BRISTOW. Because it can not be used as a reserve, and it is not as useful as a gold certificate and a greenback.

Mr. SHAFROTH. Certainly; that is true. Of course they are kept at a par with gold, and nobody has ever attempted to force one to a discount.

Mr. BRISTOW. Certainly. It is kept at par because of the credit of the United States Government, the United States bonds, behind it, and the pledge of the Government to redeem it in gold.

Mr. SHAFROTH. The 33⅓ per cent which the Owen section of the committee has recommended to be held as a gold reserve for the redemption of these notes at the Treasury is amply sufficient to make it a perfect currency. Did you ever notice that whenever it came to providing for the issuance of bank bills the bankers never ask to make their notes redeemable in gold? Did you ever hear a banker suggest that national-bank notes should be made payable in gold at the bank counter? Oh, no.

We find that the Aldrich bill, which was presented and which met the approval of all the bankers of this country as represented in their conventions, expressly provided that the redemption should be made in gold or lawful money, at the option of the bank. Here in the compromise that has been made with relation to this matter by the Owen side of the committee we have provided that these notes shall be redeemable in gold at the Treasury, or in gold or lawful money at the Federal reserve bank. I want to state why. It is because it saves the strain upon the gold. That is the reason. If you have it redeemable in gold at every one of the Federal reserve banks, you simply establish eight competing points for gold, all bidding against the Government for the purpose of getting gold into their vaults.

Mr. THOMAS. Mr. President——

Mr. SHAFROTH. I will yield in a moment.

We find that these gold reserves proposed may be more than 33⅓ per cent. That is the minimum, and the chances are that when there is an easy market in gold it may accumulate and go much higher, just as it does in European banks. But to compare the conditions in this country and the necessity for a gold reserve with the conditions in Europe is something that is ridiculous. All European nations are upon a war footing. Every one of them has to grab gold and keep it. We being upon a peace footing, having no enemies and having no fears of war, we have a right to presume that the strain upon our gold will not be great.

I now yield to my colleague.

Mr. THOMAS. Mr. President, I am heartily in favor of that provision of the House bill which makes this money redeemable in lawful money, but there is one feature of the Owen bill about which I should like some information. My understanding of it is that it provides that these notes shall be redeemed at the United States Treasury in gold, but if presented to the Federal reserve banks they shall be redeemed either in gold or lawful money. What I want to inquire is, if it will not cause the holder of the note who wants redemption in gold to go to the Treasury instead of going to the bank, which has the alternative of redeeming in the two classes of money, and whether it will not, as a consequence, create a demand upon the gold in the Federal Treasury.

WILL BE NO CONSPIRACY TO WITHDRAW GOLD.

Mr. SHAFROTH. I will answer that, Mr. President. We provide in our bill that the Federal reserve banks shall keep a fund in gold in the Treasury of the United States, and consequently there will be no conspiracy, upon their part at least, to draw gold out of the Treasury of the United States. This fund of 33⅓ per cent is to be kept in their own vaults and in the vaults of the Treasury of the United States. All the Federal reserve notes redeemed at the Treasury are from the gold fund furnished and maintained by the Federal reserve banks that procured the issuance of the Federal reserve notes.

The House bill as it came to us provided that the Federal reserve banks should create and maintain a gold redemption fund in the Treasury of 5 per cent of notes issued. By law at the present time the national banks maintain at the Treasury for the redemption of their notes a 5 per cent fund in lawful money. By reason of the redemption of these national-bank notes in such large numbers, as I have said, it has been found that 5 per cent is inadequate. I believe 5 per cent would be sufficient as to these notes, but for fear that it would not be sufficient we have provided that they should deposit with the United States Treasury for this redemption fund such an amount as the Federal reserve board should determine. That, of course, may be 5, 6, 10, or even 20 per cent if it is necessary. So the United States Treasury is amply protected by this proposition.

As to the good policy of requiring redemption of Federal reserve notes at the Federal reserve banks in gold or lawful money, there is no better illustration than our present system of supporting our currency upon a gold reserve of $150,000,000. That quantity of gold has been found amply sufficient to maintain all redemptions of the United States notes amounting to $346,000,000 and indirectly to maintain the redemptions of national-bank notes amounting to $758,000,000. The fact that the national-bank notes are not redeemable at the national banks in gold, but are redeemable at the banks in lawful money, relieves the strain on gold, and yet every holder of a national-bank note can get his gold after obtaining for his national-bank note the United States note; and thus this $150,000,000 of gold supports a superstructure of $346,000,000 of United States notes redeemable in gold and the $758,000,000 of national-bank notes redeemable in the United States notes.

Under this system there has never been a deviation of a fraction of a cent between the national-bank notes and gold since the establishment of the gold reserve on March 14, 1900. It is therefore of the highest importance that the provisions of the House bill as to redemption of Federal reserve notes at the Treasury be made in gold, but at the Federal reserve banks in gold or lawful money.

Mr. WILLIAMS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Mississippi?

Mr. SHAFROTH. I do.

Mr. WILLIAMS. I wish to ask the Senator if he does not think if this 33⅓ per cent was required to be held in gold—and that would have to be the case if the banks were required to redeem in gold—the practical modus operandi would be that the banks would at once, in order to procure their 33⅓ per cent of gold reserve, proceed to tender greenbacks at the Treasury of the United States and get it out of a fund which we are now holding to protect the greenbacks?

Mr. SHAFROTH. Yes; they might do that, and thereby deplete the gold reserve of our Treasury.

It can be readily seen from this illustration that 33⅓ per cent in gold is amply sufficient to maintain at a parity with gold all the Federal reserve notes presented at the Treasury for redemption in gold or at the Federal reserve banks for redemption in gold or lawful money. The provision in Senator HITCHCOCK's amendment requiring 45 per cent in gold would simply make that much greater strain on gold than is necessary and requiring redemption in gold at Federal reserve banks would cause those banks to maintain a higher gold reserve than the law requires, just as banks now maintain higher reserves to meet checks on deposit than required by law.

The bankers with their limited strength are continually pleading for a law which requires smaller reserves for themselves. They have urged and obtained in this bill a reduction of reserves for country banks from 15 per cent to 12 per cent and for reserve city banks from 25 per cent to 18 per cent, and the Hitchcock amendment reduces the latter to 15 per cent.

ADVANTAGEOUS TO NATIONAL BANKS.

Many of the bankers who appeared before the Senate Committee on Banking and Currency felt that the bill was not sufficiently favorable to the national banks to justify their going into the system. An examination of the provisions of the bill will dispel any such contention to the mind of a disinterested person. It is distinctly to the advantage of every national bank to go into the system. The law now provides that each country national bank, of which there are 7,142 in existence, must keep in its own vaults and in banks of a reserve city 15 per cent of its deposits. The present bill reduces that percentage to 12 per cent, which gives a great advantage to the country bank.

At the present time a country bank with $100,000 capital and surplus ordinarily has, say, $1,000,000 of deposits. Under the present law it must keep as reserves in its own vaults and in other banks in reserve cities $150,000. Under the proposed measure it would have to keep in its own vaults and in the vaults of the Federal reserve bank only $120,000. That would be a distinct saving in cash of $30,000. As it is conceded that with capital, credits can be built up to the extent of eight or ten times, the country bank could thereby build up credits upon this $30,000 of cash to the amount of $240,000, all of which could be loaned at 6 per cent, and thus the country bank would be benefited to the extent of $14,400 per annum, while its cost of going into this system would be only 6 per cent of its capital and surplus, which would amount to only $6,000, upon which it will draw a dividend of 6 per cent per annum, which is no loss. It would lose the 2 per cent per annum that it now receives from banks in reserve cities, where, according to the present law, is held 9 per cent of its deposits, which would be $90,000, 2 per cent of that amount being $1,800 per year. Thus the country bank would be better off by coming into the system by $12,600 a year. Similar advantages exist in favor of the reserve city banks.

It is difficult to conceive that a bank which is given such privileges by this bill, together with the privilege in times of runs to seek shelter under the power of these great reserves, should hesitate one moment in subscribing to the capital stock of the Federal reserve bank.

The only banks that will lose deposits by this bill are those of New York City, where the reserves of nearly all of the banks in the United States are concentrated and used in gambling upon the stock exchanges. These reserves belong to the banks throughout the country and do not belong to the New York banks, and they can not justly complain when these reserves are kept at home instead of being concentrated there.

There is a great difference between the amendment proposed by the Senator from Nebraska and that proposed by the Senator from Oklahoma relative to the retirement of the national bank notes. The Senator from Nebraska proposes to retire the 2 per cent bonds to an extent not exceeding one-half of the capital stock of the reserve banks each year. Of course that would make a retirement of a very large amount each year. He proposes to issue in place of the bonds securing such circulation 3 per cent bonds; but he does not provide for any permanent money to take the place of the national-bank notes, and consequently the plan involves simply a contraction of the currency to that extent.

EFFECT OF RETIRING UNITED STATES NOTES.

Some of the Senators here remember the great agitation that occurred when it was discovered in the 70's that power had been given to the Secretary of the Treasury to retire United States notes, and that over $100,000,000 of such notes had been retired. Congress in 1878, at the almost unanimous demand of the people, took away this power from the Secretary of the Treasury. You may talk about expansion, but when it comes to contracting the currency you are going to produce disturbances that will shake to the very foundation this Government. Consequently, I think one of the great defects of the bill reported by the Senator from Nebraska lies in the provision which proposes a retirement of this currency without the substitution of a permanent circulating medium. His theory is that there will be such a demand for this currency based on 90-day paper that sufficient will be issued and remain as a substitute for the retired national-bank notes. Several of the witnesses before the Committee on Banking and Currency testified that they did not believe there would be enough of the commercial paper that is required to make a demand for money sufficient to take the place of the national-bank notes. So the Owen section of the committee made a change, and provided that there shall be issued in lieu of the national-bank notes, which shall be retired at the rate of $3,000,000 a month, Federal reserve notes, based upon the same bonds now securing national-bank circulation, or based upon substitute bonds, with the backing of the Federal reserve banks instead of the backing of the individual banks, as now—a better security, a safer security, and one of a permanent nature. The substitute bonds bear 3 per cent interest, but the interest goes to the Federal reserve banks. A currency based upon 90-day paper is supposed to be issued only in emergencies to supply a temporary demand for more money to meet the necessities in crop-moving seasons and in times of panic.

Some people think that there will be great difficulty in the Federal reserve banks getting gold. They seem to think that it is necessary to sell bonds for the purpose of obtaining gold to redeem the currency. The gold-redemption fund is furnished by the member banks; it only has to be maintained by the Federal reserve banks. It takes an insignificant amount of money to procure gold for redemption purposes. All a Federal reserve bank would have to do would be to take its receipts of the day before and buy an equal amount of gold. It can get gold for one-tenth of 1 per cent, and out of their general fund or their profits they can add one-tenth of 1 per cent, and that pays for the gold. One thousand dollars used in that manner would get gold enough to redeem a million dollars of Federal reserve notes, because the gold is not consumed; it is exchanged.

If after they bought the gold it was consumed, of course it would take a million dollars of money or a million dollars of notes or a million dollars of bonds to buy the million dollars of gold bullion or gold coin. You can readily see that it only takes a thousand dollars added to the receipts of the day before, if the receipts were a million dollars, to buy a million dollars in gold and put it in the reserve in place of the paper money in the reserve which was used the day before in drawing gold from the reserve. So this necessity of issuing one-year paper or issuing bonds for the purchase of gold is not real. The Government buys gold bullion to an enormous extent every year at its mints, paying therefor $20.67 per ounce. The idea of the necessity for bond issues to buy gold came to us from the Cleveland administration bond issues. But what became of the money from those bonds? It went to pay the general expenses of the Government and was consumed. Of course you have to issue bonds to the extent of $100,000,000 to get $100,000,000 in gold when you are going to use it for expenditure purposes; but when you are going to keep it simply for the purpose of redemption, I repeat, all you have to pay is the little premium which the European banks now pay—simply one-tenth of 1 per cent added to the paper money you already have with which to buy gold. That is all it costs to keep a reserve. The theory of providing bonds instead of the $758,000,000 of national-bank notes to buy gold and to keep that gold is an absolute absurdity to any person who understands the system of buying gold in the market.

This measure will make panics unknown, unless it be a world panic, and even then it will mitigate and relieve the severity of the disturbance to a marked degree and will save from disaster every bank except the insolvent banks of the country.

With rigid inspections, as provided in this bill, there will be no such thing as the closing of the doors of a solvent bank, and thus a degree of prosperity will be established and maintained in our country that will bring peace, security, and happiness to our people.

EXECUTIVE SESSION.

Mr. BACON. If there is no Senator who desires to speak on this subject, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 1 hour and 30 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 50 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, November 26, 1913, at 2 o'clock p. m.

NOMINATIONS.

Executive nominations received by the Senate November 25, 1913.

SECRETARIES OF EMBASSIES.

Arthur Hugh Frazier, of Pennsylvania, now second secretary of the embassy at Vienna, to be second secretary of the embassy of the United States of America at Paris, France, vice Sheldon Whitehouse, nominated to be secretary of the legation at Managua.

Thomas Hinckley, of the District of Columbia, now secretary of the legation and consul general at San Salvador, to be second secretary of the embassy of the United States of America at Vienna, Austria, vice Arthur Hugh Frazier, nominated to be second secretary of the embassy at Paris.

Arthur Mason Jones, of New York, now secretary of the legation at Managua, to be second secretary of the embassy of the United States of America at St. Petersburg, Russia, vice Frederick A. Sterling, nominated to be second secretary of the legation at Peking.

SECRETARY OF LEGATION AND CONSUL GENERAL.

Henry F. Tennant, of New York, now secretary of the legation at Caracas, to be secretary of the legation and consul general of the United States of America at San Salvador, Salvador, vice Thomas Hinckley, nominated to be second secretary of the embassy at Vienna.

SECRETARIES OF LEGATIONS.

William Whiting Andrews, of Ohio, now secretary of the legation at Lisbon, to be secretary of the legation of the United States of America at Berne, Switzerland, vice William Walker Smith, appointed secretary of the legation and consul general at Santo Domingo.

James G. Bailey, of Kentucky, now secretary of the legation to the Netherlands and Luxemburg, to be secretary of the legation of the United States of America at Lisbon, Portugal, vice William Whiting Andrews, nominated to be secretary of the legation at Berne.

Francis Munroe Endicott, of Massachusetts, now secretary of the legation at Christiania, to be secretary of the legation of the United States of America at San Jose, Costa Rica, vice M. Marshall Langhorne, nominated to be secretary of the legation to the Netherlands and Luxemburg.

Franklin Mott Gunther, of Virginia, now second secretary of the embassy at Rio de Janeiro, to be secretary of the legation of the United States of America at Christiania, Norway, vice Francis Munroe Endicott, nominated to be secretary of the legation at San Jose.

M. Marshall Langhorne, of Virginia, now secretary of the legation at San Jose, to be secretary of the legation of the United States of America to the Netherlands and Luxemburg, vice James G. Bailey, nominated to be secretary of the legation at Lisbon.

Willing Spencer, of Pennsylvania, now second secretary of the embassy at Berlin, to be secretary of the legation of the United States of America at Caracas, Venezuela, vice Henry F. Tennant, nominated to be secretary of the legation and consul general at San Salvador.

Sheldon Whitehouse, of New York, now second secretary of the embassy at Paris, to be secretary of the legation of the United States of America at Managua, Nicaragua, vice Arthur Mason Jones, nominated to be second secretary of the embassy at St. Petersburg.

Henry Coleman May, of the District of Columbia, lately secretary of the legation at Stockholm, to be second secretary of the embassy of the United States of America at Tokyo, Japan, vice Ralph B. Strassburger.

Frederick A. Sterling, of Texas, now second secretary of the embassy at St. Petersburg, to be second secretary, of the legation of the United States of America at Peking, China, vice George T. Summerlin, nominated to be second secretary of the embassy at Berlin.

George T. Summerlin, of Louisiana, now second secretary of the legation at Peking, to be second secretary of the embassy of the United States of America at Berlin, Germany, vice Willing Spencer, nominated to be secretary of the legation at Caracas.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Commander Mark L. Bristol to be a captain in the Navy from the 1st day of July, 1913.

Lieut. Commander Roscoe C. Bulmer to be a commander in the Navy from the 1st day of July, 1913.

Lieut. Roger Williams to be a lieutenant commander in the Navy from the 1st day of July, 1913.

Lieut. (Junior Grade) Guy E. Baker to be a lieutenant in the Navy from the 1st day of July, 1913.

The following-named citizens to be assistant surgeons in the Medical Reserve Corps of the Navy from the 14th day of November, 1913:

Hubley R. Owen, a citizen of Pennsylvania; and
Foster H. Bowman, a citizen of Pennsylvania.

CONFIRMATION.

Executive nomination confirmed by the Senate November 25, 1913.

UNITED STATES MARSHAL.

Edgar H. James to be United States marshal, western district of Kentucky.

SENATE.

WEDNESDAY, *November 26, 1913.*

The Senate met at 2 o'clock p. m.

The Rev. Arthur Little, D. D., of Boston, Mass., offered the following prayer:

Our heavenly Father, we acknowledge Thee as the source of all life, of all light, of all power. Into Thy presence we come that we may be vitalized, illumined, and empowered for Thy service. We thank Thee for all the ways of goodness and loving-kindness along which Thou art leading us from day to day. We supplicate Thy presence and Thy blessing upon these Thy servants, summoned of God and the people to this tremendous task of legislation for a great Nation. Give them guidance and wisdom and insight and foresight and all needed help, that they may enact such laws as shall be for the well-being of the Republic and for the honor of Thy name.

Make us grateful for all the mercies that enrich our lives. Help us to share with the people of the Nation on the morrow in returning hearty and sincere thanks and acknowledgments to Almighty God for the goodness with which He has crowned the year. Peace, plenty, and prosperity abound, thanks to His bountiful hand.

Command Thy blessing upon the President of the United States and all his advisers. Endow him and those sharing his counsels with wisdom from on high to guide them in all their deliberations. All hearts unite in offering this prayer: "The Lord bless and keep us. The Lord make His face to shine upon us and be gracious unto us. The Lord lift up His countenance upon us and give us peace." Amen.

NAMING A PRESIDING OFFICER.

The Secretary (James M. Baker) read the following communication:

PRESIDENT PRO TEMPORE UNITED STATES SENATE,
Washington, November 26, 1913.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. JOHN RANDOLPH THORNTON, a Senator from the State of Louisiana, to perform the duties of the Chair during my absence.

JAMES P. CLARKE,
President pro tempore.

Mr. THORNTON thereupon took the chair as Presiding Officer and directed that the Secretary read the Journal of the proceedings of the last legislative day.

THE JOURNAL.

The Journal of yesterday's proceedings was read and approved.

SAN FRANCISCO WATER SUPPLY.

Mr. GALLINGER. Mr. President, I have a lengthy telegram from the Modesto Water Users' Association, of Modesto, Cal., of which I presume every Senator has had a copy, protesting against the passage of the so-called Hetch Hetchy bill. I have also an earnest letter from the Right Rev. Bishop W. W. Niles, of Concord, N. H., on the same subject, entering a protest.

I will not ask that these papers be printed in the RECORD, contenting myself with the statement I have made concerning them.

PETITIONS AND MEMORIALS.

Mr. WEEKS presented resolutions adopted by the Central Labor Union of Fitchburg, Mass., favoring an investigation into the mining conditions in the copper district in the State of Michigan, which were referred to the Committee on Education and Labor.

He also presented petitions of the congregation of the Asbury First Methodist Episcopal Church, of Springfield; of the congregation of the Highlands Methodist Episcopal Church, of Holyoke; of the congregation of the Methodist Episcopal Church of East Longmeadow; and of the Woman's Association of the First Congregational Church of Springfield, all in the State of Massachusetts, praying for the passage of the so-called antipolygamy bill, which were referred to the Committee on the Judiciary.

Mr. WEEKS (for Mr. LODGE) presented a memorial of the Social Science Club of Newton, Mass., remonstrating against the enactment of legislation granting to the city of San Francisco the use of the waters of the Hetch Hetchy Valley, which was ordered to lie on the table.

Mr. ROOT presented a memorial of the faculty of Adelphi College, Brooklyn, N. Y., remonstrating against granting to the city of San Francisco the use of the waters of the Hetch Hetchy Valley, which was ordered to lie on the table.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. KENYON:

A bill (S. 3483) for the relief of Alex. H. Smith; to the Committee on Claims.

A bill (S. 3484) to amend paragraph 8, section 24, chapter 2, of the Judicial Code; to the Committee on the Judiciary.

By Mr. O'GORMAN:

A bill (S. 3485) granting a pension to Edward H. Dalton; to the Committee on Pensions.

By Mr. POINDEXTER:

A bill (S. 3486) providing for the retirement and rank of general service clerks and messengers in the Army; to the Committee on Military Affairs.

By Mr. BRADY:

A joint resolution (S. J. Res. 82) authorizing a survey of the Snake River from Lewiston, Idaho, to the mouth; to the Committee on Commerce.

CONSERVATION OF NATURAL RESOURCES (S. DOC. NO 243).

Mr. SHAFROTH. I ask unanimous consent that there be published as a public document a very able and instructive thesis by W. V.-N. Powelson upon the waste of our natural resources due to the nondevelopment of our water power. It is a very able article, and I should like to have it made a public document.

The PRESIDING OFFICER. It is so ordered, in the absence of objection.

PUBLIC BUILDINGS AND SITES (S. DOC. NO. 244).

Mr. SHEPPARD. Mr. President, the Treasury Department has prepared at my request a statement showing the status of public buildings and sites in the United States arranged according to congressional districts, embracing all projects up to and including the public-buildings act of March 4, 1913.

The statement shows the places in the congressional districts where buildings have been completed, with dates of completion; the places where buildings and extensions are in course of construction, with the dates of the beginning of construction; the places where buildings and extensions are to be constructed on sites or additional land already purchased; the places where buildings and extensions are to be constructed on sites or on additional land not yet purchased; and the places where new sites for buildings are to be acquired.

Senators and Members of the House are constantly receiving requests for this information. I believe this statement will be of great value as a public document, and I ask that it may be printed as such.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AMENDMENT OF THE RULES.

Mr. GALLINGER. Mr. President, on the eighth day of September last I gave notice that I would at a later day offer an amendment to Rule XIX of the Senate. I now offer a resolution and ask that it be printed and referred to the Committee on Rules.

There being no objection, the resolution (S. Res. 221) was referred to the Committee on Rules, as follows:

Resolved, That the rules of the Senate be amended by adding the following paragraph to the nineteenth standing rule, to be numbered and known as paragraph 6 of said rule, to wit:

"PAR. 6. Whenever confusion arises in the Chamber or the galleries, or demonstrations of approval or disapproval are indulged in by the occupants of the galleries, it shall be the duty of the Chair to enforce order on his own initiative, and without any point of order being made by a Senator."

BANKING AND CURRENCY.

Mr. REED. Mr. President, I desire to give notice that on next Monday, at the convenience of the Senate, I shall address the Senate upon the banking and currency bill.

Mr. WEEKS. Mr. President, I desire to give notice that on Friday, December 5, at the conclusion of the routine morning business, I shall address the Senate on the subject of banking and currency legislation.

Mr. NEWLANDS. Mr. President, it is my purpose to address the Senate this morning upon the resolution offered by me on yesterday.

The PRESIDING OFFICER. The Chair lays before the Senate the resolution submitted yesterday by the Senator from Nevada, which will be stated.

The SECRETARY. Senate resolution 220, providing for the modification of the pending banking and currency bill by the adoption of a Federal reserve system.

Mr. NEWLANDS. I ask that the resolution which I offered yesterday may be read.

The PRESIDING OFFICER. The Secretary will read the resolution.

The Secretary read the resolution submitted yesterday by Mr. NEWLANDS, as follows:

Resolved, That it is the sense of the Senate that the pending banking and currency bill should be modified by providing—

First. That within five years the capital of every commercial bank, national and State, engaged in interstate commerce shall be required to be equal to at least 12 per cent of its deposits, and that acceptance of deposits beyond this proportion shall be forbidden except upon a proportionate increase of capital.

Second. That within five years the reserve of such banks shall be required to be equal to at least 12 per cent of the deposits, except in reserve cities, where it shall equal 15 per cent.

Third. That of such reserve held by country banks, one-third may be deposited in reserve city banks and in central reserve city banks.

Fourth. That of such reserve one-third shall be deposited in the State reserve associations hereafter referred to.

Fifth. That there shall be organized in every State a State reserve association, in which the membership of all commercial banks, both national and State, shall be compulsory, as a condition of the continued existence of the national banks and of the privilege of continuing in interstate commerce as to the State banks.

Sixth. That each member bank shall deposit and forever maintain in such State reserve association at least one-third of its cash reserve. Such State reserve association shall have powers of supervision and regulation of its member banks, and also the power of rediscount of commercial paper guaranteed by the member bank, the reserve of such member bank to stand as additional security for its guaranty.

Seventh. That a Federal reserve association at Washington shall be organized, whose members shall be the State reserve associations; that each of such member associations shall deposit and forever maintain in the Federal reserve association one-third of the reserves deposited with it by the member banks; that such system shall also provide for the deposit in such Federal reserve association of Government funds and also for the issue to it of Federal reserve notes.

Eighth. That power be given to such Federal reserve association to rediscount indorsed commercial paper held by any State reserve association and indorsed by it, and to use therefor the cash deposited by the member associations, the Government funds deposited with it, and the Federal reserve notes.

Mr. NEWLANDS. Mr. President——

Mr. SMOOT. Will the Senator from Nevada yield to me?

Mr. NEWLANDS. I yield to the Senator.

Mr. SMOOT. I suggest the absence of a quorum. There are very few Senators here, and I think they ought to be present before the Senator proceeds.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	Owen	Smoot
Bacon	Hollis	Page	Sterling
Bankhead	Hughes	Pittman	Stone
Bradley	James	Poindexter	Sutherland
Brady	Johnson	Reed	Thomas
Bristow	Kenyon	Root	Thompson
Bryan	Kern	Saulsbury	Thornton
Burleigh	Lane	Shafroth	Tillman
Burton	Lewis	Sheppard	Townsend
Chamberlain	Lippitt	Shields	Vardaman
Chilton	McCumber	Shively	Walsh
Clark, Wyo.	Martine, N. J.	Simmons	Warren
Cummins	Nelson	Smith, Ariz.	Weeks
Dillingham	Newlands	Smith, Ga.	Williams
Gallinger	Norris	Smith, Md.	Works
Goff	Overman	Smith, S. C.	

Mr. SHEPPARD. My colleague [Mr. CULBERSON] is unavoidably absent. He is paired with the Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

Mr. SMOOT. I desire to announce that the senior Senator from Delaware [Mr. DU PONT] and the junior Senator from Wisconsin [Mr. STEPHENSON] are unavoidably detained from the Senate.

Mr. KERN. I desire to announce that the junior Senator from Louisiana [Mr. RANSDELL] is unavoidably detained from the Senate on account of public business. I also desire to announce that the senior Senator from Tennessee [Mr. LEA] is unavoidably absent from the city.

The PRESIDING OFFICER. Sixty-three Senators have answered to their names. A quorum of the Senate is present. The Senator from Nevada will proceed.

Mr. NEWLANDS. Mr. President, I regard it as a matter of congratulation that the banking and currency measure is in its present situation before the Congress of the United States, for I believe that as a result of the work done by the other House and by the two sections of the Senate Committee on Banking and Currency, and as the result of the thorough deliberation which will be had in the Senate of the United States, we shall have a splendid law, which will meet the economic, industrial, and financial requirements of the country. I deem it also a matter of congratulation that the minority party in the Senate, which, as we all know, has been an adherent of the

central-bank system, realizing that contention for that system is useless, has determined not to insist upon its contention here, but to collaborate with the majority party in the perfection of a regional system of banking, which seems to be the only practicable method of banking reform.

NO INTENTION TO OPPOSE PENDING BILL.

So far as I am concerned, Mr. President, my purpose is not to oppose, but simply to modify, the pending bill, to extend the regional system therein provided so as to secure a regional reserve association in every State, and to unite these State reserve associations in a Federal association at Washington, with a view to strengthening them all in the bonds of union and securing to the weaker associations the supporting strength of the stronger associations through this federation. The plan which I urge involves all the advantages of the regional system and enlarges them. It also involves in this beneficent work the concentration of the banking power of the Nation itself, which is one good feature of the central system.

Mr. President, we find that in this country we have a larger banking capital per capita than has any other country in the world; that we have a larger per capita circulation than any civilized country except France; and that the banking power of the Nation as such is greater proportionately than is that of any other country. We are not deficient in banking capital; we are not deficient in surplus; we are not deficient in reserves; but we are deficient in the methods that keep money, which is the lifeblood of commerce, in circulation, so running as to avoid at any point the congestion that leads to stagnation. The purpose of this legislation is to promote and accelerate that circulation, not to inflate the existing volume of capital employed in banks or the existing volume of money, but to make the existing money current through the arteries of commerce.

In order to make the money current in the arteries of commerce, it is essential that we should avoid these constantly recurring panics and stringencies, either local or State wide or interstate and national, the effect of which is to lock up trade, to arrest commercial transactions, to injure the debtor, and to gradually turn over the accumulations of enterprise to the lenders of money. In order to make money current, it is essential that our banking system should be as evenly proportioned as possible. The difficulty with us is that we have two banking systems, one National and the other State, the capital and surplus employed in the national banking system being about equal to that employed in the State banking system—nearly $2,600,000,000 in each. We find that in the national banking system there are only about 7,000 commercial banks, and in the State banking system there are nearly 20,000 commercial banks.

Why is it that the majority of people bent upon bank organization go to the State laws for their charters? The reason is that there is less restriction in those laws. Every man engaging in business desires to do so with as free a hand as possible, and the very restrictions and restraints in the national banking act intended to protect the people against bank panics and stringencies and inflations and contractions tend to make that system less resorted to than is the State bank system, which has not these restraints and retrictions. So we find the majority of commercial banks organized under State laws, varying as to efficient control and regulation, and the minority only, though equal to the State banks in capitalization and surplus, organized under national law.

HARMONY BETWEEN STATE AND NATIONAL BANKS.

Our very first effort, it seems to me, should bring about some harmony of proportion between the State and the National banks and to strengthen the individual banks of both systems by the same cautionary requirements if we can accomplish the latter under the exercise of any grant of national power. I take it that the power of the Nation is ample; that the power of the Nation over interstate commerce enables it to take hold of a State bank engaged in interstate exchange, just as it takes hold of a State railroad engaged in interstate transportation, and to regulate it and control it with reference to safety and the protection of the business world; and that just as we apply safety devices under national law to purely State corporations engaged in interstate transportation, we can apply safety devices to purely State banks engaged in interstate commerce.

Here let me say that interstate exchange is just as essentially a part of interstate commerce as are interstate transportation and interstate trade; that in every transaction of national importance either interstate trade or interstate transportation or interstate exchange is resorted to, and that the State bank engaged in interstate exchange is just as much a national instrumentality for the purpose of engaging in interstate commerce as a purely State railroad that is engaged in interstate transportation is an instrumentality of the Nation for interstate commerce. So that the power exists.

Now, how shall we exercise that power, and what is the fact? The fact is that the national banks are compelled by law to keep on an average 17 per cent of their deposits in cash, the country banks keeping 15 per cent, and the reserve city banks keeping 25 per cent, an average of 17 per cent, while the statistics show that the State banks, under the varying laws of the States, keep on an average only 7¾ per cent of reserves. Why this difference? Which is the correct standard? Is the national requirement too high or is the State requirement too low?

In the consideration of the question of reserves our Committee on Banking and Currency has seen fit to report in favor of a reduction of the reserve provided for by the national banking act, requiring only 12 per cent in the place of the 15 per cent required of the country banks and 15 per cent in place of the 25 per cent required of the reserve city banks. They have doubtless recommended this because of the superior perfection of the reserve system created by the proposed law; and realizing that the reserves can be made more effective by unionizing them and consolidating them under the proposals of the pending bill, they have concluded that it would be wise not to exact so great a percentage as heretofore. The percentage which they do exact in the pending measure is an average of about 13¼ per cent, whilst the average per cent of reserves in the State banks to-day, according to the statistics, is only 7¾ per cent.

It seems to me perfectly obvious that if we are to act on this subject in a proper and comprehensive way, regarding all banks, whether National or State, as national instrumentalities so far as interstate commerce is concerned, we should require the same reserve of the State banks as is required of the national banks; and, with that view, the resolution which I have offered provides:

That within five years the reserve of such banks—

That is, the State banks—

shall be required to be equal to at least 12 per cent of the deposits, except in reserve cities, where it shall equal 15 per cent.

What is another element of strength to the banks? It is the capital and the surplus, the latter, of course, constituting capital. The capital is the protection which the depositor has. The depositors' money is mainly invested in commercial paper, with the exception of the percentage which the bank is compelled to keep on hand to meet the current checks of the depositors under the reserve system. Obviously, if a bank had no capital, the only security for the depositors would be the investments made by the bank of the depositors' money. The larger the capital, therefore, the larger the margin of protection to the depositors.

RELATION OF CAPITAL TO DEPOSITS.

Singularly enough, in our national banking act we have prescribed no relation whatever between the capital of a bank and its obligations to its depositors. Under the national-bank system a bank with only $50,000 capital can accept $5,000,000 in deposits, and, obviously, $50,000 of capital would not be a margin of protection such as the law should contemplate. There ought to be a proportion between the capital and the deposit obligations, and no bank should be permitted to accept deposits in excess of eight times its capital, so that there would be $1 of capital on hand for every $8 of deposits.

With reference to this, I have suggested in the first paragraph of my resolution that the pending bill should be modified in the following words:

That within five years the capital of every commercial bank, National and State, engaged in interstate commerce shall be required to be equal to at least 12 per cent of its deposits, and that acceptance of deposits beyond this proportion shall be forbidden except upon a proportionate increase of capital.

It will be observed that I have given five years within which to make these readjustments, because I think time is required. Radical readjustments in any part of our system, whether they involve the tariff, our industrial system, or our financial system, should be avoided. Time always should be given for progressive reform. I should expect this reform to be accomplished under the direction of the reserve board called for by the bill, and I should expect the power to be exercised with great wisdom and discretion, both as to the capital and as to the reserve.

We all know that the Interstate Commerce Commission was given that power with reference to safety devices; and it has been its custom to accommodate the requirement to the condition of the various transportation companies, requiring the adoption of such devices immediately in some cases, in others requiring it within a certain period, and oftentimes giving an extension of time, where any good reason was shown.

I believe that these are the only two changes necessary with reference to State banks, and that when we accomplish them we shall put the State banks upon a par with the national banks so far as security to business and to depositors is concerned.

Mr. PAGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Vermont?

Mr. NEWLANDS. Certainly.

Mr. PAGE. Referring to the matter of proportion between capital and deposits, I want to say to the Senator that I had occasion yesterday to look up the report of the Comptroller of the Currency for 1903, and I found that of the 48 national banks in Vermont 30 had more than half as much capital as they had deposits.

Mr. NEWLANDS. That, let me say, is a very extraordinary proportion, and it arises from the character of their business. Most banks make money out of their deposits. The banks in the section where the Senator lives make most of their money, or a large portion of it, out of their capital. They resort to that because of the insufficient volume of their deposits to make the business a paying one. Then, besides, the capital of the banks in the section which the Senator represents is largely invested in the commercial paper of other States, so that the banks in the Senator's section not only finance the region immediately around them, but help in financing other States. They have that fortunate position because of large accumulations of capital, created during many years of effort; whilst in the western regions the banks have not this accumulation of capital, and there the effort is to do business on as small a proportion of capital to deposits as it is possible to maintain.

UNIONIZING OF BANKS FOR MUTUAL PROTECTION.

Having perfected the State bank system under national law so as to put it on a par with the national bank system, the next question is, How shall all these banks be unionized with a view to preventing bank panics and bank stringencies? The disastrous effects of such conditions upon general commerce we all realize, creating as they do not only breaks in local exchange, but breaks in interstate and international exchange, both of products and of money.

It seems to me our political system is the most perfect that could be devised for this vast continent, embracing so wide an area, because it secures to us all the advantages of local self-government and also the advantages of union. We have here a Government of 48 sovereign States, each one of the States being limited in area, of course, as compared with the area of the United States, though they vary in their proportions to each other, many of them of very small population, many of them of very large population, many of them bound in the future to rival the great countries of Europe, both in population and in wealth. Under our dual system, with the local sovereignty of the State, we create a local public opinion effective in government, in industry, in commerce, and in social life. Then we unionize these sovereignties through the creation of the Government of the United States, which acts for all under the granted powers in matters in which it is important that we should act nationally or with a view to interstate or foreign relations.

The political unit is the State. The United States is an aggregation of such political units. I do not see why in our business and in our commerce and in our laws we should not recognize the boundaries of a State just as we do in government. Every one of these States has its laws relating to industry, to commerce, to banking, and to social organization. Therefore, the natural unit is the State, and not the regions contemplated by this bill, any one of which may embrace not only many States but parts of many States.

The people of the United States have become accustomed to think by States and to think nationally. It seems to me a great mistake to divert them from that line of thought by the creation of regions unknown to our system of government, newly created, and varying from time to time in their boundaries according to the judgment of the reserve board.

We find that the States have been acting as units not only in government but in every form of organization. There is hardly any form of organization—charitable, beneficial, commercial, manufacturing, benevolent—that does not contemplate first the organization of a State unit and then the union of the State units in a national organization. That is true of the various professional organizations, the bar associations, the medical societies, the architectural associations, the art associations, the musical associations, and it is true of the boards of trade. They first unite within a State and then unite nationally by the union of the State boards of trade.

The suggestion which I make, that we should regard as the basic unit the State rather than a newly created region, simply follows the accustomed lines of thought and of organization throughout the United States. I believe it is well to encourage that idea. I believe that every State should have a robust individuality; that it should have its own bank system and its own commercial system; and that every State should have what may be termed a financial center. It is essential to the completion of any civic organization.

OBJECTIONS TO REGIONAL RESERVE ASSOCIATIONS.

One of the complaints I have to make of the system of regional organization called for by the pending bill is that it draws the attention of the people away from the problems of the individual State and draws their attention to the affairs of a region of indeterminate area, changing in its boundaries from time to time. The danger will be that they will not think in terms of regions at all; that they will become inert regarding the important problems that relate to the very life of the community; and that the regional organization will practically escape the observation of the people who live in the region, and, above all, will escape the effect of public opinion, which, in my judgment, is best organized by States and then nationalized by a union of the States.

Mr. President, the plan which I have suggested involves the organization in every State of a State reserve association, of which the member banks shall be not only the national banks in that State, but the State banks that are engaged in interstate commerce. As a matter of fact, all State commercial banks, all so engaged, for no bank could prosper that did not engage in interstate exchange, it would have little patronage, because it could not meet the requirements of commercial communities.

In that respect the plan I present differs from that presented by the committee. They make membership in the regional organization compulsory upon the part of the national banks. They make it permissive regarding the State banks. The plan I suggest makes it compulsory with both; for it is impossible to have a system of banking when one half is good and one half is bad, one half is strong and the other half weak, for the weakness of the weaker half will detract from the strength of the stronger half. You may make the national-bank system of this country perfection itself; yet if the State-bank system continues weak, the national system itself will be weakened by that fact. A panic which starts in a weak State bank to-morrow may involve not only State but national banks. Panics are unreasoning.

Therefore it is important that all the banks of the country that are engaged in interstate commerce shall be compelled to come inside of and be members of these reserve associations. That power can be exercised under the interstate-commerce clause of the Constitution; for so far as a State bank engages in interstate commerce it is an instrumentality of interstate commerce, and as such is subject to regulation by the National Government.

Mr. PAGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Vermont?

Mr. NEWLANDS. Certainly.

Mr. PAGE. What would the Senator do with the mutual savings banks which have no capital? By far the largest banks in my State are what we term mutual savings banks, which have no capital whatever. Would the Senator compel them to subscribe to stock in this organization?

Mr. NEWLANDS. The plan which I present does not involve stock subscription or capital requirements. The Senator has lost sight of the fact that my remarks apply only to commercial banks and not to savings banks or purely investment banks. We are engaged in a regulation of commerce between the States. There are two classes of banks which engage in such commerce—one State banks and the other national banks. My belief is that if it is wise and just that all the national banks should be unionized for the protection of the community and the banks themselves against bank panics and stringencies, that it is just as important that the State banks should be similarly unionized; and I believe we have the power to accomplish this under the interstate-commerce clause of the Constitution.

We provide in this bill that where a national bank refuses to come into such a union it shall within some fixed period lose its charter and go out of business. Yet we say to the 17,000 or more State banks, doing half the commercial business of the country, both local and interstate, and having a capitalization as large as that of the national banks, "This is permissive; you are permitted to come in; but there is no compulsion." Of course we may make the features of this bill so attractive that it will coax the State banks in; and if we do not resort to the compulsory process, I favor making the provisions of the bill so attractive as to coax them in, simply because I do not believe the system can be effective unless it embraces the union of all the banks engaged in commerce in the country.

FUNCTIONS OF STATE RESERVE ASSOCIATIONS.

Mr. President, what ought a State reserve association to do? To make money? No; I do not think so. Its function is to unionize the member banks in such a way as to make them efficient instrumentalities of commerce and to protect the country from panics and stringencies. There is no need of such an

organization having any capital. How will it operate? My answer is that you can require by law the member banks, as is compelled under the system of the pending bill, to deposit with the reserve association in each State one-third of the cash reserves required by law to be kept by them. That will constitute the banking capital of the State reserve association. What will it amount to? We find by the statistics that the reserves of all the banks, national and State, amount to a billion and a half of dollars. One-third of a billion and a half dollars would be $500,000,000. That would go into the treasury of these State associations, and divided equally among all the 48 States it would make over $10,000,000 to each. Of course, it would only go proportionately, but the aggregate would be $500,000,000 gathered into these State reserve associations. Another third of the reserves required of the banks could be kept within their own vaults, to respond to the checks of their creditors, and the remaining third of the reserves of the country banks could be kept, as is now the fact, by the individual banks in the great reserve cities, to be used there for purposes of exchange and as a basis of credit. So under this system of reserves required of these banks, whether 12 or 15 per cent, we would have one billion dollars of cash in the vaults of the banks themselves, both country and reserve city banks, and $500,000,000 in the various State reserve associations.

But the objection is made that with reference to the smaller States the amount of reserves would be very inconsiderable in the State reserve association. My answer to that is that the amount of the reserves deposited in the State reserve association in a small State would bear the same proportion to the banking capital and reserves and to the commerce of that State that the amount of the reserves deposited in the State reserve association of a large State does to the banking capital and the deposits and the commerce generally of such State, and that proportionately the deposit in a small State in a reserve association would be as large as in the larger States.

Now, what will this money be used for, you will ask, that is in the hands of the reserve associations organized under this bill, with a board of directors selected as provided for in the bill, one-third from the stockholders, one-third from the commercial community at large, and one-third appointed by the Government? What use would you make of that money? Whenever in a single community in that State there is a panic or a stringency this State reserve association organization could rediscount the commercial paper held by an endangered bank upon its indorsement, and it would hold as security for its advances not only the rediscounted paper indorsed by the individual bank, but also the cash reserve deposited by that bank with the State reserve association. So it would be impossible for it in the exercise of ordinary caution to lose anything. It would have not only the rediscounted paper and the cash reserve deposited with it as security, but it would also have the guaranty of the individual bank and the capital and surplus of that bank backing that guaranty.

The effect of this would be that in every State there would hardly be a single stringency or panic that would assume even State-wide proportions, and the system would have the advantage of a municipal system of fire protection, which keeps fire apparatus near to the point of conflagration and puts out the fire before it has had a chance to spread.

I believe, Mr. President, that under this method few local panics or stringencies would get beyond local bounds. But as it is possible that that might be the case, the plan which I present provides also for the organization of a Federal reserve board at Washington, the membership of which is to be composed not of individual banks but of these various State reserve associations, 48 in number, with the obligation upon the part of each State reserve association to deposit in this Federal reserve association one-third of the reserves that have been deposited with it by the member banks.

The effect of this would be that inasmuch as all the State reserve associations under this system would have one-third of the total cash reserves of all the banks held by them, which one-third would aggregate $500,000,000, they would be compelled to turn over to the Federal reserve association one-third of that, or $166,000,000; so we would have one gigantic Federal organization at Washington, with reserves in its vaults aggregating $166,000,000. That fund would enable such reserve association to take hold of any panic or stringency that assumed large proportions in any individual State or in any section, or that assumed interstate or national proportions, and through a system of rediscount of the commercial paper held by the State reserve association as the result of a previous rediscount of commercial paper held by the individual banks could furnish it with the additional money necessary to check the panic or stringency.

The Federal organization at Washington would mainly deal with the State reserve associations of the several States, taking over the rediscounted paper that had been taken up by those organizations from the member banks and giving them cash with which to furnish the money necessary for additional loans to guard against a stringency, or with the additional money necessary to pay the depositors and relieve their fears and arrest the panic.

This Federal reserve association at Washington would not only have the $166,000,000, but under the provisions of the plan which I suggest it would have the deposit of Government funds, aggregating $300,000,000, and it would have also the power to receive these Federal reserve notes, which it could use in rediscounting commercial paper anywhere throughout the country. The resources, therefore, of this Federal reserve system at Washington would be enormous, and yet all of it acquired, recollect, without the contribution of capital by any member State association or bank.

CAPITAL FOR REGIONAL BANKS.

One of the things that the banks object to in this bill is the fact that they are called upon to furnish the capital of these various regional banks. The country banks look upon it as a diversion of capital which can be employed locally to a banking organization five or six hundred, perhaps a thousand, miles away. They regard it as a hardship, and they protest against it. I would not have a moment's hesitation in insisting upon that capital being provided if it were at all necessary, but I insist that it is not necessary. The banking capital of this country surpasses that of any other country in the world in volume and in proportion to population. The difficulty has not been one of banking capital. The difficulty has always been one of the fluidity of our circulating medium. There is no reason why this State reserve association or the Federal reserve association at Washington should call for any increase of banking capital. On the contrary, they will be put to it to find ways in which to invest it, and we are likely to turn them into organizations for investment and speculation and inflation instead of keeping them to their legitimate function, which is that of preventing panics and stringencies by furnishing the actual cash that is required at the point of attack, and so mobilizing the cash reserves of the country as to make them effective at the point of attack.

The sections of the resolution to which I have referred are the following:

Sixth. That each member bank shall deposit and forever maintain in such State reserve association at least one-third of its cash reserve. Such State reserve association shall have powers of supervision and regulation of its member banks, and also the power of rediscount of commercial paper guaranteed by the member bank, the reserve of such member bank to stand as additional security for its guaranty.

Seventh. That a Federal reserve association at Washington shall be organized, whose members shall be the State reserve associations; that each of such member associations shall deposit and forever maintain in the Federal reserve association one-third of the reserves deposited with it by the member banks; that such system shall also provide for the deposit in such Federal reserve association of Government funds and also for the issue to it of Federal reserve notes.

Eighth. That power be given to such Federal reserve association to rediscount indorsed commercial paper held by any State reserve association and indorsed by it, and to use therefor the cash deposited by the member associations, the Government funds deposited with it, and the Federal reserve notes.

The Federal reserve association for its advances, recollect, will have the security of the notes which have been rediscounted by the State reserve associations, which notes have also been indorsed by the member banks, so that its security will be the indorsement of the member banks, the indorsement of the State reserve association, the capital of the member banks of the State associations, and the cash reserves deposited by the State reserve associations with the Federal reserve association.

It is hardly possible to conceive how under such a system there could be any risk whatever. Now, suppose we should conclude that, with a view to further security, it is necessary for these associations, both the State associations and the Federal associations, to have capital, what would they do with that capital? The only way that it could be employed would be by competition with the member banks in the ordinary commercial transactions of discounting domestic commercial paper and of foreign exchange.

I think all that business belongs to the member banks, and I believe that they can better attend to it than the national organizations which it is proposed to create by this bill, and that we will only involve those associations in confusion and annoyance by turning over to them a large capital to administer.

IMPORTANCE OF EARLY ACTION.

Mr. President, it is of the highest importance, in my judgment, that we should act quickly upon this matter. We are passing through a readjustment under the tariff legislation that has been passed. That readjustment involves an average reduction in our duties of from 43 per cent to 25 per cent, a reduction of over 15 per cent. The theory of the Democratic Party has been that our domestic producers of protected articles have uniformly added to their price the duty, thus making the price of a protected article whose normal price would be $1, $1 plus the duty of 43 cents, or $1.43. That has been the contention of the Democratic Party. If that is true, then, when we reduce that 43 cents to 25 cents it means that every domestic producer of dutiable articles has to charge on an average $1.25 for the article for which he formerly received $1.43. If that is true, it is a very enormous reduction. It is such an amount as would fairly constitute the entire profit of a manufacturer and more than the entire profit, for I imagine the average profit of the manufacturer is not more than 10 or 12 per cent.

Our manufacturers have shared that increased price caused by the duty with their laborers. Hence we find labor at a higher standard in this country than in any other country. The manufacturers now must either take that entire loss, that entire reduction from $1.43 to $1.25, or share it with their laborers. If they attempt the latter it means strikes and lockouts and economic readjustments. If they seek to impose none of it upon labor, it means the entire loss of this reduction by themselves and, of course, makes them eager to establish such efficient methods as will cheapen the cost of production. Doubtless the effect of our protective system has been to make our production wasteful instead of economical, and it is highly desirable that our manufacturers and producers throughout the country should be encouraged in every effort that leads to efficiency.

In order to accomplish this, a perfect banking system is essential; and it is most unfortunate; just at the time when these great producers and manufacturers are called upon to apply all their intellect and all their energies to more efficient methods of production with a view to diminishing its cost, that the financial facilities of the country should be so tied up as to deny them the credit that is essential to that operation.

We know that the financial system of the country is tied up in a greater or lesser degree, not because the banks lack capital, not because the banks lack cash, but simply because they are uncertain, and some people either too timid or too designing have created a sentiment, not of alarm but of caution throughout the entire country, which is gradually contracting the credit facilities of the banks. So far as I am concerned I do not believe that there is any deeply designed purpose to tie up the finances of the country with a view to impressing legislation. I believe that the action of the banks is due to caution bred of experience. The banks which passed through the panic of 1907 have realized that a psychological condition can produce a run upon the banks, and inasmuch as, under the present system, they have no method of unionizing banks for protection and defense, each bank is endeavoring to raise its own fortifications and to strengthen its defenses, and it deems it wise for that reason to hold within its vaults as large a reserve as possible.

The banks of the country have never been in a stronger position than they are to-day so far as their cash reserves are concerned, but they are cautious and timid and are not letting out the money as freely as they have been accustomed to doing, either to those engaged in production or in commerce. It is of the highest importance, therefore, intent as we are upon producing a system that will unionize these banks for mutual protection and defense, that we should do it now. The time which has thus far been expended has not been lost. It has produced what I regard as a patriotic surrender on the part of the minority party of their theory regarding the central-bank system, and that party, instead of organizing itself in strong and protracted opposition to a system which they believe will not be as efficacious as a central-bank system, recognizing the ultimate futility of such a struggle, has patriotically surrendered, we may say, practically its conviction upon that subject and is now joining with us under the regional system with a view to perfecting it. The only differences now that exist are as to the number of regional banks, one section of the committee insisting upon four, the other section insisting upon eight, and the President insisting upon not less than twelve, with power of expansion.

So far as I am concerned, I stand for 48 regional banks, each one bounded by State lines, and I stand for a system, not covered by this bill, of unionizing every one of those State reserve associations into a Federal organization at Washington, which can mass all their resources and all their powers to meet dangers that are interstate or national in proportion.

It ought not to take us long to determine as to what the number of banks shall be. The other details of the bill can be easily adjusted when that question is determined, and I am in favor of determining that basic question by an early vote in the Senate or in party conference. I believe that the party has a certain responsibility with reference to this measure and that where we differ it is of the highest importance that we should determine upon some one basic plan. Whether that basic plan be one involving 4 banks or 8 banks or 48 banks, with the Federal reserve association at Washington added, giving it strength and security, I shall be glad to unite with the majority in speedy and effective legislation upon this subject.

Mr. WALSH. Mr. President, before the Senator takes his seat I desire to invite his attention to the fifth subdivision of his resolution for the purpose of asking a question in relation to it. The fifth subdivision provides:

That there shall be organized in every State a State reserve association, in which the membership of all commercial banks, both National and State, shall be compulsory, as a condition of the continued existence of the national banks and of the privilege of continuing in interstate commerce as to the State banks.

I gather from the remarks of the Senator that his plan would be to prohibit the State banks, if they declined to come into the proposed system, from engaging in the transmission of money from one State to another.

Mr. NEWLANDS. Yes.

Mr. WALSH. Is it the view of the Senator that such a power rests in the National Government?

Mr. NEWLANDS. I think it does as a regulation of interstate commerce.

Mr. WALSH. I call the Senator's attention to Willoughby on the Constitution, section 293, as follows:

In Nathan against Louisiana—

I will say that the case of Nathan against Louisiana is reported in Eighth Howard, Decisions of the Supreme Court of the United States, page 73—

In Nathan against Louisiana the court lay down the doctrine that the buying and selling of foreign bills of exchange, while to be sure an aid to, and an instrument of, commerce, is not itself commerce. "The individual," says the court, "who uses his money and credit in buying and selling bills of exchange and who thereby realizes a profit * * * is not engaged in commerce, but in supplying an instrument of commerce. He is less connected with it than the shipbuilder, without whose labor foreign commerce could not be carried on." And also: "A bill of exchange is neither an export nor an import. It is not transmitted through the ordinary channels of commerce, but through the mail."

I do not desire to detain the Senator with a discussion of the subject now, but if the conclusion should be reached that it would be impossible to force the State banks into the general system, would he still hold to the view that there should be 48 banks, being a union simply of the national banks in each State?

Mr. NEWLANDS. I would. Let me say with reference to that decision that I am familiar with it. It is a decision rendered a very long time ago, in 1850, I believe, upon a subject of taxation, as to whether a State had the power to tax the occupation of a broker who was engaged in selling foreign bills of exchange; and in that connection the court upheld the power to tax and gave the reason which the Senator has read. That reasoning is not, in my judgment, satisfactory, and will not, in my judgment, be adhered to. There has been since that time a vast advancement in the views of the courts regarding the powers of the Federal Government under the interstate-commerce power. We find that they have held that a whisper over a telephone between two States is interstate commerce; they have held that a message sent over a telegraph wire between two States is interstate commerce; and those decisions indicate a gradual enlargement of the views of the courts themselves as to the magnitude of the power of the National Government over interstate commerce.

Mr. WALSH. Mr. President, I desire to say, for the information of the Senator, if he will pardon a further interruption, that the Supreme Court now has before it again the consideration of the question as to whether insurance might justly be regarded as interstate commerce, and in the course of a week a further announcement is expected from that court on the subject.

SCOPE OF INTERSTATE COMMERCE.

Mr. NEWLANDS. Yes; but whatever may be the decision upon that case, I would not believe that it would be extended to this. Logically I can not see how interstate commerce can be conducted without embracing three things—interstate transportation, interstate trade, and interstate exchange. Transportation we have seized hold of in the most effective way, and the courts have been most liberal in their declaration of the Federal powers regarding transportation. Under it we seize hold of a State corporation whose railroad is entirely within the boundaries of the State, and we regulate it as an instrumentality of interstate commerce, because it carries passengers who have an interstate destination or because it carries freight that is ultimately destined for a point in another State. I can recall the time when every inch of ground with reference to that exercise of power was contested by the railroads and opposing views maintained by a large number of lawyers, yet those views have all yielded to the advance of the court's decisions.

I have been urging for years an interstate trade commission with a view to regulating the great corporations that are engaged in interstate trade, just as the railroads are engaged in interstate transportation. I can recall the time when Members of this body and Members of the other body would protest against such legislation as involving usurpation of the rights of the States, and yet now it seems to be generally admitted that that power can be exercised. So it is with interstate exchange and with all the various methods that the banks pursue with a view to supplementing transportation and trade by giving the facilities in the actual transport either of the money or of the credits necessary to satisfy the requirements of commerce. So, logically, I can not see how the courts can resist a regulation of a bank engaged in interstate exchange any more than it has resisted the regulation of corporations engaged in interstate transportation or in interstate trade.

I ask permission to add to my remarks some quotations and a statistical table, with explanation, furnished to me by the courtesy of the Assistant Secretary of the Treasury, Mr. Williams. The table includes savings banks, which I should prefer to exclude, as they are not commercial banks, and does not show the cash reserves of the banks, which I would wish to include. Later on I shall present a table modified in these particulars, but there is so much desirable information in this table that I desire to have it printed now.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to follows:

[NOTE.—Columns A, B, and C relate to National, State, mutual and stock savings, and private banks, and loan and trust companies in the United States and is from the Comptroller of the Currency for 1912. Column D shows the total exchanges of the clearing houses of the United States for 1912.—Authority: Comptroller of the Currency. Column E shows the true value of all property in the United States for 1904.—Authority: United States census report. Columns F, G, and I show the total value of the products of the fisheries, the manufactures, and of the mines, quarries, and wells in the United States, respectively.—Authority: Census of 1905. Column H shows the total value of all the crops, dairy products, wool, poultry, eggs, animals sold and slaughtered, honey and wax, and the forest products of the farms of the United States for the year 1909; the above include only the articles sold or for sale.—Authority: Census report. JOS. S. MCCOY, *Government Actuary.*]

The PRESIDING OFFICER. The Chair calls the attention of the Senator from Nevada to the fact that his resolution is still pending. What disposition would he like to have made of it?

Mr. NEWLANDS. I should like to have it referred to the Banking and Currency Committee.

The PRESIDING OFFICER. It is so ordered.

ADJOURNMENT TO SATURDAY.

Mr. KERN. I move that when the Senate adjourns to-day it adjourn to meet on Saturday next at 2 o'clock p. m.

The motion was agreed to.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After one hour spent in executive session the doors were reopened, and (at 4 o'clock and 42 minutes p. m.) the Senate adjourned until Saturday, November 29, 1913, at 2 o'clock p. m.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *November 26, 1913.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou great Spirit, Father soul, to whom we are indebted for all that we are and all we can hope to be, we rejoice that our destiny is involved in infinite wisdom, power, and goodness. "The soul lives only as it touches eternal life," hence we worship Thee, we praise Thee, and would hallow Thy name in the common daily duties of life. "Blessed is the nation whose God is the Lord." We thank Thee that in accordance with a long-established custom our people will assemble on the morrow at their homes, in their places of worship, and pour out their hearts in thanksgiving and praise for the preservation of our lives, our homes, our Republic, with its abundant harvests and continued prosperity, in peace and good will to all mankind, that Thy kingdom may come and Thy will be done on earth as it is in heaven. For Thine is the kingdom and the power and the glory forever. Amen.

The Journal of the proceedings of Saturday, November 22, 1913, was read and approved.

SWEARING IN OF A MEMBER.

The SPEAKER. The Speaker has before him the credentials of Mr. CHARLES P. COADY, a Member elect from the State of Maryland, to succeed the late Representative KONIG. They are properly signed and certified by the State authorities. If Mr. COADY will present himself, the Chair will administer the oath of office.

Mr. COADY appeared at the bar of the House and took the oath of office.

ARCHIE LEWIS.

Mr. MANN. Mr. Speaker, I ask unanimous consent to address the House for 10 minutes with reference to a tribute recently paid by the Supreme Court of the United States to one of its deceased employees.

The SPEAKER. The gentleman from Illinois asks unanimous consent to address the House for 10 minutes. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, it seems to me appropriate to lay before the House and insert in the RECORD the following statements taken from Washington newspapers, showing the tribute paid by the Supreme Court of the United States to the memory and services of a deceased employee of that court. The Chief Justice and the Associate Justices and the officers of the Supreme Court in thus honoring Archie Lewis honored themselves, and he who performs his duty well in whatever station of life is an honor to us all.

[From the Washington Post November 23, 1913.]

FIVE JUSTICES AT HIS BIER—SUPREME COURT PAYS UNUSUAL TRIBUTE TO VETERAN NEGRO EMPLOYEE—ARCHIE LEWIS NEVER FAILED IN DUTY IN ALL HIS 64 YEARS AS A MESSENGER.

As a last tribute to a faithful servant five members of the United States Supreme Court, including Chief Justice White, crowded into the humble home of Archie Lewis, the court's negro messenger, yesterday and were present during the funeral services over the aged man. Lewis, who had been an employee of the court for almost 64 years, had always been true to his duty, and all of the justices were fond of him. The funeral was held from his small home on M Street, near New Jersey Avenue.

"He was a man of great character," said Justice Willis Van Devanter. "He had a wonderful disposition, and endeared himself to my associates and myself. He worked up to a few days ago, and died rather suddenly Wednesday."

The justices who attended the funeral were Chief Justice Edward Douglass White, Justices Willis Van Devanter, Joseph Lamar, William R. Day, and Oliver Wendell Holmes.

[From Washington Star, November 25, 1913.]

MEMBERS OF SUPREME BODY AT FUNERAL OF ARCHIE LEWIS, MESSENGER.

Chief Justice White and four of the Associate Justices of the Supreme Court of the United States yesterday afternoon crowded into a humble little home in this city to pay final honors to Archie Lewis, who for 64 years served as the messenger in charge of the robing room of the court. Lewis died at his home, 426 M Street NW., Thursday, and it was there that the funeral services were conducted yesterday.

OTHERS PAY TRIBUTE.

Besides the five members of the Supreme Court there were present Maj. Wright, marshal of the court; James Maher, chief clerk; Charles Bell, assistant clerk; and Frank K. Green, crier of the court, and a number of other public officials, some of them from the public schools, in which Archie Lewis had been much interested for many years.

The funeral service was conducted by Rev. W. V. Tunnel. Music was given by a quartet. Many beautiful flowers decorated the house.

Lewis, who came to Washington from Virginia as a freedman, and who first obtained his place with the Supreme Court in 1849, was held in high esteem by all the members of the court and its officials. He was a man of high character and exemplary habits, and was faithful in the performance of his duties.

HIS LONG SERVICE.

When Archie Lewis first entered upon his work for the members of the Supreme Court, Chief Justice Taney presided over that tribunal. He was serving the court when three of the justices who attended his funeral yesterday were born—Justices Day, Van Devanter, and Lamar. Chief Justice White and Justice Holmes, the fifth member of the court attending the funeral, had not yet started to school when Lewis began his duties in the Supreme Court.

Lewis was born in 1831, and was 82 years old at the time of his death. He claimed to have served two-thirds of all the men who have occupied the Supreme Bench, and he had a fund of anecdotes about the celebrated men he had known.

WITHDRAWAL OF PAPERS—JOHN M. STEWART.

By unanimous consent leave was granted to Mr. WOODS to withdraw from the files of the House, without leaving copies, the papers in the case of John M. Stewart, Sixty-first Congress, no adverse report having been made thereon.

THE TRINITY OF EVILS.

Mr. QUIN. Mr. Speaker, I ask unanimous consent to insert in the RECORD an address delivered by Hon. WILLIAM H. MURRAY, of Oklahoma, at Columbus, Ohio, November 13, 1913, on the subject of the "Trinity of Evils."

The SPEAKER. The gentleman from Mississippi asks unanimous consent to extend his remarks in the RECORD by inserting the document named. Is there objection?

There was no objection.

COMMERCE ON THE GREAT LAKES.

Mr. GORDON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting an address delivered by Hon. Harvey D. Goulder, of Cleveland, Ohio, upon the subject of commerce on the Great Lakes.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD in the manner stated. Is there objection?

There was no objection.

ADJOURNMENT UNTIL SATURDAY.

Mr. JOHNSON of Kentucky. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on Saturday next.

The SPEAKER. The gentleman from Kentucky asks unanimous consent that when the House adjourns to-day it adjourn to meet on Saturday next. Is there objection?

There was no objection.

HIGH COST OF LIVING.

Mr. AUSTIN. Mr. Speaker, I ask permission to introduce a resolution which I have here.

The SPEAKER. Is it a privileged resolution?

Mr. AUSTIN. I do not think there will be any objection to it.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to offer a resolution.

Mr. HARDWICK. Mr. Speaker, reserving the right to object, I would like to know before the resolution is read what it is about.

Mr. AUSTIN. It is in reference to the high cost of living, a very vital and interesting subject at this time.

Mr. HARDWICK. Mr. Speaker, let us have the resolution read.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Whereas the Democratic Party in a platform adopted at Baltimore convention July, 1912, charged explicitly that the "excessive prices" and high cost of living resulted in a large measure from the protective tariff law enacted and maintained by the Republican Party; and

Whereas the Attorney General of the United States has announced his intention to investigate the present high cost of living and the combination of dealers in foodstuffs and cold-storage operators, notwithstanding the fact that the Underwood-Wilson tariff law is now in force; and

Whereas such action by the Attorney General is a virtual admission that the high cost of living in the United States did not result from the tariff laws enacted by the Republican Party: Be it

Resolved, That the Speaker of this House be authorized to appoint a special committee of 10 Members to investigate the reasons for the palpable failure of the Underwood-Wilson tariff law to fulfill the promise of the Democratic Party and reduce the cost of living, and to extend an apology to the Republican Party and to the American people whose votes established President Wilson's so-called new freedom.

Mr. HARDWICK. Mr. Speaker, reserving the right to object, I wish to say to my friend from Tennessee that there are so many absolutely inaccurate statements, so many misstatements of fact, contained in the whereas clauses of the resolution, that the House could not be expected to adopt any such peculiar resolution as this, even after an investigation by a committee, should the House desire to conduct such an investigation. Therefore, Mr. Speaker, in the interest of truth I object to the resolution.

The SPEAKER. The gentleman from Georgia objects.

JOINT RESOLUTION AND BILLS PRESENTED TO THE PRESIDENT FOR HIS SIGNATURE.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had presented to the President of the United States for his signature a joint resolution and bills of the following title:

H. J. Res. 139. Joint resolution to relieve destitution among the native people and residents of Alaska;

H. R. 8702. An act to authorize the county of Miami, Ind., to construct a bridge across the Wabash River in Miami County, Ind.; and

H. R. 7384. An act to authorize the payment of an indemnity to the Italian Government for the killing of Angelo Albano, an Italian subject.

ADJOURNMENT.

Mr. JOHNSON of Kentucky. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 15 minutes p. m.), in accordance with the order heretofore made, the House adjourned until Saturday, November 29, 1913, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion in the case of Mary A. Gammon, O. B. Whatley, and D. A. Whitehead, sole surviving heirs of Wilson O. B. Whatley, deceased, *v.* The United States (H. Doc. No. 279); to the Committee on Claims and ordered to be printed.

2. A letter from the Postmaster General, transmitting a tabular statement showing in detail the claims of postmasters for reimbursement for losses of money-order and postal funds which have been acted on by the Postmaster General during the fiscal year 1913 (H. Doc. No. 280); to the Committee on the Post Office and Post Roads and ordered to be printed.

3. A letter from the Postmaster General, transmitting a memorandum of allowances granted, payable from the appropriation for unusual conditions for the fiscal year 1913 (H. Doc. No. 281); to the Committee on the Post Office and Post Roads and ordered to be printed.

4. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on examination and survey of Grand Haven Harbor, Mich., to east end of Fulton Street and including channel into Spring Lake (H. Doc. No. 282); to the Committee on Rivers and Harbors and ordered to be printed.

5. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of St. Francis River, Mo., and plan and estimate of cost of improvement (H. Doc. No. 283); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

6. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Scotts Creek, Va. (H. Doc. No. 284); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

7. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of Great Chazy River, N. Y., from the village of Champlain, N. Y., to the mouth thereof (H. Doc. No. 285); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

8. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on the examination of Buffalo Harbor, N. Y., with a view to securing a channel from the outer harbor at or near a point opposite the middle entrance to connect with the Buffalo River at or near Louisiana Street; also a view to the enlargement of the anchorage basin in the outer harbor to meet the demands of commerce (H. Doc. No. 286); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

9. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination and survey of Charlotte Harbor, N. Y., with a view to deepening and widening the channel, to an extension of the jetties, and to providing a turning basin (H. Doc. No. 287); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

REPORT OF COMMITTEE ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 3 of Rule XIII,

Mr. HOUSTON, from the Committee on Territories, to which was referred the bill (H. R. 1739) to authorize the President of the United States to locate, construct, and operate a railroad or railroads in the Territory of Alaska, and for other purposes, reported the same with an amendment, accompanied by a report (No. 92), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R 4225) granting a pension to Ross Robinson; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 8262) granting an increase of pension to Catharine Dillane; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 9248) granting a pension to Frederick Antoni; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 9406) granting a pension to Winona Hawthorne Buck; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. TAGGART: A bill (H. R. 9407) for the acquisition of a site and the erection thereon of a public building at Mound City, Kans.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 9408) providing for the erection of a public building in the city of Olathe, Kans.; to the Committee on Public Buildings and Grounds.

By Mr. KEATING: A bill (H. R. 9409) providing for the construction and maintenance of public roads; to the Committee on Roads.

Also, a bill (H. R. 9410) providing for the designation of suitable sites for camp grounds in the forest reserves and on other public lands; to the Committee on the Public Lands.

By Mr. JOHNSON of Kentucky: A bill (H. R. 9411) relating to expenditure of money received on account of liquor licenses, Washington Market Co., and from other sources; to the Committee on the District of Columbia.

By Mr. FOWLER: A bill (H. R. 9412) to recognize the public services of James C. Halleck, sr., as the originator of the clearing house in America, and to promote the establishment of a universal clearing house by voluntary association; to the Committee on Interstate and Foreign Commerce.

By Mr. MADDEN: A bill (H. R. 9413) to reclassify the salaries of assistant postmasters and employees above the clerical grades in post offices of the first and second class; to the Committee on the Post Office and Post Roads.

By Mr. CLARK of Missouri: A bill (H. R. 9414) to establish a fish-cultural station on Salt River in Ralls County, Mo.; to the Committee on the Merchant Marine and Fisheries.

By Mr. STEPHENS of Texas: A bill (H. R. 9415) to provide for the purchase of a site and the erection of a public building thereon at Canadian, State of Texas; to the Committee on Public Buildings and Grounds.

By Mr. KALANIANAOLE: A bill (H. R. 9416) to increase the limit of cost for the purchase of a site and the construction of a public building in Honolulu, Territory of Hawaii; to the Committee on Public Buildings and Grounds.

By Mr. CRISP: A bill (H. R. 9417) to amend the act of June 11, 1878, entitled "An act providing a permanent form of government for the District of Columbia," by repealing so much of said act as authorizes one-half the expenses of the District of Columbia to be paid out of the Treasury of the United States; to the Committee on the District of Columbia.

By Mr. JOHNSON of Washington: A bill (H. R. 9418) to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors and for regulating traffic therein, and for other purposes," approved June 30, 1906; to the Committee on Interstate and Foreign Commerce.

By Mr. SUTHERLAND: A bill (H. R. 9419) granting a pension to teamsters, bridge builders, and railroad repairers who were in the service of the United States during the Civil War; to the Committee on Invalid Pensions.

By Mr. GORMAN: A bill (H. R. 9420) to enable the President to propose and invite foreign Governments to participate in an international conference to promote an international inquiry into the causes of the high cost of living throughout the world, and to enable the United States to participate in said conference; to the Committee on Foreign Affairs.

By Mr. MacDONALD: Resolution (H. Res. 317) directing the Commissioner of Corporations to investigate and report upon the concentration of private ownership of natural resources; to the Committee on the Judiciary.

By Mr. BRITTEN: Resolution (H. Res. 318) directing the Committee on the Judiciary to investigate certain phases of the high cost of food products; to the Committee on the Judiciary.

By Mr. MURRAY of Oklahoma: Joint resolution (H. J. Res. 151) proposing an amendment to the Constitution of the United States; to the Committee on Election of President, Vice President, and Representatives in Congress.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANTHONY: A bill (H. R. 9421) for the relief of John T. Glynn; to the Committee on Claims.

By Mr. CLARK of Missouri: A bill (H. R. 9422) granting an increase of pension to Christopher Stewart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9423) granting an increase of pension to Jason L. Boyd; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9424) granting an increase of pension to Ella R. Brown; to the Committee on Invalid Pensions.

By Mr. CULLOP: A bill (H. R. 9425) granting a pension to Miner N. Howard; to the Committee on Pensions.

By Mr. DALE: A bill (H. R. 9426) granting a pension to Anna G. Mitchell; to the Committee on Invalid Pensions.

By Mr. DONOHOE: A bill (H. R. 9427) to correct the military record of Patrick Duffy; to the Committee on Military Affairs.

By Mr. FOSTER: A bill (H. R. 9428) granting a pension to Eva K. Holmes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9429) granting an increase of pension to Henry Riley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9430) granting an increase of pension to William Capps; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9431) granting an increase of pension to William F. F. Evans; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9432) granting an increase of pension to Isaac A. A. Sprouse; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9433) for the relief of Peter Helfman; to the Committee on Claims.

By Mr. FOWLER: A bill (H. R. 9434) granting an honorable discharge to James Morris; to the Committee on Military Affairs.

Also, a bill (H. R. 9435) granting an honorable discharge to George A. Crisel; to the Committee on Military Affairs.

Also, a bill (H. R. 9436) granting an honorable discharge to Michael Fitzgerald; to the Committee on Military Affairs.

Also, a bill (H. R. 9437) granting an honorable discharge to Morton Sessions; to the Committee on Military Affairs.

Also, a bill (H. R. 9438) to correct the military record of James Millis; to the Committee on Military Affairs.

Also, a bill (H. R. 9439) for the relief of James D. Bruce; to the Committee on Military Affairs.

Also, a bill (H. R. 9440) to correct the military record of Richard Dove; to the Committee on Military Affairs.

Also, a bill (H. R. 9441) granting a pension to William C. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9442) granting a pension to Lewis S. Skiles; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9443) granting a pension to John Ripperdan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9444) granting a pension to John Rayles; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9445) granting a pension to Mary A. Phillips; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9446) granting a pension to Rachael Milhorn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9447) granting a pension to John Levingston; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9448) granting a pension to Daniel Linder; to the Committee on Pensions.

Also, a bill (H. R. 9449) granting a pension to Edward Younger; to the Committee on Pensions.

Also, a bill (H. R. 9450) granting a pension to Nancey E. Shelton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9451) granting a pension to Mary A. Phillips; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9452) granting a pension to George Brooks; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9453) granting a pension to Thomas Jones; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9454) granting a pension to Jeremiah C. Wooten; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9455) granting a pension to Hannah M. Baltey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9456) granting a pension to Hannah Dukes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9457) granting a pension to James Fields; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9458) granting a pension to Lucy A. Todd; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9459) granting a pension to Charles Travelstead; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9460) granting a pension to Martin E. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9461) granting a pension to William M. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9462) granting an increase of pension to William M. Robinson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9463) granting an increase of pension to Gideon R. Mahan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9464) granting an increase of pension to Elvina McDonald; to the Committee on Pensions.

Also, a bill (H. R. 9465) granting an increase of pension to John N. Matthews; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9466) granting an increase of pension to Henry C. Mulvey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9467) granting an increase of pension to William Fuffstuttler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9468) granting an increase of pension to John M. Carson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9469) granting an increase of pension to John L. Mead; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9470) granting an increase of pension to Daniel Banks; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9471) granting an increase of pension to Albert O. Neill; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9472) granting an increase of pension to Henry M. Yow; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9473) granting an increase of pension to John L. Bryan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9474) granting an increase of pension to Francis M. Bynum; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9475) granting an increase of pension to John Klein; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9476) granting a pension to Ebin A. Irvin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9477) granting an increase of pension to Andrew B. Campbell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9478) granting an increase of pension to Eli G. Edwards; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9479) granting an increase of pension to Juliett Fields; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9480) granting a pension to Mary Jane Pack; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9481) granting an increase of pension to J. A. Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9482) granting an increase of pension to William Cleveland; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9483) granting an increase of pension to John I. Keel; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9484) granting an increase of pension to William H. H. Cooper; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9485) granting an increase of pension to Jacob Bruder; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9486) granting an increase of pension to James A. Beard; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9487) granting an increase of pension to Henry H. Clark; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9488) granting an increase of pension to Topley T. Dodge; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9489) granting an increase of pension to William Henslick; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9490) granting an increase of pension to Levi T. E. Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9491) granting an increase of pension to James J. Wilson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9492) granting an increase of pension to Frederick Skinner; to the Committee on Invalid Pensions.

By Mr. FERGUSSON: A bill (H. R. 9493) granting an increase of pension to Maria C. Lopez; to the Committee on Invalid Pensions.

By Mr. HENSLEY: A bill (H. R. 9494) granting an increase of pension to John J. Seibel; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9495) granting an increase of pension to Mary A. Stitzel; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9496) granting an increase of pension to Robert Hill; to the Committee on Invalid Pensions.

By Mr. JOHNSON of Kentucky: A bill (H. R. 9497) granting a pension to John T. Gipson; to the Committee on Invalid Pensions.

By Mr. KEATING: A bill (H. R. 9498) granting a pension to Maurice J. Gordon; to the Committee on Pensions.

Also, a bill (H. R. 9499) granting a pension to Isabel Sandoval; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9500) granting a pension to Alice M. Duncan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9501) granting an increase of pension to William H. Topping; to the Committee on Invalid Pensions.

By Mr. KENNEDY of Rhode Island: A bill (H. R. 9502) granting an increase of pension to Ellen Minot; to the Committee on Invalid Pensions.

By Mr. KINKAID of Nebraska: A bill (H. R. 9503) granting an increase of pension to William Brown; to the Committee on Invalid Pensions.

By Mr. LANGHAM: A bill (H. R. 9504) granting an increase of pension to Martha Jane B. Phillips; to the Committee on Invalid Pensions.

By Mr. MAHAN: A bill (H. R. 9505) granting a pension to Mary Costello; to the Committee on Invalid Pensions.

By Mr. O'HAIR: A bill (H. R. 9506) granting a pension to Anna R. Langhans; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 9507) granting an increase of pension to George W. Robinson; to the Committee on Invalid Pensions.

By Mr. STEVENS of Minnesota: A bill (H. R. 9508) for the relief of A. E. Kuester; to the Committee on Claims.

Also, a bill (H. R. 9509) granting a pension to Daniel Kalaher; to the Committee on Pensions.

Also, a bill (H. R. 9510) granting an increase of pension to James H. Davidson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9511) granting a pension to James T. Moran; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9512) for the relief of Robert M. Cannon, administrator of the estate of Alfred L. Shotwell, deceased; to the Committee on War Claims.

Also, a bill (H. R. 9513) for the correction of the military record of John Berrisford; to the Committee on Military Affairs.

By Mr. STONE: A bill (H. R. 9514) granting an increase of pension to James T. Taylor; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9515) granting an increase of pension to Johan Knussman; to the Committee on Invalid Pensions.

By Mr. SUTHERLAND: A bill (H. R. 9516) for the relief of John P. Fox; to the Committee on War Claims.

Also, a bill (H. R. 9517) granting a pension to William S. Wilmoth; to the Committee on Pensions.

Also, a bill (H. R. 9518) granting a pension to Benton C. Rodebaugh; to the Committee on Pensions.

By Mr. TAGGART: A bill (H. R. 9519) granting a pension to John P. Chess; to the Committee on Pensions.

Also, a bill (H. R. 9520) granting an increase of pension to Wesley B. Reed; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9521) granting an increase of pension to Maria H. Redfield; to the Committee on Invalid Pensions.

By Mr. THOMAS: A bill (H. R. 9522) granting a pension to John Wesley Newman; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of the Washington (D. C.) workingmen, urging congressional investigation of the conditions in the mining district of Colorado; to the Committee on the Judiciary.

Also (by request), memorial of the Board of Trade of Tampa, Fla., favoring passage of House bill 8199, for reclamation of the swamp lands of the United States; to the Committee on Rivers and Harbors.

Also (by request), memorial of geologists and engineers at the National Conservation Exposition of Knoxville, Tenn., favoring appropriation for expediting the work of classification of the Federal domain; to the Committee on Appropriations.

Also (by request), petition of the Lumbermen's Club of St. Louis, Mo., favoring legislation for flood protection of the lower Mississippi River; to the Committee on Rivers and Harbors.

By Mr. CARY: Petition of the Goodrich Transit Co. and Citizens' Business League of Milwaukee, Wis., favoring an amendment to the seamen's bill (S. 136) relative to the Great Lakes; to the Committee on the Merchant Marine and Fisheries.

By Mr. DALE: Petition of Jacob Dold Packing Co. and the George Irish Paper Co., Buffalo, N. Y., both favoring the passage of the 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

By Mr. DYER: Petition of Joseph L. Boehm and Walter J. G. Num, of St. Louis, Mo., and the Grand Hotel, Mackinac Island, Mich., all favoring the passage of legislation making the Great Lakes an exception in the seamen's bill (S. 136); to the Committee on the Merchant Marine and Fisheries.

Also, petition of E. L. Miller, of Kansas City, Mo., suggesting certain changes in the Glass-Owen currency bill; to the Committee on Banking and Currency.

Also, petition of the Central Trades and Labor Union of St. Louis, Mo., and vicinity, favoring the early passage of the Glass-Owen currency bill; to the Committee on Banking and Currency.

Also, petition of the Central Trades and Labor Union of St. Louis, Mo., and vicinity, relative to the control and regulation of the manufacture and sale of convict goods; to the Committee on Interstate and Foreign Commerce.

Also, petition of H. E. Wills, national legislative representative of the Brotherhood of Locomotive Engineers, favoring the passage of the employers' liability and workmen's compensation bill; to the Committee on the Judiciary.

Also, petition of Stone Hill Mine Co., of St. Louis, Mo., favoring the passage of legislation to establish an agricultural experiment station somewhere in the Ozark Mountains in Missouri; to the Committee on Agriculture.

Also, petition of Giller, Ward & Hasner Hardware Co., of St. Louis, Mo., protesting against the passage of House bill 2970, requiring manufacturer's name on all goods, etc.; to the Committee on Interstate and Foreign Commerce.

Also, petition of James Love Hopkins and the Halsey Automobile Co., of St. Louis, Mo., protesting against the bill granting three years of patent, trade-mark, and copyright without cost to importers who exhibit their goods at the Panama-Pacific Exposition; to the Committee on Patents.

Also, petitions of the St. Louis Advertising Men's League, Stewart Grier Lumber Co., Merchants' Exchange, and Lumbermen's Club of St. Louis, Mo., and Board of Trade of Tampa, Fla., favoring legislation for flood protection of the lower Mississippi River and reclamation of swamp lands; to the Committee on Rivers and Harbors.

By Mr. ESCH: Memorial of the Federated Trades Council of Milwaukee, Wis., favoring the passage of the Bartlett-Bacon bills (H. R. 1873 and S. 937) relative to labor organizations; to the Committee on Labor.

By Mr. GOODWIN of Arkansas: Memorial of the Association of Credit Men of Fort Smith, Ark., favoring legislation for flood protection of the Mississippi River; to the Committee on Rivers and Harbors.

By Mr. HOWELL: Memorial of the Utah Association of Credit Men, favoring inauguration by Congress of a system of flood-water control; to the Committee on Rivers and Harbors.

Also, petition of citizens of Utah, favoring legislation taxing mail-order houses; to the Committee on Ways and Means.

By Mr. LANGLEY: Petitions of sundry citizens of the State of Kentucky, favoring passage of House bill 5308; to the Committee on Ways and Means.

By Mr. MacDONALD: Petition of Victor Alro and other citizens of the State of Michigan, urging congressional investigation of the strike in the copper mines; to the Committee on the Judiciary.

By Mr. MAHAN: Papers to accompany House bill 8570, for the relief of Mary Dolan; to the Committee on Invalid Pensions.

By Mr. MONDELL: Petition of citizens of Smithfield, Utah, favoring legislation taxing all mail-order houses; to the Committee on Ways and Means.

By Mr. SMITH of New York: Petition of the Musicians' Association of Buffalo, N. Y., protesting against the seamen's bill (S. 136) as applicable to the Great Lakes; to the Committee on the Merchant Marine and Fisheries.

By Mr. SUTHERLAND: Papers to accompany House bill 9059, granting an increase of pension to William E. Lang; to the Committee on Invalid Pensions.

Also, papers in support of House bill 8042, granting a pension to Charles B. Cundiff; to the Committee on Invalid Pensions.

Also, papers in support of House bill 8053, for the relief of the heirs of James A. Smith; to the Committee on War Claims.

By Mr. TREADWAY: Petition of the Woman's Home Missionary Society of Hampden County, Mass., favoring the passage of legislation to destroy polygamy; to the Committee on the Judiciary.

By Mr. WALLIN: Petition of the Mohawk National Bank, Schenectady, N. Y., favoring the passage of certain amendments to the proposed currency bill; to the Committee on Banking and Currency.

By Mr. WILSON of New York: Petition of the Manufacturers and Business Men's Association of New York, favoring amendments to the Federal reserve bill; to the Committee on Banking and Currency.

SENATE.

SATURDAY, *November 29, 1913.*

The Senate met at 2 o'clock p. m.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

O Lord our God, the earth is full of Thy glory. Thou dost speak to us through a thousand voices. All Thy ministries are love. Thou dost appeal to the highest and best within us by a thousand providences that surround our lives. Thou art leading us to express the best we have in all the forms of activity in this life.

We seek for the light that cometh from above, for the revelation of Thy glory in the face of Jesus Christ. We pray that Thou wilt speak to us not only through the manifold ministries of grace and through the nature world about us, but touch our hearts with Thine own divine power and whisper Thy messages of grace to our listening ears.

This day may we follow God's voice and obey God's command. For Christ's sake. Amen.

NAMING A PRESIDING OFFICER.

The Secretary (James M. Baker) read the following communication:

PRESIDENT PRO TEMPORE UNITED STATES SENATE,
Washington, November 29, 1913.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. JOHN RANDOLPH THORNTON, a Senator from the State of Louisiana, to perform the duties of the Chair during my absence.

JAMES P. CLARKE,
President pro tempore.

Mr. THORNTON thereupon took the chair as Presiding Officer and directed that the Secretary read the Journal of the proceedings of the last legislative day.

THE JOURNAL.

The Journal of the proceedings of Wednesday last was read and approved.

BUZZARDS BAY BUOY, MASS. (S. DOC. NO. 245).

The PRESIDING OFFICER laid before the Senate a communication from the Secretary of Commerce, acknowledging the receipt of Senate resolution of the 25th instant, relative to the placing of a buoy and the marking of that part of the public navigable waters of the United States in Buzzards Bay, which will become a much frequented trade route upon the opening of the Cape Cod Canal, which was referred to the Committee on Commerce.

SAN FRANCISCO WATER SUPPLY (S. DOC. NO. 246).

The PRESIDING OFFICER laid before the Senate a communication from the Secretary of the Interior, transmitting, in response to a resolution of October 13, 1913, a report of the Board of Army Engineers, together with a report of the Geological Survey, relative to the Tuolumne, Stanislaus, Mokelumne, and Cosumnes Rivers in California.

Mr. BORAH. I understand there are exhibits and illustrations accompanying the report, and I ask that they may be printed in connection therewith.

The PRESIDING OFFICER. In the absence of objection, the request of the Senator from Idaho is granted. The communication and accompanying papers and illustrations will lie on the table and be printed, the bill relating to this subject having been reported.

Mr. BORAH subsequently said: I move to reconsider the vote whereby the Senate agreed to the printing of the illustrations accompanying the report from the Secretary of the Interior which was laid before the Senate this morning.

The motion to reconsider was agreed to.

Mr. BORAH. I ask that 500 additional copies of the report be printed without the illustrations for the use of the Senate document room.

There being no objection, the order was agreed to and it was reduced to writing, as follows:

Ordered, That 500 additional copies of the communication from the Secretary of the Interior, transmitting, in response to a resolution of October 13, 1913, a report of the Board of Army Engineers, together with a report of the Geological Survey, relative to the Tuolumne, Stanislaus, Mokelumne, and Cosumnes Rivers in California, be printed without illustrations for the use of the Senate document room.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had passed a concurrent resolution providing that the two Houses of Congress assemble in the Hall of the House of Representatives on Tuesday, the 2d day of December, 1913, at 1 o'clock in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make to them, in which it requested the concurrence of the Senate.

JOINT MEETING OF THE TWO HOUSES—PRESIDENT'S ADDRESS.

Mr. KERN. I ask the Chair to lay before the Senate the concurrent resolution which has just been received from the House of Representatives.

The PRESIDING OFFICER laid before the Senate House concurrent resolution No. 24, which was read, as follows:

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Tuesday, the 2d day of December, 1913, at 1 o'clock in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make them.

Mr. KERN. I ask unanimous consent for the present consideration of the resolution.

The Senate, by unanimous consent, proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. Without objection, the resolution will be agreed to.

Mr. CLARK of Wyoming. I do not ask for a yea-and-nay vote. But I do think a vote should be taken on agreeing to the resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

PETITIONS AND MEMORIALS.

The PRESIDING OFFICER presented petitions of sundry citizens of San Francisco and Berkeley, in the State of California, and a petition of sundry citizens of De Kalb, Ill., praying for the enactment of legislation granting to the city of San Francisco the right to use the waters of the Hetch Hetchy Valley, which were ordered to lie on the table.

He also presented the memorial of H. D. Hoover and sundry other citizens of the United States, remonstrating against the enactment of legislation granting to the city of San Francisco the right to use the waters of the Hetch Hetchy Valley, which was ordered to lie on the table.

Mr. BURTON presented a memorial of the Chamber of Commerce of Steubenville, Ohio, remonstrating against the proposed dissolution of the United States Steel Corporation, which was referred to the Committee on the Judiciary.

Mr. GALLINGER. I present a memorial signed by 95 leading citizens of the city of Keene, N. H., protesting against the so-called Hetch Hetchy bill. As the bill is on the calendar, I move that the memorial lie on the table.

The motion was agreed to.

Mr. NORRIS presented a petition of the Woman's Relief Corps of Indianola, Nebr., and a petition of Indianola Post, No. 154, Department of Nebraska, Grand Army of the Republic, of Indianola, Nebr., praying for the enactment of legislation granting increase of pensions to widows of soldiers who served in the Civil War, which were referred to the Committee on Pensions.

Mr. PERKINS presented a petition of the Chamber of Commerce of Sacramento, Cal., praying that an appropriation be made for the construction of four new battleships and all necessary auxiliary boats, which was referred to the Committee on Naval Affairs.

He also presented a petition of the Rotary Club of Los Angeles, Cal., praying for the enactment of legislation providing for the drainage of the western slope of the Rocky Mountains and the safeguarding of the water supply thereof, which was referred to the Committee on Public Lands.

Mr. BURLEIGH presented a petition of the Chamber of Commerce of Waterville, Me., praying for the enactment of legislation granting flood protection to the lower Mississippi River and the reclamation of its alluvial lands, which was referred to the Committee on Commerce.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TOWNSEND:

A bill (S. 3487) granting a pension to Gertrude Smith (with accompanying papers); to the Committee on Pensions.

By Mr. MARTINE of New Jersey:

A bill (S. 3488) for the relief of Ernest C. Stahl; to the Committee on Military Affairs.

By Mr. BORAH:

A bill (S. 3489) granting an increase of pension to John F. Sacks (with accompanying papers); and

A bill (S. 3490) granting a pension to Ella Taylor (with accompanying paper); to the Committee on Pensions.

By Mr. SMOOT:

A bill (S. 3491) granting a pension to William W. McDaniel (with accompanying papers); to the Committee on Pensions.

By Mr. LANE:

A joint resolution (S. J. Res. 83) authorizing preliminary examination and survey of the Willamette and Columbia Rivers from Portland to the sea; to the Committee on Commerce.

WORKS OF ART IN CAPITOL.

Mr. GALLINGER submitted the following resolution (S. Res. 222), which was read and referred to the Committee on Printing:

Resolved, That 2,000 additional copies of Senate Document 169, entitled "Works of Art in the United States Capitol Building, Including Biographies of the Artists," be printed for the use of the folding room of the Senate.

SAN FRANCISCO WATER SUPPLY.

Mr. BORAH. Mr. President, the bill known as the Hetch Hetchy bill has been set down as the special order for Monday next. One of the most important features of the discussion will involve the question of the effect of the bill upon the water users and farmers of the San Joaquin Valley. I ask that the following telegram be read to the Senate.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Secretary read as follows:

SAN FRANCISCO, CAL., *November 27, 1913.*

WILLIAM E. BORAH,
United States Senate, Washington, D. C.:

Water users and farmers earnestly protest against passage Hetch Hetchy bill. San Francisco does not need water, while every gallon is absolutely necessary for future development San Joaquin Valley. Official reports show 170,000,000 gallons daily can be developed from present sources. San Francisco enough 40 years. If additional needed, 200,000,000 daily can be obtained Eel River free from conflicting claims and delivered San Francisco for less than $30,000,000, including Snow Mountain power plant; water shortage here result failure to develop present supply. Power privilege, Tuolumne River, should be reserved for development San Joaquin Valley. Two hundred thousand acres will remain arid if storage right be given San Francisco. Valley's whole future depends on storage, as limit natural flow has been reached. Leaving for Washington to-day. Amply prepared to sustain every statement made.

THEODORE A. BELL,
Attorney for Water Users' Association of Stanislaus County.

Mr. BORAH. Mr. President, a letter was published some time ago and printed as a Senate document, as I remember, from Mr. Gifford Pinchot, giving the reasons why he is in favor of this bill. That letter has been circulated very generally and has caused considerable discussion and attracted a great deal of attention. Mr. R. U. Johnson, of New York, a man who has given great consideration to this subject, has written an answer to the same. I ask that it be read.

Mr. LANE. Who is the author of the letter?

The PRESIDING OFFICER. Robert Underwood Johnson, of New York. In the absence of objection, the Secretary will read the letter.

The Secretary read as follows:

327 LEXINGTON AVENUE,
New York, November 6, 1913.

Hon. WILLIAM E. BORAH,
United States Senate, Washington.

MY DEAR SENATOR: I have just seen the letter of September 18, 1913, addressed to Dr. Noble, of Spokane, from Mr. Gifford Pinchot, stating his attitude regarding the Hetch Hetchy bill. As this is a matter of public interest and Mr. Pinchot's letter has been published in the CONGRESSIONAL RECORD, I beg to reply to it point by point. Mr. Pinchot says:

"First. I am fully persuaded that there is no other comparable source of supply available at anything like a reasonable cost to the cities around San Francisco Bay."

Answer. The advisory board of Army engineers reports that there are several other sources of supply, any one of which would be available at a cost which, in the absence of any adequate and impartial investigation, the board estimates at $13,000,000 in favor of the Hetch Hetchy scheme. (Report, p. 50.) The board distinctly states that no thorough or complete investigation has been made of any other source except the Sacramento River. It is claimed that half a dozen other sources are available. Mr. Pinchot is here considering the "reasonable cost" to San Francisco, but that is only one side of the question. Of course San Francisco wishes to get its water as cheaply as possible and wishes the Nation to help foot the bills, but the question of reasonable cost is one that must be considered from the point of view of the Nation as well as of the city. It is being demonstrated that an overwhelming proportion of the people, including a host of conservationists, differ with Mr. Pinchot's view of what constitutes a reasonable cost to the Nation.

"Second. That the supply of surface water furnished by the Spring Valley Water Co. is adequate neither in quality nor in quantity."

Answer. Mr. Freeman, the expert for the city, in his report, page 16, says: "The present quality of the water furnished by the Spring Valley Water Co. is, I believe, thoroughly wholesome and safe." Here is a flat contradiction of Mr. Pinchot. As to quantity nobody doubts that it is desirable for San Francisco ultimately to supplement its existing supply, but this need not be done at the sacrifice of the Hetch Hetchy Valley, which Mr. Pinchot in his testimony before the House committee admits is "one of the great wonders of the world." San Francisco has abundant water in the near-by Coast Range to serve it for 40 or 50 years. According to Mr. Freeman and the Army board the Hetch Hetchy plan is to provide for a time 50 years thereafter.

"Third. That the injury to the Hetch Hetchy by substituting a lake for the present swampy floor of the valley, all due allowances being made for whatever reduction in the height of the walls there may be, is altogether unimportant compared with the benefits to be derived from its use as a reservoir."

Answer. This is Mr. Pinchot's way of minimizing the immense and permanent benefits derived by the people from great natural scenery. According to John Muir the present floor of the valley is not swampy, and the beauty of the valley, all that gives it character and charm, will be destroyed by making of it a municipal water tank. Mr. Pinchot is measuring the value of our noblest scenery in dollars and cents. He has never shown any feeling for the conservation of great scenery, nor has he ever given any championship to the higher uses of such wonderlands as resorts for pleasure and repose, the inspiration of beauty and the cultivation of health. We believe the Creator's masterpieces should not be tinkered by engineers or politicians.

"Fourth. That the sanitary regulations included in the bill absolutely dispose of the plea, untenable at all times, that what San Francisco is asking for is control of half of Yosemite Park instead of merely the Hetch Hetchy reservoir."

Answer. This is very much like saying of a man that while his heart, lungs, stomach, and alimentary canal are in diseased condition, the rest of his body is in perfect health. The Tuolumne River, which runs through the Hetch Hetchy, drains a watershed that must be controlled by San Francisco if that valley is to be used as a reservoir. The bill would virtually prohibit camping within 300 feet of any stream. The watershed is a perfect network of streams, and this regulation would prevent campers from free access to the wonderful Tuolumne Cascades, which in many places are not 300 feet distant from sheer walls. With due respect to Mr. Pinchot, his argument on this point is a quibble. It would be the old story of the tent and the camel's head.

"Fifth. That much of the opposition has its root in the unwillingness of waterpower and transportation interests in and around San Francisco to see the city get possession of the large power it will develop if the grant goes through."

Answer. This statement, in my judgment, is entirely without foundation. The movement to oppose the bill, with which more than three-fourths of the members of the Sierra Club of San Francisco and many other organizations throughout the country have been connected, has had no relation whatever to such interests as Mr. Pinchot mentions. The endeavor to make this bill appear a measure to save San Francisco from a monopoly or from vicious commercial interests is without basis in fact. The president of the so-called monopoly is for the bill. In all the discussion of this question no one has yet mentioned, as far as I know, a single instance of opposition by commercial interests. Why are they not named? Even if there were such opposition it would not affect the conclusive objections to the scheme from the point of view of national policy.

"Sixth. That the public welfare will be immensely better served by the joint use of Hetch Hetchy for beauty and for utility than by depriving the future millions around San Francisco Bay of the use of a valley—a use which will not destroy its beauty—rather than by keeping it untouched for the benefit of the very small number of comparatively well-to-do to whom it will be accessible."

Answer: This is Mr. Pinchot's private opinion and contains no argument whatever. He entirely ignores the vast utility of beauty. Man does not live by bread alone. The beauty of Hetch Hetchy would be destroyed by flooding its floor and substituting an ugly dam and reservoir, and its continued use for the purpose to which it was dedicated will in no way deprive the future millions around San Francisco of water. When Mr. Pinchot speaks of keeping it untouched for the benefit of the very small number of comparatively well-to-do to whom it will be accessible, he makes an argument which would have dedicated the Yosemite Valley itself to San Francisco's use as a water supply. There was a time when the Yosemite Valley was "inaccessible." It also is being kept untouched for the benefit of a very small number of comparatively well-to-do people. Shall we make a water tank also of the Yosemite Valley? What is needed is a 9-mile road to make Hetch Hetchy easily accessible. This done, not only would one of the great wonders of the world, as Mr. Pinchot calls it, be open to the public, but the overcrowding of the Yosemite Valley by campers would be relieved by diversion to the equally feasible camping place in the Hetch Hetchy.

Mr. Pinchot says that "the intermittent æsthetic enjoyment of less than 1 per cent is being balanced against the daily comfort and welfare of 99 per cent." Apply this to the Yosemite Valley. The percentage of travel there is very small when compared with the number of residents in San Francisco. The enjoyment is intermittent and, in most persons, æsthetic. Must we, therefore, give up the Yosemite Valley? Mr. Pinchot's argument proves too much. Where is his imagination? What he should say is that the great permanent and phenomenal beauty of the Nation's national park, with all its possibilities of happiness for all the people and for the future, is being balanced against an assumed expense on the part of a city of $13,000,000 and against the fact that it is not necessary for the Nation to give up these treasures of natural scenery to the use of a municipality. It is simply absurd to say that the greatest of the three camping places in the Yosemite Park is not to be destroyed when the floor of this valley is flooded. People do not camp in 200 feet of water. To those camping places will resort an increasing number of the people of the hot and arid San Joaquin Valley. It is the potentiality of enjorment and usefulness that makes it obligatory upon the Nation to save its as yet comparatively little used wonderlands. Nothing is more useful than beauty. Without it life is only a race for the trough. Mr. Pinchot speaks as though beauty existed only for dilettanti. In some form or other it is the lifeblood of happiness. Our countrymen are a beauty-loving people and jealously devoted to our superb scenery.

I have not said anything here of the fact that the waters that flow through the Yosemite National Park can be used without destroying the scenery by being impounded below the park for the use of the farmers of the San Joaquin Valley. This is testified to by Mr. O'Shaughnessy, city engineer of San Francisco, in a report to William H. Crocker, of San Francisco, which Francis Burton Harrison conveyed to Secretary Fisher. Mr. F. H. Newell, Chief of the Reclamation Service, told the House committee that this is feasible. Certainly if propinquity is to have any weight in this matter, the farmers of the San Joaquin Valley have a better right to the Hetch Hetchy watershed than the city of San Francisco. Senator WORKS, of California, is authority for saying that 99 per cent of these farmers are opposed to the bill. Mr. Vogelsang, one of the representatives of the city at Washington, admits that 98 per cent are in opposition.

The time has come to take the discussion of this matter out of the range of engineers' reports and into that of large public policy. I think the people of this country believe in the conservation that conserves, and that they think the conservation of natural beauty a matter of immense importance.

Mr. Pinchot is the one man chiefly responsible for this assault upon the national park system. In 1906, after San Francisco had entirely abandoned it, he revived the scheme in the following letter:

NOVEMBER 15, 1906.

Mr. MARSDEN MANSON,
2010 Gough Street, San Francisco, Cal.

MY DEAR MR. MANSON: I can not, of course, attempt to forecast the action of the new Secretary of the Interior [Garfield] on the San Francisco watershed question, but my advice to you is to assume that his attitude will be favorable and to make the necessary preparations to set the case before him. I had supposed from an item in the paper that the city had definitely given up the Lake Eleanor [Yosemite Park] plan and had purchased one of the other water systems. If the possibility of a supply from the Sierras is still open, you should, I think, by all means go ahead with the idea of getting it.

Very sincerely, yours,

GIFFORD PINCHOT, *Forester.*

Mr. Pinchot's action in this matter is of the opportunist complexion that has marked his later career. It was an endeavor to conciliate the widespread sentiment in the West of that time against "tying up" the water and timber of large sections by the conservation policy. Apparently he thought it necessary to give an object lesson in the fact that the water was to be for the use of the people, but he did not make the distinction—and here is the vital point—between the uses of the forest reserves, which are to conserve water and timber to supply the people, under proper official supervision, and the uses of the national parks, so admirably stated in the report of the Public Lands Committee of the House which recommended the creation of the Yosemite National Park in 1890. That report said: "The preservation by the Government in all its original beauty of a region like this seems to the committee to be a duty to the present and future generations. The rapid increase of population and the resulting destruction of natural objects make it incumbent upon the Government, in so far as may be, to preserve the wonders and beauties of our country from injury and destruction, in order that they may afford pleasure as well as instruction to the people."

The men who made this report (Judge Holman was one of them) were not "esthetes," and they laid down an enlightened basis of legislation. The question of the destruction of a phenomenal health and pleasure resort of the Nation is not a mere matter of esthetic nicety, a tweedledee and tweedledum distinction between two equally good kinds of scenery. The difference between the handiwork of the Creator and the artificial substitute by San Francisco politicians is the difference between worship and sacrilege.

Sincerely, yours.

ROBERT UNDERWOOD JOHNSON,
Chairman National Committee for the Preservation of the Yosemite National Park.

P. S.—Since the foregoing was written a conclusive judgment on this point has been announced in an article contributed to the Boston Transcript of November 19, 1913, by the foremost American authority on landscape, Mr. Frederick Law Olmsted, who has succeeded to the work and reputation of his distinguished father (of the same name) and who is the member of the National Fine Arts Commission representing landscape treatment of Government projects. Mr. Olmsted, in this thorough, careful, and candid article, after weighing all considerations impartially, comes to the conclusion that the Hetch Hetchy project would not only ruin the beauty of the valley but open the way to further destructive invasion of the national parks by false utilitarianism. Certainly on this point no one would think of comparing the opinion of Mr. Pinchot, an expert on the economic aspects of forestry, with that of Mr. Olmsted, a trained and recognized expert on everything pertaining to the conservation of landscape beauty.

HOUR OF MEETING ON MONDAY.

The PRESIDING OFFICER. Morning business is closed. The calendar under Rule VIII is in order.

Mr. KERN. I move that when the Senate takes a recess to-day it be until Monday next at 10 o'clock a. m.

The motion was agreed to.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 1 hour and 40 minutes spent in executive session the doors were reopened, and (at 4 o'clock and 15 minutes p. m.) the Senate took a recess until Monday, December 1, 1913, at 10 o'clock a. m.

CONFIRMATIONS.

Executive nominations received by the Senate November 29, 1913.

SECRETARY OF EMBASSY.

Peter Augustus Jay to be secretary of the embassy at Rome, Italy.

GOVERNOR OF HAWAII.

L. E. Pinkham to be governor of Hawaii.

APPOINTMENTS IN THE PUBLIC HEALTH SERVICE.

Walter M. Jones to be assistant surgeon.
William Howard Slaughter to be assistant surgeon.
James Gayley Townsend to be assistant surgeon.

MEMBERS OF THE PHILIPPINE COMMISSION.

Henderson S. Martin to be secretary of public instruction and vice governor.
Clinton L. Riggs to be secretary of commerce and police.

ASSOCIATE JUSTICE OF THE SUPREME COURT OF THE PHILIPPINE ISLANDS.

Manuel Araullo.

COLLECTOR OF CUSTOMS.

John F. Pugh to be collector of customs for the District of Alaska.

COLLECTOR OF INTERNAL REVENUE.

David J. Williams to be collector of internal revenue for the district of Washington.

PROMOTIONS IN THE ARMY.

ADJUTANT GENERAL'S DEPARTMENT.

Lieut. Col. Benjamin Alvord to be adjutant general, with the rank of colonel.

QUARTERMASTER CORPS.

Lieut. Col. John T. Knight to be colonel.
Maj. William E. Horton to be lieutenant colonel.

FIELD ARTILLERY ARM.

First Lieut. Marion W. Howze to be captain.

INFANTRY ARM.

Lieut. Col. Francis J. Kernan to be colonel.
Maj. William M. Wright to be lieutenant colonel.
Capt. Edward A. Shuttleworth to be major.
First Lieut. George C. Lewis to be captain.
First Lieut. Frank H. Adams to be captain.
Second Lieut. David G. C. Garrison to be first lieutenant.
Second Lieut. John S. Sullivan to be first lieutenant.

CORPS OF ENGINEERS.

Second Lieut. Raymond A. Wheeler to be first lieutenant.
Second Lieut. W. Morris Chubb to be first lieutenant.

CAVALRY ARM.

First Lieut. Rudolph E. Smyser to be captain.
First Lieut. Joseph C. Righter, jr., to be captain.

APPOINTMENTS, BY TRANSFER, IN THE ARMY.

FIELD ARTILLERY ARM.

First Lieut. John E. Mort to be first lieutenant.

COAST ARTILLERY CORPS.

First Lieut. Thomas D. Sloan to be first lieutenant.

APPOINTMENTS IN THE ARMY.

MEDICAL RESERVE CORPS.

To be first lieutenants.

James Harlan Anderson.
Ethan Flagg Butler.
LeRoy William Childs.
Lane Butler Cooke.

Evan Stark Evans.
George Frank Holland.
Howard Pendleton Kirtley.
Jacob Carl Krafft.
Otis Burgess Nesbit.
Walter Scott Rountree.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Commander Mark L. Bristol to be a captain.
Lieut. Commander Roscoe C. Bulmer to be a commander.
Lieut. Roger Williams to be a lieutenant commander.
Lieut (Junior Grade) Guy E. Baker to be a lieutenant.
The following-named citizens to be assistant surgeons in the Medical Reserve Corps:
Hibbley R. Owen, and
Foster H. Bowman.

POSTMASTERS.

ARKANSAS.

A. D. Agee, Gurdon.
J. E. Leeper, Dermott.

CALIFORNIA.

Alfred Belleu, Watts.
P. L. Byers, Huntington Park.
Anna Mary Carson, Compton.
M. F. Cochrane, San Rafael.
E. J. Crane, Menlo Park.
Walter J. Desmond, Long Beach (late Longbeach).
George P. Dobyns, El Monte.
Frank P. Firey, Pomona.
Thomas F. Fogarty, Marysville.
Floyd Godfrey, San Dimas.
Duncan A. Gray, Soldiers Home.
George Gribble, Scotia.
Clark McLain, Pasadena.
Abraham Mooser, Oceanpark.
Milton M. Pilkenton, Hermosa Beach.
Sophie J. Rice, King City.
D. C. Saunders, Lompoc.

HOUSE OF REPRESENTATIVES.

SATURDAY, *November 29, 1913.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou who art supremely wise and strong and good, our heavenly Father, by the faith which holds our course to Thee, by the hope that illumines the way, by the love that makes us one with Thee and pours itself out in self-sacrifice for the good of mankind, inspire us with high ideals, pure motives, and a sincere desire to fulfill our earthly destiny and leave behind us a record worthy of emulation, bearing with us into the great beyond a character woven into the tissues of the soul after the similitude of the Master's. Amen.

The Journal of the proceedings of Wednesday, November 26, was read and approved.

SWEARING IN MEMBERS.

Mr. UNDERWOOD. Mr. Speaker, I ask for the adoption of the resolution which I send to the Clerk's desk. [Applause.]

Mr. MANN. Mr. Speaker, before that I desire to present a newly elected Member from Massachusetts to be sworn in.

The SPEAKER. Does the gentleman from Alabama withhold his resolution?

Mr. UNDERWOOD. I withhold the resolution.

The SPEAKER. The gentleman from Massachusetts [Mr. PAIGE] and the gentleman from New York [Mr. CANTOR]. Congressman elect from the twentieth district of New York, will come forward and be sworn in.

Accordingly Mr. CALVIN D. PAIGE, Member elect third Massachusetts district, and Mr. JACOB A. CANTOR, Member elect twentieth New York district, presented themselves before the bar of the House and took the oath of office.

The SPEAKER. Now Mr. LOFT, of the thirteenth New York district, will come forward.

Mr. GEORGE W. LOFT, Member elect thirteenth New York district, presented himself before the bar of the House.

The SPEAKER. The Chair finds on examination that the credentials of Mr. LOFT are in proper form and has a protest against his being seated on a purely legal question. The Chair will have the protest read.

The Clerk read as follows:

NOVEMBER 24, 1913.

Hon. CHAMP CLARK,
Speaker of the House of Representatives,
Capitol, Washington, D. C.

DEAR SIR: On behalf of William J. Wilkins, a voter in the thirteenth congressional district of the State of New York, and of other voters in that district, I respectfully protest against the seating of GEORGE W. LOFT as a Member of the House of Representatives, based on his alleged election at a general election held in the State of New York and in the city of New York as Representative in Congress to fill a vacancy in that office occasioned by the death of Hon. Timothy D. Sullivan, September 1, 1913, on the ground that the said alleged special election, held at the date of said general election, is null and void, in that the executive authority of the State of New York did not issue a writ of election as provided by Article I, section 2, subsection 4, of the Constitution of the United States; and in that a proclamation purporting to conform to the said provision of Article 1, section 2, subsection 4, of the Constitution of the United States, was issued and filed on the 28th day of October, 1913, one week before the date of the said special election called thereby, to be held on the date of the said general election, November 4, 1913, and that said proclamation so issued was in violation of the provisions of section 292 of the election law of the State of New York, which provided that in the event of the issuance of a proclamation by the governor of the State of New York for a special election the date of such special election to be fixed thereby must be at a day not less than 30 nor more than 40 days from the date of the said proclamation.

That it is undisputed that at the time that the purported nomination of the said GEORGE W. LOFT to fill the said vacancy was made by the congressional committee of the Democratic Party for the thirteenth congressional district on October 2, 1913, no writ of election had theretofore been issued by the governor of the State of New York and no writ issued, except as stated, on October 28, 1913.

On behalf of the protestants I desire the privilege of submitting to the proper committee of the House of Representatives precedents of the House of Representatives in similar circumstances.

I submit that it is a matter of grave concern that the provisions of the Constitution with respect to elections to fill vacancies in the office of Representative in Congress be enforced, such provision being mandatory and not permissive, and that the precedents of the House of Representatives be sustained, and to that end desire the privilege of appearing before the proper committee of the House of Representatives when the credentials of the said GEORGE W. LOFT are received.

The question of the validity of the election is now before the courts of this State, and an application to restrain the secretary of state of the State of New York from filing his certificate with the House of Representatives certifying the due election of the said GEORGE W. LOFT was denied pro forma at a special term of the supreme court, Albany County, and from that order an appeal has been taken. The learned justice at special term stated that it was a matter of grave public importance and should be passed upon by the appellate courts as speedily as possible.

Very respectfully, yours,

GEORGE EDWIN JOSEPH.

The SPEAKER. The Chair has investigated this preliminary proceeding and, unless the House determines otherwise, on the certificate Mr. LOFT ought to be sworn in and the papers in the case referred to one of the Elections Committees.

Accordingly, Mr. GEORGE W. LOFT, Member elect thirteenth New York district, took the oath of office.

The SPEAKER. The Chair will refer the papers in the case to Elections Committee No. 2.

Mr. RUSSELL. Mr. Speaker, inasmuch as that case has been referred to the committee of which I am a member, I wish to ask, in the absence of the chairman and the ranking member—I am third on the committee—whether I shall endeavor to obtain a meeting of the committee in the absence of those gentlemen?

The SPEAKER. That is not a parliamentary inquiry. The Chair's own opinion is that the chairmanship temporarily of the committee runs down through the membership seriatim, and if the other two members—there are two other Democrats on the committee——

Mr. MANN. The rules specially provide for that.

The SPEAKER. The Chair thinks that is true.

JOINT MEETING OF THE TWO HOUSES—PRESIDENT'S MESSAGE.

The SPEAKER. The Clerk will report the resolution offered by the gentleman from Alabama [Mr. UNDERWOOD].

The Clerk read as follows:

House concurrent resolution 24.

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Tuesday, the 2d day of December, 1913, at 1 o'clock in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make them.

The SPEAKER. The question is on agreeing to the resolution.

Mr. MANN. Mr. Speaker, will the gentleman from Alabama yield for a question?

Mr. UNDERWOOD. I yield, Mr. Speaker.

Mr. MANN. Has the gentleman examined as to how far this session of Congress can provide for a joint meeting of the two Houses of the next session before it is ascertained that a quorum in each House is present, as will be ascertained by the call of the roll on Monday?

Mr. UNDERWOOD. Mr. Speaker, my investigation of the question leads me to believe that when we adjourn to-day we adjourn to meet on Monday, not by virtue of the statute that calls the Congress together on the first Monday in December, but by reason of the fact that the House is in session, and that it is a continuous session, and that there will be no other session, but that next Monday will be a part of the session that began on the 7th day of last April.

Mr. MANN. Well, Mr. Speaker, I think the gentleman from Alabama says "from his investigation." I am quite sure, therefore, that he has not given the subject his usual careful study. The Constitution provides that there shall be a regular session of Congress commencing on the first Monday of December of each year unless Congress has otherwise provided by law. We have not otherwise provided by law, so that there will be a regular session of Congress commencing on Monday. That is not only the constitutional provision, but it is the construction of the Constitution which this House has made on more than one occasion. Not only is that the fact, but it will be found on investigation, although it does not settle the matter, that public documents now being printed are printed as of the Sixty-third Congress, second session, for presentation next week.

Mr. UNDERWOOD. Mr. Speaker, I remember this question was up some years ago. The issue came up then as to whether an adjournment a few minutes before the regular session was to begin constituted a new session. I recognize the fact that there was a disagreement as to whether it was a new session or not. At that time I opposed the granting of mileage for the new session, and took the position then that it was a continuous session. Of course, that was only my position, but the House itself at that time determined by a vote of the House that the Members were not entitled to mileage; at least, they voted down the mileage proposition on account of the new session. The gentleman says that the Constitution provides, unless it is otherwise provided by law, that there shall be a session on the first Monday in December, which is correct; but it has been determined by law otherwise, also. The law of the land, the Constitution, authorizes the President to call an extra session of Congress. He has called that extra session of Congress, and we are legally in session, and will remain in session under the law of the land until the two Houses of Congress, by a joint vote of the two Houses of Congress, determine to adjourn. There will be no resolution of adjournment of the two Houses of Congress, and therefore there will be no adjournment of this session of Congress, and for that reason I believe under the law and under the Constitution the session of to-day will be the session of next Monday. Of course, as to the printing of the documents, it is not material one way or another as to how they are printed, whether as of the first session or second session. When the precedent occurred in one of the Congresses several years ago—I have forgotten which one it was, but where there was only an intermission of a few minutes—it is true they did continue to print the documents of that Congress as of the first and second session, although, I believe, there was less than a minute's difference between the two sessions.

I do not think that that can affect this resolution in any way, even if the contention of the gentleman from Illinois is correct, with which I do not agree. This Congress is legally in session, and the two Houses of Congress, by joint resolution either at one session or another, can provide for the President coming here and delivering his annual address. In other words, if we had passed this resolution last October and intended to adjourn on the 1st day of November, I see no reason why the Congress on the last of October, before an adjournment, could not provide that when we met on Monday next there would be a joint session of the two Houses of Congress to receive a message from the President of the United States.

Any resolution that is introduced in the Congress does not die with the session. It lasts as long as the Congress remains in session; and any resolution passed by the concurrence of the two Houses that affects the meeting of the joint bodies would be just as effective if passed at an extra session, to apply to a regular session, as if you waited until a regular session came. So that I can not see, even if the gentleman's contention is correct, to the effect that next Monday begins a new session of Congress, how it possibly affects this resolution.

Mr. MANN. Mr. Speaker, I am inclined to think that the gentleman from Alabama [Mr. UNDERWOOD] will agree with me about the power of the two Houses to provide a joint meeting on Monday next, even if there be a new session. Of course, it has been the custom and the practice for many years, required under the Constitution, for a call of the roll to be had by States on the first day of a session. I take it that that will be done on Monday, notwithstanding the temporary opinion of my friend from Alabama that it is not required, and in addition a resolution will be passed on Monday, I take it, notifying the Senate that the House has met, that a quorum has developed, and that the House is prepared to do business, and that a committee will be appointed on the part of the House to join a similar committee on the part of the Senate to notify the President that the two Houses of Congress have met and have developed a quorum in each, and are prepared to hear any communication from the President. The custom has been for the President to notify that committee, which then notified the House, that the President was prepared to present a communication to the two Houses.

However, I have no objection whatever to making provision in advance for that, although it looks a good deal like placing the cart before the horse. But the gentleman from Alabama, having been very busily engaged otherwise recently, with the sympathy of most of us, I think is in error as to what took place before. When the special session, to which the gentleman refers,

was called by President Roosevelt to meet in November, the House on the Saturday preceding the regular session adjourned. The Senate adjourned to meet on the following Monday at 11 o'clock or 11.30, I believe, and then they adjourned. Subsequently the question came up as to whether the extra session had done away with the regular session. There was an exhaustive debate on the point of order in the House upon the payment of mileage. Mr. TAWNEY, of Minnesota, was in the chair and ruled that the regular session, under the Constitution, commenced on Monday, and that there were two sessions of Congress.

Subsequently the same question arose, and I had the honor to be in the chair, and therefore I am familiar with the question. I went over it anew and came to the conclusion that there was no doubt whatever, under the law and the Constitution, that the regular session of Congress commenced on the first Monday in December. I do not question but that the gentleman from Alabama will reach the same conclusion when he has had the opportunity to give a little more attention to it.

Mr. UNDERWOOD. I will say to the gentleman from Illinois, Mr. Speaker——

Mr. MANN. And if the gentleman will permit, the gentleman stated that the House voted down the mileage. On the contrary, the House voted in the mileage on the occasion where Chairman TAWNEY ruled it in order, and it went to the Senate in that shape. Subsequently the Senate struck it out by amendment, and in conference or otherwise that amendment was agreed to.

The second time the same question came up, when I ruled upon it, the House in Committee of the Whole put in the mileage, and on a roll call disagreed to the amendment, which probably they will do again. [Laughter.]

Mr. UNDERWOOD. Mr. Speaker, according to my recollection of the occasion—and I looked it up at the time, because I was opposed to double mileage and really led the fight to strike it out—if I recall aright, it was my motion to strike out the proposition. It has been some years ago, and of course one's memory can not carry everything that occurred four or five years ago; but my recollection is that at the termination of that session of Congress we met on the morning before the first Monday in December, and that the Speaker——

Mr. MANN. Well, the gentleman's memory is incorrect, and if I were he I would not proceed further on that line. We met on Saturday. The House adjourned on Saturday without passing any concurrent resolution.

Mr. UNDERWOOD. I know there was no concurrent resolution, but my recollection is that we met a few minutes before the regular session.

The SPEAKER. To which Congress does the gentleman refer?

Mr. UNDERWOOD. The Congress in which the question of mileage came up.

The SPEAKER. The extra session called by President Roosevelt?

Mr. UNDERWOOD. Yes; the Fifty-eighth Congress. The Speaker of the House declared the House adjourned by virtue of the power vested in him, without a motion to adjourn.

Mr. MANN. The gentleman from Alabama is again mistaken.

Mr. UNDERWOOD. I am only speaking from memory.

Mr. MANN. The gentleman from New York [Mr. PAYNE] offered a motion to adjourn, the motion prevailed, and the Speaker declared the House adjourned without adding "to meet on Monday next at 12 o'clock."

Mr. UNDERWOOD. The gentleman from South Carolina [Mr. JOHNSON], who has looked up the RECORD, says that my statement is correct.

Mr. JOHNSON of South Carolina. I have not examined the RECORD, but I think the gentleman from Alabama is correct.

Mr. MANN. I think the Speaker can give us all cards and spades on that matter, for he has examined the RECORD.

Mr. UNDERWOOD. The question whether we shall notify the President on Monday next or whether there shall be two sessions is a matter to be determined next Monday. I am offering this resolution as a matter of convenience, so that the President and the Senate may be notified in ample time to meet on Tuesday.

The SPEAKER. The only question for the Chair to determine is the last one the gentleman referred to, and the Chair holds that the resolution is in order. If it were the last days of a Congress and a new Congress came in on next Monday, that would be a horse of a different color. The Chair does not believe that the House should pass a resolution affecting business in the next Congress. But this resolution is in order on the ground of convenience, if for nothing else, and that is to give a proper notification of the proceeding, so that we can have the tickets printed and distributed. We nearly had a riot here on the first occasion of that kind.

Although the question is not involved here, and it is not necessary to determine, the truth about the extra session called by President Roosevelt is that on Saturday, the 5th day of December, the gentleman from New York [Mr. PAYNE] made the ordinary motion to adjourn and it was carried, and the Senate adjourned until 11.30 o'clock on Monday the 7th.

The question is on the resolution offered by the gentleman from Alabama.

The resolution was considered and agreed to.

VIOLATION OF EXCISE LAW.

Mr. JOHNSON of Kentucky. Mr. Speaker, I ask unanimous consent for the present consideration and adoption of the resolution which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 320.

Whereas there appeared in the news columns of the Washington Evening Star of date November 17, 1913, the following article:

"COLLEGE BOY 'DRUNKS' NOT IN POLICE COURT—$1,000 COLLATERAL FORFEITED BY THE FOOTBALL ENTHUSIASTS.

"The followers of the Georgetown and Virginia teams, the former out to celebrate the victory, and the latter to drown their sorrows, who were arrested Saturday night on charges of being drunk, did not appear in the police court to-day when their names were called.

"Of the score taken to the first precinct station Saturday night not one came into court to-day. Those who paid the $10 collateral when they were taken into the station house, and the others, whose friends got them out some time yesterday, failed to let Judge Mullowny give them a lecture on the evils of strong drink.

"The boys from Charlottesville who were among those landed in the toils of the police shook the dust, or, rather, the rain, of Washington from their feet and beat a hasty retreat to the university town yesterday.

"The total number of drunks, both on the collateral list and those in the dock, when court opened this morning was 137. The majority of them, said the police, were the 'boys' who celebrated Saturday night. The others were 'regulars' and several of them will spend their Christmas at Occoquan as guests of Supt. Whitaker. About $1,000 collateral was left at the first precinct station by 'drunks' for their appearance in court to-day, and the large proportion of that went into the District coffers as having been forfeited."

And whereas there appeared in the same paper of the same date the following editorial:

"SATURDAY'S SHAMEFUL SPECTACLE.

"If college 'sport' were necessarily accompanied by such scenes as were enacted in Washington Saturday night, when scores of young men and young women celebrating the football victory or seeking solace for the bitterness of defeat violated the excise law and turned the downtown streets into a pandemonium, then college 'sport' would need to be abolished. It is not to be acknowledged, however, that the sport is itself accountable for the shocking spectacle. The game itself has been modified until it is comparatively safe, but the after effects of a game between two traditional rivals are such as to arouse feelings of profound disgust and disheartenment. For hours the business streets of the city were filled Saturday night with riotously inclined youths wearing college colors, probably many of them in no wise connected with the universities whose representative teams had fought on the gridiron field in the afternoon, but seeking merely to display partisanship by putting on the distinctive ribbons. The fact that nearly a hundred arrests were made during the night for drunkenness and disorderly conduct on the part of the wearers of these colors is no good indication of the demoralizing effects of the game. If the disorder were occasioned merely by natural high spirits induced by the game itself there would be little ground for complaint, however disagreeable it might be to have the streets occupied by mobs until a late hour. But there was only too strong evidence Saturday night that the high spirits displayed were due to unusual potations. That the excise law was broken repeatedly in the serving of liquor to minors can not be questioned. The dispensers of liquor were unquestionably careless in their discrimination between adults and juveniles and should be dealt with by the law as severely as the proof permits. The result was an orgy of youthful inebriation that cast shame upon the city of Washington and must give the authorities of the two institutions whose football teams had met during the afternoon occasion for serious reflection. If the punishment of individual offenders who caused trouble Saturday night, together with the imposing of penalties upon liquor dealers who violated the excise law, proves to be ineffectual in checking this disturbance in the future, it will be necessary to consider the advisability of prohibiting an annual contest which draws so large a crowd of partisan spectators and leads, despite police activity and watchfulness, to such riotous and shameful scenes."

And whereas there appeared in the news columns of the Washington Herald of date November 16, 1913, the following article:

"HILARITY LANDS 87 IN CELLS AFTER THE GAME—LUSTY LUNGS BLAMED, RATHER THAN WOBBLY FEET, IN MOST CASES—PATROL WAGON ON JUMP—CAFÉS AND STREETS CROWDED WITH EXUBERANT COLLEGIANS, BUT LITTLE ROWDYISM IS APPARENT.

"'Twas a glorious celebration, that postgame demonstration by students and alumni of Georgetown and Virginia Universities in café, street, and other public places of the Capital City last night. And many times the paths of glory led but to the cell.

"'Ye gods, what a night!' exclaimed a classically inclined desk sergeant at the first precinct, as the auto patrol continued to collect those who attempted too glorious a celebration.

"More than 40 prisoners was the toll of the occasion shortly after midnight. And the chugging of the up-to-date patrol bespoke of other work for the vehicle. 'By their state ye shall know them,' said the police lieutenant in charge to the group of policemen who went on duty shortly after the game was played. He meant that those whom they found partially atrophied in the legs or of superhuman voice and arms were 'stewdents.'"

And whereas there appeared in the news columns of the Washington Star of date November 16, 1913, the following article:

"STUDENTS REVEL AFTER BIG GAME—NEARLY A HUNDRED COLLEGE BOYS AND FRIENDS NABBED BY POLICE—GIRLS JOIN IN CELEBRATION AND AID IN ONE FIGHT—NEW EXCISE LAW SHATTERED BEYOND RECOGNITION DESPITE ACTIVITY OF OFFICERS.

"Judging from a careful survey of the situation last night, a college arm band went just as far for celebration purposes as a diploma, and as far as the stern and unsympathetic police were concerned it didn't make a bit of difference whether the arm band was on a bona fide collegian or a night-school student. The amount of collateral was just the same—$10 for a riotous souse and $5 added if the riot went beyond the bounds of the ordinary. Old-time observers of college football celebrations in this town are of the opinion that last night's revel was a classic in its way, but limited to one or two localities.

"The observer who watched the patrol wagon rush eight times to the same liquoring place to carry away protesting young men who swore they were absolutely sober or who claimed influence of all kinds from relatives in Tammany Hall to friends on either of the football teams which caused all this disturbance saw that the newly framed excise law was shattered beyond recognition.

"LAW BATTERED TO A PULP.

"The law was battered to a helpless, hopeless, unrecognizable pulp. It's rather hard to judge whether a chap is 20 years old or 21; but by the same token it's not a bit hard to recognize the feeble sunwork of an 18-year-old 'collegian' whose only claim on an alma mater is a daily transfer on the street car lines running toward Georgetown.

"The Virginia outfit, which came here with high hopes of a victory, spent a quiet evening at the Columbia Theater, and the Georgetown team spent a less quiet evening at a down-town hotel. That disposes of the heroes of the occasion. They behaved as heroes should. But their supporters—Good night!

"POLICE WORK OVERTIME.

"In the first place, the police worked overtime gathering up nearly a hundred young drunks, who had to put up $10 or sleep in a cell till to-morrow.

"Some of them wore college bands, but few of them had that clearness of diction which comes from either a classic or scientific course in any of the universities of this fair land. Capt. Hollinberger, of the first precinct, kept his day men on duty just for the purpose of enforcing the new law which makes it necessary for a man to be able to walk a chalk line without wavering. In front of one thirst parlor a line of police waited until midnight, when the lights were made dim and about 20 fine drunks spilled outward toward the curb.

"The police determined to wait there until morning, if necessary, to catch that gorgeous aggregation of tottering souses, and one of them declared the police department would burn up all the gasoline in town in one grand effort to show the majesty of the law. It's a fine thing for the old-time horses that motor patrol wagons have taken their places. Last night's efforts would have strained all the equines in the service.

"BOYS AND GIRLS DRUNK.

"In one hotel boys and girls got drunk to celebrate a football victory. The riot started early in the evening. The drinking rooms of the place were crowded by 8 o'clock and mobs fought for possession of the tables. Police interfered now and then when things grew too hot for the hard-working waiters to handle, and the ejection of a drunk was a monumental affair, as two policemen had to battle with upward of 20 alleged collegiates before they could haul the protesting person to the box. No one seemed to care for the excise law in that particular place.

"Occasionally the sounds of bottles and glasses and the bang of the tray upon a marble floor was evidence that some poor waiter had run afoul of a bevy of yelping youths with a bundle of beer aboard. A waiter who dared protest ran great danger of his personal safety. Altogether, this particular hostelry turned into a four-hour rough-house, as they say in Texas. And yet the boys and girls who stayed seemed to like it.

"BIG ROW OF EVENING.

"The biggest row of the evening occurred when about 20 youths in loud clothing endeavored to rescue a small and active man from the hands of the police. The small one was wonderfully drunk and in a fighting humor. He was about as large as a 6-year-old child, but he had a terrific punch; also a terrific load of liquor. Through the overcrowded corridors he reeled, with friends and foes hanging to him like bees to their queen in swarming time. And young girls, some of them surely not over 18, were in that crowd of fighters, adding their soprano laughter to the vile curses of the men. It took about 20 minutes to clear out the mob and get this undersized person to the patrol wagon.

"He had a college band upon his arm and protested that he was a Senator's secretary and would have the Constitution invoked. However, he slept in a cell until an early hour to-day. A year ago the police might have turned him loose, but this year a new excise law is in effect.

"It must not be supposed that all down town was turned into an orgy. Not at all. The celebration was limited in its scope, but it was warm and exciting where it held full sway.

"ONE PUNCHES DETECTIVE.

"Two youths got into an argument with Detective Bauer during the progress of the football game yesterday afternoon, and one of the lads is said to have punched Bauer, immediately claiming that he was joking. Bauer was unable to see it that way. He arrested them. Collateral was placed at $100, and later, through the intercession of friends, it was reduced to $20.

"One down-town saloon keeper ran no chances. He pulled down his curtains and stationed a guard at the door. Anyone who wanted to get a drink in that place had to assure the sentinel that he, the applicant, was perfectly sober.

"'Can you walk straight?' the sentinel asked of a Star reporter, who was investigating the celebration.

"'Just watch,' and the reporter walked the straightest crack on F street.

"'Let this gentleman in. He's O. K.,' yelled the sentinel.

"Ah, it's a grand thing to be young—and wear a football band."

And whereas there appeared in the news columns of the Washington Times of date November 17, 1913, the following article:

"SIXTEEN STUDENTS FORFEIT TO COURT—BOYS TAKEN AFTER FOOTBALL GAME FAIL TO APPEAR WHEN NAMES ARE CALLED.

"When the names of 16 Georgetown and Virginia University students were called in Judge Mullowny's division of the police court this morning there was a deathlike silence after the bailiff pronounced each name. Failing to respond to the charge of drunkenness against them, the students each forfeited the sum of $5.

"The wholesale arrests were made Saturday night, when the students celebrated the memorable happening on Georgetown Field Saturday afternoon. Fully 10 of the intoxicated 'celebrants' were released from No. 1 Station before the dawn of Sunday, but the other half dozen remained in confinement until friends came to their rescue before noon yesterday."

And whereas all licenses to sell intoxicating liquors in the District of Columbia are issued under authority of acts of Congress and all restrictions upon the sales of liquors and all penalties for a violation of such restrictions are imposed by acts of Congress: Therefore be it

Resolved, etc., That the Committee on the District of Columbia, or such subcommittee thereof as the chairman of the said committee may designate for that purpose, is hereby authorized and directed to institute and prosecute an investigation for the purpose of ascertaining whether said charges, or any of them, are true, viz: Whether or not intoxicating liquors were dispensed to persons who were already intoxicated, or to boys or girls, in the District of Columbia on or about the time set out in said newspaper articles. Said committee is further directed to ascertain the time and place said liquors, if any, were so dispensed and whether or not said liquors were so furnished by a person or persons having a license to sell spirituous, vinous, and malt liquors in the District of Columbia.

If the committee shall find that upon or about the occasion mentioned in the said newspaper articles intoxicating liquors were furnished as charged therein, then the said committee shall report who furnished the said liquors and at what time or times, place or places, such liquors were so furnished and consumed.

The said committee is directed, before beginning said investigation, to ask the cooperation of the Commissioners of the District of Columbia, the Board of Excise of the District of Columbia, the Anti-Saloon League, the Women's Christian Temperance Union, the Local Liquor Dealers' Association, and the faculties of the colleges named in said newspaper articles, to the end that said investigation may be full, complete, and fair.

The chairman of the said committee is hereby authorized to administer oaths and to compel the attendance upon the committee of any person or persons whom the said committee may wish to interrogate relative to the charges referred to in the newspaper articles aforesaid.

Said committee in conducting its investigation is authorized to use the official committee stenographers.

Upon the conclusion of its investigation the said committee shall report fully to the House.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

Mr. MANN. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Kentucky what will be the expense of this investigation?

Mr. JOHNSON of Kentucky. In answer to the gentleman from Illinois I will say that I framed this resolution hoping that there would be no expense. The resolution provides for no expense to the Government.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky? [After a pause.] The Chair hears none.

The resolution was considered and agreed to.

CHANGE OF REFERENCE.

By unanimous consent, the Committee on Public Buildings and Grounds was discharged from further consideration of the bill H. R. 9325, a bill to authorize the city of Tacoma, Wash., to purchase certain lands for the protection of the source of its water supply, and the same was referred to the Committee on Public Lands.

CONSERVATION.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent to make certain minor revisions and extensions of my remarks on the subject of conservation, delivered in the House November 22, 1913, and printed in the RECORD of that date; also to extend my remarks by inserting letters from Hon. Henry S. Graves, the Chief Forester, and others.

The SPEAKER. The gentleman from Washington asks unanimous consent to extend his remarks in the manner indicated. Is there objection?

There was no objection.

WEDDING GIFT TO PRESIDENT'S DAUGHTER.

The SPEAKER. The Chair lays before the House the following communication, which the Clerk will report.

The Clerk read as follows:

THE WHITE HOUSE,
November 24, 1913.

MY DEAR MR. SPEAKER: May I not express to you very warmly my deep feeling of the honor the Members of the House have paid me in presenting me with the beautiful diamond necklace which was brought to me yesterday in a setting worthy of its beauty? I shall treasure this gift all my life as an evidence of generosity not only but of singular courtesy and thoughtfulness on the part of yourself and the other Members of the House. I beg that you will convey to the Members my sense of deep obligation and lasting pleasure.

Mr. Sayre joins me in warm appreciation and thanks.

Cordially and sincerely, yours,

JESSIE WOODROW WILSON.

SEAMEN'S BILL.

Mr. HINDS. Mr. Speaker, I ask unanimous consent to have a reprint of Senate bill 136, the seamen's bill, so called.

The SPEAKER. The gentleman from Maine asks unanimous consent for a reprint of the seamen's bill. Is there objection?

There was no objection, and it was so ordered.

CONSERVATION.

Mr. WEAVER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD for the purpose of printing a speech delivered at Tulsa, Okla., on October 29, 1913, by Hon. SCOTT FERRIS before the International Dry Farming Congress on the subject of conservation.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

THE LIFE-SAVING SERVICE.

Mr. MANN. Mr. Speaker, I ask unanimous consent to address the House for five minutes concerning the Life-Saving Service.

The SPEAKER. The gentleman from Illinois asks unanimous consent to address the House for five minutes on the subject of the Life-Saving Service. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, recently there appeared in newspapers on several occasions statements attributed to the captain of a wrecked vessel to the effect that certain of the life-saving crews, or one of the crews, had purchased a shipwrecked vessel really at the expense of the owners. Believing that to be untrue, and that a gross injustice was being done the Life-Saving Service, I made inquiry of the Treasury Department, and I ask that the Clerk read in my time the following letter from the Assistant Secretary of the Treasury:

The SPEAKER. The Clerk will read the letter.

The Clerk read as follows:

TREASURY DEPARTMENT,
OFFICE OF THE ASSISTANT SECRETARY,
Washington, November 26, 1913.

Hon. JAMES R. MANN,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: I have the honor to acknowledge the receipt of your letter of the 24th instant inclosing a newspaper clipping in regard to the wreck of the schooner *George W. Wells*, which stranded near Hatteras Inlet, N. C., September 3, 1913. The charge is made in the article that the vessel was purchased by members of the Life-Saving Service, and you ask if life-saving crews are permitted to purchase wrecked vessels.

No person connected with the Life-Saving Service is allowed to purchase wrecked vessels or property, and keepers and members of crews are specifically forbidden to hold any shares, directly or indirectly, in any wrecking gear or company, or to have any interest in wrecking operations beyond such as their duties in the service involve.

In this particular case Capt. Joseph H. York, the owner of the wrecked vessel, was quoted in the Washington Post of September 15, 1913, as saying that life-savers had formed a combination to buy wrecked vessels and that he intended to bring charges in Washington against the men. A telegram was at once sent to Capt. York by this department, demanding that he substantiate his charge or withdraw it, but although diligent effort was made to reach Capt. York the department was unable to get any reply from him. It was expected, however, that he would file the charges as stated in the newspaper, and it was the intention, if the charges were filed, to have them thoroughly investigated. Nothing having been heard from Capt. York, however, a letter was addressed by the general superintendent of the Life-Saving Service to each of the three keepers of the life-saving stations nearest the place where the vessel stranded, calling attention to the charges and asking for a full reply to the complaint of Capt. York and for any information the keepers might have in regard to any of the allegations attributed to Capt. York in the newspaper article. Each keeper positively denied that there was any truth in Capt. York's complaint, and it is stated that the wrecked vessel was bought by Mr. Adolphus Burrus, a person in no way connected with the Life-Saving Service.

Under section 4 of the act of June 18, 1878, organizing the Life-Saving Service, the keepers and crews of life-saving stations are constituted public salvors, and they are given authority and are required by said act to take charge of and protect all property saved from shipwreck at which they may be present until it is claimed by parties legally authorized to receive it or until otherwise instructed to dispose of it by the Secretary of the Treasury. There are numerous provisions of the regulations of the Life-Saving Service intended to safeguard the public interest with respect to wrecked property. It is provided that no person connected with the service will be permitted to act as agent to sell for the owner, agent, underwriter, or any other person interested therein any wrecked property. It is also provided that the members of regular crews of stations are not entitled to salvage, it being a part of their duty to assist without charge in saving property from wrecked vessels so far as it can be done without interfering with the duty of saving life, which must always be the paramount consideration, and they are forbidden to solicit or receive any other compensation for the performance of such duty than that which the Government pays.

It is considered very unfortunate, as well as an injustice to the Life-Saving Service, that the false and misleading statements contained in the clipping referred to should ever have been published.

Very truly, yours,

BYRON R. NEWTON,
Assistant Secretary.

OVERFLOWED LANDS IN IDAHO.

Mr. SMITH of Idaho. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the overflowed lands in Idaho by having printed a report of Mr. C. G. Elliott, chief of the drainage investigations.

The SPEAKER. The gentleman from Idaho asks unanimous consent to extend his remarks in the RECORD in the manner stated. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 55 minutes p. m.) the House adjourned.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Postmaster General, transmitting, as required by section 397 of the statutes, a report of the public property in the Post Office Department on November 1, 1913 (H. Doc. No. 288); to the Committee on the Post Office and Post Roads and ordered to be printed.

2. A letter from Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on examination and survey of Greenwich Harbor, Conn. (H. Doc. No. 289); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on examination and survey of Savannah Harbor, Ga., with a view to providing an adequate turning basin (H. Doc. No. 290); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BARTHOLDT: A bill (H. R. 9523) to amend an act entitled "An act granting to the Keokuk & Hamilton Water Power Co. rights to construct and maintain, for the improvement of navigation and development of water power, a dam across the Mississippi River"; to the Committee on Interstate and Foreign Commerce.

By Mr. BURKE of South Dakota: A bill (H. R. 9524) regulating the payment of money to Indians; to the Committee on Indian Affairs.

By Mr. FOWLER: A bill (H. R. 9525) to increase the pension of widows, minor children, and insane, idiotic, or otherwise helpless children of deceased soldiers and sailors of the late Civil War, the War with Mexico, the various Indian wars, and the War with Spain, etc., and to grant pensions to certain widows, insane, idiotic, or otherwise helpless children of deceased soldiers and sailors of the above-named wars; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9526) to amend sections 1, 2, 3, and 8 of an act to protect trade and commerce against unlawful restraints and monopolies, an act of July 2, 1890; to the Committee on the Judiciary.

Also, a bill (H. R. 9527) making appropriation for the purchase of a site and the erection of a public building thereon in the city of Fairfield, Ill.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 9528) to amend sections 1 and 2 of an act entitled "An act to determine the jurisdiction of circuit courts of the United States and to regulate the removal of causes from State courts, and for other purposes"; to the Committee on the Judiciary.

By Mr. IGOE: A bill (H. R. 9529) to amend an act entitled "An act to create a Commerce Court and to amend an act entitled 'An act to regulate commerce,' approved February 4, 1887, as heretofore amended, and for other purposes," approved June 18, 1910; to the Committee on Interstate and Foreign Commerce.

By Mr. McKELLAR: A bill (H. R. 9530) to prohibit interstate shipments or transportation of certain food products; to prohibit transportation and sale of adulterated or misbranded food products; regulate traffic therein; to define and regulate cold storage; to regulate dealing in cold-storage food products; and to fix penalties for violation, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. SIMS: A bill (H. R. 9531) to regulate the issuance of stocks and bonds by common carriers, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. CARTER: A bill (H. R. 9532) to extend the time for the appraisement of the segregated mineral lands in Oklahoma; to the Committee on Indian Affairs.

By Mr. GARNER (by request): Resolution (H. Res. 319) authorizing the Postmaster of the House to appoint messengers and to provide salaries therefor; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON: A bill (H. R. 9533) granting an increase of pension to Mary E. Miller; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 9534) granting an increase of pension to Ellen Stark; to the Committee on Invalid Pensions.

By Mr. FOWLER: A bill (H. R. 9535) to appropriate $4,000 to pay for a wharf boat belonging to Fannie Pemberton; to the Committee on War Claims.

By Mr. GARNER: A bill (H. R. 9536) for the relief of Stephen Morris Barlow; to the Committee on Military Affairs.

By Mr. GOEKE: A bill (H. R. 9537) granting an increase of pension to Stephen W. Mauk; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9538) granting an increase of pension to Jacob Apgar; to the Committee on Invalid Pensions.

By Mr. GRAHAM of Pennsylvania: A bill (H. R. 9539) granting a pension to Alice Terry; to the Committee on Invalid Pensions.

By Mr. KENNEDY of Rhode Island: A bill (H. R. 9540) granting an increase of pension to Sarah B. Whitaker; to the Committee on Invalid Pensions.

By Mr. LEVER: A bill (H. R. 9541) granting a pension to William Preston Raines; to the Committee on Invalid Pensions.

By Mr. MAGUIRE of Nebraska: A bill (H. R. 9542) granting an increase of pension to William W. Bowling; to the Committee on Pensions.

Also, a bill (H. R. 9543) granting an increase of pension to Cyrus W. Graff; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9544) granting an increase of pension to W. F. Thompson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9545) granting an increase of pension to John Schlecht; to the Committee on Invalid Pensions.

By Mr. MAHER: A bill (H. R. 9546) granting an increase of pension to Margaret McDermott; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9547) granting an increase of pension to Emma Eshman; to the Committee on Invalid Pensions.

By Mr. PAYNE: A bill (H. R. 9548) granting a pension to Mary A. Missner; to the Committee on Invalid Pensions.

By Mr. RUBEY: A bill (H. R. 9549) granting an increase of pension to James M. Osborn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9550) granting an increase of pension to Logan McDaniel; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9551) granting an increase of pension to George W. Gullion; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9552) granting an increase of pension to Moses Knight; to the Committee on Invalid Pensions.

By Mr. SMITH of Idaho: A bill (H. R. 9553) granting a pension to John B. Bishop; to the Committee on Invalid Pensions.

By Mr. SMITH of New York: A bill (H. R. 9554) granting a pension to Clark E. Semark; to the Committee on Pensions.

By Mr. STONE: A bill (H. R. 9555) granting an increase of pension to Michael Rafter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9556) granting an increase of pension to William W. Ong; to the Committee on Invalid Pensions.

By Mr. BOOHER: A bill (H. R. 9557) granting a pension to Sarah H. Kraut; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9558) granting a pension to Almira Cantner; to the Committee on Invalid Pensions.

By Mr. FREAR: A bill (H. R. 9559) granting an increase of pension to Julia W. Stevens; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9560) granting an increase of pension to Daniel U. Clough; to the Committee on Invalid Pensions.

By Mr. FIELDS: A bill (H. R. 9561) granting an increase of pension to Joseph A. Mayes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9562) granting an increase of pension to John W. Fultz; to the Committee on Invalid Pensions.

By Mr. KINKAID of Nebraska: A bill (H. R. 9563) granting an increase of pension to Amos Aspey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9564) granting an increase of pension to Melchor Steinman; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 9565) granting a pension to A. M. Huckstep; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9566) granting a pension to B. F. Poe; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9567) granting a pension to Nimrod P. Ginger; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9568) granting a pension to Jesse A. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9569) granting an increase of pension to John Dryman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9570) granting an increase of pension to William C. Young; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9571) granting an increase of pension to Ottilla H. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9572) granting an increase of pension to Ira B. Timmons; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of the congregation worshiping at the Christian Temple, favoring passage of resolution for the Government to suspend for one year all naval construction programs; to the Committee on Naval Affairs.

Also (by request), petition of George Edwin Joseph, New York, N. Y., on behalf of William J. Wilkins and other voters of the thirteenth congressional district of New York, protesting against the seating of GEORGE W. LOFT as a Member of the House of Representatives; to the Committee on Elections No. 2.

By Mr. ANDERSON: Evidence in support of bill for the relief of Mary E. Miller; to the Committee on Invalid Pensions.

By Mr. ASHBROOK: Petition of the Coshocton Grocery Co. and 12 others, of Coshocton, Ohio, favoring a change in the interstate-commerce laws relative to mail-order houses; to the Committee on Ways and Means.

By Mr. BARTHOLDT: Petition of the St. Louis Division, No. 2, of the Order of Railroad Telegraphers, favoring passage of House bill 1873, to make lawful certain agreements between employers and laborers; to the Committee on the Judiciary.

By Mr. DALE: Memorial of the mass meeting of People's Institute, favoring widening of the limits now imposed by the parcel-post regulations; to the Committee on the Post Office and Post Roads.

Also, memorial of the Board of Trade of Tampa, Fla., favoring passage of a bill for drainage fund and the reclamation of the overflowed swamp lands of the United States; to the Committee on Rivers and Harbors.

Also, petition of Thompson & Ballantine, protesting against passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisheries.

Also, petition of the United Anglers' League, New York, favoring the passage of the Brown bill for the establishment of a Long Island hatchery; to the Committee on the Merchant Marine and Fisheries.

By Mr. DYER: Petition of the Central Trades and Labor Union of St. Louis, Mo., favoring passage of the Bartlett-Bacon bills, H. R. 1873 and S. 927; to the Committee on the Judiciary.

By Mr. GARNER: Petition of citizens of Aransas Pass, Tex., urging that a channel be excavated from the harbor of Aransas Pass to the town of Aransas Pass; to the Committee on Rivers and Harbors.

Also, petition of the Army field clerks of the State of Texas, favoring passage of a bill for increased pay of the Army field clerks; to the Committee on Military Affairs.

Also, memorial of the Men's Forward Movement in Mission, Tex., favoring passage of House bill 6060 and Senate bill 2453, relative to the restriction of immigration; to the Committee on Immigration and Naturalization.

By Mr. GARDNER: Memorial of the Boston Central Labor Union, of Boston, Mass., favoring a congressional investigation of mining conditions in the State of Colorado; to the Committee on the Judiciary.

By Mr. GRAHAM of Pennsylvania: Petition of the Board of Trade of Tampa, Fla., favoring passage of a bill to establish a drainage fund and reclamation of the overflowed swamp lands of the United States; to the Committee on Rivers and Harbors.

Also, memorial of the Business Associations of Northeastern Philadelphia, favoring passage of a bill for extensions and im-

provements to the Frankford Arsenal; to the Committee on Military Affairs.

By Mr. KEATING: Petition of citizens of Pueblo, Colo., favoring passage of pension bills for rewards to the United States Military Telegraph Corps who rendered military service in the Civil War, 1861–1865; to the Committee on Military Affairs.

By Mr. LAFFERTY: Petition of the Oregon Federation of Women's Clubs, Portland, Oreg., favoring the passage of legislation for the preservation of the Hetch Hetchy Valley and the Yosemite Park; to the Committee on the Public Lands.

Also, petition of the Portland (Oreg.) Women's Club, favoring the passage of the La Follette bill for the protection of seamen; to the Committee on the Merchant Marine and Fisheries.

Also, petition of 39 citizens of Portland, Oreg., favoring the passage of legislation to grant pensions to the members of the United States Military Telegraph Corps of the Civil War; to the Committee on Invalid Pensions.

By Mr. LAZARO: Memorial of the police jury of the parish of Jefferson Davis and State of Louisiana, favoring a bill for the survey of the Mermentau River in Louisiana with a view to perfect navigation; to the Committee on Rivers and Harbors.

By Mr. LEVY: Memorial of the Board of Trade of Tampa, Fla., favoring passage of a bill to establish a drainage fund and the reclamation of the swamp lands of the United States; to the Committee on Rivers and Harbors.

Also, petition of the New York and New Jersey Lumber Co., of New York, N. Y., favoring amending or repealing the Kahn law (H. R. 7595) as relates to trade-marks; to the Committee on Ways and Means.

Also, petition of the joint local executive board of the United Brewery Workmen of Greater New York, favoring amendment to modify the excise law; to the Committee on the Judiciary.

By Mr. REILLY of Connecticut: Petitions of the Brotherhood of Painters, Decorators, and Paperhangers of America and Waterbury Central Labor Union, of Waterbury, and New Haven Trades Council, of New Haven, Conn., favoring passage of the Bartlett-Bacon bills; to the Committee on the Judiciary.

By Mr. SMITH of Idaho: Petitions of business men of Idaho, favoring legislation providing a tax on interstate mail-order business; to the Committee on Ways and Means.

SENATE.

MONDAY, *December 1, 1913.*

(Legislative day of Saturday, November 29, 1913.)

The Senate met at 10 o'clock a. m.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we come to Thee again out of the blessed, hallowed influences of the Sabbath day, we trust with refreshment of mind and body, bringing to the duties of this new day fresh revelations of God. We take Thy name reverently upon our lips and ask Thy blessing upon us. With the thought of God, the infinite, the eternal, the Father of our spirits, we enter upon the duties of this day. We pray that every thought may be chastened by our own thought of God, and that Thy will may be revealed in the work Thy servants do in Thy name in this Senate this day. For Christ's sake. Amen.

The VICE PRESIDENT resumed the chair.

The Journal of the proceedings of Saturday last was read and approved.

Mr. SMOOT. Mr. President, I notice that there are very few Senators in the Chamber, and I therefore suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gallinger	Owen	Smoot
Bacon	Goff	Page	Sterling
Bankhead	Hollis	Perkins	Sutherland
Brady	James	Pittman	Swanson
Bristow	Johnson	Pomerene	Thompson
Bryan	Kenyon	Reed	Thornton
Burleigh	Lane	Robinson	Townsend
Burton	Lewis	Root	Vardaman
Chamberlain	McCumber	Saulsbury	Walsh
Chilton	McLean	Shafroth	Warren
Clark, Wyo.	Martin, Va.	Sheppard	Weeks
Clarke, Ark.	Martine, N. J.	Sherman	Williams
Colt	Nelson	Shields	Works
Cummins	Norris	Smith, Ga.	
Dillingham	Overman	Smith, S. C.	

Mr. SHEPPARD. My colleague [Mr. CULBERSON] is unavoidably absent. He is paired with the Senator from Delaware [Mr. DU PONT]. I will let this announcement stand for the day.

Mr. THORNTON. I desire to announce that the junior Senator from Louisiana [Mr. RANSDELL] is absent on public business.

The VICE PRESIDENT. Fifty-eight Senators have answered to the roll call. There is a quorum present. The presentation of petitions and memorials is in order.

SAN FRANCISCO WATER SUPPLY.

Mr. GALLINGER. I present a letter from Benjamin L. Fairchild, of New York City, relative to the Hetch Hetchy reservoir bill. The bill having been reported, I ask that the letter lie on the table. I also ask that it be printed in the RECORD.

There being no objection, the letter was ordered to lie on the table and to be printed in the RECORD, as follows:

NEW YORK, *November 29, 1913.*

Hon. JACOB H. GALLINGER,
United States Senate, Washington, D. C.

DEAR SIR: Permit me a word of protest against the Hetch Hetchy reservoir bill.

When this bill passed the House of Representatives it seemed to me beyond understanding how a majority could have been led into voting in favor of a measure which, if enacted will seriously impair the beauties of the great Hetch Hetchy Valley and will prevent the use of this valley, the grand canyon, and the Tuolumne Meadows, as a national park by visiting American citizens.

Then it occurred to me as a possible explanation that while many Americans have been impressed with a knowledge of the Yosemite Valley only a few have had opportunity to learn of the Hetch Hetchy Valley, the grand canyon of the Tuolumne, and of the wondrous Tuolumne Meadows, which contain the headwaters flowing to the Hetch Hetchy Valley, and which are surrounded by the high and snow capped mountains forming, in part, the skyline of the Yosemite Valley.

My strong impressions of this region and the strong protest against its threatened spoliation arise largely from the trips which I have personally made with my son. With him I have traveled mule back over a thousand miles and more of mountain trails throughout the high Sierras, crossing and camping upon the several forks of the Merced, the San Joaquin, and the Kings Rivers, and along the Tuolumne River, and over the expanse of the Tuolumne Meadows, from which we have climbed to snow-capped peaks overlooking the Yosemite Valley.

I gave my son full opportunity to see with me his own country, including Alaska, before I took him to Europe. Among other places, for two successive seasons I traveled with him over the mountains and trails in California.

It thus happened that we became acquainted with the grandeur and beauties of the wonderful Yosemite National Park, which includes as important features the Hetch Hetchy Valley, the Tuolumne Grand Canyon, and the camping grounds of the Tuolumne Meadows. It also thus happened that our thoughts contemplated the future when Americans in large and increasing numbers would become better acquainted with this great playground of the Nation, and when the tide of American travel would turn westward across the continent to enjoy the wonders of our own country in preference to trips exclusively eastward across the Atlantic to foreign shores.

It was wise forethought for the Nation to establish the Yellowstone, the Glacier, and the Yosemite National Parks. Now it is proposed to close to the American public all that wondrous portion of the Yosemite Park through which flows the waters of the Tuolumne.

No one can visit this wonderful region without being aroused to a feeling of opposition and resentment against the present threatened spoliation. I wish it were possible that every Senator before voting on the proposition could have opportunity to view the grandeur and beauty of the scenery from which it is now purposed to shut out the American public. The defeat of the measure would then be assured.

Each Senator, no doubt, will receive descriptive sketches of the Hetch Hetchy Valley, of the Grand Canyon of the Tuolumne, and of the Tuolumne Meadows. It is not my purpose to enter into these detailed descriptions.

As one American citizen who has had opportunity to acquire knowledge at first hand, and to be inspired by the wonderful scenic beauties whose destruction for national park uses is now threatened, I wish only to enter a strong protest against this wanton scheme and to urge upon you to vote against the bill.

I have the honor to remain,
Yours, with respect,
BENJAMIN L. FAIRCHILD.

PETITIONS AND MEMORIALS.

Mr. WEEKS presented petitions of sundry citizens of Springfield; of the congregations of the Methodist Episcopal Church of Hampden; of the First Methodist Episcopal Church of West Springfield; of the Woman's Missionary Society of the Hope Congregational Church, of Springfield; and of the Woman's Home Missionary Society of the Methodist Episcopal Church of Chicopee Falls, all in the State of Massachusetts, praying for the passage of the so-called antipolygamy bill, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Winchester, of the Woman's Club of Nahant, of the executive board of the Cabot Club, of Middleboro, all in the State of Massachusetts, and a memorial of the Woman's Christian Temperance Union of Modesto, Cal., remonstrating against the passage of the so-called Hetch Hetchy bill, which were ordered to lie on the table.

Mr. PERKINS presented a petition of the Federated Trades Council of Sacramento, Cal., praying for the enactment of legislation granting to the city of San Francisco the use of the waters of the Hetch Hetchy Valley, which was ordered to lie on the table.

He also presented a petition of the Board of Trustees of Crescent City, Cal., praying that an appropriation be made for the construction and maintenance of a breakwater or some other form of adequate, permanent, and substantial harbor improvement at the harbor site at Crescent City, Cal., which was referred to the Committee on Commerce.

Mr. BURTON. I present a petition signed by citizens of New Vienna, in the State of Ohio, favoring the repeal of the law exempting American vessels from the payment of Panama Canal tolls. The petition is comparatively brief, and I ask that it be printed in the RECORD, with one of the signatures.

There being no objection, the petition was referred to the Committee on Interoceanic Canals and ordered to be printed in the RECORD, with one of the signatures, as follows:

NEW VIENNA, OHIO,
May 27, 1913.

To Hon. Senator BURTON and Congressman FESS:

The petition of the subscribers, citizens of New Vienna, Clinton County, Ohio, respectfully desire your aid in obtaining the repeal of that section of the law exempting American coastwise trade from the payment of Panama Canal tolls.

Believing the credit of our country demands the proceedings, and your petitioners will ever pray, etc.

W. C. HIGLEY AND OTHERS.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GALLINGER:

A bill (S. 3492) to amend section 237 of "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; to the Committee on the Judiciary.

By Mr. ROOT:

A bill (S. 3493) granting an increase of pension to Isabella Reed; and

A bill (S. 3494) granting an increase of pension to Jane Meade Tiffany Porter (with accompanying paper); to the Committee on Pensions.

THE PANAMA CANAL.

Mr. WEEKS. I introduce a joint resolution which I should like to have read and referred to the proper committee. It is very short.

The joint resolution (S. J. Res. 84) to provide for the transportation by sea of men, material, stores, and equipment for account of the United States, and of material, stores, and equipment for use in the construction or maintenance of the Panama Canal, was read the first time by its title and the second time at length, as follows:

Resolved, etc., That hereafter the transportation by sea of (a) material, stores, and equipment for the use of the Army or Navy of the United States; (b) of the forces of the United States; (c) of materials, stores, and equipment from the United States for use in the construction of the Panama Canal; and (d) of all material and equipment for use on construction or maintenance of fortifications, harbors, navy yards, naval stations, or other works for account of the United States shall be restricted to vessels of the United States, and no others; and such transportation, when time will permit, shall be furnished by contract, after proper advertisement, by the lowest bidder complying with the requirements of the United States.

The VICE PRESIDENT. The joint resolution will be referred to the Committee on Interoceanic Canals.

ORDER OF BUSINESS—EXECUTIVE SESSION.

The VICE PRESIDENT. The morning business is closed. The calendar under Rule VIII is in order.

Mr. SMITH of Georgia. I move that the Senate proceed to the consideration of executive business.

Mr. BURTON. The statement was made by the Presiding Officer on Saturday that the executive session on that day would be the last of the session. I so understood him, at any rate.

Mr. SMITH of Georgia. I understand that there are some matters still ripe for executive session that ought to be disposed of this morning. I have none myself that I am especially interested in.

Mr. SMOOT. I desire to call the Senator's attention to the unanimous-consent agreement that we have.

It is agreed by unanimous consent that on Monday, December 1, 1913, immediately upon the conclusion of the routine morning business, the Senate will proceed to the consideration of the bill (H. R. 7207) granting to the city and county of San Francisco certain rights of way, etc., and that before adjournment on the calendar day of Saturday, December 6, 1913, the Senate will vote upon any amendment that may be pending, any amendments that may be offered, and upon the bill—through the regular parliamentary stages—to its final disposition.

Under that unanimous-consent agreement I believe it is proper for the Chair to lay before the Senate that bill.

Mr. SMITH of Georgia. I agree with the Senator, but I thought the Senate was about to proceed with the consideration of the calendar under Rule VIII. I think the proper course, first, will be to lay the consent agreement before the Senate. Under the terms of the consent agreement it is not necessary that the Senate shall continue exclusively to give its attention to that bill until the time for voting, but I think it ought to be laid before the Senate.

Mr. SMOOT. I understand the parliamentary situation; but if any Senator desires to speak upon the bill, then of course he has that right.

Mr. SMITH of Georgia. I agree with the Senator that it should be laid before the Senate, and if anyone desires the attention of the Senate upon that I'll he has the right to be heard.

Mr. PITTMAN. Mr. President, has House bill 7207 been laid before the Senate?

The VICE PRESIDENT. It has not been.

Mr. PITTMAN. If the morning business is closed——

The VICE PRESIDENT. The motion that was made by the Senator from Georgia [Mr. SMITH] was to proceed to the consideration of executive business.

Mr. SMITH of Georgia. I withdraw that motion, because I think it would interfere with the execution of the unanimous-consent agreement.

The VICE PRESIDENT. The Chair is compelled to rule that Monday, December 1, under the unanimous-consent agreement, has not yet arrived and will not arrive until 12 o'clock.

Mr. CLARK of Wyoming. Mr. President, I respectfully appeal from the decision of the Chair.

Mr. BACON. I beg the Chair's pardon. I did not hear what the ruling was.

The VICE PRESIDENT. Under the unanimous-consent agreement, which provides that on Monday, December 1, 1913, immediately upon the conclusion of the routine morning business, and so forth, the Senate will proceed to the consideration of House bill 7207, the Chair has ruled that that unanimous-consent agreement means at the beginning of the regular session of the Congress of the United States, and that the day mentioned in the agreement has not yet arrived. From that ruling of the Chair the Senator from Wyoming [Mr. CLARK] appeals, and the question is——

Mr. SMOOT. May I just say a word? It seems to me, if the ruling of the Chair is sustained, that our record should certainly be changed. I call attention to the RECORD of Saturday, on page 6043, where the Senator from Indiana [Mr. KERN] makes this motion:

Mr. KERN. I move that when the Senate adjourns to-day it adjourn until Monday next at 10 o'clock a. m.

That is to-day. The Senate did not take a recess but adjourned to meet at 10 o'clock this morning. We met at 10 o'clock this morning under that adjournment; the Journal was read and morning business was transacted; so it seems to me, Mr. President, that under that action of the Senate this is the session of the Senate of December 1, and morning business having been concluded the unanimous-consent agreement is now in force.

Mr. BACON. Mr. President, I am not sure that there is anything in either the rules of the Senate or in any other authority which makes the hour of 12 o'clock the beginning of our legislative day, but it is certainly the universally recognized fact that 12 o'clock noon is the beginning of the legislative day. It is upon that fiction, Mr. President, that we assume the authority at the end of a Congress to sit in this Chamber on the morning of the 4th day of March up to 12 o'clock noon, although, under the law, the term of the House of Representatives and of a third of the Senators expire on the 3d of March; in other words, we do not observe the calendar day as the legislative day. The universal recognition is—and when I say "universal recognition" I mean in our practice here—that the legislative day begins at 12 o'clock and runs until——

Mr. SMOOT rose.

Mr. BACON. If the Senator will pardon me a minute and let me state my proposition before he interrupts me—the legislative day begins at 12 o'clock noon and runs until the succeeding day at 12 o'clock noon. If that is accepted as the rule of the Senate, the fact that the Senate on Saturday last adjourned to 10 o'clock to-day did not make the legislative day known as the 1st of December begin at 10 o'clock; but this is practically a part of the legislative day beginning Saturday last at 12 o'clock, and the legislative day of December 1 does not properly begin until 12 o'clock to-day. In other words, I do not think the regular session of Congress begins until 12 o'clock to-day. The situation is possibly a little awkward from the fact that it would have been better for the Senate to have taken a recess until 10 o'clock to-day, which was not done.

Mr. SMOOT. I will ask the Senator——

Mr. BACON. If the Senator will pardon me, I will yield to him in one second, as soon as I am able to state the proposition. I repeat, it would have been better, undoubtedly, if we had taken a recess until 10 o'clock this morning; but, failing to do so, it was not the design of the Senate—we had no right to do it unless the other House agreed with us—to make the regu-

lar session begin at 10 o'clock to-day. What authority have we to make the regular session begin at 10 o'clock? The regular sessions of Congress are not regulated by the order of either House, but they are regulated by law, and the beginning of any regular session must necessarily be either by law or by the concurrent act of the two Houses fixing the time of meeting. One House could not meet at 10 o'clock as the beginning of the regular session and the other House meet at 12 o'clock as the beginning of the regular session. It would be an impossibility. Therefore I think that the ruling of the Chair is correct—that this is not a part of the legislative day of December 1, but is a part of the legislative day of November 30, in fact, and it ought to appear in the RECORD as a part of the legislative day of November 30. November 30, it is true, was Sunday, but there is nothing in the law which denies to Congress the right to sit on Sunday, and I have myself frequently seen Congress sit on Sunday.

Mr. SHAFROTH. Will the Senator from Georgia allow me to interrupt him?

Mr. BACON. I want, first, to yield to the Senator from Utah [Mr. SMOOT], because he endeavored twice to interrupt me. I ask the Senator from Colorado to kindly forbear for a moment.

Mr. SMOOT. I was going to ask the Senator from Georgia this question: Has it not been the universal practice of the Senate in the past whenever they have held a session before 12 o'clock upon the day of a new session, if it ever happened——

Mr. BACON. It has happened before.

Mr. SMOOT. That they took a recess until 10 o'clock in the morning, or to whatever time the Senate might agree?

Mr. BACON. I think so.

Mr. SMOOT. And it was for that reason that I brought the matter to the attention of the Senate.

Mr. BACON. It would have been better, I think, to have done so in this instance.

Mr. SMOOT. The Senator from Georgia refers to the regular session of Congress. By the RECORD I do not take it that the session of the Senate from 10 o'clock until 12 o'clock to-day is a part of the regular session of Congress. We are still in the first or extra session of the Sixty-third Congress——

Mr. BACON. Undoubtedly.

Mr. SMOOT. And shall be until 12 o'clock.

Mr. BACON. I think so, undoubtedly.

Mr. SMOOT. Therefore it seems to me, Mr. President, that, notwithstanding what the Senate did last Saturday by way of adjournment, up until 12 o'clock to-day holds good, as if it had been any other day of a regular session, and whatever unanimous-consent agreement has been made should be followed out.

Mr. BACON. The unanimous consent, I understand though, refers to December 1.

Mr. SMOOT. It does refer to December 1.

Mr. BACON. And I say, in legislative understanding, December 1 necessarily has not arrived, and will not arrive, until 12 o'clock to-day. That is the point.

Mr. SMOOT. I think it has arrived by the record.

Mr. BACON. No; we can not have two legislative days of December 1; we can not make it arrive under the practice so well established as to be equivalent to law. December 1, which is fixed by law as the time of the meeting of Congress, does not arrive until 12 o'clock.

Mr. SMOOT. If that is the case, then we had no power whatever to adjourn to meet on Monday at 10 o'clock.

Mr. BACON. Oh, yes; we had.

Mr. SMOOT. No; because the regular session begins at 12 o'clock; and that is the regular order.

Mr. BACON. Yes

Mr. SMOOT. But the House of Representatives meets at 12 o'clock and the Senate meets at 12 o'clock; and if the position taken by the Senator is correct, then we are in the session of December 1.

Mr. BACON. By no means.

Mr. GALLINGER. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from New Hampshire?

Mr. BACON. If the Senator wishes to interrupt me, I will yield with pleasure.

Mr. GALLINGER. I rise to say that I think the ruling of the Chair is correct and that the contention on the part of the Senator from Georgia [Mr. BACON] is correct. I turn to the proceedings of a former session—that of 1903—and it appears that the Senate met at 11.30 a. m. on that day. I do not know whether it was on a recess motion or a motion to adjourn, but probably it was a recess motion, and that is the only essential point of difference. I think we ought to have taken a recess in this instance. In the case that I have cited morning business was transacted in the usual form and when the hour of 12 o'clock arrived the President pro tempore said:

> The hour provided by law for the meeting of the first regular session of the Fifty-eighth Congress having arrived, I declare the extraordinary session adjourned without day.

That occurred at the hour of 12 o'clock, morning business having been gone through with in the usual form between the hours of 11.30 and 12 o'clock.

It seems to me clear that the intention when the unanimous-consent agreement was made was that at the beginning of the regular session the Hetch Hetchy bill should be taken up, and I feel sure there is no just ground for contention on this point, except that we made an inadvertent mistake in adjourning in place of taking a recess, and the record ought to be changed accordingly.

Mr. CLARK of Wyoming. Mr. President——

Mr. BACON. Pardon me just a moment. I will yield the floor in a second.

Mr. CLARK of Wyoming. I only wanted to explain my position.

Mr. BACON. I do not want to trespass further upon the time of the Senate than to make the suggestion that the best way out of the difficulty is by unanimous consent to correct the record so as to make it appear that a recess was taken on Saturday instead of an adjournment.

Mr. GALLINGER. That is the suggestion I made.

Mr. SMOOT. That is all I desire to have done.

Mr. SHAFROTH. I wish to state to the Senator from Georgia that no matter what language was used, whether the word "adjournment" or otherwise, really a recess was taken, because you can not adjourn a session to a time earlier than the beginning of the regular session. If that is not true, what will become of the nominations which have been sent in by the President? If this is a part of the regular session, the nominations not confirmed have expired, and the result would be the President would have to send in the nominations again. Consequently a motion to adjourn to a fixed hour before the time of meeting of the regular session becomes nothing but a motion for a recess, no matter what language is used.

Mr. CLARK of Wyoming. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Wyoming?

Mr. BACON. I wish, with the permission of the Senator, to ask unanimous consent that the record may be changed as I have indicated.

Mr. CLARK of Wyoming. Mr. President, before that request is put, I desire to say to the Chair and to the Senate that my appeal from the ruling of the Chair was not intended for the purpose of delay. It was simply for the purpose of attempting to put the record straight. There is in my mind, with all due respect to the ruling of the Chair and to the views of the Senator from Georgia and the Senator from New Hampshire, still a question. On Saturday we did, as a matter of fact, adjourn; we adjourned to meet at 10 o'clock to-day; and it therefore became another legislative day.

I agree fully with the suggestion of the Senator from Georgia that the record had better be changed by unanimous consent, in order to conform to well-established legislative practice. If that course is to be pursued, so that the record can be made straight, I shall withdraw my appeal.

Mr. SMOOT. Mr. President, I did not question the ruling of the Chair, but stated that if the ruling of the Chair was correct then the record should be changed; and I am in full accord with the position taken by the Senator from Georgia in asking unanimous consent that the record be changed.

Mr. BACON. I now make that request.

The VICE PRESIDENT. The Senator from Wyoming having withdrawn the appeal from the decision of the Chair, the Senator from Georgia asks unanimous consent that the record of the Senate of Saturday last be amended so as to show that the Senate took a recess until 10 o'clock on Monday. Is there objection? The Chair hears none, and the record will be corrected.

Mr. BACON. As this will be the last opportunity before the expiration of the extra session, I move that the Senate proceed to the consideration of executive business.

Mr. BURTON. I ask for the yeas and nays on that motion.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. JACKSON]. In his absence, I withhold my vote.

Mr. WARREN (when his name was called). I beg to announce my pair with the senior Senator from Florida [Mr. FLETCHER]. He is absent from the Chamber, and I therefore withhold my vote.

The roll call was concluded.

Mr. CHAMBERLAIN (after having voted in the affirmative). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. I transfer that pair to the Senator from Maryland [Mr. SMITH] and will let my vote stand.

Mr. WEEKS. I wish to announce that my colleague [Mr. LODGE] is absent on account of illness. I desire that announcement to stand for the day.

The result was announced—yeas 42, nays 19, as follows:

YEAS—42.

Ashurst	Kenyon	Pittman	Smith, Ga.
Bacon	Fern	Poindexter	Smith, S. C.
Bankhead	Lane	Pomerene	Stone
Bryan	Lewis	Reed	Swanson
Chamberlain	Martin, Va.	Robinson	Thompson
Clapp	Martine, N. J.	Root	Thornton
Clarke, Ark.	Norris	Saulsbury	Vardaman
Cummins	O'Gorman	Shafroth	Walsh
Hollis	Overman	Sheppard	Williams
James	Owen	Shields	
Johnson	Perkins	Smith, Ariz.	

NAYS—19.

Bradley	Clark, Wyo.	McCumber	Sterling
Brady	Colt	Nelson	Sutherland
Bristow	Dillingham	Page	Townsend
Burleigh	Gallinger	Sherman	Weeks
Burton	Goff	Smoot	

NOT VOTING—34.

Borah	Gore	Lodge	Smith, Md.
Brandegee	Gronna	McLean	Smith, Mich.
Catron	Hitchcock	Myers	Stephenson
Chilton	Hughes	Newlands	Thomas
Crawford	Jackson	Oliver	Tillman
Culberson	Jones	Penrose	Warren
du Pont	La Follette	Ransdell	Works
Fall	Lea	Shively	
Fletcher	Lippitt	Simmons	

So the motion was agreed to; and the Senate proceeded to the consideration of executive business. After 15 minutes spent in executive session the doors were reopened.

RECESS.

Mr. KERN. I move that the Senate take a recess until 11.55 o'clock a. m.

The motion was agreed to; and the Senate took a recess until 11.55 o'clock a. m., when it reassembled.

The hour of 12 o'clock having arrived,

The VICE PRESIDENT said: The hour having arrived at which, in accordance with the Constitution of the United States, the Congress of the United States is required to assemble in regular session, the Chair declares the extraordinary session adjourned sine die.

CONFIRMATIONS.

Executive nominations confirmed by the Senate December 1, 1913.

POSTMASTERS.

ILLINOIS.

Andrew J. Eckhoff, Nokomis.
William E. Hess, Wilmette.

The Tariff.

EXTENSION OF REMARKS
OF

HON. PHILIP P. CAMPBELL,
OF KANSAS,

IN THE HOUSE OF REPRESENTATIVES,

Wednesday, April 23, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. CAMPBELL. Mr. Chairman, the disastrous effects of the Underwood bill are already being felt, and what is now happening in a few industries gives ground for fear that the disaster to the employment of our laborers in our industries will be general throughout our whole country, from Porto Rico to the Philippines.

I shall not undertake a general discussion of the bill at this time and merely take time now to call attention to the injurious effect that this law will have upon the greatest industry in Porto Rico, and what is true of Porto Rico is equally true of Hawaii and the Philippines, to say nothing of Louisiana and all the beet sugar growing States.

I have urged that if the tariff changes proposed are to be made as to sugar, that they take effect on the 1st of October, 1913, instead of the indefinite time when the bill may become a law. Merchants throughout my district have written me and sent me resolutions, complaining of the ill effect that the bill will have upon them if its provisions become effective between the 1st of June and the 1st of October.

I have also taken the plea of the Porto Rican cane growers and grinders up, and urged that the provisions of the bill as to sugar go into effect on the 1st of October, but I have been met with the reply that all the provisions of this bill must go into effect, including its provisions with regard to sugar, when it is signed by the President, whenever that may be. This leaves the sugar growers of Porto Rico at the mercy of the sugar refiners, who buy their product.

I am just in receipt of the letter which I will print as part of my remarks.

The letter is as follows:

WAR DEPARTMENT,
BUREAU OF INSULAR AFFAIRS,
Washington, April 19, 1913.

Hon. PHILIP P. CAMPBELL,
Representative in Congress, Washington, D. C.

MY DEAR MR. CAMPBELL: The bureau is in receipt of a request from the San Juan Stock and Produce Exchange, contained in a cable from the acting governor of Porto Rico, that the following message from Mr. Charles A. Hartzell, for many years an attorney at law in San Juan, P. R., be brought to your attention:

"San Juan Stock and Produce Exchange, sugar planters, manufacturers and business interests of Porto Rico fronting critical situation. American sugar buyers demanding guaranty on all purchases of sugar to amount of any reduction in tariff within 30 days after actual delivery. If proposed tariff bill should provide not to take effect for four or six months or fix a definite time much suffering and serious panic might be averted. Charles A. Hartzell."

Very sincerely,

FRANK MCINTYRE,
Brigadier General, United States Army,
Chief of Bureau.

Mr. Chairman, the matter referred to in the cable addressed to me from the acting governor of Porto Rico, through the Bureau of Insular Affairs of the War Department, is more fully explained in the letter which I send to the Clerk's desk and ask to have read:

Hon. P. P. CAMPBELL,
Washington, D. C.

DEAR SIR: I am having a cablegram sent to you to-day, a copy of which I inclose herewith for confirmation, and, as suggested in the cablegram, I am writing you respecting the actual situation of affairs in the island as precipitated by the threatened reduction or abolition of the tariff on sugar.

The sugar growers and manufacturers from different parts of the island have been in session in San Juan, in connection with the San Juan Stock Exchange, for several days in hopes of devising some plan of action which may save them in the present crisis from what seems now almost certain bankruptcy. Of course, everybody believes that the proposed tariff will largely reduce the existing sugar tariff, and the latest information here would seem to indicate that the program of allowing $1 tariff for three years, with free trade after that time, is a likely outcome of the matter.

The immediate difficulty of the situation presented in Porto Rico, however, arises from the fact that, by practically universal custom here, the growers and manufacturers of sugar make their sales to New York buyers, who are in the habit of advancing considerable sums of money to them to be repaid out of the sugars so sold; and at the present time, in the middle of the grinding season, when every grower and manufacturer is using every possible effort and employing every means in his power to complete a crop which up to the present time looks favorable, our people are met with the proposition by the sugar buyers in New York that purchase will only be made upon an absolute condition that all the moneys paid for sugar from Porto Rico will only be upon the absolute condition that such part of the price as may represent any reduction in the existing tariff until a period 30 days after the sugar has been actually delivered, which would mean approximately 60 days from the date of the sale, should be considered as a loan or advance to the Porto Rican sugar man and should be at once repayable to the sugar buyer in New York.

Inasmuch as free sugar would mean a reduction of something over $1.50, and as sugar is selling to-day at about $3.20 per hundredweight, this would mean that they are actually fixing an arbitrary price of $1.90 and are proposing to make the loan to the Porto Rican producer of the balance of the current price.

If this is persisted in, a number of planters and manufacturers will undoubtedly be driven into bankruptcy.

On the other hand, if the matter could be so held in abeyance so that the growers and manufacturers here could be assured that their present crop, which will end about July 1, could be finished and its result marketed prior to the taking effect of the proposed tariff law, it would be a very great assistance to them and to the entire island, and on this line I sent the inclosed cable, hoping either that the bill as prepared and introduced in the House would contain some provision fixing a later date for the taking effect of its provisions, or that something might be done to assist in having a provision of that kind inserted in the bill.

Of course we understand that our little island is not in a position to exhibit any considerable influence in either branch of Congress, and of course we also realize that wool, cotton, and many other producers are as much interested in the tariff proposition as are the sugar men, and that undoubtedly business to be affected by the bill in all directions will undoubtedly try to secure some such provision as that about which I am writing, and it certainly would seem only reasonable to all of the immense interests concerned that the parties whose business is to be affected should have some reasonable time within which to arrange their affairs so as to be able to live through and survive under the changed conditions which the reduced tariff will bring about.

I can assure you that you will have the grateful remembrance and recognition of all business interests in Porto Rico if you can give us any comfort in connection with this situation. The material reduction and final removal of the sugar tariff undoubtedly will mean ruin to many people in this island; but, on the other hand, it is possible that much actual hardship may be averted if the tariff bill as finally passed shall provide for a reasonable opportunity for those affected by its provisions to arrange their affairs in order to meet the changed situation.

* * * * * * * * *

With best regards, very truly,

CHARLES A. HARTZELL.

The only reply to these and similar pleas of those engaged in business under the American flag is that the Democratic Party is committed to the policy of putting all the industries of the country under competition with like industries in foreign countries, and that those engaged in any kind of competitive business must take the consequences.

On another day I shall go more fully into the question involved in the passage of this bill.

When I took this question up with the proper authorities now in control of this legislation, I confidently hoped that something would be done. I regret that there was no foundation for such a hope. The prejudice against protecting the laborers and industries of America from a ruinous competition with the products of other countries is so strong in the Democratic Party that those who are leading that party refuse to heed the pleadings and importunities of the people their policy of competition with the world will injure.

We shall have to wait.

Woman Suffrage.

EXTENSION OF REMARKS
OF
HON. FRANK W. MONDELL,
OF WYOMING.
IN THE HOUSE OF REPRESENTATIVES,

Monday, April 14, 1913.

Mr. MONDELL. Mr. Speaker, taking advantage of the privilege extended me, I present for printing in the RECORD a statement I made, relative to the effect of woman suffrage in Wyoming, before the Committee on Election of President, Vice President, and Representatives in Congress on January 31, 1913:

STATEMENT OF HON. FRANK W. MONDELL, A REPRESENTATIVE IN CONGRESS FROM THE STATE OF WYOMING, ON WOMAN SUFFRAGE.

Mr. Chairman and gentlemen of the committee, perhaps it might not be out of the way for me to preface what I have to say with a little personal statement. It has been my privilege to represent the people of Wyoming—all of the people of Wyoming—for some 16 years. [Applause.] Prior to my election to Congress I was mayor of my town for 4 years, for 4 years a member of the legislature, and president of the State senate. I refer to these matters in order that you may know that I have had some political experience. This experience has all been in the State of Wyoming, and Wyoming, you will remember, gave women the right to vote in the year 1869. [Applause.] For 43 years we have enjoyed that helpful addition to our voting population; and I say "enjoyed" advisedly, because, with a single exception, I do not remember ever having heard anyone in our State suggest that we return to the old conditions under which we were deprived of the helpful political influence of the better half of our population. When we adopted our State constitution in 1890 there was one member of the constitutional convention who was opposed to the woman-suffrage plank. He was a typical old bachelor, and thus belonged to a class the disfranchisement of whom legislatures may very properly consider. [Applause.]

Forty-three years is a long time in the history of a commonwealth, and we should have learned some things in that experience of 43 years relative to the effect of the exercise of the elective franchise by women. Perhaps the most valuable lesson we have learned in that time is that as woman is a conservative force in society so she is a conservative element in politics. That fact has been commented on by two classes of people, those who fear radical influence and action and those who favor it. Women are seldom radical politically and are not inclined to follow novel suggestions of legislation. Going further with the illustration of my friend from Arizona, let us take a family of two girls and two boys. The boys are active, vigorous, venturesome, possibly a little wild. The girls are home loving, conservative, realizing the importance to them of the maintenance of stable and favorable conditions, and of a law-enforcing, effective government. The boys may, temporarily, during the period of their youth, the period of the sowing of their wild oats, be inclined to be extreme and radical. The girls, on the contrary, will incline to conservatism, people sometimes think to overconservatism. I recall that a few years ago in an organization of ladies in opposition to the extension of the franchise to women our State was under discussion, and one of the arguments made against the extension of the franchise to women was that in Wyoming, where woman had voted the longest, we had never adopted, had not even agitated, prohibition, and at that time was the only State in the Union that openly licensed gambling. Well, that sounded like an awful indictment.

As a matter of fact, it was perhaps as good an argument as ever was made for woman suffrage, because it proved this, that the women voters, as well as the men, realized that in that new western country, with its many cosmopolitan communities, made up of people from all over the country, brought together by means of new farming settlements, railway extensions, opening up new mines, it would have been exceedingly difficult to enforce drastic laws against gambling, and practically impossible to have enforced a prohibition law. Our voters, a majority of them at least, believed that under these conditions it was better to effectively regulate than attempt and fail in prohibiting. But since that time, and some years ago, public sentiment having become crystallized as communities became settled, we passed and have effectively enforced an antigambling law [applause], and while we have not agitated prohibition State wide, we have prohibition in a limited way, in that our laws do not allow the sale of intoxicating liquor outside of incorporated towns, and we give the people of the towns full power to decide what they shall do touching the liquor traffic.

In several lines of legislation of vital importance to our people, such as legislation affecting water rights, public accounting, and so forth, our State has been conspicuously in the lead. In the legislation relative to the legal rights of women, for the maintenance and protection of the home and the care and protection of childhood, our Commonwealth has been well in advance. Our eleemosynary and corrective institutions are liberally supported and well managed. Our public-school system is of high grade and our contributions to the cause of education among the very largest per capita of any State in the Union.

The attitude of our people toward these important matters illustrates, I think, the general attitude of communities where all citizens of education, enlightenment, and good character exercise the franchise. In Wyoming our laws do not allow anyone to vote who can not read the constitutions of the United States and the State in English, and our voters must all be fully naturalized citizens of the United States. [Applause.] It will thus be seen that we have not only invited the more intelligent, virtuous, and conservative element of our society to the support of our institutions, but we have endeavored at the same time, so far as it is possible, to limit the exercise of the franchise by the exclusion of those not qualified by education, by residence in our country, and familiarity with our institutions to thoroughly appreciate and intelligently perform the duties of American citizenship.

I am not informed as to whether there is any special time limit to these speeches, but I assume that I am to speak briefly. There are many things which I might tell you that perhaps would be of interest of our long experience with woman suffrage, but I will refer only to a few. Some people claim that the suffrage is not a right, that it is a privilege. We have an idea that it is both a right and a privilege [applause], and the question is not "Do we desire to draft a possibly unwilling electorate or are there some now deprived of the franchise who are entitled to it?" but rather, "Does society need the conservative, helpful, uplifting influence of this new class of voters?" [Applause.] The question is not, "Do women want to vote?" It is not so much, "Are they entitled to the right to vote?" but "Do we need this class of voters for the support of our institutions?" To ask that question of anyone who has lived in Wyoming any considerable length of time is to receive an affirmative answer. [Applause.]

We of Wyoming have not solved all the problems, and none of the Commonwealths of the Union will ever solve all of the problems constantly arising before a free people. It is true, however, that since the adoption of woman suffrage in Wyoming 43 years ago there has never been a defalcation in office in that Commonwealth. [Applause.] There has never been a loss of a single penny, either to the Commonwealth or to any of its subdivisions through the dishonesty of an official. Wyoming is a mountain State, and many of its communities are new, and sometimes a little breezy. Some people who don't know us think that some of our folks are a trifle crude and a little wild, and yet it is a fact that never in the history of the State have we had a serious disorder at a polling place. [Applause.] These polling places have sometimes been in the midst of cow camps, in mining camps, on the frontier, at the end of a line of railroad, where men were gathered that some people might look upon as being rather rough, and yet amid all such surroundings and conditions there has never been a serious election disturbance that I have ever heard of, and I am reasonably familiar with elections in Wyoming. I have had a personal interest in most of them for a long time. More than that, in that 43 years there has never been, to my knowledge, a single case in which the honesty and fairness of an election has been challenged in a contest. [Applause.] Possibly I should qualify that a little, because in connection with the recent senatorial contest in our State there were three election contests.

Those contests, as I understand them, were largely based upon the claim that there were some people who exercised the franchise in certain districts who could not readily read the Constitution or intelligently expound it. But in view of the fact that there is some difference of opinion as to the meaning of constitutions, both State and Federal, even among you gentlemen, I presume it would scarcely be held as conclusive evidence that our elections are not as they should be, because some one has been found who could not expound the Constitution in a manner entirely satisfactory to the parties to an election contest. We have had a few contests based on questions of law, but none that I recall on the ground that there was a willful and intentional violation of the election laws. These things, I think, are strong arguments in favor of the conditions relative to the franchise under which we live.

Some people object to this extension of the franchise on the ground that it is rather a duplication than an addition to the voting strength. The assumption is that women will mostly vote as their fathers, their husbands, or brothers do, and therefore you simply add to the volume of the electorate without materially changing its character. One only has to attend political meetings in Wyoming and know something of our political conditions to learn how far that is from being the truth. It is a fact that people living together harmoniously in the family relation will finally come to agree to a considerable extent on most questions, political and religious, or they will arrive at an amicable disagreement touching those matters. On the question as to whether the men vote as the women vote, or the woman votes as the man does, you can judge as well as anyone, and your judgment will likely depend upon your view as to whether, on the average and in the main, the woman through her information, her lively interest, her realization of the importance of political questions, has the more convincing influence. [Applause.] It is a fact, however, that in our State there are many husbands and wives, many brothers and sisters, who very frequently differ as to candidates and policies. In my 26 years' residence in the State and my participation in 12 elections, 10 of them State wide, I do not recall a single instance of any family jar arising out of differences with regard to matters political. [Applause.]

If there is any one thing in regard to which it is universally agreed and accepted among us that every individual has the right to their own opinion without undue interference on the part of others, it is in the matter of casting the ballot. Sometimes we have interesting experiences. Two years ago, the night before election, I spoke at a meeting in a farming community. Our committeeman in that precinct had recently gone "way back east to Nebraska" and taken unto himself a wife, and the young woman was there—a very handsome, charming young woman. Her husband made me acquainted with her, and I congratulated her on the fact that on the morrow she would for the first time be a full-fledged citizen, with all the rights of franchise. She said that she regretted to inform me that George had told her it would be impossible for him to take her to the polling place, inasmuch as his duties as committeeman required his presence at the polling place very early in the morning, and that he would have to remain there until the votes were counted at night; and as they lived some 10 miles from the polling place it would be impossible for her to leave home at that early hour and remain away all day. I said to her, "This will not do at all. I realize that your husband can not provide you with the means of transportation under the circumstances; but I have a friend living just beyond your place who is going to the polls with his wife and family to-morrow, and I will have him stop for you and take you to the polls and bring you back home." A few minutes later I met the husband and he said, "Say, you may think you are something of a politician; but I want you to understand there are some things about the game you have never learned. I had carefully arranged to keep a straight Democratic vote away from the polls, and you have promised that that vote shall be there. Just jot down in your memorandum book the fact that your majority will be one less than it would have been if you had not gotten into my game." [Applause.]

Do women neglect their family duties, their social duties, and become coarse and masculine through the exercise of the franchise? Of all the lovely women that ever lived on the face of the earth, the loveliest are those that live in the Commonwealth where they and their mothers before them for two generations have enjoyed the elective franchise. It is a distinct advantage to the community, to the women as well as the men, to have the women interested in matters political, and it is hardly necessary for me to say to the members of this committee, with their wide experience as to the slight knowledge that some men have of political matters, to say that they need never fear that the ladies will on the average have less information on political questions than the lords of creation now have. [Applause.] Among certain classes of women the opportunities for becoming informed are better than those afforded their husbands and brothers. Many men do not find time to attend public political meetings, and while I do not think that one can secure the most accurate information touching matters political at all political meetings, still a discerning and discriminating mind may get much information of value and of helpfulness at most political meetings. In my State the ladies attend the political meetings quite as generally as do the men. As a matter of fact, I have held meetings in my State where there was almost as large a percentage of women as we have here to-day—not that the men were not interested in the questions discussed, but because their duties are often such that it is impossible for them to attend.

There are many whose duties take them away from home a great deal, while the women of the household can attend the meetings, and do attend the meetings, and secure whatever information may be secured in that way. While the women of America are quite generally busy people, it is true that men engaged in certain vocations are still busier. Men engaged in heavy manual or brain-taxing mental labor are not in the frame of mind to read at the end of the day's work, and the wife often has more time and more inclination to inform herself than the husband has. Therefore, without desiring to exaggerate, without intending to simply compliment, but stating what I believe to be the truth, I am convinced that the women of our Commonwealth, take them as a whole, are quite as well qualified, so far as information is concerned, as the men to intelligently cast a ballot, and when it comes to other needful qualifications of mind and heart, why, in the presence of this committee, all composed of men, I do not dare to tell the whole truth. [Laughter.] We would as soon think of surrendering our charter of statehood, gentlemen, as to deny the women of our Commonwealth the right to vote. [Applause.]

Let me assure the fearful and trembling brother who is afraid that the exercise of the franchise by women will rob him of his opportunity to hold office and secure those emoluments that go with it, that our experience is that women do not, as a rule, seek office, that they ordinarily must be drafted into service, and, so far as they have accepted offices, they have generally been offices that required the maximum of time and effort and devotion and gave the minimum of return in a pecuniary way. [Applause.] If there be any officeholder trembling for his job, let him be consoled by our experience. It has been argued against woman's suffrage that we have had in all these years but two women in the legislature, one now serving; that county offices have largely been held by men. But that is simply a splendid tribute to the modesty of women, to their deference to what they still, in spite of their enfranchisement, consider the superior administrative talent of men. [Applause.] It will be a long time before women get over that notion which men have been so carefully teaching them through all the generations.

I have just been asked to give my best sentence in closing. Not having prepared for this hearing a formal argument, I fear I have no "best sentences" at my command. I have given you a very few of the many reasons which our experience has demonstrated for granting the franchise to the most intelligent and virtuous half of mankind. Our experience is all favorable. The so-called arguments against it have been overwhelmingly discredited by that experience, and it is the sentiment of all our people that any community that aspires to better conditions, that any community that desires to have in its governmental affairs the helpful, uplifting, and potent influence of its best citizenship, should extend the franchise to women. [Applause.]

The Natural Condition of Lake Tahoe.

EXTENSION OF REMARKS
OF
HON. JOHN E. RAKER,
OF CALIFORNIA,
IN THE HOUSE OF REPRESENTATIVES,

Thursday, April 24, 1913.

Mr. RAKER. Mr. Speaker, I present to the House the following resolutions passed by the Legislature of the State of California:

Senate joint resolution 24, relating to the preservation of the natural condition of Lake Tahoe and of establishing by judicial decree the conflicting claims to the use of the flood waters thereof, as follows:

SACRAMENTO, CAL., *April 23, 1913.*

JOHN E. RAKER,
Congressman, Washington, D. C.

DEAR SIR: Pursuant to the provisions of a senate joint resolution adopted by both houses of the Legislature of the State of California, I herewith transmit you a copy thereof.

Senate joint resolution 24, relating to the preservation of the natural conditions of Lake Tahoe and of establishing by judicial decree the conflicting claims to the use of the flood waters thereof.

Whereas Lake Tahoe, on account of its great natural beauty, is regarded as a valuable asset to the State of California by the citizens thereof, and many of such citizens have acquired vested interests on the shores of such lake; and

Whereas the State claims title to the major portion of the flood waters of such lake, which waters it hopes and expects in the near future to utilize for the purpose of generating power and of irrigating lands within its borders and for the domestic use of its citizens; and

Whereas it has become the declared intention of the Reclamation Service of the United States to convert the lake into a reservoir for an irrigation system in the State of Nevada, and to the end to artificially lower the natural rim of the lake and to widen the outlet channel of the same, thereby making it possible to draw from such lake more water than can be supplied by its average natural rise of 2½ feet per annum; and

Whereas the plans of the Reclamation Service, if carried into effect, will infringe upon the vested legal rights of the State of California and its citizens, to their irreparable damage: Now, therefore, be it

Resolved by the senate and assembly jointly, That the Legislature of the State of California does hereby protest against any interference on the part of the Federal Government or its agents with the natural conditions of Lake Tahoe; and be it further

Resolved, That the President of the United States be, and he is hereby, respectfully requested to cause legal proceedings to be in order to determine the respective rights of all persons claiming title to the flood waters of Lake Tahoe, and particularly to determine the rights of the United States of America, the State of Nevada, the State of California, and the Truckee General Electric Co.; and be it further

Resolved, That the attorney general of the State of California be, and he is hereby, respectfully requested to institute and prosecute as speedily as possible any action in the Supreme Court of the United States on behalf of the State of California and against the State of Nevada and such other claimants to the use of the waters of Lake Tahoe as may be properly joined as parties in order to determine the respective rights of such parties to the use of such waters; and be it further

Resolved, That a copy of these resolutions be forwarded to the President of the United States, to the Secretary of the Interior of the United States, to the United States Reclamation Service, and to each Member of the House of Representatives and to the United States Senate.

Respectfully, yours,

W. N. PARRISH,
Secretary of the Senate.

Senate joint resolution No. 1, relating to continuation by the United States of surveys for the construction of storage reservoirs for the impounding of flood waters in the Sierra Nevada Mountains in the State of California, and asking that an appropriation be had for forwarding the work as speedily as possible, which is as follows:

SACRAMENTO, CAL., *April 23, 1913.*

JOHN E. RAKER,
Congressman, Washington, D. C.

DEAR SIR: Pursuant to the provisions of a Senate joint resolution adopted by both houses of the Legislature of the State of California, I herewith transmit you a copy thereof.

Senate joint resolution 1, relative to the continuation by the United States of surveys for the construction of storage reservoirs for the impounding of flood waters in the Sierra Nevada Mountains, in the State of California, and asking that an appropriation be made for forwarding the work as speedily as possible.

Whereas the United States Government has for several years past been securing data through the Geological Survey and the Reclamation Service concerning the watersheds of the west slope of the Sierra Nevada Mountains and the construction of storage reservoirs for the conservation of flood waters in the winter and spring; and

Whereas the Sacramento and San Joaquin Valleys, of which these watersheds form a part, constitute a large body of the most fertile land to be found in any country, rivaling the far-famed Valley of the Nile in productiveness, and capable of supporting a population of several millions when properly reclaimed and settled; and

Whereas in time of heavy snowfall and rainfall the volume of water coming down the valleys is a continual menace to the rich lands adjacent to the Sacramento and San Joaquin Rivers, thousands of acres of which are flooded in years of heavy rainfall; and

Whereas in the report of the Reclamation Service for the year 1907 the statement is made that if storage reservoirs were constructed at the sites surveyed it would greatly simplify the drainage problems of the Sacramento and San Joaquin Rivers and the lower Sacramento Valley by reducing the flood flow into the rivers; and

Whereas the flood water so impounded would be of the greatest value to the Sacramento and San Joaquin Valleys and the State of California by being used for irrigation instead of being allowed to flow to the ocean, often doing incalculable damage to the valleys, 800,000 acres of the lowlands of which having been flooded in 1904; Therefore be it

Resolved by the senate and assembly jointly, That the Legislature of the State of California memoralize the Congress of the United States for the continuation of said work of surveying and constructing such storage reservoirs in the watersheds of the western slope of said Sierra Nevada Mountains on the tributaries of the Feather, Yuba, and American Rivers, and other tributaries of the Sacramento and San Joaquin Rivers, carry out all measures necessary for such work, and making an appropriation of sufficient size to forward it as the more speedily solved; and be it further

Resolved, That the Secretary of the Interior be requested to take the necessary measures for hastening the survey and construction of such reservoirs, in order to impound such flood waters and enable the problem of improvement and restraint of the Sacramento and San Joaquin Rivers to be more speedily solved; and be it further

Resolved, That our Senators in Congress be instructed and our Representatives be requested to use all honorable means to secure the action desired in this matter for the purpose aforesaid; and be it further

Resolved, That a copy of these resolutions be forwarded to the President of the United States, the Secretary of the Interior, the Secretary of Agriculture, the respective Houses of Congress, and to each of our Senators and Representatives in Congress, including those to assume office on March 4, 1913.

Respectfully, yours,

W. N. PARRISH,
Secretary of the Senate.

Senate joint resolution No. 12, relative to action by Congress directing an investigation through the Department of Agriculture of measures for protection of fruit from frost damage, as follows:

SACRAMENTO, CAL., *April 23, 1913.*

Hon. JOHN E. RAKER,
Congressman, Washington, D. C.

DEAR SIR: Pursuant to the provisions of a senate joint resolution adopted by both houses of the Legislature of the State of California, I herewith transmit to you a copy thereof.

Senate joint resolution 12, relative to action by Congress in directing an investigation through the Department of Agriculture of measures for protection of fruit from frost damage.

Whereas the great citrus belt of California has been visited by an unprecedented damaging frost, involving a loss of many millions of dollars in the crop alone as well as great damage to trees; and

Whereas great advancement has been made by public and private experimentation in the protection of orchards all over the United States from the damaging effect of cold waves by means of heating pots and other means of raising temperature, the use of which has given perfect protection in some groves and has been of little benefit in others. The effect of frost damage on many fruits, particularly the citrus, is but little known, and it is believed that large sums may be saved on this and other horticultural branches by a more thorough knowledge of the prevention of frost damage and the best means of determining to what extent citrus or other fruits have been rendered unfit for marketing. Large losses have been sustained, which might have been prevented were proper methods known; and

Whereas the interest of the whole country demand a thorough investigation of this question by the Department of Agriculture through the most competent experts obtainable. Such work adequately supported and ably conducted will save many millions of dollars' losses to the Nation: Now, therefore, be it

Resolved, That this being a Nation-wide problem, we appeal to Congress to authorize and empower the Department of Agriculture to at once take up this question and employ the ablest and most competent men to be had for carrying on this work until a thorough knowledge shall be had of this question in its bearing on all branches of horticulture; and be it

Resolved, That upon the passage of the resolution the secretary of state be, and he is hereby, directed to forward a copy thereof to the Senators and Representatives of the State of California in Congress, and that a copy of the resolution be also transmitted to the governors of each fruit-growing State in the Union, requesting them to urge legislatures now in session to consider and take action in accordance with this resolution

Respectfully, yours,

W. N. PARRISH,
Secretary of the Senate.

Senate joint resolution No. 26, relating to making investigations and experiments as to the nature and cure of tuberculosis, which is as follows:

SACRAMENTO, CAL., *April 23, 1913.*

Hon. JOHN E. RAKER,
Congressman, Washington, D. C.

DEAR SIR: Pursuant to the provisions of the Senate joint resolution adopted by both Houses of the Legislature of the State of California, I herewith transmit to you a copy thereof:

Senate joint resolution 26, relative to making investigations and experiments as to nature and cure of tuberculosis.

Whereas it appears that the loss of life and the suffering occasioned by the ravages of tuberculosis in its various forms in the United States are of such magnitude as to make the discovery of adequate means of eradicating that disease a matter of national concern.

Whereas the conditions, facilities, opportunities, and inducements should be afforded capable investigators with a view to discovering some practicable means for its control and cure: Therefore be it

Resolved by the Senate of California and the Assembly jointly, That we respectfully urge on the Congress of the United States the immediate enactment of such laws, and an appropriation from the Treasury of the United States of such sums as may seem advisable to Congress to afford properly trained experts adequate means and opportunities to make the most exhaustive investigations and experiments as to the nature and cure of tuberculosis, and as to alleged cures therefor: and that we further urge upon the Congress of the United States an appropriation of an adequate sum to be given as a reward to the discoverer or discoverers of an effective means of curing tuberculosis, on satisfactory proof of the effectiveness of such discovery and on a full and complete revelation of the effective means thus employed, so that the fullest publicity may be given thereto for the general benefit of the medical profession: Be it further

Resolved, That each Senator and each Representative in Congress from the State of California be, and he is hereby, requested to use all honorable means to secure the enactment of such legislation: And be it further

Resolved, That a copy of this resolution be herewith transmitted by the chief clerk of the senate to the President of the Senate of the United States and to the Speaker of the House of Representatives of the United States, and a copy thereof to each Member of the Congress from the State of California.

Respectfully, yours,

W. N. PARRISH,
Secretary of the Senate.

Senate joint resolution No. 25, relating to the citrus-fruit industry of California, which resolution is as follows:

SACRAMENTO, CAL., *April 23, 1913.*

Hon. JOHN E. RAKER,
United States Congressman, Washington, D. C.

DEAR SIR: Pursuant to the provisions of the senate joint resolution adopted by both Houses of the Legislature of the State of California, I herewith transmit to you copy thereof.

Senate joint resolution 25, relative to memorializing Congress, regarding the citrus-fruit industry of the State of California, and requesting our Senators and Representatives in Congress to use all honorable means to prevent a reduction in duties on citrus fruits below the difference where the difference in the cost of production of the same would be equalized.

Whereas the citrus-fruit industry is one of the great and important enterprises of this State, representing an investment of $200,000,000, and materially contributes to the upbuilding thereof; and

Whereas the rates of duty on citrus fruits should equalize the difference in cost of production between the United States and foreign countries; and

Whereas the present rates of duty bring to the Government a substantial revenue that has increased in recent years; and

Whereas a material reduction of the duties on citrus fruits would hamper and retard the growth and development of the State of California: Now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That we respectfully memorialize the Congress of the United States not to reduce the duties on citrus fruits below a point equalizing the difference in the cost of production of the same in the United States and foreign countries, and we earnestly request our Senators and Representatives in Congress to use every honorable means to prevent such reduction; be it further

Resolved, That the governor of the State of California be requested to appoint five citizens of California to present this memorial to Congress in behalf of this State; and be it further

Resolved, That a copy of this resolution be telegraphed to the President and to each of our Senators and Representatives in the Congress of the United States.

Respectfully, yours,

W. N. PARRISH,
Secretary of the Senate.

Assembly joint resolution 18, relating to the protection of the California beet-sugar industry in the enactment by Congress of laws affecting the tariff on imports to the United States, which is as follows:

SACRAMENTO, CAL., *April 22, 1913.*

Hon. JOHN E. RAKER,
House of Representatives, Washington, D. C.:

I have the honor to hand you herewith copy of assembly joint resolution 18, adopted by senate and assembly and approved by the governor April 18, 1913.

Assembly joint resolution 18, relative to the protection of the California beet-sugar industry in the enactment by Congress of laws affecting tariffs on imports into the United States.

Whereas in the process of tariff revision by Congress the indicated tendency is toward an abolition of all duties on imported sugar; and

Whereas such a policy would be calamitous to the cane and beet sugar industry of the Nation at large, and especially to the beet-sugar business of the State of California, which produces 165,000 tons per annum, or one-quarter of the beet-sugar output of the United States; and

Whereas the annual consumption of sugar in our country is now 3,500,000 tons per annum supplied, viz, from domestic cane grown in Porto Rico, Louisiana, and Sandwich Islands, 1,100,000 tons; from beet sugar manufactured in 16 States, 650,000 tons; 1,750,000 tons—the balance—being purchased from foreign countries and refined by a few corporations on the Atlantic seaboard who are clamoring for "free sugar" in order that they may further check the invasion of their markets by the constantly growing beet-sugar industry; and

Whereas our Nation's beet-sugar output has increased from 40,000 tons, 1897, to 650,000 tons in 1912—a rate of increase greater than can be shown in any country in Europe during an equal period of time; while our cane-producing districts have apparently reached the limit of their productivity; and

Whereas this country should and can become self-supplying in the matter of sugar through the development of the beet-sugar industry, now involving the use of only 45,000 acres of land against 274,000,000 acres adapted to the cultivation of the sugar beet; and

Whereas the development of the industry is checked by the menace of a free-sugar bill, which will subject this product to competition with cane and beet sugar produced under the low wage conditions in the Tropics and Europe, and at prices delivered at our seaboards lower than under our conditions is paid to the farmers of our State for the sugar in the beet before it is manufactured: Now, therefore

Resolved, That the Legislature of the State of California, a majority of all members elected to senate and assembly voting for the adoption of this resolution, and concurring therein, requests the Senate and House of Representatives of Congress at Washington and the President of the United States that due regard be had in the consideration of tariff revision for the claims of the beet-sugar industry, which is so full of promise to our Nation. And that the principle governing the revision of the tariff in this regard be, that the tariff should equalize the difference between the cost of production of sugar at home and abroad.

Resolved, That a copy of these resolutions be forwarded to each Member of Congress from the State of California, to be presented to the President and Congress.

L. B. MALLORY,
Chief Clerk of the Assembly.

The Tariff.

EXTENSION OF REMARKS
OF
HON. L. C. DYER,
OF MISSOURI,
IN THE HOUSE OF REPRESENTATIVES,
Friday, April 25, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. DYER. Mr. Speaker, under leave to extend my remarks on the tariff bill I beg to call attention to some protests that I have received from constituents of mine in regard to the passage of this bill. The first is a letter, in part, from the Corona Mills, of St. Louis, a branch of the National Oats Co., as follows:

The new tariff schedule provides for an import duty of 10 cents per bushel on raw oats.

It also provides for the importing of manufactured oat products—rolled oats, oatmeal, and oat feed—free.

This is probably the first time in the history of tariff laws that any nation has proposed to pay foreign manufacturers a bonus on their manufactured wares. In plain English that is what our present Congress proposes to do.

The American manufacturer of oat products will have to compete with the Canadian manufacturer, but is denied the privilege of securing his supply at the same price as the Canadian manufacturer.

Bear in mind that the independent rolled oats manufacturers of the United States who have no mills in Canada are not asking for a protective tariff on the manufactured products of oats; we simply ask for an equalization. Either no tariff on the raw material to equalize it with the manufactured product and enable us to buy on the same basis as the Canadian manufacturer, or place a tariff on the manufactured product equal to the proposed tariff of 10 cents per bushel on the raw material, which we figure would be 55 cents per barrel on rolled oats and oatmeal and 15 cents per hundredweight on oat feed.

Under the proposed tariff law the Rolled Oats Trust of the United States would be able to absolutely throttle most of the home independent competition. The trust already has one mill in Canada and is building a second one. You will see from this that the new tariff schedule will fit in very nicely with their plans.

Government statistics of Canada and the United States now before the writer indicate an average difference in price for raw oats between the principal Canadian markets and our Chicago market of 7 cents per bushel in favor of Canada for the past five years. The freight from the principal Canadian ports, upon which oat prices are based, to the city of Chicago is 8 cents per bushel. This would make the actual difference in favor of Canada 4 cents per bushel. Add to this an import duty of 10 cents and you have a grand total of 14 cents, which means that the Canadian rolled-oats miller will buy his raw material at 14 cents per bushel less than the American manufacturer, which is approximately $1.50 per barrel on the manufactured product, or about five times the average profit of the American manufacturer.

You can see from this the demoralization that will result. It might be argued by demagogues, who seek to reduce the cost of living, that this is well for the country at large, but bear in mind that the American farmer's grain will have to compete with the Canadian farmer's grain, and that the American farmer, like the American manufacturer, will be handicapped 14 cents per bushel on oats.

To make this clearer, the Canadian rolled-oats manufacturer buying his raw material at 14 cents less than the American manufacturer will ship his manufactured product into the United States, and in order to compete, the American manufacturer being unable to import the raw material from Canada on account of the protective tariff of 10 cents per bushel, will be compelled to buy from the American farmer at a price upon which he can compete, which will mean that the American farmer will have to sell his oats at a price 10 cents per bushel lower than the price of oats in Canada to make up the difference in price caused by the tariff.

It is therefore not only to the interests of us as manufacturers, but also to the interests of the farmer and the public generally to demand from Congress that the manufactured products of oats be placed on an exact parity with the raw material.

Editorial from St. Louis Times, an independent newspaper in politics, of date April 17, 1913, on same subject as above:

AN EXTRAORDINARY PROCESS.

In addition to the remonstrances against "tariff tinkering" which are coming from communities which are specially interested in one class of industries or another, there is apparent room for every unbiased individual to protest against certain illogical steps which are proposed by the lawmakers now in session in Washington.

For example, we find that it is the intention to charge an import duty of 10 cents a bushel on raw oats, while manufactured oats—oatmeal, rolled oats, etc.—are to be admitted free.

The idea is almost bewildering. It means, in plain terms, that the American manufacturer is to be discriminated against in favor of the manufacturer outside the borders of the United States.

For example, the home manufacturer dealing with manufactured oat products will have to pay a duty on oats, if he finds that he must import them, and then he must sell his product in competition with outsiders who have brought their wares into the country free of charge.

It has been the cry for a very long time that the tariff laws discriminated in favor of American manufacturers. Perhaps they did in some instances, but it can scarcely be the intention of the new administration to change this process to the end that the home manufacturers shall actually be discriminated against.

Also editorial from the St. Louis Republic, a Democratic newspaper, of date April 18, 1913:

OATS, ROLLED AND UNROLLED.

The Underwood bill as submitted contains one inconsistency which should be removed from it before it goes over to the Senate; that is the provision for free manufactured oats, while raw oats carry a duty of 10 cents a bushel.

Rolled-oats manufacturers are not asking for protection. Our manufacturers stand ready to compete with the cereal products of the world, from Canada to Cathay. But so long as the consumer is permitted to buy without restriction in any market the manufacturer is asking, with entire justice, that the same privilege be accorded him in his purchase of raw material.

The passing of the law in its present form would have a peculiar effect on the interrelations of American manufacturers. There are in the business a large combination having many mills and a number of "independents." The combination has a Canadian mill in a district where the prices on oats rule lower than in this country in most seasons. The owners of this mill would ship its product to this country duty free in seasons when the American crop is short, while their competitors, buying oats in the Canadian market, would pay 10 cents a bushel. The inequitability of this lies on the surface.

This is no veiled plea for protection. Let us have oats as well as rolled oats on the free list in the Underwood bill.

Also following telegrams and letters:

ST. LOUIS, MO., *April 19, 1913.*

Hon. L. C. DYER,
Congressman, Washington, D. C.:

Letter received. Free shoes in new tariff bill serious mistake. Large delegation from shoe manufacturers of Missouri and from all parts of country will visit Washington. Would Wednesday, 23d, be best date to meet there or later? Wire collect to-day.

GEO. WARREN BROWN.

ST. LOUIS, MO., *April 16, 1913.*

Hon. L. C. DYER, *Washington, D. C.*

HONORABLE SIR: We respectfully address you on the subject of the inequality of the tariff schedule on oats and manufactured products thereof, and request your careful consideration of the subject as it pertains to raw oats and its manufactured products.

We ask that this subject be placed on a parity.

The large industries located in the territory represented by your good self will be seriously affected by any decision derogatory to a protection consistent with the natural conditions as they pertain to raw material and finished product.

Your favorable consideration in protection thereto will be appreciated.

Respectfully submitted,

AMERICAN PAPER PRODUCTS CO.,
L. P. REXFORD, *President.*

ST. LOUIS, MO., *April 16, 1913.*

Hon. L. C. DYER, *Washington, D. C.:*

We wish to register our protest against the new tariff schedule in relation to raw and manufactured oats. If the act is passed a staggering blow will have been dealt the Missouri farmer and the Missouri manufacturers of rolled oats, one of her largest and proudest industries. The situation appears to be desperate, and we respectfully solicit your friendly consideration and help in behalf of all good and loyal Missourians and in behalf of America for Americans.

COMPTON & SON LITHO. & PRINTING CO.

ST. LOUIS, MO., *April 11, 1913.*

Hon. L. C. DYER,
House of Representatives, Washington, D. C.:

Proposed tariff, page 72, lines 20 and 21; page 73, lines 3, 4, and 5, on present market will increase cost of burlap bran bags to millers and wheat sacks for farmers at least $1.50 per thousand over present tariff. We urge your consideration and vote, making new duty on bags 25 per cent and on jute cloth used in bags 50 per cent.

FULTON BAG & COTTON MILLS.

ST. LOUIS, MO., *April 11, 1913.*

Hon. L. C. DYER,
House of Representatives, Washington, D. C.:

Referring to H. R. bill 10, page 72, lines 20 and 21, and page 73, lines 3, 4, and 5, plain woven fabrics of single jute yarns and bags or sacks made therefrom are both made dutiable at 25 per cent ad valorem. This proposed change increases cost to consumers, but would result in turning the manufacture of bags from this country to foreign interests. We respectfully urge, therefore, on behalf of ourselves and our wage earners that you, as our Representative, use your efforts to reduce plain woven jute fabrics to 15 per cent ad valorem, retaining the proposed duty of 25 per cent on bags or sacks.

H. & I. CHASE BAG CO.

ST. LOUIS, MO., *April 11, 1913.*

Hon. L. C. DYER,
House of Representatives, Washington, D. C.:

Referring to our letter of yesterday, we respectfully request and urge you to give careful consideration to the letter and the briefs mailed, and as our Representative we solicit and ask your aid to the end that if burlap bags are left at 25 per cent ad valorem burlap cloth be reduced to 15 per cent ad valorem. Some such differential is absolutely necessary to retain the manufacture of burlap bags in this country.

BEMIS BRO. BAG CO.,
J. S. BEMIS.

KANSAS CITY, MO., *April 11, 1913.*

Hon. L. C. DYER,
House of Representatives, Washington, D. C.:

Referring H. R. bill 10, page 72, lines 20 and 21, and page 73, lines 3, 4, and 5, plain-woven fabric of single jute yarn and bags or sacks made therefrom are both dutiable at 25 per cent ad valorem. This proposed change will benefit foreign manufacturers and increase cost of bags to consumers in this country. For this reason we respectfully urge in behalf of ourselves and our employees that you, as our Representative, use every effort to reduce plain woven jute fabric to 15 per cent ad valorem and retain the proposed duty of 25 per cent on bags or sacks.

KANSAS CITY BAG MANUFACTURING CO.

ST. LOUIS, MO., *April 14, 1913.*

Hon. L. C. DYER,
House of Representatives, Washington, D. C.

DEAR SIR: Your telegram of the 12th was received by us Saturday afternoon, reading as follows:

"Night lettergram relative proposed tariff changes on burlap bags and burlap cloth received. Will do all I can to carry out your suggestion."

We wish to thank you for the attention you have given the matter about which we wrote and telegraphed you.

During the course of the hearings before the Ways and Means Committee last winter, when the president of our company was in Washington, Chairman UNDERWOOD made essentially the following statements on one or more different occasions:

No legitimate American industry will be injured by tariff rates to be proposed by the committee.

The policy of competitive rates establishing a proper difference between raw material and finished product will be recognized.

Remembering these voluntary statements of Chairman UNDERWOOD, our conclusion, after reading the proposed rates in the new tariff bill, was that some sort of an error had been made. We could arrive at no other conclusion, hence our letter and telegram to you.

Yours, truly,

BEMIS BRO. BAG CO.,
J. S. BEMIS.

ST. LOUIS, MO., *April 15, 1913.*

Hon. L. C. DYER,
Member of Congress, Washington, D. C.

DEAR SIR: We beg leave to bespeak your consideration for the sugar industry of the United States which is now threatened with destruction through hostile legislation, and to lay before you the following facts:

First. That every civilized country in the world is trying through tariffs, bounties, and otherwise to raise enough sugar for their own consumption.

Second. That sugar is cheaper to the consumer in the United States than any European country with the exception of England.

Third. That were the United States to be at war with any powerful maritime nation such as England, Germany, France, or Italy her supply of sugar from the outside world would be cut off.

Fourth. That the sugar industry in the United States supports hundreds of thousands of people who, if the sugar industry were destroyed, would have to seek other means of employment, and distributes millions of dollars in this country which would go to foreign countries did the United States not make any sugar at all.

Almost every wholesale merchant of this city is doing a large business in the State of Louisiana, and if the sugar industry is destroyed we will all suffer from the effects. We therefore beg of you, if consistent with your views, to cast your vote, and get your friends to vote, for the present tariff on sugar.

Most respectfully,

L. & A. SCHARFF DISTILLING CO.,
A. SCHARFF, *Secretary.*

ST. LOUIS, MO., *April 12, 1913.*

Hon. L. C. DYER, *Washington, D. C.:*

We urgently ask you to do everything in your power to prevent proposed sugar tariff. In our opinion it means for national ruin to a large number of sugar planters and beet-sugar manufacturers.

PROVIDENT CHEMICAL WORKS.

ST. LOUIS, *April 16, 1913.*

Hon. L. C. DYER,
Member of Congress, Washington, D. C.

DEAR SIR: We have before us paragraph No. 337 of the proposed Underwood tariff bill. Comparing this with the tariff act of 1909, we note the changes are radical. In fact, the cut in the tariff is so deep that we feel it will affect not only the lithographing but also the printing industries of the United States.

To show what the proposed reduction in tariff will do to our business, we are advising that the last year our sales amounted to $75,000. The net profit on this was $3,600. The percentage of our net profit to our sales was 4.8 per cent. We believe this to be a very low profit, and we think you will agree with us.

There is real competition in our industry. There never has been, is not now, and in all probability never will be a lithographic trust.

The last census report placed our industry sixth in the list of industries. To be sixth in the list of industries means there are many thousands of workmen gaining a good livelihood from our industry. If the proposed cuts in the tariff are made, it will, in our opinion, mean that this country will be flooded with the lithographic products from the oriental as well as the European countries. The oriental countries will probably predominate. The reason for this assertion is that the average workman in Japan thinks he is getting a high wage if he receives 50 to 75 cents in our money per day.

To meet this competition we will be compelled to not only reduce wages but increase the number of working hours each day.

We have tried to explain in our humble way just what any cut on any lithographic products in the tariff act of 1909 would do to our industry, and trust you will give this letter your serious consideration.

Yours, very truly,

ISLER-TOMPSETT LITHO. CO.

ST. LOUIS, *April 19, 1913.*

Hon. L. C. DYER,
House of Representatives, Washington, D. C.

DEAR MR. DYER: Kindly accept my sincerest thanks for the "H. R. 10, a bill," and your promise of assistance.

What we feared has happened. The recommendations of the Ways and Means Committee are such that our industry will be ruined if they should become a law. Upon advice of our national association I have sent a telegram and a letter to the Hon. F. M. SIMMONS, chairman of the Finance Committee of the United States Senate, copy of which I inclose. This letter contains all my principal arguments, and I wish you to take notice of them.

As stated in my letter to Mr. SIMMONS, on page 3, the line marked "X." I have submitted a number of photographs to Mr. SIMMONS to prove the quality of the American product, and I would ask you to go there to inspect them.

Thanking you once more for your valuable assistance, I am,

Very respectfully, yours,

EMIL FREI ART GLASS CO.
EMIL FREI, *President.*

ST. LOUIS, *April 19, 1913.*

Hon. F. M. SIMMONS,
Chairman Finance Committee, United States Senate, Washington, D. C.

DEAR SIR: We confirm telegram which we have sent to you on April 16, as follows:

"Kindly postpone consideration of sections 99 and 659 of tariff draft relating to stained-glass windows until certain facts can be presented thereon. Tariff draft now before me. Section 99 would do great harm to American stained-glass industry. Proposed section 659, same as 716 of present law, except that the present law, section 716, has line 12 to read 'excepting' instead of 'including,' as in the proposed law. Clause in section 659, lines 12 and 13, beginning with the word 'including,' contradict section 99 and would entirely destroy our extensive American business and force us to quit the country. We would be compelled to locate in a foreign country, manufacturing our goods there on the foreign wage standard, and then ship the finished products to this country as exports."

In further explanation of the points briefly referred to in the telegram, we submit the following for the consideration of the committee.

Section 99 of the proposed tariff bill proposes a reduction of 15 per cent from the present tariff by fixing the tariff duty at 30 per cent ad valorem on stained glass windows. The proposed duty does not balance

the difference in cost of production between the exporting country and this, the importing country, as a comparison of the wages paid here and abroad will show. This wage scale is entered in the tariff hearings of 1908–9, Schedule B, page 1231.

According to section 659 of the proposed tariff bill stained-glass windows are to be on the free list if imported for presentation to a national institution, etc. It will be well to bear in mind that all stained-glass windows are practically donations to the churches.

Those who are familiar with the conditions know that the windows are offered for donations. Thus, each window is practically a donation. There are, of course, some exceptions at the present time. But under the proposed law it will happen that great care will be taken that each stained-glass window shall be surely a donation. The proposed section 659 will bring about this situation by offering the reward for it as set down in the bill.

A comparison of the two proposed sections further discloses this situation: it is assumed that the intention of the bill is to reduce the tariff to the lowest possible rate. In section 99, 30 per cent protection is proposed to be given. Surely the reason must have been because it was thought best that at least that much protection was necessary to enable the American producer to compete with the foreign producers in that field. Why, then, are our productions to be put on the free list, which is practically done in section 659? The proposed section 659 leaves it unclear whether it is proposed that the American artists who find it more profitable to reside abroad shall have their products "imported free." The section speaks first of "works of art," then of "productions" of American artists, and then of "or other works of art." Whether the second and third phrases have any meaning special and apart from the first phrase, "works of art," is not clear to us. But in this matter we are not so greatly concerned, except it be intended that those engaged in the stained-glass industry may leave the country, if they find it more profitable to do so, and may then have their "productions" sent to this country and imported free. It would, of course, be a most singular position to take. But we should like very much to be informed upon the matter.

If the drafters of the bill have concluded that we, as a Nation, shall never attempt to cultivate the stained-glass art itself in its highest form inside of our boundaries, why should we have any protection? Certainly the matters proposed to be imported free are in that very division which involves the highest art. If, then, no encouragement is to be given to the highest art, it would seem really to be more consistent to strike out section 99 altogether. This situation will then at least be thoroughly understood by our young people, studying in our art schools in this branch of the art, not to educate themselves for the profession in this country; but if they hope ever to follow it rather to seek at once the foreign field. My son and his best friend are studying in the art department of the Washington University at the present time to engage in the stained-glass art industry. The pioneer work has been done, and our country is now in a position where it can do something more than be merely admirers of the product of this beautiful art imported from foreign countries. Our country can itself produce the art.

A chief argument of some of the importers is that good stained-glass windows, as required for our better churches, can not be made in this country, and therefore they shall be admitted free. In the first place, the fact is not correctly stated, and, in the second place, were it correctly stated, it would be high time to encourage rather than to discourage the production of this art in our own country. In the last eight or nine years many fine Catholic churches have been built in the St. Louis district, and they and other buildings have been equipped with fine stained-glass windows, and none of them were imported. We have furnished them all. Many of the rectors are highly educated clergymen, with quite a knowledge of art, and they would not continually recur to us if our work would be of the quality of the imported product, which they could have bought for about the same price. At the present time we are equipping the newly rebuilt cathedral of Belleville, Ill., with stained-glass windows. They could have had the stained-glass windows from foreign houses at our price. That is the situation now under the present tariff. This is a very significant fact in connection with the question of competition. Lower the tariff upon these goods, and you can readily see the reduction in the price of the foreign goods, and you can readily see what this would mean to us. Unless we are equipped to give the same work and quality we would not be requested to furnish the work when the prices are the same. On the question of fact innumerable testimonials can be presented to the committee, testifying that our work is equal to the imported windows. A few photographs of windows which we have lately executed are submitted herewith, representing our regular product, and we invite and urge men of artistic training to compare these with work from foreign countries.

The significant difference between section 659 and the former corresponding section 712 is that in line 12 of the proposed section 659 the words "including stained or painted window glass," etc., are used instead of the phrase in section 712 of the present law, "excluding stained or painted window glass," etc.

Adding to the European selling price of the foreign-produced article the 45 per cent import duty of the present law and all other expenses for importation, the foreign article can be sold in America for about 65 per cent higher than in the place of manufacture. But you must not forget to compare the money values here and in Europe. When you compare the purchasing power of the money, the European stained-glass window is bought cheaper here upon that basis than it is bought on the other side. Are any objections heard that the brickwork, plastering, etc., for buildings in this country are of a much higher price than they are in Europe, because the brickwork, plastering, etc., can not be imported?

We must again refer to the fact that these windows are donations. The churches do not pay for them. It is the donator that pays, and generally he is a more or less wealthy person, who is earning American money values, and therefore it is not unfair, that he who does the paying pays the American price just the same as if he would make a donation to the building itself and got for the donation so much brickwork or plastering work done, according to the American wage standard. It seems to us that this is a very clear presentation of the matter.

The question with us is "to be or not to be," and we trust on careful consideration of the foregoing the committee will decide for such a policy as will enable us "to be." We would not like to be driven out of our own country. But if compelled, there is no other recourse for us than either to wait, temporarily hoping that a different policy will prevail (being perhaps a practically dead establishment in the meantime), or to transfer our seat of operation to a foreign country, paying the wages on the foreign standard, and send our products to America under the same favorable consideration as foreign producers receive.

In fine, we trust that the committee will, on careful consideration, protect us from such a disastrous situation.

Very respectfully,

EMIL FREI ART GLASS CO.,

I trust you will be able to defeat paragraph B, section 2, proposed income tax law, taxing as income the proceeds of life insurance policies upon death of the insured. An unfair and uncalled for tax on widows and orphans.

S. E. HAYWARD.

ST. LOUIS.

Hon. L. C. DYER,
Member of Congress, Washington, D. C.

DEAR SIR: I wish to call your attention to the indefinite wording of two sections of the tariff bill known as House bill No. 10.

Section B is so worded that it may be so interpreted as to place a 1 per cent tax upon the proceeds of life insurance policies when paid to the beneficiary. If a widow is paid $5,000 under a policy of life insurance, a tax of 1 per cent, or $50, might be imposed.

Paragraph G of this bill, which attempts to define what items are subject to this tax, is so blindly worded that in the items of income it might be possible to include the net addition made during the year to the policy reserve which the companies are compelled to hold under the laws of the several States. This 1 per cent tax on policy reserve will certainly add to the cost of insurance, and be a disadvantage to the large majority of people everywhere.

Can not a conference be called with some life insurance experts and the language so changed as to free policy holders from an unjust tax?

With best wishes, I am,

Yours, very truly,

GEO. BARNES,
6043 Kingsbury Boulevard.

RICE-STIX DRY GOODS CO.,
EXECUTIVE OFFICE,
St. Louis, April 14, 1913.

Hon. L. C. DYER,
House of Representatives, Washington.

DEAR MR. DYER: I take the liberty of inclosing herewith letter I have just received from Mr. George S. Mepham, expressing his views relative to the tariff question.

The views as therein expressed are indicative of those of many St. Louis business men, and I beg to ask of you to use your influence at the proper time in the proper direction.

With kind regards.

Yours, very truly,

ELIAS MICHAEL.

GEO. S. MEPHAM & CO.,
East St. Louis, Ill., April 12, 1913.

MR. ELIAS MICHAEL,
Care of Rice-Stix Dry Goods Co., St. Louis, Mo.

MY DEAR MR. MICHAEL: Your letter of April 5, coming during my absence from the city, has just been read, and I have so much confidence in your knowing what is right that I am sending subscription to the chamber of commerce, as suggested.

I really feel that something must be done in this country to stem the tide of absurd and impossible legislation, which is as needless as it is fruitless, and this, in connection with tariff changes, will undoubtedly bring upon the country a condition of panic that will be worse than anything the country has ever suffered from.

If the suggested Underwood bill is passed and becomes a law, I know of many concerns like our own which will become jobbers of foreign products and not manufacturers in this country, for we can to-day buy

material made in Manchester, pay freight and duty, and lay it down here in East St. Louis in carloads at a less price than our present costs. It is all a question of labor. If the new tariff will bring labor down to a basis of foreign costs it will permit operations, but is this wise? It does not look good to us to cut down the earning power of the country to any considerable extent.

Yours, very truly,

GEO. S. MEPHAM.

CIGAR MAKERS' UNIONS 44 AND 281,
JOINT ADVISORY BOARD,
St. Louis, Mo., April 18, 1913.

Hon. L. C. DYER,
Twelfth Missouri Congressional District.

DEAR SIR:

Whereas the Committee on Ways and Means of the House of Representatives has reported a bill establishing absolute free trade in cigars and tobacco and other products with the Philippine Islands; and

Whereas the present law permits 150,000,000 cigars from the Philippine Islands to be admitted duty free, which in itself is equal to the annual production of 2,500 American cigar makers; and

Whereas any bill having for its purpose the open-door policy, viz, removing the duty on all cigars and tobacco manufactured in the Philippine Islands, will work considerable hardship on the men and women engaged at cigar making for a livelihood and be a decidedly disturbing factor in the industry many of us have devoted almost a lifetime to.

Therefore, we, the members of Cigar Makers' and Cigar Packers' Unions, Nos. 44 and 281, of St. Louis, Mo., comprising over 1,000 members, most of whom have large families depending solely upon the progress and development of the cigar industry in the United States, hereby enter a vigorous protest against the enactment of any law or rules which tend to destroy the cigar industry of the United States, the result of which deprives us of a livelihood; be it further

Resolved, That we certainly protest most vigorously of being pitted against oriental labor, viz, Filipinos, Chinese, Japs, etc., the cheapest labor of the world, and we insist as American citizens that our welfare be given the first and highest consideration, and in accordance with this spirit we look forward to the Congress of these United States to defeat any measure endangering the means of existence of this Nation's toilers or any portion thereof.

Trusting we may learn your disposition in the above matter.

JOINT CIGAR MAKERS' UNIONS 44 AND 281.
HY. C. PLASSMEYER,
PHIL H. MUELLER, *Secretary.*

The Tariff.

SPEECH

OF

HON. JOHN A. M. ADAIR,

OF INDIANA,

IN THE HOUSE OF REPRESENTATIVES,

Friday, April 25, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. ADAIR. Mr. Speaker, the Democratic Party has been commissioned by the people to revise the tariff downward in pursuance of its platform pledge, and the Ways and Means Committee has presented a bill for that purpose. I shall not at this time enter into a detailed discussion of the merits of the pending bill, but will use the few moments I shall occupy in pointing out our duty, not only as Democrats, but as patriotic American citizens as well. At a later date I shall discuss at some length the provisions of the Underwood bill, which, in my judgment, is the best tariff bill ever presented to Congress in the history of our country.

Mr. Speaker, I shall vote for this bill as it was reported from a Democratic caucus without dotting an "i" or crossing a "t." I am one of those who believe in majority rule, and when a caucus of my party writes a tariff bill, regardless of whether each and every item in the bill meets with my approval or not, I shall stand by the action of the caucus and give the bill my hearty and enthusiastic support. No Democrat can do otherwise. I do not criticize or find fault with those who in the caucus offered amendments to the committee bill. I offered a few amendments myself, as all of us had a right to do. In fact, that is what the caucus was called for. It is but natural that we see things in a different light, and it is also true that we are better informed about things produced in our own districts than we are on things produced in other districts, but no honest Representative will vote for a high tariff on everything produced in his own district and a low tariff on everything produced outside of his district. We are here legislating for all the people, and the interest of the entire country must be taken into consideration instead of the interest of a single district. There are 4,000 items in this bill, and each one of us is entitled to his own opinion as to which item or items shall go on the free list. If we were to read out of the Democratic Party all Members who took issue with the Ways and Means Committee in our caucus on certain items of the bill there would be none left to sustain the committee in presenting the bill as finally agreed upon to the House. We should stand squarely upon the Democratic platform in favor of a tariff for revenue, making it lowest on the necessities of life and highest on the luxuries; but the question of what shall be taxed and the amount of the tax is a matter of detail and judgment and not a matter of principle. No one has a right to say that a Member is not a good Democrat if he votes for a revenue duty on any article, provided our party did not specify in its platform that particular article as one that should go on the free list. Neither should a Member be criticized for having the courage of his conviction and voting in accordance with his judgment rather than accept a policy he does not believe in because it is offered by one higher up in official life.

Mr. Speaker, one of the Republican papers of my State has been very unfair and unjust in its criticism of those of us who voted in the caucus for a revenue duty of 15 per cent on raw wool. This, I am sure, is due to the fact that our position is not understood. The present duty on wool is 11 cents per pound, or about 42 per cent. Our platform did not promise free wool, but it did promise a revision of the tariff downward, and I, along with others, voted in the caucus to reduce the duty on raw wool from 42 per cent to 15 per cent, a reduction from the present rate of about 65 per cent.

Of the 4,000 items in the bill but very few were reduced to this extent. No one can truthfully charge that a 15 per cent duty is a protective duty, as it is entirely too small for that. It is nothing more than a small revenue duty, and I am now willing to give up this revenue for the benefit of the consumer, but I was not willing to give it up for the sole benefit of the Woolen Trust. I have stated time and again, both in and out of the caucus, that I was in favor of placing raw wool on the free list provided woolen goods were also placed on the free list, or reduced to a low rate; but, in my judgment, to place raw wool on the free list and then continue a high rate of duty on woolen goods would result in losing the Government $9,000,000 annually in revenue and transfer a like amount of money into the pockets of the Woolen Trust, no part of which will ever reach the consumer through cheaper woolen goods. In other words, by placing wool on the free list you give the manufacturer cheaper raw material and at the same time continue a rate of duty on the finished product which gives him a monopoly of the American market and enables him to extort from the American consumer a price to suit himself. I want the people to have cheaper woolen clothes, cheaper woolen blankets, and cheaper woolens of every description, but they will never get them as long as the Woolen Trust has a monopoly of the market. The records of the Treasury Department show that a large amount of woolen goods made in American mills is exported every year to foreign countries and sold in competition with the world. A clothing manufacturing establishment in New York City has opened up branch houses in London, Liverpool, Berlin, and Paris, from which it sells annually in competition with the world nearly $2,000,000 worth of ready-made clothing made in the city of New York. In view of this fact, what excuse is there for giving them a high rate of duty on clothing and a monopoly of the American market? The only theory upon which the doctrine of free wool and a high duty on manufactured woolen goods can be based is upon the ground that if you add $9,000,000 more to the profits of the woolen manufacturers they may possibly allow a little of it to leak down on the consumer. It has been clearly shown by Senator LA FOLLETTE on the floor of the Senate that the Woolen Trust under the Payne-Aldrich bill has been robbing the American people of over $100,000,000 annually on manufactured woolen goods, and I do not now want to add $9,000,000 more to that robbery. I want to legislate in the interest of the consumer. I want to give to the poor people of the country cheaper woolen clothing, cheaper woolen stockings, cheaper woolen dress goods, and cheaper woolen blankets.

Mr. Speaker, it can not be charged that my position upon this question is due to a demand from home, as the district I represent is not what might be called a wool-growing district. There are not many sheep in it, and I have only had one letter from a farmer on the subject. All the farmer asks is that if he sells his wool on a free-trade market he be permitted to buy his clothing on a free-trade market, or at least on a competitive market; and that is fair and right. No one who is familiar with the history of the Democratic Party will contend that free wool is a Democratic policy.

No platform of our party in the history of the country ever declared for it. Moreover, the last national Democratic platform, adopted at the Baltimore convention last year, indorsed the tariff bills passed by this Democratic House one year ago and

two years ago, both of which carried a duty of 29 per cent on raw wool, and we went to our constituents last fall with that bill in our hands, saying, "This is the legislation we will give you if you return us to power." If our party is committed at all on this subject, it is committed to a tariff on wool by the action of the last national Democratic convention. Two years ago when the chairman of the Ways and Means Committee presented to the House the Democratic tariff bill dealing with the woolen schedule, carrying a duty of 20 per cent on raw wool, a motion was made to place wool on the free list, and every member of the Ways and Means Committee, as well as every Democratic Member of the House, except a very few, voted against placing wool on the free list. As I remember it now, every Member from Indiana voted against free wool except one. If more than 200 Democratic Members of the House were right one and two years ago, I am right now.

Mr. Speaker, the 200 Democrats I refer to who voted against free wool one and two years ago have not changed their views on this question. They believe as I do this very minute, but the difference between them and myself is this: I voted in the caucus in accordance with my honest judgment, and they laid aside their own convictions and voted the judgment of another for reasons better known to themselves. The chairman of the Ways and Means Committee, Mr. UNDERWOOD, stated that his committee agreed upon a duty of 15 per cent on raw wool and wrote it in the bill, but struck it out at the request of the President. Had this request not been made by the President every Democratic Member of the House, including the Ways and Means Committee, would now be voting for a 15 per cent duty on raw wool. I am giving these facts, Mr. Speaker, to show that my position on the wool question is the same as that taken by the Ways and Means Committee and practically every Democratic Member of the House. Four years ago when the Payne bill was passed and hides were placed on the free list I took the same position in relation to making hides free and taxing shoes and leather products that I now take on the wool question. I insisted then that free hides and a high duty on shoes would be beneficial to no one except the manufacturer, and my position has been fully justified. Hides were placed on the free list and a duty continued on shoes, and no one up to this good hour has been able to buy a pair of shoes for one cent less than they did before hides were made free, but the manufacturers of shoes with free hides have increased their profits about $6,000,000 in the last four years. The Ways and Means Committee, recognizing the correctness of my position on the hide question, have made shoes and leather goods also free in this bill. The same thing will be true of free wool and highly taxed clothing. The manufacturer will be the only one benefited. The Government will lose the revenue, and the consumer will pay practically the same old price for woolen goods.

Mr. Speaker, if I had my way I would place both raw wool and manufactured clothing and blankets on the free list, but if a duty is to be retained on clothing and blankets, I would lay a duty of 15 per cent on raw wool, purely for revenue purposes. However, as I said in the beginning, I shall yield my own judgment and abide by the action of our Democratic caucus and vote for this bill. As a whole it is a splendid measure and will result in bringing much needed relief to 92,000,000 people. There are 4,000 items in the bill, and I am in hearty sympathy with practically all of its provisions except as I have indicated.

I realize, too, that all legislation is the result of compromise, and no tariff bill ever written met the wishes of a single Member in every particular. The bill as a whole is a fulfillment of the pledge made by the Democratic Party to the people, and I earnestly urge every Democrat on this floor to give this wholesome measure his earnest support.

Mr. Speaker, I came into this House six years ago, at a time when we were face to face with an industrial crisis without precedent or parallel. Under Republican rule a system of tariff taxation had been permitted to exist until it had distorted the functions of a free government into tools of greed and vehicles of oppression. A system that had resulted in transferring the wealth of the country into the hands of the few. The party then in power was indissolubly linked, as an organization, to the powers of concentration, combination, centralization, and monopoly. There existed an ever-increasing anger and resentment, because of wrongs that had not been redressed, of rights that had been taken away, and of hope that had been deferred. Immediately upon entering this House I proceeded in my humble way to help wipe out and destroy all forms of special privilege and restore the Government to the people. For six years I have stood upon this floor fighting the battles of the plain people, and more than once I have been told that my opposition to the interests would result in my retirement from Congress. Not frightened by such threats, I have at all times maintained that this Government has no right under our Constitution to use its taxing power to create millionaires through a system of tariff taxation. For many years the people were misled and deceived as to the effect of our protective-tariff system, but finally when their eyes were opened, and they saw it in its true light, they drove the party responsible for its existence out of power and commissioned us to revise the tariff downward in accordance with our platform pledge, and we now present a bill, which when enacted into law will bring to an end the day of special privilege, so far as tariff taxation is concerned. For years I have been fighting for this legislation, and the passage of this bill redeems our pledge and brings great relief to the people.

Mr. Speaker, one by one the Democratic Party is bringing about great and important reforms, which shows the party of Jefferson is still the party of the people. We have provided for the election of United States Senators by direct vote of the people. We have enacted a splendid law for the regulation of the railroads. We have written upon our statutes the most liberal pension law ever passed in the history of the country. We have passed more than 20 bills directly in the interest of labor. We have increased the appropriation for the use of the Agriculture Department, and through its operation, investigation, and distribution of scientific information have rendered a valuable service to the American farmers. We are now passing an income-tax law that will remove from the backs of the poor people a burden of taxation amounting to $75,000,000 annually and transfering it to the shoulders of the rich, where it rightly belongs. Under the Wilson administration graft, waste, and extravagance is being weeded out of all the departments of government, and economy and effeciency is taking its place. The Democratic Party recognizes the fact that this Government was not established for the benefit of a favored few, but for the good of all the people, and upon us rests the responsibility of carrying out its purpose, to the end that the strong may not trample on the rights of the weak, but that every man may stand upon one common ground with an equal opportunity of enjoying the blessings so bountifully showered upon us as a nation.

Mr. Speaker, I regard it as one of the greatest privileges of my life that I have been permitted to take an active part in securing these great reforms.

The Tariff.

"The Democratic tariff act is a monument to a guesswork system of tariff legislation."

SPEECH

OF

HON. WILLIAM W. GRIEST,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

Monday, April 28, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. GRIEST. Mr. Speaker, tariff discussions are not new to the American people. For more than a century the tariff has been a dominant subject of political discussion. It has been described as both a national and local issue; as both a political and economic question. It involves the problems of direct and indirect taxation, and as a basic principle of government the tariff policy must be either protective or nonprotective. But, casting aside all theories, the patriotic query is whether protection or nonprotection will make the people of these United States happy, contented, and prosperous.

In the First Congress, Mr. Madison, afterwards President, reported a bill the preamble of which declared—

for the support of Government, for the discharge of the debts of the United States, and for the encouragement and protection of manufactures.

This act was the first levying duties on "foreign goods, wares, and merchandise," and President Washington gave it his approval July 4, 1789. This bill, the second enactment of the American Congress, affirmed the power and policy of a protective system. It was passed by the unanimous vote of the Senate and a five-to-one vote of the House. It established the fact that the tariff and protective policy are not unconstitutional.

The American people then and there gave their approval to the policy of protection and thereby, as pictured a century later in the words of President McKinley—

The Nation was quickened into new life and the entire country under the tariff moved on to higher triumphs in industrial progress and to a higher and better destiny for all the people.

From 1789 to 1913 there have been more than a score of important tariff enactments following political campaigns. In almost all of these battles a majority of the people have declared for the protective policy, and following each tariff revision along protective lines have resulted beneficial conditions under which the country has enjoyed real progress and prosperity as never before known in the history of civilization.

Following the tariff-for-revenue-only legislation in 1816, 1833, 1872, and 1894 American history records disaster, injury, and ruin, and, as James G. Blaine said:

A century's experience of the tariff should be their warning and their guide, for—

Says he—

it may be welded for your destruction or it may be welded for your protection and for your safety.

"A tariff for revenue only" means nothing but free trade, and that means death to the policy of protection. The Democratic platform declares the principle of protection unconstitutional, but when empowered with full control of the reins of Government the Democratic leaders are forced to admit that there is merit in the protective principle, and in violation of the campaign declaration they present to the Congress a semi-protection tariff law, with the announcement that they will make gradual changes looking to the "ultimate attainment of principles" enunciated in the Democratic platform.

We are told that a Democratic tariff law will do no harm to the welfare of the American people. But are the people to understand that the evil day has been only postponed while a great national experiment is to be tested, and if business is not disturbed or thrown into confusion or panic there will be further legislation until, as promised in the Democratic platform, their tariff principles shall be ultimately attained—or until free trade and hard times shall bring misery and low wages?

Commenting on the principles of "a tariff for revenue only," President McKinley once said that—

A protective tariff as an agent for raising revenue for the National Treasury is just as good as a revenue tariff.

In fact, a protective tariff does accomplish what a revenue tariff does, and more. It raises revenue, regulates commerce for "the general welfare," and insures the employment of labor, giving opportunity for good wages. The adoption of the Democratic tariff principle can not materially cheapen the cost of living unless it cheapens American men, but it will encourage foreign manufacturers and foreign labor to the detriment of domestic labor and home industry.

There are some Democrats who are not wholly afraid of the doctrine of protection, and they have demanded protective rates on certain articles, because with them it is a local issue; but those gentlemen must remember that their party in its platform declaration of principles brands the policy of protection unconstitutional and demands a tariff for revenue only—a tariff based upon a policy of free trade.

This wonderful country has been a workingman's paradise under a protective tariff as compared with conditions of labor and living in foreign lands. But withal we find problems, social, moral, and industrial, worthy of serious attention. The American people are giving consideration to these social and industrial questions, and there is a desire to do equal justice and fairness to the employer and the employee. These are not alone party issues, but questions which have to do with the rights of the people of all parties, and at this vital time the Democratic Party prepares to cut the tariff to a less protective basis. It threatens to deprive Americans of their full share of the American markets, curtail production at home, and pave the way for reduced wages.

The vital issue of tariff rates has again come before the people. If the rates are to insure a fair and reasonable degree of protection, then only by business methods can it be ascertained what rates shall be established, and an honest revision can be made only after data is collected by such a board or commission as was created by the last Republican Congress, advocated by both ex-President Taft and ex-President Roosevelt, and indorsed in the platform of the Republican Party.

The Republican tariff bill of 1909 provided for a tariff board. Its work attracted the attention of unbiased men and prompted a demand from business organizations of the country for the establishment of a nonpartisan permanent tariff board or commission to be appointed by the President. At that time commercial, industrial, and agricultural associations petitioned the House and Senate of the Sixty-first Congress to pass legislation establishing either a board or commission. The bill was considered by both the House and Senate, and in the closing hours of the Sixty-first Congress a Democratic filibuster prevented the enactment of the law. Had the Republican Party controlled the Sixty-second Congress it would have provided for a nonpartisan tariff board, and with figures and facts the Congress could act intelligently on tariff-revision legislation. The Republican Members of the Sixty-third Congress, in a caucus meeting open to the public, affirmed the party pledge favoring the permanent establishment of a nonpartisan tariff body.

The Underwood tariff was prepared in secrecy, and is said to have been agreed upon in private conference between Democratic leaders in the House and Senate, and President Wilson, before the extra session of Congress was actually convened. The public was ignored, and in the words of a prominent Philadelphia newspaper—

The views of the Congress and the public were apparently considered of neither value nor importance

The time is past when the great national policy of this Nation can be toyed with as a game of sight-unseen, or important changes can be made by mere guesswork.

The people are opposed to extortion, but are in favor of reasonable protection. They want to insure the employment of labor at home. They approve of home production under a system that will give every man a fair chance. The policy of protection has given great opportunities for progress; has allowed American workmen shorter hours and higher wages; and to reverse this system by the ultimate attainment of the principles of the free traders must result in a condition which will reduce our people to the level of less prosperous countries and force the reduction of wages to that of the poorly paid labor of the world. What other result can be expected or anticipated?

The conservation of life, property, and the natural resources of the United States is receiving the support of men and women generally. All of these efforts to better conditions are put forth by those who want to develop a nation of respected and self-respecting people. To this end good wages are essential. Wages are high as compared with those paid for similar employment in the years gone by, and similarly the cost of living has increased, but not materially out of proportion to the improvement in the standards of living. The amount of money necessary for a bare subsistence and the ordinary wage rate is larger than anywhere in the world.

In this country we believe in competition, but do not want industries suspended, public works retarded, legitimate business enterprises abandoned, and thousands of useful laborers thrown out of employment or reduced to want. Hard times have no fascination for our people, and every patriotic man should study the history of undisputed facts offered by James G. Blaine when he said that in a century's experience with the tariff—

It has been incontestably established that this country under a low tariff, inviting sharp competition and large importations from abroad, has never prospered, but every such attempt has ended in financial and industrial disaster, prostrating every interest, most of all the agricultural, and operating without exception with peculiar severity upon the wageworkers.

Some people have the idea that the tariff is the "mother of trusts," but that opinion conflicts with the history of facts about trusts and great combines in other parts of the world. As early as 1880 trusts and combines to control prices existed in free-trade England, and, as the last Senator Dolliver said:

England was even then plastered all over with trusts.

Great combinations of capital have become common in all parts of the world where manufacturing is plentiful, and it is evident that such trusts and combinations are not confined to countries having a protective-tariff policy. Both England, with free trade, and Germany, under a policy of protection, have trusts and have enacted legislation to control them, and in this country the Federal and State Governments are vested with authority to enact laws to regulate combinations of capital. As far back as 1903 Mr. Roosevelt, then President, said:

The question of tariff revision stands wholly apart from the question of dealing with the trusts.

The attempt of the Democratic Party to change the tariff duties can have no effect in solving the so-called trust problem.

Lancaster County, Pa., which I endeavor to represent on this floor, has for 50 years enjoyed the prestige of being the banner agricultural county in the United States, according to the official census. In the last census the county reported a total valuation of farm products approximating $21,000,000. It is therefore natural that our farmers should expect and be entitled to a policy of protection which will preserve the home market against harmful competition. They fully realize that there is danger to them in having farm products placed on the free list and in opening the home markets to the products of other countries where lands are fertile and production inexpensive, where labor is plentiful and cheap and where the standard of living is low. Without protection there would be unfair and harmful competition between our American farmers and the farmers of the world.

The Democratic tariff places on the free list such farm articles as potatoes, meats, swine, flour, rye, bran, corn, buckwheat, milk, tobacco stems, fruits, and many other products, allowing other countries free access into the United States to enjoy the privilege of the American market without paying a cent for the benefit, while a reduced duty is levied on butter, eggs, poultry, sheep, hay, etc., making these articles more nearly competitive with foreign farm products. Free trade and strict competition are the objects of ultimate attainment to which the Democratic Party aspires.

The Underwood tariff law is intended as an initial blow at protection. Agricultural products have been added to the free list in response to false complaints against the farmers. There is no well grounded reason for the charge that the farmers are unduly profiting by prosperous times or by the increase in the prices of farm products. The trouble lies largely in the fact that the ratio of production has not kept pace with the ratio in the increase of population, with its proportionate increase in the number of consumers. In other words, much of the cause for high prices in foodstuffs comes from underproduction of farm products, and unless we keep the mills and factories going with work for home workmen there will again come a time of low prices and agricultural overproduction.

The farmer furnishes capital; engages in production; takes the risk of losses; his crops are at the mercy of drought, flood, heat, frost, insects, and other destructive conditions. He must have knowledge of his profession and study the science of agriculture. He is affected by overproduction, by disastrously low prices, by market and credit conditions, and by business changes generally. At every point there are perils to his profits, and the profits, all things being considered, are not so large. In view of the facts, the farmer, like the manufacturer and the skilled craftsman, is entitled to his share of protection and is justified in protesting against drastic tariff legislation.

The farmers are interested in securing a reduction in the cost of living and in the prosperity of the people in the big cities, who are mainly consumers. They recognize that the producers can not prosper unless the consumers enjoy prosperity, and both the farm and the city must have prosperity if commerce, trade, and manufactures are to continue active. But if the people of Canada, Mexico, South America, Europe, and the Orient are to be given an advantage in American markets, then it becomes manifest that the American producers can not escape from injury and loss.

This tariff bill of 1913, after having been submitted to and sanctioned by President Wilson and the Democratic caucus, is a drastic piece of legislation aimed at those who work in the fields and factories.

As an instance, thousands of our citizens are engaged in cigar making. Would not every 100,000,000 cigars imported into the United States under a Democratic competitive tariff law take the place of an equal number of American-made cigars and deprive our workmen of that much labor? Would it not also deprive the tobacco grower, the leaf dealer, and the manufacturer of an equal amount of business? Is it not absolutely certain that the importer would not sell his product in this country at a less price than he sells it now unless the extent of the articles imported from foreign countries would create such open conflict as to make a reduction in the market for homemade goods?

Many farmers grow cigar leaf tobacco, and are largely competitors with Cuba, Sumatra, and the Philippine Islands, with their cheap tropical labor, with wages as low as 10 to 30 cents per day. Our farmers must cure their tobacco in buildings which are costly; their land is high priced, and they give employment to American labor at good wages. The domestic tobacco industry affords business for the packers and leaf dealers and the cigar manufacturers, who in turn give employment to thousands of people engaged in cigar making. They demand and should receive, the policy of protection as a safeguard against the cheapest and most ignorant labor of the world.

The Government has been liberal in its treatment of its foreign wards. It has allowed Porto Rico free entry of its cigars. Cuba has been conceded a 20 per cent discount on the tariff rate on cigars. The Philippines were allowed a limited importation, and now the Democratic Party proposes absolute free trade in both tobacco and cigars.

During the fiscal year 1913 fully 100,000,000 Philippine cigars will be imported into the United States free of duty, an increase of fully 25,000,000 over the free importation in 1912. With the right of absolute free trade, we may expect that capital will be encouraged to invest and produce larger tobacco crops and manufacture greater quantities of cigars, so that within a few years the Philippine Islands may ship into the United States duty free a billion cigars, to take the place of a like number of American-made cigars.

The Philippine farm labor costs but a few cents per day, and their cigar makers work for about 37 cents per day, or $8 to $20 per month, while at the least a cigar maker in the United States is paid $1 per day, and some make as much as $5 per day. The Orientals live cheaply, while our people must have sufficient clothing, good homes, substantial food, and maintain a higher standard, making it impossible to compete with cheap foreign labor.

Our farmers breed some cattle, but this business has become unprofitable, and they are now largely engaged in fattening cattle for market. They do not claim to be the cheapest producers of meat in the world; but if the Argentine, with its limitless grazing lands and cheap labor, can and does undersell American meats in foreign markets, it is hard to imagine how the Democratic leaders can persuade the farmers that they can be benefited by a tariff law which places meats on the free list and leaves a duty on cattle, a scheme that will give the market to the meat producers of Argentine, New Zealand, and Australia. The Beef Trust is probably best able to import these foreign meats cheaply, as by the use of refrigerator ships, with the facilities for cheap transportation, the Beef Trust could derive the advantage of this serious blow to the American cattle business.

The reciprocity act, which was rejected by Canada, provided for free cattle from Canada, but did not open the American market to the meat trade of the world. Canadian reciprocity would have enabled the farmers to buy thin stock for raising and fattening, and the home butcher would have been given an equal footing in the purchase of supplies. But if meats are placed on the free list, with a duty on cattle, the farmer, butcher, and consumer will be at a disadvantage and the Beef Trust and big packers will gain. They can afford to maintain plants throughout the world, as the official statistics, certified by the Secretary of Commerce, corroborate the claim that American meats abroad are undersold by cheaper South American and Australian meats. Free meats and a duty on cattle is a discrimination against the farmers and dairymen, and may also mean the reduction of corn raising, as 85 per cent of the corn crop is said to be used in feeding cattle.

Rye and buckwheat have been placed on the free list, together with flour made of wheat, rye, or buckwheat. Here, again, is legislation to the disadvantage of the farmers who grow these cereals, as free flour represents a practically equal amount of wheat, rye, or buckwheat grown on the farms. With a duty on wheat and flour on the free list, the millers are at a great disadvantage, and flour manufacturers will be seriously affected when foreign flour makers ship great quantities of the finished wheat product into this country as flour, without a duty, instead of wheat at 10 cents per bushel duty. This is a menace to both the farmer and the miller, and to all dependent on agricultural prosperity.

The agricultural free list is not the only bad feature of the Democratic tariff bill, but, as over 4,000 items are involved, each can not here be discussed singly. A revision and reasonable reduction of the tariff rates in some of the items of various schedules has been generally expected, but the harmful cuts made in the rates of certain manufactured articles can not improve home industries; and if the Democratic Party should be retained in power, controlling the Presidency and both branches of Congress, will they not feel emboldened to seek to secure the "ultimate attainment" of the principles of free trade set forth in the Democratic platform?

In cities with a variety of industrial establishments, like Lancaster and Columbia, Pa., where firms are operated independently, the business men and their employees are compelled under the Underwood law to compete in open market with the confessedly lower-paid labor of Europe. The import duty is cut on brass goods, hardware, machinery, harness, stoves, castings, umbrellas and parasols, silk goods, cotton goods, lace, chemicals, asbestos, vehicles, tools, soap, cork, boilers, boots, shoes, linoleums, and numerous other articles made in Lancaster County. The tariff reductions on these articles are not based upon sound business principles.

The Democratic tariff act is a monument to a guesswork system of tariff legislation, and as an illustration one need but examine the import rates on many manufactured articles and the rates on materials used in making the finished product. From responsible men have come protests against such legislation as harmful to business and labor. As previously stated, free flour and the duty on wheat affects the producers of wheat and millers who make the flour.

Another illustration is the tariff reduction on umbrellas and parasols. The duty on the finished product is reduced to 35 per cent and the duty on the goods used in covering umbrellas and parasols is 45 per cent ad valorem. The finished article can be imported at 35 per cent of its cost, and the employment of thousands of wage workers is jeopardized, the advantage being given to foreigners, and the home industry is placed on a strictly competitive basis.

Shoes are placed on the free list, and yet the Underwood bill is said to carry 30 different dutiable articles which enter into the process of shoemaking. Four years ago hides were placed on the free list, but shoes were not sold cheaper, and many are skeptical as to the reduction in the price of shoes. But free shoes with a duty on the articles used in the process of manufacture seems to subsidize the foreigner to the loss of our tanners and shoemakers. Injustice and inconsistency like this characterize the bill throughout.

Owing to the efficiency of our workmen and the use of modern machinery and by reason of good business methods, a portion of the tariff cut can be met, but it is unjust to expect that our people shall be able to compete in all products with the markets of the world and maintain our present wage standard. Thousands of men and women are employed in the factories at remunerative wages, and all that is asked for them or by them is an honest degree of protection, that harm neither now or hereafter shall come to our industries.

This tariff bill directly affects the products of 266,805 business establishments, of which number 242,029 produce goods which are on the dutiable list. These establishments provide employment for 7,700,000 wage earners, producing articles valued at $20,000,000,000. In addition, there are, according to the last census, 7,000,000 farmers, and their interests have not escaped the free-trade winds.

To-day these people are the beneficiaries of the great domestic markets of the United States, which in 1912 were estimated as being worth $33,000,000,000, of which amount the total value of farm products was about $9,000,000,000.

Without a protective tariff policy this great volume of business and these men and women must become direct competitors of the low-priced labor of any and every part of the world. Of the cheap labor of Europe and of the Orient, there are 140,000,000 such in Russia; 300,000,000 in India, many working for a few cents a day; 400,000,000 in China; and thousands just across the boundary lines of these United States.

The sudden reversal of the general tariff policy of a nation of 100,000,000 people should not occur for political purposes. Neither should such legislation be privately arranged between the Ways and Means Committee and President Wilson, as was done before the public or Congress was permitted to know what character of bill would be submitted to the binding, oligarchical caucus of the Democratic Party. They have welded an act which deserved and received the apologies of Chairman Underwood when he opened the tariff debate, and other apologies for the legislation are soon to be forthcoming.

In the absence of a tariff commission little real information has been furnished the 435 Members of this House who are expected to give consideration to the more than 4,000 items affected by a general tariff bill; and yet the common sense view of the protective system was so convincingly stated by the beloved Lincoln that the principle enunciated by him carries conviction.

President Lincoln said:

> I do not know much about the tariff, but I know that if you buy a ton of steel rails abroad you have the rails and the foreigner has the money; if you make a ton of rails here, you have both the rails and the money.

As a patriotic citizen it is my earnest wish that the tariff legislation will be followed by continued prosperity, but scores of tariff rates, compared with facts, prove the injustice of the proposed tariff revision, and are cited to illustrate the effects of unwise and hasty tariff legislation. It is not a cry of dire calamity, nor a forecast of panic, or even business depression, that I utter, but a solemn word of caution against the ultimate attainment of a bad economic policy, the enactment of legislation which will curtail labor, reduce wages, and retard the commercial expansion of the people of our own country.

The Republican Party was born as a protest against slavery and the degradation of labor. Lincoln, Grant, Hayes, Garfield, Harrison, and McKinley fought for the principles of protection and won. Roosevelt and Taft upheld these principles. In 50 years great progress has been made. Labor has been dignified, and the best labor scale in the world has been established and maintained. The American standard of living, and the American home are examples for the people of the world.

The Republican Party of to-day believes in fair competition, and is opposed to oppression, but it does not countenance the destruction of industry. It does not stand for less business and a lower wage. It believes in the policy of corporate regulation, supervision, control, and protection and justice to all, to the end that the people of these United States shall be happy, contented, and prosperous.

The Tariff.

EXTENSION OF REMARKS

OF

HON. L. C. DYER,

OF MISSOURI,

IN THE HOUSE OF REPRESENTATIVES,

Monday, April 28, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. DYER. Mr. Speaker, under the general leave granted to print in reference to the tariff bill, now under consideration by the House, I insert in the RECORD the following letters from constituents of mine in St. Louis which are a few of the many letters and telegrams I have received protesting against the passage of the present bill:

ST. LOUIS, *April 24, 1913.*

HON. L. C. DYER,
United States House of Representatives, Washington, D. C.

DEAR SIR: I respectfully request that you use your best efforts to have the pending income-tax bill so amended as to exempt from taxation the proceeds of all life insurance policies and all life insurance funds, including the premium refunds (or so-called dividends) to policyholders, on the ground that such refunds are in no sense earnings or profits but are the portions of the premiums collected for emergencies which are refunded to the policyholder if not used.

I protest against the taxation in any form of life insurance conducted on the mutual or participating plan as unjust discrimination and as contrary to sound public policy. I would therefore earnestly request your aid in removing an excessive burden from multitudes of our most provident and deserving citizens, who, by foresight and economy, are seeking to make provision for the future of those dependent upon them, and are thus relieving the Nation and State of heavy charges and responsibilities.

Very respectfully, yours,

DWIGHT D. CURRIE.

MERCHANTS EXCHANGE OF ST. LOUIS,
SECRETARY'S OFFICE,
April 25, 1913.

HON. L. C. DYER,
Member of Congress, Washington, D. C.

DEAR SIR: The sugar industry of the State of Louisiana and the Territory of Hawaii is threatened by the proposed reduction in the tariff on sugar.

Believing that any reduction in the present sugar schedule would not only injure the industry but would materially affect manufacturers, farmers, and laborers alike and no doubt severely cripple business in practically every line in the State of Louisiana and the Territory of Hawaii, the board of directors of the Merchants' Exchange of St. Louis, at a meeting held April 22, voted to earnestly request our Senators and Representatives to oppose any reduction in the present sugar schedule.

Yours, respectfully,

JOHN L. MESSMORE, *President.*
EUGENE SMITH, *Secretary.*

ST. LOUIS, *April 25, 1913.*

HON. L. C. DYER,
Washington, D. C.

DEAR SIR: We are writing to you, as our Representative in Congress, to ask you to use your influence in the matter of whatever duty is established for ferromanganese to have it a specific instead of an ad valorem duty. The bill now under consideration in the House provides for a 15 per cent ad valorem rate. The present duty is specific, being $2.50 per ton, having been reduced from $4 per ton by the tariff act of August 5, 1909.

A 15 per cent ad valorem is a very heavy increase over the existing rate—too large, in our opinion, and, as you no doubt know, rests lightly on one and bears heavily on the shoulders of all other steel manufacturers.

The difficulty with the ad valorem duty is the confusion which arises from that form of assessment, making it almost impossible for a buyer when he places his order to know what the stuff will cost him when it is finally delivered, if we are correct in understanding that the duty is assessed on the market value at the time of the arrival of the material in this country or time of shipment from abroad.

We respectfully urge you also to use your influence for maintaining the duty on pig iron where it is. It has been very heavily reduced in recent tariff acts and has now a very low duty. Recently there have been developed in China and India large iron works, built by American engineers on American models for Chinese and Indian ownership, which are manufacturing pig iron at a very much lower cost than is possible at any point in the United States. We understand American-made pig iron is being supplanted to a considerable extent on the Pacific coast, and as these institutions grow American manufacturers may expect to have to surrender all of that trade to foreign-made iron and face the possibility of the eastern seaboard being eventually thus invaded. From Asia the danger of competition in future is more serious than anything we may expect from Europe.

Yours, truly,

ROGERS, BROWN & CO.,
By J. MEARS.

HAMILTON HOTEL, *St. Louis, Mo.*

HON. L. C. DYER,
Member of Congress, Washington, D. C.

DEAR SIR: Referring to the new tariff bill, H. R. 3321, as offered by Representative UNDERWOOD, of Alabama, in the House of Representatives on April 7, in section 2 there appear to be certain ambiguities in two of the paragraphs referring to life insurance companies, which ambiguities should be removed before the bill is passed.

These ambiguities arise from the attempt which has been made in long, involved sentences to cover briefly many diverse matters.

Section B reads as follows (I have omitted a certain part of this paragraph which has no reference to life insurance corporations):

"B. That, subject only to such exceptions and deductions as are hereinafter allowed, the net income of taxable persons shall include gains, profits, and income derived from salaries, * * * or gains or profits and income derived from any source whatever, including the income from but not the value of property acquired by bequest, devise, or descent, and also the proceeds of life insurance policies paid upon the death of the person insured."

This section attempts to define the net income of taxable persons, which income is subject to the tax under this proposed law. It says that the income shall include gains, profits, income from salaries, etc., and then further includes gains or profits and income derived from any source whatever, including the income from but not the value of property acquired by bequest, devise, or descent. This is perfectly clear; that is, that the income of money inherited is taxable but not the principal; then are added these words: "and also the proceeds of life insurance policies paid upon the death of the person insured."

This language has been submitted to many persons conversant with life insurance matters, and it is interpreted in two ways. One opinion is that the intent of these words is that the recipient of the proceeds of a life insurance policy should pay a tax upon the income derived from that sum. Others hold that it is intended to include the proceeds of life insurance policies (that is, the face value of these policies) as a subject of taxation, and that the beneficiary under a life insurance policy would be compelled to pay the income tax upon the full face of the policy.

There being this doubt as to the intent of this paragraph, some wording should be suggested and adopted which will clear up this manifest ambiguity, the question, of course, being, Do the words "and also" connect the last sentence with the immediately preceding sentence, beginning with the words "including the income," or does it connect the last sentence back to the main subject of the section, which is an enumeration of the taxable items?

Paragraph G (2) defines the method by which a corporation shall calculate the basis of its income tax. This section reads as follows, certain irrelevant parts being omitted:

"G (2). Such net income shall be ascertained by deducting from the gross amount of the income of such corporation, joint-stock company, or association, or insurance company received within the year from all sources."

"First. * * *.

"Second. * * * and in the case of insurance companies the sums other than the amounts paid within the year on policy and annuity contracts to policy holders as dividends or as return of premium payment, and the net addition, if any, required by law to be made within the year to reserve funds."

The sentence commencing "and in the case of insurance companies the sums other than, etc.," is certainly very vague. What is meant by the word "sums"? Does it mean all cash payments to policy holders, which may be the intent, as shown by the exception? This word should be certainly corrected and more definitely defined.

Then follows an exception, stating what may not be deducted from the income, to wit: The payments made to policy holders as dividends or as return of premium payment. We will not express any opinion as to the wisdom of taxing these so-called dividends to policy holders, but are simply endeavoring to suggest that the law be so phrased as to be perfectly clear in its meaning.

Following this exception or deduction we find the words: "And the net addition, if any, required by law to be made within the year to the reserve funds." Here there is a great ambiguity. Is it intended by this simple conjunction "and" to connect the net addition back to the main subject of the paragraph, and is it the intent of the law thereby to give the companies the right to deduct the increase in reserve funds from the taxable income? Or is it intended by the conjunction "and" to connect the words "net addition, etc.," with the immediately preceding paragraph, relating to dividends and return premium payments, in which event the net addition to the reserve would be taxable?

I can not for a moment imagine that this is the intent of the law, but it does seem that such an interpretation might be sustained and that the ambiguity must be removed. Those who are not familiar with the details of life insurance business will realize the importance of clearing up this ambiguity when I make the simple statement that the growth in reserves during the year 1912 in the "Home," which is a comparatively small company, was $1,200,000; in the New York Life it amounted to $30,000,000; and in the Metropolitan Life to $42,000,000. (These figures are approximate.) You can readily see what a burden a 1 per cent tax would be upon this one item. It must always be borne in mind in this connection that the burden imposed by this tax, whatever it may be, will of necessity be distributed so that a proportionate and proper share will be borne by each policyholder. There are something like 20,000,000 policyholders in the country, and it is upon them that the burden will fall.

As I am informed there is to be no public hearing upon this bill, at least in the House or before the committee of the House, I can think of no other way of calling attention to this matter than by writing you as I have done.

Trusting the matter will receive your earnest attention, I am,

Very respectfully, yours,

J. M. BLOODWORTH.

APRIL 26, 1913.

ST. LOUIS, MO., *April 26, 1913.*

HON. L. C. DYER,
Washington, D. C.

DEAR SIR: We want to call your attention to that part of Schedule N, section 362, of the proposed tariff bill which, if enacted, will do our business, as well as the business of all other jobbing millinery and importing houses in this country, a great deal of harm, and we want to ask you, in the interests of all, to use your influence and to vote against this clause.

As we understand it, the proposed bill will prohibit the importation of feathers of all wild birds, which would include feathers of game birds, such as pheasants, grouse, partridge, wild ducks, etc., and we believe you will agree with us that it would be unfair to permit the flesh of such game birds which are used for edible purposes to be admitted and yet prohibit the importation of their feathers. This proposed legislation would not only cause great ruin to an important branch of the millinery line, but it would also deprive a great many worthy people, mostly women, of their livelihood and means of support to their families.

We want to ask your cooperation, and hope that you can be instrumental in defeating this clause and, if not, to at least have it greatly modified.

Thanking you in advance,

Very truly, yours,

LEVIS-ZUKOSKI MERCANTILE CO.,
EDGAR LEVIS.

BOECKELER LUMBER CO.,
St. Louis, April 25, 1913.

Col. L. C. DYER,
Congresman, Washington, D. C.

DEAR SIR: The income-tax law of 1894 exempted life insurance conducted on the mutual plan, as follows:

Section 32 of the act of August 28, 1894, provided that "nothing herein contained shall apply * * * to any insurance company or association which conducts all its business solely on the mutual plan and only for the benefit of its policyholders or members, and having no capital stock and no stock or shareholders, and holding all its property in trust and in reserve for its policyholders or members; nor to that part of the business of any insurance company having a capital stock and stock and shareholders which is conducted on the mutual plan separate from its stock plan of insurance and solely for the benefit of the policyholders and members insured on said mutual plan and holding all property belonging to and derived from said mutual part of its business in trust and reserve for the benefit of its policyholders and members insured on said mutual plan."

I respectfully suggest that you take whatever action may be necessary and proper to have that language incorporated in the income-tax section of the tariff bill now pending in Congress.

Yours, truly,

H. A. BOECKELER.

ST. LOUIS TOP CO.,
St. Louis, Mo., April 26, 1913.

HON. L. C. DYER,
Member of Congress Twelfth Missouri District,
Washington, D. C.

HONORABLE SIR: As you know there is pending in Congress the Underwood tariff bill, and in that bill it is proposed to make a horizontal reduction of 50 per cent in the duty on rice. Now, you are not from a State which raises rice and you, perhaps, think, as many people think, that the only people interested in rice culture are the people living in the rice-producing States. Such, however, is not the case.

The writer is a resident of St. Louis and a business man and manufacturer of St. Louis, and there would be very little rice produced in the rice-growing States to-day if it were not for the brains, enterprise, energy, and capital brought to bear in the rice-producing States by farmers from Missouri, Iowa, Illinois, Indiana, Wisconsin, Minnesota, Ohio, Michigan, Kentucky, Kansas, Nebraska, and the Southern and Southwestern States. Eighty per cent of those engaged and interested in growing rice live in States outside of the rice belt.

The 2-cent duty has made the rice industry worth $200,000,000 by inducing this capital outside of the rice-growing States to be invested in improvements in the rice belt. If the proposed 50 per cent reduction in the rice duty becomes a law, heavy losses will be suffered by those interested in the rice industry, as rice land has no value for growing any other crop than rice. Before the development of the rice industry under the 2-cent duty this land was worth less than $5 per acre. The increase in value is largely represented by expensive improvements (it requires an outlay of about $5,000 for irrigation wells and pumping machinery for each 160 acres of rice land) paid for by outside capital. Is not an industry like rice growing, in which so many growers have so much capital and interests at stake, worth protecting from a merciless competition with Asiatic rice which is produced with cheap labor, as against our high-priced labor? Do we wish to see the United States flooded with Asiatic rice, thereby driving the American rice from the market and ruining the American rice grower without in anyway lowering the cost of rice to the American consumer? The middleman is the cause of the high cost of rice to the consumer and no matter how cheap rice is in the market in wholesale quantities or how little the grower gets for his rice, the price to the consumer is always away up. At the present time the price to the growers is less than 2 cents per pound, while cleaned rice sells at retail as high as 10 to 12½ cents per pound. Who gets this difference? The railroads get less than one-sixth of it.

The cause of high cost of rice to the consumer, then, is not the tariff so much as it is the middlemen—our wrong and wasteful methods of marketing the rice. It now costs the American rice growers 1½ cents per pound to produce a pound of rice. So it is plain that the present tariff is not to blame for the high price of rice.

To show that the American rice farmer's heart is in the right place, even if the middlemen are now getting the lion's share of the money paid by the consumers for rice, we, the rice growers of the United States will not object to a reduction of 25 per cent of the present tariff on clean rice only; the duty on unfinished rice, rough rice, and rice by-products to be undisturbed.

In conclusion the writer will say that he has tried to make the position of the rice growers clear and earnestly hopes that you will vote against reducing the rice duty 50 per cent and will use all your influence and all your power to induce your honorable colleagues to vote for a 25 per cent reduction instead of a 50 per cent reduction, and thus save from ruin a staple cereal crop which is one of the leading crops of the Southern States in the rice belt and an industry in

which large sums of money from different sections of the United States is being invested annually.

Hoping you may see your way clear to act for the interests of the rice growers of the United States instead of the growers of Asiatic countries, and thanking you, I remain,

Yours, very truly,

JOHN WOODBURN.

MISSISSIPPI VALLEY TRUST CO.,
St. Louis, April 23, 1913.

Hon. L. C. DYER, M. C.,
House of Representatives, Washington, D. C.

DEAR SIR: We take the liberty of writing you in order to solicit your support of and cooperation in obtaining the adoption of a certain amendment to the income-tax section of the tariff bill recently introduced in Congress, in which amendment banks and trust companies located in certain States, among them Missouri, are particularly interested.

I refer to that part of paragraph G of the new bill which permits corporations when making their return of net income to deduct (from gross income) "all sums paid by it within the year for taxes imposed under the authority of the United States, or of any State or Territory, or Government of any foreign country, as a condition to carrying on business therein," etc. Under the administration of practically an identical provision of the present corporation excise tax act of August 5, 1909, section 38, subsection 2, the question has arisen whether banks and trust companies located in those States whose laws require banks and trust companies to pay taxes assessed against their stockholders as individuals have or have not the right to deduct the sums paid under such circumstances from their gross income. The Commissioner of Internal Revenue has ruled that they have not this right. The consequence of this ruling has been the bringing of a suit by the banks of this city in the Federal court of this district to recover from the Government taxes paid in accordance therewith.

In view of the fact that the provision of the income-tax bill quoted above is no more clear upon the point in question than the present corporation-tax law, it is proposed to settle the matter "out of court," as it were, by amending the former so that it may specifically declare that no tax shall be levied upon sums paid by banks for State taxes whether assessed directly against the capital of the bank or indirectly when assessed against the stockholders.

For your information we beg to state that the American Bankers' Association, through its Federal legislative committee, as well as the Virginia Bankers' Association, are taking steps to bring about the adoption of an amendment of the purport indicated. We respectfully urge your assistance in the premises, on the ground that it is unfair that banks and trust companies, subject to legal regulations existing for the convenience of the tax collector merely, should be obliged to pay a greater income tax than companies not so situated.

Respectfully, yours,

BRECKINRIDGE JONES, *President.*

MISSOURI STATE LEAGUE OF
BUILDING AND LOAN ASSOCIATIONS,
SECRETARY-TREASURER'S OFFICE,
St. Louis, April 24, 1913.

Hon. L. C. DYER,
Representative from Missouri.

MY DEAR SIR: As secretary-treasurer of the Missouri State League of Building and Loan Associations, I beg to ask that you favor us with your influence in having building and loan associations exempted from the payment of the income tax now under consideration by Congress.

As you know, building and loan associations are mutual societies for assisting stockholders to purchase homes on easy installments, and as such are favored in many instances by statutes, and were exempted from the payment of the special excise tax imposed by the act of August, 1909.

Trusting this request will receive your favorable consideration, I am,

Respectfully, yours,

BURTON MCGINNIS,
Secretary-Treasurer.

W. T. FERGUSON LUMBER CO.,
St. Louis, Mo., April 25, 1913.

Hon. L. C. DYER,
House of Representatives, Washington, D. C.

DEAR SIR: I most respectfully request that you use your best efforts to have the pending income-tax bill so amended as to exempt from taxation the proceeds of all life insurance policies and all life insurance funds, including the premium refunds (or so-called dividends) to policyholders, as you know that such refunds are in no sense earnings or profits, but are the portions of the premiums collected for emergencies which are refunded to the policy holder if not used.

I do protest against the taxation in any form of life insurance conducted on the mutual or participating plan as unjust discrimination and as contrary to sound public policy. I would, therefore, earnestly request your aid in removing an excessive burden from multitudes of our most provident and deserving citizens, who by foresight and economy are seeking to make provision for the future of those dependent upon them, and are thus relieving the Nation and State of heavy charges and responsibilities.

Yours, very respectfully,

T. C. WHITMARSH.

Also the following newspaper editorial of The National Farmer and Stock Grower, St. Louis, Mo., in its April, 1913, issue, to wit:

The National Farmer and Stock Grower is not a political paper, and we regret very much that protection of American farming, manufacturing, and commercial interests, through the collection of customs duties, is considered a political question, when it really is an economic and business matter, one that can not be decided in connection with social and sentimental questions that so largely influence the alignment of political parties.

We venture the assertion that if the people of the United States were permitted to vote on the tariff question alone, and not have it mixed up with all other subjects that divide people into parties, the vote on the tariff would be overwhelmingly in favor of the protection to American industries of all kinds through the imposition of customs duties, that would shut nothing out entirely but would collect some money for the support of the Government on all raw materials and manufactured goods admitted from foreign countries.

In lawmaking Congress exerts a wonderful power, and it is often exercised unwisely and to the disadvantage of the American people. A case in point is the removal of the tariff on coffee, which enabled the foreign combinations to put up the price before the coffee reached our seaports, and almost doubled the cost to the American importer and trebled the profits of the Brazilian syndicates that control the output.

Another example of misdirected legislation is taking the duty off hides, which has resulted to the benefit of the owners of foreign hides, who simply added the duty to the price. They paid the duties to the United States Government when the duties were collectible by law, and put it in their own pockets when they found that the United States Government had made them a present of it by admitting the hides free of duty.

We understand the general idea in Congress is that all they have to do is to remove the 1½-cent-a-pound duty on dressed meats, or the small duty that is paid on imported beef cattle, and then go around to the butcher shops and buy beefsteaks 10 cents a pound cheaper. They are entirely mistaken. They can make a present of the duties to the foreign syndicates engaged in the meat trade, but they can not prevent them accepting and keeping the present. They can admit cattle on the hoof free of duty, but there the power of Congress ends. They can discourage the American farmer and induce him to get rid of his sheep, but they can not get him to start up again. The wheat grower who has a nice old time producing wheat that will pay a profit of $6 to $10 an acre under present circumstances can easily be induced to quit raising wheat, but when Argentina and Canadian wheats come in on top of a good crop here and the market becomes demoralized for the time being, then look out for the farmer forgetting to sow the usual crop of wheat in this country.

Congress can do much damage, but can not heal the sores again. People in the United States are not going to prosper on the money that goes to Australia for wool, or on the money that goes to Canada for wheat, or on the money that goes to Argentina for beef. We prosper on the money that is paid to our own people. It goes out and it comes back again. It gets into circulation. But the money that is sent abroad remains there, and our exports are not any larger from that source of revenue.

The farm productions of this country are ample for all purposes. One-half of the time our grain productions sell at prices that barely return the cost of production. There has never yet been a time when there was a bonanza in grain growing. Through years of low prices and sacrifice cattle have for once reached what may be called high prices, but only because of the changes that on the one hand have destroyed cattle ranges, but the cattle ranges cut up into farms have not yet produced the maximum of beef. Year in and year out farm productions bring moderate prices, and the burdens of the consumer are not caused by the wholesale cost of anything the farmer raises.

We have no hesitancy in saying as our editorial opinion that the admission of farm products free of duty from other countries will gradually undermine the productive industries of this country. The change will not take place in a day, but we will soon be in the position of a family when the head of it gambles his earnings away instead of taking the money home to his wife. Industrial enterprises will be in difficulties, for the reason that trade will be dull and wages high. Less people will be employed and many industries will be at a standstill. The farmer will be able to feed himself, but he will find himself short of money; he will practice economy and produce crops that cost the least for seed and the least cost for labor.

Farmers will remember that Canada saved us from the acts of our own Congress, so far as the bogus reciprocity bill was concerned, but we can not expect to have Canadians refuse free trade when they are still able to conduct their own protective system. We can not expect much assistance from manufacturers who are protectionists, because they are usually protectionists for themselves alone; and we can not expect much help from anyone unless we do the work ourselves. Congress will finally have to accept responsibility for its acts, but that is away off. When great injury is done and can not be undone, it is poor satisfaction to fix the blame, and that is all the recourse we will have.

In another column will be found an article entitled "Our industrial policy." If every farmer who is interested in this subject will address a Congressman and a Senator indorsing this policy, it will be harder and harder to get a bill through Congress that will do away with the protective policy of the Government, so far as the farming interest is concerned.

The Tariff.

SPEECH
OF
HON. LADISLAS LAZARO,
OF LOUISIANA,
IN THE HOUSE OF REPRESENTATIVES,
Monday, April 28, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. LAZARO. Mr. Speaker, in arising to speak against the bill now under consideration, it may be proper for me to state in the beginning that I was compelled to avail myself of the rule of the Democratic caucus, which permits a Member to refuse to be bound on any question where he, previous to election, had made contrary pledges, or where he had received contrary instructions from his nominating authority; and not only having made pledges and received contrary instructions, but believing, as I do, that this bill in its present form will cripple or destroy the chief farming industries of my section, there was and is no other honorable course for me to pursue.

The people of my section are Democrats, and the history of my State is a sufficient answer to anyone seeking to question our Democracy. The people of Louisiana believed, as I believe they had a right, that the plank in the Baltimore platform which promised and declared that the legislation to carry out the principles advocated by the party should not injure or destroy

legitimate industry was a sufficient guaranty to them that the party they were helping to place in power and with which they had always affiliated would not deal the staggering blow contained in this bill to the main industries of our State.

Now, gentlemen, feeling that you want to do what is fair and just to all interests in this revision of the tariff, I wish to call your attention in particular to the rice schedule of this bill.

I will first take up the rice-flour or rice-meal schedule. The present tariff rate is one-fourth cent per pound; the rate proposed in this Underwood bill is one-eighth cent per pound, or a reduction of 50 per cent in the present rate. This is a grade of rice or by-product that is made in the milling process and consists of fine, broken particles about the size of corn grits. This grade is unsuitable for table purposes. The proportion of this grade of rice, made from millings of rough rice in this country, ranges from 6 per cent to 15 per cent, an average of 10 per cent, depending on the hardness of the grain and the value of the broken rice on the market. When the clean-rice market is low a larger per cent of the rice milled is thrown into the broken grades. Rice flour or meal, being undesirable for bread-making purposes, is unknown to the grocer's trade. The greater portion of the rice flour or meal imported into this country comes from Germany, where the largest rice mills in the world are located. There was imported into this country during the fiscal year ending June 30, 1912, 132,116,821 pounds, and we produced in this country less than half that much.

Now, if the manufacturers of this country are not asking a reduction in the tariff on this grade, as I am told they are not, and as they could be the only beneficiaries outside of the German and foreign millers, why, I ask, the reduction of one-eighth cent per pound be made? If the proposed reduction stands, it will cause the mills of this country to sell their broken rice at one-eighth cent per pound less than at present rates, as the foreign broken-rice market would set the price on our market, we having to sell our rice at less than the foreign broken in order to get the business. This will be readily understood when you realize that it is a fact that freights to the Atlantic seaboard ports from the rice belt of this country are about three times that of the rate from European and continental ports to the same markets; that is to say, rates from German ports to New York are about 9 to 11 cents per 100 pounds and from the mills in Louisiana, Texas, and Arkansas it is from 28 to 30 cents per 100 pounds. Now, why should this reduction in the tariff be made in face of the fact that it will cause a loss of Government revenue, will do no one in this country any good, save and except that the brewers will be enabled to buy their products for one-eighth cent per pound less than at present, at the loss of the farmer and miller who are engaged in this industry?

Let us now take up the unclean rice schedule.

The present tariff rates on this grade of rice are 1¼ cents per pound, and the proposed rate in this Underwood bill is five-eighths cent per pound, or, again, another reduction of 50 per cent.

This grade of rice is being imported largely on the Pacific coast at the present rate of duty and several mills have been erected along the coast to mill the rice, and they are now supplying fully 50 per cent of the trade of that section of the country with imported rice, to the exclusion of the rice belt of Louisiana, Texas, and Arkansas. This for the reason that the freight rates from the rice belt of the United States to the Pacific coast is 60 cents per 100 pounds, while the rates from Japan and China are only from 15 to 20 cents per 100 pounds.

If the rates on this grade of rice—tariff rates, I mean—are reduced to five-eighths cent per pound, I feel sure that it will only be a short while before the foreign rice mills exclude our domestic product from the Pacific coast markets as well as the markets along the Atlantic coast and Porto Rico. I therefore feel that if it is the declared policy of the administration to make a reduction, that the reduction on this grade under no circumstances should exceed a reduction of 25 per cent from the present rates. In fact, no reduction at all is needed.

The rough-rice schedule: This proposed bill makes a reduction of 50 per cent in the present rates. The same argument and logic which applies against the reduction in clean rice applies with equal force to this grade. On account of the cheapness of transportation, in years of plenty Asia, Japan, and China, where rice is produced with the cheapest of pauper labor, would use this country as a dumping ground and ruin our domestic industry, which is in the hands of white farmers, accustomed to live like Americans and who pay American wages.

I will now take up the clean-rice schedule. The present rate is 2 cents per pound, and the proposed rate in this Underwood bill is 1 cent per pound. This reduction will affect the industry most seriously for the reason that the freight rates from the rice belt of the United States to the large consuming markets of the country are from three to five times that from foreign countries. As an illustration: Rates from interior points to New York, where 750,000 barrels are consumed and distributed, are 30 cents per 100 pounds, and from foreign points it is only 15 to 20 cents per hundred pounds, and other points are in the same proportion.

Thus you will readily see that it will take a large proportion of our preferential tariff to offset the difference in freight rates; and if it were not for the fact that we grow in this country the finest rice in the world I believe that we would lose all the trade on both the Atlantic and Pacific coasts. But while we grow the finest rice in the world, we also grow some low-grade rice, because the continuous cultivation of rice land causes deterioration, and no other crop will rotate successfully on rice land. The crop is depreciated by red or wild rice, water-weed seeds, and is often damaged in the field at harvest time by rains. Now, this red, damaged, or seedy rice can not be sold in this country profitably, and we have no market for it except in Porto Rico. Before we had Porto Rico as a market these low grades of rice had been so cheap that it would not pay its freight to market, and my information is that some farmers who shipped these low grades of rice to market were called upon to remit the balance due for freight. This condition, however, has never existed since we have Porto Rico as a market, as the people there have been used to eating the low grades of rice from the Orient and have for some time been taking our low grades at fair prices; but bear in mind, these low-grade rices of the Orient are only worth from $1.65 to $1.85 per hundred pound f. o. b. German and European ports, and freight rates being about 10 cents per 100 pounds to Porto Rico we would have this proposition to compete with:

Cost of rice in German ports	$1.75
Freight to Porto Rico	.10
Duty	1.00
Total	2.85

This means that we would only get that amount for our rices in Porto Rico, less freight from milling points, and which is about 40 cents per hundred pounds from interior milling points in Louisiana, Texas, and Arkansas to Porto Rico, or, say, $2.45 for 100 pounds of clean rice, and which would mean about $1.75 per barrel, or 50 cents per bushel, for rough rice to the American farmer, and which would be a loss to him on present conditions of from $8 to $12 per acre, depending upon the kind of rice he grew.

We therefore, Mr. Speaker, feel that with the proposed reductions in this Underwood bill our rice farmers and millers in Louisiana, Texas, and Arkansas will be completely put out of business and this legitimate agricultural industry destroyed, with an almost total loss of all that is invested in lands, implements, canals, ditches, levees, and mills; and all this, Mr. Speaker, with a loss of revenue to the Government and without benefit to the consumer.

Now, Mr. Speaker, as I said in the beginning, I come from a section that has politically always been Democratic, and it is the understanding of my people that the Baltimore platform stood, and stands to-day, for a revision downward without injury or destruction to a single legitimate industry. The party platform and the campaign speeches of our standard bearers lulled our folks into the belief that the radical reductions and free list were to be for those trust-controlled articles and products that are sold cheaper abroad than to the consumer at home. In all frankness, my fellow Democrats, I fail to catch the drift of the logic in the proposition of placing everything that the farmer raises on practically a free list and everything that he has to buy remains on a practically protected list.

The cultivation of rice in this country under the present duty has helped to develop the section where it is raised; it has in my section made good the hope and cry of "back to the farm"; it has developed and fostered prosperous little communities where before nothing but cattle grazed; it has brought to us newcomers, settlers from the East and the West, and now prosperous villages and towns, churches, and schools veritably dot the rice section of my State. This industry has increased the value of our heretofore cheap prairie land from $2.50 to $30 and $45 per acre; it has increased the production and widened the consumption of this staple food and brought about an actual reduction in the price to the consumer.

Rice is essentially a small farmer's crop, and the industry is entirely in the hands of white farmers. Its cultivation should be encouraged and not discouraged. Its value as food for the human race is beyond question, and there are lands enough susceptible of its cultivation to make this Nation produce enough rice to supply any possible home needs that may be developed. But this reduction of 50 per cent is going to prove the ruin and disaster of this growing industry, which is the

mainstay and foundation upon which rests the business interest of my section and upon which it depends. And why is this to be done? To benefit the consumer? Why, my friends, when the rice produced by the pauper labor of the Orient has been dumped upon our shores in sufficient quantities to drive out and ruin the domestic industry, and when there will be no home-grown rice to compete with on the American market, the imported rice of the Orient will be controlled by trusts and combinations, and the poor American consumer will pay a higher price for this staple food. This radical reduction will not benefit the laboring man, the mechanic, or artisan of the large cities, for the simple reason that the high prices paid by them for the produce of the farm is not occasioned by the price received by the farmer, but, on the contrary, these high charges are made by the agents of transportation and the middle men. The farmer who furnishes the raw material to feed and clothe the Nation receives only 25 per cent of the price paid by the consumer, while the transportation companies and the middle men receive the other 75 per cent. You, my fellow Democrats, know this to be so; and if so, why are we undertaking to pass a measure which will ruin the farming people of a whole section of our country?

As a compromise, I endeavored to have the rice schedules amended, so as to make the reduction on the present duty 25 per cent instead of 50 per cent, as provided for in this bill, but you, my fellow Democrats, would not listen to any such suggestion, and to-day, in face of the fact that I hail from a State that is always found in the Democratic column, I find myself placed in the awkward position of having, in obedience to the overwhelming sentiment of the Democrats of my district, to announce that I will have to vote against this Underwood bill if it stays in its present shape.

The Tariff.

SPEECH
OF
HON. LUIS M. RIVERA,
OF PORTO RICO,
IN THE HOUSE OF REPRESENTATIVES,

Monday, April 28, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. RIVERA. Mr. Speaker, in the debate on this bill, the ablest orators of this House have adduced all the arguments existing in favor and against a substantial reduction of the present tariff rates. I am aware of the fact that it leads to no practical end to further discuss policies which have been agreed upon by the majority in its caucuses. I am likewise convinced that the tariff bill will be passed by the House and sent to the other side of the Capitol as it was presented to us, and that it will become a law by force of the greater number and the mandate of the people, who voted last November for a downward revision of the tariff, from which great benefits are expected.

But, although considering my remarks on this matter of no favorable consequences whatever, it is my duty to voice on the floor of this House the views of my countrymen and to enter their protest against a measure which, in a short period of time, will deprive them of their prosperity, that has already created considerable alarm to business, and that will eventually cause an unavoidable commercial crisis.

The exports of Porto Rico amounted in 1912 to $49,705,413. Out of this total sum $31,544,063 came from sugar, or nearly two-thirds of all the external sales. Porto Rican sugar comes into the United States free of duty and enjoys, in competition with the Cuban product, an advantage of $1.34 per hundred pounds. This premium has served as an incentive to the cultivation of the sugar cane and the establishment of mills. Take it away and you will make impossible even to cover the cost of production. The island's prosperity, attained through 14 years of untiring energy and hard work, will wholly disappear by that single blow, with no hope of it ever appearing again. I maintain most firmly that by putting sugar on the free list the American Congress will enact the ruin of Porto Rico; that is to say, of a million two hundred thousand people who have not even the right to vote in the decision of matters greatly affecting their future welfare.

But even face to face with such a grave situation as this we Porto Ricans would not protest if, after all, the injury done to our products were counterbalanced by benefits to be received by our consumers. Last year we shipped into the United States 367,000 tons of sugar, or 807,400,000 pounds. At $1.34 per 100 pounds, the protection that would be taken away would amount to $10,819,016. And, on the other hand, all products of national industries being shipped into Porto Rico will remain highly protected. The protection upon goods bought by Porto Rico from the United States, about $37,000,000 annually, would have amounted to over $14,000,000 had the tariff duties been collected. Admitting that the prospective tariff rates will cause a reduction of 30 per cent upon the preceding figures, we will as yet continue to contribute $9,000,000 of protection to American industry and agriculture. Our agriculture and industry would receive no due or equivalent compensation, as tobacco and fruits alone would remain protected, with coffee already on the free list. The exports from these products amounted in 1912 to—

Tobacco	$7,406,841
Fruits	2,377,762

The protection in our favor on the above exports did not amount to $3,000,000. And it may be deduced from the foregoing facts that the protection afforded articles Porto Rico buys in the United States will be by $6,000,000 greater than the protection given to products the United States buys from Porto Rico. This would be a great injustice, which the American Congress should not allow, and which it is not in our power to prevent.

Porto Rico would not claim, even in the case of its financial doom, unfair concessions. If Congress desires to reduce the price on articles mostly consumed by the poor classes, well and good. It will do it with our hearty applause. But at the time that sugar is placed on the free list, let rice, codfish, cotton goods, wood, glass, chinaware, hides and shoes, meats, lard and butter, potatoes, beans, jute sacks, canned goods, cereals, live animals, agricultural implements be placed on the free list as well. And by so doing, and in what regards us, a balance will be established in what we will lose and what we will gain when this bill becomes a law and is extended to our island.

Free trade would injure the Porto Rican producer, but would benefit the insular consumer. The Porto Ricans would, indeed, earn much less, but they would have to spend much less for their necessaries, and they would not remain condemned to the dreadful need of having to sell very cheap that which they export to the United States and buy at high prices that which the island imports from the United States. We do not ask Congress to sacrifice national interests to the interests of Porto Rico. But Congress will not wish either to sacrifice the interests of the island to those of the Nation. Since American occupation in 1898 my country has been complaining of its political status.

By artful excuses the Republican Party has refused to recognize the right of my countrymen to govern themselves. We are in America the only people not exercising an absolute sovereignty over the land on which they were born, on which they live, and on which they toil. We were greatly rejoiced over the victory of the Democratic Party. It constitutes our last hope. But we will consider it a great misfortune that the first law enacted by a Democratic Congress and supported by a Democratic President should destroy our only motives of satisfaction at present—our agricultural and commercial prosperity, and the producing and consuming capacity of the people that allows them to proceed on the way of progress, to increase the number of schools, to build public highways, to beautify the cities, and to increase the rate of wages in shops and farms.

Seven hundred thousand Porto Ricans depend upon the sugar industry. Once this industry has disappeared, as it is certain it will, nobody will be able to foresee the consequences that the crisis ensuing will entail. At the mere announcement that sugar would be placed on the free list, banks ceased to give credit, business is at a standstill, prices on land have gone down, and it may be conservatively estimated that a loss of over $20,000,000 has already been sustained. An earthquake as that of San Francisco, or a flood as that of Indiana and Ohio, would be considered small calamities if compared with the one that Porto Rico will have to bear by the reduction in the present tariff rate on sugar. And, to the dissatisfaction felt on account of our sad political situation, there will be added the discontent from a poor financial condition.

Porto Rico sells to the United States about everything it produces and buys from the United States about everything it consumes. And, with the new tariff law in force, all its products with the exception of tobacco and fruits will remain unprotected. Tobacco is controlled by an American trust under the name of the Porto Rican-American Tobacco Co., while fruits are also practically controlled by American capital. American goods with a considerable margin of protection will have to be bought by the natives of the island, who will have

to meet competition in selling their products. In this wise the exports of the island will be placed at a disadvantage, while the imports to the island will gain some advantages. This would be an incredible though an undeniable fact. Were I asked a remedy to this situation, I would suggest one of the following three: To declare Porto Rico a free port, doing away with customhouses and tariff duties; to grant the island a form of government identical to that established by England in her self-governing colonies, which have been given the power to pass tariff laws and to negotiate commercial treaties with other countries; or to give the island its national independence, with or without an American protectorate. Any one of these solutions might be adopted and established, but the country should not be condemned to a political inferiority contrary to the principles of democracy, and much less to an economical misery incompatible with the practices of Christian charity.

The Tariff.

EXTENSION OF REMARKS
OF
HON. WILLIAM W. GRIEST,
OF PENNSYLVANIA,
IN THE HOUSE OF REPRESENTATIVES,

Wednesday, April 30, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. GRIEST. Mr. Speaker, supplementary to my previous remarks relating to the tariff bill, I avail myself of this opportunity to extend in the RECORD certain data and protests in opposition to section 4, paragraph C, of the Underwood bill, providing for absolute free trade in cigars, tobacco, sugar, and rice between the Philippine Islands and the United States.

The tariff act of 1909 restricted the free importation of Philippine cigars to 150,000,000 cigars annually. During the first fiscal year there were imported 84,299,000 Philippine cigars; in 1911 the internal-revenue tax was paid on 27,804,743 and in 1912 on 72,843,780 cigars brought from the Philippine Islands. For the first eight months of 1913 the importation was about 70,000,000 of these cigars.

The director of labor of the Philippine Islands in the 1912 annual report speaks of the "future of the industries of the islands" and says that the sugar and tobacco industries, for example, "have developed in a marvelous manner" since a great market for these products has been opened in the United States.

Further official evidence of the growth of export trade from the Philippine Islands to the United States is found in the following statement from the annual report of the insular collector of customs for the fiscal year ended June 30, 1912, showing annual exportations of cigars.

Figures for each year since 1899 follow:

Cigars.

Fiscal years.	To all countries.		To United States, including Hawaii.	
	Quantity.	Average value per thousand.	Quantity.	Average value per thousand.
1899	167,991,000	$7.71	1,810,000	$3.96
1900	219,008,000	5.43	532,000	3.54
1901	149,496,000	8.36	1,335,000	3.76
1902	225,420,000	7.39	464,000	18.40
1903	119,721,000	7.91	332,000	11.64
1904	104,803,000	9.24	96,000	18.70
1905	105,571,000	9.08	728,000	5.33
1906	93,136,000	9.71	1,288,000	18.17
1907	116,710,000	9.01	1,593,000	16.36
1908	117,564,000	9.22	1,365,000	15.96
1909	116,278,000	9.32	2,696,000	16.25
1910	196,192,000	15.16	88,181,000	22.60
1911	132,217,000	12.86	27,936,000	25.70
1912	175,320,000	15.17	71,973,000	22.50

Confirmatory of that report, there appears in the Daily Consular and Trade Report, issued by the Department of Commerce on April 26, 1913, the following paragraph in a report on the "Foreign trade of the Philippine Islands":

CIGAR EXPORTS SHOW PROMISING GAINS.

The figures for the exports of cigars during the period under consideration are encouraging, showing as they do an increase of 37 per cent over those for the corresponding months of the preceding fiscal year—$1,605,123, as against $1,173,120. The average price also shows an upward tendency, being $16.80 per thousand, as compared with $15.17 for the fiscal year 1912. The grades exported to the United States run considerably higher. If the present rate of progress is maintained, the total exports to all countries during the whole of the present fiscal year will approach 150,000,000 in number. Exports of cigars to the United States increased during the fiscal year 1912 much more rapidly than the general exports of that commodity, since the market was recovering from the reaction that followed the expansion of 1910, and it is not easy to say exactly to what extent this rapidity of increase is likely to continue. If it does continue, even in part, the figures at the end of the current fiscal year should show a marked increase, although the total number exported to the United States is likely to continue for the present to fall considerably short of the maximum admitted duty-free under the tariff of 1909. The figure for the whole of the current year may, however, possibly surpass the record of 86,500,000, or 57.7 per cent of the duty-free maximum, set in 1910.

This official report of "foreign trade" clearly states causes which have justified the cigar-tobacco people of the United States in protesting against absolute and unlimited free trade in Philippine cigars and tobacco.

With the permission of the House, I insert in the RECORD the following communications, which illustrate a few of the many telegrams, letters, and resolutions I have received protesting against the passage of the pending tariff bill:

LANCASTER, PA.

Hon. W. W. GRIEST,
House of Representatives, Washington, D. C.:

At an informal meeting in Lancaster Township of 75 farmers an emphatic protest was voiced against free tobacco from the Philippines. Tariff removed from tobacco will jeopardize the welfare of the tobacco industry in the United States, and would be especially detrimental to the farmers of Lancaster County.

JOHN H. SHANK, *President.*

LANCASTER, PA., *April 14, 1913.*

To the honorable Committee on Ways and Means.

GENTLEMEN: We, the members of Cigar Makers' Union No. 257, of Lancaster, Pa., in meeting assembled, adopted the following resolution:

Whereas the section of the tariff bill (H. R. 10) which provides that all articles the growth or product of or manufactured in the Philippine Islands from materials the growth or product of the Philippine Islands or of the United States, or of both, or which do not contain foreign material to the value of more than 50 per centum of their total value, or 20 per centum in case of manufactures of tobacco upon which no drawback of customs duties has been allowed thereon coming into the United States from the Philippine Islands, shall hereafter be admitted free of duty;

Whereas the above section inserted into a tariff law which has for its purpose the destruction of monopoly and unfair competition in business can not be considered by the general public anything short of special privilege when it is a known fact for years that certain large cigar and tobacco firms have endeavored to get free trade upon manufactured articles made in the Philippine Islands for the sole object of utilizing and exploiting the cheap labor for their own aggrandizement;

Whereas no place in the world are cigars and tobacco produced as cheap as on these islands, and under such insanitary conditions, making their product a menace to the health of our citizens;

Whereas nothing, in our mind, could be more contrary to Democratic Party pledges than to allow one imported article have advantage over others of the same kind to benefit a particular interest: Therefore be it

Resolved, That we, the members of Cigar Makers' Union No. 257, numbering 350 working men and women, earnestly and respectfully protest against any lowering of the tariff rates with the Philippine Islands below that of any other foreign country.

HARRY TILLBROOK, *President.*
S. B. DUKE, *Secretary.*

Similar resolutions have been adopted by local cigar makers' organizations, including Union No. 301, of Akron, Pa.; No. 161, of Denver, Pa.; No. 12, of Oneida, N. Y.; No. 42, of Hartford, Conn.; No. 33, of Indianapolis, Ind.; local unions of New York City, N. Y., and Chicago, Ill.; Rhode Island State Branch 94; Union No. 132, of Brooklyn, N. Y.; and many others.

A PROTEST AGAINST UNLIMITED FREE TRADE WITH THE PHILIPPINE ISLANDS.

CIGAR MAKERS' INTERNATIONAL UNION OF AMERICA.

At a convention of the Cigar Makers' International Union held September, 1912, a resolution was unanimously adopted by the 400 delegates protesting against the importation of cigars duty free from the Philippine Islands and instructing the president to protest to the proper Federal authorities and to the Congress of the United States against such free importation of cigars duty free from the Philippine Islands, which resolution went to popular vote under the referendum and was practically unanimously adopted. Out of a possible 48,457 votes only 186 votes were cast against the resolution.

In compliance with such instructions and in behalf of the Cigar Makers' International Union, we earnestly protest against the proposition of the Committee on Ways and Means which provides for absolute free trade in cigars with the Philippine Islands for the following reasons: The bill not only permits cigars manufactured in the Philippine Islands to come in duty free, but it permits such cigars to contain 20 per cent foreign material. This means that a manufacturer in the Philippine Islands can put in the cigars a combination of American tobacco, Philippine tobacco, and 20 per cent of Havana tobacco, and would give the Philippine cigar manufacturers an unfair and undue advantage over the American manufacturers and be a consequent detriment to American working men and women.

The importation of cigars from the Philippine Islands under the present law has steadily increased. We hold that if Congress gives the Philippine cigars free access, without restraint or limit, to the markets of this country that the American Tobacco Co., which, despite the alleged dissolution acts, is just as effective as it ever was, would immediately establish large factories in the Philippine Islands and continue the manufacture of cigars there on a scale that would seriously interfere with the industry in this country proper. This is not an idle

statement. When Porto Rico was annexed and given free access to the markets of this country the trust immediately proceeded to obtain control not only of the cigar industry but also of the leaf or raw material of Porto Rico, so that to-day they practically control at the very least 80 per cent of the cigar industry of that island. In one year 1,250 cigar factories have gone out of business and thousands of American cigar makers have suffered in employment in this country. The trust, with its exceedingly large capital, will do precisely the same thing in so far as the Philippine Islands are concerned if this bill passes and an opportunity is thus given them to do so.

The proposition of the Committee on Ways and Means we unhesitatingly say is favorable to the trust and strengthens its hand and assists it to more quickly stamp out competition of the independents and to establish an absolute monopoly in the cigar and tobacco industry, though probably not so intended. The Tobacco Trust controls fully 85 per cent of the smoking and chewing tobacco, snuff, cigarettes, and little cigars in this country. It controls 80 per cent, if not more, of the cigar industry of Porto Rico, and it controls fully, if not more than, 75 per cent of the imported cigars coming from Cuba.

We earnestly protest against giving them an opportunity to further strengthen their straogle hold upon the independents by giving them the Philippine Islands, which they will exploit for the benefit of the trust and to the detriment of independent manufacturers, of working men and women, of the Federal Government, and of society at large.

The notion that American workingmen can compete with oriental, the cheapest labor in the world, of the Philippine Islands is absurd and preposterous and absolutely out of the question. The wage paid for making cigars in the Philippine Islands is less than one-fourth of the wages received by cigar makers in the United States. In the third annual report of the bureau of labor of the Philippine Islands, page 15, issued 1912, it officially states that wages of 11,300 cigar makers in the Philippine Islands in 53 factories were P193 annually, or about $96.50 American money, or 30 cents per hour, while the average wages of the cigar makers in this country are at least $1.50 a day, which includes the unorganized as well as the organized. I estimate that the average wages of the union cigar makers is at least $2 per day, and, as a matter of fact, that is pretty nearly the minimum wage, and it ranges from that sum to as high as $5 per day.

The question of transportation should not be lost sight of. A thousand cigars can be shipped from the Atlantic coast to Chicago for about 10 cents, and from coast to coast for about 18 cents or 20 cents. A thousand cigars, the wholesale price of which would be $100, weighs about 27 pounds. The question of transportation then is not a factor, as because of the lightness of the commodity it can be transported at a negligible cost. There are thousands of Chinese and Japs, which with the Filipinos are very apt learners, especially in the cigar industry, as they prefer factory to field work, and the cigar-producing capacity of the Islands can be reduced and brought up to any number in a very short time, and this, we assert, without fear of successful contradiction, will surely occur if you give them free access to this country. It is claimed that one-third of the population of Manila is Chinese. If the product of this oriental cheap labor comes into this country the result will be ruinous to the industry here, and would in a measure impair and partly nullify the Chinese exclusion act. The cigar industry in this country pays the Federal Government in internal taxes alone about $22,000,000 annually, and when we include the tobacco trade, which includes cigars, cigarettes, snuff, and manufactured tobacco, it contributed for the fiscal year ending June 30, 1912, $70,500,000. There are employed at cigar making, not counting those engaged in making smoking and chewing tobacco, etc., about 136,000 people, of whom about 110,000 are skilled workers and wage earners, who are directly and indirectly taxpayers and contributors to the maintenance of our Government, while, on the other hand, the Filipinos do not contribute a cent to the maintenance of our institutions.

The aggregate wages paid to cigar makers is $50,000,000 annually. The wholesale value of the output of cigars is about $350,000,000 annually. It ranks about the twelfth in the value of its output among the great industries of our country. The cigar and tobacco industry has always been taxed through custom duties and internal-revenue tax. It as a consequence is extremely sensitive to hostile legislation. During the last fiscal year over 1,250 small cigar manufacturers have been forced out of business. The union cigar maker receives from $7 to $12 per thousand for making the 5-cent cigar, and from $12 to $18 per thousand for making the 10-cent cigar, and from $18 to $50 per thousand for making the clear Havana cigars, or the two for a quarter and more expensive kind.

Under the present law, which limits the importation of cigars from the Philippine Islands duty free to 150,000,000 annually, the importation jumped from 22,900,000 in 1911 to 72,800,000 cigars in 1912.

From information received from the Insular Bureau of the War Department, we find for the first eight months of this fiscal year 65,000,000 cigars were sent here from the Philippine Islands.

Under the economic conditions prevailing here the allowance of 150,000,000 duty free per annum is more than fair to the Filipinos. Given an unrestricted free market in this country and the Cigar and Tobacco Trust will be enabled to increase the amount produced there and sent here and disposed of through its chain of stores to an extent that will be disastrous to American manufacturers and American working men and women. Owing to climate and the bounties of nature the Filipino lives very cheaply. Clothing is of the cheapest kind; he has no expensive rent to pay, no fuel to purchase, while he has self-sustaining food growing in abundance. We, on the other hand, must buy food, fuel, pay high rent, buy more expensive clothing, and with the always increasing cost of living we find the effort to sustain home, family, and life always equal to our income. We earnestly protest against being pitted against oriental labor—the cheapest labor in the world—in our struggle for existence. We protest against the proposed changes in extending the amount of free importation of cigars from the Philippine Islands.

Yours, respectfully,

G. W. PERKINS,
International President.

The Cigar Makers' International Union of America further voice their protest by the issuance of the following statement, a copy of which was given me by a representative of their organization. This document gives emphasis to the injustice of the proposed enactment:

MONGOLIAN AND ASIATIC COOLIES V. ORGANIZED LABOR IN THE UNITED STATES OF AMERICA.

One section of the tariff proposes absolute free trade in cigars imported from the Philippine Islands.

First Annual Report of the Department of Commerce and Labor, page 152, cigar makers' average daily wages in the Provinces are, in pesos, 0.74, equal to 37 cents in United States currency.

Province.	Pesos.	Cents.
Occidental Negros	0.17	8½
Cebu	.78	39
Cayagan	1.47	73½

Third Annual Report of the Bureau of Labor, page 15, states: Fifty-three cigar and cigarette factories paid in wages P2,183,049; average wages per annum, P193, equal to $93.50 in United States currency—less than $2 a week.

The total number of workers employed was as follows:

Males	5,166
Females	5,143
Boys (under 16)	425
Girls (under 16)	566
Total	11,300

The average number of hours of work reported ranged from 10 to 12 hours per day.

In the United States and in the Philippines cigars are made by hand labor. All attempts to supplant it by machine production within the last 50 years have failed.

For eight months of the fiscal year we received from the Philippine Islands 65,000,000 cigars free of duty.

Unlimited free trade will enable the European and American tobacco trusts to locate factories in the islands and swamp us with the Asiatic product.

One-half of the cigar factories in Manila are owned by Chinese coolies. Is this a fair "competitive tariff"?

—

S. R. MOSS CIGAR CO.,
Lancaster, Pa., April 12, 1913.

Hon. W. W. GRIEST,
House of Representatives, Washington, D. C.

DEAR SIR: Answering your kind favor of the 8th relative to the tariff bill, H. R. 10, we wish to impress upon you that if this bill should pass Congress in the shape in which it is now it would mean a complete paralyzation of the cigar-manufacturing industry of the United States. You well know that the price of labor in the Philippines is far below the rate in the United States, and, owing to this alone, if the above bill should become a law the Philippine manufacturers could import Sumatra wrapper and Havana filler and use these tobaccos on their product, send same into the United States free of duty, and sell the goods from five to ten dollars per thousand less than the domestic manufacturers. In addition, the importation of enormous quantities of Philippine cigars with the tobaccos above referred to would mean decreased output of the American manufacturers, and consequently would throw out of employment thousands of cigar makers, helpers, and other people employed in manufacturing in the United States. Were this bill to become a law we feel that our business would be ruined from stem to stern, all our investments in plants, etc., would practically be worthless, and the business which we have built up in 30 years or more would practically amount to nothing and be destroyed. We consequently would thank you to oppose in every way, shape, and manner the passage of this bill, and whatever efforts you make in our behalf will be very much appreciated.

Thanking you for giving us the information on this subject, we are, with kindest regards,

Very truly, yours,

S. R. MOSS CIGAR CO.,
H. J. RYDER, *Secretary.*

—

THE LANCASTER LEAF TOBACCO BOARD OF TRADE,
Lancaster, Pa., April 16, 1913.

Hon. W. W. GRIEST,
House of Representatives, Washington, D. C.:

Permit us to call your attention to the following resolutions adopted by the Lancaster Leaf Tobacco Board of Trade at a special meeting called to consider certain passages of the Underwood tariff bill:

Whereas the Underwood tariff bill now in the House of Representatives provides that all tobacco grown in the Philippine Islands, together with such manufactured tobacco and tobacco products as shall contain not in excess of 20 per cent in value of any foreign type of tobacco not grown in the Philippines or the United States, shall be allowed to be brought into the United States free of duty; and

Whereas the cost of labor to the grower as well as to the manufacturer in the Philippine Islands is less than 10 per cent of the cost of labor in the United States; and

Whereas the provision permitting the Philippine manufacturer to use up to 20 per cent in value of any class of foreign tobacco will enable them to manufacture a cigar that will appeal to the taste of the smoker in the United States: Therefore be it

Resolved, That we, the Lancaster Leaf Tobacco Board of Trade, in special meeting assembled on April 12, 1913, declare it to be our opinion that if this bill is permitted to become a law it will mean the ruination of our domestic tobacco and cigar industries in their manifold branches.

It will not only close our cigar factories and throw out of employment a vast army of cigar makers, but it will render the growth of tobacco unprofitable to our farmers and destroy the market for one of the very important products of our soil.

It will enable the large corporate interests to profit abnormally at the expense of total and permanent annihilation of thousands of small manufacturers, dealers, and growers.

In view of the above conclusion, we vehemently protest against the passage of this section of House of Representatives bill No. 10 and urge upon the Senate and House of Representatives the necessity of amending this bill, so as to embody the same provisions with reference to Philippine tobacco and cigars as is embodied in the present tariff schedule.

Respectfully submitted.

HERBERT P. TAYLOR,
President.
Hon. A. B. HESS,
I. H. WEAVER,
LOUIS A. KRAMER,
Committee.

I. H. WEAVER,
PACKER OF LEAF TOBACCO,
Lancaster, Pa., April 9, 1913.

Hon. W. W. GRIEST, *Washington, D. C.*

MY DEAR MR. GRIEST: Your very kind letter of the 8th instant received, and in answer thereto will say that the Democratic tariff bill introduced in Congress Monday (H. R. 10) which I understand includes a section that provides for the free admission into this country of Philippine cigars and tobacco. If this is a fact, I fear the death knell to our cigar and tobacco industry is near at hand. In many parts of these United States the leaf-tobacco business is gradually and permanently dying out, and has been doing so for the last few years. In our own county—Lancaster—there never was such a deplorable condition existing in the leaf-tobacco business as there is to-day. Farmers can hardly sell their tobacco at all, and those that can sell can not get near the first cost of production for their crops grown last summer This you no doubt know to be a fact without me telling you so. You also know that Lancaster County leaf-tobacco dealers are carrying thousands and thousands of cases of good old Pennsylvania tobacco which they can not dispose of at all. One of the reasons for this is that the new Cantrill bill which Congress passed nearly a year ago did more harm to the Pennsylvania tobacco industry than to any other leaf-tobacco industry in the United States, for the reason that it revealed to the world that there was more surplus Pennsylvania tobacco on hand than any other cigar-leaf tobacco grown in the United States. Consequently the world now knows this, and those who were at that time and are now large holders of Pennsylvania tobacco have suffered and will suffer a greater loss than the average Congressman or Senator of the United States will ever know. The trusts are the only ones that will have any advantage of that bill, because it revealed to them just what they wanted to know, and therefore will eventually put them in a position to buy Pennsylvania tobacco at their own price, and if on top of this cigars would come in free from other countries, why should manufacturers buy United States cigar-leaf tobacco for manufacturing cigars, as it may be very soon that our own country will be flooded with cigars and tobacco coming in from other countries?

Very truly, yours,

I. H. WEAVER.

—

THE CONNECTICUT TOBACCO CORPORATION,
Hartford, Conn., April 24, 1913.

Hon. W. W. GRIEST, M. C.,
Washington, D. C.

MY DEAR MR. GRIEST: In further reply to your letter of recent date, beg to say that I do not know of anything that the present Congress could do that would be more hurtful to the cigar-tobacco industry in all its branches than the passing of the present proposed Philippine schedule, and you may depend upon it that the tobacco interests in this section, in fact the entire cigar-tobacco interests of the country, will respond quickly to any arrangement that you may succeed in making in giving us a chance to appear before the Ways and Means Committee, or any work that it is possible for us to do in Washington, either before the committee or with individual Members of Congress. I think that the tobacco industry of the country made its position very clear on this point during the former administration. You can readily see that to open up absolute free trade with the Philippine Islands it will be a great incentive for the American Cigar Co. to go in there just as they have gone to Porto Rico, produce what tobacco they want, and manufacture the cigars with the cheap labor available on these islands, and within a few years, a very few years, we will find ourselves unable to produce the tobacco that will be salable in this country at a living price. It will certainly mean that within the next year or two we will have to reduce the wages of our people, and you know that it would be impossible for us to ever reduce wages sufficiently low to compete with the coolie labor that is available on the Philippine Islands. Of course we realize that it is going to be very hard to do anything with the present Congress, as free trade is one of their articles of faith, but it does seem to me that common honesty and justice would demand that they would consider very carefully a measure that is calculated to do a great amount of damage to a large industry of our home country that this measure would cause. I can only say that we appreciate anything that you may do in securing for us a hearing, or any suggestion you may make as to how we might proceed to get this matter clearly represented before the Members of Congress or before the Senate.

We are organizing to make a fight, in which fight the growers, dealers, manufacturers, and workmen will heartily join. In fact, every phase of the cigar industry will enter their earnest protest against the passage of this bill as now proposed.

If you will be good enough to advise us from time to time just what step we should take, we would appreciate it very much, and in the meantime I beg to remain,

Yours, sincerely,

MARCUS L. FLOYD.

The Tariff.

EXTENSION OF REMARKS
OF
HON. JOHN H. STEPHENS,
OF TEXAS,
IN THE HOUSE OF REPRESENTATIVES,
Thursday, May 1, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. STEPHENS of Texas. Mr. Speaker, the gentleman from Pennsylvania [Mr. MOORE] and other gentlemen on that side of the House have endeavored in this debate to show that this bill favors and is framed in the interest of the Southern States of this Union. This statement is without any foundation. The Democratic leader on this floor has very clearly shown that this charge is false in so far as it affects his State or district, and I desire to show that the statement is also false in so far as my district is concerned. My district is composed of 48 counties in northwest Texas. Sheep, cattle, and live-stock raising are our main industries. Our meats and our wool and our flour are our main articles of export. Our farmers feed the products of their farms mainly to cattle and hogs, and sell their meats and wool and hides on a free market, while they buy from the Northern States in a protected market all their manufactured supplies.

Mr. Speaker, our protective tariff Republican friends have for 50 years held power as a sectional party, and their main stock in trade has been to point in derision to the Southern States and their policies. The weak effort to resurrect from its silent resting place the old questions of sectional strife, only shows the desperate straits to which the standpat Republican Party have been driven by the voters of the United States. The Republican Party has had complete control of the Government for 16 years and the records of its various departments show that 90 per cent of Government employees belong to their party—although the civil service is supposed to protect Democratic employees and to give them an equal pro rata share of places, but this civil-service law has been a farce, a failure, and a fraud. Mr. Speaker, under Republican misrule a most unfair distribution of the Consular Service is shown from the official report of the Civil Service Commission. The following table shows the status, population, and representation in the National Congress and representation in the Consular Service, with salaries received:

States.	Population.	Senators.	Representatives.	Consuls.	Salaries.
Alabama	2,138,000	2	10	3	$6,500
Arizona	205,000	2	1		
Arkansas	1,575,000	2	7	1	1,000
Florida	751,000	2	4	3	2,000
Georgia	2,609,000	2	12	6	13,000
Louisiana	1,656,000	2	8	6	13,500
Mississippi	1,795,000	2	8	2	4,000
North Carolina	2,206,000	2	10	9	16,500
South Carolina	1,516,000	2	7	10	17,000
Texas	3,897,000	2	18	13	10,000
Virginia	2,062,000	2	10	16	22,000
Total (11)	20,412,000	22	95	69	105,000
Ohio	4,767,000	2	22	38	109,000

Thus it will be seen that Ohio, one of the Northern States, the home of the retiring President and the late President McKinley, representing one-twentieth of the population of the United States, one-fortieth of the United States Senate, and one-twentieth of the House of Representatives, has 38 representatives in the Consular Service drawing total salaries of $109,000, as against the 11 Southern States shown above, extending from the Atlantic to the Rio Grande, with more than one-fifth of the population, more than one-fourth of the Senators, and more than one-fifth of the Representatives, has only 69 representatives in the Consular Service, with total salaries of $105,000.

States.	Population.	Senators.	Representatives.	Consuls.	Salaries.
Alabama	2,138,000	2	10	3	$6,500
Arizona	205,000	2	1		
Arkansas	1,575,000	2	7	1	1,000
Florida	751,000	2	4	3	2,000
Mississippi	1,796,000	2	8	2	4,000
Total (5)	6,465,000	10	30	9	13,500
District of Columbia	331,000			24	72,000

The above table shows that the District of Columbia, with a population of only 331,000 and no Representative in the National Congress, has 24 representatives in the Consular Service, with total salaries of $72,000, while 5 Southern States, with a population of 6,500,000, 10 Senators, and 30 Congressmen, have only 9 in the Consular Service with total salaries of $13,500.

The inconsistency of civil service in consular appointments is shown by official figures obtained from the records of the State Department. There are in the Consular Service to-day, of the highest grades, ranging from $3,000 to $12,000 salaries, 98 consuls and consuls general who have never taken civil-service examinations, but were appointed purely as partisan political rewards, drawing a total salary of $428,000, and every one of them are Republicans.

From the records of the appointments, transfers, and promotions in the Consular Service from March 4, 1909, to December 20, 1912, it is shown that in every instance Republicans have been preferred. Whenever a promotion from consular agent to

consul or consul to consul general, or promotion by transfers have been made, the favored ones have been Republicans. There is only one Democrat in the Consular Service receiving as much as $4,000. There are two $12,000 posts, four $8,000, five $6,000, nine $5,500, five $5,000, sixteen $4,500, and numerous $4,000, $3,500, and $3,000 posts—all but one $4,000 held by Republicans, and that is civil service.

The following tables show the truth of the foregoing statements:

	Population.	Consuls.	Salaries.
Alabama	2,138,000	3	$6,500
Arizona	206,000	0	0
Arkansas	1,575,000	1	1,000
Florida	751,000	3	2,000
Georgia	2,609,000	6	13,000
Louisiana	1,656,000	6	13,500
Mississippi	1,797,000	2	4,000
North Carolina	2,206,000	9	16,500
South Carolina	1,515,000	10	17,000
Texas	3,897,000	13	10,000
Virginia	2,062,000	16	22,000
Total (11)	20,412,000	69	165,500
Ohio	4,767,000	38	109,000
Alabama	2,138,000	3	6,500
Arizona	205,000	0	0
Arkansas	1,575,000	1	1,000
Florida	751,000	3	2,000
Mississippi	1,797,000	2	4,000
Total (5)	6,466,000	9	13,500
District of Columbia	331,000	24	72,000

Consuls and salaries, by States.

	Consuls.	Salaries.
Alabama	3	$6,500
Arkansas	1	1,000
California	32	55,500
Colorado	4	6,000
Connecticut	12	14,000
Delaware	2	2,000
District of Columbia	24	72,000
Florida	3	2,000
Georgia	6	13,000
Hawaii	3	4,300
Idaho	1	4,000
Illinois	40	84,000
Indiana	21	34,500
Iowa	26	40,000
Kansas	8	7,000
Kentucky	6	13,000
Louisiana	6	13,500
Maine	13	22,000
Maryland	17	22,000
Massachusetts	37	72,800
Michigan	15	31,000
Minnesota	12	28,000
Mississippi	2	4,000
Missouri	14	37,000
Montana	3	5,000
Nebraska	7	13,000
New Hampshire	3	8,500
New Jersey	14	23,000
New Mexico	5	10,000
New York	89	82,000
North Carolina	9	16,500
North Dakota	2	8,500
Ohio	38	109,000
Oklahoma	5	7,600
Oregon	8	8,000
Pennsylvania	46	80,500
Rhode Island	7	9,000
South Carolina	10	17,000
South Dakota	4	8,500
Tennessee	9	25,500
Texas	13	10,000
Utah	2	4,000
Vermont	8	18,000
Virginia	16	22,000
Washington	5	10,700
West Virginia	5	16,000
Wisconsin	11	37,500

Mr. Speaker, these tables show that the gentleman's [Mr. MOORE] State, Pennsylvania, has 46 of these officers in the Consular Service, who receive a salary of $80,500, and that five of the Southern States, against whom he displays so much ill will, only have 9 of these consular places, with a combined salary of only $13,500. The gentleman seems to be greatly grieved because the people of the South will derive some benefit from a Democratic tariff bill.

The Payne-Aldrich Tariff Act that this bill repeals is filled with discriminations in favor of the eastern manufacturing States and against the southern and western agricultural States, and it grieves the soul of this and all other standpat Republicans to be forced to treat all men of all classes and all States and all sections alike, giving none the advantage over the others, and at the same time giving the toiling millions of wage earners in the East a free market basket and greatly reduced prices in the prime necessaries of life.

The Tariff.

SPEECH
OF
HON. WILLIAM M. CALDER,
OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

Monday, April 28, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. CALDER. Mr. Speaker, I take great pleasure in inserting in the RECORD the following letter from Hon. Charles B. Law, who was a Member in the Fifty-ninth, Sixtieth, and Sixty-first Congresses, and one of the ablest Representatives Brooklyn has ever had in the Congress of the United States.

His views on the Underwood tariff bill now pending are exceedingly interesting.

OFFICE OF THE SHERIFF OF KINGS COUNTY,
BOROUGH OF BROOKLYN,
New York City, N. Y., April 19, 1913.

Hon. WILLIAM M. CALDER,
House of Representatives, Washington, D. C.

DEAR SIR: The letter addressed to you by Mr. Julian D. Fairchild, and published in last evening's newspapers is a most interesting contribution to current literature on the tariff. It happens that you and I, as Members of the Sixty-first Congress, voted for the present tariff law largely upon the very grounds now advanced by the treasurer of the Kings County Democratic organization as reasons why there should be no radical changes in its provisions. We encountered fierce Democratic criticism by reason thereof.

Mr. Fairchild reminds us that the effect on trade and commerce of the old Wilson bill of 1893 was so disastrous that it had to be repealed, and then calls our attention to the very obvious fact that the proposed bill is even more drastice and destructive. He wants to know why we should try again the harmful kind of tariff we had in 1893, and asserts that the consequence of the proposed tariff law will be "commercial failures, business depression, and widespread suffering for labor." He believes that free sugar will not result in cheaper sugar, but that, on the contrary, the inevitable closing down of many of our beet-sugar plants will enable not only the foreign producer but the remaining domestic producers to increase prices coincident with the decreased supply, and that the only ultimate beneficiaries of free wool will be foreign sheep raisers and foreign woolen manufacturers with their cheap labor. Generally, he sees nothing but dire disaster in the provisions of the pending tariff bill. Hence, he would be very sorry to see this bill become a law, although he favors moderate reduction of import duties.

In my judgment, Mr. Fairchild's apprehensions are fully warranted, but they come too late. He did not speak while the matter was yet an issue. Mr. Fairchild is a Democrat, and supported the Democratic ticket last fall. He knows perfectly well that the campaign was conducted upon certain clearly defined issues and that the most prominent issue upon which the Democratic Party was swept into power was the tariff and its alleged responsibility for the high cost of living. The Democratic platform said:

"We declare it to be a fundamental principle of the Democratic Party that the Federal Government under the Constitution has no right or power to impose or collect tariff duties except for the purpose of revenue." * * *

Will Mr. Fairchild kindly inform us how "a moderate reduction of import duties" will constitute a compliance with this platform declaration?

Mr. Fairchild naively informs us that "this country is not now as well able to withstand unwise tariff legislation as it was in 1893." This is undoubtedly quite true, but Mr. Fairchild knows that the Democratic platform declaration in 1912, as above stated, is precisely the same as contained in the Democratic platform of 1892. He knew what he was voting for.

Mr. Fairchild makes the shockingly heretical suggestion that the high cost of living may not be due to the present tariff, but he overlooks the fact that in 1910, and again in 1912, the Democratic Party won by taking the affirmative of that proposition. The Democratic platform says:

"The Republican Party in its platform attempts to escape from responsibility for present conditions (high cost of living) by denying that they are due to a protective tariff. We take issue with them on this subject, and charge that excessive prices result in a large measure from the tariff laws enacted and maintained by the Republican Party." * * *

Mr. Fairchild utterly fails to realize that the Democratic Party swept the country in 1910 and again in 1912, first, upon the declaration made not merely in its platform but everywhere upon the stump that the present tariff laws were mainly responsible for the high cost of living; and, second, upon the promise to reduce the cost of living by reducing the tariff, coupled with the declaration concerning the unconstitutionality of protective duties. Is no attention whatever to be paid to these declarations and promises now that the Democratic Party is in power? Does Mr. Fairchild adopt the cynical theory that platforms are not to stand on, but to get in on?

The only logical conclusion possible is that as a matter of plain honesty and good faith the Democratic Party, now that it has been placed in power, must repeal the present tariff laws and put upon the statute books precisely the kind of a tariff law that is now proposed by President Wilson and Representative UNDERWOOD. If Mr. Fairchild did not want this kind of a tariff, he should not by his vote, personal influence, and ability as a financier have supported the Democratic Party last fall. It may and probably will bring disaster, but, as former Mayor Boody so appropriately hints in his statement of this evening, Democrats should not get faint-hearted when it comes to the responsibility of performance. There were three national tickets in the field. The Republican and Progressive Parties both declared allegiance to the principle of protection. The Democratic Party alone declared its belief that protection is unconstitutional. The time for honest performance has now arrived.

As one of Brooklyn's ablest Representatives you have firmly and consistently continued to advocate a reasonable and proper policy of protection to American labor and industry, and to your courageous stand in this as in many other matters is due in large measure the prestige and popular confidence you now rightly enjoy.

Very respectfully, yours,

CHARLES B. LAW.

The Tariff—Hair Schedule.

EXTENSION OF REMARKS
OF
HON. SAMUEL W. SMITH,
OF MICHIGAN.

IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 1, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. SAMUEL W. SMITH. Mr. Speaker, under leave to print I submit the following:

ASSOCIATED IMPORTERS AND
MANUFACTURERS OF HUMAN HAIR,
New York, April 30, 1913.

Hon. SAMUEL W. SMITH, *Washington, D. C.*

DEAR SIR: We, the undersigned committee appointed at a meeting of the importers and manufacturers of human hair, are inclosing you herewith a copy of the memorandum submitted to the Senate Finance Committee in opposition to Schedule N, paragraph 362, bill H. R. 3321, affecting the importation of human hair.

We trust that you will give this matter your careful attention.

Respectfully, yours,

JOSEPH HYMAN,
BERNHARD FRANKENFELDER,
G. KIMPEL,
HARRY GLEMBY.

Memorandum on behalf of the Associated Importers and Manufacturers of Human Hair relative to paragraph 362, Schedule N, H. R. 3321.

STATEMENT.

The present tariff bill permits the importation of raw hair free of duty, while the proposed tariff bill imposes a duty of 10 per cent and 20 per cent on the importation of such hair.

POINTS.

I. The phraseology of paragraph 362 is ambiguous, and its interpretation would cause endless controversy between the importers and examiner, due to the improper classification of raw hair.

The classification generally understood in the hair trade by both importer and examiner is as follows:

"1. Human hair, raw, cut or combings, drawn or undrawn, but not turned (rooted).

"2. Human hair, turned (rooted) or bleached.

"3. Human hair, manufactured or articles of which human hair is the component material of chief value."

As classified in paragraph 362, you interweave subdivisions 1 and 2 of the foregoing classification, which naturally will cause dispute.

II. The imposition of a duty on raw hair of 10 per cent and 20 per cent provided for in paragraph 362 will actually result in imposing a duty of 20 per cent and 40 per cent.

The hair, as it is cut from the human head, contains various lengths, ranging from 6 inches to 36 inches. A large part of this hair, in fact, almost 60 per cent thereof, is what is called "short hair," and is of little commercial value, and if a general duty of 10 per cent and 20 per cent is levied upon all such hair it naturally results in the imposition of a duty never intended.

III. The differential between the duty on raw hair and prepared hair, as proposed by the new tariff bill, is not large enough.

The new tariff makes no change in the amount of duty imposed on the importation of prepared and manufactured hair, the only effect of it being to impose a duty of 10 per cent on what heretofore was a free commodity. Under this arrangement the general scheme of the tariff seems to have been abandoned, as it has always been the policy to permit raw articles to enter free. Should the Congress impose a 10 per cent duty upon the raw hair which heretofore entered free, the prepared and manufactured hair, which has always been considered in the luxury class, has not borne the proper proportion of increase to which other luxuries have been subject.

IV. The imposition of a duty on raw hair, while not raising the duty on prepared hair, will force the importers to import the latter, to the detriment of the workmen and the serious injury to the retail trade.

According to the statistics of the Department of Commerce, there was imported into the United States in the year 1911, 1,115,895 pounds of human hair, uncleaned, representing a value of $1,454,115, and there was imported in the year 1912, 1,231,896 pounds of human hair, uncleaned, representing a value of $2,403,053.

From July, 1911, to January 1, 1912, there was imported in value $95,908 of human hair, cleaned and manufactured, and during the year 1912 there was imported in value $205,492 of human hair, cleaned and manufactured.

It will be easily seen, in looking over these figures, that the proportion of human hair uncleaned that was imported against the human hair cleaned and manufactured which was imported under the old tariff was at 10 per cent to 1. The proposed tariff would place a premium upon foreign labor, and it would be an inducing cause to the importer to have the manufactured hair brought in rather than to expend time, money, and detail upon the raw and uncleaned hair, if the duty of 10 per cent is imposed upon the raw hair, and the corresponding duties of 20 per cent and 35 per cent on the manufactured hair are not increased. There are employed in this country in this industry thousands of workmen who are converting raw hair into so-called prepared and manufactured hair, and it will necessarily follow that these workmen will be thrown out of employment. It would also follow that the selling price to retailers will have to be materially increased.

V. The imposition of a duty on raw hair would be a violation of the principles enunciated in the platform of the Democratic Party, namely, that all raw materials be admitted free of duty.

Under the present tariff all raw materials are permitted to enter free of duty, and no valid reasons exist in the mind of your petitioners why a distinction should be made as to human hair.

VI. The impression seems to prevail in the minds of the Congress that in the obtaining of human hair from abroad the purchasers thereof have been unscrupulous as to how same was gotten, and that in many instances the peasants have been robbed and murder almost committed.

The fact is that the possession of hair by the female members of the peasant class has been a source of revenue for the family, and instead of being reluctantly given up, they go out of their way to seek a purchaser therefor.

There is also a false impression that the gathering of human hair is kindred to that of the aigrettes, whereas in fact the two are entirely dissimilar, and the importation of human hair is an industry quite apart from the feather industry.

RÉSUMÉ.

VII. We respectfully submit from the foregoing:

(A) That the classification adopted in paragraph 362 be changed to the classification as heretofore, namely:

"1. Human hair, raw, cut, or combings, drawn or undrawn, but not turned (rooted).

"2. Human hair, turned (rooted) or bleached.

"3. Human hair, manufactured, or articles of which human hair is the component material of chief value."

(B) That the duty of 10 per cent proposed in paragraph 362, Schedule N, H. R. 3321, should be omitted, and raw hair be imported free of duty, as heretofore; or

(C) That if a duty of 10 per cent be imposed upon raw hair, that a duty of greater amount than 20 per cent be imposed upon hair turned (rooted) or bleached.

Respectfully submitted.

JOSEPH HYMAN,
B. FRANKENFELDER,
G. KIMPEL,
H. GLEMBY,
Committee.

AUGUST L. MARTIN,
ADOLPH FREYER,
Of Counsel.

The Tariff.

SPEECH
OF
HON. S. KIRKPATRICK,
OF IOWA,

IN THE HOUSE OF REPRESENTATIVES,

Monday, April 28, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. KIRKPATRICK. Mr. Speaker, as a freshman in the House of Representatives, I desire to say that I was born a protectionist, and as a natural sequence drifted into the ranks of the Republican Party, where by reason of association and environment I was led to believe that it was indeed a grand old party. But it has had its day in court, its day and generation has passed, and now at the hands of a patient and forbearing people let it be buried in the graveyard of political oblivion, and let there be inscribed on its tombstone, "No resurrection."

If I were to change the phraseology of the Payne-Aldrich bill, instead of tariff schedules I would write "subsidy schedules." The bill that we are seeking to amend had its origin away back in the dark ages, and the latter-day sponsors of the measure are in no wise less cunning than their forbears.

But the dawn of a new day is breaking, thanks to the American people. They have at last assailed this system—this abomination with its ravaging effects and influences, this monster conceived in sin and brought forth in iniquity—which could well be placed along with slavery and the two properly denominated "The twin relics of barbarism."

I desire to take the time of the House only long enough to submit two or three object lessons. Gentlemen on the other side of the House have seemed moved to the shedding of croco-

dile tears in the use, play, and display of the word "protection," and I have tried to look upon the significance with all possible approval. But I find that in California, by the introduction of Japanese and Mexicans into the lemon and orange orchards, the price of American labor has been reduced one-half. Thus it does not appear that "protection" has protected the laborer. The fact is, the most substantial and effective protection afforded the workingmen of this country can be attributed to their own efforts in the matter of organization. In my opinion, without such organized effort for their own protection their wage scales would be almost wholly at the mercy of their employers.

Is it not high time for the accoucher to change the swaddling clothes of the so-called "infant industries," or are we to stand pat and let the world move on, and thus be compelled to look backward to find us sluggishly trailing in the wake of progressive thought and up-to-date and enlightened economic methods?

In 1868, as I now remember, Congress permitted lumber to be admitted from Canada free of duty, provided that it was used in the construction of railroads. I said at that time, "Why not allow all our people to become beneficiaries?"

And I challenge now any man on the other side of the Chamber to answer this inquiry. Speaking of subsidy duties on lumber, and the conservation of our forests through lumber duties, we have nothing to conserve but saplings and hoop poles, not even a hiding place for the raccoon of bygone days.

Mr. Speaker, I represent, in part, a State that teems with hog and hominy. Iowa sits as a royal queen in the sisterhood of a reunited Nation. The products of her fields, mines, and workshops are feeding and filling the arteries of trade and commerce leading to the markets of the world. Always leading in thought and sometimes straddling in politics.

In 1871 there came the great Chicago fire. Congress convened two months later, and said all importations of glass used in the rebuilding of Chicago should be admitted free of duty. Here is another nut for the protectionist to crack. If free glass would benefit that blighted city, why not extend the helping hand to other sufferers of like character?

In 1866 I bought a sewing machine for $70. I learned soon afterwards that the same make and style of machine was being exported and sold for $25, and the excuse for so doing was that the manufacturers had to realize on their investments. It is by just such exactions as these that the enormous fortunes of our manufacturers have been built up, created at the expense of the American purchaser and consumer.

And here is another query to the gentlemen on the other side. Is there a Money Trust? Echo answers, "There is." Are there money kings? There are. And the tariff has been chiefly responsible for their existence by fostering them. The searchlight of investigation now being turned on them is causing some to vacate, to go into seclusion and exile. Having in mind the injustice and exorbitance of the present tariff, I say, "Lay on, Macduff," and so forth, and when the Underwood bill shall have been crystallized into law and its beneficent results given to our people, then can it be truthfully said:

We have fought the fight; we have kept the faith.

The Tariff and Our Foreign Trade.

EXTENSION OF REMARKS
OF
HON. HENRY T. RAINEY,
OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

Wednesday, April 30, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. RAINEY. Mr. Speaker, under the general leave granted to print under the bill we are considering, I insert in the RECORD the following statement made to-day by Hon. William C. Redfield, Secretary of Commerce, in the matter of the imports and exports of the United States:

BALANCE OF TRADE IN FAVOR OF THE UNITED STATES.

DEPARTMENT OF COMMERCE,
Washington, D. C., April 30, 1913.

Secretary of Commerce William C. Redfield, in commenting to-day upon the detailed figures concerning the imports and exports of the United States for the month of March and the nine months ended March, made the following statement:

The figures are striking, both in their magnitude and in their details. The aggregate business, inward and outward, of the United States with foreign countries for the nine months was a little in excess of $3,300,000,000—an impressive total, which if maintained at the same rate would bring the business for the entire fiscal year well in excess of $4,100,000,000.

Great Britain is our largest customer, buying from us over $478,000,000 and selling us over $234,000,000, an aggregate for the nine months in excess of $712,000,000, or a total business of nearly $80,000,000 a month. Canada is our second best customer, buying from us $300,000,000 in nine months, equal to nearly $1,300,000 every working day. A pretty fair customer, that. Then Germany comes third, buying $268,000,000 from us in nine months and selling us $146,000,000. She is a pretty fair customer, too—buys over $1,000,000 a day. And fourth comes France, to whom we sold $120,000,000 and from whom we bought $112,000,000.

It is when we come to look at the details of our foreign commerce, by what are called great groups, that we get at the most striking facts. If, for example, one is told that our exports fell off in March, as compared with the same month a year ago, by about $18,000,000, so that we only sold $187,000,000 abroad in March, that might not seem a favorable condition. But, when one looks a little closer, he finds that the falling off was almost wholly in the sales of crude materials for use in manufacturing, and that, so far from a loss, there was an absolute gain in the important items of manufactures, which in the two important classes of manufactures for further use in manufacturing and in manufactures ready for consumption actually increased in the month of March by about $13,000,000. So that our manufacturers held their grip upon the foreign markets of the world more strongly in March than they did a year ago.

The figures for the entire nine months are such as to give just pride to every thoughful American to whose notice they come. Out of the total transactions of $3,300,000,000 there is a balance in our favor of a little over $500,000,000. Doing pretty well, that. But a few comparisons with 1912 make it look even better. For example, our sales of manufactures for further use in manufacturing increased over $56,000,000, and our sales of manufactures ready for use increased over the same period last year $88,500,000, an increase in these two lines of manufactured goods alone of over $144,500,000, as compared with the same period of last year.

This does not look like weakness in competing power, especially when one looks at the table of percentages published with the others and finds that the three groups, which include manufactured goods of all kinds, constitute 59.5 per cent of our total exports.

Merchandise imported from and exported to each of the principal countries during March and the 9 months ended March, 1913, compared with corresponding periods of the preceding fiscal year.

NOTE.—The percentage which manufactures formed of the exports in March, 1913, was larger than in March of any earlier year.

The Tariff.

SPEECH
OF
HON. SAMUEL W. SMITH,
OF MICHIGAN,

IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 1, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. SAMUEL W. SMITH. Mr. Speaker, early in April of this year the seventeenth annual convention of the American Cotton Manufacturers' Association was held in this city.

During the course of its deliberations Mr. W. A. Erwin, retiring president of the association, declared that if the rates suggested in the pending bill were to be made effective the injury to the industry would be unparalleled, and that a condition of depression would follow in cotton manufacturing which would be appalling.

It seems that most of the members of the association are from the South and are Democrats, and Mr. Erwin made it very clear that if it had been known during the election that cotton was to be put on the free list, President Wilson could not have been elected.

This is what he said:

COTTON MAKERS ARE ANGERED BY TARIFF—SAY WILSON COULD NOT HAVE BEEN ELECTED ON PLATFORM OF "FREE COTTON."

"It is with the greatest regret and consternation that we have seen the publication of rates on cotton manufactures in the tariff bill of the Ways and Means Committee. In all sincerity we state that if the rates thus suggested are made effective we believe the injury to our industry will be unparalleled, and that a condition of depression will follow in cotton manufacturing which will be appalling."

With the unanimous adoption of a resolution of which the above paragraph is a part, the seventeenth annual convention of the American Cotton Manufacturers' Association adjourned to-day.

The manufacturers made it plain that they are by no means in sympathy with the attitude of the present administration toward duties on cotton. Most of the members of the association are from the South, and are Democrats, but W. A. Erwin, retiring president of the association, declared that a reduction of the tariff beyond the competitive point, such as is contemplated in the Underwood bill, is not Democratic.

"The Democratic platform declared in favor of free wool, free sugar, free steel, and other commodities, but it said nothing about free cotton," said Mr. Erwin. "If the Democratic platform or President Wilson, in any of his preelection addresses, had declared in favor of free or near-free cotton, Mr. Wilson would never have been elected President."

Mr. Erwin also took occasion to answer that portion of the address delivered yesterday by Secretary Redfield, of the Commerce Department, relating to the tariff. Mr. Erwin said the Secretary ought to study the tariff and the cotton industry.

—

TO GET WHAT THEY VOTED FOR.

"I am satisfied," said Mr. Erwin, the retiring president of the American Association of Cotton Manufacturers, "that President Wilson will insist that certain measures be enacted in conformity with party pledges, possibly free wool, free steel, and free sugar. But I have never seen any pledge regarding free or nearly free cotton. If there had been such a party pledge, Mr. Wilson would not have been president of the United States to-day." Why not, Mr. Erwin? You and your fellow members of the association who are interested in southern cotton mills knew perfectly well last November that you were voting for a free-trade President on a free-trade platform. What right have you to a tariff on cotton goods in a bill which provides for free trade in wool, in sugar, and in steel? What is sauce for the goose is sauce for the gander. You are getting precisely what you voted for.

—

BUFFALO, N. Y., *April 3, 1913.*

HON. SAMUEL W. SMITH,
Representative from Michigan, Washington, D. C.

DEAR SIR: As you are doubtless aware from petitions with signatures coming to you from your district the farmers and citizens of the said district are very anxious that the present duty on flax straw of $5 a ton of 2,000 pounds and manufactured tow from flax straw, $20 a ton of 2,000 pounds, should be retained.

Tow is not only used for upholstering, but it is used for lining refrigerator cars, which is an entirely new enterprise, and not less than 200,000 tons of flax straw a year are made into tow for lining refrigerator cars and used for that purpose, the lining firms having their own tow mills at their factories—for instance, at Winona, St. Paul, etc. The tow manufacturers use about the same amount, buying the straw in North and South Dakota, Minnesota, Wisconsin, Iowa, Michigan, and Ohio, and a tremendous loss to the farmers would be caused by a very large reduction on the present tariff of flax straw, who receive from $3 to $4 a ton in the Northwest and up to $9 in Ohio, Michigan, and partly Wisconsin, depending on the length and the quality of the straw. Canada, raising nearly as much straw as the United States, with Russia, could flood this country with flax and tow ten times over, and they were only kept out on account of the tariff. As I said, you have received petitions, and most of you gentlemen and several of the honorable Senators from the Northwest know all about these, the farmers' necessities.

The Hon. OSCAR W. UNDERWOOD, chairman of the Ways and Means Committee, has received many petitions with several thousand signatures of the farmers of the Northwest, praying that the duty be left as it is now, as above stated. I appeared before the committee on the 25th day of January as the representative of over 50 commercial clubs, western and northwestern banks, and citizens, and submitted powers of attorney from many of them and prayed the committee to leave the duties as they are.

As I stated, hundreds of thousands of dollars would be lost to the American farmers of the West and Northwest if the duty were taken off or considerably reduced, for they would have to burn their flax straw, as they did in the past, when there were no tow mills or only a few of them, and when flax tow had not been used for railroad-car linings or for lining large buildings, storage plants, and private houses as it is done now, for formerly, when fruit cars from California to New York needed three icings, now cars lined with tow need one icing—for instance, at Denver.

Now, therefore, in the interest of your constituents, farmers and business men of the West and Northwest and the manufacturers of tow, I, as their representative before Congress, pray that you use your influence to see, when the matter comes before Congress at the head of Schedule J, that you do your best that the duty remain on flax straw, flax tow, and all kinds of flax. The United States Agricultural Department at Washington is making strenuous efforts to have the farmers raise good flax for spinning, and it is already done in Michigan, Ohio, and partly in Minnesota and Wisconsin, and surely they deserve encouragement—all of which efforts would be destroyed were the borders opened to please the great monopolies of thread and cordage manufac-

turers, such as the Barbour Co. or other flax-spinning concerns, who do not care what becomes of the farmers as long as they get their trust share. I have the honor to be,

Yours, very respectfully, V. R. BLEHDON.

(Inclosed copy letter March 21 to OSCAR W. UNDERWOOD.)

—

(Schedule J: Flax, etc. No. 333, flax straw, $5 per ton. No. 336, tow of flax, $20 per ton.)

BUFFALO, N. Y., *March 21, 1913.*

Hon. OSCAR W. UNDERWOOD,
Chairman Ways and Means Committee,
Washington, D. C.

HONORABLE SIR: On the 25th day of January I appeared before your committee as per record, pages 2503 and 2597, inclusive.

I appeared as the chosen representative of 32 towns in North Dakota and Minnesota, their commercial clubs, manufacturers of tow, and the farmers, as sellers of flax straw or owners of small tow mills.

I then submitted a lot of petitions with many signatures, and since that time there have been submitted direct from the farmers and myself a very large number of petitions and signatures, all praying that in order that they may sell their flax straw the present duty on the same may be continued, to wit, $5 a ton of 2,000 pounds on flax straw, and that the present duty of $20 per ton on tow, which is made out of flax straw, be sustained and continued, for if no tow can be made in this country the flax straw can not be sold.

Tow is used for upholstering furniture and lining of refrigerator cars, and thousands and thousands of tons of straw are bought of the farmers at from $3 to $9 a ton.

Canada raises as much straw as the United States, and Russia raises many times more, and as the wages in Canada are only one-half and in Russia about one-sixth what they are in America, and as flax straw can be bought over there at one-half the price, the farmers could not sell their straw, and thereby would be deprived of many hundreds of thousands of dollars, some farmers having 10 tons for sale, some a few thousand tons.

The selling of flax straw is an absolute necessity to the farmers in order to make the raising of "flax," as it is called by them, profitable, and the United States Agricultural Department has for the last few years made great efforts to encourage the raising of flax.

Of course, were the duty taken off, or in any considerable way lowered, the farmers could not compete, for they have to pay to hired men during seeding and harvesting from $3 to $5 a day, whereas the same labor can be had in foreign countries for from one-sixth to one-fifth the price.

In good years about 3,000,000 tons of flax straw is raised in the United States, for which there was no market in the past until tow mills were built about 20 years ago, and about 5 years ago the car-lining factories were started to line refrigerator cars with tow, and by this the icing of railroad fruit cars between California and the East has been reduced to one icing, where formerly, when charcoal, cattle hair, and cork were used, three icings were necessary.

The farmers in the Northwest are very much concerned that the duty should remain.

The price of tow ranges from $25 to $60, and even $80, per ton for best qualities, for the making of flax straw into tow it takes from 3 to 6 tons of straw to make 1 ton of coarse or fine tow, some of the straw having to run from two to five times through brakes, pickers, shakers, all driven by steam or electricity, and from 12 to 50 men are employed in tow mills.

Two concerns at St. Paul, Minn., and Port Huron, Mich., and several others make binder twine out of American flax straw.

The said flax straw is raised in the States of North and South Dakota, Minnesota, Iowa, Wisconsin, Michigan, and Ohio, and in some of the States large sums are now invested to manufacture wrapping and writing paper out of American flax straw.

Now, therefore, the raising of flax, or flax straw, as it should be technically called, should certainly be protected in order to make a great industry out of it, as it will be in time.

Some of the witnesses before you on the 24th and 25th of January—those connected with the Barbour Co., at Allentown and Paterson, and several other concerns who manufacture thread—had the temerity to say that no good flax for spinning is raised in the United States, whereas, as a matter of fact, the States of Michigan and Ohio and some parts of Wisconsin, and even in Minnesota, raise flax straw which is perfectly fit for spinning; but it is not encouraged by these big firms who manufacture and make prices on thread, and they prefer, for some reason, to import European flax because it is cheaper than it could be produced here under American labor wages.

The Barbour Co. has imported many cars of finished flax from Canada, which was imported as not hackled, and experts had to be called in to relieve the minds of the United States collectors, in preference to importing it from Europe, when they and their friends talk of Belgium and Russian spinning flax being the best.

One man, by the name of Mr. Loughlin (p. 3484), states that Canadian flax is the poorest he has ever seen and no good, whereas the Barbour Co., who make some of the finest articles, use it by the carload, importing it via Suspension Bridge.

I never heard of "flax dressers" in this country, unless they were employed by some of these million-dollar concerns who make prices.

These tremendous monopolies or corporations do not care what happens to the farmer as long as they get their tremendous profits, and not for the world would they want to have a reduction on finished thread or their goods, but they want what they call flax straw and tow on the free list.

As a matter of fact, tow can not be used for spinning, for it is used only for upholstering, refrigerator-car linings, and wrapping and writing paper.

Flax for spinning is not a raw material at all, for it takes great labor and large expense to make long spinning flax out of flax straw, for, as I said, flax straw is worth from $5 to $9 a ton, whereas long spinning flax is worth from $250 to $350 a ton.

Now, look at the statement of the United States Linen Co., Chicago, who came before you and told you honestly that it is false that no spinning flax can be raised in this country. (See p. 3490.) They declare these statements false and unfounded; and I, with great respect to your committee and with truth and honesty, do declare these statements false, and I say:

Gentlemen of the committee, give the farmers of the United States a chance to raise the same flax straw as they do in Europe and they can raise it, and they will raise it, as the United States Linen Co. tells you, and as the International Flax Twine Co., of Chicago, who make binder twine, could tell you; but the farmers must be given a chance, that, with the high wages they have to pay in this country, the duty will remain to protect them, and not open the country to these millionaire thread and twine manufacturers.

Less than 40 years ago all the flax straw raised in the United States was burned; now the Amenia & Sharon Land Co., of Amenia, N. Dak., and others have imported thousands of bushels of Russian and Irish flaxseed to this country and have sold it to the farmers, and are raising now flax straw, some of it a yard long, and as good as they do in foreign countries; and they will do more, and the United States will raise flax straw and flax as good as others, and the farmers therefore pray for protection, that the duty remain as it is.

I have the honor to be, yours, very respectfully,

V. R. BLEHDON.

Representing the flax-raising States in the Northwest, as per petitions and thousands of signatures turned over to the clerk of your committee, Mr. Daniel C. Roper.

—

MERCHANTS AND MANUFACTURERS BOARD OF TRADE,
New York, April 5, 1913.

Hon. SAMUEL W. SMITH,
Representative in Congress, Washington, D. C.

DEAR SIR: I have the honor to inclose herewith a pamphlet containing a copy of a letter addressed to the chairman and members of the House Ways and Means Committee, the chairman and members of the Senate Finance Committee, and the President of the United States, protesting against any increase in the value of articles purchased abroad that Americans may bring into the United States free of duty. Such admissions of duty-free purchases, under section 709 of the free list of the present tariff act, is limited to articles of a value not exceeding $100. Our protest against any increase is on the ground that it would be indefensible class legislation and the granting of special privileges to the well to do and the wealthy who travel abroad in the way of tariff exemptions denied to Americans of lesser means who remain at home.

Inclosed letter is self-explanatory and is sent to you in the hope that you may be disposed to vote against any increase in the amount of the exemption should the new tariff act provide for any increase in the amount of the exemption.

I have the honor to remain, very respectfully, yours,

A. B. SMITH, *President.*

—

THE AMERICAN SPICE TRADE ASSOCIATION,
New York, April 15, 1913.

Hon. SAMUEL W. SMITH,
House of Representatives, Washington, D. C.

DEAR SIR: In the bill just presented by the Committee on Ways and Means whole spices are made dutiable by a small duty, which, on the basis of the importations for the year ending June 30, 1912, would yield a revenue of $768,462. The duties collected under the existing tariff on ground spices amounted to $218,209.

Ground spices, heretofore subject to a duty of 3 cents per pound, are made subject, under the new bill, to the same duty as whole spices. The use of spices for food can not be increased except by growth in population, whether ground in this country or in Europe; no more will be used than the sense of taste requires; no one would be tempted by cheap price to use more pepper or any other spice than he liked on the food on which or in which it was required as a flavor.

Many persons would drink an extra cup of coffee when the price is low which he would go without if the price was high, but there is no one in this whole country who does not have all the pepper or any other spice he wants and could not be persuaded to use more than he likes if it were given to him.

It seems to the spice trade that the committee was in error in classifying spices as luxuries. Spices are part of the regular stock in trade of every grocer; they are uniformly in every kitchen; pepper is on every table as generally as salt or sugar. They are used in food in some form every day by every person in the country. There is not a mining or lumber camp, there is not a fishing smack or ship of any kind, not a farmhouse or tenement house, there is not a picnic party, not an exploring expedition without spices to make the food palatable.

The poorer the person and the coarser the fare the greater the need of condiments to furnish flavor and variety.

It is claimed that food which is unpalatable is indigestible, and the use of spices is exactly to make food palatable. To tax spices is not to tax luxuries, but to tax food—to tax what has become a necessity of life; to increase the cost of living.

To tax whole spices is to hurt our export trade, which shows a considerable extension, and turn it over to England, where spices are not taxed and where shipping opportunity is better.

To levy the same duty on ground and whole spices would greatly injure our domestic trade, because it costs more to grind and pack spices in this country than in England, because of dearer labor here and because they are sold in small packages of tin or paper, which when imported pay no duty when they come in as containers but which when used by American grinders are subject to a protective duty on paper, labels, and tin plate.

The duty would be paid on the landed weight; there is shrinkage in weight in warehouse and loss in weight in grinding and packing. The American grinder would not sell the weight he paid duty on. This would mean that the rate of duty would be increased by the percentage of loss between the arrival and sale of the goods.

Further, it means to impair the protection afforded by our pure-food laws, because the American grinder uses better qualities of spices than the English grinder, due to the fact that wormy or damaged spices may not be imported here, while there is no restriction on the grinding of such abroad, and chemical analysis can not detect in the ground spice the character of the whole spice from which they were ground.

To reduce the duty or make free of duty large articles of everyday use like sugar, tea, coffee, and salt, and tax smaller articles like spices, which are just as necessary and fully as universally used, is inconsistent and unfair; it is hitting and injuring a small article simply because it is small.

Whole spices and mustard seed should be free and ground spices subject to a small duty, say, the duty now provided for whole spices in the tariff bill just presented to Congress by the Ways and Means Committee.

No study, no ingenuity, or skill can overcome the disadvantage of arbitrary higher raw material, cheaper labor, and protected accessories like labels, cans, and paper.

While there is no trust or combination in the spice trade, and while no one since the war became rich in the trade, but only the severest competition, a low duty on ground spices would permit importations of ground spices—a few come in even at 3 cents per pound—and check any exuberance of feeling or excessive price among the American trade.

This would not be fostering a trade exotic to this country, but only establishing equal facilities. A one-armed man is handicapped in standing off a man with two arms. All we want is equal opportunity.

Very respectfully,

E. W. DURKEE,
Chairman Tariff Committee.

—

THE LANCASTER LEAF TOBACCO BOARD OF TRADE,
Lancaster, Pa., April 16, 1913.

Hon. S. W. SMITH,
House of Representatives, Washington, D. C.

SIR: Permit us to call your attention to the following resolutions adopted by the Lancaster Leaf Tobacco Board of Trade at a special meeting called to consider certain passages of the Underwood tariff bill:

Whereas the Underwood tariff bill now in the House of Representatives provides that all tobacco grown in the Philippine Islands, together with such manufactured tobacco and tobacco products as shall contain not in excess of 20 per cent in value of any foreign type of tobacco not grown in the Philippines or the United States shall be allowed to be brought into the United States free of duty; and

Whereas the cost of labor to the grower as well as to the manufacturer in the Philippine Islands is less than 10 per cent of the cost of labor in the United States; and

Whereas the provision permitting the Philippine manufacturer to use up to 20 per cent in value of any class of foreign tobacco will enable them to manufacture a cigar that will appeal to the taste of the smoker in the United States: Therefore be it

Resolved, That we, the Lancaster Leaf Tobacco Board of Trade in special meeting assembled on April 12, 1913, declare it to be our opinion that if this bill is permitted to become a law it will mean the ruination of our domestic tobacco and cigar industries in their manifold branches.

It will not only close our cigar factories and throw out of employment a vast army of cigar makers, but it will render the growth of the tobacco unprofitable to our farmers and destroy the market for one of the very important products of our soil.

It will enable the large corporate interests to profit abnormally at the expense of total and permanent annihilation of thousands of small manufacturers, dealers, and growers.

In view of the above conclusion we vehemently protest against the passage of this section of House of Representatives bill No. 10 and urge upon the Senate and House of Representatives the necessity of amending this bill so as to embody the same provisions with reference to Philippine tobacco and cigars as is embodied in the present tariff schedule.

Respectfully submitted.

HERBERT P. TAYLOR,
President.

Hon. A. B. HESS,
I. H. WEAVER,
LOUIS A. KRAMER,
Committee.

—

MUSKEGON, MICH., *April 3, 1913.*

SAMUEL W. SMITH,
House of Representatives, Washington, D. C.

DEAR SIR: In connection with Schedule A of the tariff bill and relative particulars to the duties on tanning extracts, we wish to submit the following for your very careful consideration, and trust the same may be given due weight in your action relative to the duties upon the above-mentioned extracts.

The Muskegon Extract Co., of Muskegon, Mich., are manufacturers of tanning extracts from the waste sulphite cellulose liquor of the pulp mill at this place. We have now been on the market for about three years, and are beginning to get established in a substantial way. We have an investment up to the present time in this business of practically $175,000. This money has been spent in developing the industry and establishing the product on the market. This product is made from a refuse material, notably the waste sulphite cellulose liquors of the pulp mill. This waste liquor is a public menace in a great many places, pollutes the streams, rivers, and lakes, and the further development and enlargement of this industry will mean not only converting a waste material into a useful commercial product, but will at the same time aid in the further doing away with a public nuisance which in a great many cases will sooner or later force the closing of certain pulp mills.

Abroad, particularly in Germany, a number of pulp mills have been forced to shut down because of their inability to find some means of doing away with these waste liquors and keeping them out of the streams and rivers. Some of the German paper-pulp manufacturers are now, and have been for some time past, endeavoring to develop by-products similar to ours from these waste liquors. The lowering of the duty on waste sulphite cellulose liquor tanning extracts, or what is known generally by the name of sulphite cellulose extract, would work a great injury to us and might be the means of forcing us out of business entirely, as the German manufacturers would be willing to make and market this particular product at less than cost in order to keep their pulp mills going. The removal of the duty on all of the extracts, particularly upon quebracho extract, would likewise work an injury to us.

We would ask your most careful consideration of the above, and believe that your fair-mindedness will see the injustice of the removal of the duty on this particular material.

Very truly, yours,

MUSKEGON EXTRACT CO.,
GEO. H. TOUSEY, *Vice President.*

—

MENZIES SHOE CO.,
PRESIDENT'S OFFICE,
Detroit, Mich., April 16, 1913.

Hon. S. W. SMITH, M. C.,
Washington, D. C.

MY DEAR MR. SMITH: As an American shoemaker I am getting exceedingly worried. We do not want free shoes. The men, women, boys, and girls in our factory can not afford to work for the same prices as they do abroad.

If you would investigate our factory in Detroit you would find experienced men and women earning from $15 to $30 a week, and I don't see how they can really live like American citizens for any less. Even boys and girls in our factory are earning from $5 to $10 a week. I am given to understand, and by good authority, that the highest paid men and women do not earn over $8 a week in foreign countries.

If the good wages and prosperity of our people are to continue, I want to go on record as saying it will not continue unless a tariff is maintained; and also, if this tariff is removed, that the burden of it is going to fall on the workers in our factories and all workers in the United States.

We are living in a different age, and the people in this country are a different element, living on a different plane entirely—shorter hours, more leisure, have more of the nice things that make life worth living, especially in Detroit, where life is worth living.

If you want a continuation of prosperity in our factories and the medium and middle classes throughout the United States, I believe we must maintain a little tariff, sufficient for protection of the laborers.

I earnestly solicit a closer examination and investigation by you into the prices of labor in the United States and foreign countries.

Very truly, yours,

H. D. MENZIES.

—

AN APPEAL FOR FAIRNESS.

To Hon. S. W. SMITH,
Representative in Congress from the State of Michigan:

The American shoe-manufacturing trade respectfully ask from every Member of Congress, regardless of party, very serious consideration of all aspects of the industrial and commercial situation, with reference to shoes, in determining upon action in the matter of the duty on shoes imported into this country. The data presented herewith are believed to be dependable, being taken from Government reports, etc.

Respectfully submitted.

MENZIES SHOE CO., *Detroit.*

THE SHOE TRADE PROTESTS AGAINST REDUCTION OF DUTY.

A critical situation presents itself to the American shoe-manufacturing trade, an industry which employs an army of more than 200,000 workers and in which some $300,000,000 capital is invested, with a value of annual product reaching well toward $600,000,000, a sum in excess of the value of shoe production of England, France, Germany, Italy, and Austria.

The industry is confronted by a threat of national legislation on tariff which apparently is to some extent based upon a disposition to single it out for discrimination and for punishment, regardless of any question as to its general services to the American consumer, and in spite of the probable effect upon the wageworkers in the shoe industry.

ALREADY CUT IN HALF.

The duty on shoes imported into this country was for a long time fixed at 25 per cent, a rate much below the average. Three years ago, in the Payne law, this duty was cut in half; notwithstanding this, last summer a bill was passed by both Houses of Congress taking away the other half and throwing shoes upon the "free list"—alone among all articles worn by man, woman, or child, from head to foot, in thus being exposed to the open competition of labor abroad, invariably cheaper than American labor. There are aspects of the situation which are puzzling to the shoe trade, and which may well be puzzling to members of any trade, if they represent general tendencies or a settled program, with reference to coming business legislation at Washington.

ALL BRANCHES AGREE.

The retail dealers in shoes not less than the worker, the manufacturer, and the wholesale dealer, view with apprehension anything tending toward the serious disturbing of conditions and the sharpening of an already very keen competition, which has resulted in placing shoes at the bottom of the column in margin of profit in making or selling, as compared with any other general commodity or line of merchandise. The National Association of Shoe Dealers joined with the manufacturers and the wholesalers in the brief that was presented to the Ways and Means Committee. It is the manufacturer of shoes, however, upon whom falls the chief burden of defense of the trade. That defense had been seriously undertaken and fairly conducted by men of ample technical knowledge and practical experience, broad enough to believe that fairness is the soundest policy, and desiring nothing more in their own behalf at the hands of Congress.

The statement is made that "no damage is intended to any business"; but this is not saying a great deal, for it is seldom that a law is passed with the avowed intention of admission that it is intended to be damaging to any honest line of endeavor.

THE NARROW MARGIN.

The American shoe manufacturer is not unduly timorous, but he knows exceedingly well the very narrow limit of profit upon which he is now working; knows the American labor market, in which he has to purchase his operative help, in competition with industries the products of which are "protected" by duties triple and quadruple that are levied upon shoes; and knows how swiftly a small margin of profit can be changed to a fatal measure of loss.

American shoe manufacturers therefore protest against reduction of the duty upon footwear, for what seem to them to be ample reasons, some of which may here be considered. They protest—

Because the shoe trade took its reduction three years ago, when the Payne law cut the former duty of 25 per cent in half, by lowering the schedule to 10 per cent on shoes of bovine leather and 15 per cent on shoes of "kid" leather.

LOWEST ON THE LIST NOW.

Because the duties levied on shoes are already far below those on other wearable articles, as shown in the following brief tabulation:

	Per cent.
Hats	50 to 60
Shirts	60
Underwear, all kinds	45 to 55
Handkerchiefs	50 to 60
Clothing, all kinds	45 to 60
Hosiery	55 to 85
Shoes	10 to 15

Because whatever may be the prevailing opinion as to the merits of "protection" as a principle, any duty acts as a protection, as far as it goes, and helps to establish conditions to which all industries are subject.

THE CONSUMER WELL SERVED.

Because the mechanical skill, administrative ability, and merchandising economy of the American shoe trade as a whole have made this the best shod of nations, and have made it at least relatively (and probably absolutely in many grades of quality) the cheapest place in the world for the consumer to buy shoes.

Because, resulting from the above, "one day's work will buy a better pair of shoes in the United States than it will in any other land by fully 40 per cent"—a statement which is within the limits of conservatism, which presents a remarkable truth, and is deserving of deep consideration in estimating the service the American shoe trade renders to the American consumer.

LABOR COMPARISONS.

Because of such showings as the following, the figures being taken from dependable sources, including Government reports by the Department of Commerce and Labor, the United Kingdom—England, Wales, and Scotland—being the most dangerous competitor of the United States.

	United States, per week.	United Kingdom per week.
Cut sole leather, cleing-out machine, skilled	$14.00	$7.29
Cut sole leather, cleing-out machine, unskilled	9.00	2.92
Foreman, sole-leather stock fitting	20.00	9.73
Miscellaneous unskilled work, boy	7.00	2.43
Pull over, Rex machine	13.50	7.29
Operate consolidated lasting machine	15.00	10.22
Operate Rex rotary pounder	11.00	7.29
Tack on outer soles	12.00	7.29
Operate standard screw machine	16.50	8.50
McKay sew	15.00	8.51
Level, Hercules	12.60	8.51
Total	145.00	79.98
Ratio	100	55

Because in the markets of the world there are but few examples of lower duties than those now levied on shoes by the United States.

Because other nations, which are defending their own trade, not alone against this country but against each other, levy duties upon shoes, as shown in the following table, taken from the Government report on foreign tariffs:

Canada, per cent	20
Mexico, per pair	$0.30 to $1.50
France (new tariff), do	$0.57 to $0.95
Germany (estimated), per cent	25
Italy, per kilo	$0.20
Russia (estimated), per pound	$1.00
Argentina, per cent	40
Japan, do	40
Australia, do	40

Because the question is not local, since the business of shoe manufacturing is not local; 20 States figure with large output in the Government reports of production, and the second largest producer lies west of the Mississippi River.

Because practically all of the materials which enter into the manufacture of shoes bear duties, these running as high as 60 per cent.

Because with all the advantages of cheap labor and cheaper materials in favor of the foreign manufacturer, he is sufficiently favored with reference to the American market by the present small duty. Further encouragement must be at the expense of American workers, for there is nowhere else to cut except in the wage scale.

AGAINST MISLEADING STATEMENTS.

They protest against the persistent repetition of totally erroneous statements, bearing upon the shoe industry.

They protest against the continued repetition of the absurd theory that "free hides were an equivalent for free shoes," in the face of the fact that the raw hide in a pair of shoes forms only from one-fifth to less than one-tenth of its value.

They protest against the repetition of the false statement that "the shoe manufacturers agree to 'free shoes' if hides are made free." No such statement was made by anybody; and if it had been made by anybody it would have been against the wishes and beliefs and intentions of the rest of the 1,300 shoe manufacturing concerns of the United States.

They protest against talk of a "shoe trust," a thing which never existed in any form, or in any imaginable approach to reality.

They protest against being blamed for the situation regarding the cost of shoes, as it has developed within the past few years, this blame taking the form of a reproach: "The shoe manufacturers promised cheaper shoes if hides were made free, but shoes cost more instead of less"—such a reproach utterly ignoring the fact that the shoe manufacturer has no control whatever over the prices of shoe materials, and that hides began rising in price immediately after the duty was annulled, as shown by Government reports. Nobody made such a "promise"; and it would have been a promise utterly impossible of fulfillment if it had been made.

AGAINST OFFICIAL ANIMUS.

They protest against the disposition manifested in the reported declared intention of an officer of Congress "to get even with the shoe manufacturers," with reference to the duty on shoes—a purpose as improper as would be that of a judge on the bench who should declare his intention of "getting even with that litigant before me." The maker of law has more power than the interpreter of law, and should be the more bound by considerations of impartiality and fairness.

They protest against the theory that an American industry must suffer a certain amount of foreign competition, as a test of its efficiency, and respectfully point out that such a principle would operate as an encouraging of inefficiency and a penalizing and at least a partial nullifying of energy and enterprise. If the American maker of shoes has dominated the American market, it is because he has served the American consumer much better than the shoemakers of any other country in the world, wages and conditions being considered.

AGAINST DISCRIMINATION.

They protest against having their commodity product being singled out as a basis for campaign material, as used in speeches less than six months ago, in referring to the so-called "Farmers' free-list bill" and declaring that "We have given the people free meat, and free bread, and free shoes"—an argument unworthy of a statesman in its specious framing, and of a character fit only for appeal to the ignorance of natural-born paupers.

They protest against the ignoring of the truth that all duties are "protective" as far as they go, whether called so or not, except as they apply to a commodity not produced in this country at all.

They protest against undue weight being given to the present exportations of American shoes, in view of the fact that it is "fit and fashion" which are largely instrumental in selling the American high-grade shoe abroad, these qualities being held commercially desirable by the public, with reference to any article of clothing, but being subject to rapid change in demand. That is to say, the exportation is dependent to a large extent upon intangible and undependable style qualifications, rather than upon an economic mastery of foreign markets, defended, as most of them are, by duties larger than our own.

And they most earnestly request and urge that the brief submitted in their behalf, and the report of the hearing before the Ways and Means Committee, be fully and fairly considered by every Member of the House and Senate and by the President of the United States.

—

DETROIT, MICH., *April 15, 1913.*

Hon. SAMUEL W. SMITH,
House of Representatives, Washington, D. C.

DEAR SIR: The State of Michigan, and especially the city of Detroit, being the largest buyers and consumers of the base metal aluminum in the United States, we beg to refer a matter to you that is of utmost importance to our manufacturers in this industry, in hopes that you will at once take the matter up in the proper quarters with a view of having a more equitable and practical adjustment for all concerned in the proposed changes of the new tariff affecting this commodity.

The proposed new duty on aluminum, we presume, means that duty is 25 per cent on the general market price of the metal at the place from where shipped at the time of shipment. This is beautiful in theory, but will be most confusing and impossible in practice. Aside from the difficulty of fixing the general market price at the place of shipment, at the time of shipment, it is a matter of guesswork within certain limits, and the Government will fine you if your guess does not come within 1 per cent of its guess. It would have worked this way had it been in effect during 1912; and you never could tell from month to month what the base metal was going to cost you. That is to say, notwithstanding had you placed a contract during January for monthly shipments for total requirements throughout the year at 11¾ cents per pound, say, f. o. b. New York, duty unpaid, you would have paid duty ranging from a little over 2¼ cents to nearly 5 cents, depending on the market price at time of shipment of the various shipments. It must be remembered that aluminum went as high as 27 cents per pound in New York, and that the highest price duty unpaid was 70 per cent higher than the low price of the year duty unpaid. We sincerely hope that the ad valorem will not go into effect. It would be a handicap and a hindrance to everybody in connection with aluminum except the Aluminum Trust; the more others are hindered from importing foreign aluminum, the better they like it. At present prices they would have a protection of 25 per cent, ad valorem basis, amounting to 5 cents per pound, and we have no doubt they are pleased with the proposed "reduction."

A far more just, equitable, and practical working plan would be a fixed specific duty, as at present, only the same should be cut in two or reduced to, say, 3 cents per pound, which should be more than ample (taking in addition the transportation and handling charges) to offset the difference between European and American labor items, and considering the further great advantages of the lesser cost of manufacturing and production by the American trust, with their up-to-date and scientific methods of production.

Will you kindly acknowledge and give us your views on this matter, and we will be very pleased to furnish you promptly any further facts and data you may desire on the subject.

Yours, very truly,

UNITED STATES MCADAMITE METAL CO.,
J. P. CARRITTE, *Treasurer.*

—

PENINSULAR MILLING CO.,
Flint, Mich., April 5, 1913.

Hon. SAMUEL W. SMITH,
House of Representatives, Washington, D. C.

DEAR SIR: It is reported that the forthcoming tariff bill proposes to put flour on the free list, while wheat will be protected by a tariff. We do not want to take up your time with an argument, but wish to protest against this, as it would ruin the milling industry of the United States. If flour was accompanied by free wheat it would not be so bad, but as it would discourage wheat growing it would incidentally injure the milling business.

Kindly give this your consideration.

Yours, truly,

PENINSULAR MILLING CO.,
C. J. DE ROO, *Manager.*

—

MICHIGAN STATE MILLERS' ASSOCIATION,
Lansing, Mich., April 3, 1913.

Hon. SAMUEL W. SMITH,
House of Representatives, Washington, D. C.

DEAR SIR: News comes to me that there is a bill in the Ways and Means Committee of the House now which contemplates free flour, with 7½ to 10 per cent ad valorem duty on wheat.

Millers of the United States, including Michigan, are very much disturbed over this proposed amendment to our tariff, and believe that legislation to this effect would mean serious detriment to the milling industry. Some go so far as to assert that it would mean practical extinction of our American milling industry.

Of course, you can readily see that the millers are anxious to put a stop to this sort of legislation. Anything that you will do to aid us in this will be very much appreciated by all of Michigan millers.

With kindest regards to you, I am,

Very truly, yours,

HARRY E. HOOKER, *Secretary.*

—

LANSING, MICH., *April 2, 1913.*

Hon. SAMUEL W. SMITH, *Washington, D. C.*

DEAR SIR: It is rumored that the Ways and Means Committee are contemplating a bill admitting the free admission of flour into the United States and an ad valorem duty on wheat, and we beg to call your attention to this early, possibly prematurely, as the enactment of any bill admitting flour free would practically mean the extinction of the flour-milling business in this country.

The millers of Michigan have been seriously handicapped in the past few years through the light crops of wheat harvested, and could not stand the strain of free flour from, say, Canada, with that section so advantageously situated to flood this State with flour.

We sincerely hope this measure will not pass the committee, but if it should we trust you will do all in your power to prevent its becoming a law.

Thanking you, we beg to remain,

Very truly,

THOMAN MILLING CO.,
J. P. THOMAN, *Manager.*

—

THE MICHIGAN BEAN JOBBERS' ASSOCIATION,
OFFICE OF THE PRESIDENT,
Owosso, Mich., April 15, 1913.

Hon. SAMUEL W. SMITH, *Washington, D. C.*

DEAR SIR: I see that the proposed new tariff bill will reduce the tariff on beans from 45 cents to 25 cents per bushel of 60 pounds.

Now, I do not suppose that you will be able to do much under existing conditions, but we, the bean jobbers of Michigan, trust you will make a strong effort to prevent the proposed reduction. As you know, the growing of beans has become a very large and important business in Michigan. We are producing about 6,000,000 bushels annually, or 70 per cent of the crop of the United States. This crop has paid the farmers of Michigan from ten to twelve million dollars annually. Almost every year there are some beans imported from Europe, but not enough to seriously affect our market, but with the opening of the Panama Canal and a lower duty Japan c ruin our market for the reason that they have cheap labor and a surplus of beans. The export of beans by Japan from Manchuria in recent years has been greater than the entire crop of the United States.

I have a letter from the Bean Association of California, and they are making every effort to prevent the reduction in tariff.

Even with the present tariff Japan has for some years imported into California about 250,000 bushels of beans, and if the tariff is lowered they could control entirely the market of this country.

Thanking you in advance for your efforts in behalf of the Michigan Bean Jobbers' Association, I am,

Yours, truly,

FRED WEICH.

—

LOZIER MOTOR CO.,
Detroit, Mich., April 15, 1913.

Hon. SAMUEL W. SMITH,
House of Representatives, Washington, D. C.

DEAR SIR: We have received several communications from Honolulu in reference to free sugar, stating that if same goes into effect it will affect our trade relations with them.

Sugar represents 90 per cent of the industry of Hawaii, and if it should be put on the free list it would so seriously affect the welfare of the country that their purchases from the United States would be very seriously affected.

Free sugar means simply putting the American people absolutely in the hands of the trust—buying their sugar in foreign markets—and the wrecking of the cane and beet sugar interests of the United States.

I sincerely hope that you will vote against any provision to put sugar under the free list at any time.

Yours, very truly,

H. M. JEWETT, *President.*

The Tariff.

EXTENSION OF REMARKS
OF
HON. AUGUSTUS P. GARDNER,
OF MASSACHUSETTS,
IN THE HOUSE OF REPRESENTATIVES,
Saturday, May 3, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. GARDNER. Mr. Speaker, under general leave to print, I desire to have appear in the RECORD a number of resolutions in favor of a protective tariff. These resolutions originate with sundry bodies of organized labor in my county. I take issue with the official statements which we have heard that organized labor does not believe in a protective tariff. I call attention to the fact that the international president of the Boot and Shoe Workers Union, John F. Tobin, recently appeared in person before the Ways and Means Committee to ask for a duty on boots and shoes:

GLOUCESTER, MASS., *December 30, 1912.*

Whereas we, the members of Local No. 14307, of Gloucester, Fish Skinners, Cutters, Trimmers, and Pressmen, American Federation of Labor, desire to call the attention of Congress and the Senate of the United States to the fact that we respectfully ask that American wage earners be protected from the competition of the lower wages paid in foreign countries by the passage of such a tariff bill as will at least equalize the difference paid in wages here and abroad: Therefore be it

Resolved, That we go on record as a body that we favor such a tariff as will adequately protect the American wage earners, and that a copy of this resolution be spread upon the records of our meeting, and a copy be sent to Congressman A. P. GARDNER and the honorable Senators of this State with the request that they place our petition before the Congress and Senate of the United States.

JOHN E. SOUZA,
Secretary Local 14307, F. S. C. T. & P., Gloucester, Mass.

GLOUCESTER, MASS., *December 31, 1912.*

Whereas the protection of the fish industry of Gloucester is a matter of vital importance to us who make our living at the industry in the local plants; and

Whereas the wages paid in foreign countries are so much lower than those paid in the United States: Therefore be it

Resolved, That we, members of Local Union No. 14317, Fish Workers (women), of Gloucester, Mass., hereby petition Congress for such a tariff as will protect our wages and conditions against foreign labor; and be it further

Resolved, That these resolutions be spread upon our records, and a copy be sent to Congressman A. P. GARDNER and the honorable Senators of this State with the request that they place our petition before the Congress and Senate of the United States, asking them to do whatever possible to protect our conditions.

CLEMMIE BURKHART,
Secretary Local Union No. 14317, Gloucester, Mass.

—

GLOUCESTER, MASS., *January 1, 1913.*

Whereas the protection of the fish industry at Gloucester is a matter of vital importance to us who make our living by working at the industry at the local plants; and

Whereas the wages paid in foreign countries are so much lower in all industries than those paid in the United States: Therefore be it

Resolved, That we, the members of Local 14336, American Federation of Labor, at Gloucester, Mass., hereby petition Congress for such a tariff as will adequately protect the wages and conditions of the American wage earners; and be it further

Resolved, That these resolutions be spread upon the records of our meeting and a copy sent to Congressman A. P. GARDNER and the honorable Senators of this State, with the request that they place our petition before the Congress and Senate of the United States.

GEORGE ROBERTS,
Secretary Ship Riggers' Local Union 14336.

—

GLOUCESTER, MASS., *January 5, 1913.*

Whereas the wage earners of the United States are enjoying higher wages and working shorter hours than those wage earners employed in European and Asiatic countries; and

Whereas the wages and living conditions of American wage earners have been secured under a tariff law which has protected American industries, thereby giving employment to the American wage earner: Therefore be it

Resolved, That we, the members of Gloucester Teamsters' Local Union 266, of the International Brotherhood of Teamsters, affiliated with the American Federation of Labor, hereby petition Congress to protect our employment and scale of wages by the retention of a protective tariff high enough to equalize the difference paid in the wages in the United States and abroad, to the end that our wages and working conditions may be protected from competition of the poorly paid foreign labor; and be it further

Resolved, That a copy of this resolution be spread upon the records of our meeting and a copy sent to Congressman A. P. GARDNER and the honorable Senators of this State, with the request that they place our petition before the Congress and Senate of the United States.

GLOUCESTER TEAMSTERS' UNION, LOCAL NO. 266,
JOHN F. FOLEY, *President,*
WILLARD F. MITCHELL, *Secretary-Treasurer.*

—

GLOUCESTER, MASS., *January 19, 1913.*

Resolved, That we, wage earners, members of Teamsters' Union, Local 266, of the International Brotherhood of Teamsters and Helpers of America, affiliated with the American Federation of Labor, hereby petition your honorable body to protect the fishing interests of Gloucester, Mass., the principal industry of our city, by the retention of a protective tariff high enough to equalize the difference paid in wages in the United States and abroad, to the end that our wages and working condition may be protected from competition of the poorly paid foreign labor; and be it further

Resolved, That a copy of this resolution be spread upon our records, and also a copy of same be presented to Congressman A. P. GARDNER and the honorable Senators of this State, with the request that they place our petition before the Congress and Senate of the United States.

WILLARD F. MITCHELL, *Secretary.*

—

SALEM, MASS., *February 10, 1913.*

Whereas the wage earners of the United States are enjoying higher wages and working shorter hours than those wage earners employed in European and Asiatic countries; and

Whereas the wages and living conditions of American wage earners have been secured under a tariff law which has protected American industries, thereby giving employment to the American wage earner: Therefore be it

Resolved, That we, the members of Wood, Wire and Metal Lathers' International Union, Local 334, affiliated with the American Federation of Labor, hereby petition Congress to protect our employment and scale of wages by the retention of a protective tariff high enough to equalize the difference paid in the wages in the United States and abroad, to the end that our wages and working conditions may be protected from competition of the poorly paid foreign labor; and be it further

Resolved, That a copy of this resolution be spread upon the records of our meeting and a copy sent to Congressman A. P. GARDNER and the honorable Senators of this State, with the request that they place the same before the Congress and Senate of the United States.

Resolved, That we, the citizens of Lawrence, in mass meeting assembled at city hall, hereby petition Congress to protect our employment and scale of wages by the operation of a protective tariff high enough to equalize the difference paid in the wages and cost of production in the United States and abroad, to the end that our wages and working conditions may be protected from competition of the poorly paid foreign labor; and be it further

Resolved, That a copy of this resolution be sent to Congressman MICHAEL F. PHELAN and the honorable Senators of this State with the request that they place the same before the Congress and Senate of the United States.

JAMES R. MENZIE, *Chairman*.

The Tariff.

SPEECH
OF
HON. EDWARD E. BROWNE,
OF WISCONSIN,
IN THE HOUSE OF REPRESENTATIVES,
Thursday, May 1, 1913.

On the Bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. BROWNE of Wisconsin. Mr. Speaker, I am in favor of a downward revision of the tariff, and would like to vote for some of the provisions of the Underwood tariff bill, but under the order of the Democratic majority one must vote for the bill as a whole or vote against it. I must therefore vote against this tariff bill.

I would not for a moment refuse to vote for the pending bill because it is a Democratic measure. I will cheerfully vote for any measure that is presented here by Democrats, Progressives, or Republicans that I think is right, regardless of what a caucus of the Republican Party, the party in which I claim an honorable membership, should dictate.

It is hard for me to comprehend the partisanship in this the greatest legislative body in the world.

In Wisconsin we have no such partisanship. As a member of the senate of that State for six years I can truthfully say that during that time there has not been a single caucus by the Republican Party—and I do not think by the Democratic Party—on a matter of legislation. I do not know of a single legislative measure in that State upon which party lines have been drawn.

As a result there has been written on the statute books of Wisconsin in the past 12 years some of the most wholesome and salutary laws that can be found on the statute books of any State.

I refer to the Wisconsin primary-election law, the railroad-rate law, the public-utility law, the anti-lobby law, workingmen's compensation law, State-aid road law, and other progressive legislation.

These laws were not written in a partisan spirit. They were not written by Republicans alone, but the Democrats of Wisconsin have sat down at our tables and assisted us.

The same nonpartisan spirit has been shown in the appointment of our commissioners and in the election of our judges from the lowest to the highest.

It is therefore hard for a Wisconsin Representative to understand this strong partisan spirit that is exhibited in the framing of this tariff bill and in the temper of the discussion of it on the floor of the House.

It is hard also to understand how our own colleagues from Wisconsin on the Democratic side can be so subdued and curbed by the Democratic caucus as to vote against their own convictions and the interests of the people of the great State they represent.

One of the first things the Republicans did upon the convening of the Sixty-third Congress was to have a conference and agree that all future conferences and caucuses should be open to the public, and that no Member should be bound by a vote of the conference or caucus.

The Democrats have criticized, and justly, "Cannonism" and the arbitrary dictation of caucuses, and this was part of their thunder in the last two campaigns. But listen to the confession of the distinguished Democrat, Mr. ADAIR, of Indiana. I quote from his speech, delivered April 25, 1913, on page 417 of the RECORD.

Mr. Speaker, I shall vote for this bill as it was reported from a Democratic caucus without dotting an "i" or crossing a "t." I am one of those who believe in majority rule, and when a caucus of my party writes a tariff bill, regardless of what the rank and every item in the bill meets with my approval or not, I shall stand by the action of the caucus and give the bill my hearty and enthusiastic support. No Democrat can do otherwise.

In this frank and somewhat remarkable speech the learned Representative from Indiana admits that free wool is wrong. He admits that putting wool on the free list will do the wool-growers in the United States an irreparable wrong; that it will also result in losing the Government $9,000,000 annually in the revenue and transfer a like amount into the pockets of the Woolen Trust, no part of which would ever reach the consumer through cheaper woolen goods.

In his exact language, the Representative from Indiana says:

In other words, by placing wool on the free list you give the manufacturer cheaper raw material and at the same time continue a rate of duty on the finished product which gives him a monopoly of the American market and enables him to extort from the American consumer a price to suit himself. I want the people to have cheaper woolen clothes, cheaper woolen blankets, and cheaper woolens of every description, but they will never get them as long as the Woolen Trust has a monopoly of the market. The records of the Treasury Department show that a large amount of woolen goods made in American mills are exported every year to foreign countries and sold in competition with the world. A clothing manufacturing establishment in New York City has opened up branch houses in London, Liverpool, Berlin, and Paris, from which it sells annually in competition with the world nearly $2,000,000 worth of ready-made clothing made in the city of New York. In view of this fact, what excuse is there for giving them a high rate of duty on clothing and a monopoly of the American market? The only theory upon which the doctrine of free wool and a high duty on manufactured woolen goods can be based is upon the ground that if you add $9,000,000 more to the profits of the woolen manufacturers they may possibly allow a little of it to look down on the consumer. It has been clearly shown by Senator LA FOLLETTE on the floor of the Senate that the Woolen Trust under the Payne-Aldrich bill has been robbing the American people of over $100,000,000 annually on manufactured woolen goods, and I do not now want to add $9,000,000 more to that robbery. However, as I said in the beginning, I shall yield my own judgment and abide by the action of our Democratic caucus and vote for this bill.

Undoubtedly what actuates the honorable gentleman from Indiana actuated the rest of the 200 Democrats he refers to in his remarks, and, in fact, all the Democrats in the House.

It has been said by several of the Democratic leaders in this debate—and is undoubtedly true—that the House of Representatives should frame a tariff bill without interference; that it should not delegate any of its authority to anyone, but should jealously guard every power given it by the Constitution as the originator of revenue measures; and yet listen to the confession of one who attended and participated in and was an honored member of the Democratic secret caucus which framed the Underwood tariff bill:

Mr. Speaker, the 200 Democrats I refer to who voted against free wool one and two years ago have not changed their views on this question. They believe as I do this very minute, but the difference between them and myself is this: I voted in caucus in accordance with my honest judgment, and they laid aside their own convictions and voted the judgment of another for reasons better known to themselves. The chairman of the Ways and Means Committee, Mr. UNDERWOOD, stated that his committee agreed upon a duty of 15 per cent on raw wool, and wrote it in the bill, but struck it out at the request of the President. Had not this request been made by the President, every Democratic Member of the House, including the Ways and Means Committee, would now be voting for a 15 per cent duty on raw wool. I am giving these facts, Mr. Speaker, to show that my position on the wool question is the same as that taken by the Ways and Means Committee and practically every Democratic Member of the House.

I quote the Representative from Indiana in the same speech, page 417 of the RECORD.

The bold, frank admission that if some one outside of this body who had valuable favors to bestow on the members of the Democratic caucus had not demanded that the tariff on wool be stricken out, we would have had a tariff on wool in the present bill, and the United States Treasury have been $9,000,000 a year richer in the revenues and the manufacturers of woolen goods, the great Woolen Trust, $9,000,000 a year poorer; but the Democratic majority is willing to bow to that power, surrender the right of voting according to their convictions, presumably for the thousands of offices that have not yet been distributed.

The Democratic House one and two years ago passed tariff bills which carried a duty of 29 per cent on raw wool. These tariff bills were voted for practically unanimously by the Democrats and indorsed by the Baltimore convention.

I am glad to know the reason why this change of heart in the Democratic Representatives, and accept the explanation from one of their own number.

The same motives have also caused this same secret Democratic caucus, which is now king, to remove the tariff on practically all farm products and raw material, without taking it off to the same extent on the finished product, no matter whether the finished product is manufactured by a trust, and selling its wares in the markets of the world, or not.

I represent a district, Mr. Speaker, that has as great agricultural interests and possibilities as any in the United States—a great potato, stock, butter, cheese, and poultry country. Over 1,000,000 bushels of potatoes are shipped from my own city annually, and of the 87 starch factories in the United States 6 are located in this potato district.

Figuring the price per bushel received by the farmers for a period of 10 years, the price of potatoes will average from 35 to 40 cents per bushel. It costs on an average in Wisconsin to raise potatoes and market them from 20 to 30 cents per bushel, making a profit for the producer on an average of from 10 to 15 cents per bushel, which you must agree is not a large profit.

In the year 1912 there was imported into the United States 13,735,690 bushels of potatoes, which paid a revenue of $3,433,925—at the rate of 25 cents per bushel.

Certainly as a revenue producer this tariff on potatoes was a success, and at the same time it protected the farmer against competition with the farmers who have cheaper land, cheaper help, and are cheaper men. There is a great deal of land in Wisconsin and other States that is adapted to the raising of potatoes which can not be utilized or made profitable for raising other farm products. The farmer, by getting a good price every three or four years, makes it average up with the years when there is an overproduction and he has to sell at a loss.

The charge that the farmer is responsible for the high cost of living is untrue. If you figure the value of his land and the cost of producing the crop, including the value of the farmer's own work at the going wages for farm hands, you will find that the farmers are not getting 5 per cent interest on their investment.

If farmers are making a large profit, why do not the capitalists of the country buy more farms and hire the work done? Now and then a capitalist buys a farm and uses it as a plaything, but does not pretend to make a profit. As one of these "rocking-chair farmers" said to his guest at his dinner table, "You can take champagne or milk; both cost me the same."

Why is it that farmers in all sections of the United States are leaving the farms and going into the cities and seeking other employment if farming is so very profitable?

If conditions are so good in the United States for farming, why is it that in the past three years over 100,000 American farmers have gone to Canada, where they can get cheaper help and cheaper lands?

The late census shows that the rural population in the last 10 years in the great agricultural States of the Middle West has decreased.

What protection the farmer has he needs.

Why do you take the tariff off from potatoes and practically all other farm products? You answer, it is to give these food products to the people cheaper. What does that mean? It means, then, lowering the price the farmer receives; and God knows the American farmer is earning every dollar he gets for his products and earning it by the sweat of his brow.

If you want to strike at the high cost of living, enact a law that will facilitate distribution of farm products; give the Interstate Commerce Commission the same power that we give our Railroad Rate Commission in Wisconsin to lower freight rates. Do not allow the railroads of this country to pay dividends on from $10,000,000,000 to $15,000,000,000 worth of watered stock. Create a commission and give it ample powers and equipment to assist the farmer to cooperate so that the ultimate consumer will buy more directly from the producer, and by doing this you will bring down the high cost of living without driving more farmers off their farms.

Our last Secretary of Agriculture, Mr. Wilson, in his report for 1911, made a conservative statement when he said that "the farmer does not get 50 per cent of the price the consumer pays for farm products."

Who gets the other 50 per cent? Or, in other words, of the $10,000,000,000 crop that was produced in the year 1912, who got 50 per cent, or $5,000,000,000 of it? The railroads for transporting it and the commission men, wholesale merchants, jobbers, and the dozen and one other hands the farm products go through before reaching the consumer.

In the palmiest days of feudalism no feudal lord dared to exact from the tiller of the soil, his tenant, 50 per cent of the fruits of his toil; yet we allow it in America, and then attribute the high cost of living to the farmer.

The cost of living is undoubtedly higher than it should be, but in the large centers of population the trouble is not only the high cost of living, but the cost of high living.

POTATO STARCH.

Another part of the potato industry is the production of potato starch.

Potato starch is a by-product. It would not pay anyone, as you will see by the figures I submit, to raise potatoes for starch. The only reason or justification is that every few years there is an overproduction, and then the price of potatoes drops way down below the cost of producing them.

Potatoes are then made into starch, and what money the farmer who raises the potatoes gets from the starch company is that much saved from the failure caused by the overproduction and consequent low price.

Even though the farmer can not make much more than good wages for himself and team for hauling, if he has to haul a considerable distance, to say nothing about the cost of producing the crop, the money paid for starch potatoes materially lessens the losses in such years.

Under the present law there is a tariff of 1½ cents per pound on potato starch. This is reduced one-half cent per pound, or 50 cents per 100 pounds, by the Underwood bill; but it is a sufficient reduction to cripple if not wholly destroy the business.

In many places the starch factories are owned by associations of farmers and run as cooperative plants.

POTATO STARCH AND OTHER STARCHES.

At the outset I want to emphasize the distinction between potato starch and all other starches, whether corn, wheat, rice, tapioca, or any other starch.

I earnestly request that you carefully consider this industry from four different standpoints, viz:

First. As to trusts and competition.
Second. As to exports.
Third. As to imports.
Fourth. As to revenue.

There is no trust or combination.

The potato-starch industry in the United States is confined to 87 factories, 70 of which are located in the county of Aroostook, Me., and the remaining 17 in the States of Minnesota and Wisconsin, 6 of these factories being in my congressional district.

The largest number of factories owned by any one man, firm, corporation, or association is 8; the next largest, 7; and of the remaining 55 no more than 2 have the same ownership.

I would further say that there exists between all of these different manufacturers free and untrammeled competition. There is no "gentlemen's agreement" of any kind, either to control the price paid the farmers for potatoes or the price asked for the finished product.

There is no potato starch exported.

At all times within the last 10 years there has been a substantial importation of the foreign potato starch. These figures appear in the following table:

Potato starch imports.

Fiscal year.	Pounds.	Value.	Duty.	Duty collected.	Ad valorem rate of duty.
1903	4,888,341	$94,338.00	1½ cents per pound.	$73,325.17	77.72
1904	4,438,038	104,575.64	....do....	66,570.65	63.66
1905	4,462,439	114,260.00	....do....	66,936.98	58.58
1906	3,825,387	93,811.00	....do....	57,380.88	61.17
1907	4,826,167	104,641.00	....do....	72,392.87	69.18
Total	[1] 22,440,392			336,606.25	
1908	4,844,520	$113,807	1½ cents per pound.	68,168	59.90
1909	15,418,259	351,256	....do....	231,274	65.84
1910	9,812,905	255,049	....do....	147,194	57.71
From Cuba	4,609	124	1½ cents per pound (less 20 per cent).	55	
1911	7,724,912	202,482	1½ cents per pound.	115,874	57.23
From Cuba	4,672	147	1½ cents per pound (less 20 per cent).	56	
1912	14,010,532	405,135	1½ cents per pound.	210,158	51.87
Total	[2] 51,520,409			772,779	

[1] 11,220 tons. [2] 25,710 tons.

All figures in these tables taken from Department of Commerce and Labor.

An analysis of these figures will show that although the quantity imported varies from year to year, according to the amount of potato starch manufactured either here or abroad, the total importations in the last five years exceed by over 100 per cent the total importations for the five years immediately preceding, viz, 25,710 tons were imported during the last five years, while only 11,220 tons were imported in the previous five years.

Considering the above figures, it is apparent that not only has there been during every year of the past 10 years a substantial importation of the foreign product, but also that the extent of the importation shows a remarkable increase.

During the fiscal year ending July 30, 1912, the total importation was 7,005 tons, which would show the amount considerably above the average for the last five years, but as these figures may be somewhat exceptional we have here given the average instead of the figures for that year alone.

Reference to the above table will show that the amount of revenue contributed by potato starch under the present rate of duty is very considerable as compared with the total annual consumption in the United States. It has, of course, increased in exactly the same ratio that the imports have increased, the total of the last five years being over 100 per cent greater than the preceding five years, viz, $772,779 being collected during the last five years and $336,606 during the five years immediately preceding.

The consumption of potato starch in this country in the last 10 years has been 136,930 tons, an average of 13,693 tons per year. Of this amount consumed the proportion of imported has gradually increased, until it has reached during the year 1912 the amount of 7,005 tons, paying a revenue of $210.158.

If the duty is reduced to 1 cent per pound the imports must be increased to 10,507 tons to maintain the present revenue, leaving only 3,186 tons for the American production.

If any potato starch is to be produced in this country it will be far in excess of 3,186 tons, necessarily reducing the importations of this article, with a corresponding reduction of revenue.

In conclusion, I would urge that, inasmuch as there is no trust, combination, or monopoly of any kind in this industry, as there is already an active and growing importation, as none of the product is exported, substantially none is used for household purposes, and as potato starch already yields its fair proportion of revenue to the Government, no valid reason exists for the lowering of this duty, with the injurious results necessarily entailed to the manufacturers engaged therein and the farmers benefited thereby, especially as the only requests for a reduction in the duty come not from consumers of the product, but from representatives of German factories and American dextrine manufacturers.

The following figures are offered as showing the necessity of maintaining the present duty if this industry is to continue. All averages given are based on the past 10 years, exclusive of 1912, as the figures of that year are not yet available.

Total potato starch manufactured past 10 years—pounds	200,000,000
Total value, at $0.038 per pound	$7,600,000
Total number of starch potatoes used—barrels	10,000,000
Paid for same at average price, 45 cents	$4,500,000
A ton of potato starch costs the manufacturer:	
100 barrels starch potatoes, at 45 cents	$45.00
Overhead charges	15.20
Operating expenses	10.00
Total	70.20
Or $0.351 per pound.	
Average profit last 10 years:	
Selling price	$0.0380
Cost	.0351
Profit per pound	.0029
Or 29 cents per 100 pounds.	
Average price of foreign potato starch last 10 years	.0240
Duty	.0150
	.0390
Average price domestic potato starch last 10 years	.0380
Difference	.0010
Or 10 cents per 100 pounds.	

It is very evident if the potato-starch industry is to be maintained and continue to furnish a market for these otherwise valueless potatoes the present duty must be maintained.

We would further suggest that although the total of the above figures seem insignificant and its value to the farmers of the country as a whole too slight to be of importance, nevertheless, the factories being practically all located in a few localities, the preservation of the industry is of enormous importance to the farmers of those sections.

PROTECTION FOR THE PAPER INDUSTRY.

I have a petition, Mr. Speaker, signed by over 14,000 wage earners in 149 pulp and paper mills, asking that the tariff on wood pulp and paper remain the same as it was under the Dingley law.

The first Federal tariff bill framed placed a duty on the imports of foreign-made paper.

The framers of our early tariff laws did not proceed on the theory of the framers of the Underwood tariff bill, that the only object of a tariff act was for the purpose of raising revenue.

The preamble of the act of July 4, 1789, our first tariff law, declared that the purpose of the act was "for the discharge of the debts of the United States and the encouragement and protection of manufacturers." Such was the policy adopted by the founders of the Government and framers of the Constitution, and they based it upon the constitutional provision which empowered Congress to "lay and collect taxes, duties, imposts, and excises, to regulate commerce with foreign nations, and to legislate for the general welfare."

Yet despite all this the last Democratic platform declared that a protective tariff was unconstitutional.

That good old Democrat, Andrew Jackson, said:

> The right to adjust duties with a view to the encouragement of domestic branches of industry, if not possessed by the General Government, must become extinct, and our political system would present the anomaly of a people stripped of their right to foster their own industry and to counteract the selfish and destructive policy which might be adopted by foreign nations.

Until the act of 1911 there was no marked change in the policy of the Government to encourage and protect the paper industry.

The Walker Act of 1846 gave to the paper industry a duty of 30 per cent, and even the Gorman-Wilson Act of 1894 levied a duty of 15 per cent on print paper, 20 per cent on writing paper, and 30 per cent on surface-coated paper.

Under such a policy the manufacturing of paper in the United States increased and prospered, and instead of 4 mills at the time of the Revolution, the Tariff Board reported in 1911 that there were 824 plants making paper of some kind, with a total productive capacity of 5,196,398 tons.

In Wisconsin, and in the district I have the honor to represent, the paper industry bids fair to become one of the greatest manufacturing industries of Wisconsin. It was not believed that it was the intention of Congress, when it passed the reciprocity pact, to place wood pulp and paper under 4 cents a pound on the free list regardless of Canada's action, but this was a joker which was placed in the bill.

We believe that this and the whole reciprocity treaty should be repealed, and the tariff on wood pulp and paper remain the same as it was before.

To-day the Canadian press is enthusiastic over the likelihood that the present tariff bill will pass, and it has been reported that Canadian lobbyists have worked for the passage of this bill.

The reciprocity pact with Canada still remains on the statute books awaiting the approval of Canada, which is only withheld because of the prejudice of the bogey of annexation. This law not only on paper but upon its agricultural schedule, is the most unjust and discriminating law to the great agricultural classes of the country, in my mind, that was ever written, and was so characterized by every grange and farmers' society in the United States. I condemned it when President Taft was urging it, and I condemn it now and urge its repeal by the Democratic Party that is responsible for it and has a majority close to 150 in this House.

Canada, with its 8,000,000 inhabitants, has more acres of land that are subject to cultivation than the United States. It has water transportation, and its great system of governmental railways gives its shippers advantages that ours do not have, and with their new cheap land and cheap labor they are going to compete for the great markets of America, where over 90,000,000 of consumers buy.

Mr. Redfield, Secretary of Commerce, is quoted in the papers as saying:

> It will hardly be contended that our farmers can not raise potatoes save for the high duty, or that the Government needed the million or more which was collected in this single winter on potatoes. It seems to be a sad and shameful thing that the food of the many should have been taxed at many times the highest rate known for any real estate tax. I think too highly of our farmers to believe that they would desire, much less claim, that such a condition was necessary for their protection.

Looking up Secretary Redfield's biography, we find that he was born 55 years ago at Albany, N. Y.; has been director of the great Equitable Life Insurance Co. of New York; interested in a great manufacturing plant; is a city man and undoubtedly does not know the cost of raising a bushel of potatoes, a bushel of wheat, and other farm products, but looks at prices from the city standpoint of a Brooklyn or New York consumer.

I prefer to take the testimony of the great agricultural papers which voice the thought and sentiment of the farmers of the land.

The National Farm and Stock Grower, an independent newspaper, in a recent article said:

> We have no hesitancy in saying, as our editorial opinion, that the admission of farm products free of duty from other countries will gradually undermine the productive industries of this country. The change will not take place in a day, but will ultimately come.

Bismarck, the great German statesman, the founder of the German political and industrial empire, urged Germany to imitate the tariff system of the United States, because he said:

> It is my deliberate judgment that the prosperity of America is mainly due to its system of protective laws.

A tariff bill that reduces the tariff from 30 cents to 15 cents per bushel on barley and places the tariff on barley malt at 25 cents per bushel and on pearl barley at 1 cent a pound, or 48 cents a bushel, discriminates against the farmer in favor of the malster, brewer, and the manufacturer of prepared foods.

A tariff bill that takes the tariff off of rye and protects the distiller $2.60 per gallon on rye whisky discriminates against the farmer in favor of the distiller.

A tariff bill that reduces the tariff on live poultry to 1 cent per pound and places a tariff of 2 cents per pound on poultry after it has been killed discriminates against the farmer in favor of the packer and market men.

A tariff bill that lets practically all agricultural and dairy products, all vegetables, like onions, cabbage, and so forth, into this country free of duty, when there is a bare margin of profit in the raising of these products, is unjust, and strikes a blow at the greatest industry which we have in America, and the one upon which the prosperity of this country is most dependent.

The Underwood tariff bill does all this, and is more radical and sweeping than the Wilson tariff bill, which brought upon this country disaster and panic.

Sixteen years ago President McKinley called Congress in extra session to repeal the Wilson tariff bill and to pass a tariff bill along protective lines. The repeal of the Wilson bill and the passage of the Dingley tariff bill was followed by a wonderful era of prosperity.

Now, President Wilson calls Congress in extra session to revise the tariff on a basis still lower than the Wilson bill, and he uses almost the identical language of President McKinley in his proclamation in calling the special session.

The passage of the Underwood bill will be a reversal of a great industrial policy of the United States, an industrial policy which has brought us great prosperity.

If this prosperity continues under the new industrial policy of "tariff for revenue only" it will be the first time in our country's history.

The Tariff.

EXTENSION OF REMARKS OF HON. DENVER S. CHURCH, OF CALIFORNIA,

IN THE HOUSE OF REPRESENTATIVES,

Friday, April 25, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. CHURCH. Mr. Speaker, I have sat here for several days listening to gentlemen from both sides of the aisle giving reasons for the tariff hope that is within them. The advocates of a tariff for protection I find have two arguments which they bring forth on all occasions and upon the slightest provocation. The first of these arguments runs something like this: "Look at the wonderful development of this country during the last 50 years while the grand old Republican Party was steering the ship of state; look how our cities have grown, our country developed, and how our ships carry our products to every land." I might quote on and on, for there have been volumes written on the subject and orators by the thousands have proclaimed themselves hoarse in different parts of the country painting word pictures as to what the grand old party has done. Those making this argument ought to know that during the last 50 years in this goodly and favored land any people would have prospered under almost any form of government dominated by any political party. It is not the Republican Party that should have credit for the country's prosperity during the last 50 years.

The credit is due to the Creator of all things, who made and gave to us this goodly land. You might as well give a person credit for eating when he is hungry as to give our people credit for prospering under our marked and wonderful conditions. Is the Republican Party responsible for the great Mississippi Valley, rich as the Valley of the Nile; for the mountains of iron in Pennsylvania and the mountains of gold in Colorado? Is it responsible for the mother lode in my native State, California? Is the Republican Party responsible for the great West, which, 50 years ago, was a land almost unknown; for Alaska, the land of hardship, of glaciers, and river beds of gold? With these resources I submit any people that ever lived would have prospered. During the last 50 years gold mines, the marvel of the entire earth, have been discovered. The greatest valleys in the world have been redeemed from nature's hand, and with such a broad and sweeping domain undeveloped and unexplored, with such fertile soil, such healing air, with such an energetic people, and with such a flag, it would have been strange indeed had we not developed with the years.

The second argument, so often and tempestuously used, is this: The only time the Democratic Party has been in power in 50 years its administration was marked by a blighting panic. I have heard gentlemen use the above argument on a score of occasions. It has been made by old and battle-scarred Republican veterans—and, by the way, there are many scarred Republicans now—as well as by the later arrivals, whose feet seem uncertain on this floor. I observe this argument is not addressed to the bold, fearless spirits of this country who only ask the question, "Is it right?" but to the weaklings and cowardly ones whose criterion has always been, "Is it safe?" My answer to this grubstake argument is, "The premises are not true. The panic of the nineties referred to began in 1892, long before election and while the Republican Party was still in power; thus one might as well blame the city of Galveston for the disturbance in mid-sea that caused the tidal wave, because later it was in the pathway of the storm, as to blame the Democratic Party for this panic that received its impetus and was far on its sweeping way before the Democrats were in power.

A young man here, making his first speech, rose to his full height the other day and said, "The Democrats have done nothing for this country in 50 years but to bring on a terrible panic in 1893." A Democrat calmly rose and said, "Does the gentleman know the panic referred to started during the administration of the Republican Party in 1892?" I will not try to portray the effect this question had upon the orator of the wilds. He soon sat down, gazed toward the open window, and seemed to be longing for the quietude of home.

I think my Democratic brother ought to be a little careful in asking questions so promiscuously, for perchance he may ruin some one and his politics just in the dawn of a noisy and conspicuous career.

After all, when we consider what the conditions are in this country and what they ought to be under the natural advantages we possess; when we consider the poverty there is here, and that 53.5 per cent of the families are living under rented roofs; that under the protective policies of the Republican Party a small per cent of the people own a large per cent of the wealth; that we have two classes in our midst—the extremely rich and the extremely poor—we are forced to the opinion that the political party that has been in power during all these years is in no position to boast in regard to what has come to pass.

I am greatly pleased with the income provision of our bill. It removes in a measure the burden of taxation from the poor and laboring man and casts it upon the shoulders of the rich. Heretofore the laboring classes have borne 99 per cent at least of the indirect taxation levied for the support of the Government. This is made manifest when we remember that not one in a hundred is rich. The income tax solves two great problems which have been vexing the American people for years—first, the procuring of sufficient funds necessary to defray our Federal expenses; second, it curtails to a degree the flowing of the money into the coffers of the rich.

I note with interest a statement in the New York World, to the effect that 29 great millionaires of this country will pay, according to the terms of our measure, between $7,000,000 and $8,000,000 per annum. This money, instead of serving no purpose whatever other than to swell the already inflated fortunes of the rich, will be turned back to the Government and the people to serve its purpose and for redistribution.

It is claimed by the framers of this income measure that it will provide, to be used in defraying Federal expenses, $70,000,000, none of which will be paid by the poor and needy, but by men having an annual income of $4,000 or more. I have every faith in this system of taxation, and firmly believe that in the future, when the theory is developed by practical experience, it will solve more thoroughly than is now generally understood the one great menace to our country, namely, the accumulation of wealth in the hands of the few.

Mr. Speaker, I am pleased with our new tariff bill, which is so soon to become a law. I do not consider it an infallible measure, and I presume there are few who do. It does not suit me in every particular. It would be strange, indeed, if it suited everyone, but in my enthusiasm for the bill I almost forget the things I do not like.

I think the lemon industry of my State will suffer greatly by the tariff reduction. I have done all that I can to prevent it, and will work in the future along the same lines, trusting to see the same properly adjusted. I do not maintain the views I do in regard to lemons, simply because they are grown in my district, for the hatchet of the great Ways and Means Committee has fallen heavily upon a dozen other commodities in which my people are directly interested, but against which I have made, and will make, no complaint.

Lemons are grown for commercial purposes in southern Italy, Sicily, and in southern California only. Without California, the Italian growers would monopolize the world, and even now they do, outside of this country, and with the duty of 1½ cents per pound they defy our tariff laws and our lemon growers and supply one-half of what we use. In view of this it seems to me it was not necessary to reduce the tariff on lemons to secure greater competition from abroad. Bold, indeed, is the demand that the Italian should be permitted by American laws to have his duty cut from 1½ cents per pound to enable him to extend his market further in this country.

How can the Italians grow lemons and ship them to our shores and compete with our people? Is it because they have better climate or soil? Are the natural conditions more favorable to them? Is it a fact that the Creator has done more for that Italian land than he has done for our people in the Golden West? No; our sun is as warm, our sky is as blue, our air is as pure, and our soil is as deep. The causes are of an artificial nature. We pay our men in California $1.75 to $3 per day for working our orchards. They pay in Italy, for the same work, from 20 to 60 cents a day. In this country we encourage the men to do the work, while in Italy one-third of the labor in the orchards is done by women and children, with an average daily wage of from 20 to 25 cents. In this country, for the good of our citizenship, we have humanitarian laws restricting the hours of labor, and laws preventing women and children from being worked too hard, obstacles which the Italian lemon grower never encounters. Again, our freight rates to the Atlantic seaboard are 84 cents per box for lemons, while their freight rate by sea from Sicily to the same ports is but 30 cents per box.

From the above facts it seems a tariff duty must be placed high enough on imported lemons to cover the difference in labor costs and the shipping rates between this country and Italy, otherwise the home lemon industry will be severely injured if not killed, the very thing the Democratic Party declared it is not in favor of doing—injuring a legitimate industry. I call the attention of the gentlemen to the fact that in addition to not injuring a legitimate industry we believe in a tariff for revenue only.

By reducing the tariff on lemons we accomplish two results, each contrary to our avowed desires. First, we injure a legitimate industry, and, second, we reduce in this bill for revenue only our revenue from $2,184,548.14 to $901,250, the estimate under the new rates fixed—page 177—by the committee. So it seems by injuring this legitimate home industry the Government also injures itself by the loss of $1,283,298.

What are its advantages, if any? "Oh," says one, "it brings down the price of lemons to the consumer," and I submit this can be the only purpose in the reduction, for, from the standpoint of revenue, it is a failure, and from the standpoint of stimulating healthy competition, it is not necessary, for competition is 50 per cent now.

There were consumed in this country last year about 1,280,000,000 lemons. Divide this number by 100,000,000, approximately the number of people now in the United States, and we find the per capita consumption is a dozen lemons each year. It will also appear that this terrible burden cast upon the consumers of lemons in this country, when we take the whole revenue derived from lemons last year, $2,184,548.14, and double it, making $4,369,096.28, on the theory that the duty on imports increased in like proportion, the selling price of the home product, we find the annual per capita tax on lemons amounts to a trifle over 4 cents. Abandon $1,280,000 of revenue annually and our party's declaration that we will injure no legitimate industry for the sake of saving between 2 and 3 cents per capita to the American people annually, the entire 4 cents and a fraction per capita would not be totally saved to the consumer owing to the fact that we still propose to get, as mentioned before, nearly one-half the revenue formerly obtained.

Some one says the reduction will enable the sick people suffering in hospitals to secure the necessary lemons for medicinal purposes. T. Harold Powell, while before the Ways and Means Committee on the 20th of January last year, stated:

> I secured data recently from 15 of the leading hospitals of New York and found that the annual per capita consumption of lemons in these 15 hospitals is about a tenth of a lemon a year.

From the above it would appear that no hasty and radical move is absolutely necessary in order that the sick people of New York shall not suffer for want of lemons. I do not believe, gentlemen, that if this new rate on lemons is put in force you will find men standing in groups on the streets rejoicing in the fact that the Democratic administration has saved them each between 2 and 3 cents on their annual cost of lemons; but I do know that now, out in California, as fair a land as there is on earth, a cloud of despondency has settled above the homes of those law-abiding and heretofore happy people by reason of this proposed tariff reduction, and the people stand in groups at this, to them, an evil hour, discussing the perplexing problem as to what will become of the lemon industry, in which they have an investment of $30,000,000.

Should the lemon industry be killed by this tariff reduction, many predict we will have established by our tariff enactment a lemon monopoly across the sea, that which the Democrats most of all men despise, which will result when there is no competition here in raising the price of lemons to the consumers of this country, and thus in the end we will have brought to pass another condition which the Democrats declared against.

In my judgment, the lemon consumers of the United States are not interested in the reduction of the tariff on lemons, for at the late hearings before the Ways and Means Committee no one representing the consumers appeared, but a number of people came and asked, almost with tears in their eyes, for a reduction, all of them representing either commission merchants, shippers, jobbers, manufacturing "shook" interests, or, last but not least, the Italian Chamber of Commerce of New York. I do not mean by this that I think the lemon producers of this country will be driven out of business, for I have the utmost faith in the justness and wisdom of this great committee, and I believe before such a deplorable condition will come to pass the true facts will be known and the duty, at least in a measure, will be restored.

For every objection I have to this bill there are a hundred points that strongly appeal to me. I like it because it places agricultural implements on the free list, so the farmer can buy his plows, his harrows, headers, harvesters, reapers, agricultural drills and planters, mowers, horserakes, cultivators, thrashing machines, wagons and carts, and all other agricultural implements of any kind and description, either in whole or in part, including repair parts, without paying a tribute to the smokestacks and manufacturing establishments of our country. This helps 12,000,000 farmers; and what helps the farmer helps one and all, for upon the farm we all depend.

I like the bill because sewing machines are on the free list. This will cause common rejoicing in every home.

And typewriting machines are free, and the girl who chooses activity to an idle life, or who must work for her daily bread, will not be taxed to enrich a favored few.

This is the time when the cry of better roads is echoed everywhere. I like the bill because tar and oil spraying machinery used in the construction and maintenance of roads, as well as all other machinery used in making roads, are free.

I have a few hundred cattle in California, but it pleases me that meats—fresh beef, veal, mutton, lamb, and pork; bacon and ham; meats of all kinds, prepared or preserved, not otherwise provided for—are free. These articles of necessity are the poor man's friend and can be purchased without rendering a tribute to the packing Cæsars of this country.

I am glad potatoes and white flour are on the free list, a benefit to the laboring classes everywhere. I am pleased that barb wire bears no duty, so the small farmer in the West may fence his range without being reminded of interests big and far away.

I am glad the tax on common soap has been lowered from 20 per cent to 5 per cent; that the furniture of the poor man's house has been lowered from 35 per cent to 15 per cent; that the tax on bread and biscuits of 20 per cent has been removed and that these necessities are now free; that the tax on cotton clothing has been reduced from 50 per cent to 30 per cent; that flannels have been reduced from 93 per cent to 25 and 35 per cent; that the tax on women's and children's dress goods has been reduced from 100 per cent to 35 per cent; that the tax on shoes has been removed, an article that every man, woman, and child, rich or poor, must use; that the manufactures of cotton have been reduced from 46 to 30 per cent; that the manufactures of wool have been reduced from 56 per cent to 18½ per cent.

I might go on for an hour and tell why I like the bill, but with the heretofore mentioned facts in its favor, I do not know how anyone can raise his voice against it. It places necessities on the free list, and thus helps the poor. It procures the revenues from luxuries, and thus injures no one. It interrupts the amassing of large fortunes by taxing incomes. It assists the majority of our people and the laborers everywhere. This bill is not the rich man's enemy, but is the poor man's friend. It comes as a relief to the American people, as a pledge fulfilled on the part of the Democratic Party. At its passage we should have seasons of rejoicing. It is what we have been proclaiming and looking for for years.

The Alaska Coal Problem.

EXTENSION OF REMARKS
OF
HON. ALBERT JOHNSON,
OF WASHINGTON.

IN THE HOUSE OF REPRESENTATIVES,

Saturday, May 3, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. JOHNSON of Washington. Mr. Speaker, a colleague from my State of Washington having declared "That the greatest band of cutthroats in the world now have a strangle hold on the throat of fair Alaska," I desire, under the general leave to print, to submit the following paper, which has been carefully prepared by Mr. T. P. McDonald, 1220 Alaska Building, Seattle, Wash., discussing the problem "How shall the Alaska coal land be opened up for development?" His paper follows:

THE ALASKA COAL PROBLEM.

In the year 1906 Alaska was very prosperous and was evidently on the eve of great development of her matchless mineral and coal resources. Railway construction was started from two good harbors on the southwest coast to the interior that would develop the two high-grade coal fields—the Matanuska and the Bering River—and would also afford rail transportation to the interior that would assure the development of many important mining districts, both placer and quartz.

This important era of development was brought to a sudden halt when like a thunderbolt out of a clear sky an Executive order was issued on November 12, 1906, withdrawing the coal lands from entry, thus abrogating the coal-land laws and bringing all progress to a sudden stop.

It has been quite generally stated that this Executive order was without authority of law, but that did not affect its effectiveness. The law remains suspended to this day, and the problem that has confronted Congress for the past six and one-half years is how to open the Alaska coal lands to development. All realize that railroads can not build nor can the country progress until the coal is developed. No coal had passed into private ownership at the date of the withdrawal.

The seriousness of the situation is well illustrated by the condition existing at Fairbanks, the most important mining town in the interior of Alaska. This is a placer-mining community, and the gravel beds being frozen to unknown depths must be thawed to facilitate mining.

This requires a large amount of fuel. Coal not being available the miners have drawn on the timber for their fuel supply. The demand has been so great that the timber has become exhausted for many miles surrounding the mines, with the natural result that wood is very expensive. A stranger on approaching Fairbanks last September would have observed the hillsides covered with stumps that had been dug up and piled in great heaps to be burned for fuel. This, too, in spite of the fact that one of the greatest coal fields on the American continent is only a few miles distant, but is withheld from development by this paralyzing policy of locking up the coal from use.

One of the burning questions confronting Congress at this time is the proper solution of this problem of enacting a law to open the Alaska coal lands to development.

All recognize the necessity for legislation that will promote the fullest development, effectually prevent monopoly, and, most important of all, furnish an ample supply of fuel to the consumer at the lowest price consistent with approved mining methods.

THREE METHODS OF DEVELOPMENT.

There are three methods pursued for the development of the coal industry:

First. By retaining the title to the land in the sovereign and lease to a tenant for a limited time on a royalty.

Second. By State operation.

Third. By granting a fee-simple title to individuals or corporations for a cash consideration.

THE LEASING SYSTEM.

This system is based on the theory that the title to the land should remain vested in the sovereign as a permanent asset, and that a revenue be derived by charging rentals or royalties for the benefit of the public treasury. It is argued that the State can better prevent monopoly by retaining supervision over the industry.

This system has been adopted by a number of the British colonies, notably in the States comprising the Commonwealths of Australia, New Zealand, and some of the Provinces of Canada.

The land, including all minerals, in those colonies is the property of the reigning sovereign of Great Britain, and during the early development of the English colonies the laws for the government of the colonies were promulgated from the home office, often in total disregard and defiance of the expressed wishes of the colonies. This policy led to the Revolution, and 13 American Colonies successfully rebelled and organized an independent Government of their own about the year 1776.

Later the British policy was modified, conferring on the colonies the right to make their own laws for their government, including the disposition of lands and minerals, subject to the approval of the home Government.

These colonies have very generally adopted the policy of treating the natural resources as an asset from which to derive revenue for the public treasury, and have thus quite naturally adopted the leasing policy in the development of coal and minerals; in fact, some of them lease all agricultural and grazing lands and adopt a general paternalistic government, the State making loans to the citizens to aid them in building homes, developing mines, etc.

It is important to note that in Canada, Australia, and New Zealand the laws for the disposition of the lands are not enacted by the Dominion Parliament of Canada, the Commonwealth Parliament of Australia and New Zealand, but by the Provincial Parliament of each separate Province or State. This with the very laudable object of placing the administration of local affairs in the hands of local people.

Experience proves that the most satisfactory government is one administered by officials who are in sympathy with the governed; officials who know the aims and ambitions, the needs and requirements, of the people whose affairs they administer.

Acting in the light of experience, Great Britain has unwisely placed the administration of the natural resources in the hands of each individual State in her colonies.

STATE OPERATION OF COAL MINES.

In New Zealand and in the State of Victoria, Australia, the State operates coal mines to supply fuel for the State-owned railroads and for the commercial market as well.

DEVELOPMENT OF COAL MINES UNDER TITLE IN FEE.

In establishing a land policy the United States sought to encourage the development of its agricultural and mineral resources by a wide distribution of ownership of the lands among its citizens. The principle on which this Government was founded is that the people are sovereign. Hence the policy that the most humble individual sovereign citizen should have the opportunity of acquiring title to a piece of land over which his rule should be supreme.

The statesmen who formulated our land policy evidently believed that to attach a people to a country make them owners of its soil. Thus they become loyal citizens. A man will fight for his home, but who will fight for a boarding house?

The United States sought to establish competition in all lines of industry by creating conditions that would make all lines of endeavor open to every citizen on equal terms. The natural resources were not disposed of for purposes of raising revenue, but for merely nominal prices to encourage development.

All are familiar with the method that has been pursued during all our development, of granting a title in fee for a merely nominal consideration to the individual who applies to purchase coal land under the terms of our coal-land laws; and all are familiar with the abuses that have grown up under that system whereby vast areas of coal lands have passed under the control of railroads and private corporations, thereby securing a monopoly and reaping undue profits from the transportation and sale of the coal.

The anthracite coal field of Pennsylvania, containing less than 500 square miles and being the only field of importance of this class of coal, long since passed under the control of the railroads that carried the product to market. It is now quite generally admitted that this should not have been permitted. Competition has been eliminated in the production and sale of hard coal.

According to the report of the United States Geological Survey, there is estimated to be 500,000 square miles of bituminous coal land in the United States.

The ownership of this coal land is very widely distributed, and a monopoly in ownership of the coal land would seem impossible, but, in view of the vast combinations of capital to control our various industries during the past few years, it seems only the part of prudence that legislation should be enacted that will make monopoly of our bituminous coal industry impossible.

To-day the bituminous coal of the United States is mined and marketed under keen competition, which necessitates the practice of every possible economy and the installation of the most up-to-date machinery, resulting in the cheapest fuel supply for the industries of the United States of any important coal-producing country on the globe. In fact, the competition has of recent years become so keen that the producers in the great coal-producing States of Pennsylvania, Ohio, Indiana, Illinois, and West Virginia have been diligently seeking some means of relief from this destructive competition and low prices.

The situation has of recent years become so acute that it has engaged the serious attention of our ablest coal-mining engineers and economists. The great captains of the bituminous-coal industry have been diligently seeking some method of evading the "Sherman law" to the end that they may form a monopoly in the way of organizing selling agencies to control the market, limit production, and fix the selling prices at figures that will assure them the handsome dividends enjoyed by those industries that are controlled by monopoly.

The area of our coal lands is so great and the ownership is so widely distributed that the financial interests despair of being able to control by centralized ownership of the lands.

In a speech delivered before the American Institute of Mining Engineers at Spokane, Wash., in 1909, Prof. Edward W. Parker, one of the best posted men in the coal industry in the employ of the United States Government, after reviewing the deplorable situation existing in the bituminous coal mining industry, by reason of overdevelopment and the evils of competition, suggests a possible remedy in Government regulation, and says (p. 1016, Transactions of the American Institute of Mining Engineers):

"Under such Government control bituminous-coal mining could be regulated through a system of license, and in order that restriction on coal production may be secured no license should be issued for the opening of a new mine until ample proof is shown that the necessities of the people or of trade require it."

Thus, it appears that these mining engineers are seeking to restrict production and thus secure monopolistic control of the bituminous-coal industry, and here is a prominent representative of a great bureau of our Government most intimately connected with our mining industry suggesting a method of accomplishing this end.

Recognizing the seriousness of this situation in the bituminous-coal industry, the honorable Secretary of the Interior, in a speech before the American Mining Congress in Chicago, in 1910, in outlining the policy of the Government in advocating a law for the development of the Alaska coal lands proposed to protect the coal operator against competition in the following language:

"The prime requisites of a leasing system are that only sufficient coal lands should be leased to meet the existing market conditions and encourage its development."

He thus made a strong bid for the support of those interests seeking a monopoly of the coal industry in Alaska. However, the people of the United States do not desire to give any corporation a monopoly of this or any other industry. The fight the people are making is against monopoly and for the establishment and maintenance of unrestricted competition, to the end that the law of supply and demand may fix prices, unhampered by great combinations of capital or Government restrictions that enable monopolists to charge extortionate prices for the necessities of life.

No complaint has come from the public, however, on account of the low prices of bituminous coal and no statesman has yet proposed legislation for the relief of these coal companies that are supposedly losing money for the purpose of affording cheap fuel to the industries of our country.

There are doubtless a few isolated instances of a local monopoly in the coal trade, as is charged in Colorado, where a great corporation controls such a large portion of the output that it can exact an exorbitant price. However, such instances are rare and purely local.

In the appendix will be found a table giving the production value at the pit mouth and annual production per employee in each State which proves that, with the exception of a very few States, where the production is small, the price is very low.

In many parts of the country the consumer is paying an exorbitant price by reason of the high freight rate or of combinations among the selling agencies. It can not be disputed that the selling price of bituminous coal at the point of production has for years been as low as can be hoped for and pay the miners living wages. The miners, be it said to their lasting credit, have, by maintaining a strong organization, kept wages as high as is paid in any coal-producing country.

Every man posted on the coal-mining industry knows that the low price of coal is due to competition in production, the result of wide distribution of the ownership of the coal lands. Any man or corporation in any part of the United States who owns a sufficient area of coal land to justify equipment and operation, and can demonstrate that he can operate at a profit, can finance his property on his title in fee and operate a coal mine.

Prevent monopoly in ownership or control of the coal lands and competition is assured in production, with reasonable prices for coal at all times.

PREVENT MONOPOLY.

Many of our able economists and statesmen fear the railroad or other corporate interests may, at some time in the future, secure control of a sufficient acreage of our coal lands in the West and Alaska to create a monopoly, prevent competition, and levy an unjust tribute on the consumers. They propose as a remedy that the title to all the coal lands of the public domain be retained in the Government and the coal developed under a leasing system, administered by a bureau under the supervision of the Interior Department. They point to the leasing system as being successful in operation in the various States of the Commonwealth of Australia, New Zealand, and in some of the Provinces of Canada.

This matter is of great importance to Alaska as affecting the economical development of its many resources. The vital economic result sought to be attained is to deliver the coal at the point of consumption at the lowest cost per ton, to the end that industry of all kinds may be encouraged.

Congress desires to enact a law that will protect the rights of the public, encourage development and insure competition, and effectually prevent monopoly in the coal industry. Cheap coal is secured by competition and not by monopoly.

THE OPERATION OF THE LEASING SYSTEM—EFFECT ON PRICES.

The several States of the Commonwealth of Australia have for many years been developing their coal lands under a leasing system. The same is true of New Zealand and some of the Provinces of Canada. It will be noted that in every instance the laws are State or provincial laws, and that in no instance is the central Government endeavoring to control the industry or administer the leasing laws.

In Australia and New Zealand there is a strong tendency to retain the title to all lands of every character in the State, and in some of the States not only the mining but the agricultural and grazing lands are leased. Royalties and rentals seem to be an important part of their system of taxation. However, in some of these States the royalty on coal is quite low, varying from 4 cents to 17 cents per ton, and they have endeavored to create conditions favorable to development with the evident purpose of encouraging competition.

The State spends large sums in prospecting for coal, and the annual mining reports show large expenditures for extensive drilling operations to encourage the investment of capital in new coal mines. Almost all the railroads are owned by the State, and in some instances the State operates coal mines to supply its railways and the general public as well.

A study of the economic operations of the leasing and Government operation of coal mines is of especial interest at this time. If these countries have prevented monopoly and secured ample development under competitive conditions, with economy of operation and consequent low prices so necessary to encourage the development of manufacturing and other industries, the system should prove the solution of this vexatious problem with us.

NEW SOUTH WALES.

New South Wales produces something like 80 per cent of all the coal in Australia. According to the report of the minister of mines, the production for 1911 was 8,691,604 tons, and coal at the pit mouth sold for $1.82 per ton, as against $1.11 per ton in the United States, producing 496 tons for each employee engaged in the production during that year. The great bulk of this coal was produced by a few large mining syndicates. These mining companies do not market their coal in competition, as is the case in the United States, and, in the absence of a "Sherman law," they hold a meeting annually and fix the selling price of the coal, as reported by our consul, G. H. Killmaster, reporting from New Castle in 1910. He says: "The colliery proprietors have decided that the price of coal for 1911 shall remain the same as in 1910, which was $2.68 per ton for round (lump?) coal. It was thought some time ago that the proprietors might seek to improve the trade by making some slight reduction in last season's selling price, but no good purpose would be served by any such move. A slight decrease in the declared price would not be likely to cause any appreciable increase of the trade outside the Commonwealth and the interstate trade would not be affected at all." (Daily Consular and Trade Reports, Feb. 2, 1911, p. 445.)

No competition, no consultation with the State officials or the consumer. In our country we call this a monopoly, and it would not seem that the leasing system has resulted in development to the extent that competition exists or that economy of operation has been stimulated.

WESTERN AUSTRALIA.

Production for 1911, 240,890 tons, valued at $2.22 per ton at mine, as against $1.11 in the United States, and a production of 539 tons per employee. (Report of Superintendent of Mines for 1911, p. 5.) This showing requires no comment.

NOVA SCOTIA.

Nova Scotia is the only Canadian Province that has developed her coal resources under a leasing system. All the great coal mines of Alberta and British Columbia were developed on lands that were Crown granted.

Nova Scotia charges 10 cents per ton royalty on regular leases and limits the acreage, with an exception that will be noted later. The report of the minister of mines for 1912 shows a production of 6,208,444 tons, with a value at the mines slightly in excess of $2 per ton, as against $1.11 in the United States, and with an annual production of 456 tons per employee. The Dominion Coal Co. produced about 60 per cent of all the coal, and has for many years produced on an average of 60 per cent of the total, the other 40 per cent being divided among some dozen or 15 other companies. Can anyone doubt but that the control of 60 per cent of the total production means monopoly, and especially when the table of production shows that a steel company and three railway companies produce another 20 per cent?

One of the strong recommendations for the leasing system is that the Government has at all times control of the industry and that the tenure is a limited one. An official publication, entitled "Opportunity in Canada," page 59, states that the Dominion Coal Co. has in excess of 125 square miles under its control. Its coal reserves have been proven to contain a supply of 3,500,000 per year for 1,000 years. It was a matter of wonder how control of such a large area of coal land could be secured under the leasing system. The love of dominion over a monopoly of the coal supply seems to be as strong in the coal operators in Nova Scotia as elsewhere. This large holding was desirable to retain the monopoly the company had enjoyed for so many years, and the Parliament, in recognition of the debt of gratitude due this corporation, showed its appreciation by enacting the following statute:

"Whenever it appears to the satisfaction of the governor in council that any company or person working or proposing to work any coal mine is willing to pay a greater royalty per ton than that fixed by this chapter or is prepared to prosecute coal-mining operations on such an extensive scale as would, without a higher rate of royalty, largely increase the revenue derivable from royalties, the governor in council may authorize the commissioner to accept the surrender of any lease or leases for the purpose of mining coal held by such company or person, and to issue in lieu thereof a new lease or leases for such term of years, and covering such tract of ground, and containing such terms and conditions, and providing for payment of such rate of royalty, not less than 12½ cents, on every ton of 2,240 pounds of coal sold or removed from the mine or used in the manufacture of coke or other form of manufactured fuel during the whole or any part of such period as the governor in council directs, and may regulate the taxation to which the property of such company or person shall be liable." (R. S. C. 18, S. 191.)

This statute is the law to-day in Nova Scotia, and under this law the Dominion Coal Co. and the Acadia Coal Co. have secured leases of very large areas of coal land—leases that no doubt are practically in perpetuity, with favorable conditions in relation to taxation. We can readily see how such lease might easily be preferable by a large corporation to a title in fee. The royalty of 12½ cents per ton in lieu of all taxes, with a nonforfeitable lease in perpetuity.

In none of these countries is there any law that gives protection to the consumer against combinations in restraint of trade or in any manner prevents absolute monopolistic combinations among the colliery proprietors.

STATE OPERATION.

VICTORIA.

This is another of the States composing the Commonwealth of Australia. According to the report of the minister of mines the total production for 1911 was 653,864 tons, with a value at the mine of $2.31 per ton. Of the total output the State coal mines produced 506,059 tons. So it appears that the State had a monopoly of production, and the selling price does not indicate economy of operation. It would not seem from this showing that development by private capital under the leasing system has been encouraged in Victoria, notwithstanding that very large sums have been expended by the State in drilling the coal fields, as shown by the report referred to above.

In 1912 the State mines produced 396,042 tons of value at mine of $2.28 per ton. (See statement by the general manager, George H. Broome, in appendix.)

NEW ZEALAND.

New Zealand operates two coal mines, under the management of W. C. Gosquain, Esq., and his statement for the operations for the year ending March 31, 1912, is found in the appendix to this article. This statement shows a total investment of over $1,000,000, and charging no royalty for coal mined. His report shows a net profit of less than $500, with an output of 271,626 tons, with a value at the mine slightly in excess of $2 per ton, as against $1.11 by the United States. A large proportion was sold to the general market. The total output of New Zealand for the year 1912 was 2,066,073 tons, but prices are not given. (Official papers and reports relating to mines and minerals of New Zealand for 1912, p. 98.) The average tonnage produced per employee for New Zealand for 1912 was 481 tons, while the average for the State mines was 468 tons. These figures do not indicate either competition or economy of operation.

Now compare the results of coal mining under the leasing system and State operation with private ownership as it exists in the United States, as it affects efficiency and the price of bituminous coal to the consumer:

	Tons per year per employee.	Selling price at mine per ton.
New South Wales (leasing)	496	$1.82
Western Australia (leasing)	539	2.22
Nova Scotia (leasing)	496	2.00
New Zealand (State mine)	468	2.00
Victoria (State mine)	(1)	2.28
United States (private ownership)	738	1.11

[1] Not reported.

It is admitted that the mining conditions are as favorable for the economical production of coal in these countries as in the United States. Then why the great difference in production per man employed? The coal miners of Australia and Canada are just as competent and industrious as their brothers in the United States, as every coal operator can testify, for we have employed many coal miners coming from these countries and find they are just as competent as our miners. The individual coal miner will mine as many tons of coal per day in Australia or Canada as he will in the United States, and does do it.

The smaller number of men employed in and about the coal mines in the United States is made possible by the installation of mining machinery and labor-saving machinery for automatically handling the coal after it is mined. Keen competition in the United States forces the mine manager to adopt every possible economy to reduce the cost of handling a ton of coal or he can not market it at a profit. He must produce his coal at a low cost or close down his mine. These competitive conditions have been brought about by the widely distributed ownership of the coal lands.

A title to coal land encourages development, for the title furnishes a basis for sufficient credit to float bonds to enable the operator to equip his mine for operation. A wide distribution of ownership assures a large number of operating companies and thus creates competition, so necessary to assure economy of operation and low selling prices for coal.

The keen competition in the production and sale of coal in the United States under our system of private ownership of the coal land is saving the industries of the country that consume our coal, as compared with those countries operating under the leasing system, hundreds of millions of dollars annually. Our present consumption is about 400,000,000 tons per year. Now, compute the annual saving to the industries of the United States on this annual coal bill of 400,000,000 tons as against—

New South Wales, a saving of $0.64	$256,000,000
Nova Scotia and New Zealand, $0.89	356,000,000
Western Australia, $1	444,000,000
Victoria (State mine), $1.17	468,000,000

This indicates a saving to the industries of the United States of approximately a million dollars per day, no mean advantage when we are seeking a world's market for the products of our mills and factories.

This is a fair illustration of the difference between private ownership and the leasing system in the production of coal. It fairly represents the difference between competition and monopoly.

Statistics prove that we are not suffering greatly as yet from monopoly in the bituminous-coal industry, but we are told that it is coming and we must take steps now to prevent it. Granted. However, is it wise to lightly abandon a policy that is giving us cheaper coal than is enjoyed by any other industrial nation on earth and adopt a system that has resulted in monopoly wherever it has been tried? Would it not be better to cure the defects in our own system?

It has never been the policy of the United States to seek to enrich the Federal Treasury from the proceeds of the sale of the natural resources. The object has been to secure the widest possible distribution of the lands among the people, and to this end liberal land laws have been enacted, placing the agricultural and mineral lands within the reach of the humblest citizen.

The coal-land law of 1873 was enacted upon the theory that every citizen should have the right to secure 160 acres of coal land. When the entryman had secured title to his land he had all the rights of ownership, including the right to buy or sell as his interests might dictate. It was at all times known that to justify the investment of the large sums of money necessary to equip and operate a commercial coal mine required more than 160 acres of coal land, but to insure the widest distribution of the benefits to be derived from the entry of these valuable lands it was deemed wise to limit the right of each citizen to one entry. The wisdom of this provision is proven in hundreds of instances when the farmer or small business man has entered 160 acres of coal land and sold it to a coal-mining corporation for a few thousand dollars that has put him on his feet in business or enabled him to improve his farm and establish a comfortable home.

Abuses have grown up under this law whereby large corporations have secured great areas of coal land that in some isolated instances have tended to create monopoly and strangle competition.

The wisdom of our policy of a wide distribution of ownership of our lands, both agricultural and mineral, has been amply demonstrated by the greatest development in our western country during the past 50 years known to history. The people of all civilized nations have flocked to our country to take advantage of the opportunities afforded by our public-land policy.

It is significant that while Canada, Australia, and New Zealand are spending vast sums of money to induce immigration to develop their great natural resources the United States has never made appropriations to induce immigration, but is advocating laws to restrict immigration. No system of disposition of public lands has ever shown such beneficial results as has been attained under our beneficent land laws. This upon the self-evident theory that to attach a people to a country makes them owners of its soil.

When a man owns a farm or a mine self-interest as well as pride of ownership prompts the best care and permanent improvement, but on rented property it is necessary for the landlord to employ agents to see that the proper care is exercised.

The wide distribution of ownership of our coal lands has created these conditions, resulting in competitive development that has given our industries fuel at such a low price as to encourage the successful operation of many lines of industry that would not have been possible with high-priced coal.

The results obtained under the coal-land leasing system in Australia, New Zealand, and Nova Scotia prove beyond question that the leasing system inherently makes monopoly inevitable. The lack of a title in fee prevents the financing of commercial coal mines, save by capitalists of sufficient wealth to underwrite the bonds of the company, thus confining the industry to a few wealthy syndicates and assuring monopoly. This condition creates a monopoly and the ability to arbitrarily fix the selling price of coal, destroys the incentive necessary to insure economical operation, and results, as we have seen, in a high cost of production in all these countries. In addition to these natural impediments to economy in production the Government must have a small army of salaried agents to care for its interest, all of whom are nonproducers and must be supported at the expense of the coal industry.

The inherent defects in the coal-land leasing system, as shown by its operations for many years where it has been in operation, are:

First. It discourages prospecting by depriving the discoverer of the opportunity of receiving a reward for his efforts.

Second. It discourages the development of the coal-mining industry, as is proven by the expense incurred by the State in prospecting its coal lands in efforts to induce capital to invest in the coal-mining business.

Third. By limiting the industry to a few wealthy syndicates it creates a monopoly and destroys all competition, resulting in high cost of production and arbitrary selling prices.

There can be no question of the wisdom of a wide distribution of ownership in the coal lands. If titles were granted on such terms as would effectually prevent any corporation from owning or controlling a large acreage of coal land, competition would be assured and monopoly made impossible.

The people of Alaska are asking that the coal lands be opened to development under private ownership with a reasonable limit on the acreage that any company may own or control; that combinations to limit production or control the selling price of the coal be prohibited; that all railroads, whether owned by private corporations or the Government, afford equal facilities to all coal operators to ship their coal to market. This will afford the operator of moderate means an equal opportunity with his stronger competitor. Such conditions will promote competition and assure efficiency in operation.

The people of Alaska have a deeper interest in the subject than any other body of men can have. The successful development of the many industries of Alaska will be largely influenced by their ability to secure fuel at reasonable prices. The people of Alaska understand local conditions better than it is possible for strangers to understand them.

It is the universal experience of all nations in the Government of colonies that such laws should be promulgated as meet with the approval of the citizens of such colonies. After a long and remarkably successful experience in colonial government, Great Britain long since adopted the plan of having the local parliament of each colony enact laws for the control and disposition of its lands and other natural resources, subject to the approval of the home Government.

The laws of any country must meet with the approval of the people of that country or serious trouble invariably ensues.

The people of Alaska want their coal resources opened to development under laws that assure an equal opportunity to all her citizens—laws that will encourage development, assure legitimate competition, and prevent monopoly. We hope some heed will be given their demands.

A SUGGESTED REMEDY.

We respectfully suggest the enactment of a law for the development of the coal lands of Alaska that will—

First. Limit the ownership or control of any coal company to 4 or 6 square miles, or such acreage as may be deemed sufficient.

Second. Fix adequate penalties to prevent combinations to control output or prices.

Third. Empower the Interstate Commerce Commission or some other competent court to make thorough investigation and fix minimum and maximum prices upon a proper showing by either a coal producer or a coal consumer and thus prevent the crushing of independent operators by their more powerful rivals on the one hand or the charging of extortionate prices on the other.

Fourth. Fix a permanent tax of a few cents per ton to be paid into a Territorial fund to defray the expenses of proper supervision of mining methods under laws to be enacted by the Territorial legislature, to protect the lives and health of the miners, and to provide a laborers' compensation fund.

Such a law would preserve the principle necessary to secure competition, a wide distribution of ownership, and enable the operator of moderate means to finance his enterprise, and provide for the welfare of the miners.

Fifth. The coal-land law of May 28, 1908, was intended to restrict the amount of coal land any company might own or control and to prevent monopoly; but that law is only applicable to such lands as were located prior to the withdrawal. That act has been nullified to all intents and purposes by construction and such drastic rulings by the Land Department that no titles can be issued under it.

I have appended hereto some statistics relating to the production of coal in countries operating under the leasing system and of State coal-mine operation, comparing some with the operations in the United States. These statistics are taken from the official reports of the various countries and tell their own story. If you are interested, study them. They prove beyond question that the leasing system means monopoly, inefficiency, and high-priced coal.

This question demands the conscientious and careful consideration of statesmen, and upon the wisdom of its solution depends the future of Alaska.

Coal production of the United States, 1911, by States.

The Tariff.

EXTENSION OF REMARKS
OF
HON. M. CLYDE KELLY,
OF PENNSYLVANIA,
IN THE HOUSE OF REPRESENTATIVES,

Saturday, May 3, 1913.

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. KELLY of Pennsylvania. Mr. Speaker, under general leave to print, I submit the following editorial from the Nation's Business, the official publication of the Chamber of Commerce of the United States, in its issue of March 19, 1913. It voices the opinions of 160,000 individuals and business firms when it declares that the establishment of a tariff commission should be coincident with an immediate downward revision of the tariff. The editorial follows:

Never in the history of the United States have our business forces been better organized to cooperate in the work for which President Wilson asks the assistance of all patriotic citizens. In spite of the many and involved problems which have come with the unparalleled industrial development of a country still young, the business men of America have already accomplished much toward meeting the high ideals to which the President directs the attention of all our people in his inaugural.

In the establishment of better working conditions for their millions of employees, in the fixing of more rigid tests of individual and corporate integrity, in the development of that efficiency which makes for the prosperity of the country as a whole, they have gone forward rapidly in the last 15 years. Perhaps no country, within the same period, has made greater progress along these lines. Nevertheless the business men of the United States as a whole recognize that there is still much to be done in correcting the evils incident to our great industrial expansion, and in that spirit of patriotism which has always marked the advancement of the country's business they are ready to do their part in further promoting the cause of human progress.

THE SPIRIT OF COOPERATION.

The evidence of this lies in the spirit of cooperation among business men in every part of the country, which in the past 10 years has to a marked extent supplanted the strong individualistic leadership which served its purpose in the early days of a pioneer country. Almost every town and city in the United States to-day has its chamber of commerce, board of trade, or commercial club, in which the business men of the community are brought together to work for the benefit of the community as a whole, not alone to advance their own selfish interests.

The value of this type of broad-minded, patriotic effort has been demonstrated so clearly that within the last year the demand for broader cooperation and united action on the part of these local and sectional units has crystallized in the formation of a great country-wide federation—the Chamber of Commerce of the United States of America.

No organization in our country has ever been builded on a foundation more democratic or more representative. There has never been a more significant response to a call for public-spirited service than has been shown in the rapid growth of this chamber, in attracting to its membership, within a period of eight months, more than 300 organizations from 43 States of the Union, representing more than 160,000 individuals and business firms.

These many organizations, with their thousands of representative and progressive business men, have come together, with no narrow or selfish purpose, but in the belief that by more efficient organization they can play a greater part in the Nation's advancement than ever before.

THE TARIFF.

The Chamber of Commerce of the United States has already begun to make its contribution toward the solution of the problem to which the President directs attention. The business men of the country agree that in response to the pledges given the people the new administration should revise the tariff without delay, to the end that it may be more equitable. The fact is recognized, however, that consideration of the tariff problem which has concerned the country for so many years has never been based upon scientific, businesslike ascertainment of facts and action based on those facts. It is the belief of business men that the errors of the past should not be repeated; that, coincident with the enactment of new tariff laws, there should be created a permanent tariff commission, in order that future tariff changes may be based upon knowledge of world conditions as well as domestic demands, and not merely upon a desire for change.

In its first annual convention, held in January, 1913, in which nearly 500 delegates, representing 40 States, participated, and without regard for sectional interests, political affiliations, or other considerations, this representative body unanimously passed a resolution calling for the creation of a permanent tariff board or commission.

(a) That the appointment of the commission, following the usual procedure, be vested in the President with the advice and consent of the Senate.

(b) In order to make the commission an effective administrative body, the number of commissioners should be limited, preferably not more than five.

(c) That the term of office of members of the commission should be sufficiently long to give the board stability and permanency, preferably six years, and the terms of members should expire in rotation as in the Interstate Commerce Commission.

(d) That a provision should be made for minority representation as in the case of the Interstate Commerce Commission, where not more than three of the five members shall be of one party.

(e) That reports of the commission should be confined to ascertained facts and should exclude recommendations unless called for by the body having power to institute tariff legislation. The information secured by the commission shall be available to either House of Congress and to the President.

To the evolution of a plan of this character which will provide a better basis for future tariff legislation, the business men of the country are ready to aid by their counsel and experience and will welcome every opportunity to cooperate with the President and Congress.

The Cotton Schedule—Its Effect on Massachusetts Wage Earners.

SPEECH
OF
HON. JOHN JACOB ROGERS,
OF MASSACHUSETTS,
IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913.

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. ROGERS. Mr. Speaker, I desire to lay before the House a few observations in regard to the provisions of Schedule I of the Underwood tariff bill, with especial reference to the probable effects, for weal or woe, which the enactment of that schedule into law will have upon the cotton-manufacturing future of this country.

I represent a district more than one-half the population of which is contributed by the city of Lowell, in which I live. And Lowell, as I shall show in greater detail, is one of the three greatest cotton-manufacturing cities in the United States, the other two, also in the Commonwealth of Massachusetts, being New Bedford and Fall River. I may, perhaps, mention at the outset that I am not now, nor have I ever been in the past, a stockholder or a director in any cotton or other textile company, either in Lowell or anywhere else.

I have taken as the text of my remarks a most enlightening statement made on the floor of this House by the gentleman from North Carolina [Mr. KITCHIN]—I ask you to note the State—then and now a member of the Ways and Means Committee, and one of the recognized spokesmen of the Democratic Party in Congress on tariff matters. On the 15th day of April, 1911, while the first session of the Sixty-second Congress was considering a tariff measure, he said (CONGRESSIONAL RECORD, vol. 47, pt. 1, p. 279):

> We in the South intend to make the New England mills come down and put their mills there or else go out of business.

And the veracious RECORD chronicles that the statement was greeted with applause.

That sounded the keynote of the Democratic leaders two years ago; it represents their highest, noblest, and purest aspirations to-day as, after having virtually enacted into law the Underwood bill in secret caucus, they are forcing it down the throats of a reluctant people.

Before taking up the effect which this bill will have upon New England, and especially upon Massachusetts, I shall set forth as briefly as possible the vast extent of this great industry whose future rests in the balance. Most of my figures are taken from the various bulletins and advance reports or volumes of the United States Census of 1910.

The total value of all textile manufactures in the United States for the latest year for which figures are available reached the enormous sum of $3,016,931,819. The total of cotton manufactures amounted to $1,540,716,622, or slightly over one-half the total. Out of a total value added by manufacture of all textiles in the United States, amounting to $1,291,650,819, cotton contributed $676,394,027. This total is again slightly over one-half the total for all textiles, and constitutes 43 per cent of the aggregate value of these cotton goods, above stated to amount to $1,540,716,622.

Out of a total number of 21,269 textile establishments in the United States cotton contributed 10,370, only a little less than one-half the grand total for all textiles.

Out of 1,414,167 wage earners in all textiles in the United States, receiving a total wage of $578,676,281 per year, cotton reports 813,550 wage earners, receiving $317,850,532; cotton thus employs more wage earners—58 per cent of all—and pays these wage earners more wages—55 per cent of all—than all other textile industries combined. The cotton schedule employs 13 per cent of the 6,310,454 wage earners in all schedules, being exceeded in this respect only by the metal schedule and the wood schedule. In value added by manufacture the cotton schedule ranks third of the specific schedules, being again exceeded only by the metal schedule and the wood schedule.

I do not need to dwell at length upon the place occupied by the United States in the markets of the cotton world. We grew last year 16,109,349 bales of cotton, nearly 3,000,000 bales more than in any previous year. Of this total, 10,681,758 bales, worth $365,849,271, was exported, four-fifths thereof going to the United Kingdom, Germany, and France, the first taking 4,197,336 bales, or 39.3 per cent; the second, 3,052,764 bales, or 28.6 per cent; and the third, 1,180,895 bales, or 11.1 per cent.

We imported in the same period only 229,268 bales altogether, and indeed our cotton fields furnish about 69.7 per cent of the world's supply.

So much for the raw cotton. Let us see something of the manufactured product. There are in the world about 140,996,000 active spindles. First, numerically, is the United Kingdom, with 55,317,000; next in order are the United States, with 31,582,000; Germany, with 10,726,000; Russia, with 8,800,000; and France, with 7,400,000. Thus, though the United States raises seven-tenths of the world's cotton, it has but about two-tenths of the world's spindles.

We have seen that the United Kingdom, France, and Germany take four-fifths of our raw cotton. What do they do with it? Most of it, of course, they retain or send wherever a demand exists therefor.

But in 1912 our imports of cotton manufactures amounted to $65,152,785, of which the United Kingdom imports amounted to $19,400,725. German imports to $15,384,519, and French imports to $11,694,388. These three countries thus were responsible for three-fourths of our imports of cotton manufactures, and, with Switzerland, which is a large importer of laces, for a total of $62,027,866, or over 95 per cent of the total.

Plainly, the cotton manufactures of the United States, though vast, have a far vaster potential field, and, as plainly, they are by no means without competition even in the field they now occupy. Yet this state of affairs has developed in an era of protection.

Let us now consider the position of New England, and especially of Massachusetts, in the cotton industry of the United States.

There are 31,582,679 spindles in the United States, the figures showing a rather gradual but healthy increase each year since 1908. Of these Massachusetts has 11,066,846, or slightly over one-third of the grand total. Massachusetts similarly shows a gradual but healthy increase for each year since 1908. Of the 5,367,583 bales retained by the United States out of the enormous 1912 crop of 16,109,349 bales, Massachusetts consumed 1,264,017 bales, slightly over one-fifth. Massachusetts has 234,249 looms and 7,141 knitting machines.

Analyzing the location of the spindles within the United States, Massachusetts is far and away in the lead, with its 11,066,846 spindles, or 35 per cent of all; South Carolina is second, with 4,327,178, or 13.7 per cent of all; North Carolina is third, with 3,403,996, or 10.8 per cent. Then follow in order Rhode Island, Georgia, New Hampshire, Connecticut, and Maine, with from one to three million spindles each, no other State having as many as a million. It will be observed that five out of the six New England States are in the first eight, the other three being that of the gentleman from North Carolina [Mr. KITCHIN] and her two neighbors. Of all spindles in the United States New England has 17,139,945, or 56 per cent, and the cotton-growing States have 11,582,869, or 37.9 per cent. Of the 5,367,583 bales of cotton used in the United States New England takes 2,108,360, or 39.3 per cent, and the cotton-growing States take 2,712,223, or 50.5 per cent.

But the gentleman from North Carolina proposes to get it all for his own section.

Massachusetts is preeminently a manufacturing State; it stands fourth in the Union in the value of its products. The latest figures available show that it had 11,604 manufacturing establishments, employing 644,399 men and women, who received wages of $364,452,000, turning out products valued at $1,490,529,000. The eight allied textile industries in Massachusetts (representing an investment of $398,729,906) give employment to 192,147 men and women (one-third of the grand total), producing commodities valued at $387,063,000 (over one-fourth of the grand total). It is impossible to learn accurately the total amount which, out of these vast figures, is ascribable to cotton, for the census figures do not list separately such items as the bleaching, dyeing, and mercerizing of raw fiber, yarns, and woven cloth, nor the printing of cotton piece goods, which, although grouped in the tables under "All other industries," are large and important. The figures which follow are therefore all considerably too low.

There are 182 cotton and cotton small wares establishments in Massachusetts and 65 hosiery and knit goods, a total of 247. The former establishments employ 108,914 wage earners (18.6 per cent of the total in the State), the latter 9,941 (1.7 per cent), a total for cotton of 118,855 wage earners, or 20.3 per cent. The wage earners of the former receive

$48,567,000 and of the latter $4,371,000, or a total of $52,938,000. The capital of the former is $214,017,000 and of the latter $12,477,000, or a total of $226,494,000. The former use materials costing $105,157,000 and add a value of $81,305,000, a total of $186,462,000 (12.5 per cent of the State total); the latter use materials costing $6,972,000 and add a value of $7,764,000, making a total of $14,736,000 (1 per cent of the State total); and a grand total for both cotton industries of $201,198,000 (13.5 per cent of the State total). Only one-third of the different cotton establishments in Massachusetts had a yearly output of as much as $1,000,000.

Cotton is the leading industry in Massachusetts in respect to number employed, and also leads in respect to value added by manufacture, if hosiery and knit goods be included in the tabulation.

The United States census says:

Massachusetts is not only the foremost State in the Union in the production of all textiles combined, but is first as regards three of the most important branches—cotton goods, including cotton small wares; woolen, worsted and felt goods, and wool hats; and cordage and twine and jute and linen goods. It ranks second in the production of shoddy, third in that of hosiery and knit goods and of carpets and rugs, and fifth in that of silk and silk goods and of fur-felt hats.

I shall not take much time to dwell upon the relative importance of the three or four great cotton centers within the State. I may be permitted again to quote the census:

Fall River, Lowell, and New Bedford, which in the value of manufactured products in 1909 ranked fifth, sixth, and seventh, respectively, in the State, owe their importance primarily to the manufacture of cotton goods. In 1909 the total value of cotton goods produced in Fall River was $48,576,000, or 75.7 per cent of all products for the city; in Lowell $24,744,000, or 41.1 per cent of the total; and in New Bedford $42,505,000, or 79.8 per cent of the total. These three cities led all others in the State, as well as in United States. In the manufacture of this class of textiles. Of the remaining industries the manufacture of woolen and worsted goods, of hosiery and knit goods, and of carpets and rugs, foundries and machine shops, the tanning, currying, and finishing of leather, the manufacture of boots and shoes, and of patent medicines, and the lumber industry were important in Lowell.

I quote also from Copeland, The Cotton Manufacturing Industry:

In Lowell, while drills, sheetings, and shirtings are still manufactured, such seasonal fabrics as fancy prints, corduroys, and velveteens are also of primary importance. This latter output is due primarily to the inclusion of printing and dyeing departments in the original equipment of the older mills. As the competition in the more common goods became keener, these mills undertook the printing of more fancy patterns and the output of special lines.

Lowell ranks seventeenth among the cities of the United States in number of employed. Of the 34,108 employed in 320 establishments 14,003 are employed in the 11 cotton establishments and receive upward of $6,000,000 per year. Lowell ranks thirty-eighth in the United States in respect to value of products and thirty-fourth in respect to value added by manufacture. Of the $60,271,000 value of products, cotton is accountable for $24,744,000; of the $27,440,000 of value added by manufacture, $10,801,337 is ascribable to cotton. The capital invested in Lowell cotton manufacturing is upward of $25,000,000; its spindles number about 1,000,000 and its looms about 25,529.

But it is often said that the position of the gentleman from North Carolina [Mr. KITCHIN] is highly unselfish as well as consistent; that he, too, represents a great cotton district, and yet he is willing and even eager to advocate the most slashing reductions in the cotton schedule. But, Mr. Speaker, this assertion will not bear the light of day. In the first place, the wage unit is very much lower in a Carolina cotton mill than in a Massachusetts cotton mill—probably about three-fifths as much; in the second place, the Carolina mills are in the midst of their raw material, with consequently lower freight rates and incidental charges; in the third place, whereas in Massachusetts there is probably not one man, woman, or child working in a cotton mill as many as 60 hours a week, there is probably not a man, woman, or child in a Carolina cotton mill who is working as few as 60 hours a week; in the fourth place, while the percentage of children under 16 is 5.7 in Massachusetts cotton mills and 4.4 in Massachusetts hosieries, it is 18.9 in North Carolina cotton mills and 27.7 in North Carolina hosieries, and 18.7 in South Carolina cotton mills and hosieries. I am glad to learn that my colleague from Massachusetts on the other side of the House [Mr. CURLEY], recognizing this disadvantage at which Massachusetts has placed herself by her very humanity, has within a day or two introduced into this House a resolution looking to a constitutional amendment permitting a Federal standardization of the hours of labor. And yet the gentleman from Massachusetts, though recognizing the evil, will support this tariff bill which is such a grave menace to the cotton industry and to the other industries of his State. The southern Democrats are in the saddle and the northern Democrats must tag along as best they may, no matter what ill may betide.

I am very far from being a believer in a tariff wall; I am not now advocating, nor have I ever advocated, a high tariff. But I do assert with all my might that the pay envelope should and must—and soon, if not at once, will—be protected.

This is not a question of a trust-ridden industry; there is no such thing in the cotton business and never has been. It is as keenly competitive a business as we have in the United States. And it is the wage earner and the very small manufacturer and not the heavy stockholder in the large mill who will be the real sufferer.

I quote from a letter I have just received from a man who, in a small way, makes certain cotton-mill supplies. He writes (I have merely omitted the name of the corporation):

A reduction of tariff on textiles so marked seems to me to presage a decrease in manufacture and a lowering of wages, which can only be brought about by closing down the mills for an indefinite period. This would stop two-thirds to three-fourths of the output of our factory.

The corporation has an active capital of $15,500, which is represented by the value of the plant and paper stock. It has a pay roll of about $1,000 per month and does a business at present of about $45,000 per year. It has never paid a dividend on its common stock and only this year has paid a 5 per cent dividend on its preferred stock. The writer has invested $5,000 in the common stock of this corporation and is employed by the corporation as its treasurer and general manager.

If this bill goes into effect in its present form, the writer sees not only his occupation gone, but the loss of most, if not all, of his capital, as idle machinery has little market value.

This corporation is not the member of any trust or combination, but an independent manufacturing establishment, doing business in competition with a combination doing a like business. It has no high-salaried officials, and its business is conducted on a very conservative basis. It is such a small manufacturing plant as the President in his public utterances seems to favor, but which will be ruined if this bill becomes a law.

It is not the trusts—the large organizations in business—who will suffer, but the small investor—doing business with a small surplus of cash—who must go to the wall as soon as business languishes. Mr. UNDERWOOD is quite right in predicting no decrease in the cost of living at once; that will come later through decreased purchasing power of the laborer, whose wages will be curtailed as the result of the new competitive condition. This bill is framed to kill New England industries.

But it is upon just this point that the Democrats in Congress express complete indifference. For example, the gentleman from Alabama [Mr. UNDERWOOD] said, in his opening speech upon reintroducing the tariff bill, "The Democratic Party stands for a tariff for revenue only, with the emphasis upon the word only." This carefully, and even defiantly, leaves out of all account in the Democratic policy any idea whatever of protecting the pay envelope. And a little earlier in the same speech he admitted that if we shall levy a duty representing the difference between even the average cost of production at home and abroad it "will drive out of existence the weaker mill." But it is in behalf of the weaker mill and of the weaker wage earner, and not of the strongest of mills or of men, that I raise my feeble voice.

I have said that the cotton-mill business has never known a trust in its midst; I will go further and say that, so far as the mills I am familiar with are concerned, it is not a lucrative business. A prominent broker in my district, in issuing, last week, a circular of statistics relative to Lowell industries, said that statistics compiled by him could not but serve to strengthen the growing impression among investors and trustees of the relative instability for investment of stock in cotton, hosiery, or woolen mills. I have made a careful examination of the dividend records of the 10 large cotton-manufacturing mills and hosieries in Lowell. Leaving out of account three reorganizations, which would reduce the result somewhat, I find that, taking the entire capital of these 10 concerns as a unit, they have realized for the last eight years an average dividend of a trifle less than 4½ per cent—not a very bloated industry.

But such figures as these do not disturb our Democratic tariff jugglers. They say, "Ah, but you must become competent; you must operate more efficiently, and foreign competition will bring this about. That is the solution." Yes; but how can these cotton mills become more efficient? If they could, why haven't they? Surely, they have not been making dividends enough so that they could dare to be careless or wasteful. It would be all the same if our mills had been making large dividends. Then, forsooth, they would have been overprotected, and down would come the duties in the same way. The Procrustean tariff maker punishes the cotton man with equal severity whether he has been long on prosperity or short on prosperity.

Imports of cotton manufactures rose from $41,296,239 in 1900 to $65,152,785 in 1912, an increase of over 50 per cent. Adopting a somewhat different classification, the gentleman from Alabama [Mr. UNDERWOOD] asserts that cotton manufacturing imports will increase 50 per cent the first year the law is in effect and that all imports will rise in about that proportion. They may be twice that; no man can be certain. Judging from the ill-concealed joy to-day among foreign manufacturers at the extraordinary opportunity they have ahead, the imports are likely to be far in excess of the estimate. But taking the gentleman from Alabama at his word, what will result? The amount which is imported in excess of last year, whether of cotton or anything else, will exactly measure the decrease in the employment our American workers will receive. Less work means less pay, and less pay means more misery, with a return to the bread lines and the soup kitchens of the last Democratic ascendency.

But the southern Democrats are in the saddle and the country must for a season follow in their trail.

Wages will fall. Will the cost of living go down so as to more than compensate? It is on that issue that our Democratic friends rest their case. The gentleman from Alabama himself says it will not go down at once. But what reason have we to hope for better things even at a later date? When we can learn from the unfortunate experience of others, without having ourselves to suffer misfortune, surely we should embrace the opportunity.

England is a free-trade country. What has been her experience, first, with the wage scale; second, with the cost of living?

I do not ask that Republican statements be resorted to to show that England is much worse off than the United States on both of these two heads. I shall cite three authorities out of many: (1) A great Democratic leader; (2) a great labor leader; (3) the exhaustive report of an English official investigation.

(1) William Randolph Hearst, in a specially cabled editorial to the Boston American, from Paris, under date of October 9, 1912 (New York Evening Journal, Oct. 10), says:

Scientific reduction of the tariff consists in judiciously and discriminatingly modifying the tariff in a way carefully calculated to benefit all the people of the United States, be they employers or laborers, producers or consumers. To secure and insure such scientific modification of the American tariff I beg most respectfully to suggest to Gov. Wilson the following course:

First. The abandonment of all old stock free-trade arguments based upon fallacies and upon exploded theories and upon promises which have been proven to be false by the practical and unprofitable experiences of free-trade nations like England.

Second. The recognition of the principle of protection of American industries, and the wise and just application of that principle to those industries which require and deserve protection.

It is useless to talk of a protective tariff, properly applied, being mainly responsible for the increased cost of living. It is worse than useless; it is senseless. The cost of living in England, a free-trade country, is quite as great as the cost of living in the United States, a protective country.

Indeed, to make an even more convincing comparison, the cost of living in England, a free-trade country, is notably greater than the cost of living in Germany, a protective country. If, therefore, free trade or radical tariff reduction can reduce the cost of living, why is not the cost of living in free-trade England largely lower than the cost of living in protected United States, or at least as low as in protected Germany?

As a matter of fact, even the most radical tariff reduction does not materially reduce the universally increasing cost of living, but it does materially reduce the wherewithal to meet the increasing cost of living. Radical tariff reduction does force manufacturers out of business and men out of employment, and by throwing a superabundance of labor upon the market does reduce the price of labor, which is wages.

In England the wages paid in most lines of labor are so low as absolutely to shock the American sense of justice and of regard for the general welfare.

In every industry that I have had occasion to investigate I have found wages 40 to 50 per cent lower in England than in America.

Yet with such wages working men in free-trade England are expected to meet a cost of living as high as or higher than ours.

No wonder there are industrial disturbances in England, and strikes and riots and men shot down by the soldiery; no wonder there are political and economical discontent and an emigration so great that the steamship lines can not carry all who desire to leave England.

The false statement that living is cheaper in England than in America has been made so often that it is believed by those who have not taken the trouble to learn the facts.

Living is not cheaper in England than in America. If anything, it is dearer. Food is much dearer in England than in America.

Luxuries, like fruit and many vegetables, are entirely beyond the reach of the average individual. Rent is cheaper in England than in many places in America, but taxes are immeasurably greater, raising the actual cost of rents from 30 to 35 per cent.

Custom-made clothing is cheaper in England than in America, but nowhere in the world is ready-made clothing as remarkable in cut and quality and cheapness as in the United States. Shoes are better and cheaper in the United States than in any other place in the world. Traveling and transportation in the United States are about half what they are in England. Meats, though high in the United States, are higher in England, and a good part of the beef in England is imported from the United States and Australia.

Newspaper men whom I have sent to England as resident correspondents have often asked to be allowed to return to the United States on account of the higher cost of living in England.

These are the facts, and facts should be the basis of every argument.

Gov. Wilson, like every other good American citizen, is trying to benefit his country, but we can not benefit our country by misleading our countrymen. Let all of us Democrats abandon worn-out and worthless free-trade arguments and frankly admit that a certain amount of judicious protection is a beneficial thing for our country and our people. Then let us seek to apply protection discriminately to develop and maintain valuable industries which require protection, and which, through the just and proper conduct of their business dealings with the public, deserve protection.

Let us realize that the tariff—even an unfair tariff—is not the cause of special privilege, but merely a symptom of special privilege; a useful institution partly corrupted by special privilege.

Let us then modify the tariff and purify the tariff, together with all the acts and operations of government, to meet the requirements of the times. But let us modify the tariff in a way which will benefit our own Nation at least as much as it will benefit competing nations.

Furthermore, the wages in the United States have increased in the last decade over 50 per cent; the wages in the United Kingdom have increased in a like period less than 10 per cent. The cost of such commodities as beef, bacon, mutton, wheat, wheat flour, and corn is less in the United States than in the United Kingdom. Trusts and monopolies exist in England in the same way and to the same extent as they exist in the United States.

(2) Samuel Gompers, after careful investigation of European living conditions, says in his recent book, Labor in Europe and America, pages 230–231:

Whether the cost of living in Europe or America is greater to the workingman depends entirely on the standard of living he adopts while in America. If he voluntarily lives the life of self-denial in this country that he compulsorily lived in his native land his outlay in money will remain about the same. Even then he will hardly be able to escape gaining something from the superior supply of the good things of life in America. Living is cheap to the wageworker in Europe only because he does without what in America soon becomes a necessity to him—food in good quantity and quality, presentable clothes among his aspiring fellow workmen and their families, and a comfortably furnished home in quarters responding to his awakened desires for equality with his American neighbors, and in general a larger, fuller, and freer life.

(3) The 1909 report of the British Board of Trade states that for every dollar paid to the British workingman the average United States workingman received $2.32, and this in spite of the fact that the United States hours of labor were 4 per cent shorter. Since the above report was made the hours of labor in Massachusetts cotton mills have, generally speaking, been reduced two hours per week and the wages raised from 10 to 15 per cent. The report states:

The economic condition of the classes studied is better in England than in America. The proportion of income left after paying rent and food bills is larger in America. Even the lowest income class of American families spend relatively less of their income upon food and rent than the highest income class of British families. Thus the American family has a wider margin of income for buying unnecessaries, enjoys a higher standard of living, and can save more if so disposed.

To summarize these three authorities, either nonpartisan or Democratic, it is clear that though the cost of living is greater in England, a free-trade country, than in the United States, a protective country, the workingman has less than half the amount of wages wherewith to meet his bills. It is, then, fair to say that the tariff has little or nothing to do with the high cost of living, which is a world-wide economic condition.

And the cry is abroad in the land, "Why, then, shall we make this drastic change?" The answer is patent—because nearly half of the 290 Democrats in the present Congress come from those States—of which the northernmost are Virginia, Kentucky, and Missouri and the westernmost is Texas—whose interests are primarily the growing of cotton, sugar, and tobacco, and who look jealously at the manufacturing supremacy of New England. These representatives say, "We do not make the manufactured goods we need except some of the cheaper grades, where the labor cost is low anyway; we import; let us, therefore, reduce the duty on manufactured goods and save just so much duty."

But what does New England get from all this? Nothing at all.

Up to this point I have tried to show two things—(1) the vastness of this cotton-manufacturing industry in New England and in the United States; (2) the gravity of the menace to that industry occasioned by the utter disregard of its welfare as a result of the application to it by selfish southern Democrats of a revenue theory rather than a moderate and rightly applied protective theory.

Let us now look at the rates proposed for cotton by Schedule I of the Underwood bill.

I quote from a letter from former Congressman Hill which was published in the Hartford (Conn.) Courant on April 10 last:

One serious objection to this bill is found in its sectional character. The cotton schedule contains eight different rates of duty for cotton cloth, duties graded according to fineness of yarns and finish of cloth.

The woolen schedule for cloth has one rate for all grades. On low grades of cotton cloth the rates are highly protective; on knit goods they are disastrous. In the section of the country where low wages, long hours, and child labor prevail the principal product is fully protected; in other sections where the law is aiming at decent conditions the principal products are exposed to ruinous competition.

The avowed purpose of the bill is to compel the American manufacturer who by his skill, his ingenuity, and his economy has, after a struggle for 50 years, succeeded in practically meeting the requirements

of the domestic market at lower prices than prevailed a generation ago to now "surrender" a greater or less part of it, variously suggested at from 10 to 50 per cent, to the foreign producer, in order that by the importation of the products of foreign factories and foreign labor the Government may be able to tax them at the customhouse. It is not possible to make a rate of duty which will admit 25 per cent of a competing product and not expose the other 75 per cent to a like displacement.

In my judgment the bill is wrong in principle, faulty in construction, and will prove unfortunate in its results. I hope I am mistaken.

It is difficult to make a thoroughly satisfactory comparison between a schedule based on ad valorem rates and one based on specific rates. However, I am willing in this regard to take the statistics accompanying the report of the Ways and Means Committee:

Commodities.	Present law.	Proposed law.
	Per cent.	*Per cent.*
Cotton thread	51.54	19.29
Cotton card laps, roping, sliver or roving	35	10
Cotton waste and flocks	20	5
Spool thread	22.95	15
Cotton cloths, including duck	42.75	26.44
Cotton with silk stripe	54.15	30
Tracing cloth	50.28	30
Cotton filled or coated	42.13	25
Waterproof cloth	50.56	25
Handkerchiefs and mufflers	59.27	30
Clothing	50	30
Collars and cuffs	64.03	25
Plushes, velvets, velveteens, corduroys, etc	51.15	40
Curtains, table covers, etc	50	35
Stockings, hose, and half hose	30 and 75.38	20 and 50
Gloves	89.17	35
Underwear	60.27	30
Cotton table damask	40	25

Another classification, unofficial, shows the average coefficient rate on all yarns to be 23.94 per cent in the present law, as against 8.9 per cent in the proposed law; on all cotton cloths, of 40.61 per cent in the present law, as against 16.23 per cent in the proposed law.

These figures show that the former duties, under which our manufacturers were not making unduly high profits nor, certainly, our wage earners unduly high wages, are to be cut about in halves, so that imports of cotton manufactures shall jump 50 per cent or more. Well may New England exclaim, "What will become of us?"

Rather than to attempt to analyze these figures, I prefer to quote extracts from a very few out of very many letters and telegrams I have received within the last week or 10 days, all with reference to the particular measure now before the House. Most of them are from wage earners or small manufacturers; none of them was written, so far as I know, with the slightest knowledge of the possibility of publication. They tell their own story, and I will not by comment enlarge or diminish their lesson.

Letter A says:

On the cotton schedule the rates proposed on cotton yarns will be ruinous to the cotton-yarn industry of this country, and this is especially true on fine yarns, which are made to such a large extent in Massachusetts. I can not understand how such rates could be considered by any committee. It would make it impossible for us to compete with foreign yarns, even if radical reductions were made in wages.

Letter B says:

Referring to the new tariff schedule upon knit shirts and drawers, the proposed rate of 25 per cent ad valorem will injure the industry almost irreparably, for the reason that with such a low rate the German, French, and Swiss manufacturers will obtain such a foothold in this country that only absolutely prohibitive rates at some future time will again give us the market.

The Payne bill gives us rates equal to between 50 per cent and 60 per cent ad valorem, the same as the previous bill. The underwear manufacturers did not ask for any increase at the time that the Payne bill was formulated.

The manufacture of knit underwear originated in the United States, and the foreign manufacturers have been followers, in machines and methods, instead of leaders. With rates cut in two and in some cases reduced 60 per cent the situation will be reversed, and we will be the followers, or perhaps out of business entirely, except in the low-priced end, where the cost is more cotton than labor. The proposed flat rate of a certain percentage is not a practical method of fixing duties. For instance, a shirt and drawers which we make has 70 cents worth of cotton to the dozen garments and $2.56 worth of labor, trimmings, and selling expense. A heavyweight shirt and drawers, which I have, costing in total practically the same as the above, has $1.82 worth of cotton and only $1.43 worth of labor. The lightweight goods are sold to the nice trade and are well finished in every way. The heavyweight goods go to the laboring man and are roughly put together. The rate of 25 per cent may possibly do for the very heavy and cheap goods, but it will not answer at all for lightweight goods, which have such a large cost of labor in them.

The result of their work seems to warrant the statement that New England and Eastern States interests are being intentionally sacrificed.

Letter C says:

The reductions in the cotton schedule in this bill are so sweeping that it is rather hard to pick out any one point in detail to comment on, except possibly the lowest end in coarse gray goods might be called sufficiently high; but from there up, to my mind, the schedules grow worse the higher they go.

The Payne-Aldrich bill duty runs from 36 per cent to 52 per cent, and the Underwood bill runs from 13½ per cent to 26 per cent, the average being, Payne-Aldrich bill, 40½ per cent; Underwood bill, 16½ per cent. This average is based on the percentages of consumption.

It would seem to me if this new bill became a law as it is that either a large proportion of the mills in New England would have to shut down, or there would be an enormous reduction in wages, and I am not sure that even this reduction would bring about the desired equality, because, as you know, the manufacturing basis in this country is on a much higher level than in England, which is our chief competitor in cotton goods.

Letter D says:

The Underwood tariff bill, which I believe to-day is being dubbed the Wilson tariff bill, will reduce, by from 25 to 75 per cent, the protection we received under the Payne-Aldrich bill.

It would be impossible for us to continue to operate the mills at anything but a loss without reducing the wages of the employees, and this I imagine is what will happen. If it does, it will, as Voltaire writes, teach the people to appreciate the sweets they have enjoyed in the past by having to eat a grand, good meal of bitters. There is no question in the minds of any manufacturer, or any man, even though he is not a manufacturer, that the result of a tariff of this sort would produce a calamity in the cotton industry of the United States such as we have never before experienced.

Letter E says:

Many of the items look to me to be low in the cotton schedule, but the principal thing that interests me is the ad valorem duty, which I always considered was so elastic that it never did afford proper protection on any class of goods.

Letter F says:

The cotton schedule, I should judge, would be disastrously low, when business is dull abroad. Nobody knows just how low England can sell. There is no data worth considering, and we must learn by experience. If full advantage could be and would be taken of the reduction in rates, it seems to me that it would amount to about two times what we believe the earnings on recent years' business have been in some of the northern mills, so you can see that it is quite serious.

Of course all of our goods go to converters, as we only deliver in the gray. Now, these converters see their business going out from under them, because of the small increase of duty allowed for finishing, namely, 2½ per cent. Should the converters suffer we also would suffer. The injury they and we fear is that England can sell finished goods in this country at a lower price than we and the converters can produce such goods for.

Letter G says:

The bill is a blow to the textile industry, and no doubt the Democratic leaders will try to force it regardless of what the effect will be. It will reduce the cost of living simply because the American laborer will not be able to earn money enough to maintain the present standard of living.

It affects us on cotton cloth, knit goods, and yarns, the rates being too low. At this season we usually sell the shoe manufacturers cloth for linings, but on account of the tariff agitation we are receiving no orders. On burlap used for baling goods the duty is increased. Cotton bagging used by the southern farmer is free.

Letter H says:

We certainly hope the cotton schedule, as drawn up in this bill, will not pass, as any such radical change in tariff can not fail to seriously injure cotton manufacturing in all branches.

Letter I says:

It looks as if New England would have to suffer not only in its industrial but in its agricultural interest as well.

Letter J says:

It seems to me that such a sudden and radical change in rates as is contemplated by the Underwood bill is bound to be a very serious injury to business not only in this but in all sections of the country, if we are to rely at all upon what history shows as following radical tariff changes in previous years.

Consequently I do not see how the Democratic pledges, including the President's, that nothing would be done which would work serious injury to business, can be reconciled to the Underwood bill as it now stands.

The country as a whole seems to want tariff reduction, and I think it should have it; but after swallowing the dose which is apparently prepared for us I venture to predict a general prevalence of sore throat.

Telegram K says:

Have carefully studied the present Underwood bill, and have no hesitation in denouncing it as sure to bring distress to the cotton industry. Manufacturers of fine yarns and cloths and coarse yarns and cloths of high grade and expensive finish will be put out of business.

Telegram L says:

The proposed tariff on cotton yarns and piece goods will not be sufficient to prevent disastrous foreign competition.

Telegram M says:

Passage will undoubtedly shut down any mills turning out high-grade yarns and cloth, and bring suffering to thousands of people employed in such mills.

Telegram N says:

Will you please do what you can to stop a reduction on the tariff on gingham flannelettes and colored goods made out of cotton? Also by all means stop any advance on imported dyestuffs. They should all come in free, as heretofore. No Massachusetts man can afford to vote for the Underwood bill as it now stands. It means the shutting down of the mills, or part of them, at least, and as a result a large number of operatives will be thrown out of employment.

Telegram O says:

The proposed Underwood tariff bill so far as it applies to cotton manufactures is a most unsatisfactory and an unjust bill. It will drive business from this country abroad and throw out of employment many thousands of people who are unable to work at any other kind of trade. The rates are much below what they should be and are very uneven and unjust in their application to cloths and yarns and the various processes of manufacture. I want to most vigorously protest against its passage.

Telegram P says:

Bill is very unsatisfactory. Fine yarns and cloths which require skilled labor are not protected enough.

How is this tariff question regarded to-day? Are sweeping reductions all along the line demanded even by Democrats? Again I turn to Democratic or nonpartisan sources of information.

(1) William Randolph Hearst says under date of April 13, 1913:

Mr. Wilson's opposition to the protective tariff is not inherently or essentially Democratic. Mr. Wilson is fundamentally opposed to the principle of protection, and his idea of radical, ruthless tariff reduction is but an expression of the English free-trade theories of Cobden and Mill. Mr. Wilson is an English free trader. He may obscure his utterances, but he can not conceal his acts. Mr. Wilson's political economy is the political economy of another nation and of another age. It is the political economy of a nation that is passing and of an age that is past.

And in the tariff legislation now pending the hand is the hand of Wilson, though the voice is the voice of UNDERWOOD.

(2) The thrice-elected Democratic governor of my own great Commonwealth, in a special message to a Republican legislature under date of April 3, 1913, said in part:

The average citizen would prefer the protective rates of the McKinley tariff, which transferred the tin-plate industry to the United States and built few years made us large exporters, to the so-called reductions which annihilate domestic industries and place the United States at the mercy of the foreign producer for its supply.

It will be conceded that a slow reduction of the tariff which reduces and stays reduced is better than a quick reduction which does not reduce at all. Reduction that benefits the country and sticks is based upon the same theory of the general welfare as protection. The two go naturally together.

But it does not necessarily follow that because protection is superfluous it should be eliminated. As the imposition of duties can be justified only on the ground of benefit to American industry, so is such benefit the only justification for the removal of a duty. A tariff tax is the price of admission to a market. In many cases the foreigner pays the price. If this condition exists without harm to American industry or the public welfare, it should not be disturbed except for a benefit to American industry and the American people. A market of 100,000,000 of the greatest consumers on earth is a possession of tremendous value. It is a possession of the American people. Every duty removed is a door opened to foreigners to enter upon this market. Every duty removed by the Democratic Congress without benefit or consideration to the American people will be a free gift to our foreign competitors of a valuable thing belonging to the American people.

For the steady administration of any tariff, a permanent board of nonpolitical experts, working in cooperation with our diplomatic service, our consular service, and the Treasury Department, can be of great usefulness to the country. The object of all scientific tariff making is to adjust rates to changing conditions in the markets of the world. The true proposal for a tariff commission and for a scientific tariff is for the application of the policy of general reciprocity.

The Democratic Congress is undoubtedly resolved upon a tariff policy that will punish the monopolies for their exactions from the people. But such a policy will surely result in two years or four years of depression under ill-considered tariff legislation, to be followed by a popular rebuke to the Democrats for giving their attention to a rebuke to the monopolies instead of to the interests of the people, and the tariff will be made a political football for years to come. Emphatic notice should be served upon them that no rate in the existing tariff law should be changed unless it can be shown that such change will open up new markets to American industry, reduce the cost of production at home, or benefit the great mass of the American people.

Precisely the reverse of this plan is likely to be put into effect by the Democratic Congress—a nonprotective, tariff for revenue only, unreciprocal, destructive upward and equally destructive downward revision. It is your right, it is your privilege, it is your duty to memorialize Congress in behalf of this Commonwealth against such a peril to the interests of Massachusetts.

(3) A dispatch from New Bedford, under date of April 14, 1913, says:

One phase of the tariff situation in New England which may be worth more than passing notice is that the apprehensions of manufacturers as to the disastrous effects of tariff reduction have aroused the labor unions to action. Last week the executive board of the United Textile Workers, the central labor organization of New England textile operatives, voted to protest against any tariff reduction that would injure the industry.

The labor unions have in the past generally held aloof from taking a position in tariff matters, but in the present instance the vote to take a definite stand was almost unanimous. They have gone on record at recent conventions as unanimously opposed to any wage reductions in the future, and it is generally felt that if the tariff changes should lead manufacturers to attempt any such course as this their action would precipitate a serious labor upheaval.

There are many things which I like and am glad to indorse in the Underwood bill. One is the antidumping clause, to prevent vast imports from Europe at ruinously low and unmeetable prices, while Europe is experiencing dull times. That, to be sure, is protection, though found in a Democratic revenue-tariff bill. Another is the solicitude displayed by the bill for the lives of the birds—if but only they would display the same solicitude for the lives and welfare of our American human beings. Another—although the section is crudely drawn and will prove most difficult in administration—is the income-tax provision, which is a sound tax in principle, though, alas, designed to secure the revenue lost by the taking away of urgently needed protection.

But the bill, as the gentleman from Alabama frankly says, is based on the revenue idea and not upon the protective idea.

To recapitulate:

First. The cotton industry is not a new and doubtful experiment, but an important and long-established branch of our industrial activity and one amply capable of supplying the needs of the country.

Second. The cotton industry is highly competitive and free from combinations harmful to the consumer.

Third. The cotton industry is conducted on a small margin of profit by reason of this competition.

Fourth. The advance in its prices has been exceptionally small.

One would suppose that an industry with such a record and in such a condition would receive some consideration from the framers of this tariff, but it has fared no better than many industries enjoying large profits.

It is possible that coarse goods may stand the proposed reduction in duties—in fact, we have in the past exported such goods—but mills on fine or higher grade products will be compelled, in order to meet the low-paid competition of Europe, to reduce wages, already low, to change to coarse goods and glut the market or to shut down.

And cui bono?

Even if cotton fabrics were made duty free, it is doubtful if a single consumer would be benefited to the extent of one dollar per year, and to that extent for only a short period; for, of course, such a tariff would close most of our mills—for our people will not work for European or Japanese wages—and the foreign producer, having our market to himself, would forthwith advance his prices, and the last state of the consumer would be worse than the present.

The cotton-cloth duties have been reduced disastrously, but the reduction in knit goods has been still larger, the duty on underwear having been reduced from 60.27 per cent to 30 per cent. And why has the knife been put so deeply into this branch of the business, so deeply that its very life is imperiled? Not from need of more competition, because many knitting plants fall by the way yearly under the competition already existing; not from excessive profits, for except in isolated cases the earnings of knitting mills have been small. And surely not because prices to the consumer have been oppressively advanced, for not only has the maker of cotton underwear been unable to advance his prices appreciably, but he is to-day giving fuller value than ever before. Such a drastic reduction in duty can be accounted for in only two ways—either those making the reduction failed to realize all the features of the case or they desired to terminate the industry in New England.

It has been stated by the Democrats here that one of the main objects of the bill is to reduce the cost of production by the increased pressure of foreign competition, which means, though the majority may not like to admit it, a lowering of costs by reducing wages. There is no room for any other meaning and there is no other feasible method of lowering costs. The Democratic argument, if it dared find expression, is that protection has unduly increased wages which the consumer has to pay in increased prices. Prices must be lowered, so wages must come down.

Now, that argument might apply with some reason to a schedule, if any there be, in which competition had been stifled and prices fixed ad libitum to increase already swollen profits, all at the expense of the consumer; but it does not apply to Schedule I, in which there is more than a healthy competition, in which profits average unreasonably low rather than high, and of whose prices no consumer has complained except at the instigation of importers controlling the product of foreign plants.

Yesterday a gentleman from my own part of the State called upon me—and I assume that my Democratic colleague from Massachusetts [Mr. PETERS], on the Ways and Means Committee, had a similar interview; he brought me samples of cloth which he manufactures in his mill, showing the product from the earliest stages right up to the final stage in which the cloth is ready to be sold across the counter.

He said: "How much do you suppose my mill gets for this beautiful piece of finished cloth?" I guessed very far from the mark. He said: "Twenty-five cents a yard." He then asked me, "How much do you suppose that retails for across the counter?" and I guessed 75 cents a yard. He said: "That retails for $1.50 or more per yard." Now, gentlemen, I say to you that you are attacking the wrong place on this tariff proposi-

tion, in so far as it relates to these duties in the cotton schedule. You are attacking the end of the business where neither profits nor wages are unduly high, and yet you are allowing to go absolutely unscathed the middlemen—the jobber, the wholesaler, the retailer—to do what they like with the price, and allow it to go skyward, to soar to the zenith, if you please, and get whatever they can from the ultimate consumer. It is the intermediaries who get the large profits, much larger than the manufacturer, and yet the former are absolutely unaffected by this tariff reduction.

I most earnestly urge, therefore, in the name of fair play and for the sake of the hundreds of thousands of people at work on the products enumerated in Schedule I and deriving a modest livelihood therefrom, that the destructive rates named in this bill may be so changed as to save this industry, already heavily burdened, from prostration. I am not worrying about any trust or unlawful combination or about the rich independent establishment with abundant resources, for all of them could probably weather a period of depression—the period of this administration, for instance—but I am appealing for the struggling small concern, the "little fellow" for whom our Democratic friends showed such touching solicitude before the election. If any industry is oppressing the public by exacting exorbitant profits, stick the knife in as far as you like and I will not protest; but do have some regard for a record as clean as that of the cotton textile industry during the hundred years of its existence.

In closing I wish to reiterate my oft-made statement that I stand squarely and firmly on the doctrine that we must protect our wage earners against low-priced European or Asiatic made goods and that to do this and to take the tariff, purely an economic question, out of the vexed realm of politics, we must have a nonpartisan tariff commission or board, on whose findings shall be based a tariff whose rates are as high as necessary, but not one iota higher, to protect the pay envelopes of our workers.

But this Schedule I is essentially sectional and will bring desolation to very many in Massachusetts. In the words of a constituent speaking of the bill, "Let us all sing one verse of that good old Methodist hymn and then adjourn, 'Death at the farthest can't be far.'"

I do not speak alone for the wage earner in the cotton mill, but for the farmer, the shoemaker, the butcher, the grocer, who supply his needs and whose income will go down in the same ratio as that of the mill worker to whom they sell; the excuse which I offer to the farmers and to the many and diversified industries of my great district for at this time laying so much stress upon the cotton industry is that all our eggs are in one basket; that ours is a common lot: that together we must sink or swim, live or die, survive or perish.

APPENDIX B.

[From the Boston Herald of Wednesday, Apr. 30, 1913.]

BAY STATE MAINTAINS LEAD IN GREAT TEXTILE INDUSTRY—UNITED STATES MAKES TO-DAY ONE-FOURTH OF WORLD'S COTTON CLOTH.

There is no doubt that the prosperity of the textile industry is a matter of tremendous moment to the country at large and to New England and Massachusetts in particular. The United States to-day is making more than one-fourth of the cotton cloth of the world, nearly one-fifth of the woolen cloth, and more than one-fourth of the linen. The other branches of this great business are of hardly less importance.

Dependent upon the mills are hundreds of thousands of workers, and to make the machinery move and carry the product through its numerous processes preparatory to marketing a vast amount of capital has been invested.

Perhaps the most striking way to bring home the enormous scope of this one phase of manufacturing is to quote the truly stupendous amount of money invested—$1,841,242,131. That figure represents the capitalization in the United States, while in Massachusetts alone the figure reaches a total of $398,729,906.

Scattered throughout the country are 5,332 establishments devoted to textile manufacturing, and these give employment to an army of operatives numbering nearly a million. In wages more than $335,000,000 is paid annually, and the value of the product is fixed in excess of $1,600,000,000. Of raw materials the country consumes in cotton 5,211,000 bales annually, and in the same period 510,000,000 pounds of wool.

The remarkable growth of Massachusetts as a textile center is evidenced by the fact that the cotton mills employ more than 108,000 hands and the woolen mills more than 60,000. In all its branches the industry requires 190,000 operatives of all classes. Invested in the production of cotton goods in this State is a sum roughly estimated at $214,000,000, and in the production of woolen goods $147,000,000 more. Linen is represented by capital of more than $17,000,000, hosiery and knit goods by a capital of $12,500,000, and silk by a capital approximately $8,000,000.

These figures, however, tell only part of the story. As in the case of every large business enterprise, it is not only those directly employed who are interested. The textile industry has been responsible for the upbuilding of thriving communities all over the State.

The 190,000 actual employees are by no means the only people interested directly or indirectly in the conditions of textile manufacturing,

although that number is great enough in itself. In many of the lesser New England communities the whole industrial life centers about the activity of the mills.

For years the textile manufacturers have been building up their business to keep pace with the growing demands of the public. More and more capital has been invested, and larger and larger numbers of operatives employed. Efficiency has been developed by wise methods of equipment and management, and the present commanding position of the State in this particular field has been due to the foresight and energy of a group of business men to whom New England owes no little part of its prosperity.

In the manufacture of cotton goods alone New England's leading position has long been recognized. The name of New Bedford is sufficient guaranty for excellence in the fine-goods field, while Fall River is no less important in the production of coarse goods. New England spindles number close to 16,000,000.

New Bedford alone has the capacity of producing each year 750,000,000 yards of fine cotton cloth. In addition it also produces the finest yarns in the world. It is no exaggeration to say that this one city produces more fine cotton goods than is placed on the market by all the rest of the country.

Of course, the greater part of the output of the New Bedford mills does not go direct to the consumer, but is taken up by brokers and is turned over by them to converters and to jobbers. For handkerchiefs alone millions of yards are used, and another grade little known to the general public is the cloth used for architects' drawing. For the manufacture of this particular grade the city has the largest factory in the world.

The great group of 67 mills is controlled by 37 corporations, with an aggregate capital of $36,821,300. In the equipment of the mills there are approximately 2,950,000 spindles and 55,000 looms, giving employment to more than 31,000 employees.

Fall River's output is equally stupendous. There the mills turn out annually 1,200,000,000 yards of cloth, using for the purpose an amount of cotton in excess of 500,000 bales. For the running of the plants 350,000 tons of coal and 400,000 gallons of oil are demanded, and the item of starch reaches something close to 4,000,000 pounds.

Nearly all the cloth is of coarse construction, and 65 per cent of it is for printing purposes. Fall River's working army numbers 34,000 operatives, who are employed in 39 mills, with 4,000,000 spindles and 97,000 looms. The capital invested is more than $30,000,000.

In the Blackstone Valley and in the region thence up toward Worcester there are other mills which represent a capitalization of $26,000,000 and give employment to 25,000 operatives.

Lowell and Lawrence are the great cotton-manufacturing centers of Massachusetts. In the former city there are mills which maintain a working force of 14,000 and operate 1,000,000 spindles and 26,000 looms and are capitalized at $12,000,000.

Lawrence, which boasts of the largest single cotton mill in the world, at the Everett Mills, has an equal importance with her sister city. Lawrence mills represent an investment of $15,000,000, with 600,000 spindles, 14,000 looms, and 16,000 operatives.

In New Hampshire, Manchester has gathered together the most notable group, with 800,000 spindles, 25,000 looms, 18,000 operatives, and a capitalization of $10,000,000. In Maine, Lewiston has mills with a capital of $6,000,000, with 400,000 spindles, 9,000 looms, and a working force of 5,000 operatives.

The Tariff.

SPEECH
OF
HON. JACOB JOHNSON,
OF UTAH,
IN THE HOUSE OF REPRESENTATIVES,

Saturday, May 3, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. JOHNSON of Utah: Mr. Speaker, I desire to make a few observations in relation to H. R. 3321, and to state a few of the many reasons which impel me to oppose the bill becoming a law.

I have no apologies to make for the record of the Republican tariff legislation in the past. I do not claim that its enactments upon that subject in all cases have been perfect. Nothing which is the subject of human action can, in the nature of things, be perfect. But the great prosperity which this Nation has enjoyed for nearly 50 years, with a slight interruption, under Republican protective-tariff legislation convinces me that the welfare and prosperity of the people of this Nation can best be promoted and conserved by proper and just protective laws properly administered, and that free trade will reduce the standard of the people and their institutions to the level of the free-trade nations of Europe and Asia.

I do not desire to be understood as advocating a tariff tax upon every article of importation into this country. I would admit free of all tariff duties such commodities as we can not produce in this country at all or in sufficient quantities to supply our demands and which are necessary to the promotion of our comfort and prosperity. Such commodities as we do not produce, but are luxuries, as distinguished from necessaries, I believe should pay a tariff tax, properly graded.

All other commodities imported into this Nation and which come into competition with our own production in our market should pay a tax for such admission. This tax should amount to the difference of the cost of production at home and abroad of such article.

I can discover no other method by which to protect the laborer—and I mean skilled and the unskilled laborer of this Nation—in his high standard above that of his European and Asiatic brothers.

Labor and skill constitute the principal cost of every article which we possess and enjoy. And this is true of the crude material in every stage of its advanced condition until the finished product is produced, and money is the medium by which such labor and skill is measured.

If, therefore, the cost of the production of an article in the United States is $2 and the same article can be produced in Europe for only $1 and is admitted into the United States free of duty in competition with the American product, how can the American laborer successfully compete with the European product without reducing his status to the level of his European competitor?

We are told by the other side of this House, in substance, that we must overcome this difference by "whetting our wits." But may not the European laborer also have "wits to be whetted"? I know of no patent on the "whetting of wits."

My Democratic friends, do you propose to reduce the standard of the American laborer? If you pass this bill, you will have gone a long way toward the accomplishment of such a result. And in my humble opinion one of two things must result from such action, either, first, the American laborer must descend to the level of his European brother, or, second, he must go without employment. I can see no escape from such a result.

The following statement is a sample of many which appear in the public press. And I may state that I have received hundreds of such personal letters and telegrams from nearly all parts of the country—from New York to San Francisco. The following appeared in the Evening Standard, New Bedford, Mass., under date of April 18, 1913:

CAN IMPORT CHEAPER—GREYSTONE PLANT WILL CLOSE MILLS—NOTICE POSTED TO THAT EFFECT IF COTTON TARIFF BILL GOES INTO EFFECT—CAN MAKE GOODS CHEAPER IN ENGLAND.

PROVIDENCE, *April 18.*

The Greystone mills of Joseph Benn & Sons (Inc.) will not be operated after the Underwood tariff act becomes a law, except upon orders that are received from customers. This was determined after Harrison Benn, principal stockholder in the company, had figured out the cost of making goods in each of the mills that his company owns and had found that he could land English-made goods in New York for about 12 per cent less than he could from the Greystone plant.

Machinery is being stopped gradually in the plant, and about 400 of the employees are already out of work, it is said. The goods that they have stopped making here, they say, they are making in England, orders to that effect having been sent yesterday afternoon. The employees at the Greystone plant were first apprised of the coming shutdown by a notice posted in the mills Wednesday, signed by the Joseph Benn & Sons (Inc.) and by Harrison Benn.

The notice reads as follows:

"The provisions of the new Wilson tariff bill make it absolutely impossible for us to successfully compete with imported goods. Therefore a stoppage of machinery will take place immediately."

Mr. Benn says that the mills will not be closed at once, but that there will be lay offs of a few employees at a time at intermittent periods.

Harrison Benn, in commenting upon the notice, said:

"There is nothing strange in it, nor is there anything that a person can not understand. Our business here is different from that of other manufacturers in this country in that we have two plants, one here in Greystone and the other in Bradford, England.

"We make the same kind of goods in each mill, from the same kind of stock, and for that reason, when we find that we can manufacture a style cheaper in one mill than we can in the other we transfer the order to that mill. In the present case I have asked the Congressman from this State to try and have an adequate protective duty placed upon mohair and alpaca goods, that we may be able to operate both of our plants.

"This seems to be something that they either can not or will not do, and for that reason I find that under the proposed Underwood Tariff Act I can make goods in Bradford and land them in New York at about 4 cents a yard cheaper than I can make them in Greystone and ship them to New York. On 13 numbers of styles I find that we can save from 10.6 per cent to 14.6 per cent a yard by making the goods in the Bradford plant and shipping them to New York. For that reason I have ordered all work that is being done for 'stock' stopped in this plant and am sending a cable to the Bradford plant to start 5,000 pieces of goods to take the place of the goods that we have stopped making here.

"Our prices on yarns and tops are about the same also. To understand that there is no difference between the two plants, I will tell you that some of the machinery here was used in the other mill and that we cut down the production of that mill by shipping the machinery here. Another thing that is not understood is the difference in the price we pay our operatives for the same kind of work.

"In the Bradford plant we pay a weaver 48 cents for weaving a cut of cloth, and for the same thing here we pay $1.49; for goods that cost us 78 cents there we pay $2.41 here, and for goods that cost 98 cents there we pay $3.01 here. In the spinning room the prices range from $2.23 to $2.88 per week there, and here for the same kind of work on the same machines we pay from $5.35 to $7.50 per week. Another difference is in the pay which we have to give our apprentices. They are obliged to serve four years, and in the Bradford plant they receive for those four years $1.92, $2.40, $2.88, and $3.36 per week. In the Greystone plant they receive for the four years $6.50, $7.50, $9, and $10.50."

Mr. Speaker, if you pass this bill, you will greatly reduce the production of this country. And just in that proportion will you increase the importation, and in the same proportion will

you deprive the American laborer of employment which legitimately belongs to him. You may in the course of time reduce the cost of living by the introduction of cheap, foreign-made goods, but in so doing you will proportionately reduce the wages of the American laborer.

Labor is a commodity largely dependent upon the law of supply and demand, and if you reduce the demand you reduce its cost, the same as would result in any other commodity. And such reduction in the cost of labor falls most heavily upon he who has the labor for sale.

The farmer will be the greatest loser by this law, as it reduces the value of nearly everything which his labor produces.

The State of Utah, which I have the honor in part to represent in this House, will be greatly injured by this legislation, and its industries retarded if not wholly destroyed. Its industries consist principally of agriculture in its various branches, and of mining.

The agriculturist depends largely on the mining industry for a market in which to dispose of his products.

The mines of Utah most affected by this proposed law will be the lead mines, but it will affect the production of gold, silver, zinc, and other metals to a very great extent. The lead ores of Utah contain very nearly an equal amount in values of lead and other precious metals, no one of which alone would pay for its production, but requires the combined value of all to pay for their production.

The value of Utah's metal output for 1912 was as follows: Gold, $4,300,000; silver, $7,995,000; copper, $24,750,000; lead, $9,300,000; and zinc, $1,069,000, a total of $44,414,000, and employed directly in the mines about 7,000 men, and in addition about 8,000 men at the smelters and other outside work, a total of 15,000 men. These men are paid from $2.50 to $4.50 per day for eight hours' work. I am not informed as to the amount of capital invested.

It is proper to state that gold, silver, and zinc metals are associated with the lead ores. The lead constitutes about 35 per cent of the values contained in the ores. This is only an approximate statement, but I believe it to be approximately correct.

The present duty on lead is 1½ cents per pound. It is now proposed to reduce this duty 66⅔ per cent, or to one-half cent per pound. If this reduction on the protection of lead shall take effect, it must result in a reduction in the cost of its production. This reduction must fall largely upon the miners engaged in digging it out of the hills, or a suspension of the industry, and with it the production of the other precious metals. It will certainly delay the development of many mines not yet having reached a producing stage. Besides, will furnish an outlet for the cheap lead ores of Mexico, mined by cheap labor, and at a rate for which the American miner will and can not work.

If you pass this law, will you not reduce the wages of 15,000 laborers? And just in the proportion that you import foreign lead under this reduced tariff will you displace those laborers. What will you do with them? You not only deprive the farmer of that part of his market for his product, but you do very much more than that to the farmer. You remove the protection on his wool, thereby placing him on a level with the foreign producer of wool. He must either reduce his standard of living to the level of his foreign neighbor or he must go out of the business.

In the year 1912 the wool product of Utah was 18,908,263 pounds, of an average value of 16 cents per pound to the woolgrowers; in all worth $3,025,322.08.

You remove his former protection on flour, potatoes, and other of his products. You remove the tariff on the products from his beets. You remove the protection on his cattle, but permit free beef, flour, and admit free of duty other of his products.

Do you not see that the farmer and the laborer are the ones who are the most injured by your proposed action, next the man engaged in business? The person who has leisure at his command is the principal beneficiary of your action.

You invite the foreign competition, but remember in so doing you also invite the foreign conditions. Do you intend to do this? Do you desire such conditions to prevail in this Nation? Do you desire to reduce the American people to a level with the standard of European and Asiatic hordes? I can not believe that you so intend. And yet your actions lead inevitably to such a result.

You invite foreign competition in America, the best market in the world. You invite the foreigner to place his commodities in competition with American-made goods, and to replace them. You expect large importation of foreign-made goods to be made into this Nation. Will you not thereby reduce the American-made goods in the proportion to such importation to the disadvantage of American labor? I can come to no other conclusion.

One of our great troubles of to-day is the cost of high living, indulged in by a large portion of our people.

Another defect of our economy is the abandonment of the farm for the congested centers, thus reducing the producers and augmenting the consumers of food. This, to a very large extent, is the cause of the so-called high cost of living. Our production has not kept pace with our consumption. Relieve the congested centers and replenish the farm with intelligent labor and you will have solved a very great economic problem.

Another of the industries of Utah and the adjoining State of Wyoming which will be seriously affected by the proposed bill is the coke and coal industry.

In the year 1912 Utah produced 3,088,256 tons of coal and 347,356 tons of coke, employing 3,921 coal miners, besides a considerable number of outside laborers.

Much of the coal and coke produced found a ready market at the Montana smelters, in competition with Canada coal. Remove the tariff from this coal and the Montana market must be abandoned to the Canada producers, who, as I am informed, employ prison labor in its production.

Only by virtue of the present tariff can the business survive in competition with the Canadian coal industry in the State of Montana. If the tariff shall be removed, the Utah and Wyoming producers will be driven from the Montana market, and without any benefits to the Montana consumers.

If you pass this bill, you will seriously affect the business of this Nation, much of which can not survive under the operation of a practically free-trade law. You will retard the present prosperity of our land, fill our Nation with cheap foreign-made goods by cheap foreign labor, and to that extent reduce our own productions and displace our own laborers and in the end reduce them and our common country to a level with the standards and conditions of foreign countries.

That you will pass this bill I have no doubt, but in doing so you assume a tremendous responsibility, which, if my views are correct, will result in great injury to this Nation and its people, and it is for that reason that I protest against its enactment into a law.

The Tariff.

EXTENSION OF REMARKS
OF
HON. FRED A. BRITTEN,
OF ILLINOIS,
IN THE HOUSE OF REPRESENTATIVES,

Saturday, May 3, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. BRITTEN. Mr. Speaker, under the general leave granted by the House to print remarks in the RECORD, I will print the following letters:

CHICAGO, *May 1, 1913.*

Hon. FRED A. BRITTEN,
House of Representatives, Washington, D. C.

DEAR SIR: Please protest against the dollar fee which collectors are to demand upon the filing of protests after July 1 under the order made by President Taft on March 3 last, and which is now proposed in paragraphs M and N of section 3 of the new tariff. The law gives us a right to file protests, but the fee just about takes away the right which the law gives us. The collector takes duties which we think are unjust, but we can not afford in many instances to pay the fee to establish our claim where the individual amounts are small. Under the law we have to file a protest on every shipment that comes in while the case is being litigated, and each entry may have only a few dollars involved, while a great deal of money may be involved in the aggregate. Why should we be compelled to pay a dollar for the privilege of notifying the collector he has made a mistake?

Respectfully,

S. KARPEN & BROS.
ADOLPH KARPEN.

CHICAGO, *May 1, 1913.*

Hon. FRED A. BRITTEN,
Congressman, Washington, D. C.

DEAR FRIEND BRITTEN: Your kind favor of recent date was duly received, for which please accept the writer's best thanks.

I am writing a number of the Finance Committee of the United States Senate, and to some of the Senators and Representatives from Illinois, in regard to the Underwood tariff bill, imposing a duty of 20 per cent on ivory tusks in the natural state.

We have been informed that ivory tusks have been transferred from the free to the dutiable list, because articles of luxury are manufactured from this raw material. The chief use made of ivory tusks in this country is the manufacture of piano keys, and with music taught in the public schools at the expense of the State, and considered a necessary adjunct to an ordinary education, a musical instrument in the home can no longer be considered an article of luxury, and 85 per cent of the pianos manufactured are bought by artisans and people of small means.

The writer wishes to make an earnest protest, based on the above grounds, against the transfer of ivory tusks from the free to the dutiable list.

With very kindest wishes, we remain,

Yours, very truly,

P. A. STARCK PIANO CO.,
By P. A. STARCK, *President.*

The Tariff—Briefs Submitted on Behalf of Two California Industries.

EXTENSION OF REMARKS
OF
HON. JOSEPH R. KNOWLAND,
OF CALIFORNIA,
IN THE HOUSE OF REPRESENTATIVES,

Tuesday, May 6, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. J. R. KNOWLAND. Mr. Speaker, under the general privilege accorded to print during the consideration of the present tariff bill, I herewith insert a brief from the California Cotton Mills Co., of Oakland, Cal., and a statement by a committee representing the walnut growers of that State:

BRIEF RELATING TO THE REVISION OF TARIFF SCHEDULE J, AND ALSO SCHEDULE I.

[From California Cotton Mills Co., Oakland, Cal., to the Ways and Means Committee, House of Representatives, Washington, D. C.]

The California Cotton Mills Co., located in Oakland, Cal., was established in 1883, to manufacture a variety of goods made from raw cotton, flax, hemp, and jute. The cotton and hemp are of domestic growth and secured in the United States, the flax imported from Russia, and the jute from Calcutta, India. These mills have been operated continuously since they were started, and manufacture a great variety of textile articles, amongst which are cotton and flax towels and toweling, damask, duck, flax and cotton crash, cotton, jute, hemp and flax twines, rope and cordage, and large quantities of jute burlaps and jute yarns. These goods are sold largely on the Pacific slope, the Hawaiian Islands, and the Philippines. The mills give steady employment to fully 700 workpeople, who are paid good wages. The capital stock of this company is $2,000,000, owned by about 250 stockholders, some of whom are employees in the mills. The profits of this industry have run, during the 28 years of its existence, between 4 and 8 per cent per annum. During the years 1893, 1894, and 1895 the mills made little or no profit. Raw cotton can be landed at the mills at very little less than the cost of freight to land the same raw material at the mills of European manufacturing centers. In some cases it can be landed for less at the European mills than at mills in some parts of the United States, the freight rate by steamers being low. Raw flax, hemp, and jute may cost a little more in the United States than the laid-down cost at European textile-manufacturing centers.

The increased cost of manufacturing textile goods in the United States compared with European countries arises principally from the higher wages paid and from certain fixed charges other than wages that fall upon these industries in this country, such as insurance, taxes, light, and power, and the cost of dyestuffs and chemicals, all of which are important elements in the cost of manufacturing the finished products. The author of this brief and protest, made under the direction of the officers of this company, has worked in European manufacturing countries over 20 years before coming to America and is in close contact with business in the Old World, and can therefore state positively facts based on personal observation and practical experience.

Municipal, county, and State taxes in the United States where manufacturing establishments are operated are often twice as high as in most European states. Our systems of municipal, county, and State governments are very complicated and expensive, and all textile manufactories have to bear their share of the general burden of civil government.

The insurance rates on all textile industries in the Old World are much lower than insurance rates in the United States. In England, for example, insurance can be effected for 50 cents on 100 pounds sterling value covered by insurance.

Wages are the great item to be considered in the cost of manufacturing. Therefore in any reduction of the tariff wages will be the principal thing that will have to meet the crisis of a reduction of the protective tariff. The inventive genius of the highest order which has been at work perfecting the operations of machinery is now fast being applied by every civilized country; even in Japan, where the lowest paid textile operatives in the world are busy at work flooding the Chinese and Indian markets in competition with England, and even with China and India themselves, the most advanced and improved textile machinery is being installed and operated.

The Tariff Commission formed by the United States Government, which made a report containing much interesting matter, was in many cases far from correct in its statements of wages paid in foreign countries; and the cost of production of goods treated in that report, as stated by the commission, were in many cases misleading. We do not deem it necessary in this instance to cumber our brief with confusing figures as to the class of labor here and work and wages paid in various countries referred to in the following statement, but a general average will be found in this tabulated statement, showing the wages paid in those countries named. The figures given are based on a nine-hour day, 6 days a week, or 54 hours' working time.

The different countries may be fairly computed as follows:

Wages paid for a 54-hour working week.

	United States.	Great Britain.	France.	Germany.	Switzerland.	India.	Japan.
Textile machinists	$16.50	$8.75	$6.50	$6.00	$5.50	$3.10	$2.75
Cotton spinners	12.50	6.20	3.95	3.80	3.50	2.75	2.10
Cotton weavers	13.50	7.20	4.10	4.00	4.00	3.00	2.75

In other classes of workers there would be about the same difference as shown here, but they would be immaterial and too numerous to mention.

In view of these figures, which speak for themselves, we deem it proper to state here that to reduce the present tariff on textile fabrics and structures would necessitate a reduction of wages of those employed in the textile industries. We protest most strongly against any change being made in the present tariff rates, as it would lead in many cases to stoppage of the mills and bring ruin to the manufacturer and destitution to the workers. We therefore pray your honorable body to make no reduction of the present tariff on these goods.

In some branches of textile manufacture—cotton, hemp, flax, and jute—the present tariff does not cover the difference in cost of production, and the result is that a very large amount of foreign goods find a ready market in the United States in competition with the domestic manufactured goods. Over half the importations into this country at the present time come in free, and any increase over the $800,000,000 worth of free imports must impoverish the manufacturing interests of the United States.

Respectfully,

CALIFORNIA COTTON MILLS CO.,
By WM. RUTHERFORD, *Superintendent.*

—

WASHINGTON, D. C., *January 20, 1913.*

To the honorable Committee on Ways and Means,
House of Representatives.

GENTLEMEN: The following brief and its accompanying exhibits are hereby submitted by a committee representing the walnut growers of California in support of the retention of the present rates of duty upon walnuts.

Respectfully submitted.

C. C. TEAGUE.
FRED. A. HAZZARD.
J. A. OSMUN.

The walnut growers of California, through the undersigned committee, desire to submit for your consideration a few reasons, supported by facts and figures, showing why the present duty of 3 cents per pound on walnuts not shelled and of 5 cents per pound on walnuts shelled should be continued. Under the present rates of duty the walnut industry is having a healthy growth, the production having more than doubled in the last 10 years, until the domestic product is supplying about 50 per cent of the consumption of walnuts not shelled in the United States. (See Exhibit 1.)

From 1901 to 1911 the importation of walnuts not shelled has increased from 4,851 tons to 11,104 tons, an increase of 127 per cent. Shelled walnuts have increased from 1,112 tons to 5,356 tons, an increase of 363 per cent. In a corresponding increase the revenue to the United States upon these two classes of walnuts has gone from $402,311.69 in 1901 to $1,201,929.68 in 1911, an increase in revenue of 198 per cent. (See Exhibit 1.)

The countries furnishing these imported nuts are, in order of importance, France, with 78 per cent; Italy, with 13 per cent; Chile, Turkey, Hungary, Spain, Manchuria, and other countries collectively, 9 per cent. (See Exhibit 2.)

Only two districts in Europe, viz, Sorrento, in Italy, and Grenoble, in France, produce nuts comparable in quality and size with the domestic nut. The quantity that can be furnished by these districts is limited, and of the total importation of walnuts less than 20 per cent are of these grades.

The bulk of imported nuts are the Marbot and Cornes varieties. These correspond in size and quality to the second grade of the Pacific coast production. Many walnuts of foreign production, especially in France, are used in making oil. These nuts are small and practically unfit for exportation. If the present duty is lessened, many of these inferior nuts will be sent to the United States.

Under the present rates of duty the production of walnuts on the Pacific coast since 1903 has increased from 6,339 tons to 12,500 tons in 1911. (See Exhibit 3.)

The consumption of walnuts in the United States has increased from 16,166 tons of walnuts unshelled and 1,780 tons of shelled nuts in 1903 to 23,604 tons of nuts not shelled and 5,356 tons of shelled nuts in 1911. These totals are found by adding importation totals and domestic production. (See Exhibits 1 and 3.)

The rates of duty of 3 cents and 5 cents, respectively, per pound on walnuts barely represents the difference in the labor costs of production. The duty on walnuts shelled protects the consumer to a certain extent against excessive importations of a deleterious food product, for it is well known that walnuts shelled soon become rancid and unfit for consumption.

The probable effect of a decrease in duty on walnuts not shelled will be to encourage the importation of an inferior article, because nearly all of the world's supply of really good walnuts is already coming to this country.

The lands that are now devoted to growing walnuts are the very richest and most fertile in California, and are suitable for growing other crops, which are yielding as good or better returns than walnuts, and the margin of profit in growing walnuts is so low—see Exhibit 4–B—that if a reduction of the duty should result in less profits in the industry many would dig up their groves and devote the land to the growing of other products. This would result in an increased price to the consumer, as substantially all of the good walnuts produced in the world are now being consumed in this country, and without the California production there would be only about one-half enough to supply the American demand.

Foreign walnuts are not grown in orchard form as we grow them in this country, but are grown as border trees to plots of ground, along roadways, in pastures, and on hillsides or waste places, and therefore are without the cost of orchard care; while in this country irrigation is required, necessitating planting in orchard form and cultivation, entailing a cost on an average of $31.50 per acre, equaling a cost of 3¾ cents per pound. (See Exhibit 4–C.)

The cost of labor in this country being greatly in excess of labor in foreign countries, the costs of harvesting and packing are also greatly in excess of that in foreign countries.

The duty, on an ad valorem basis, estimated, is approximately 40 per cent on the walnuts not shelled and 30 per cent on the shelled product.

Considering the facts that a walnut grove costing $750 per acre—see Exhibit 4–B—under the highest culture will produce on an average only 825 pounds of walnuts each year, the present duty is much larger proportionately than on most other manufactures and products entailing so much investment.

SUMMARY.

A rate of duty which through experience has shown a benefit to all concerned can not be wrong. Under this duty and during a 10-year period the domestic production has more than doubled, the foreign importations have more than doubled, the consumption has more than doubled, the revenue to the Government has more than doubled, competition has been maintained, while the consumer has been furnished a better article without increase of price.

EXHIBIT 1.

Previous to 1901 no division was made in Government reports between walnuts and filberts, consequently our exact knowledge of the importation of walnuts begins with 1901.

The following table shows the amount of walnuts imported from all countries for the years 1901 to 1911, inclusive, showing tonnage invoice price at foreign ports of shipments. It also includes the duty paid to the United States Treasury Department:

	Value.	Average invoice price.	Duty.	Corresponding ad valorem duty.
				Per ct.
1900, reported 1901:				
Not shelled, 7,851 tons	$560,544.25	$0.058	$291,076.73	51+
Shelled, 1,112 tons	344,218.00	.155	111,234.91	32+
	904,762.25		402,311.60	
1901, reported 1902:				
Not shelled, 5,197 tons	553,773.06	.063	311,921.44	65+
Shelled, 1,297 tons	309,829.00	.12	129,714.71	41+
	863,602.06		441,536.15	
1902, reported 1903:				
Not shelled, 4,468 tons	537,014.00	.06	268,093.17	50+
Shelled, 1,517 tons	508,683.00	.167	151,798.50	37+
	1,045,697.00		419,891.67	
1903, reported 1904:				
Not shelled, 9,727 tons	1,084,385.00	.055	583,620.36	54+
Shelled, 1,789 tons	548,991.00	.153	178,997.05	32+
	1,633,376.00		762,617.41	
1904, reported 1905:				
Not shelled, 8,150 tons	905,131.00	.055	489,364.17	54+
Shelled, 2,089 tons	519,730.00	.124	208,900.50	41+
	1,434,861.00		698,264.67	
1905, reported 1906:				
Not shelled, 7,514 tons	1,044,330.00	.068	450,891.72	44+
Shelled, 2,474 tons	798,975.00	.161	247,408.75	31+
	1,843,305.00		698,300.47	
1906, reported June 30, 1907:				
Not shelled, 11,512 tons	1,409,422.91	.065	691,099.37	48+
Shelled, 3,509 tons	1,163,468.00	.162	359,999.39	30+
	2,572,891.91		1,051,098.76	
1907, reported June 30, 1908:				
Not shelled, 10,719 tons	1,530,640.65	.071	642,535.53	41+
Shelled, 3,539 tons	1,180,765.30	.166	354,947.92	30+
	2,711,414.95		997,783.50	
1908, reported June 30, 1909:				
Not shelled, 8,716 tons	1,083,792.21	.062	522,945.88	41+
Shelled, 4,392 tons	1,322,560.00	.151	439,095.43	33+
	2,406,352.21		962,041.31	
1909, reported June 30, 1910:				
Not shelled, 11,639 tons	1,545,197.34	.066	668,099.23	43+
Shelled, 5,481 tons	1,851,408.75	.169	548,049.40	29+
	3,396,606.09		1,216,148.63	
1910, reported June 30, 1911:				
Not shelled, 10,573 tons	1,680,301.35	.079	614,353.50	37+
Shelled, 6,322 tons	2,555,465.00	.227	582,202.73	22+
	4,235,766.35		1,196,586.23	
1911, reported June 30, 1912:				
Not shelled, 11,104 tons	1,643,909.25	.074	606,265.35	40+
Shelled, 5,338 tons	2,085,678.00	.196	535,664.33	25+
	3,729,638.25		1,201,929.68	

(Taken from yearly Reports of Commerce and Navigation of the United States.)

EXHIBIT 2.

Compilation of figures showing percentages of origin of walnuts imported from foreign countries.

SHELLED AND UNSHELLED.

	France.	Italy.	Chile.	Other countries.
Crop of—	Per cent.	Per cent.	Per cent.	Per cent.
1903	65	15	12	8
1904	72	13	8	7
1905	70	8	7	6
1906	83	13	.....	6
1907	88	8	2	4
1908	77	13	5	5
1909	76	14	.....	4
1910	76	17	.....	7
Average	78	12.3	.....	.....

EXHIBIT 3.

Walnut shipments of California from 1903 to 1911.

[Compiled by the J. K. Armsby Co. from railroad shipments.]

Year.	Pounds.	Tons.
1903	12,678,248	6,339
1904	15,175,994	7,587
1905	12,776,136	6,388
1906	15,098,887	7,548
1907	14,674,343	7,337
1908	20,286,749	10,143
1909	18,695,686	9,347
1910	19,388,776	9,694
1911	25,000,000	12,500

EXHIBIT 4.

Reports of State Board of Equalization of California.

1908, walnut trees bearing	666,471
1910, walnut trees bearing	651,852
1912:	
Walnut trees bearing	680,960
Walnut trees nonbearing	224,299

A.

Upon an average, 25 trees are planted to an acre.

680,960 ÷ 25 = 27,240—acres bearing.
224,299 ÷ 25 = 9,000—acres nonbearing.

The true values of bearing orchards, based upon assessed appraisement, is $750, as an approximate average.

The true value of nonbearing orchards in the same manner equals $300.

B.

$750 times 27,240—$20,430,000}
$300 times 9,000— 2,700,000} —investment.

Investment... 24,950,000

The production in 1908=10,240 tons=20,686,000 pounds.
The production in 1910= 9,694 tons=19,268,000 pounds.
The production in 1911=12,500 tons=25,000,000 pounds.
Dividing each of these outputs in pounds by the number of trees reported gives:

For 1909=31 + pounds.
1910=31 + pounds.
1911=36 + pounds.

98 ÷ 3=32.66, or 33 pounds average.

33 times 25=825 pounds per acre average output.

The average price for years from 1902 to 1911, inclusive, was 12.55 cents gross or 11.5 cents net to grower.

$0.115 × 825=$94.875.

From this amount the costs of production must be subtracted. These are approximately:

C.

	Labor costs.
$20.00, cultivation	$20.00
7.50, irrigation	7.50
2.00, pruning	2.00
2.00, fertilization	2.00
8.00, taxes.	
12.00, harvesting.	
51.50	31.50

$94.875—$51.50=$43.375.

The Tariff.

SPEECH
OF
HON. J. HAMPTON MOORE,
OF PENNSYLVANIA,
IN THE HOUSE OF REPRESENTATIVES,

Monday, May 5, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. MOORE. Mr. Speaker, herewith I submit two letters, one bearing upon the boot and shoe provision and the other relating to the difference in the cost of production at home and abroad:

LAIRD, SCHOBER & CO.,
Philadelphia, Pa., May 3, 1913.

Hon. J. H. MOORE,
House of Representatives, Washington, D. C.

HONORABLE SIR: No doubt you are deluged with letters and telegrams bearing on the proposed tariff bill now being considered by the Congress of the United States, which makes us hesitate to take up any of your valuable time to consider the proposition of placing boots and shoes on the free list. But we can not refrain from expressing ourselves and asking you to protest against any such foolhardy legislation.

PRESENT TARIFF DANGER LINE.

The Payne-Aldrich bill reduced the duty 40 per cent on boots and shoes made of goatskin, or from 25 to 15 per cent, and 60 per cent on boots and shoes made of calfskin, or from 25 to 10 per cent. This placed the industry at the danger line, and this action has caused foreign manufacturers to make preparations to invade this country.

PROPOSED CHANGE IN TARIFF PROHIBITS COMPETITION WITH FOREIGN MANUFACTURERS.

We have advices from our London branch stating that English and European manufacturers are producing boots and shoes in styles which are popular at the present time in this country, made over American lasts, from American leather, and by American machinery at prices about 20 per cent less than we can produce them. In view of this condition it seems foolhardy to place boots and shoes on the free list, ruining the boot and shoe industry, in which there is $220,000,000 of capital invested and a volume of business amounting to $500,000,000.

UNITED STATES LABOR COST AND OVERHEAD CHARGES.

The percentage of labor is a positive factor in the shoe industry, amounting to 20 to 30 per cent of the selling price. The labor cost in competitive countries, such as Germany and the United Kingdom, is approximately 60 per cent of the labor cost in this country on similar grades of goods. The overhead charges of the foreign manufacturers are also about 60 per cent of overhead charges in this country. In justice to ourselves and in duty to our employees we must ask you to use your best efforts to protect this labor condition and the boot and shoe industry.

FOREIGN TARIFFS PREVENT SALE OF AMERICAN PRODUCT ABROAD.

We were one of the pioneers to seek a foreign market for our product, which at one time was a profitable part of our business. This has been gradually reduced by tariff legislation and the improved product of foreign countries, which has practically reduced our foreign business to a very small amount, and it seems ridiculous to open our markets to the world in face of the duty that is required on all boots and shoes going into foreign countries, with the exception of the United Kingdom.

To give you a practical illustration: Our export business with Australia at one time was a large percentage of our business; to-day it is practically nothing. This change is caused by the duty imposed by Australian and New Zealand Governments, which has practically prohibited the importation of any great amount of American boots and shoes. Our agents who were selling shoes now direct their efforts to placing leather in the Australian market, where a number of shoe manufactories have been established on account of this change of tariff laws in the said countries.

DISASTROUS EFFECT ON LABOR-EARNING CAPACITY.

As we see it, the result of placing boots and shoes on the free list means eventually one of three things—first, an extreme reduction in the wages we are paying labor (which will reduce the employees to the condition of foreign labor); second, closing our factory; or, third, moving our plant abroad.

RIDICULOUS LEGISLATION, TAKING DUTY FROM BOOTS AND SHOES AND IMPOSING DUTY ON ARTICLES USED IN THE MANUFACTURE OF BOOTS AND SHOES.

We would say, further, that if free boots and shoes is brought about we must ask you to positively oppose any such outrageous action as allowing the duty to remain on any article that goes into the manufacture of boots and shoes. There are many fabrics used in the manufacture of boots and shoes, such as worsted cloths, cotton goods, velvets, velveteens, satin, cotton braid laces, and silk braid laces, and various kinds of leather, such as buckskin, kid skin, and bronze kid skin. In fact, by keeping the duty on any article used in the manufacture of boots and shoes and placing boots and shoes on the free list you will plainly see it means the forcing of the American manufacturer to pay a premium for the privilege of making shoes in his own country.

Trusting the above will receive your kind consideration, and that you will use your influence to protest against such a drastic measure as placing boots and shoes on the free list, we are,

Very respectfully, yours,

LAIRD, SCHOBER & CO.

SHEBOYGAN, WIS., *May 3, 1913.*

Hon. J. HAMPTON MOORE,
House of Representatives, Washington, D. C.

DEAR SIR: Manual labor is the chief item of cost in the production of high-grade enameled ware, in which American skill does not excel that of the Europenn. The American output per day, per man or woman, is less and the labor costs are from 75 to 400 per cent greater than those enjoyed by the European manufacturer.

We implore you, before reducing the present tariff 40 per cent on the above line, to first take those precautionary measures, which will demand of the European manufacturer the maintenance of American labor costs and standards of living, which you and all Americans demand of us. Then, and not until then, reduce or remove all tariff on this line as you elect and let the fittest survive. You demand proper remuneration by the American manufacturer; demand of us employers' liability, State income tax, Federal excise tax, and contributions to American standards, and now have in mind the entry into the States of a product by those who subscribe to little or none of these. Is this fair? Are you not showing an absolute preference for the European manufacturer under these unequal conditions? We appeal to you only from a standpoint of fairness and not from a desire for unjust protection at any point. We are now undersold by the European manufacturer in the Chicago market from 20 to 25 per cent and our net profits are not one-quarter of this.

Very truly, yours,

THE VOLLRATH CO.,
F. S. MORRIS, *Treasurer.*

I also submit a letter addressed to my colleague, Mr. VARE, on the question of chemicals:

YELLOW PRUSSIATE OF POTASH (H. R. 3321), SCHEDULE A, PARAGRAPH 65.

PHILADELPHIA, *May 5, 1913.*

Hon. WILLIAM S. VARE,
House of Representatives, Washington, D. C.

SIR: For your information we beg leave to hand you herewith copy of a letter written by Hon. FRANCIS BURTON HARRISON to Hon. ALFRED G. ALLEN, of Ohio, on the subject of duty on yellow prussiate of potash; and copy of our letter of this date to Mr. HARRISON, calling his attention to an evident misapprehension of the facts and conditions in the industry.

Yours, very truly,

HENRY BOWER CHEMICAL MANUFACTURING CO.,
W. H. BOWER, *Vice President.*

APRIL 29, 1913.

Hon. ALFRED G. ALLEN,
House of Representatives.

MY DEAR MR. ALLEN: I have received the communication from the Bahlman-Frederich Chemical Co., of Cincinnati, Ohio, manufacturers of yellow prussiate of potash, and I thank you very much for calling the matter to my attention.

The reduction in the duty in our bill from 4 cents to 1¼ cents per pound on yellow prussiate of potash was unavoidable. Consider how extensively this product is used in color making, in textiles, and for chemical manufacturing.

I think that the chief trouble with the American manufacturers of this product may be traced to the fact that they are making it by a process which has now become obsolete abroad. Previously the article was made exclusively from animal refuse, such as leather scraps, horn, and carbonate of potash. To-day it is obtained from a gas purifying mass, both materials and process being much cheaper.

The present duty equals over 40 per cent ad valorem, and even at that rate the American manufacturers can not hold their own on account of their obsolete process of manufacturing. Out of seven establishments that have manufactured this material in the United States in the past, at present only three remain. From this statement you can see that it would be unfair to the very extensive consumers of yellow prussiate of potash to continue the former high protective duty.

Yours, sincerely,

FRANCIS BURTON HARRISON.

PHILADELPHIA, *May 5, 1913.*

Hon. FRANCIS BURTON HARRISON,
House of Representatives, Washington, D. C.

SIR: Your letter of the 29th ultimo, addressed to Hon. ALFRED G. ALLEN, on the subject of duties on yellow prussiate of potash, has been placed before us.

We desire to state most emphatically that you have been misinformed, and the reasons you give for so great a reduction in this duty can not be substantiated.

We and the manufacturers in Syracuse, N. Y., use exactly the same raw materials and processes that are used abroad. The manufacturer in Cincinnati uses the old animal-refuse process, as it is cheaper for him to manufacture by that process there than by the use of gas purifying mass. The reason for this is that he has no competition in the purchase of leather scraps by fertilizer manufacturers.

Since our firm began the manufacture of yellow prussiate of potash, in the early sixties, we have built seven plants. Five of these have been discarded and scrapped. To-day we are working two plants, both modern, one having been built in 1909 and the other just put in operation after four years of experimenting.

You can verify our statements by a personal visit to our factory in Philadelphia, or by addressing the people from whom we purchase our supplies. Some of them are:

The United Gas Improvement Co., of Philadelphia, spent oxide.
Consolidated Gas Co., of New York, N. Y., spent oxide.
Astoria Light, Heat & Power Co., New York, cyanogen sludge.
The Roessler & Hasslacher Chemical Co., New York, carbonate of potassium.
Pfaltz & Bauer, New York, carbonate of potassium.
Peters, White & Co., New York, potassium chloride.
H. J. Baker & Bro., New York, potassium chloride.

Notwithstanding the fact that our process and materials are the same as are used abroad, we would be unable to compete under a duty of 1¼ cents per pound. This is owing to the fact that our labor costs are higher, and the prices of our raw materials purchased in this country are also higher, owing to the great labor costs of these raw materials.

We think that if we can prove to your satisfaction that the statements made in your letter to Mr. ALLEN are wrong, you should withdraw your opposition to an increase in the duty on yellow prussiate of potash and request that the great injustice done us be rectified by the Finance Committee of the Senate. We trust that you will give this matter very serious consideration and verify every statement that we have made.

Yours, truly,

HENRY BOWER CHEMICAL MANUFACTURING CO.
W. H. BOWER, *Vice President.*

The Tariff.

SPEECH
OF
HON. GEORGE W. EDMONDS,
OF PENNSYLVANIA,
IN THE HOUSE OF REPRESENTATIVES,

Monday, May 5, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. EDMONDS. Mr. Speaker, students of political economy will recognize in the proposed tariff bill the attempt made so many times heretofore to incorporate into the laws and policies of our country the ideas and teachings of Richard Cobden.

Richard Cobden was one of the greatest students of political economy the world has ever seen. He was a manufacturer and a member of the British Parliament. His idea was—and mark the similarity in the address of the chairman of the Ways and Means Committee—that there should only be a tariff on luxuries, and that for revenue only, and that all other taxes should be levied on land, incomes, and property.

Cobden's contention was made at a time when, owing to a failure of the crops, as well as a high tariff, particularly on

foodstuffs, the people were unable to buy bread, causing suffering and starvation to spread over the entire land. Circumstances favoring him, he was successful, and since then England has been a free-trade country. It is easy to recognize the fact that countries small in size and overpopulated, such as England, must of necessity furnish for its manufactured articles a market in order to obtain a necessary supply of foodstuffs.

But compare our country with England. Are people suffering and starving? Have our crops failed? In fact, is there anything occurring now that can in any way be compared with the condition of England at the time referred to? I confess I do not see it. We have never been so prosperous as during the past four or five years. Labor has had employment; business was never better. Not being satisfied, however, the members of the Democratic Party propose to upset all these conditions.

There is no question that the people of our country are desirous of a revision of the tariff, but they will not be satisfied with a bill that brings disaster to our industries. What the people do desire, what they will want after the passage of this bill, and what eventually they will insist on having, is a tariff constructed upon a scientific basis, which will give protection covering the difference of cost between here and abroad.

I firmly believe in a protective tariff system where the measure of protection shall equal the difference in the cost of production at home and abroad, and the best way, in my opinion, to find out that difference is by the appointment of a permanent board or commission. The commission should be composed of tariff experts to find out the facts upon which Congress can build a tariff and make classifications of articles to which Congress can plainly and accurately fix customs duties. The commission itself should not be allowed to fix duties, that function being left to Congress. Congress, therefore, parts with no legislative powers, as our Democratic friends fear it will.

Unless the members of the Ways and Means Committee of the House and the Finance Committee of the Senate, which committees respectively have charge of the framing of the tariff bills, are specially trained to give their whole time and attention in securing the facts upon which to base and enact a tariff law that covers thousands of items, touches every industry throughout the entire Nation, and concerns the livelihood of millions of people, can we expect any tariff revision except by the old-fashioned method of logrolling, when in the trading of votes favors are exchanged for favors?

When the Sixty-first Congress started on a revision of the tariff it found itself with very little, if any, information as to the relative cost of production here and abroad, and the President was therefore authorized to appoint a Tariff Board, which investigated two of the most important schedules, namely, the woolen and cotton, so thoroughly that its reports have been admitted by nearly every leading business man whose industries have been involved by these schedules to be the most complete reports ever issued.

Changes will constantly occur in the cost of production both at home and abroad, just as changes occur in the rates of our railroads. And for that reason alone, if for none other, we should have a permanent commission to inquire into those changes. Of course, there will be many objections to such a commission, one of which will be that it would disturb business. Producers would be unwilling to disclose their cost, fearing that such information may in some way be used against them, and the person who believes in free trade would assuredly raise a most emphatic objection. But experience has shown that all these objections can be overcome.

Some years ago a tariff commission was established by the German Government, composed of over 32 leading experts and business men, who investigated all of the large industries and examined hundreds of employers and employees. The work of the commission extended over six or seven years. Did the report of this commission result disastrously to the business interests of the German Empire, which is more intricate than our own? It did not, as it placed the business on such a basis that it is one of the soundest in the world.

Past Congresses have authorized the appointment of boards and commissions to investigate in every detail every economic subject save the tariff. The Monetary Commission has investigated and submitted its report on our fiscal policy. The Immigration Commission spent over a million dollars to suggest a solution of the immigration problem. The Industrial Commission, appointed some 15 years ago, spent thousands of dollars to investigate the labor question. Congress in its wisdom has seen fit to appoint an Interstate Commerce Commission, so that it may enforce the laws to regulate the railroads. We have had many other commissions and boards to investigate all sorts of questions but no commission to study in a thorough and scientific manner the most important subject of all and one which affects every man, woman, and child, namely, the tariff, although such a commission is desired by the business man, the manufacturer, the farmer, the producer, and the consumer.

It is true that we have had tariff boards and commissions, but they have been short-lived ones and have not had the opportunity to investigate our entire tariff system in the manner that it should be. With as diversified industries as exist in every State of the Union there should be a permanent tariff commission, such as the German tariff commission, which has placed the tariff of that country on as scientific a basis as any tariff system in the world.

If the last Tariff Board had been given the opportunity to investigate as thoroughly every schedule of the tariff bill as they did the woolen and cotton, Congress would to-day have such data that no political party could ignore. Did the majority of the Ways and Means Committee take advantage of the information furnished them by the board on Schedules I and K? The answer is No. Why? Because they believe in the Cobden theory.

Cobden's theory may be the best for a country like England, which is dependent upon the Continent and the world at large for the food supplies, but not for a country like our own, the welfare of which depends on a protective system that will give our labor employment, keep our mills in operation, and build up a market for our products.

Does H. R. 3321, to be popularly known as the Underwood bill, accomplish these things? No; but, on the contrary, it is causing the mills of a great manufacturing center like Philadelphia to begin preparations of reducing their forces and ultimately close down altogether. If the proposed tariff act shall go into effect, which seems probable, it will certainly make very serious changes in business affairs, especially as such changes affect the laboring interests of the country.

The report of the Ways and Means Committee on the present bill states that imports will increase the first year to the amount of $150,000,000. This means that $150,000,000 of good American money will be sent abroad and will not be spent in our own country for home products. Naturally its proportionate share will not go to our working people, so that they, with plenty of work and opportunity, can enjoy their share of the good things of life.

History, especially in tariff legislation, repeats itself, and after the bill in question becomes a law and the country begins to feel the effect of its drastic features, as it did when former Democratic measures were passed by Congress, the people will appreciate the necessity of a tariff revision along conservative as well as scientific lines.

Japanese Endanger Lumber Industry by Competition, and Flour and Wheat by Invasion.

REMARKS
OF
HON. ALBERT JOHNSON,
OF WASHINGTON,
IN THE HOUSE OF REPRESENTATIVES,
Thursday, May 1, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. JOHNSON of Washington. Mr. Speaker, I desire to extend my remarks made on this floor yesterday in which I undertook to prove that oriental labor in British Columbia would absolutely destroy the shingle industry of the State of Washington unless a tariff on shingles of 40 cents to 50 cents should be retained.

In addition to the various statements presented showing the danger to us from the Japanese, Chinese, and Hindus on our northern boundary, I desire to present a dispatch printed in the Grays Harbor Washingtonian of April 27, which has a direct bearing on the subject. I submit the following:

AVEY THINKS JAPS ARE SLIPPING ONE OVER.

MONTESANO, WASH., *April 26.*

E. S. Avey, a prominent attorney from Elma, and one of the best informed citizens, is another who feels that the Government should lose no time in making fortifications on Grays Harbor. He said this morning:

"Why Grays Harbor should have been neglected so long I can not see.

"It is the key to the Northwest in case of an invasion. I hope there is no real danger in this Jap scare, but I honestly believe that in case of a Japanese invasion the point of attack would be on Grays Harbor, and I can see nothing to prevent a successful invasion. Let me tell you something I have seen myself.

"A few months ago a friend and I were coming up the south road from Aberdeen. We noticed a bypath leading up a hill and thought we would see where it led to. When we came above a little spring we suddenly ran onto two Japanese men—apparently educated men, though they pretended to be not able to talk English to us. As we came up we saw them fold and hide in their clothing a big map. We couldn't see the map before they folded it, but we were sure it was a map of the Grays Harbor country, for from where they sat they had a view of the bay and valley, and as we came in sight one of them was pointing out over the bay with one hand and with the other pointing to the map.

"Other people will tell you that for a year past many Japanese men, without any apparent object in sight, have been going up and down this valley afoot.

"Grays Harbor is without anything to protect us from the entrance of war vessels, and yet of what value are the Columbia River or the Puget Sound fortifications when from here any enemy could grab all the railroads and the main-traveled wagon roads of the State. Not only the cities of this State but of neighboring States would be in danger of attack. The greatest wheat and flour stations in the West would be open to attack."

In this connection it is interesting to read from a speech by the Hon. William Jennings Bryan, now Secretary of State, delivered in Tokyo, Japan, in October, 1905:

I will promise those who hear me to-night that whenever there is a question between America and Japan I shall be a better friend of Japan than I have been in the past, if that is possible.

Mr. Bryan's remarks at the annual banquet of the American Society, in London, July 4, 1906, on The White Man's Burden are also significant, in view of the present occurrences on the west coast of the United States, as are also the statements contained in his book, published in August, 1906, and entitled Letters to a Chinese Official. Particularly his quoting the "official" as seeming depressed by the fear that foreign commerce will disturb the world's peace, and especially the lines reading:

The competition for markets bids fair to be a more fruitful cause of war than was ever in the past the ambition of princes or the bigotry of priests. The people of Europe fling themselves like hungry beasts of prey on every yet unexploited quarter of the globe. And it is precisely those trade relations which it was thought would knit you in the bonds of peace, which, by making every one of you cut-throat rivals of the other, have brought you within reasonable distance of a general war of extermination.

I submit, Mr. Chairman, that this prophecy, apparently from the mouth of a fictitious Chinese official, is being filled with remarkable fidelity to-day in Europe, and I wonder if the agitation now stirring our Western States indicates a further fulfillment of the prophecy.

The Tariff.

EXTENSION OF REMARKS
OF
HON. FRED A. BRITTEN,
OF ILLINOIS,
IN THE HOUSE OF REPRESENTATIVES,
Monday, May 5, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. BRITTEN. Mr. Chairman, I desire to present a petition containing some fifteen hundred names of members of the Cigar Makers' International Union of America residing in the city of Chicago, and this, I am informed, represents the sentiment of the cigar makers all over this country.

The petition earnestly protests against the proposition of the Committee on Ways and Means providing for absolute free trade in cigars with the Philippine Islands, and in connection with the petition I wish to say that this Democratic tariff bill not only permits cigars manufactured in the Philippine Islands to come in duty free, but it permits such cigars to contain 20 per cent foreign material. This means that a manufacturer in the Philippine Islands can put in the cigar a combination of American tobacco, Philippine tobacco, and 20 per cent of Havana tobacco, and would give the Philippine cigar manufacturers an unfair and undue advantage over the American manufacturers and be a constant detriment to American working men and women, as well as cigar manufacturers.

The importation of cigars from the Philippine Islands under the present law has steadily increased, and I hold, if Congress gives the Philippine cigars free access, without restraint or limit to the markets of this country, that the American Tobacco Co., which, despite the alleged dissolution acts, is just as effective as it ever was, would immediately establish large factories in the Philippine Islands and continue the manufacture of cigars there on a scale that would seriously interfere with the industry in this country proper. This is not an idle statement. When Porto Rico was annexed and given free access to the markets of this country the trust immediately proceeded to obtain control not only of the cigar industry, but also of the leaf or raw material of Porto Rico, so that to-day they practically control, at the very least, 80 per cent of the cigar industry of that island. In one year 1,250 cigar factories have gone out of business and thousands of American cigar makers have suffered in employment in this country. The trust, with its exceedingly large capital, will do precisely the same thing, in so far as the Philippine Islands are concerned, if this bill passes and an opportunity is thus given them to do so.

The proposition of the Committee on Ways and Means I unhesitatingly say is favorable to the trust and strengthens its hand and assists it to more quickly stamp out opposition and competition of the independents and to establish an absolute monopoly in the cigar and tobacco industry. The Tobacco Trust controls fully 85 per cent of the smoking and chewing tobacco, snuff, cigarettes, and little cigars in this country. It controls 80 per cent, if not more, of the cigar industry of Porto Rico, and it controls fully if not more than 75 per cent of the imported cigars coming from Cuba.

I earnestly protest against giving them further opportunity to strengthen their strangle hold upon the independents by giving them the Philippine Islands, which they will exploit for the benefit of the trust and to the detriment of independent manufacturers, of working men and women, of the Federal Government, and of society at large.

The notion that American workingmen can compete with the oriental—the cheapest labor in the world—of the Philippine Islands is absurd and preposterous and absolutely out of the question. The wage paid for making cigars in the Philippine Islands is less than one-fourth of the wages received by cigar makers in the United States. In the third annual report of the Bureau of Labor of the Philippine Islands, page 15, issued 1912, it officially states that wages of 11,300 cigar makers in the Philippine Islands in 53 factories were 193 pesos annually, or about $96.50 American money, or 30 cents per day, while the average wage of the cigar makers in this country is at least $1.50 a day, which included the unorganized as well as the organized. I estimate that the average wages of the union cigar makers is at least $2 per day, and, as a matter of fact, that is pretty nearly the minimum wage; and it ranges from that sum to as high as $5 per day.

The question of transportation should not be lost sight of. A thousand cigars can be shipped from the Atlantic coast to Chicago for about 10 cents, and from coast to coast for about 18 or 20 cents. A thousand cigars, the wholesale price of which would be $100, weighs about 27 pounds. The question of transportation, then, is not a factor as because of the lightness of the commodity it can be transported at a negligible cost. There are thousands of Chinese and Japs, which, with the Filipinos, are very apt learners, especially in the cigar industry, as they prefer factory to field work, and the cigar-producing capacity of the islands can be recruited and brought up to any number in a very short time, and this I assert without fear of successful contradiction will surely occur if you give them free access to this country. It is claimed that one-third of the population of Manila is Chinese. If the product of this oriental cheap labor comes into this country the result will be ruinous to the industry here, and would in a measure impair and partly nullify the Chinese-exclusion act. The cigar industry in this country pays the Federal Government in internal taxes alone about $22,000,000 annually, and when I include the tobacco trade, which includes cigars, cigarettes, snuff, and manufactured tobacco, it contributed for the fiscal year ending June 30, 1912, $70,500,000. There are employed at cigar making, not counting those engaged in making smoking and chewing tobacco, and so forth, about 136,000 people, of whom about 110,000 are skilled workers and wage earners, who are directly and indirectly taxpayers and contributors to the maintenance of our Government, while, on the other hand, the Filipinos do not contribute a cent to the maintenance of our institutions. The aggregate wages paid to cigar makers is $50,000,000 annually. The wholesale value of the output of cigars is about $350,000,000 annually. It ranks about twelfth in the value of its output among the great industries of our country. The cigar and tobacco industry has always been taxed through custom duties and internal-revenue tax. It as a consequence is extremely sensitive to hostile legislation. During the last fiscal year over 1,250 small cigar manufacturers have been forced out of business. The union cigar maker receives from $7 to $12 per thousand for making the 5-cent cigar and from $12 to $18 per thousand for making the 10-cent cigar and from $18 to $50 per thousand for making the clear Havana cigars or the two for a quarter and more expensive kinds.

Under the present law, which limits the importation of cigars from the Philippine Islands duty free to 150,000,000 annually, the importation jumped from 22,900,000 in 1911 to 72,800,000 cigars in 1912.

From information received from the Insular Bureau of the War Department I find for the first eight months of this fiscal year 63,000,000 cigars were sent here from the Philippine Islands.

Under the economic conditions prevailing here the allowance of 150,000,000 duty free per annum is more than fair to the Filipinos. Given an unrestricted free market in this country the Cigar and Tobacco Trust will be enabled to increase the amount produced there and sent here and disposed of through its chain of stores to an extent that will be disastrous to American manufacturers and American working men and women. Owing to climate and bounties of nature, the Filipino lives very cheaply. Clothing is of the cheapest kind; he has no expensive rent to pay, no fuel to purchase, while he has self-sustaining food growing in abundance. We, on the other hand, must buy food, fuel, pay high rent, buy more expensive clothing, and with the always increasing cost of living we find the effort to sustain home, family, and life always equal to our income.

I earnestly protest against pitting the cheapest oriental labor in the world against the men and women of this great free country and respectfully offer this amendment and ask its passage:

Amend page 196, line 11, after the word "duty," and insert the following: "Except in any fiscal year, cigars in excess of 75,000,000, which quantity shall be ascertained by the Secretary of the Treasury under such rules and regulations as he shall prescribe."

The Tariff.

EXTENSION OF REMARKS
OF
HON. AUGUSTUS P. GARDNER,
OF MASSACHUSETTS,
IN THE HOUSE OF REPRESENTATIVES,

Thursday, April 24, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. GARDNER. Mr. Chairman, under general leave to print, I submit the following comparative table showing the tariff on articles entering into the manufacture of shoes:

	Payne Tariff Act.	Proposed Underwood bill.
	Per cent.	
Braids	60	50 per cent.
Cotton galloons	60	60 per cent.
Cotton goring	60	50 per cent.
Silk goring	60	50 per cent.
Nippers, pliers, etc	60	30 per cent.
Cotton webbings	60	25 per cent.
Buttons	57½	40 per cent.
Cotton lasings	52½	25 per cent.
Dextrine	50	¼ cent per pound.
Needles	47	25 per cent.
Hooks and eyelets	45	15 per cent.
Shoe machinery	45	Free.
Studs and rivets	45	20 per cent.
Tissue paper	41	30 per cent.
Brushes	40	35 per cent.
Wire (iron or steel)	40	20 per cent.
Gold leaf	39	35 per cent.
Oxalic acid	39	39 per cent.
Linen thread	38	25 to 30 per cent.
Cardboard for cartons	25	25 per cent.
Gelatin	35	10 to 25 per cent.
Plaster of Paris	35	25 per cent.
Cotton thread	34	5 to 25 per cent.
Cotton-lining cloth	31½	25 per cent.
Coal-tar dyes	30	30 per cent.
Glue	30	10 to 25 per cent.
Box shooks	30	15 per cent.
Silk thread	25	15 per cent.
Sal soda	23½	¼ cent per pound.
Sponges	20	10 to 15 per cent.
Chamois skins	20	15 per cent.
Wood alcohol	20	Free.
Last blocks	20	15 per cent.
Borax	18½	Crude, free; refined, ¼ cent per pound.
Cod-liver oil	17	Free.
Castile soap	15½	10 per cent.
Coal (bituminous)	15	Free.
Nails (iron or steel)	13½	Do.
Hobnails	10	Do.
Rough lumber	7	Do.
Tacks (small, iron or steel)	4	Do.
All leathers for boots and shoes	5 to 25	Do.

The Tariff.

EXTENSION OF REMARKS
OF
HON. L. C. DYER,
OF MISSOURI,
IN THE HOUSE OF REPRESENTATIVES,

Monday, May 5, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. DYER. Mr. Speaker, as a further protest against this tariff bill, I call attention to the following letters:

ST. LOUIS, *April 30, 1913.*

Hon. L. C. DYER,
House of Representatives, Washington, D. C.

DEAR SIR: Under the new tariff bill now being considered for revision we find Schedule G, item No. 203, reads as follows:

"Biscuits, wafers, etc., combined with chocolates, nuts, fruit, or confectionery of any kind, and without regard to the component material of chief value, 25 per cent ad valorem."

Item No. 430 reads as follows:

"Biscuits, cakes, etc., not especially provided for in this section, will be admitted free of duty."

This practically means that Schedule G, item No. 203, will result in a decrease in the duty of more than 25 per cent. Item No. 430 will involve a decrease in duty of over 20 per cent.

Owing to the fact that the foreign manufacturers can manufacture their goods cheaper than the American manufacturers probably can, due to the difference in the wage schedules, the American manufacturers would be placed in competition with the foreign manufacturers, which competition would place the biscuit manufacturers of this country at a decided disadvantage.

For your information, we beg to respectfully state that the most skilled bakers in foreign countries do not receive on an average over $7.50 per week as against $18 and $20 paid in this country for the same labor. A great many bakers are working at an average of $5 to $6 per week as against $12 to $16. We beg to most respectfully call your attention further to the fact that the import value of foreign biscuits is very small as compared with the amount of goods manufactured in this country, which averages annually upward of $100,000,000.

We understand that the new schedule of tariffs is to be debated in Congress this week. In behalf of the biscuit interests of this country we wish to enter our protest against any change in the present tariff, so far as pertaining to bakery products.

We believe that the property interests and welfare of the American manufacturers of bakery products should be carefully considered, and we feel that when this is done the amount of good which may possibly come from any reduction in the tariff will be offset by the damage which will be inflicted upon the bakery interests of this country as well as the thousands of employees who look to these interests for their livelihood.

Your assistance to defeat the proposed revision, so far as it pertains to Schedule G, items Nos. 203 and 430, is respectfully requested.

Thanking you for your favorable consideration of our welfare in this matter, we remain,

Yours, very truly,

LOOSE-WILES BISCUIT CO.
W. W. SCHIEK.

INSULAR GOVERNMENT OF PORTO RICO,
BUREAU OF INFORMATION
AND EXHIBIT OF GUARANTEED PRODUCTS,
New York, April 28, 1913.

Hon. L. C. DYER,
1531 Park Road, Washington, D. C.

SIR: I am sending you under separate cover two pamphlets descriptive of Porto Rico.

Please note from the extracts of the report of Hon. George R. Colton, governor of Porto Rico, that during the year 1912 the total exports from Porto Rico amounted to $49,705,000, of which amount $31,544,000 represented sugar. Reduced to a percentage basis this means that over 63 per cent of Porto Rico industry is in sugar, and as the Island's prosperity so largely depends on the profitable production of this commodity it should have the fullest protection that can be consistently accorded it by the United States. Under present conditions Porto Rico purchases annually $40,000,000 worth of manufactured goods in the American market, and this purchasing power depends principally upon the prosperous condition of those directly and indirectly dependent upon the sugar industry.

A limited quantity of the finest coffee is grown in Porto Rico, which has not been commercially known in the United States, the whole crop being purchased by Cubans and Europeans, by whom it is highly prized. So that you may know of the delicious quality of this coffee, I am sending you a sample under separate cover.

I will take pleasure in furnishing you with any further information regarding Porto Rico that you may require.

Sincerely, yours,

MORTIMER REMINGTON,
Commercial Agent of Porto Rico.

ST. LOUIS, U. S. A., *April 28, 1913.*

Hon. L. C. DYER,
Representative Twelfth District Missouri, Washington, D. C.

MY DEAR MR. DYER: I have your valued favor of the 12th, inclosing copy of new tariff bill, for which kindly accept my thanks.

In regard to the articles in which we are interested, will say that the fact that wool is being put on the free list will, of course, be very detrimental to the wool growers, dealers, and manufacturers of this country; and we should like to enter a protest on the reduction of the duty on manufactured goods as well as on raw wool, as it is going to be very hard for the mills to run at all against the lower cost of production in Europe. I believe, however, that the trade in general is of the opinion that the Democrats on the Ways and Means Committee have made up their minds to railroad the bill through, and they consider efforts made against a reduction in tariff as futile.

In regard to the tariff on raw furs, will say that the 10 per cent added on raw furs in this bill we approve of, because we believe that in the long run it will cause a bigger consumption of American furs at home and also make American markets more important. It will, however, cause some inconvenience in handling the many thousands of shipments that we receive from Canada in the course of a fur season, but we shall have to overcome this in some way.

We hope that you can do something toward getting the wool tariff adjusted; the fur tariff suits us under the circumstances, and we believe in most parts of America the fur trade in general is well pleased with it.

Thanking you for your kindly interest in this matter, we are,

Very truly, yours,

FUNSTEN BROS. & CO.,
P. B. FOUKE, *President.*

ST. LOUIS, MO., *April 28, 1913.*

Hon. L. C. DYER,
United States House of Representatives, Washington, D. C.

DEAR SIR: We are greatly surprised to learn that the duty on ferromanganese is to be raised by the new tariff measure from the specific duty of $2.50 a ton to 15 per cent ad valorem—virtually an increase of 200 per cent in the duty.

According to the best information obtainable, the only smelters or producers of ferromanganese in this country are the United States Steel Corporation, and we see no reason at all why the duty on ferromanganese should be raised, as it is certainly not a luxury and is an absolutely necessary ingredient of manganese steel, which is required principally by the railroad companies for improving the safety of their trackways.

We would greatly appreciate any efforts you might make in permitting the duty on ferromanganese to at least remain at $2.50 a ton.

Very truly,

ST. LOUIS STEEL FOUNDRY,
GEO. F. STEEDMAN, *President.*

RANDOLPH SALES CO., MANUFACTURERS' AGENTS,
St. Louis, Mo., May 1, 1913.

Mr. L. C. DYER,
Congressman, Washington, D. C.

DEAR SIR: I wish to bring to your attention a certain part of the new tariff bill which will seriously affect a new industry in this country—an industry less than one year old in the United States.

As you probably know, the English manufacturers of high-class steel casement sash have for many years enjoyed a monopoly of such business in the United States. About one year ago the Crittall Casement Co. was organized, with factory and offices in Detroit, and have furnished lively competition for these English manufacturers.

Schedule C, paragraph 108, provides that metal sashes shall be classed with and assessed at the same rate as steel bars and other steel but slightly advanced in the process of manufacture. The duty on this article at the present time being 45 per cent ad valorem.

It is evident that this paragraph is intended to cover the usual run of unfabricated or fabricated building materials as manufactured from unfinished steel as it leaves the rolls. Steel factory sash for industrial purposes, now being manufactured in large quantities in this country, comes in this class. The steel for this sash is rolled in the United States and the labor cost of assembling is very low, due to the unfinished nature of the product.

On the other hand, the product to which I refer is used in an entirely different and higher class of building, requires much skilled labor, a high finish, welded corners, and a rolled steel that must be imported under the same duty rate. The Crittall Casement Co. have tried to get this steel rolled in the United States, but the mills here have been unwilling to undertake it on account of the difficulty of rolling to the required accuracy.

Steel casement sash are being used by wealthy men of this country building expensive homes and memorial buildings.

If the Crittall Casement Co. is classed as in the present bill, it will throw them into unequal competition with the English product, which has been imported for years in large quantities, with no United States competition until within the last year. My main objection is that a highly finished article, requiring much skilled labor, is classed with a raw steel but slightly advanced in process of manufacture.

I know that you are beseiged with this sort of correspondence, and shall appreciate any effort you may make to change the classification of this particular article.

Respectfully,

N. B. RANDOLPH,
4252 Westminster Place, St. Louis, Mo.

The Tariff—Textiles.

SPEECH
OF
HON. AMBROSE KENNEDY,
OF RHODE ISLAND,
IN THE HOUSE OF REPRESENTATIVES,

Saturday, May 3, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. KENNEDY of Rhode Island. Mr. Chairman, I desire to present for the RECORD the following communications received by me relative to the cotton and the woolen schedules in the proposed tariff measure, together with an article taken from the New Bedford (Mass.) Standard of April 18, 1913, setting forth the effect of the proposed Underwood tariff upon the plant owned and operated by Joseph Benn & Sons (Inc.), at Greystone, R. I., and also a sworn statement of certain employees of said company which recently appeared in the Philadelphia (Pa.) Inquirer.

The communications above referred to are from persons directly connected with the textile business, some of whom are engaged in manufacturing in my district, and all of whom are so engaged in the State of Rhode Island:

HOPE CO., *Phenix, R. I., May 2, 1913.*

Hon. AMBROSE KENNEDY, M. C.,
Washington, D. C.

DEAR SIR: It is my impression that the tariff bill, as now drawn, called the Underwood bill, will do a great injustice to the cotton manufacturers or the cotton industries throughout the United States, and we feel that the local conditions seem to indicate at this early period a very unsettled state.

Lower prices are being offered for the goods that are being placed on the market, and there seems to be no future market of any degree of strength or permanency.

We are not adverse to a rational adjustment of the tariff to a lower basis, but we strenuously object to a measure for the reduction of the tariff, which this bill seems to be the extreme limit.

Yours, truly,

HENRY R. BROWN,
Superintendent.

PROVIDENCE, R. I., *April 30, 1913.*

Hon. AMBROSE KENNEDY,
House of Representatives, Washington, D. C.

DEAR SIR: We wish to voice our protest vigorously against the proposed tariff changes in cotton and woolens.

Anticipation of the enactment of the proposed law has already affected our business, and not only in our opinion but among the many mills with whom our business brings us in close touch there is a feeling of absolute certainty that the enactment of such tariff legislation as the Underwood bill will prove most disastrous to the textile industry of the country.

Very truly, yours,

PROVIDENCE MILL SUPPLY CO.,
W. C. MURPHY, *Treasurer.*

PAWTUCKET, R. I., *April 30, 1913.*

Hon. AMBROSE KENNEDY, *Washington, D. C.*

DEAR SIR: As manufacturers of textile machinery involving flat carding engines and picking, we desire to enter a vigorous protest against the reduction in the tariff on textile machinery as outlined in the proposed Underwood bill now before the House. Any material reduction will force us to discontinue the manufacture of textile machinery as part of our product. We have wired you this day as follows:

"If Underwood bill in its present form on cotton goods and textile machinery becomes a law, our textile-machinery plant will be moved abroad."

The above is just what we mean, and should the Underwood bill go through as formulated, our textile-machinery plant will be moved abroad; and we have already taken steps toward this end in anticipation of the passage of this bill.

Yours, very truly,

POTTER & JOHNSTON MACHINE CO.,
JAMES C. POTTER, *President.*

PAWTUCKET, R. I., *April 30, 1913.*

Congressman AMBROSE KENNEDY,
House of Representatives, Washington, D. C.

DEAR SIR: Inclosed please find confirmation of telegram just sent you. We have been looking very carefully as to the effects the Underwood bill will have, not only in our own business but with cotton manufacturers as well, and we believe that if the Underwood bill becomes a law there will be nothing left to do but to shut down or pay labor same wages as are paid in foreign countries that we shall have to compete with.

We sincerely hope that this bill will be revised so we will have at least competitive production and so that labor will not have to be cut to the point where they can not live.

Anything that you can do to stop the passage of this bill will be appreciated not only by the employers of labor but by the employees as well.

Yours, very truly,

JENCKES SPINNING CO.,
F. L. JENCKES, *Treasurer.*

PROVIDENCE, R. I., *April 30, 1913.*

Hon. AMBROSE KENNEDY, M. C.,
Washington, D. C.

DEAR SIR: We confirm our telegram sent you to-day reading as follows:

"Being vitally interested in the success of the cotton and woolen textile industries, we emphatically protest against the tariff schedule proposed in the Underwood bill, and beg you to use your strongest efforts toward a modification of its conditions affecting those industries. Letter follows."

As members, through our officials, of both the American Cotton Manufacturers' Association and the National Association of Cotton Manufacturers, and our industry being dependent almost wholly upon the prosperity of the cotton and woolen textile business, we urge you to use your best endeavors toward a modification of the duties which are proposed in the so-called Underwood bill affecting those industries, which is now before Congress for legislation. A curtailment in the business of the textile industry of this country will not only affect many of our workmen but also the stockholders of this company, of whom there are several hundred.

At the convention of the American Cotton Manufacturers' Association, which was held in Washington on April 8, 9, and 10, the first day's proceedings were largely taken up by consideration of the cotton schedule affecting the import of cotton goods. The result of the association's consideration of the matter was the passing of a protest, a copy of which is attached. This protest was presented in person by the president and secretary of the association to the Hon. A. MITCHELL PALMER, leader of the Democratic caucus, on Tuesday evening, April 8.

The American Cotton Manufacturers' Association is made up very largely of the cotton-mill men of the South, and we think it can be truthfully stated that the success and prosperity of that section of our country to-day has been brought about largely through its cotton-mill manufacturing. The protest presents the matter so forcibly that

there seems to be nothing further to add, and we beg that you will take such action as will not only protect the industries to which we especially call your attention, but also to one of your own home industries, which this company represents.

Yours, very truly,

U. S. BOBBIN & SHUTTLE CO.,
WM. H. PERRY, *President.*

—

COPY OF PROTEST.

Hon. A. MITCHELL PALMER,
Chairman Democratic Caucus, House of Representatives,
Washington, D. C.

DEAR SIR: At the annual meeting of the American Cotton Manufacturers' Association held this day a committee was appointed to present to the Democratic Members of the House of Representatives a protest on behalf of the cotton manufacturers of the United States against the rates proposed in the bill known as H. R. 10, introduced on April 7, 1913, by Hon. O. W. UNDERWOOD and referred to the Committee on Ways and Means.

This association begs to present to your body a resolution adopted by it at its meeting held in April, 1912, which resolution reads as follows:

"That this association records itself as favoring such reasonable revision of the cotton schedule, based upon differences in cost of production and other conditions at home and abroad, as shall be consistent with the raising of revenue and the conservation of our home markets."

At a subsequent meeting of the tariff committee appointed by this association the following resolution was also adopted:

"We favor the reasonable revision of the cotton schedule based upon figures at which importations are actually being made and can be made, as shown by the comparative manufacturers' selling price at home and abroad, as shall be consistent with the raising of revenue and conservation of our home markets."

Acting upon this resolution, the tariff committee, at public hearings before the Ways and Means Committee, presented from time to time statements in which this association, with frankness and at length, gave information with regard to conditions affecting the industry and suggested such reductions as in the judgment of the association could be consistently made without injury to the domestic industry of cotton manufacturing and at the same time in consistency with the policy of reasonable downward revision and tariff for revenue.

We recognize the propriety of there being adopted at this time such provision in the tariff as would bring domestic and foreign manufacturers into competitive relation.

To the best of our belief the schedules suggested by this association to the Ways and Means Committee contained the lowest rates which could be in reason adopted without danger of injury to the industry of cotton manufacturing in this country.

We recognize, of course, that any suggestions made by ourselves are necessarily addressed to the discretion of the honorable committee charged with the consideration of the subject, and we can only say that we have with perfect frankness presented to the committee all information bearing upon the subject which could be obtained by us. We have not asked the committee to accept our unconfirmed statements upon these subjects, but we have in every instance referred the committee to the findings of the Tariff Board, confirming and proving the correctness of the statements made by ourselves to the committee. In addition, we supplied the committee with other authoritative data, fully confirming the statements of the representatives of the association.

It is, therefore, with the greatest regret and consternation that we have seen the publication of rates on cotton products recommended by the Ways and Means Committee.

In all sincerity we state to your honorable body that if the rates thus suggested are made effective we believe the injury to our industry will be unparalleled.

We earnestly enter a protest against the suggested rates, and state with positive conviction on our part that the effect of these rates will be to transfer a far larger proportion of cotton manufacturing from the United States to foreign fields, where cheaper labor and other favorable conditions obtain, than the Ways and Means Committee can have any conception of.

In an absolute conviction of the truth of our statements we appeal to your body not to make reduction in the rates as drastic as presented in the bill referred to, and would conclude with the statement that if the bill becomes enacted into law a condition of depression will follow in the industry of cotton manufacturing which will, in our judgment, be appalling. Cotton manufacturing is an industry confined not to one community but distributed throughout a large portion of our country, in portions of which it is the chief industry. It is an industry in which hundreds of thousands of employees are engaged, in which there are many plants with many thousands of stockholders.

There is absolutely an untrammeled competition between manufacturing plants in the cotton industry, so that there is no condition presented of a monopolistic industry whose control needs in any sense to be broken.

In these views we respectfully present our earnest request that further consideration be given to the cotton schedule in the bill referred to.

Very respectfully,

AMERICAN COTTON MANUFACTURERS' ASSOCIATION.
W. A. ERWIN, *President.*
C. B. BRYANT, *Secretary.*

—

PROVIDENCE, R. I., *May 1, 1913.*

Hon. AMBROSE KENNEDY, M. C.,
Washington, D. C.

DEAR SIR: Confirming our telegram of even date, proposed reduction in tariff on sewing thread and cotton yarns will, in our opinion, prove disastrous to manufacturers in these lines.

We respectfully request your efforts to prevent passing of schedule on present basis.

Very truly, yours,

THE ELIZABETH MILL,
WM. G. JAMES, *Treasurer,*

WOONSOCKET, R. I., *May 1, 1913.*

Hon. AMBROSE KENNEDY,
House of Representatives, Washington, D. C.:

Tariff proposed on yarns, sixties to hundreds, totally inadequate to allow of mills coming out even. Mercerized and bleached yarns, involving substantially increased labor costs, placed on same basis as common gray yarns, actual discrimination in comparison with mercerized cloth scheduled to carry additional 2½ per cent. Increased value of cloth is in yarns rather than in weave.

NYANZA MILLS,
E. F. WILLEY, *Agent.*

CAN IMPORT CHEAPER—GREYSTONE PLANT WILL CLOSE MILLS—NOTICE POSTED TO THAT EFFECT IF COTTON TARIFF BILL GOES INTO EFFECT—CAN MAKE GOODS CHEAPER IN ENGLAND.

PROVIDENCE, *April 18, 1913.*

The Greystone mills of Joseph Benn & Sons (Inc.) will not be operated after the Underwood Tariff Act becomes a law except upon orders that are received from customers. This was determined after Harrison Benn, principal stockholder in the company, had figured out the cost of making goods in each of the mills that his company owns and had found that he could land English-made goods in New York for about 12 per cent less than he could from the Greystone plant.

Machinery is being stopped gradually in the plant, and about 400 of the employees are already out of work, it is said. The goods that they have stopped making here, they say, they are making in England, orders to that effect having been sent yesterday afternoon. The employees at the Greystone plant were first apprised of the coming shutdown by a notice posted in the mills Wednesday, signed by the Joseph Benn & Sons (Inc.) and by Harrison Benn.

The notice reads as follows:

"The provisions of the new Wilson tariff bill make it absolutely impossible for us to successfully compete with imported goods. Therefore a stoppage of machinery will take place immediately."

Mr. Benn says that the mills will not be closed at once, but that there will be lay offs of a few employees at a time at intermittent periods.

Harrison Benn, in commenting upon the notice, said: "There is nothing strange in it, nor is there anything that a person can not understand. Our business here is different from that of other manufacturers in this country in that we have two plants, one here in Greystone and the other in Bradford, England.

"We make the same kind of goods in each mill, from the same kind of stock, and for that reason, when we find that we can manufacture a style cheaper in one mill than we can in the other, we transfer the order to that mill. In the present case I have asked the Congressmen from this State to try and have an adequate protective duty placed upon mohair and alpaca goods, that we may be able to operate both of our plants.

"This seems to be something that they either can not or will not do, and for that reason I find that under the proposed Underwood Tariff Act I can make goods in Bradford and land them in New York at about 4 cents a yard cheaper than I can make them in Greystone and ship them to New York. On 13 numbers or styles I find that we can save from 10.6 per cent to 14.6 per cent a yard by making the goods in the Bradford plant and shipping them to New York. For that reason I have ordered all work that is being done for 'stock' stopped in this plant, and am sending a cable to the Bradford plant to start 500 pieces of goods to take the place of the goods that we have stopped making here.

"Our prices on yarns and tops are about the same, also. To understand that there is no difference between the two plants, I will tell you that some of the machinery here was used in the other mill and that we cut down the production of that mill by shipping the machinery here. Another thing that is not understood is the difference in the price we pay our operatives for the same kind of work.

"In the Bradford plant we pay a weaver 48 cents for weaving a cut of cloth, and for the same thing here we pay $1.49; for goods that cost us 75 cents there we pay $2.41 here; and for goods that cost 98 cents there we pay $3.01 here. In the spinning room the prices range from $2.23 to $2.88 per week there, and here, for the same kind of work on the same machines, we pay from $5.35 to $7.50 per week. Another difference is in the pay which we have to give our apprentices. They are obliged to serve 4 years, and in the Bradford plant they receive for those 4 years $1.92, $2.40, $2.88, and $3.36 per week. In the Greystone plant they receive for the 4 years $6.50, $7.50, $9, and $10.50."

STATEMENT OF WORKERS.

This is to certify that the undersigned wish to jointly testify to the following statements:

We have each and all worked for the firm of Joseph Benn & Sons (Ltd.), in Bradford, England, and now work for Joseph Benn & Sons (Inc.), Greystone, R. I., and also live in the same locality.

Regarding our work, we wish to state that we hold exactly the same positions we held in England, with the exception that in England we worked 55½ hours per week, whereas in the United States of America we work 56 hours per week. In all other respects our work is just the same. We make the same class of goods, with the same machinery, using the same speed, no faster.

We should now like to state our present rate of wages and living as compared to our English wages and living:

	English wages per week.	United States wages per week.
Sorter	$7.79	$16.50
Mechanic	7.30	15.00
Section spinning hand	8.03	16.00
Section weaving hand	8.76	16.00
Weavers	3.41	$11 to $12

English rent, 5s. 6d. ($1.34) per week for four rooms, without bath or toilet; United States of America rents, $2.50 per week for eight rooms, with hot water, bath, and toilet.

LIVE MUCH BETTER.

Now, regarding cost of living, this is best explained by stating that if we were content to live here as we did in England—that is, using only the same articles of food and purchasing of exactly the same qualities—we could live just as cheaply, but having double or more wages we find we are able to live a good deal better and have much more comfortable homes. With regard to clothing we find that there is very little difference. Climatic conditions here compel us to wear somewhat different clothing, but our wages are so much higher that we do not feel the difference. Last but not least, we are left with a surplus at the end of the week which is far in excess of what we had in England, which enables us to feel so much better off.

As stated in my letter, we are prepared to testify before any responsible body personally any details not included here regarding these questions. We remain,

Yours, respectfully,

MART SMITH, *Weaver.*
LENA BARKER, *Weaver.*
FOSTER BARKER, *Section Hand Weaving.*
WILLIAM THORNTON, *Mechanic.*
FRANK SWAINE, *Section Hand Spinning.*
AQUILLA JAFFER, *Wool Sorter.*

At Greystone, R. I., April 29, 1912, personally appeared before me the above named and made oath that the above statement is true.

HERBERT A. TENNER, *Notary Public.*

Upon this point we have also some official data supplied by a department of English Government in the report of British Board of Trade of its investigation into the wages and cost of living in the United States compared with the wages and cost of living in Britain. From this report it appears that in the trades covered by the examination (textiles not separately mentioned) the wages in the United States run from two and three-tenths to two and four-tenths as much as in England, while the cost of living was only from one-half to three-fourths higher in the United States than in England. Remember this is English testimony and from an official source.

The Tariff.

EXTENSION OF REMARKS
OF
HON. SIMEON D. FESS,
OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. FESS. Mr. Speaker, I arise to state that I am in favor of the principle of an income tax. While I admit there are some objectionable features in such a system of taxation, these features have never seemed to me to overbalance the argument in favor of the principle. As an officer of the Ohio constitutional convention last year when the taxation amendment including the principle of the income tax was brought to a total defeat by the friends of the uniform-rate idea, I was the member whose vote was changed in order to move a reconsideration, which was forced after hours of continuous parliamentary struggle, the result of which is the present income tax in the Ohio constitution. I regret that my vote in this body must be cast against this feature. But the authors of this omnibus bill leave no option. They demand that you vote for the entire bill or against it. A vote for the income tax here therefore means an abandonment of the protective system and its supersession by the "revenue-only" system. In other words, it means that I must join in the attack upon the integrity of American enterprise on behalf of and for the sake of foreign capital and foreign labor, as against our own capital and our own labor. That I will not do.

The time was, not only on the platform but in this House, a man who proved himself constructive, a builder of enterprise, was regarded patriotic. In those days an advocate of American enterprise as contradistinguished from foreign enterprise was heard with interest and even enthusiasm. But those days have passed, we are told. It is no longer the fashion of our people to defend the promoters of the home market. No longer are we permitted to enhance or encourage the building up of American industry. There is not a city worthy the name that does not through its business associations extend warm welcome to capital to invest in its midst, that a better business situation might be established. There is not a progressive country in the world that is not devoting much of its constructive energy to the promotion of home enterprise. Germany is one of the signal examples.

In our own Nation we once thought well enough of the business activities to create a Department of Commerce and Labor and dignified it with a Cabinet rank. The Republican idea held these two factors—capital and labor—inseparable. Its legislation proceeded upon the theory that capital could not exist in enmity with labor, and vice versa. The Republican policy looked to production in order to insure consumption. This policy aimed to unify the interests of the producer and the consumer, the investment of capital and the employment of labor. The object of the Department of Commerce was to stimulate enterprise; not to stifle it.

The policy of the Democratic tariff bill is to reverse this system, and while I would like to vote for an income tax, I will not do it when attached to such a bill as this free-trade propaganda.

There is scarcely an item of this proposed legislation that does not affect some industry of my State. I have daily appeals to offer opposition to this studied effort to enhance foreign business at the expense of home industry. I am appending for the RECORD some of these letters:

CLEVELAND, OHIO, *April 16, 1913.*

Hon. SIMEON D. FESS, *Washington, D. C.*

DEAR SIR: Knowing that the State of Ohio, which you so ably represent, is vitally interested, on account of the large number of people employed here in the knitted wearing apparel industry, embracing the manufacture of sweater coats, shawls, caps, gloves, mittens, etc., we take the liberty of addressing you on the subject of the pending revision of the tariff laws.

The rate of 35 per cent, as proposed in the Underwood bill, will not afford sufficient protection to offset the difference between the cost of production in this country and Germany, excepting on such low grades of goods on which the proportion of labor cost may be a small part of the entire mill cost. We fear that this will result in injury to us and our employees, and that in consequence we may be forced to cease manufacturing these goods entirely.

In order that this industry may be enabled to continue to exist it must have sufficient rate of protection to at least put it on a competitive basis with the foreign manufacturer. It is probably unnecessary to bring to your attention the fact that our costs for direct labor range from 150 to 300 per cent higher than the foreign manufacturers'

in similar lines, and that our overhead charges, such as rent, insurance, light, and power, are proportionately higher.

You can find detailed cost accounts of our products in part 4, section 2, in the report of the Tariff Board on Schedule K. The expert accountants of the Tariff Board investigated the costs of manufacturing fancy knit goods, in various mills throughout the United States, and their reports will substantiate our statements.

These figures prove that to cover the additional cost of our conversion over foreign goods, rates will be required varying from 22 to 43 per cent above those imposed on the woolen yarn, which is our raw material, and the total of which is equivalent to rates varying from 37 to 60 per cent ad valorem, if based on free wool, not taking into consideration any margin for profit. These rates will apply to machine-made goods only, and articles knitted and fashioned by hand, of which there are many, will require considerably more duty.

At the recent hearings before the Ways and Means Committee on Schedule K the manufacturers of knitted wearing apparel presented a brief explaining our position in this matter. You can find this by referring to the report of the Ways and Means Committee. We want to call your attention to this brief with the hope that you will kindly read it and give our desires your consideration.

Therein we laid special stress on the request that in addition to granting our industry such a rate of duty as will permit us to compete with the foreign manufacturer that our products shall be listed under a separate paragraph from ready-made clothing, which it is at present, under paragraph 382.

We made this request because both our raw-material and our conversion cost is entirely different from that of the clothing manufacturers. We get much closer to the consumer by eliminating the several profits of the cloth jobbers and cloth-selling agencies. Our raw material is woolen yarn, which we convert into the desired fabric, and upon which we have another conversion process to manufacture this knitted fabric into sweater coats or other knitted wearing apparel, while the raw material of the clothing manufacturer is the cloth which he gets ready-made.

A great proportion of our entire mill cost is for direct labor, and we feel, therefore, that we should be entitled to a higher rate of protection than is accorded to cloths or clothing.

Hoping that you can see your way clear to giving this industry your support, which will at the same time help thousands of constituents in your State, we remain,

Respectfully, yours,

The Consolidated Knitting Co., Morris J. Wolf, Treasurer; The Bamburger-Reutthal Co., S. Reutthal, Secretary; The Cleveland Knitting Mills Co., H. K. Neuman, President; The Standard Knitting Co., C. J. Bauer, Treasurer; The Friedman-Bing-Farber Co., I. Whitelaw, Vice President; The Federal Knitting Mills Co., H. G. Goldberger, President; H. J. Rich Co.; The Green-Haas-Schwartz Co., E. E. Schwartz, Secretary; The Empire Knitting Co., Mark L. Cohn, President; The United Knit Goods Co., J. W. Deutsch, President.

—

CLEVELAND, OHIO, *April 23, 1913.*

Hon. S. D. FESS,
House of Representatives, Washington, D. C.

DEAR SIR: I am in receipt of your valued favor of the 19th and am very glad to note your interest as manifested in the contents of your valued letter. Quoting from your letter which says, "Members here argue the people commissioned such a reduction," I wish to quote an excerpt from a speech of Gov. Wilson's at Harrisburg, Pa., June 15, 1911, on the question of banking reform:

"There are well-known conditions which surround so great a task. In the first place, it can not be executed if attempted with inconsiderate haste.

"We must remember that the abuses which we seek to remedy have come into existence as incidents of the great structure of industry we have built up. This structure is the work of our own hands; our own lives are involved in it. Reckless attacks upon it, destructive assaults against it would jeopardize our own lives and disturb, it might be fatally, the very progress we seek to attain.

"It would be particularly fatal to any program to admit into our minds, as we perceive it, any spirit of revenge, any purpose to wreak our displeasure upon the person and the institutions who now represent the abuses we deprecate and seek to destroy. I do not say these things because I think there is danger of vengeful action or revolutionary haste, but merely because we ought always to recognize that it is of the very essence of constructive statesmanship that we should think and act temperately, wisely and justly, and in the spirit of those who reconstruct and amend, not in the spirit of those who destroy and seek to build from the foundations again."

Why the attitude of the Chief Executive of this country or the legislative body should be any different on tariff reform is a condition that we are at a loss to understand.

We trust that the sending of this matter may suggest a thought for a new line of action in combating this measure, and we remain,

Most respectfully, yours,

THE KEETCH KNITTING MILLS,
THE CONSOLIDATED KNITTING CO., *Proprietors,*
Per MORRIS J. WOLF.

—

CLEVELAND, *April 25, 1913.*

Hon. SIMEON D. FESS, *Washington, D. C.*

DEAR SIR: The National Cloak, Suit, and Skirt Manufacturers' Association, composed of manufacturers in the United States of women's and children's outer garments, respectfully submit the following for your thoughtful consideration in reference to the pending tariff bill:

Our business is that of making garments from what are known in trade parlance as "piece goods" or cloth in the bolt.

The present rates of duties on women's and children's outer garments were laid at a time when this industry in this country was in its infancy. The development of the industry does not now require nor has it needed for some years rates as high as those existing at present for adequate protection.

With the proposal to place wool on the free list we are not directly concerned, except in so far as it will lower the price of the cloth manufactured out of it and thus lessen the manufacturing cost of our products and consequently the ultimate cost to the consumer.

The proposed duty of 35 per cent on woolen cloths in like manner does not call for comment from us. Woolen cloth being the largest single item of raw material used in our industry, our purchases will naturally gravitate to the cheapest sources of supply, either domestic or foreign.

But it is not, in our estimation, either consistent or fair that the same rate of duty, namely, 35 per cent, be laid on the finished clothing, when it is borne in mind that there enters into finished clothing the cost of labor, and that the difference in the cost of labor in our industry here and abroad is greatly in excess of 35 per cent. Yet if this rate of duty on finished clothing is adopted, 35 per cent will be the measure of protection on the labor. We do not believe that it can be the intention of Congress to depreciate the prevailing standard of the wages, yet that will be the inevitable result if the duty on finished clothing is placed at 35 per cent.

Another feature of the proposed tariff bill to which we invite your attention is the provision that the new rates are to become effective immediately on the passing of the bill.

This provision alone is fraught with serious consequences not only to our industry but to that large class whom our industry serves, namely, the retail merchants of this country.

We are now engaged upon the production of women's and children's outer garments for the coming fall and winter. The materials entering into these garments have been purchased and contracted for on basis of the present tariff. The sale of these garments to the retail merchants is now in progress, and deliveries will be made to them during midsummer. A change of rates in the next few weeks or months will seriously affect values of materials and finished goods in the hands of manufacturers and retailers. The time consumed in designing, fashioning, and manufacturing garments necessitates commitments and contracts months in advance of actual requirements, and a sudden change of rates in the middle of the year will inflict serious loss on manufacturers and retailers alike.

It requires months of time to develop and manufacture piece goods and more time to design and fashion garments. The entire industry had reason to believe that a new tariff bill would be enacted, but the manufacturers also felt reasonably certain that Congress would investigate as to the time different schedules should go into effect, so as to occasion a minimum of loss to the industry and the people affected by it.

In common with the rest of the country, we hold the confident belief that Congress and the President of the United States desire to put the new tariff into effect with the least disturbance to and hardship on business.

We therefore respectfully urge upon your favorable consideration:

First. That the duty on finished clothing be made at least 10 per cent to 15 per cent higher than on woolen cloth.

Second. That the new rates on finished clothing shall go into effect not earlier than December 1, 1913, nor later than January 1, 1914.

Third. That the new rates on woolen cloth shall go into effect on December 1, 1913.

Fourth. That the change in the rates of raw wool shall go into effect on September 1, 1913.

—

THE SELBY SHOM CO.,
Portsmouth, Ohio, March 17, 1913.

Hon. S. D. FESS, *Yellow Spring, Ohio.*

DEAR SIR: I had the pleasure of calling on Representative UNDERWOOD, chairman of the Ways and Means Committee, last Tuesday afternoon, and discussed the shoe tariff, together with the tariff on materials, etc., which affect the manufacture of shoes. In the course of our conversation Mr. UNDERWOOD volunteered the statement that the brief presented by the National Shoe Tariff Committee was the best that had been presented on any matter during the hearing. He also praised Mr. McElwain very highly in his presentation of it.

I am taking the liberty of sending you a copy of this brief, and ask that you give it careful consideration, and, if you will I shall be pleased to have you state your position regarding the shoe tariff.

I also desire to add one point which is not brought out in the brief, except in the chart, namely, the high tariff on a great many of the articles necessary in connection with shoe manufacture, some of which can not even be obtained in this country. The difference in sole price on linen thread alone in England and in this country adds an expense to the making of men's welt shoes of more than a cent a pair. Linen thread is controlled by a trust in this country, and I also wish to call your attention to the fact that one of the controlling interests in the linen-thread trust also has a great interest in the United Shoe Machinery Co., the trust which, as you know, has the shoe manufacturers by the throat, and they in turn are protected by a 45 per cent duty.

The United Shoe Machinery Co. leases such of their machines as use iron and brass wire so that the shoe manufacturer has to buy the wire from them at a fixed price, consequently the removing of the tariff from iron and brass products will give us no relief in that particular unless the duty is also removed from shoe machinery, so that we will be able to secure machinery for using the cheap brass and iron wire.

If a reduction is made in the shoe tariff, you can see that we will not only be compelled to compete with cheap foreign labor, but also with cheaper materials, unless that duty be removed also.

If the duty is substantially reduced on shoes, as the chairman of the Ways and Means Committee indicated it would be, we must insist that you at least remove the tariff burden on materials entering into the shoes and on shoe machinery.

Very truly,

P. E. SELBY.

—

THE XENIA SHOE MANUFACTURING CO.,
Xenia, Ohio, April 8, 1913.

The Hon. S. D. FESS,
House of Representatives, Washington, D. C.

MY DEAR MR. FESS: Please pardon the liberty I am taking in sending you Schedule N, sections 450 and 451, boots and shoes, brief in support of the retention of the present import duty on boots and shoes, filed with the Committees on Ways and Means of the Sixty-second Congress and the Sixty-third Congress, by the National Boot and Shoe Manufacturers' Association, the National Shoe Wholesalers' Association, the National Shoe Retailers' Association, and the New England Shoe & Leather Association, also "An Appeal for Fairness."

I have read these reports over very carefully, and I can honestly indorse and verify every statement made in them. After you have read them over if there is any feature about these reports that you do not understand I shall be glad to give you any information that I possess on this subject.

I think you will plainly realize after reading these reports over that if we are obliged to compete with the world that we will have to have the same conditions in this country as our competitors abroad enjoy, which are lower wages, lower finished leather, and all materials that go into the making of shoes, lower overhead charges and lower rates of interest. If the American manufacturer can have all these he can compete. If we do not get these and we have the world to compete with without any protection, it will necessitate manufacturers closing their factories and revising their labor schedule, which, no doubt, would cause a great many strikes and create a great hardship both to the manufacturer and the laboring man.

You will notice in the article "An Appeal for Fairness," in the list of wearing materials, that the lowest list is boots and shoes, and it is beyond me how any sane man can expect an industry to thrive with the duty removed, especially an industry like the shoe-manufacturing business, which has the smallest duty and has no special advantage over other manufacturers of wearing material, unless they want to force the manufacturers of shoes out of business or compel them to locate their factory in a foreign country, where conditions would be much more favorable, for by taking their superintendents and foremen with them it would enable them to teach the foreign labor in a certain way our system of manufacturing shoes, and import to this country American-style shoes made with the cheap labor of Europe. And if the duty on shoes is removed, I can promise you that this will be done.

Now, what advantage is this to the American people at large—to drive our factories to foreign soil by unfair and unjust laws? If the profits in the manufacture of boots and shoes were large, there would be some excuse for this, because you could reason that the manufacturer could take less margin and still do a profitable business; but it is positively a fact, as will be shown in Schedule N, that the profits in the shoe-manufacturing business are so small now, on account of the present competition of 1,300 factories, that it is simply impossible to do business on any closer margin, therefore the reductions would have to be made in the labor. I see no other place to make it.

If the Congress of the United States should think it wise to force the American mechanic to live on the same basis, in the same style, and under the same conditions as the cheap labor of Europe, then I think the wise thing for them to do is to take the duty off shoes and they can accomplish this. But I wonder how these 200,000 workmen in shoe factories would feel if they were compelled to face these conditions?

If capital can not see a legitimate profit, they will not invest in manufacturing enterprises; and it is a mistake to make conditions so unattractive to capital that they will invest in bonds and other securities rather than buy stock in manufacturing enterprises, and you know that one of the great nation builders is the manufacturing industry.

This is plainly shown by the conditions of Ireland. The southern part of Ireland is rich in agriculture. The poorest agricultural part is the northern section; but that section is the most prosperous part of Ireland to-day—Belfast, for instance—for the reason they have large manufacturing industries and employ an army of people.

Another fair illustration is India. At one time India was quite a manufacturing center, but Europe made it possible, through her advantages, to give most of the manufacturing products of India to her own country, England, and employ her own people so they could make a livelihood and still remain in England at the sacrifice of the most of the people in India, where wages to-day are the lowest in the world.

I not only favor protection for shoes, but I favor protection for every industry. I do not favor an unreasonably high tariff, but I do favor one sufficient to offset the conditions existing in European factories, and I think you have an opportunity to make yourself famous if you will devote your intelligence to the tariff question, as the Hon. William McKinley did, which made him President of the United States, and not only made him President of the United States, but lifted our country out of the terrible depression into which it had dropped under the Wilson bill tariff; and if the writer should live to be a thousand years old he will never forget the terrible conditions of our country under the Wilson bill and the year it took to pass it, with soup houses in our large cities and petitions that were gotten out for people to sign and send to Washington urging quick action on the Wilson bill; and during all this time the country was at a standstill.

If you will pardon a personal reference, I wish to say that I am a native of Massachusetts—a great shoe center. Forty years ago, at the age of 12, I first engaged in the shoe-manufacturing business, to learn the mechanical part, going to night school to obtain an education. At the age of 21 I went West and located in Columbus, where I took charge of a cutting room. After two years, at the age of 23, I commenced to travel, and I continued for six years selling boots and shoes in the Southern States and through the West.

I then came to Xenia and established the Xenia Shoe Manufacturing Co., which was 21 years ago, so you can see that my experience covers every capacity in the shoe-manufacturing business, from the lowest position to the president of the Xenia Shoe Manufacturing Co., which position I hold at the present time.

Therefore I think that I am in a position to know something about this business, and I can safely and honestly say that it will create an untold hardship if Congress should see fit to remove this small protection that we now enjoy in this great industry—the manufacture of shoes—a staple article, and an industry in which there is no combine and never has been.

Yours, respectfully,

P. H. FLYNN.

—

CINCINNATI, OHIO, *April 5, 1913.*

Hon. S. D. FESS,
House of Representatives, Washington, D. C.

DEAR SIR: We understand that Congress will convene on the 7th of April next and that the tariff will be the principal business taken up. We are very much concerned regarding any reduction in the present tariff on pumping and air-compressing machinery, which at the present time carries a duty of 45 per cent and is under the basket or omnibus clause of Schedule C, metals and manufactures of. In the tariff bill passed by the House and the Senate last year and vetoed by the President the duty on machinery of the type manufactured by us was reduced from 45 to 25 per cent, and we are fearful that the new tariff bill proposed will carry the same reduction.

Walter Laidlaw, vice president of this company, appeared before the Ways and Means Committee on the 14th of last January, and tried to show the Ways and Means Committee by his testimony and data presented to the committee that no reduction should be made in the duty on machinery of the type above described. His testimony will be found in Tariff Schedule No. 8½, hearings before the Committee on Ways and Means, House of Representatives, on Schedule C, metals and manufactures of, January 14, 1913.

You will find by consulting this schedule that examples were presented showing that on machinery such as we manufacture the percentage of labor to shop cost is as high as 77 per cent, and the duty should in some cases be as much as 62 per cent, and this duty is only necessary to keep the wages of our workmen up to the present high standard, so that the standard of living of the American workmen will not be reduced.

We find from official Government reports and also from our own investigation that European manufacturers in our line pay at the most one-half the rate of wages that we pay to the same class of workmen in this country, and in several of the European countries much less than one-half of our wage rate. We find that the efficiency of the European workmen, particularly in Germany, is fully as high as our workmen in this country. The price of material in Europe and the price of the same kinds of material in this country are practically the same, so that the only protection we need is for the benefit of the American workmen. If the tariff is reduced, it will allow the European manufacturer to take the business in our home markets, and to protect our investment it will be necessary for us to reduce the wages of our workmen so that we can hold the business in this country.

Therefore our purpose in writing to you regarding this matter is to endeavor to enlist your support in preventing any reduction in the tariff on machinery such as we manufacture, so that the wages of our workmen will not be reduced and so that the standard of living of our American workmen will be maintained.

Thanking you in advance for your assistance in connection with this matter, we remain,

Yours, truly,

THE LAIDLAW-DUNN-GORDON CO.
WILLIAM GOODMAN, *Manager.*

—

BLANCHESTER, OHIO,
April 7, 1913.

Hon. S. D. FESS, M. C.,
Washington, D. C.

DEAR SIR: We are in receipt of information which indicates that in the forthcoming tariff bill flour will be put on the free list, while wheat will be protected.

If this policy is enacted into a law it would mean a great injury to the milling business of this country. If a duty is to be left on wheat, we presume that is to be done for the protection of the farmer. On the other hand, if flour is to come in free, then the farmers would receive no particular benefit from duty on wheat, and the millers of this country would have to remain idle and see their trade go to foreign millers.

Without entering into the merits of the duty on wheat and flour in a general way we wish to say emphatically that it seems wrong that flour should be free while wheat pays a duty. If both wheat and flour are placed on the free list, the millers will have very little about which to complain.

Yours, truly,

THE DEWEY BROS. CO.

—

SPRINGFIELD, OHIO, *April 16, 1913.*

Hon. SIMEON D. FESS,
House of Representatives, Washington, D. C.

DEAR SIR: We inclose some facts in regard to the tariff on wheat and flour, but the great question to be considered is that the farmer is going to be seriously affected.

There has been a great work started along the line of crop improvement in this country, and this is very successful; but free flour or a very low duty on flour will discourage farmers from raising wheat, as the millers of this country consume over 500,000,000 bushels per annum, and really make the market for farmers' wheat much above an export basis. This is where the great serious injury will be done.

The duty on wheat and flour should be equal and specific: if the tariff on wheat is 10 cents a bushel, then the tariff on flour should be 50 cents a barrel.

Yours, very truly,

THE ANSTED & BURK CO.,
J. W. BURK, *President.*

—

SPRINGFIELD, OHIO, *May 1, 1913.*

Hon. S. D. FESS,
House of Representatives, Washington, D. C.

DEAR MR. FESS: I have been in communication with Mr. Edward S. Kelly and Mr. Ed. O. Bowman, both of whom you know, especially Mr. Kelly, who has a large farm in your district, and Mr. Bowman has two large farms near Springfield. Of course they are mutually interested with ourselves in the welfare of the farmer, because we, as millers, need wheat and need it grown in Ohio. You know all about this, as we have had it up before.

* * * * * * *

We are in hopes something might be done yet in regard to this very unusual and very unfair tariff on foreign wheat and mill products of foreign wheat—making a tax on raw material and allowing the manu-

factured product in free, thereby reducing the price on our farmers' wheat to a basis of foreign wheats, which can be raised much cheaper than our farmers can raise it in this country.

Canada will raise more than 300,000,000 bushels this year, and at the rate they are increasing, in 10 years from now they will be raising 700,000,000 bushels; that is a little more than our crop has been at present.

The farmers of this country must have some protection from these cheap wheat lands; it is a case of self-preservation. When farm products are reduced to a very low cost the whole Nation feels it; every man, woman, and child feels it. It should not be a political question at all, but a question of self-preservation. We have always had it demonstrated when farmers are prosperous and get good prices for their products everybody is prosperous, and vice versa.

Mr. Bowman tells me he has been in Washington recently and don't see much chance for you people on the right side to do much, but we know you will do the best you can, and I hope it will have some effect.

Yours, very truly,

JOHN W. BURK.

UTICA, OHIO, *April 12, 1913.*

Hon. S. D. FESS, M. C.,
Washington, D. C.

DEAR SIR: The new tariff bill as reported is not satisfactory to the window-glass manufacturers of the United States. This industry has been having hard sledding even when amply protected under the Payne-Aldrich bill, and if rates are radically reduced as outlined in the new bill it will absolutely take from the American manufacturer all small sizes of window glass, which is a large proportion of the total.

Outside of the American Window Glass Co., who operate machines exclusively, there is a possible production in this country of 2,400 pots. Out of this number not more than 1,700 pots have been operating during the past two years, and 525 pots of this capacity are located in the State of Ohio.

The total value of the window glass produced in the United States per year is about $15,000,000. If you are interested in saving this business to the American manufacturer and workingman, and will so advise us, we will be pleased to place in your hands promptly all the facts and data necessary for your intelligent cooperation.

Yours, truly,

THE UTICA GLASS CO.,
By O. C. TEAGUE, *Secretary.*

I regret that the committee have not seen fit to modify that provision of the income-tax proposal so as to exempt the mutual life insurance companies doing business on a cooperative basis, which is similar in character to the building and loan association.

I am appending, with others, a letter from the President of the Ohio State University, Dr. W. O. Thompson.

COLUMBUS, OHIO, *May 5, 1913.*

Hon. S. D. FESS,
House of Representatives, Washington, D. C.

MY DEAR SIR: I desire briefly to call your attention to the manner in which two features of the amended tariff bill (H. R. 3321) affect the policyholders of mutual life insurance companies.

It is not our desire to avoid our just burdens of taxation, and my argument is for our policyholders, not for our stockholders.

Life insurance companies doing business on the mutual and participating plans are strictly as cooperative as are building and loan associations, mutual banks, fraternal benefit societies, mutual fire insurance companies and similar companies where the members cooperate for their mutual advantage and protection. Premium refunds (usually termed "dividends to policyholders") reduce the net cost to the policyholders in mutual and participating life insurance companies in proportion as the taxes and other burdens permit, just as in the similar cooperative companies named.

The net cost in all companies must be practically the same. Competition assures this. No profits can be paid to stockholders in stock companies which will increase the net cost by reducing the premium refunds.

It is proper to tax the profits which go to stockholders, but if I am correct in my premises, is it proper to tax the thrift and prudence of the policyholder by taxing the premium refunds?

The tariff bill specifically exempts certain cooperative companies. If the principle upon which these exemptions are made is correct, then premium refunds should not be taxed.

In fact there is greater reason why these refunds should be exempted.

Depositors in mutual banks and building and loan associations and policyholders in mutual fire insurance companies are primarily prudent and thrifty for their own sake. There is a selfish interest involved. Life insurance policyholders are primarily prudent and thrifty for the benefit of those dependent upon them, and their selfish interest is remote.

The vast majority of life insurance policyholders do not have incomes in excess of $4,000, and to the extent that their premium refunds are taxed they are indirectly taxed, even though their incomes are below the minimum.

I trust that Congress will permit premium refunds to be deducted from the incomes of life insurance companies in arriving at the net income to be taxed.

I also trust that amounts received as endowments and values on life insurance policies may be deducted from individual returns. You might as well tax principal funds, withdrawn from mutual banks and building and loan associations, and property and money inherited, as to tax such payments to policyholders.

We do not object to the proposed income tax for captions or selfish reasons, but feel it our duty to present our policyholders' interests for your consideration, as they will not appreciate the burdens placed upon them until it is too late.

Respectfully,

THE MIDLAND MUTUAL LIFE INSURANCE COMPANY,
By W. O. THOMPSON, *President.*
(President Ohio State University, Columbus, Ohio.)

XENIA, OHIO, *May 3, 1913.*

Hon. S. D. FESS, *Washington, D. C.*

DEAR DR. FESS: I respectfully protest against the passage of the income-tax bill, so far as it relates to mutual life insurance companies, and urge you as my Representative to vote against it. The objections to it in brief are these:

First. Mutual life insurance companies are not conducted for profit. They can not make a profit. They do effect savings, and these diminish the cost to me.

Second. To tax mutual life insurance is to discourage thrift. To tax alleged incomes received by them when, in fact, so much of said alleged income is never in the hands of the company, while undoubtedly a blunder reaches the proportions of gross injustice.

Third. Fraternal and beneficial associations, savings funds, and all mutual fire insurance companies are properly exempt from any income tax. To tax the income of a mutual life insurance company constitutes an indefensible discrimination against the largest and most efficient organizations in the world.

Fourth. Life insurance is already inexcusably taxed. In every State there is a tax upon premiums. When these are invested they are again taxed. Now a third tax is proposed.

Fifth. The income tax on the premiums of mutual life insurance companies is, in effect, indirect taxation, which the bill disavows.

Yours, very truly,

M. F. BARROWS.

THE COLUMBUS MUTUAL LIFE INSURANCE CO.,
Columbus, Ohio, May 5, 1913.

Hon. S. D. FESS, M. C.,
Washington, D. C.

DEAR MR. FESS: Please accept my sincere thanks and the thanks of millions of participating policyholders in the United States for your kindness in the matter of the income-tax bill.

All of the statements made in my telegram are true. We have received assurances that the bill will receive considerable modification as regards the tax on life insurance companies; but we all hope that no payments made or credited on life insurance, endowment, or annuity contracts shall be included as a part of the taxable income of any person, and that no dividends or premium refunds to policyholders, whether paid or credited, shall be included in the taxable income of any life insurance company.

I note from an insurance paper that Senator Charles Sumner, during the Civil War, when Congress contemplated taxing life insurance companies, in a speech in the Senate, used these words:

"This is contrary to all sound policy. Here you are proposing to tax those who have taxed themselves that the Nation might not have to support them. You are pulling down the pillars of the temple. You are undermining the structure."

While it is probable that the same wise course adopted by our Nation in that crisis will be followed in this instance, we ask you to help us bring it about. While it is true—absolutely true—that no company doing a participating business should be taxed, and no company that does a mixed business should be taxed on its participating business, it is also true that there is a phase of the life insurance business that should be taxed. A corporation for profit selling only stock or non-participating policies can righteously be taxed; a company writing both nonparticipating and participating policies can righteously be taxed upon its nonparticipating business. Such a tax would fall upon the stockholders and not the policyholders, and would be in keeping, in the strictest sense, with the spirit of the income-tax bill, if that bill eliminates entirely the tax on participating insurance.

Sincerely,

C. W. BRANDON, *President.*

CINCINNATI, OHIO, *May 2, 1913.*

Hon. S. D. FESS,
House of Representatives, Washington, D. C.:

Very much appreciate your considerate attention already given to interests of policyholders and company's income-tax section tariff bill. Two very important amendments further are needed to secure just treatment of policyholders. Believe bill should be amended to provide that no payments made or credited on life insurance endowment or annuity contracts shall be included as a part of the taxable income of any person; secondly, that no dividends or premium refunds to policyholders, whether paid or credited, shall be included in the taxable income of any life insurance company. Respectfully urge you to see members of House Ways and Means Committee and urge them to make these changes.

J. R. CLARK,
President Union Central Life Insurance Co.

NEW YORK LIFE INSURANCE CO.,
New York, May 1, 1913.

Hon. S. D. FESS, *Washington, D. C.*

MY DEAR SIR: From letters received I am satisfied the impression has gained currency with some Members of the Congress that the amendments made in committee to the pending income-tax bill cured certain features objectionable to life insurance companies operating on the mutual plan. May I correct this erroneous impression? The amendments made merely clarified the intended meaning; they did not meet any of our objections to the bill. In its present form the bill exempts some forms of mutual insurance. It should exempt, as did the 1894 income-tax law, all forms of mutual insurance.

With great respect,

Yours, very truly,

D. P. KINGSLEY, *President.*

(Since the income-tax edition of The Human Factor was sent to press the congressional leaders have responded to the popular demand by promising to correct in the bill as originally drawn two important discriminations against you, namely, the sections relating to the proceeds of policies payable at death and the reserves on life insurance policies. The tax, however, yet remains on refund premiums (dividends) and by implication on the cash proceeds of endowment and all other policies payable during life. This would tax your capital while every other corporation would be taxed only on net income.)

REGARDING THE PROPOSED TAXATION OF LIFE INSURANCE FUNDS IN THE INCOME-TAX SECTION OF THE TARIFF BILL NOW PENDING IN CONGRESS—PLEASE SIGN AND SEND THIS LETTER PROMPTLY TO YOUR SENATORS AND CONGRESSMEN.

Hon. S. D. FESS, M. C.,
Washington, D. C.

MY DEAR SIR: I respectfully request that you use your best efforts to have the pending income-tax bill so amended as to exempt from taxation the proceeds of all life insurance policies and all life insurance funds,

including the premium refunds, or so-called dividends, to policyholders, on the ground that such refunds are in no sense earnings or profits, but are the portions of the premiums collected for emergencies which are refunded to the policyholder if not used.

I protest against the taxation, in any form, of life insurance conducted on the mutual or participating plan as unjust discrimination and as contrary to sound public policy. I would, therefore, earnestly request your aid in removing an excessive burden from multitudes of our most provident and deserving citizens, who, by foresight and economy, are seeking to make provision for the future of those dependent upon them, and are thus relieving the Nation and State of heavy charges and responsibilities.

Very respectfully, yours,

W. S. SCARBOROUGH,
President Wilberforce University.

WILBERFORCH, OHIO, *May 1, 1913.*

I have similar petitions from C. S. Maloy, Lebanon, Ohio; A. W. Miller, Xenia, Ohio; A. O. Dill, Lebanon, Ohio; Frank Jackson, Blanchester, Ohio; Fred S. Pauley, Lebanon, Ohio; C. A. Tribbett, Westboro, Ohio.

The Income Tax.

EXTENSION OF REMARKS
OF
HON. J. M. C. SMITH,
OF MICHIGAN.

IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 8, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. J. M. C. SMITH. Mr. Speaker, the tariff bill, commonly known as the Underwood bill, has been presented to Congress and is now awaiting final vote for passage by this House.

I wish therefore, under the leave to print and extend my remarks in the RECORD, to present a communication received by me to-day from one of the agents of the Equitable Life Insurance Co. of Iowa, residing in my home town, for publication in the RECORD.

The communication is as follows:

EQUITABLE LIFE INSURANCE CO. OF IOWA,
Charlotte, Mich., May 5, 1913.

Hon. J. M. C. SMITH, *Washington, D. C.*

MY DEAR SIR: The provisions of the proposed income-tax bill having come to my attention recently I am writing to enlist your good offices in securing, if possible, some modifications of it as affecting life insurance companies.

First. The bill does not propose to deduct dividends to policyholders from the income. This I believe to be manifestly wrong. Dividends, so called, are not a profit realized upon an investment, but rather a return to the policyholder of an overcharge in premium, and are allowed for the purpose of furnishing the insurance to the insured at the absolute net cost; there is no investment principle involved. In the most of cases this refund is applied by the insured to reduce the cost for the ensuing year, the policyholder paying only the difference in the premium stated in the policy and the so-called dividend declared to him. If he uses the dividend to purchase additional insurance, or deposits it with the company under any other plan, it again goes upon the books of the company as additional income. Every company enters the premium in full, and then enters also as an off-set or deduction the dividend. This is in the way of ordinary bookkeeping and is necessary to comply with the State requirements. But if the dividend is not received at all, as in the case of it being applied to reduce the premium, it should not be counted as income; and if it is applied to purchase additional insurance it should not be counted twice, as will be the effect under the proposed bill in its present form.

Second. I am told that the committee has agreed that the proceeds of life insurance policies paid upon the death of the person insured shall not be included in the income account. To that should be added a provision to include endowment policies paid at maturity and all payments of installments or from income policies, annuity payments, and cash-surrender values. These are all alike in principle with death losses and the exceptions should cover them all.

Third. It appears that some of the mutual companies are endeavoring to get an exception made in their favor because they are mutual companies—an exception which would not include stock companies. This is unfair and unreasonable. The participating business of a stock company is just as much mutual in fact as that of a mutual company. To make the exception in their favor alone would be unjust discrimination, detrimental to the interests of policyholders of stock companies everywhere. All of our Michigan companies are on the stock plan, and while some of them do not write participating business it would be an injustice to those that do to discriminate against them in this matter. There is a long list of stock companies furnishing insurance just as good, as safe, and at as low—in some instances lower—cost than any mutual company. These stock companies are rendering just as good service to the people as the mutual companies, and there can be no good reason for any discrimination in this law between them.

Anything that you can do toward securing the modifications in the bill as outlined above will be in the interest of the insuring public everywhere.

Thanking you in advance for anything that you may do, I am, with the very best of wishes,

Very truly, yours,

MYRON HAWKINS.

I do this the more readily because I am in receipt of letters from a number of my constituents asking that the provisions of the Underwood bill levying an assessment on mutual life insurance companies be eliminated, and the above is the purport of such communications.

I might add that I am in favor of the income tax, although many of its provisions are intricate and not well understood. It seeks to levy a tax on those most able to pay. It seeks to provide revenue for the expenses of the Government by assessing those more fortunate, who have accumulated large fortunes. Because it is incorporated in the tariff bill no opportunity will be given to any Member to vote upon the income-tax bill as a separate measure. I predict that if the House were permitted to vote upon an income tax without being obliged to vote for the Underwood bill in toto there would be no substantial or formidable opposition to enacting an income tax into law. But the provisions of the tariff act are so inconsistent and of such sweeping changes in our fiscal system and tariff laws that a person who believes in protection can not support the measure.

Mr. Hawkins accompanies his communication with two concrete examples of the way the income tax would operate upon two policies specified by him. I incorporate both in my remarks for the purpose of elucidating the transaction and the effect of the law upon policyholders, which are as follows:

Equitable Life Insurance Co. of Iowa.

No. 35238.

Name, Roy S. Preston.
Address, Charlotte.
Date, March 14, 1906. Amount, $1,000. Annual premium, $32.69.
Age, 26. Kind, fifteen-payment life.

Year.	Premium.	Dividend.	Net premium.	Additions.	Amount insured.
1906	$32.69		$32.69		
1907	32.69	$3.92	28.77		
1908	32.69	4.08	28.61		
1909	32.69	4.24	28.45		
1910	32.69	4.41	28.28		
1911	32.69	4.60	28.09		
1912	32.69	4.90	27.79		
1913	32.69	5.20	26.49		
	261.52		229.17		
	229.17				
	32.35				

This proposed bill would have taxed $32.35 of premiums on Preston's policy that the company never had.

Equitable Life Insurance Co. of Iowa.

No. 35974.

Name, Clark L. Belnap.
Address, Eaton Rapids.
Date, May 31, 1906. Amount, $1,000. Annual premium, $33.38.
Age, [illegible] Kind, fifteen-payment life.

Year.	Premium.	Dividends.	Net premium.	Additions.	Amount insured.
1906	$33.38				
1907	33.38	$4.00	$12.68		
1908	33.38	4.40	13.25		
1909	33.38	4.45	13.52		
1910	33.38	4.68	33.94		
1911	33.38	4.92	14.36		
1912	33.38	5.20	15.05		
1913	33.38	5.55	16.77		
	267.04	33.20			
	33.20				
	300.24				

On the above policy the company received $267.04 in premiums, but by reason of its being a dividend-bearing policy would have to pay a tax on the dividends that were applied to increase the amount insured, thereby paying a tax on $33.20 which they never got, or paying it twice, whichever way it is figured.

It was explained upon the floor of the House that there would be no charge upon the payment of the sum covered by the policy to the beneficiaries upon the death of the insured. It was also made plain that the repayment to a person holding a policy of any sum maturing thereon, whether that repayment to the policyholder is called stock dividends, annual payment, tontine payments, overhead charges, or by whatever name these participating payments were called, would not be liable to an income tax providing that such payments were a part of the premium on amounts paid by the insured to the company; but that all profits, whether in the hands of the company or paid to the policyholder, would be subject to the terms and conditions of the income tax, thus making it plain that only the profits were to be taxed. I can make my position no plainer than to quote the statements of the chairman of the Ways and Means Committee [Mr. UNDERWOOD] when this measure was being considered, in explaining the application of the income tax to

insurance companies and insurance policies on the floor of the House in Committee of the Whole, which is as follows:

Mr. HULL. I am frank to say that in talking with some insurance men I get quite confused with their definitions of a number of these insurance terms, and I am unable to find many of these gentlemen who agree in every respect in their definition of these terms referred to. And I am slow to adopt a suggestion of terms unless a gentleman presents himself as an expert, with the knowledge of the full signification of the expression he undertakes to write into the law.

Mr. LENROOT. Mr. Chairman, I would like to be recognized in my own right.

It does not require an insurance expert to decide the question of whether a cash-surrender value of a life insurance policy should be regarded as income and taxable under this bill. The law, so far as I know, of every State regulating life insurance provides that there shall be cash surrender values of policies, and to tax as income the cash-surrender value of an insurance policy is exactly like taxing, not the income upon deposits in a bank, but taxing the deposits themselves.

Mr. MADDEN. Suppose the premium was $500 on a 10-year tontine policy and the cash surrender of that policy at the end of that 10 years was $5,000; if he paid the tax on the $500 annual premium, ought he to be compelled also to pay the tax on the surrender value of the policy? Would not that be paying the tax twice?

Mr. LENROOT. He ought not in any event to be compelled to pay a tax on the surrender value, because he is getting back his capital, his principal, that he has paid into the company, and he is not getting gains, profits, or income, but merely getting his money back.

Mr. UNDERWOOD. Mr. Chairman, I only rise to state what the committee's position is in this matter. As the bill now stands, there is no tax levied on the principal that is paid into an insurance company. There is a tax on the net income. The way we look at the proposition is this: Under the present law the net incomes of these corporations, whether they be insurance companies or not, are taxed 1 per cent. Under the clause of this bill the net incomes of these corporations, whether they are insurance companies or not, will be taxed 1 per cent. Now, there will be no tax whatever on the policy when it is paid on its termination, whether it expires on the death of a person or whether it is a tontine policy and expires before the death of the insured. But in the meantime there is a tax of 1 per cent on the net profits of the corporation, just as they are paid to-day under existing law.

Mr. MADDEN. Does this bill provide for the payment of the tax on the annual premiums paid by the policyholder?

Mr. UNDERWOOD. If they are net profits. I am not going into the question of what they are. We are going to leave that for the Treasury Department and the courts to determine.

If they are net profits on the net profits, or so much of them as are net profits, the tax will not rest upon them.

If they are not profits the tax will rest upon them.

When that policy is returned there may be a portion of it that is principal and a portion of it that is profit, and probably there is. Under that contract they will return the principal and they will return some of the profit. Now, the principal returned under the amendment that we adopted this afternoon will not be taxed, but if there is profit returned it will be taxed.

Now, that is all there is to it, and the amendment was framed to cover that.

Mr. LENROOT. Will not the company have already paid a tax on that profit?

Mr. UNDERWOOD. No.

Mr. LENROOT. The company has paid it, and must the insured also pay it?

Mr. UNDERWOOD. The insured pays on the profit he makes, just as you would pay on the profit you make.

Now, if the gentleman will allow me, I can not finish an argument in five minutes if some one else is speaking in my time. Let me give an example. If the gentleman should buy a farm or a storehouse, and he could make profits on that storehouse for a period of 10 years, say, under this bill if those profits amount to more than his exemptions he will pay the tax on it during that time—all his profits above the exemptions. Now, if at the end of 10 years the gentleman should sell his storehouse for twice as much as he paid for it, he will not pay a tax on the original principal that he invested in that storehouse, but he will pay a tax on the increased price he may receive for it, or for the profit he may sell it for, if it is profit.

Now, in the case of a life insurance policy it is the same as an investment in a house. The corporation, instead of the insured person, will be taxed on its net profits during the period the insurance runs, and at the termination of the period the insured will not pay a tax on his capital, but will pay a tax on the return of his profits, just as the man would pay a tax by the increased value of his storehouse in the case I cited. The two propositions are just the same.

Now, there is only one thing involved in this case. These great insurance companies are trying to get this Congress to untax them. They are eleemosynary institutions. I have nothing to say against them, but you have the choice whether you will invest your money in a home for your family, or in a storehouse, to furnish an income for your family and save it for the future, or whether you will invest it in a life insurance policy. You may invest it in a railroad company and get stock, and you do that in order to save it for yourself and your family. You may conclude that you are not as capable of handling your money as one of these great insurance companies is, and you send around and invest your capital in a policy. The only difference in the investment is that one is called a share of stock and the other is called a policy. You invest it for the purpose of profit in the policy, as you would in the stock.

The income-tax law will not be without its complications. Each insurance company has a method of its own in performing and transacting its business. The repayment to the policyholder is called by different names, and it will require some time to get a complete understanding of the operations of the law. It is copied largely from the English statute. This country has had experience with the income tax twice—first during the Civil War and afterwards in the year 1894, under the Wilson-Gorman bill. Three-fourths of the States have ratified the constitutional provision for the income tax. Its general provisions will meet with favor. Owing to the intricacy, it will require some time to be adapted to the methods of the different companies, and the applicability of this tax to all the different provisions of the insurance companies can only be known by actual experience.

The Tariff.

SPEECH
OF
HON. GILBERT N. HAUGEN,
OF IOWA.

IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913.

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. HAUGEN. Mr. Chairman, inasmuch as the bill under consideration has been drawn by the committee commissioned to draft and report tariff bills and agreed to by all the members of the majority, and a solemn compact entered into by the majority not to permit the adoption of a single amendment other than those offered by the committee in charge, an agreement religiously lived up to, I have refrained from offering amendments and taking part in the debate or the so-called sham battle. Besides, this bill, like the tariff bills of 1884, 1888, 1890, 1894, 1897 and the Payne-Aldrich bill, has been discussed pro and con with force and eloquence by experts on the subject, and both sides of the question have been fully and ably presented; and inasmuch as the people have recently recorded their judgment, and having on several occasions discussed the subject, both here and in the district, it is not my purpose to now discuss the Underwood bill in detail or to throw new light upon the subject. My only object in offering a few observations at this time is to perform a duty which I owe the committee and the thousands who have importuned me to aid in defeating the bill, to apprise the committee of their views and vigorous protests against the proposed outrage, the enactment of the Underwood bill, and the inevitable disaster to follow its enactment. With knowledge of the ruin, disaster, and starvation that has always followed free-trade legislation, and, believing as I do, no one conscious of his duty could do less than to at least apprise those who are about to perpetrate the wrong of the sentiment and intense opposition to such legislation, especially legislation meting out death-dealing blows to worthy and legitimate industries in one's district, as the Underwood bill evidently will do if enacted into law, as, for instance, the sugar-beet industry. In order that the committee may know how many of the people in my section of the country feel about it, I include in my remarks a copy of a petition:

ST. ANSGAR, IOWA.

To the Ways and Means Committee, House of Representatives, Washington, D. C.:

We, the undersigned petitioners, are residents of the State of Iowa, and are interested in the growing of sugar beets. We have observed the development of this industry in this section and we believe in its encouragement. We have noted decided increase in the crops succeeding sugar beets, and we believe that the introduction into the rotation in this State of this crop is of material benefit to the farmer. We find the growers are also generally satisfied with the results of beet growing measured by the immediate profits.

We would therefore respectfully petition that no legislation that will injuriously affect this industry, or that will prevent its further development in this State, will receive the support of our National Congress.

This is one of the many similar petitions received, aggregating thousands of signatures. The petition gives the view of the growers of sugar beets, and what they say as to sugar beets is true of many industries affected by this bill. Thousands of petitions, memorials, resolutions, and letters protesting against radical, sectional, discriminating, free-trade legislation, such as is proposed in the pending bill, have been received. To have copies of all printed in the RECORD would be an abuse of the privilege granted to print, and I will content myself with simply referring to the fact that they were received.

Considering the intelligence, eloquence, and integrity of the excellent gentlemen in power; considering all that you have said and promised to the good people, both in legislation and jobs, the power of the big stick, and your hunger for pie; considering the pressure brought to bear, the contributions made to the Democratic national committee, the support given your party in campaigns by your devoted and inseparable friends, representatives of the Sugar Trust; and knowing that you are pledged to free trade, commonly called "tariff for revenue only"; that you are now in full control of the executive and legislative branches of this Government, it is, of course, fair to assume that you will exercise your power and honestly redeem your party platform pledges. Yet, considering it all, with the evidence and facts before you, I was in hopes that you might at least save this one great and promising industry, one that not only concerns the farmers and consumers, but all the people of the United States.

It occurred to me that the fact that Uncle Sam has been paying annually about a hundred million dollars for sugar produced in other countries, an amount about equal in value to the total output of all our gold and silver mines, and the fact that sugar can, by a proper protection, cultivation, and encouragement, be produced at home with benefit to the farmer, thereby giving profitable employment to capital and hundreds of thousands of people, and will ultimately, if not immediately, furnish our 92,000,000 consumers sugar cheaper than now, and certainly cheaper than if that great industry is wiped off from the map, thereby giving the Sugar Trust a monopoly on sugar, and thus placing the consumers at the mercy of the Sugar Trust, whose representatives' urgent request has been so generously heeded in this respect. As to proof as to that, I refer you to the testimony given before your own select and excellent committee, the Hardwick special committee on the investigation of the American Sugar Refining Co. and others, testimony given by experts employed and witnesses summoned and examined by your own committee, as is, for instance, found in Senate Document No. 378, Sixty-second Congress, second session, A Brief Digest of Testimony Embodied in the Hearings Held Before the Hardwick Special Committee. Its contents, summed up, are as follows:

CHAPTER I.

Shows that the refiners of foreign raw sugar are a unit in desiring the duty on foreign raw sugar reduced or removed.

CHAPTER II.

Shows that the refiners are striving to have the duty reduced on foreign raw sugar in order that they may destroy the increasing competition of the home sugar industry, which already forces them to lower prices while the home product is on the market.

CHAPTER III.

Shows that the alleged "committee of wholesale grocers" is Spreckels, the New York sugar refiner, who uses the grocers as a cloak to conceal his identity.

CHAPTER IV.

Shows that when in September, 1911, the sugar refiners marked the price of imported sugar up to 7¼ cents per pound domestic sugar was not on the market.

CHAPTER V.

Shows that when domestic sugar came onto the market, in October, it was that and that alone which brought the refiners' price down to 6.11 cents in November and 5.63 cents in December.

CHAPTER VI.

Shows that the most effective manner in which to lower the price of sugar permanently is to increase the home production.

Wallace P. Willett, of Willett & Gray, publishers of the weekly Statistical Sugar Trade Journal, who, because of his long experience in sugar statistical work, was engaged by the Hardwick committee as a sugar expert, testified—see page 14 of the brief:

The CHAIRMAN. Your business?

Mr. WILLETT. Principally a wire-service news bureau covering the United States and a cable service covering every sugar country in the world, virtually, and also the publishing of a daily and weekly sugar-trade journal, and brokers in raw and refined sugars to a moderate extent. (Part 37, p. 3063 of hearings.)

* * * * * * * * *

The CHAIRMAN. Now, Mr. Willett, for the last 40 or 50 years you have been a close observer of sugar conditions throughout the world?

Mr. WILLETT. Yes, sir; I have been in the trade constantly.

* * * * * * * * *

Mr. HINDS. Then there were two advantages from the beet-sugar crop this year, so far as the public were concerned—the advantage of a slightly lower price because they did not foresee the rise, and the other advantage of having that store of sugar in the country, I suppose?

Mr. WILLETT. Yes.

Mr. HINDS. What would be the other advantage?

Mr. WILLETT. To supply the country during the intermediate period between crops.

Mr. HINDS. If we had not had that store of sugar in this country, we would have had to do as Europe did, and import sugar?

Mr. WILLETT. We would have had to do as Europe did; import sugar—from Java, principally.

Mr. HINDS. Would that have resulted in slightly further raising the sugar price?

Mr. WILLETT. Undoubtedly; in addition to the demand of Europe, the demand of America would have made the price higher than any other price we have seen. (Part 37, p. 3094 of hearings.)

* * * * * * * * *

Mr. FORDNEY. The domestic beet-sugar industry has certainly had a beneficial influence upon the price of sugar.

Mr. WILLETT. Yes; an enormous influence. If it were not for the domestic sugar industry, sugars in this country would be to-day very considerably higher. I can not say how much higher, because I can not tell what influence they have had upon the European market, but the refiners would be compelled to purchase a quantity of sugar in foreign ports equal to the production of beet sugar coming into the market from this country. I would not be surprised if it would be a cent a pound more but for the beet and cane sugar produced in this country. (Part 38, pp. 3153–3154 of hearings.)

* * * * * * * * *

The CHAIRMAN. My idea in having this matter repeated, if it is repetition, was to understand Mr. Willett—who is probably the greatest living American authority on sugar prices—whether or not in point of fact the market and trade reports seemed to indicate that the beet-sugar people were sold ahead or not. You say they were sold ahead?

Mr. WILLETT. They were sold ahead. (Part 43, p. 3579 of hearings.)

* * * * * * * * *

Mr. RAKER. If that is a fact, can not Mr. Willett give us his view, from his thorough examination and knowledge of the matter, what was the prime inducement that brought down the price of sugar?

Mr. WILLETT. It was the coming on the market of the American beet-sugar crop; but not put on the market by the refiners but by the jobbers who had bought it at the lower refined price and sold it at the market price. The jobbers made the money, and the beet-sugar men did not. (Part 43, p. 3579 of hearings.)

* * * * * * * * *

Mr. WILLETT. There is no question whatever, Mr. Chairman, that the coming onto the market in October of the Michigan sugars and other domestic sugars dropped the price from 6.57 in October down to 6.11 in November, and December 5.63. (Part 43, p. 3581 of hearings.)

* * * * * * * * *

Mr. FORDNEY. But, Mr. Willett, immediately after beet sugar came onto the market in October down went the price of sugar to about 5.75.

Mr. WILLETT. That was because of the coming on of the beet crop filling up the gap of known supply. (Part 43, p. 3584 of hearings.)

* * * * * * * * *

Mr. SULZER. What, in your judgment as an expert, would bring about a permanent reduction of the cost of manufactured sugar to the consumers of the United States?

Mr. WILLETT. By increasing the amount of domestic production and in Porto Rico and Hawaii; that is, by increasing the quantity of sugar within the United States to the extent that we would be required to purchase no sugar whatever at a world prices. Last year we bought only 77,000 tons at the world price. We were as near as that to that condition in 1910. We did come within 77,000 tons of being entirely free and independent of the world's prices, whereas a few years before we had been importing 6,700,000 tons. [Misprint; should be 670,000.]

Mr. SULZER. In other words, you think it advisable for the Government of the United States to do everything within its legitimate scope to encourage the growth of cane and beet sugar in the United States?

Mr. WILLETT. Yes, sir.

Mr. SULZER. And in our insular possessions?

Mr. WILLETT. Yes, sir; in our insular possessions.

Mr. SULZER. And you also would recommend the abolition of all tariff taxes upon the importation of sugar?

Mr. WILLETT. No, sir. Do you mean import duties?

Mr. SULZER. Yes, sir.

Mr. WILLETT. No, sir.

Mr. SULZER. Would not the elimination of import duties on sugar materially reduce the cost to the manufacturers of sugar and the consumers in the United States?

Mr. WILLETT. At times it would, but at other times it would not.

Mr. SULZER. At what times would it not reduce it?

Mr. WILLETT. This year.

Mr. SULZER. Why not this year?

Mr. WILLETT. Well, because we had a very present example that the moment our American beet-sugar production became available on the market the rise stopped, and, owing entirely and totally to this American production, refined sugars were a cent and a half lower than they were at the highest point. But for that American production we to-day would be buying sugar at the world's prices. We can not get rid of it. There is no other source from which we could get sugar.

Mr. SULZER. But you fail to grasp the point I was suggesting. If the manufacturers of sugar in the United States could get raw sugar free, they would be able to sell the manufactured sugar cheaper to the American consumer just now?

Mr. WILLETT. Yes, sir.

Mr. SULZER. Hence the elimination of the tariff tax upon importations of sugar would cheapen the price of sugar to the people of the United States?

Mr. WILLETT. Yes, sir; and to the manufacturer.

Mr. SULZER. And that is one way to get cheaper sugar for the people?

Mr. WILLETT. Yes, sir.

Mr. SULZER. And another way to get cheaper sugar for the people of the United States would be to encourage the production of beet and and cane sugar in the United States and in her insular possessions?

Mr. WILLETT. Yes, sir.

Mr. SULZER. And these are the only two ways by which sugar can be sold to the consumer more cheaply?

Mr. WILLETT. Yes, sir; and in one of these ways the price of sugar would be dependent on the f. o. b. Hamburg market, but in the other case the price would be entirely independent of the f. o. b. Hamburg market. (Pt. 37, pp. 3083–3084 of hearings.)

* * * * * * * * *

Mr. HINDS. How much beet sugar did they produce in this country this year?

Mr. WILLETT. Five hundred and fifty thousand tons.

Mr. HINDS. How much do you think that they ought to produce in order to maintain a proper equilibrium of prices here?

Mr. WILLETT. Well, just double that amount will do it. I believe that amount, a million tons, would carry us well below any excess in the world's prices.

Mr. HINDS. And would be a great advantage in giving us independence of Europe?

Mr. WILLETT. Yes, sir; and that is a tremendous advantage. (Pt. 37, p. 3086 of hearings.)

* * * * * * * * *

Mr. SULZER. If we could produce all the sugar we need for our own consumption, we would be absolutely independent of the world's market, would we not?

Mr. WILLETT. Yes.

Mr. SULZER. And the fixing of prices in Hamburg and other places would have absolutely no effect on the consumers of the United States so far as the price is concerned?

Mr. WILLETT. Not the slightest.

Mr. SULZER. Quite true. Then it is your opinion that it would be a good thing for the Government to encourage the agricultural people of the United States to engage in the production of beet sugar wherever they can do so profitably?

Mr. WILLETT. Decidedly so.

Mr. SULZER. We have vast areas of this country now, have we not, that are peculiarly susceptible to the growth of sugar beets if they were irrigated and properly cultivated?

Mr. WILLETT. Yes.

Mr. SULZER. And with very little effort on the part of the agencies of Government which are now in vogue these vast areas could be brought into production?

Mr. WILLETT. Yes.

insurance companies and insurance policies on the floor of the House in Committee of the Whole, which is as follows:

Mr. HULL. I am frank to say that in talking with some insurance men I get quite confused with their definitions of a number of these insurance terms, and I am unable to find many of these gentlemen who agree in every respect in their definition of these terms referred to. And I am slow to adopt a suggestion of terms unless a gentleman presents himself as an expert, with the knowledge of the full signification of the expression he undertakes to write into the law.

Mr. LENROOT. Mr. Chairman, I would like to be recognized in my own right. It does not require an insurance expert to decide the question of whether a cash-surrender value of a life insurance policy should be regarded as income and taxable under this bill. The law, so far as I know, of every State regulating life insurance provides that there shall be cash surrender values of policies, and to tax as income the cash-surrender value of an insurance policy is exactly like taxing, not the income upon deposits in a bank, but taxing the deposits themselves.

Mr. MADDEN. Suppose the premium was $500 on a 10-year tontine policy and the cash surrender of that policy at the end of that 10 years was $5,000; if he paid the tax on the $500 annual premium, ought he to be compelled also to pay the tax on the surrender value of the policy? Would not that be paying the tax twice?

Mr. LENROOT. He ought not in any event to be compelled to pay a tax on the surrender value, because he is getting back his capital, his principal, that he has paid into the company, and he is not getting gains, profits, or income, but merely getting his money back.

Mr. UNDERWOOD. Mr. Chairman, I only rise to state what the committee's position is in this matter. As the bill now stands, there is no tax levied on the principal that is paid into an insurance company. There is a tax on the net income. The way we look at the proposition is this: Under the present law the net incomes of these corporations, whether they be insurance companies or not, are taxed 1 per cent. Under the clause of this bill the net incomes of these corporations, whether they are insurance companies or not, will be taxed 1 per cent. Now, there will be no tax whatever on the policy when it is paid on its termination, whether it expires on the death of a person or whether it is a tontine policy and expires before the death of the insured. But in the meantime there is a tax of 1 per cent on the net profits of the corporation, just as they are paid to-day under existing law.

Mr. MADDEN. Does this bill provide for the payment of the tax on the annual premiums paid by the policyholder?

Mr. UNDERWOOD. If they are net profits. I am not going into the question of what they are. We are going to leave that for the Treasury Department and the courts to determine.

If they are net profits on the net profits, or so much of them as are net profits, the tax will rest. If they are simply a return of the principal, the tax will not rest upon them.

When that policy is returned there may be a portion of it that is principal and a portion of it that is profit, and probably there is. Under that contract they will return the principal and they will return some of the profit. Now, the principal returned under the amendment that we adopted this afternoon will not be taxed, but if there is profit returned it will be taxed.

Now, that is all there is to it, and the amendment was framed to cover that.

Mr. LENROOT. Will not the company have already paid a tax on that profit?

Mr. UNDERWOOD. No.

Mr. LENROOT. The company has paid it, and must the insured also pay it?

Mr. UNDERWOOD. The insured pays on the profit he makes, just as you would pay on the profit you make.

Now, if the gentleman will allow me, I can not finish an argument in five minutes if some one else is speaking in my time. Let me give an example. If the gentleman should buy a farm or a storehouse, and he could make profits on that storehouse for a period of 10 years, say, under this bill if those profits amount to more than his exemptions he will pay the tax on it during that time—all his profits above the exemptions. Now, if at the end of 10 years the gentleman should sell his storehouse for twice as much as he paid for it, he will not pay a tax on the original principal that he invested in that storehouse, but he will pay a tax on the increased price he may receive for it, or for the profit he may sell it for, if it is profit.

Now, in the case of a life insurance policy it is the same as an investment in a house. The corporation, instead of the insured person, will be taxed on its net profits during the period the insurance runs, and at the termination of the period the insured will not pay a tax on his capital, but will pay a tax on the return of his profits, just as the man would pay a tax by the increased value of his storehouse in the case I cited. The two propositions are just the same.

Now, there is only one thing involved in this case. These great insurance companies are trying to get this Congress to untax them. They are eleemosynary institutions. I have nothing to say against them, but you have the choice whether you will invest your money in a home for your family, or in a storehouse, to furnish an income for your family and save it for the future, or whether you will invest it in a life insurance policy. You may invest it in a railroad company and get stock, and you do that in order to save it for yourself and your family. You may conclude that you are not as capable of handling your money as one of these great insurance companies is, and you send around and invest your capital in a policy. The only difference in the investment is that one is called a share of stock and the other is called a policy. You invest it for the purpose of profit in the policy, as you would in the stock.

The income-tax law will not be without its complications. Each insurance company has a method of its own in performing and transacting its business. The repayment to the policyholder is called by different names, and it will require some time to get a complete understanding of the operations of the law. It is copied largely from the English statute. This country has had experience with the income tax twice—first during the Civil War and afterwards in the year 1894, under the Wilson-Gorman bill. Three-fourths of the States have ratified the constitutional provision for the income tax. Its general provisions will meet with favor. Owing to the intricacy, it will require some time to be adapted to the methods of the different companies, and the applicability of this tax to all the different provisions of the insurance companies can only be known by actual experience.

The Tariff.

SPEECH

OF

HON. GILBERT N. HAUGEN,

OF IOWA,

IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. HAUGEN. Mr. Chairman, inasmuch as the bill under consideration has been drawn by the committee commissioned to draft and report tariff bills and agreed to by all the members of the majority, and a solemn compact entered into by the majority not to permit the adoption of a single amendment other than those offered by the committee in charge, an agreement religiously lived up to, I have refrained from offering amendments and taking part in the debate or the so-called sham battle. Besides, this bill, like the tariff bills of 1884, 1888, 1890, 1894, 1897 and the Payne-Aldrich bill, has been discussed pro and con with force and eloquence by experts on the subject, and both sides of the question have been fully and ably presented; and inasmuch as the people have recently recorded their judgment, and having on several occasions discussed the subject, both here and in the district, it is not my purpose to now discuss the Underwood bill in detail or to throw new light upon the subject. My only object in offering a few observations at this time is to perform a duty which I owe the committee and the thousands who have importuned me to aid in defeating the bill, to apprise the committee of their views and vigorous protests against the proposed outrage, the enactment of the Underwood bill, and the inevitable disaster to follow its enactment. With knowledge of the ruin, disaster, and starvation that has always followed free-trade legislation, and, believing as I do, no one conscious of his duty could do less than to at least apprise those who are about to perpetrate the wrong of the sentiment and intense opposition to such legislation, especially legislation meting out death-dealing blows to worthy and legitimate industries in one's district, as the Underwood bill evidently will do if enacted into law, as, for instance, the sugar-beet industry. In order that the committee may know how many of the people in my section of the country feel about it, I include in my remarks a copy of a petition:

ST. ANSGAR, IOWA.

To the Ways and Means Committee, House of Representatives, Washington, D. C.:

We, the undersigned petitioners, are residents of the State of Iowa, and are interested in the growing of sugar beets. We have observed the development of this industry in this section and we believe in its encouragement. We have noted decided increase in the crops succeeding sugar beets, and we believe that the introduction into the rotation in this State of this crop is of material benefit to the farmer. We find the growers are also generally satisfied with the results of beet growing measured by the immediate profits.

We would therefore respectfully petition that no legislation that will injuriously affect this industry, or that will prevent its further development in this State, will receive the support of our National Congress.

This is one of the many similar petitions received, aggregating thousands of signatures. The petition gives the view of the growers of sugar beets, and what they say as to sugar beets is true of many industries affected by this bill. Thousands of petitions, memorials, resolutions, and letters protesting against radical, sectional, discriminating, free-trade legislation, such as is proposed in the pending bill, have been received. To have copies of all printed in the RECORD would be an abuse of the privilege granted to print, and I will content myself with simply referring to the fact that they were received.

Considering the intelligence, eloquence, and integrity of the excellent gentlemen in power; considering all that you have said and promised to the good people, both in legislation and jobs, the power of the big stick, and your hunger for pie; considering the pressure brought to bear, the contributions made to the Democratic national committee, the support given your party in campaigns by your devoted and inseparable friends, representatives of the Sugar Trust; and knowing that you are pledged to free trade, commonly called "tariff for revenue only"; that you are now in full control of the executive and legislative branches of this Government, it is, of course, fair to assume that you will exercise your power and honestly redeem your party platform pledges. Yet, considering it all, with the evidence and facts before you, I was in hopes that you might at least save this one great and promising industry, one that not only concerns the farmers and consumers, but all the people of the United States.

It occurred to me that the fact that Uncle Sam has been paying annually about a hundred million dollars for sugar produced in other countries, an amount about equal in value to the total output of all our gold and silver mines, and the fact that sugar can, by a proper protection, cultivation, and encouragement, be produced at home with benefit to the farmer, thereby giving profitable employment to capital and hundreds of thousands of people, and will ultimately, if not immediately, furnish our 92,000,000 consumers sugar cheaper than now, and certainly cheaper than if that great industry is wiped off from the map, thereby giving the Sugar Trust a monopoly on sugar, and thus placing the consumers at the mercy of the Sugar Trust, whose representatives' urgent request has been so generously heeded in this respect. As to proof as to that, I refer you to the testimony given before your own select and excellent committee, the Hardwick special committee on the investigation of the American Sugar Refining Co. and others, testimony given by experts employed and witnesses summoned and examined by your own committee, as is, for instance, found in Senate Document No. 378, Sixty-second Congress, second session, A Brief Digest of Testimony Embodied in the Hearings Held Before the Hardwick Special Committee. Its contents, summed up, are as follows:

CHAPTER I.

Shows that the refiners of foreign raw sugar are a unit in desiring the duty on foreign raw sugar reduced or removed.

CHAPTER II.

Shows that the refiners are striving to have the duty reduced on foreign raw sugar in order that they may destroy the increasing competition of the home sugar industry, which already forces them to lower prices while the home product is on the market.

CHAPTER III.

Shows that the alleged "committee of wholesale grocers" is Spreckels, the New York sugar refiner, who uses the grocers as a cloak to conceal his identity.

CHAPTER IV.

Shows that when in September, 1911, the sugar refiners marked the price of imported sugar up to 7¼ cents per pound domestic sugar was not on the market.

CHAPTER V.

Shows that when domestic sugar came onto the market, in October, it was that and that alone which brought the refiners' price down to 6.11 cents in November and 5.63 cents in December.

CHAPTER VI.

Shows that the most effective manner in which to lower the price of sugar permanently is to increase the home production.

Wallace P. Willett, of Willett & Gray, publishers of the weekly Statistical Sugar Trade Journal, who, because of his long experience in sugar statistical work, was engaged by the Hardwick committee as a sugar expert, testified—see page 14 of the brief:

The CHAIRMAN. Your business?

Mr. WILLETT. Principally a wire-service news bureau covering the United States and a cable service covering every sugar country in the world, virtually, and also the publishing of a daily and weekly sugar-trade journal, and brokers in raw and refined sugars to a moderate extent. (Part 37, p. 3063 of hearings.)

* * * * * * *

The CHAIRMAN. Now, Mr. Willett, for the last 40 or 50 years you have been a close observer of sugar conditions throughout the world?

Mr. WILLETT. Yes, sir; I have been in the trade constantly.

* * * * * * *

Mr. HINDS. Then there were two advantages from the beet-sugar crop this year, so far as the public were concerned—the advantage of a slightly lower price because they did not foresee the rise, and the other advantage of having that store of sugar in the country, I suppose?

Mr. WILLETT. Yes.

Mr. HINDS. What would be the other advantage?

Mr. WILLETT. To supply the country during the intermediate period between crops.

Mr. HINDS. If we had not had that store of sugar in this country, we would have had to do as Europe did, and import sugar?

Mr. WILLETT. We would have had to do as Europe did; import sugar—from Java, principally.

Mr. HINDS. Would that have resulted in slightly further raising the sugar price?

Mr. WILLETT. Undoubtedly; in addition to the demand of Europe, the demand of America would have made the price higher than any other price we have seen. (Part 37, p. 3094 of hearings.)

* * * * * * *

Mr. FORDNEY. The domestic beet-sugar industry has certainly had a beneficial influence upon the price of sugar.

Mr. WILLETT. Yes; an enormous influence. If it were not for the domestic sugar industry, sugars in this country would be to-day very considerably higher. I can not say how much higher, because I can not tell what influence they have had upon the European market, but the refiners would be compelled to purchase a quantity of sugar in foreign ports equal to the production of beet sugar coming into the market from this country. I would not be surprised if it would be a cent a pound more but for the beet and cane sugar produced in this country. (Part 38, pp. 3153-3154 of hearings.)

* * * * * * *

The CHAIRMAN. My idea in having this matter repeated, if it is repetition, was to understand Mr. Willett—who is probably the greatest living American authority on sugar prices—whether or not in point of fact the market and trade reports seemed to indicate that the beet-sugar people were sold ahead or not. You say they were sold ahead?

Mr. WILLETT. They were sold ahead. (Part 43, p. 3579 of hearings.)

* * * * * * *

Mr. RAKER. If that is a fact, can not Mr. Willett give us his view, from his thorough examination and knowledge of the matter, what was the prime inducement that brought down the price of sugar?

Mr. WILLETT. It was the coming on the market of the American beet-sugar crop; but not put on the market by the refiners but by the jobbers who had bought it at the lower refined price and sold it at the market price. The jobbers made the money, and the beet-sugar men did not. (Part 43, p. 3579 of hearings.)

* * * * * * *

Mr. WILLETT. There is no question whatever, Mr. Chairman, that the coming onto the market in October of the Michigan sugars and other domestic sugars dropped the price from 6.57 in October down to 6.11 in November, and December 5.63. (Part 43, p. 3581 of hearings.)

* * * * * * *

Mr. FORDNEY. But, Mr. Willett, immediately after beet sugar came onto the market in October down went the price of sugar to about 5.75.

Mr. WILLETT. That was because of the coming on of the beet crop filling up the gap of known supply. (Part 43, p. 3584 of hearings.)

* * * * * * *

Mr. SULZER. What, in your judgment as an expert, would bring about a permanent reduction of the cost of manufactured sugar to the consumers of the United States?

Mr. WILLETT. By increasing the amount of domestic production and in Porto Rico and Hawaii; that is, by increasing the quantity of sugar within the United States to the extent that we would be required to purchase no sugar whatever at world prices. Last year we bought only 77,000 tons at the world price. We were as near as that to that condition in 1910. We did come within 77,000 tons of being entirely free and independent of the world's prices, whereas a few years before we had been importing 6,700,000 tons. [Misprint; should be 670,000.]

Mr. SULZER. In other words, you think it advisable for the Government of the United States to do everything within its legitimate scope to encourage the growth of cane and beet sugar in the United States?

Mr. WILLETT. Yes, sir.

Mr. SULZER. And in our insular possessions?

Mr. WILLETT. Yes, sir; in our insular possessions.

Mr. SULZER. And you also would recommend the abolition of all tariff taxes upon the importation of sugar?

Mr. WILLETT. No, sir. Do you mean import duties?

Mr. SULZER. Yes, sir.

Mr. WILLETT. No, sir.

Mr. SULZER. Would not the elimination of import duties on sugar materially reduce the cost to the manufacturers of sugar and the consumers in the United States?

Mr. WILLETT. At times it would, but at other times it would not.

Mr. SULZER. At what times would it not reduce it?

Mr. WILLETT. This year.

Mr. SULZER. Why not this year?

Mr. WILLETT. Well, because we had a very present example that the moment our American beet-sugar production became available on the market the rise stopped, and, owing entirely and totally to this American production, refined sugars were a cent and a half lower than they were at the highest point. But for that American production we to-day would be buying sugar at the world's prices. We can not get rid of it. There is no other source from which we could get sugar.

Mr. SULZER. But you fail to grasp the point I was suggesting. If the manufacturers of sugar in the United States could get raw sugar free, they would be able to sell the manufactured sugar cheaper to the American consumer just now?

Mr. WILLETT. Yes, sir.

Mr. SULZER. Hence the elimination of the tariff tax upon importations of sugar would cheapen the price of sugar to the people of the United States?

Mr. WILLETT. Yes, sir; and to the manufacturer.

Mr. SULZER. And that is one way to get cheaper sugar for the people?

Mr. WILLETT. Yes, sir.

Mr. SULZER. And another way to get cheaper sugar for the people of the United States would be to encourage the production of beet and and cane sugar in the United States and in her insular possessions?

Mr. WILLETT. Yes, sir.

Mr. SULZER. And these are the only two ways by which sugar can be sold to the consumer more cheaply?

Mr. WILLETT. Yes, sir; and in one of these ways the price of sugar would be dependent on the f. o. b. Hamburg market, but in the other case the price would be entirely independent of the f. o. b. Hamburg market. (Pt. 37, pp. 3083-3084 of hearings.)

* * * * * * *

Mr. HINDS. How much beet sugar did they produce in this country this year?

Mr. WILLETT. Five hundred and fifty thousand tons.

Mr. HINDS. How much do you think that they ought to produce in order to maintain a proper equilibrium of prices here?

Mr. WILLETT. Well, just double that amount will do it. I believe that amount, a million tons, would carry us well below any excess in the world's prices.

Mr. HINDS. And would be a great advantage in giving us independence of Europe?

Mr. WILLETT. Yes, sir; and that is a tremendous advantage. (Pt. 37, p. 3086 of hearings.)

* * * * * * *

Mr. SULZER. If we could produce all the sugar we need for our own consumption, we would be absolutely independent of the world's market, would we not?

Mr. WILLETT. Yes.

Mr. SULZER. And the fixing of prices in Hamburg and other places would have absolutely no effect on the consumers of the United States so far as the price is concerned?

Mr. WILLETT. Not the slightest.

Mr. SULZER. Quite true. Then it is your opinion that it would be a good thing for the Government to encourage the agricultural people of the United States to engage in the production of beet sugar wherever they can do so profitably?

Mr. WILLETT. Decidedly so.

Mr. SULZER. We have vast areas of this country now, have we not, that are peculiarly susceptible to the growth of sugar beets if they were irrigated and properly cultivated?

Mr. WILLETT. Yes.

Mr. SULZER. And with very little effort on the part of the agencies of Government which are now in vogue these vast areas could be brought into production?

Mr. WILLETT. Yes.

Mr. SULZER. And a great increase of beet-sugar production could be brought about?

Mr. WILLETT. Yes. (Pt. 37, p. 3090 of hearings.)

* * * * * * *

Mr. HINDS. You speak of our being independent of Europe?

Mr. WILLETT. Yes.

Mr. HINDS. Even although we produced enough to, as you might say, supply ourselves, nevertheless that would not give us sugar any cheaper than they would get it in Europe on that specific year, would it?

Mr. WILLETT. It would give us sugar always cheaper than they would get it in Europe in any year, if I understand your question right.

Mr. HINDS. Yes. You think, then, it would be possible for us to get sugar, by reason of our greater production——

Mr. WILLETT. At all times——

Mr. HINDS (continuing). Under the world's price?

Mr. WILLETT. At all times under the world's price. We get it now at all times, except for two or three months in the year. (Pt. 37, p. 3093 of hearings.)

* * * * * * *

Mr. WILLETT. * * * This promotion of our industry is a much more vital point (from the consumers' standpoint included) than is a reduction of tariff to a point that lets in foreign sugar and thereby diminishes the home production. Whenever we reach the condition indicated, competition between our free and partially free duty producers will begin and the consumers will benefit thereby, and the United States will be entirely free from the speculative and other influences which control the world's price, and it is not unreasonable to expect that under the conditions indicated the United States will become a considerable exporter of its surplus production to the foreign countries which may be short of supplies as under present conditions abroad.

As showing the ultimate effect of home production equal to or surpassing home consumption, I call attention specially for earnest consideration to the fact that in 1910 we reached this desired consummation within 74,000 tons, and as a result we were almost independent of Europe, so much so, in fact, that we got our supplies from Cuba at over one-half cent per pound under the world's prices, during which time one man (Santa Maria) was carrying on a big bull speculation in Europe in which we would certainly have been involved but for this limited amount we required that year. In 1911 the Cuban crop fell short of 1910 by 220,898 tons, and we required 212,182 tons from abroad to complete our supplies; hence we were involved in the world's prices in 1911, and the result was a hue and cry against the high prices of sugar. I am not making an argument, but am simply pointing to the facts that appear to me to make the consideration of the increase in our local supplies of greater importance in legislation than a reduction of duties beyond certain limits, those limits to be such as will positively exclude all sugars outside those of our States and dependencies. (Pt. 43, pp. 3556-3557 of hearings.)

* * * * * * *

In all these analyses I reach the same conclusion—that to decrease the price of sugar to the consumer, increase the domestic production as rapidly as possible. (Pt. 48, p. 3978 of hearings, the concluding paragraph of Mr. Willett's testimony.)

It occurred to me that if your own employed experts' testimony could not be accepted that the testimony of Dr. Wiley, then Chief of the Bureau of Chemistry, Department of Agriculture—your much talked of as candidate for Vice President—might have had some influence with you in the matter, as, for instance, his testimony printed on pages 20 and 21 of the brief:

The CHAIRMAN. And if the Dutch standard could be wiped out it could all come in?

Dr. WILEY. Yes; if we could import as much refined sugar as raw sugar; but it wouldn't do any good in the world and would hurt the beet-sugar industry, and I have been encouraging it. I believe it to be one of the best things for the agriculture of this country that could possibly exist, because if one raises beets he must use scientific methods. Every beet-sugar field is practically an experimental station which teaches every farmer in the neighborhood. I am in favor of protecting the sugar crop in Louisiana and all along the coast. I am not making a plea for taking the tariff off of sugar at all; I am only trying to tell you what the Dutch standard does.

The CHAIRMAN. You say you are in favor of protecting sugar. Do you believe there will ever be any chance for our competing with the world without protection?

Dr. WILEY. Maybe so in the future.

The CHAIRMAN. Although you see reasonable prospects of that, I ask do you see any chance of it?

Dr. WILEY. I would protect them even if I thought there would never be any chance of it. I want to purchase our own sugar at home. (Pt. 42, p. 3445 of hearings.)

* * * * * * *

Dr. WILEY. I look at this matter as I do everything else in which the farmers are interested; I want the farmers to have a fair chance in the markets, governed by supply and demand as to rise and fall, and not have everything they grow and everything they buy manipulated as to price by somebody that has nobody's interests at heart but their own. I can not sell a steer to-day, or a bushel of wheat, or a bushel of corn at a price governed by supply and demand, nor can you. The price of a steer, or of a bushel of wheat, or of a bushel of corn is set by gamblers in Chicago and elsewhere. (Pt. 42, p. 3447 of hearings.)

* * * * * * *

Dr. WILEY. But the point I am giving is this, that under the present system we are absolutely dependent upon the refiners of this country for our sugar. They have taught us to use white sugar, and we will not take any other kind; and therefore they can fix any price thereon they please. I will say, on the question of price, that I think they are very reasonable about it and do not try to squeeze us very much. At the same time, whenever the Louisiana sugar comes in the price of sugar drops, and whenever the crop of beet sugar comes in the price of sugar drops. Again, as soon as the Louisiana and beet sugar men sell all they have to sell the price of sugar goes up again.

Mr. FORDNEY. That is true of last summer, I believe.

Dr. WILEY. Yes; and when the price of sugar went up to 7 cents retail I said, "Watch out; when the sugar crop comes in it will go down," and it did, and there was no sugar in the country even then. (Pt. 42, p. 3446 of hearings.)

* * * * * * *

Mr. FORDNEY. The fact is that the refiner in New York does not control the market while our domestic sugar crop is on the market?

Dr. WILEY. As soon as the domestic sugar crop comes on they let the price drop, for they are then buyers themselves. They buy the most of the domestic crop except the beet sugar—buy almost all of the Louisiana crop.

Mr. FORDNEY. That is because it is raw sugar?

Dr. WILEY. Yes. They then want to buy and put the price down.

Mr. FORDNEY. And as soon as the crop is purchased they increase the price, do you mean?

Dr. WILEY. Yes; as high as they think the people will stand for. They do not put the price out of sight, because that would not be good business. (Pt. 42, p. 3448 of hearings.)

It would seem that under ordinary circumstances the testimony of these experts selected by your own committee would receive consideration and be heeded in preparing this all-important bill. Evidently the farmers and consumers, in whom you profess to have so much interest, were lost sight of and the persuasive and all-powerful eloquence of the Sugar Trust in its ceaseless efforts and unrelenting plea for free sugar won the day. Here you are—page 3 of the brief:

CLAUS A. SPRECKELS, PRESIDENT FEDERAL SUGAR REFINING CO.

Mr. HINDS. In other words, perhaps you would take it [the tariff] all off, would you not, and have free trade?

Mr. SPRECKELS. I would have free trade. (Pt. 27, p. 2277 of hearings.)

Mr. HINDS. You would have free trade in sugar?

Mr. SPRECKELS. Absolutely. (Pt. 27, p. 2278 of hearings.)

CHARLES R. HEIKE, SECRETARY AMERICAN SUGAR REFINING CO. FROM 1887 TO 1910.

Mr. FORDNEY. Now, if the duty were removed absolutely on sugar could we produce either cane or beets in this country?

Mr. HEIKE. I doubt it very much.

Mr. FORDNEY. Then that would destroy the industry absolutely in this country?

Mr. HEIKE. Yes.

Mr. FORDNEY. And you would approve of that?

Mr. HEIKE. Yes. (Pt. 4, p. 292 of hearings.)

WILLIAM G. GILMORE, PARTNER ARBUCKLE BROS., SUGAR REFINERS.

Mr. MADISON. In other words, you think the thing to do is to take off the duty, and that it would be to your advantage to take it off as a refiner of cane sugar?

Mr. GILMORE. Yes, sir.

Mr. MADISON. And you would advocate the taking off of the duty?

Mr. GILMORE. I would personally. I am only speaking now personally. (Pt. 14, p. 1169 of hearings.)

JAMES H. POST, PRESIDENT NATIONAL SUGAR REFINING CO.

Mr. POST. If Congress did not need the revenue from sugar. That is a different proposition. But they have to have it from something, and sugar seems to be the thing that has paid a part of it for a great many years. As far as I personally am concerned, I would like to see free sugar. As we look at the country at large, however, I think it would be a very unfair proposition. (Pt. 6, p. 527 of hearings.)

WILLIAM A. J. JAMISON, PARTNER ARBUCKLE BROS.

Mr. RAKER. How would it affect you if there was no tax on the importation of sugar—raw sugar?

Mr. JAMISON. I think it would enable us to run more constantly.

* * * * * * *

Mr. RAKER. Because of the way raw sugar is shipped into the United States?

Mr. JAMISON. Oh, no; on account of the beet product. If there was no duty, I do not think the beet would be so prosperous, and we would probably sell more sugar. If the duty was removed, I mean to say.

* * *

Mr. RAKER. * * * What would you think would be a fair compensation? [Reduction.]

Mr. JAMISON. I think there should be a cent a pound taken off at the present time at least; and later——

Mr. RAKER. A little more?

Mr. JAMES. Yes; until it is entirely removed. (Pt. 14, pp. 1195-1196 of hearings.)

EDWIN F. ATKINS, VICE PRESIDENT AND ACTING PRESIDENT AMERICAN SUGAR REFINING CO.

Mr. HINDS. So that a reduction of the tariff passing beyond a moderate amount would tend to the prosperity of the refiners and to the detriment of the beet-sugar people?

Mr. ATKINS. Take the independent refiners, outside of our concern at all, that represent more than half the supply of the United States. They say, and I think they say truly, that it is for the refiners' interest to have a low rate of duty rather than a high rate of duty, and reduce the basis of value upon which they can sell. The lower the price of the refined sugar the greater is the consumption. I think their position is well taken. (Pt. 2, p. 174 of hearings.)

* * * * * * *

The CHAIRMAN. Is it really on account of the competition, Mr. Atkins?

* * *

Mr. ATKINS. I think so. * * * There is very much larger capacity than is required, and the beet sugars are taking away the trade of the refiners year by year. (Pt. 1, p. 48 of hearings.)

* * * * * * *

Mr. MADISON. Then, as a matter of fact, your competition with the beet-sugar people exists only during a few months of the year?

Mr. ATKINS. Three months, and that is 25 per cent of the whole time (Pt. 1, p. 49 of hearings.)

[Query: If the production and marketing of 600,000 tons of domestic beet sugar gives the consumer cheaper sugar for 3 months out of 12, how many months would 1,200,000 tons make it cheaper, and what would be the effect if the production were 2,400,000 tons?]

* * * * * * *

Mr. MADISON. You stated a moment ago, Mr. Atkins, or this morning, that you decidedly opposed going into the beet-sugar business. What was the reason of that? * * *

Mr. ATKINS. The beet-sugar business was a competitive business. It produced in the western territories, where our market lay. That is, I say "our market"—I mean the market of the refiners, the various refiners. As that industry grew—and I foresaw that it would grow rapidly—I believed that it would reduce the volume of business, not only of the American Sugar Refining Co. but of all the refiners on the Atlantic coast; and although we had millions of dollars invested in the business there we were building up a competitive business, one that would compete with ourselves, and one which was bound to get away from us; we could not control it in the end. I say "we"—I had no connection whatever with it; that was simply a business man's opinion. (Pt. 1, pp. 85-86 of hearings.)

* * * * * * *

CLAUS A. SPRECKELS, PRESIDENT FEDERAL SUGAR REFINING CO.

* * * * * * *

Mr. HINDS. Mr. Spreckels, you have been carrying on a campaign to reduce the tariff as beneficial to the cane-sugar refiners?

Mr. SPRECKELS. I have.

Mr. HINDS. Of course that will be damaging to the beet-sugar refiners?

Mr. SPRECKELS. To some extent it will. (Pt. 27, p. 2275 of hearings.)

* * * * * * *

Mr. HINDS. In other words, perhaps you would take it [the tariff] all off, would you not, and have free trade?

Mr. SPRECKELS. I would have free trade. (Pt. 27, p. 2277 of hearings.)

Mr. HINDS. You would have free trade in sugar?

Mr. SPRECKELS. Absolutely. (Pt. 27, p. 2278 of hearings.)

* * * * * * *

WILLIAM G. GILMORE, PARTNER, ARBUCKLE BROS., SUGAR REFINERS.

* * * * * * *

Mr. GILMORE. The home beet-sugar industry of course is curtailing the sale of the cane-sugar products. You can not sell it twice.

Mr. MADISON. In other words, if they were out of the way, you would make more money?

Mr. GILMORE. We would have more employment, I suppose, for our output, for our capacity—our refining capacity.

Mr. MADISON. And the ultimate conclusion is you would make more money?

Mr. GILMORE. I think we would.

* * * * * * *

Mr. MADISON. Suppose as a matter of fact they get to a point where, instead of producing about 600,000 tons of sugar a year, they actually produce a million and a half tons of sugar, what effect would that have?

Mr. GILMORE. It would shut down most of the eastern refineries for a part of the season.

Mr. MADISON. You would have to quit the business?

Mr. GILMORE. Yes.

* * * * * * *

Mr. MADISON. It would be beneficial [removing the duty from sugar] inasmuch as it would destroy the beet-sugar people?

Mr. GILMORE. It would keep them at home.

Mr. MADISON. Keep them in a limited locality?

Mr. GILMORE. Yes.

Mr. MADISON. And leave the field to you people that is naturally yours, as you feel?

Mr. GILMORE. Our natural field. Yes.

* * * * * * *

WILLIAM A. J. JAMISON, PARTNER, ARBUCKLE BROS.

Mr. RAKER. Michigan sugar, you say, competes with yours in New York?

Mr. JAMISON. Yes; the Michigan sugar has been down to New York State and all through there. It has interfered with us very largely in sales in Ohio and Pennsylvania.

Mr. RAKER. And West Virginia?

Mr. JAMISON. Yes.

* * * * * * *

Mr. RAKER. Do you not have a supply all the time?

Mr. JAMISON. Well, we are not able to run full at all times.

Mr. RAKER. Because of the way raw sugar is shipped into the United States?

Mr. JAMISON. Oh, no; on account of the beet product. If there was no duty, I do not think the beet would be so prosperous, and we would probably sell more sugar. If the duty was removed, I mean to say. (Pt. 14, p. 1195 of hearings.)

WASHINGTON B. THOMAS, CHAIRMAN OF THE BOARD OF DIRECTORS, AMERICAN SUGAR REFINING CO.

Mr. MALBY. You have to-day competition among the beet-sugar industries of the United States, have you not?

Mr. THOMAS. We have.

Mr. MALBY. And good, sharp competition, say, with the Michigan Sugar Refining Co.?

Mr. THOMAS. We have. (Pt. 24, p. 2013 of hearings.)

* * * * * * *

Mr. MALBY. So that, reverting to the question once more, if the beet-sugar industry was wholly destroyed, then you would get in there, would you not?

Mr. THOMAS. We would extend our sales, undoubtedly.

Mr. MALBY. Let us be frank about it. You would extend your sales to every single household where beet sugar is now sold, which would pay the price, would you not?

Mr. THOMAS. Oh, yes. It would take the place of beet sugar. (Pt. 24, p. 2014 of hearings.)

The testimony given under oath by the various presidents, partners, and directors of the Sugar Trust, their earnest and persistent plea for free sugar, to enable them to monopolize sugar, to manipulate prices, and to put up the price at will, I believe is sufficient to convince any disinterested, unbiased, and fair-minded man as to who will suffer, who will pay the price, and as to who will be the beneficiary if sugar goes on the free list. It is the old story so sacred to the Democratic Party when in the act of legislation, "trusts first, people next"; but you say that the wholesale grocers, the retail dealers, and the people in general are constantly importuning Congress to reduce the duty on sugar. Yes; many honestly believe that if the duty is removed the price of sugar will go down, but the Sugar Trust says it wants the duty removed so that the price can be advanced. According to printed testimony the Sugar Trust has gone to the trouble and expense of thousands of dollars in distributing literature under the assumed name of "Committee of Wholesale Grocers." I refer you to pages 9 and 10 of the brief:

Following is a copy of the heading of circulars which are being distributed broadcast, praying that the duty on foreign raw sugar be reduced:

"Committee of wholesale grocers—Formed to assist in obtaining cheaper sugar for consumers through reduction of duties on raw and refined sugars.

"F. J. Dessels, chairman; F. C. Lowry, secretary and treasurer. 138 Front Street, New York, N. Y.

"NOTE.—138 Front Street is the office of the Federal Sugar Refining Co."

FRANK C. LOWRY, SALES AGENT, FEDERAL SUGAR REFINING CO., "SECRETARY AND TREASURER," THE "COMMITTEE OF WHOLESALE GROCERS."

Mr. FORDNEY. Mr. Lowry, I notice by a paper here that you are secretary, and the paper says secretary and treasurer, of the grocerymen's committee.

Mr. LOWRY. That is correct.

* * * * * * *

Mr. FORDNEY. Who was instrumental, Mr. Lowry, in organizing that committee?

Mr. LOWRY. I was.

* * * * * * *

Mr. FORDNEY. You alone, then, organized the committee, did you?

Mr. LOWRY. I did.

Mr. FORDNEY. When and where, Mr. Lowry, was the meeting held at which it was formed, and who was present?

Mr. LOWRY. There have been no regular meetings by calling those people together from all over the country. * * *

Mr. FORDNEY. You have never had a meeting of any of the members mentioned in this pamphlet?

Mr. LOWRY. I never have called them together. * * *

Mr. FORDNEY. So there never has been a meeting of the committee since it has been organized?

Mr. LOWRY. Not as a whole; no.

Mr. FORDNEY. Have you ever had any of the members of the committee together, except as a personal interview by you?

Mr. LOWRY. No.

Mr. FORDNEY. You never have had?

Mr. LOWRY. No.

Mr. FORDNEY. What are the dues of the members, please?

Mr. LOWRY. There are none.

Mr. FORDNEY. There are none at all?

Mr. LOWRY. It is just an informal committee.

Mr. FORDNEY. How much money has been spent in distributing literature by that committee?

Mr. LOWRY. Somewhere in the neighborhood of $12,000.

Mr. FORDNEY. Who paid that money?

Mr. LOWRY. * * * the only one that subscribed was the Federal Sugar Refining Co.

Mr. FORDNEY. So that the Federal Sugar Refining Co. have paid in this $12,000 for the distribution of the literature?

Mr. LOWRY. Yes.

Mr. FORDNEY. And no other concern has paid in any sums of money?

Mr. LOWRY. No other concern; no. (Pt. 19, pp. 1607-1608 of hearings.)

* * * * * * *

Mr. FORDNEY. The Federal Sugar Refining Co. has paid, then, for the distribution of all this literature?

Mr. LOWRY. Yes; so far they have. (Pt. 19, p. 1609 of hearings, July 13, 1911.)

* * * * * * *

Mr. FORDNEY. You are still secretary of this committee of the wholesale grocers' organization?

Mr. LOWRY. So far; yes, sir.

Mr. FORDNEY. You testified here last spring that you were "it"—the whole thing?

Mr. LOWRY. No; I did not mean for you to construe it that way. I do not construe it that way.

Mr. FORDNEY. Well, have conditions changed as to finances, and initiation fees, and dues, and all those things, since the time when you were here last spring?

Mr. LOWRY. No.

Mr. FORDNEY. Does Mr. Spreckels donate all the expenses, pay all the expenses of sending out this literature? That is what you told us before.

Mr. LOWRY. He has been the only subscriber so far. (Pt. 41, p. 3379 of hearings, Dec. 9, 1911.)

* * * * * * *

CLAUS A. SPRECKELS, PRESIDENT FEDERAL SUGAR REFINING CO.

Mr. HINDS. Mr. Spreckels, you have been carrying on a campaign to reduce the tariff as beneficial to the cane-sugar refiners?

Mr. SPRECKELS. I have.

Mr. HINDS. Of course that will be damaging to the beet-sugar refiners?

Mr. SPRECKELS. To some extent it will. (Pt. 27, p. 2275 of hearings.)

* * * * * * *

Mr. HINDS. Now, Mr. Spreckels, it was testified in Washington that the movement for lowering the tariff on sugar, the movement which is going on now and in which you were interested, that your company had expended $12,000 for literature, etc.

Mr. SPRECKELS. Possibly. I do not know what the amount is. I dare say we have. (Pt. 27, p. 2276 of hearings.)

Nearly every day communications are received from Mr. Lowry. Here is one, Bulletin No. 34:

(Committee of wholesale grocers formed to assist in obtaining cheaper sugar for consumers through reduction of duties on raw and refined sugars, 138 Front Street, New York, N. Y.)

Reasons why the present "infamous" sugar tariff should be materially reduced, if not removed, at this time.

	Refined sugar.	Raw sugar 96° test.	Assessed difference per degree.
	Cents.	*Cents.*	*Cents.*
Present rates.....per pound..	1.90	1.685	0.035
Rates we propose.....do....	.624	.60	.005

Under reciprocity treaty importations from Cuba pay 50 per cent less in both cases.

Mr. Lowry's statements, I take it, must be accepted as pointed out in the brief, though necessarily humiliating to those whom he claims to represent, the wholesale grocers, and those who may have received, signed, and forwarded his literature. He testifies under oath that he is secretary and treasurer of the wholesale grocerymen's committee; that he was instrumental in organizing the committee; that he alone organized the committee; that no regular meeting was ever called; that he never had any other members of the committee together except as a personal interview; that somewhere in the neighborhood of $12,000 has been spent in distributing literature by that committee and that the only one that subscribed was the Federal Sugar Refining Co. His statement is corroborated by Mr. Spreckels, president of the Federal Sugar Refining Co., that he did not know what the amount was, but dared say $12,000 had been expended for literature, and so forth. According to this brief, Frank C. Lowry is a sales agent of the Federal Sugar Refining Co. No comment seems necessary.

As before stated, many are honest in their contention for free sugar. In my opinion, to put sugar on the free list, as the Underwood bill proposes to do May 1, 1916, will not only do harm, but will do exactly what the experts and representatives of the Sugar Trust, who testified before the committee, said that it will do—that is, it will destroy the sugar-beet industry in this country, and as a result of course additional millions will go to foreign countries to pay for sugar imported. Prices of American farms will go down, thousands of wage earners and producers of sugar beets will have to seek other employment, and I am afraid the price of sugar to the consumer will go up; but that is neither here nor there. The question of protection to American industries and labor has passed that stage, and argument along that line is simply a waste of time, as you have declared that it is not to be considered. Your party pledges are out; you promised free trade under the guise of "tariff for revenue only." You excuse your action on the ground that the people have spoken. The cure has been prescribed; the remedy is free trade. The bill puts sugar, together with many other farm products, on the free list. You promised free trade to the farmer; you have given it in spots. You put his products on the free list, especially in the Northwest. The grower of sugar beets is down and out and the Sugar Trust on top. The responsibility is on you.

Now, a word as to sectionalism and discrimination in this bill, so manifest from beginning to end. Far be it from my disposing this question in order to stir up sectionalism. No; I have glorified in the fact and believed that the last vestige of sectionalism was wiped out years ago and I regret exceedingly that it appears in this bill. The bill speaks for itself. Sectionalism? The gentleman from Tennessee [Mr. AUSTIN] and others say, "No." The bill says, "Yes." Discrimination? You say, "No." The bill says "Yes." As for instance, biscuits, bread, wafers, also wheat flour if coming from any country which imposes no duty on wheat flour imported from the United States, buckwheat and buckwheat flour, rye and rye flour, corn and corn meal, oatmeal, meats, fresh beef, veal, mutton, lamb, pork, and bacon, practically all produced up North, are on the free list; while down South cotton thread and carded yarn are protected by from 5 to 25 per cent ad valorem; cotton-card laps, 10 per cent; cotton waste, manufactured or otherwise advanced in value, 5 per cent; spool thread of cotton, 15 per cent; cotton cloth not bleached, dyed, colored, and so forth, from 10 to 27½ per cent; cotton handkerchiefs, 30 per cent; clothing composed of cotton, 30 per cent; shirt collars and cuffs of cotton, 25 per cent; cotton stockings and hose, 20 per cent; shirts, corset covers, and all underwear of cotton, 30 per cent; all cotton not specifically provided for, 30 per cent; peanuts or ground beans, three-eighths cent per pound; limes, oranges, grapefruit, and lemons, a duty of 18 cents for 1½ cubic feet, which to me looks like handing out a lemon to the North.

Your stock in trade before election was "Free trade, tariff is a tax." You promised that if you got in control you would tax the rich and relieve the poor. To tax luxuries and admit necessaries free of duty. What a relief and blessing it would be to the poor to pay 30 per cent ad valorem duty on clothing, on shirts, on corset covers, and on underwear of cotton grown down South. Certainly the poor will not object, as according to your theory they are luxuries and can be dispensed with. Certainly they will not object to paying a duty on fruit and food produced down South, as according to your views they are luxuries while the food produced up North is a necessity. They will have meats, flour, ham, and bacon free; what do they care about underwear, stockings, clothing, and corset covers? You say, "Nothing whatever," as you have declared them luxuries and previous free-trade legislation has proven your theory, as it is generally known the poor people did, in a large degree, get along without them under free-trade experience. You say "We tax the manufactured article and admit the raw material free." According to your philosophy peanuts and rice grown, oranges, lemons, and grapefruit picked from the tree down South are manufactured articles.

The fruit grower of the South picks the orange from the tree, packs it in a box, and carries it to the station. The grower of peanuts down South in Virginia picks the peanuts and delivers them at the station. They are protected by a high duty on the ground that their products are manufactured. The farmer up North furnishes the seed; he plants, cultivates, harvests, and thrashes the wheat, rye, and buckwheat. He takes it to the mill. It is ground and sold. He furnishes the seed; he plants, cultivates, picks the corn and feeds it to the hogs; and after 10 or 12 months' labor and care the hog is shipped and transportation paid, the hog is dressed, and the bacon and ham sold, according to your theory, as raw material. Your philosophy, logic, and conclusions, though difficult for me to comprehend, are not open for discussion, hence they must be accepted and submitted to, as your theory has been accepted, and power granted you to legislate and, according to your views, it will work out justice and happiness to all concerned. As before stated, I have no quarrel with anybody, with the South or the North. On the contrary, I give everybody credit of being sincere and honest, and my only object is to point out facts, and in doing so it can not be said that I reflect upon the integrity, motives, or judgment of any Representative. So far as I know they are all well-meaning gentlemen and loyal to the best interests of all the people. But nobody will dispute the fact that all men are more or less the product of their environment, and are more or less selfish and interested in that which concerns their own welfare and happiness. If Gen. Hancock's observation that the tariff is a local question is well founded, then it is fair to assume that all Representatives are most interested in their own constituents and their interests. If so, naturally the rights and interests of the farmers and manufacturers in one section of the country producing the things not produced in another section are not so well conserved when in the hands of those less interested in their welfare as if in the hands of those more directly interested.

With the manifest discriminations in this bill naturally one who is interested and in the dark as to the mysterious transactions in that secret Democratic caucus is led to ask, Why are the numerous articles extensively produced up North placed on the free list, or a sweeping reduction made, and the things produced extensively down South highly protected? As, for instance, in this bill the 6 cents duty on butter is cut in two, the 5 cents duty on eggs is reduced to 2 cents, while the 3½ cents duty on cocoa butter and cocoa butterine is left the same. Why was it done? Was it because Tammany Hall, the South Atlantic, and the South Central States, according to the census reports of 1900, produced less than 280,000,000 pounds of butter, while the North Atlantic, the North Central, and the Western States produced more than 1,211,000,000 pounds? Was it because Tammany Hall, the South Atlantic, and the South Central States produced less than 190,000,000 dozens of eggs, while the North and Western States produced more than 621,000,000 dozens of eggs that year? Was rye and wheat flour put on the free list and a duty of one-eighth of a cent per pound put on rice flour because rice grows in the South, while rye and wheat flour is produced in the North, or was it in the interest of the consumer?

Naturally, after studying the bill; agreeing with Gen. Hancock that tariff is a local question; taking into consideration the apparent discrimination in the bill and the fact that Representatives of the South and Tammany Hall were in a majority in the Democratic secret caucus, same as they always were and always will be as long as we have Democratic secret caucuses; knowing that they profess to believe that "tariff is a tax" and the removal or reduction of duties lowers the price; also knowing the fact that production down South is practically confined to cotton, fruit, rice, and peanuts, with the exception of sugar in Louisiana and cattle in Texas; and while believing that their Representatives were conscious of their duty and obligation to their constituents, a duty construed by many to mean the lowering of the price on that which they purchase; considering it all, naturally, one in the dark as to what took place in the caucus and committee, might conclude that possibly they might have stretched their conscience and resolved to put up the price on what they have to sell and lower the price on what they have to buy instead of giving high prices to the producer and low prices to the consumer as promised, also that Tammany, whose only business is politics, who had nothing to lose and all to gain, being of the same faith and also being in the market for butter, eggs, meats, flour, biscuits, bread, ham, bacon, and numerous other articles produced up North and not down South or by Tammany Hall, and, like the South, had none to sell, might have compromised their conscience to the extent of sacrificing the consumer to high tariff and high prices on that which they have to buy from the South and free trade and low prices on that which they buy from the North, and, in order to maintain the peace, brotherly love, and friendship that always existed between the two, for the good of the party they also concluded to sacrifice the cause to the extent of the consumer's going half naked, without cocoa butter and peanuts, rice, and fruit produced down South, and had, for the good of the party, joined hands with the South in the perpetration of the proposed outrage on the North, especially the northern farmer. If so, the interests of the North were sacrificed; and if so, the question is, Where and what were Democratic Representatives elected up North, sworn to do their duty to the country at large, including their own district—what were they doing and where were they?

How did it happen that the people who were so dear and near to them before election were left out in the cold? Why and how have they been sacrificed? If press reports are true, Democrats met in a secret caucus and solemnly pledged to support any tariff bill reported out of that caucus; that the Democrats from the North went in roaring like a lion, kicked, and found fault, but the South and Tammany, being 2 to 1 in that caucus, did the voting. As usual the South and Tammany Hall, always in the majority, did and always will run the party. Besides, the big stick had served notice "tariff first and pie after." The jig was up and our good Democratic friends from the North, notwithstanding the courage displayed before election, the promises made to their own dear and beloved people, were subdued and came out meek as lambs and never have they peeped since. Strange, indeed, notwithstanding their outstanding promises to guard and protect the interests of their district, 105 Democrats elected in the Northern States sat down in that caucus with 139 Democrats representing 18 Southern States, 31 Democrats representing the State of New York, the home State of the all-powerful Tammany, and 11 Democrats representing the State of New Jersey, the home State of the big stick. Not a 16 to 1 proposition, but about 2 against 1. It is reported that a few of the 105 found fault, kicked, groaned, and talked of bolting the caucus. Recently they had vigorously and bitterly denounced the vicious Cannon caucus system and the one-man rule; they had professed to be in sympathy with those of us who had fought for and succeeded in amending the rule and doing away with the caucus system. Some may have at times in the past voted to overthrow the one-man rule and dispense with the vicious secret and binding caucus, but there they were. With full knowledge of their being in a hopeless minority, they cheerfully and willingly sat down, submitting to the tying of their hands and feet and sealing their mouths forever. Here they now are in silence, dancing to the tune of the caucus, words composed by their leader, their spokesman, OSCAR UNDERWOOD. If reports are true, every one of the 105 will vote for the bill without the crossing of a "t" or the dotting of an "i," and their dear constituents in whom they had professed such a deep interest will pay the fiddler, and they are expected to pay the price regardless of cost without a murmur. If the dose shall prove bitter and heavy to carry they may rebel.

They will probably be obliged to change the tune from "My Dear Farmer" to "My Dear South and Tammany." Or if their downfall and desertion is due to the "pie counter" or lack of confidence in their own judgment and ability to protect the interest of their district, they will probably change their campaign speaches to "My dear deserted constituents, before election I loved you more than words can tell; I swore to protect you, but in my struggle for pie I fell in the tempter's snare and consigned you to the tender care and mercy of Tammany and the South, so generously guided and aided by the Big Stick," as undoubtedly their constituents will see more plainly than ever that under the vicious Democratic caucus system their Representatives are helpless as a babe in its mother's arms. They know that as long as their vote is dictated and voted by caucus combination and other interests they have no voice in this House; that they might as well vote directly for the leaders or those who control legislation as to continue voting for them indirectly. They know that as long as the Democratic caucus system is continued their Representative's vote will be dictated and voted by the combination. They know that under the Democratic caucus system the principle for which our forefathers fought and battled, freedom of thought and freedom of action, has been lost sight of. They know that their Democratic Representatives have lost courage; that they have turned their back on the reforms to make the House a representative body. They know that the taking the power away from the Speaker and giving it to another is simply a transfer of power, and that they still have a one-man power. That notwithstanding the fact that their Representatives hollered reform, found fault with autocratic power, assisted in the past in the overthrow of the autocratic rule which in a degree restored power to individual Members of the House, they have now gone back to the caucus and one-man power.

The people know that the power lodged in the chairman of a committee is as dangerous as that lodged in the Speaker. They know that under the Democratic caucus system their Representative's votes do not record their honest conviction, but necessarily the conviction of the majority members thereof and the conclusion of the caucus. They know that their Democratic Representatives did not stand for and assert their rights and they will undoubtedly judge them by their action.

I am no prophet and offer no prophecy, yet if you fail in your absurd philosophy, promises, or guaranty to the people to give higher prices to the producer and low prices to the consumer at one and the same time, if history should repeat itself, if wages and prices should go down, if meats, flour, butter, eggs, oats, and corn shall go down, if the factories and mills close, if again we shall find the farmers without a market for their products, the industries of this country on the verge of helpless bankruptcy, the railroads in the hands of a receiver, and—as alleged by Mr. Gompers—3,000,000 wage earners out of employment, as under the Wilson-Gorman bill, while some will undoubtedly contend, as they did then, that tariff had nothing to do with it, notwithstanding, I believe it fair to assume that, after the experience, the American people will conclude, as they did then, that confidence had been misplaced, and whether Republican legislation and administration had anything to do with prosperity and plenty under Republican rule or not, after reflecting, meditating, and comparing, they will undoubtedly resolve that Providence was a most generous giver under protection and Republican rule; that free trade and Democratic rule, as usual, swallowed them body and breeches, and that the trust got it all; and will ask to be delivered from the agony and mischief surrounding them and for forgiveness, judging from past experience.

Undoubtedly free-trade days will seem long to all of us, but our consolation is that the verdict will probably be that of the judge who decided the question, "resolved, that married men live longer than single men," who having had experience and having listened attentively to the eloquent and forceful arguments on both sides, reached the conclusion that married men live no longer, but that it seems longer.

The Tariff.

EXTENSION OF REMARKS
OF
HON. ANDREW J. VOLSTEAD,
OF MINNESOTA,

IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. VOLSTEAD. Mr. Speaker, this bill does not appear to be drawn in accordance with any general policy, but is clearly the result of compromises between different sections and different classes. In this contest of sections and classes it is clear that the farmers of the North and West received but scant consideration. The chief aim, however, of this bill, as expressed by those who stand sponsor for it, is to reduce the cost of living, especially the cost of farm products to the consumers in the cities. It is this feature of the bill that is especially urged in justification of it and that has received the most

enthusiastic applause. Our complaint that this bill is unfair to the farmer is met with the answer that this is a general bill to reduce all duties; that the farmers must take their share of the reduction, as it is necessary because the people in the cities need cheaper food; and it is said that the farmers are rich; that they ride in automobiles, and can stand the reduction. If this bill equalized duties so that each class would bear the same burden and reap the same advantages of the tariff, the farmer would not complain, but that is not the plan of this bill. It provides substantial duties on nearly all foreign articles that may come in competition with American products except the products of the farm, while the latter are nearly all free, or the duty on the competing foreign article is so small that it is of little or no value either for revenue or protection. The farmers in the North and West depend almost entirely upon the production of grain, meats, and dairy products for their support, nearly all of which are made directly or indirectly free by this bill. Hogs and all the products from the hog are on the free list. A small duty is left on sheep and cattle, but meats and all other products from these animals are placed upon the free list. A small duty is placed on wheat, but flour is on the free list. Potatoes, rye and rye flour, corn and corn meal suffered the same fate, and so does buckwheat and buckwheat flour. To be sure that even the industrious farmer's wife should not profit overmuch on her poultry, the duty on eggs has been reduced from 5 cents to 2 cents per dozen, and even live poultry had to come down from 3 cents to 1 cent per pound.

One of the most ridiculous features is that providing a duty on such articles as wheat, cattle, and sheep, while at the same time their products, such as flour and meats, are placed on the free list. If anyone imagines that he can deceive our farmers into the belief that such a duty is of any value he must place a very low estimate upon their intelligence. Instead of shipping wheat, sheep, or cattle, flour and meats will be shipped. No revenue can be realized under such a tariff, and it can not be defended without insulting the intelligence of those who are said to profit by it. Flour from foreign wheat will glut our markets and force us to sell ours at the world's price less the cost of placing it upon the world's market. Mutton from Australia, or beef from Mexico, Argentina, and other countries will enter our markets in competition with the products of American sheep and cattle. The duty on butter has been reduced from 5 cents to 2 cents per pound, and milk and cream has been placed on the free list. Free milk and cream practically removes this 2-cent duty on butter coming from Canada. Cream is now shipped from the Dakotas to Chicago and may be shipped from any section in Canada to American creameries. In speaking of wheat it should not be overlooked that the bill contains a provision that flour shall pay a duty of 10 per cent as against a country that imposes a duty on our flour. It is urged that this is in effect, under present conditions, provides a 10 per cent duty on flour. The object of this proviso is to induce other countries to remove their duty on flour; otherwise it serves no purpose. It holds out no temptation to a country that is compelled to import large quantities of flour for home consumption. Such a country can have free flour by removing its own duty, and has no reason to seek an opportunity to export flour to this country, as it has none to export. It is only countries like Canada and Argentina that can profit, and the provision must have been inserted for the purpose of inducing such countries to take advantage of it. The provision is in effect the same in regard to wheat and flour as the Canadian reciprocity treaty, and I suspect that the framers of this bill must have some reason to believe that Canada or some other like country will accept it. Mr. UNDERWOOD, the Democratic leader, in explaining the bill to the House laid special stress upon the fact that this provision would in effect give free flour.

The duty of 10 cents per bushel on wheat is not sufficient to afford protection to that industry. The principal market of the farmers in the great wheat-growing sections of the Northwest is New England, Pennsylvania, and New York. The transportation charges on this wheat from the farms in Minnesota and the Dakotas will average at least 20 cents per bushel. Wheat at the present farm price of about 75 cents per bushel in Minnesota must be sold in New York for about 95 cents. The farmers of Ontario, Canada, can pay the duty of 10 cents and still realize for their wheat several cents per bushel more than the American farmer in my section. Wheat from Argentina and other countries with cheap ocean rates may do the same. The reduction of the duty on barley to 15 cents per bushel will have the same effect. Ontario is especially well adapted for raising barley. The Ontario barley raisers can more than compete with the West, even though they pay the 15 cents per bushel, as the transportation charge that our farmers must pay exceeds by more than that figure the freight paid by his Canadian competitor. This narrow margin between the American and foreign market will permit importation of foreign grain at almost any time and make it certain that our prices will nearly always be the European prices less the cost of placing our grain on the foreign market.

To show what this means I submit a recently published article commenting upon a statement made by Mr. John G. McHugh, secretary of the Chamber of Commerce of Minneapolis:

Relative to the pending tariff bill and its probable effect upon wheat prices if it passes as it stands, Secretary John G. McHugh, of the chamber of commerce, has issued a statement giving the comparative prices for Minneapolis, Duluth, and Liverpool wheat, which shows, Mr. McHugh said, that the prices ruling in Minneapolis and Duluth are not made in Liverpool.

"Such a comparison is timely," he said, "as bearing upon the question of the proposed wheat and flour schedule of the new tariff law. It is frequently argued by those supporting the tax on wheat with free flour, as set forth in the bill, that this country, being an exporter of wheat and flour, prices are therefore necessarily made in this country on an export basis, and that the miller has nothing to fear from such a tariff change.

"Figures have been published showing the comparison of Winnipeg prices, on one hand, with Minneapolis, Duluth, and Chicago prices on the other, and from such figures it has appeared that the Winnipeg price is commonly much below the Duluth and Minneapolis prices, and that Winnipeg, therefore, was inclined to be on an export basis.

"Even a hasty examination will show that Minneapolis and Duluth are not on an export basis with Liverpool, and a careful examination will show how very far this is from being true."

The table follows:

Comparative prices of wheat.

First trading day.	Minneapolis, No. 1 northern, delivered.	Duluth, No. 1 northern, track.	Liverpool. Future.	Liverpool. England, current prices.	Liverpool. United States equivalent.	Approximate cost to take wheat in store, Duluth, and deliver in store at Liverpool.

"These figures show conclusively," says the statement, "that this country is not on an export basis and that prices of wheat as fixed in Minneapolis and Duluth are certainly not on the basis of Liverpool less the freight."

It is argued that the reductions contained in the pending bill will greatly benefit the public by reducing the price of articles that the consumer has to purchase. Upon the realization of this hope rests, I presume, the fortunes of the Democratic Party, but they must realize it and still maintain prosperity. Reduction in prices as the result of stagnation in business will not answer the purpose. I doubt very much that the consumer will profit in any marked degree by these promised reductions in prices. The present law made a substantial cut in the duty on lumber, but it did not reduce the retail price. Is there any reason now that a further reduction will be reflected in such price? I doubt it. The same law placed hides on the free list and almost took the duty off leather and shoes, still the consumer has paid as much and even more for his shoes since the reduction. The removal of a 40 per cent duty on 15-cent foreign wool is not likely to make a suit of clothes weighing 3 pounds sell for much less than it does today, though it may send our sheep to the shambles. Do you imagine that the consumer will get any very large part of the 16 cents which it is the purpose to save by cutting out this duty? The removal of duty from farm machinery is pointed to as a great boon to the farmer, though farm machinery is on the free list under the present law as against England. There has been no importation of farm machinery. The reason is plain. Farm machinery is cheaper in this country than in any other. This has been established by reports from our foreign consuls. It is fully confirmed by the Bureau of Corporations after an exhaustive examination and has been testified to under oath by officers of the International Harvester Co. The prices of farm machinery can not be affected by this bill.

I am not calling attention to these things as an argument in favor of the present law. I believe that law is in need of prompt revision. I am satisfied that it is too high in many respects. But if I have to choose between the present law and the pending bill, I am decidedly in favor of the present law. Under its provision the section that I have the honor in part to represent has greatly prospered. This bill clearly discriminates against agriculture and every one depending for his prosperity on that great industry. The cities can not prosper if agriculture suffers. The cry for cheaper food has written this bill. The cry comes from those who have infinitely more of the comforts and conveniences of life than those who produce the food. This is the American Cobden corn law. When by that law England made farm products free, the English farmer put an end to protection for the factories. Why should our farmers support a system of protection to the factory that necessarily enhances the price of the labor that he must pay in producing his crops and enhances the price of the products that he must buy while he is compelled to sell his own products in competition with the cheapest paid labor and the cheapest land in the world? Every protected country in Europe accords to its farmers a fair share of protection, though food products are higher there and labor receives less pay for toil. There is no good reason why in this country the farmers should be treated less favorably. There is no class of people that receives less reward for capital invested and labor expended than does the farmer.

The Tariff.

EXTENSION OF REMARKS
OF
HON. SAM R. SELLS,
OF TENNESSEE,
IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. SELLS. Mr. Speaker, it is not to be expected that much could be said in the short time allotted me for the discussion of this bill. Nor is it to be expected that anything which I might say, or that anyone might say, will in the least jot or tittle change or modify any of the provisions of what in my judgment is the most drastic free-trade bill presented to Congress within 50 years. I take advantage of the time accorded me merely to record my protest against this proposed legislation with the intention of utilizing the RECORD for an extension of my remarks so that the people of the first Tennessee district, whom I have the honor to represent, may understand my attitude toward this bill and know that I have resisted its unfair and unjust schedules.

I believe that I do not misrepresent the sentiment of this country when I say that the overwhelming majority of the people are disappointed—not to say outraged—over the Underwood bill. The producers of the country, manufacturer and farmer, had a right to expect more equitable treatment at the hands of the administration. I say they had a right to expect it, because it was during the campaign of 1912 promised them not only by Mr. Wilson himself but by Mr. UNDERWOOD and every Democratic campaign orator with a license to make promises for the performance of the party now in power. Time and again Mr. Wilson stated that no legitimate industry would suffer at his hands and that while the tariff would be revised, it would be done by gradual reductions extending over a long term of years, during which the business interests of the country would have ample time to adjust themselves to new and changed conditions. And now, in the face of these promises, explicit and unequivocal though they were, the American people recorded their verdict in favor of an adherence to the amply protective theory. Taft and Roosevelt, both of whom stood for protection, having received a combined plurality of the popular vote of more than one and a quarter millions. Mr. Wilson and his party are in power to-day not because they represent the ideas and convictions of the American voter, but merely because of an unfortunate situation which resulted in a division of their opponents.

All of us believed the Wilson tariff bill of 1893–1896 bad enough. Nobody now disputes it. Manufacturer, farmer, and laboring man suffered alike from its ruinous effects. And yet the Democratic majority, under the leadership of Mr. UNDERWOOD, and the patronage prod of the distinguished gentleman at the other end of the Avenue, proposes this bill, which, in general average, is 35 per cent lower than the rates contained in the Wilson bill. The gentlemen say that prices are too high and that this bill will lower them. I think no one reasonably well informed will gainsay that statement. The Wilson bill did it, and under its operation the farmer sold his wheat as low as 40 cents per bushel, cattle at 2 cents per pound, hogs almost as low, and the representatives from the great agricultural sections of the West and Middle West no doubt recall how corn was used for fuel, it being cheaper than coal at 15 cents per bushel. The sheep-growing industry was temporarily ruined, and it has never recovered from the blighting effects which resulted. There was no branch of agricultural industry which did not suffer, and with the memories of that era of low prices, of stagnation, and of ruin still poignant, the farmers of this country had a right to expect and demand fairer protection at your hands.

The Wilson tariff of 1896 provided an ad valorem rate on cattle of 20 per cent; the Underwood bill gives but 10 per cent. Horses had a protection of 20 per cent under the Wilson bill, and this rate, too, has been cut to 10 per cent. Exactly the same reduction has been made on sheep. On all live stock grown on our farms the Underwood bill, as compared with the Wilson bill, reduces the protection 50 per cent; as compared to the Payne tariff, the reductions range from 75 to 150 per cent. I submit herewith a table showing the ad valorem rates existing during 1896 under the Wilson tariff, in 1910 under the Payne tariff, and as proposed by the Underwood bill:

	Wilson.	Payne.	Underwood.
	Per cent.	Per cent.	Per cent.
Barley	30	45	23
Wheat	20	25	14
Butter	24	27	12
Cheese	28	34	20
Beans	20	28	15
Eggs	32	36	14
Hay	21	49	26
Apples, etc	20	22	8
Poultry, dead	24	28	18
Poultry, live	20	23	6
Buckwheat	20	24	Free.

There is scarcely an article in the whole list of agricultural products on which the tariff has not been either materially reduced or removed entirely, all of which leads me to inquire, What grievance has the Democratic Party against the American farmer? In these days of swollen fortunes no man has ever had the hardihood to say that the farmer was unduly protected, nor that he was receiving more than his proper and honest share of the rewards which his industry and frugality have earned him. He is the backbone of our civilization, the keystone in the structure of our Republic. In times of prosperity and stress alike a hundred million hungry mouths appeal to him for their daily food, and, be it said to his everlasting credit, he has ever gladly responded to the call. And yet, an examination of your bill would justly invite the criticism that the majority of this House regard him as a malefactor of great wealth, a unit in a great and lawless trust that menaces our institutions, instead of our chief and best benefactor. You let down the bars to the Beef Trust, which controls the cattle supply of the Argentine Republic, and invite his direct and ruinous competition with home-grown beef. To the sheep grower of Australia, where sheep are produced at less than half the cost in this country, you give a free and unrestricted market for his flocks. Through a removal of the duty on flour you ask the Canadian farmer, with his 30,000,000 acres of wheat land, unexcelled in the world for profitable wheat growing, and yielding 23 bushels on an average to the acre, to compete with the

American wheat grower, with a production per acre of but 15 bushels. "Oh," the gentlemen say, "we have protected our wheat grower, to some extent, by a tariff of 10 cents per bushel." Yes, I admit, but I would respectfully ask that you point out the protection for the farmer, when your bill provides for the importation of flour duty free. What has the American miller done to invite this unfair discrimination against his business and in favor of the Canadian miller? I have never heard it charged that the millers were in any combination in restraint of trade, nor that the profits of their business were unreasonable. My investigations have convinced me that their profits on flour per barrel do not exceed 15 cents.

I have here a full and complete report of the milling industry of the United States, made in 1910. It shows 11,691 establishments, with a capitalization of $347,152,000 and 66,054 employees. In salaries and wages they paid $33,981,000; for grain and other raw products, $767,576,000 or a total of $801,557,000. The total value of their products was $883,584,000, or a gross profit of but 11 per cent. out of which must be paid interest, taxes, insurance, maintenance charges, and other incidentals. I think I am within the truth when I say that the miller's net profit on his sales is less than 3 per cent. But notwithstanding this fact, and its truth is generally admitted, you have in effect levied a preferential tax upon him of 45 cents per barrel of flour and in favor of the Canadian miller. Under your free-flour provision the farmer's protection on wheat is not only taken away, but the milling industry, more especially along the Canadian border, will be ruined.

I have never received any explanation of these inconsistencies. To my mind they are not only unfair, but idiotic. They demonstrate your inability and unfitness to draft fair and wise tariff legislation, and lead me to say to you, in the same spirit that actuated the construction foreman to say to the Dago laborer, "Put down that wheelbarrow; what do you know about machinery?"

You say that you are going to reduce the price of living in this country; that you are going to provide a free market basket for the laboring man. The question is, What will there be in the basket? I think you tried this once before, in 1893. You provided free soup, but your bill of fare made no further provisions, and our laboring man did not appreciate the diet. It might suffice in those days, when there was nothing to do, but when the Republican Party in 1896, under the leadership of McKinley, gave him labor to perform at good wages, he found your free soup insufficient and demanded and received three square meals per day out of the abundant prosperity.

Nor is this all. In 1894 he had to his credit in the savings banks $1,777,000,000, which had grown in 1912 to $4,452,000,000, an increase of more than 250 per cent. In 1904 the total number of wage earners employed was 4,251,613, and their wages amounted to $1,891,228,331. In 1910 the total number had increased to 6,615,046 and their wages to $3,427,037,884. During the period of the Payne tariff, as compared to a similar period of the Wilson tariff, the number of wage earners increased 2,363,433, a gain of about 50 per cent, while their earnings increased $1,535,809,553, a gain of more than 80 per cent. Their average daily wage increased nearly 20 per cent.

And yet in spite of this record of prosperity and achievement the professional agitator and political demagogue have prejudiced the mind of the laborer against his employer; have deceived him into the belief that he is poorly and ill paid and does not properly share in the profits of his industry. Ninety-nine per cent of the men who make that statement never earned a dollar by honest toil themselves nor furnish employment to labor to earn it.

Democrats on the floor of this House have stated that the Republican Party is a party of unjust privileges and that it offers opportunity to the few at the expense of the many. I have always held to the belief that the interests of the manufacturer, the farmer, and the laboring man are so closely interwoven as to be practically identical. It is the experience of this country that their prosperity and material well-being are inseparable. And he who would array one class against the other or disturb that confidence and spirit of fellowship that has existed among and between them throughout our Nation's history is a demagogue, a charlatan, and an enemy of his country and its institutions.

That statement, now threadbare, that "the rich are growing richer and the poor poorer" has been chanted by the gentlemen on the other side of the House like a funeral dirge. Half of them honestly and ignorantly believe it; the other half dishonestly use it to further incite class hatred and to prejudice employee against employer. No figures have ever been given as a basis for such a statement. I have examined with care the reports compiled by the majority members of the Ways and Means Committee to accompany this bill, and they are exceedingly voluminous. There are, according to this report, 268,491 manufacturing establishments in the United States, with 7,678,578 employees and a total capital of $18,428,270,000. The value of their manufactured product yearly is $20,672,052,000, while the cost of materials used, with wages and salaries, reaches the sum of $16,508,404,000, leaving a gross profit of a little more than $4,160,000,000, or about 20 per cent. Out of this, too, must be deducted all fixed charges, fuel, rents, interest, taxes, and so forth. In only one instance have I found what is clearly an exorbitant profit, and that is on the manufacture of agricultural implements, which shows a gross profit of nearly 50 per cent. I commend the gentlemen for placing these implements on the free list, though I doubt seriously that it will result in a lower cost to the farmer. I believe that your efforts to regulate the trusts by a reduction in tariff rates can only result disastrously to legitimate business and with no corresponding benefit to the consumer. It is true that you may cheapen prices; financial panics and business depression always have that effect, both of which have invariably followed your efforts to revise the tariff. And upon what hypothesis do you base your conclusions that the results will be different now? In cheapening prices you must necessarily cheapen labor. If you put our manufacturers upon a competitive basis with foreign manufacturers, you must necessarily put American labor in competition with foreign labor, with an equalization of the wage scale in all the unprotected countries of the world.

And this means not only a reduction in the American rate of wages, but it means a lowering of the standard of living of our wage earner, and a decrease in his ability to educate his family, and to properly shelter, clothe, and feed them. The Tariff Board, which in 1911–12 made a comprehensive and thorough study of Schedule K, both in this country and abroad, submitted to this House an interesting report which illuminates the subject of relative wage scales in this and foreign countries. According to their report the most highly skilled operatives in the woolen factories of England and Germany receive a maximum weekly wage of $4.50 to $6.50, as compared to $14.50 in this country. And the wages of the less skilled operatives decrease in about the same ratio, and in every instance they are from 50 per cent to 75 per cent higher here than abroad. The difference in the cost of manufacture is about the same, proving, in my judgment, and beyond all doubt that if, as President Wilson has said, we must invite the foreign manufacturer to share our markets with us, we have but one of two alternatives to choose, viz, lower wages, or go out of business.

America ought to be for Americans, and Americans for America. I voted in this House but recently to keep out of this country the illiterate and vicious foreigner, and I did it from patriotic impulse, and I expect to act with the same patriotism when I vote against this bill. Foreign paupers and the product of foreign pauper labor are alike undesirable.

This bill strikes a deadly blow at the industrial development of the South, as fair a land as God's sun in heaven ever shone upon. Fifty years ago this was a barren waste, devastated by the ravages of a cruel war. Her slaves were freed, her credit gone, her entire industrial fabric destroyed. Her sons, heroic in war, were none the less heroic in peace, and with courage, energy, and prophetic vision they set about rebuilding her broken and crumbled fortunes.

History contains no record of a braver or more persevering race. Out of the ashes of her desolation have sprung beautiful cities, throbbing with the energies of a new industrial life. Her battle fields, reddened with the blood of her heroes, have been converted into fertile farms, potentially capable of furnishing food for a nation, and cotton for the manufactories of a world. Her deposits of coal and iron remain practically untouched. She possesses the hardwood timber supply of the continent. The process of her development has but begun. She is now but casting aside her swaddling clothes as she prepares to fulfill the prophecies of her fathers. I am proud to stand in this body as one of her Representatives; Republican though I am, every heart throb is for her and her people. I am bone of her bone and flesh of her flesh, and may God forget me when I forget her or falter for a moment in her service.

In spite of the fact that the South has been unwavering in her allegiance to the Democratic Party, the protective idea meets with her people's approval. They have remained loyal to you because of their traditions and the bugaboo of negro equality, a proposition that no red-blooded American has ever for a moment seriously considered. There is no section of this Union where protection is more needed and demanded. And notwithstanding the solidity of the support which the representatives of that section are giving this bill, I still maintain that they are in reality misrepresenting their people, and that the effect of this bill, when enacted into law, will be more injurious to the South than any other section of the country.

The pendulum of our prosperity swings to and fro. Its momentum may be accelerated or impeded by national legislation. Nothing can stop it altogether. But, in my judgment, the evil effects of this legislation, even at this time being felt in the business world, will create such a revulsion of sentiment as to sweep from power the party responsible for it. I am neither a prophet nor the son of a prophet, but he who is familiar with the history of tariff legislation in this country and the depression invariably following in the wake of radical tariff reduction does not need to be a prophet to foresee widespread disaster in the industrial life of the Nation as a result of your ill-advised and misdirected efforts.

The Tariff.

SPEECH
OF
HON. HENRY BRUCKNER,
OF NEW YORK,
IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. BRUCKNER. Mr. Speaker, as a new Member of this body, coming fresh from the homes and firesides of the people, I have listened with much interest and amusement to the wails and cries of the Republican calamity shouters, predicting all sorts of disaster if the Democratic tariff bill introduced by Mr. UNDERWOOD becomes a law.

They have been painting pictures of poverty, misery, hunger, and starvation, with scenes of long bread lines for the poor and the destitute, begging bread to keep their families from dying from hunger, soup houses on every corner giving soup to the lowly and miserable, upon which they must exist until the next four years have elapsed, when the country will once more be restored to the Republican Party by the voters of this land, when the bread lines and soup houses will be wiped out, and once more we will be in the land of plenty.

As I listened to all this talk I wondered why it was that it had taken the Republican Party until now to discover all these things. Is it because the affairs of the Government have been taken from them? Is it because they feel that at last we have put the right foot forward and that the Democratic Party will redeem the continued pledges made to the people and give them what they have so long desired?

In 1910 the people had their first opportunity to repudiate the party that had failed to keep its pledges, and elected a Democratic Congress by a large majority.

The first act of this Congress was to pass a tariff bill in schedules, giving free meat and bread to the hungry, free lumber to the poor man to build his hut, free bagging and ties to the southern farmer who needed bagging and ties for his cotton, and free farming implements to the farmer. This bill passed the House of Representatives and a Republican Senate, was sent to President Taft for his approval. What happened? It was promptly vetoed.

In 1912 the Republican Party once more wrote in their platform a tariff-board plank, but the people were aroused; they thought of the words of Lincoln, "You can not fool all the people all the time." They knew that they had been fooled, and therefore refused to listen to their further pleadings. They said: "You have had your chance for 16 years. You have been promising us tariff reform; we cared not how we received it, whether by a tariff board, a Congress, or by a President. You had the opportunity, but you failed to keep your word."

The reason why the people repudiated the Republican Party was that it stubbornly fought and resisted all reasonable reform. They failed to move with the times. This is a progressive age, and the world moves in the direction of progress. The Republican chieftains could not adjust their views to modern schools of thought. They wanted to do things their own way and not the way the country wanted things done. It was the old game of delay—wait—but the people would not be denied; they gave the command "Forward, march."

The Democratic Party listened to this command; is ever ready to take the orders of the people and proceed now, as it has always proceeded, upon the doctrine which our political founder, Jefferson, planted his faith, "Equal rights to all, and special privileges to none," with no protection for the favored classes, to the detriment of the unfavored masses. We have heard much from these calamity howlers about the destruction and ruin to business on account of this tariff. Personally, as a manufacturer on an extensive scale, I have no fears, as my confidence in the American people is still firm. This cry, "Stop thief!" "Stop thief!" has been heard so often in this country that it no longer alarms sensible people. It is an effort to alarm and frighten honest, legitimate business into the belief that the Republican Party is the reservoir of all their prosperity and the advent of Democracy is the harbinger of shrinking profit and demoralization of business.

We have heard so much about shriveling industries, smokeless stacks, deserted farms, and dollarless banks that are to follow the enactment of this tariff law that it clearly demonstrates that it is their old policy of trying to fool the people. But, thanks to the intelligence and wisdom of the American people, this cry of fear will find no response in their hearts.

What has been the result of the Republican protective tariff? It has created trusts of enormous magnitude; fortunes unheard of less than a decade ago are nothing to-day in comparison to the enormous profits of these groups of men who have been receiving special legislation in return for their campaign contributions. We have seen the rich grow richer, men rolling in wealth; we have seen poverty and desolation increase in the homes of the toiling masses, and the burden of assisting them falling upon the middle classes rather than the rich. We have seen a few rich men pile up fortunes through the kindness and generosity of special legislation until they have become so rich that in order to soothe their troubled consciences they have endowed colleges and libraries. We have seen the enormous wealth of our country centralized in the hands of a few to such an extent that it is said now that 90 per cent of the total wealth of this Nation is owned by less than 10 per cent of the people. But, thank God, under new conditions as we propose, we hope this wealth will be more equally divided when we get back to the old principles of "equal justice to all and special privileges to none."

The day of class legislation is passed. The day that special and favored interests are to have a preference and advantage is now history, which will not be repeated while the Democratic Party is in power. These men, who had immense influence with the Government as well as special advantages and protection, must meet their less-favored brothers on an equal footing.

The people make just one request in this matter of tariff legislation. They ask justice, and they are determined to secure it. They demand that the tariff be so adjusted that its benefits will be equally bestowed upon all the people of this Nation and not upon any special class.

The Democratic Party is pledged by its platform not alone to fix the tariff rates, with the sole purpose of producing revenue for the Government, but to fix them in such a way so as not to destroy or injure any legitimate industry.

It is not the purpose of the Democratic Party to destroy any industry; it is anxious to carry out its pledges made to the people and reduce the tariff on the necessaries of life, thereby lessening the burdens of the toiling masses. It has been said by the Republican Party that a lowering of the tariff rates will react unfavorably upon wages. Since when has the Republican Party, this party of the classes, become so solicitous about the laboring masses?

During the past 16 years that they have been in power they have been too busy catering to the men of high influence and finance, as well as the owners of the great protected monopolies who are grinding the life's blood out of the poor laboring man, that they did not know he existed. Now they have seen the error of their ways and realize that the man of labor has had his eyes opened to conditions, and they are trying to fool him into the belief that it always has been their aim and desire to see that he has always received the benefits to which he was entitled under a protective tariff, namely, higher wages.

It seems strange to me that in the highly protected cotton industry of New England, which has always enjoyed the benefits of the high protective tariff, meant, as they say, to create high wages, a workingman is unable to earn enough to support his wife and family unless he is assisted by his wife, who should be at home attending to her household duties, or his children, many of them under age, who should be at school acquiring knowledge so that they would be able to go out into the world equipped with an education to prepare them in their struggle for success competing with the sons of the rich. What has hap-

pened there just recently? To the great disparagement of the Republican Party the people of this highly protected community have spoken in reply to their appeal by electing a Democratic Congressman, pledged to a downward revision of the tariff, to succeed Representative JOHN W. WEEKS, who resigned March 4 to enter the United States Senate.

This Democrat was elected on the 15th day of April, 1913, seven days after the Democratic Congress had convened in special session and the Democratic tariff bill had been introduced in the House of Representatives and was being considered, demonstrating only too plainly that the people of that section, particularly the section of Massachusetts comprising the thirteenth congressional district, which takes in part of Suffolk, Norfolk, Middlesex, and Worcester Counties, are no longer willing to be fooled, but that they had every confidence in the Underwood tariff bill and the Democratic Party.

The unusual thing about this election was that this district was carried by Representative WEEKS, a high-protection Republican to the Sixty-second Congress, by a majority of 4,341, while 33,733 votes were cast in that election, but Hon. JOHN J. MITCHELL was elected to succeed him by a majority of 4,148, receiving 12,991 votes, against 8,843 for Cutting, Republican, and 5,678 for White, Progressive, in the 27,512 votes cast, which were within 5,000 of the number of votes cast in the presidential election of November 5, 1912, in that congressional district, demonstrating at this special election the voice and sentiment of the people of this section of New England, always heretofore represented by a high-protective-tariff Republican, that they were tired of being humbugged.

Now, the Republican Party is crying for the rejuvenation of the Tariff Board. Why this, may I ask?

They wrote the Dingley bill without a tariff board. They wrote the Payne bill without a tariff board; and it was after the people of the country repudiated and drove them from power that they came before this House and openly declared and confessed their ignorance of legislative ability to write a revenue measure that was fair to the American people. When in the zenith of power tariff boards were most remote to their minds, and our answer to their prattle is this great tariff bill, which I know will be a great benefit to all the people of this land who want a square deal, of which we hear so much and see so little.

What are the main features of this bill?

SUGAR.

A commodity used in every American home.

We propose to reduce the tariff to about 1 cent a pound and at the end of three years to put it on the free list. As an extensive user of sugar in my business, I know for a fact that sugar always advances about 20 per cent about August 1, which is generally known as preserving time, when it is in great demand. I often wondered why this advance, and the only answer that I could get was that the Sugar Trust always advanced the prices at this time and established a zone system to carry out the same. I wondered, too, if the wages of the men in the refineries were advanced with the price the consumer paid. If not, then the fallacy of the argument that the Republican Party has put up, that the higher the cost of things correspondingly advanced the wages of the workingmen, is well proven. For the first time in 20 years the price of sugar did not advance at preserving time last year—I mean 1912. Why? Because the Sugar Trust thought that it could once more bunco the people and lead them to believe that the price of sugar was down, and perhaps it would be forgotten during the campaign. I can truthfully say without contradiction that sugar to-day is as cheap, with one exception, as it has been in 20 years. I ask in all fairness, Why is the price so low at present? Because the Sugar Trust thinks by keeping the price low during our deliberations perhaps, by some way, the duty will be retained. But they are too late, and the people will not be denied.

Sugar is a product that must be grown in a tropical climate. It is a product that can not be forced under disadvantageous conditions, although the plantations of Louisiana have been working at this disadvantage for many years, and it is utterly impossible, all things being equal, for them to produce sugar as cheap as it can be produced in Cuba, Hawaii, the Philippines, and other tropical climates.

If the good people of Louisiana would take the rich soil of their State, plant cotton, grain, vegetables, for which their land and climatic conditions are admirably adapted, they would gather much more revenue on their investments, and hence would not need special protection to keep alive an industry which the God of all nature has long decreed can not longer exist in their land.

The people of Louisiana admit that they can not produce sugar for less than 3½ cents a pound, while experts claim that if the Philippines can get modern machinery there and modern transportation to the sugar fields the Philippines alone can produce all the sugar the world can consume at a lower cost price than any country on earth.

Another disadvantage in Louisiana is that they are compelled to plant every year and cut the cane in October, before it is matured, to keep it from freezing. In the other great sugar-producing countries, where there is no frost, they plant once in 10 years; hence it can easily be seen what a tremendous advantage these other people have. It is just about as absurd to try to plant sugar in our country, to compete with the natural conditions of these tropical countries, as it would be to grow oranges, bananas, and pineapples in New England.

WOOL.

Free wool is another commodity that will enable the poor man to properly and decently clothe his family, and give them a chance to wear good clothes at a fair price.

MEAT.

Free beef, veal, mutton, lamb, pork, and meats of all kinds will enable the people of the poorer classes to enjoy meat at least once a day, a luxury that is impossible in any other land.

NECESSITIES.

Flour, the chief component part of the staff of life, the great product that keeps body and soul together, consumed in every American home, containing all the nourishment for sustenance, is well merited to be placed on the free list. These are the necessities of life that have been placed on the free list, together with coffee, hides of cattle, boots and shoes, milk, salt, as well as many other things, which demonstrates only too plainly that the Democratic Party will carry out all its pledges made at the last election to the people to the very last letter.

THE LUXURIES.

Consistent with the Democratic policy that the business enjoyed by the rich should be taxed we have placed a duty of 45 per cent on automobiles, so that those who would be extravagant and want to ride in a foreign-built car should pay for that privilege. For those who are not content to use the domestic product we have placed a duty of 40 per cent ad valorem on perfumed soap, 60 per cent on cologne, 50 per cent on fancy china, 30 per cent on opera glasses, 45 per cent on lace curtains, from 20 per cent to 35 per cent on carpets, 50 per cent on velvet ribbons, 50 per cent on billiard balls and poker chips, 60 per cent on precious stones, and 60 per cent on laces, maintaining and contending thereby that those who would have these luxuries should help defray the expenses of the conduct of our Government by paying the tribute as set down in this tariff bill.

THE INCOME TAX.

Mr. Speaker, as a matter of principle I believe in an income tax. The poor people of this country for more than 100 years have been bearing the burden of taxation. Upon their shoulders has fallen all the unfair demands to pay the expenses of our Government. No matter what idea or form we may conceive to raise revenue to defray the expenses of our country, the burden always falls most heavily on the people who earn their bread by the sweat of their brow.

The men who were most able to pay have always escaped the burden of taxation, and those who were least able to do so were always carrying the heaviest part of the load. Only those who have property on which a tariff can be laid can ever hope to share the benefits; but the wage earners, the toiling masses, composing about 75 per cent of our population, bear the major part of taxation; and yet these same people never get a chance to share in the benefits of such taxation. The income tax stands out in bold relief, declaiming that it is high time that the unequal burdens of taxation shall no longer be placed upon their backs, but placed where they properly belong—upon the backs of those who can well afford to pay in proportion to their incomes. I hope that those who will have charge of the collecting of this revenue will be alert, vigilant, and see that all who come under the provisions of this law shall pay their just share of this tax.

I hail the income-tax law as a harbinger of all good to the people of America—a relief to those who have been bearing nearly all our burdens in the past—and think that any and every person who comes under the provisions of this law should thank God that He has been merciful and generous to place each of them in the position where his income is so large that he can pay a part of it to this great Government to help pay its legitimate expenses, and at the same time relieve his less fortunate brothers.

The Democratic Party faces this new condition with all confidence and hope. It craves the indulgence, for a little while, of all good citizens, and it will do its best in honest, faithful, and diligent service to satisfy all reasonable expectations.

Necessity for Adequate Protection for the Manufacturers of Carpets, Gloves, and Glove Leather.

EXTENSION OF REMARKS
OF
HON. SAMUEL WALLIN,
OF NEW YORK,
IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. WALLIN. Mr. Speaker, supplementing my remarks on the bill to raise revenues for the Government (H. R. 3321), permit me to give here some reasons why adequate protection to the manufacturers of carpets, gloves, and glove leather is necessary and should be given.

CARPETS.

Herewith are given a few facts regarding the carpet industry, which should, I believe, appeal to every reasonable man:

That the amount of capital invested in the manufacture of floor coverings in the United States is approximately $75,000,000;

That the industry gives employment to 40,000 persons, mostly skilled laborers, who are better paid than the employees of any other branch of the woolen industry;

That the wages of operatives in carpet mills in the United States are two and one-half times higher than the wages paid for similar labor in any other country;

That the carpet weavers of the United States are more steadily employed than those of any other country;

That the value of the annual production of floor coverings in the United States is approximately $75,000,000;

That the prices of floor coverings to consumers are fully 50 per cent less than they were 40 years ago, as will be seen by the prices of the following varieties of carpetings in—

	1875	1910
Wiltons	$3.25	$2.10
Brussels	2.00	1.15
Tapestry	1.15	.67½
Axminster	2.00	.90
Ingrain	1.05	.52½

That the present duties are barely sufficient to measure the difference in the cost of labor at home and abroad; and

That the present duties have not enabled the manufacturer to make more than a fair return upon his investment, nor have they resulted in the creation of a monopoly or so-called trust in this branch of industry; the manufacturers (about 140 in number) are independent of each other and are scattered through the New England States, New York, New Jersey, and Pennsylvania.

SOMETHING ABOUT THE CARPET INDUSTRY.

There is perhaps no industry in this country showing a more marvelous growth than does the carpet industry. A half a century ago more than 90 per cent of all the carpets consumed in this country were imported, while to-day more than 90 per cent consumed here are manufactured at home. In 1850 it was estimated the amount of capital employed in the carpet industry was about $4,000,000, and the value of the product about $5,000,000, while to-day it is estimated that not less than $75,000,000 are invested in the carpet industry, and the value of the product is not far under $75,000,000. In speaking of the carpet industry is also included the rug industry. There has been no time in the past decade when more carpet or rug looms were in operation or labor more steadily employed, and the industry has acquired such strength that the expression "carrying carpets to Kidderminster" has become almost as familiar as "carrying coals to Newcastle." The inference, however, must not be drawn from this statement that the carpet industry no longer needs the fostering care of a protective tariff. On the contrary, the wonderful growth in this industry is due more largely to the protection afforded by tariff legislation than to all other causes combined.

WAGES HERE AND ABROAD.

In meeting foreign competition the carpet manufacturer is obliged to face the wages paid abroad as compared with the prices paid labor in this country, and it is one of the serious problems forced upon him. The following figures, drawn from the most authentic sources, show this situation more eloquently than any other method:

Body Brussels carpet: Weaving, per running yard, United States, 8 cents; abroad, 4½ cents.

Wilton carpet: Weaving, per running yard, United States, 13½ cents; abroad, 8 cents.

Chenille, Axminster: Weft weaving, 74 strip, per running yard, 5½ cents; abroad, 2 to 3 cents.

Rugs: Weaving, per running yard, 9-feet width, United States, $1.25; abroad, from 29 to 43 cents.

Tapestry: Printing, 864 stripes per drum, United States, 4¼ cents; abroad, 18 cents. Winding, per 100 hanks, United States, 50 cents; abroad, 18 cents. Setting, per beam, United States, $12.25; abroad, $3.55.

Axminster: Average wages for one week per girl, United States, $15; abroad, $2.50. Setting, average wages for one week per girl, United States, $13; abroad, $5. Weaving, per yard, United States, 5.2 cents; abroad, 2.1 cents.

GLOVES.

In the county of Fulton, N. Y., most of the gloves manufactured in this country are turned out. An entire county is dependent alone on this industry. The proposed rates in this bill have caused consternation among not only the manufacturers but among the thousands of people interested whose livelihood is dependent upon the stability and success of this one line of business. They have united in a protest to Congress and the President against the enactment of a schedule of duties such as is pending here. Former Congressman Littauer, in an interview in the Leader-Republican, of Gloversville, points out the dangers in store for this community should this bill in its present form, so far as the glove schedule is concerned, be enacted into law. He says:

The Underwood tariff bill proposals are of such serious moment to the glove manufacturers of Fulton County that it behooves them to consider carefully its provisions that they may realize how their established manufacturing business is now in jeopardy.

The proposals are for a tariff which has no purpose in the glove trade except to raise some revenue for the Government from importations, and the effect is practically the same on the American glove industry as though gloves were placed entirely on the free-trade basis.

Leather is reduced from 20 per cent to 10 per cent, and, consequently, manufacturers must pay duty on leather they cut into gloves of between 40 and 50 cents for each dozen of gloves.

It is proposed to place a duty of $2 per dozen on men's gloves instead of $4.80 of the present law, a reduction of $2.80, which, however, will be lessened, because of reduced duty to be paid on leather from 20 per cent to 10 per cent, of 40 cents per dozen gloves, making the actual reduction $2.40. This reduction of $2.40 will, from the other standpoint, leave but $1.60 protection on men's gloves, allowing 40 cents to be paid for duty on leather.

One dollar and sixty cents does not balance more than one-half of the difference paid between the wages in this country and the average wages paid in Europe, and consequently places the future of the glove business in extreme jeopardy.

A man's glove sold to the consumer at $1.50 per pair is sold by the manufacturer at $13.50 less 6 per cent per dozen. A similar glove of very good quality high-grade leather and well finished can be bought in Europe at $8, and with the $2 duty to be paid can readily be sold to drive out the American article.

The men's dollar glove is now sold at $9.50 less 6 per cent per dozen, or about $9 net; a similar glove can be purchased in Europe from $6 to $7 per dozen, so that with the proposed rate of duty it would cost to land in New York between $8 and $9, and place the entire men's glove business in jeopardy.

The only ladies' glove business that is of large account to the American trade is the ladies' cape outseam and prixseam glove, which sells for $1 a pair or less, and which in the past has paid a duty of $3.30, now to be reduced to $2, a reduction of $1.30, less the 30 to 40 cents which the reduced rate of imported leather amounts to.

The average value of ladies' lambskin gloves, imported into New York during 1912, was $5 per dozen, to which add the new duty of $2, and we have $7 glove, which will drive out the ladies' $1 glove now being manufactured here in such large quantities.

I trust I have been able to make clear to you the exact position in which the threatened Underwood tariff would place this community. It demands that every workman and every workwoman in the glove trade, every storekeeper, every householder, or, in other words, every one in this community should arouse himself to a thorough appreciation of the threatened danger, which is more destructive to this community than the floods a few weeks ago were to our brethren in Ohio. In every walk of life the ministers, doctors, lawyers, bankers, as well as glove manufacturers are threatened with dire disaster through the proposed industrial revolution, and they should fight against it as they would against an attempt to steal their means of livelihood.

WHAT ANOTHER MANUFACTURER SAYS.

Joseph E. Wood, of Gloversville, a prominent manufacturer, writes of the situation in Fulton County to the editor of the Journal of Commerce as follows:

SIR: The term "competition" has been used before Congress, viz, "Real competition between the manufacturers of Europe and those of the United States." I think this is a wrong interpretation. The competition is not between manufacturers, but absolutely between the workingmen of Europe and the workingmen of the United States. No manufacturer in either country will use his money and brains in manufacturing unless he can so hire his help that he can compete with the other countries. Hence, tariff reduction means nothing but a reduction in wages. You can not make manufacturers hire help and do business at a loss.

Gloversville and Johnstown, in fact the whole of Fulton County will be wiped off the map. They exist on their glove and leather factories, of which there are over 200 in the county.

Gloves.—Under a duty of $2.50 they could not make ladies' gloves. If they could not make ladies' gloves, how could they make men's gloves under a $2 duty? They must close their factories. A $4 duty would only allow the glove manufacturers to exist.

Glove leather.—We make only one-twentieth of the fine leather used under a 20 per cent duty. Our mills must close under 10 per cent.

Can the workingmen stand the reduction called for by the Underwood bill? In Gloversville and Johnstown it means at least a cut of from 37½ per cent to 50 per cent in wages for glove cutters.

During the last five years I have traveled 100,000 miles through the different countries searching for skins at their lowest prices to compete with foreign manufacturers, and I have carefully studied into the working conditions of these countries.

I find in England over 1,500,000 people out of work and wages 60 per cent lower than in the United States.

Germany, wages 50 per cent lower.
Australia, wages 75 per cent lower.
Italy, 35 cents a day for good men.
Japan (girls), 8 cents a day on American cotton machines.
China, 15 cents a day for miners.
Without duty can our manufacturers compete with these wages?

In your editorial in the April 10 issue you again bring out "effective competition." My leather company has actually tried effective competition for five years under 20-per-cent duty. We have never been able to pay a dividend, because we paid our beam hands $2.25 and stakers $2.50. Our 20 German competitors, with agencies selling leather in our city, were paying beam hands in Germany 4 marks, or 96 cents, and getting two dozen more skins per day from them than our men would do for us. They were also paying their stakers 4 marks, or 96 cents, instead of $2.50, and we could not show a profit with this "effective competition."

Now, under the new bill we get 10 per cent, which is an order to close our factory. We have cabled our Capetown house to stop buying. What can an American company do? Just ship our machinery to Austria, where we can get all the men we want at $4 a week. We can then undersell all American firms. That is English free trade. Put men out of employment in their country and put them to work in other countries. You can not make prosperity in a nation by forcing wages down and workingmen out of employment, or by closing up factories. If this bill is signed as written it will mean 2,500,000 men out of employment inside of two years.

I know from what I have seen that our workingmen can not compete, and I do not believe the people voted to kill our industries, as this bill surely will. Every trade should storm Washington and bring the Congressmen to a realization of conditions. Workingmen and manufacturers should unite to save our industries.

Very truly, yours,

JOSEPH E. WOOD,
President Wood & Hyde Co.

GLOVE LEATHER MANUFACTURERS.

A business which will be killed if the present duties on gloves are lowered, and which will also meet its demise if the proposed tariff on glove leathers is put into effect, is that of the manufacture of fine glove leathers. In the first place it is dependent, of course, on the success of the larger industry of glove making; and, second, should that industry be able to exist under lower duties on foreign-made goods, it would be forced to abandon business because of the competition from abroad under a lower duty. The manufacturers of these leathers set forth their own case in a brief, which follows:

The glove-leather manufacturers respectfully urge that no change be made in the present tariff so as to affect the manufacture of glove leather. The tariff under section 451 of the tariff act of 1909 fixes a 20 per cent ad valorem duty on all glove leather imported into this country.

This tariff duty is not prohibitive and is no more than sufficient to allow the continuance of this industry under the wages paid and prices for materials that go into the tannage of glove leather in this country. That it is not prohibitive is shown by the fact that during 1911 and 1912 75 per cent of the fine glove leather used in this country was imported. This leather was valued at $1,791,260, upon which a duty of $358,252 was collected. It is impossible to give the figures on the importation of glove leather prior to the above date, inasmuch as glove leather was classified with other leathers, nor can statistics be given based on dozen lots, as the revenue tax is not fixed on glove leather by the dozens, but on the basis of hundreds. This method is adopted by European manufacturers of leather, while the American manufacturer of leather uses the dozen skins as the unit of count. Under it the American manufacturer has no way of checking by the dozen.

The manufacture of glove leather is not in any wise controlled by a trust or combination, but is a highly competitive business. There are 40 separate establishments manufacturing glove leather in Fulton County, State of New York, alone, besides many others in other parts of the country. Each of these 40 concerns in Fulton County are establishments entirely independent of each other and all are competitors, so there are no interlocking directors or other arrangements whereby various separate establishments are controlled.

The investment in this business in Fulton County, State of New York, represents from $800,000 to $1,000,000 in mill property alone, and about 2,000 men are employed.

CLASSIFICATION OF GLOVE LEATHER.

Glove leathers are classified as glacé, lambskin, nappa, friezed mochas, suedes, and chamois.

The different kinds of leather manufactured and imported are those finished on the grain or on the flesh side or on the surface exposed by removing the grain. The first two above are known as grain leather; the latter as mocha or suede. In the production of all these styles the American manufacturer is rivaling the European so far as quality is concerned.

As to mocha skins, this style of dressing had its origin in Fulton County, N. Y. In fact, 80 per cent of the Arabian skins dressed into mocha glove leather have been so dressed in this country up to the present time. The process of dressing this class of skins was unknown in Europe until recently. The glove-leather manufacturers of Europe are succeeding in producing mocha glove leather by labor taken from America and are now exporting mocha leather into this country. The European manufacturer is able to produce this article so much more cheaply, because of the labor cost, that he can successfully compete with the American mocha glove leather manufacturer in the home market.

The leather manufacturers of this country are producing as fine grades of leather as these made in Europe, and the demand for our output is steadily increasing.

The manufacturer of the fine grade of gloves in this country, which was encouraged under the Wilson, Dingley, and Payne Acts, has increased the demand for fine grades of glove leather. Most of the glove factories in Fulton County, N. Y., are now engaged in the manufacture of the finest grades of gloves, causing an increased demand for a finer grade of glove leather. The leather-dressing mills have gone hand in hand with the glove manufacturers in perfecting the finer product, and have succeeded under the encouragement given by various tariff acts in rivaling Europe in the quality of their product and year by year are increasing the volume of their business.

LABOR.

Labor is the principal element that makes up the difference in the expense of producing glove leather in this country and in Europe.

In the manufacture of glove leather little or no machinery can be used. This is true both in Europe and in this country. In order to produce good glove leather it is necessary that the work be done by hand labor, and good results can be obtained in no other way. Experiments have been made with machinery, but invariably this method has failed, so that the manufacturer of glove leather is compelled to rely upon hand labor.

The price of labor in the manufacture of glove leather is materially higher in the United States than in Europe. The following table shows the prices paid in the United States and Germany for the various departments in the manufacture of glove leather. Germany is taken for the comparison because nearly all the glove leather imported into this country comes from Germany:

	Germany, per week.	United States, per week.
Beam horse (labor)	$4.80	$10.50 to $12.00
Staking skins	7.68	14.00 to 16.00
Coloring skins	6.00	12.00
Expert tanner	9.60 to 12.00	20.00 to 25.00
Helpers in tan room	4.80	10.50

The foregoing table shows only the price paid men in Germany. Many women, however, are employed in the leather establishments of Europe at much less wages than the men and who perform work that is entirely done in this country by men.

In addition there is the apprentice system in the European factories which does not exist in this country, and in connection with which the wages are very nominal. Similar work in this country is done by men at a fixed wage.

The hours of labor and the amount of work required in European leather factories are such as to give the European manufacturer further advantage. In these factories the laborer is required to work from 10 to 12 hours per day, while in the glove-leather factories of this country 9 hours constitutes a day's labor.

In addition to the difference in the price of labor, there are other features which cost the American manufacturer more than the European. These are the various chemicals and coloring ingredients, together with the wool on all skins imported, upon all of which the American manufacturer pays a duty.

The 2,000 men employed in the leather mills in Fulton County, N. Y., are well paid and thoroughly employed and represent one of the thriftiest elements in New York State. The labor is made up principally of men with families. A considerable portion are skilled workmen who have come to this country to better their condition and all are vitally interested in the preservation of this industry.

EFFECT OF REDUCTION OR REMOVAL OF THE TARIFF.

If the tariff of 20 per cent be removed or reduced, there are two alternatives left to the American glove manufacturer—either the reduction of wages or the discontinuance of this class of business. In either instance labor is injured as well as the manufacturer.

If the manufacture of glove leather in this country is injured or destroyed, it gives to the European manufacturer the uncontrolled American market, subject to no competition or regulation, and leaves him free to charge whatever prices he sees fit for his product. The present duty is not prohibitive, as clearly appears by the large yearly importation of glove leather from Europe. Glove-leather manufacturing is a highly competitive industry, so that no pretense can be made that the present duty is in any way restrictive.

The present duty of 20 per cent ad valorem is merely a revenue duty and only gives the American glove-leather manufacturer a competitive chance with the European manufacturer, and it should be retained.

The Tariff.

EXTENSION OF REMARKS
OF
HON. AUGUSTUS P. GARDNER,
OF MASSACHUSETTS,
IN THE HOUSE OF REPRESENTATIVES,
Friday, May 2, 1913.

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. GARDNER. Mr. Speaker, under general leave to print, I present by request the following article from the Fitchburg Daily Sentinel of April 9, 1913:

SERIOUS EFFECT ON WORSTED BUSINESS—C. B. SMITH, TREASURER OF STAR WORSTED CO., DISCUSSES FEATURES OF PROPOSED DEMOCRATIC TARIFF MEASURES.

Charles B. Smith, treasurer of the Star Worsted Co., in an interview given the Sentinel to-day, on the proposed tariff reductions, strongly sets forth his views of the general tariff situation as it may affect Fitchburg's woolen industries. Mr. Smith is a deep student of the tariff question in its application to the American woolen industry, and his words carry much weight thereby. He said in reply to a question asked him by a Sentinel reporter:

"You ask how the Democratic tariff bill—some details of which have just been announced—will affect the worsted-yarn business. The answer is, very badly. Why? Because Mr. UNDERWOOD, through this proposed bill, sanctioned by the highest official of the United States, announces to every English spinner of worsted yarns: 'We know just how much it costs our American spinners to make a pound of worsted yarn; we do not lose sight of the fact that our American spinners pay double the wages that you do and that our American mills cost twice as much and all their machinery one-half again as much as your English mills and machinery have cost you; yet, in spite of that, we have fixed the tariff rate on worsted yarn so that now, Mr. English Spinner, spinner on any kind or size or quality of worsted yarn by 5 cents to 12 cents per pound.'

"This in effect is exactly what this proposed bill means. It does not matter that wool is on the free list. Wool might be used to stuff into a broken window or used to fill a bedtick, but it is of no use to the yarn spinner unless, after buying it at however low a price and spending further money for labor and manufacturing costs, he has a manufactured article merchantable at a price which will give his money back. There is no kind of staple worsted yarn such as the Star Worsted Co. has made for over 30 years which it can make under the terms of the proposed bill and get back a new for an old dollar—or anywhere near it. Take one illustration—a yarn known technically as two-thirty-seconds, used very largely by the weavers of dress goods. With free wool this yarn under present rate of wages will cost here 67 cents. The item of American labor is 14 cents. The cost of this yarn made in Bradford, England, for the same purpose, is 49 cents. The item of English labor is 6 cents. The proposed duty in the Underwood bill on the English yarn is 20 per cent, making the cost landed, duty and ocean freight paid, at not over 61 cents for the imported English yarn. Will any sensible person assume that the American spinner at 67 cents for this standard yarn can compete with the English spinner at 61 cents? As between 14 cents for the American wage earner and 6 cents for the English wage earner, does not the dominant party at Washington say in effect, when it offers only 20 per cent duty on this yarn, that the American wage earner is getting too much, and that the English product is therefore invited into our market? For it can not successfully be denied that the chief beneficiaries of a protective tariff are those who work for wages. Domestic competition for years in the textile industries has been fierce and has made undue profits absolutely impossible.

"But the election is over, and the party of tariff reform is a fact. The cost of living, anyhow, is to be replaced. Why, the old Wilson bill of 1894 put 30 per cent on imported yarns, and all rates were higher throughout that bill than in the present proposed bill, and that Mr. Wilson was hailed by Englishmen as a benefactor of English textile industries.

"What does the Star Worsted Co. meanwhile propose to do about it? All it is possible to do, under the new rates when the new bill becomes law. The experiment of 1892 was not considered a success by the American people, and they said so when the election of 1896 gave them an opportunity to express themselves. The experiment of 1912 is now on trial. It will certainly be a time of trial, too, for the textile industries and all connected therewith. Every mill owner will struggle to continue, and it is fair to say that business abroad is now so prosperous that the foreigner will not so quickly jump into our market as in 1894. But if it is certain that he will get here. If the Star Worsted Co. can then run without loss at the present wages, it will certainly do so. If not, it will curtail or close. Meanwhile we wonder—

"First, why our lawmakers legislate for the foreigner to the hurt of our own people.

"Second, how any wage earning voter can possibly bring himself to vote for a candidate of that party which always has legislated, is legislating, and probably when elected always will legislate for the foreigner to the hurt of our own people."

The Underwood Bill.

EXTENSION OF REMARKS
OF
HON. JAMES A. HUGHES,
OF WEST VIRGINIA,
IN THE HOUSE OF REPRESENTATIVES,
Thursday, May 1, 1913.

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. HUGHES of West Virginia. Mr. Speaker, this is the first bill presented to Congress within the memory of men now living which, if enacted into law, its friends frankly admit, will cause trouble for a very large number of honest, hard-working, upright citizens. There is no pretense by those who favor this measure that it will increase the wages of labor; on the contrary, we are told by its advocates that it is a competitive tariff. That in the future American labor and American capital and enterprise must take the product of their brains and hands and go into all the world and enter into a competition for the markets of the world with those whose earning power is so low that their standards of life tend to prove that civilization is going back into barbaric conditions instead of advancing. No one has pointed out to us the advantage it would be to the American laborer if the article which his toil produces is to be sold in the markets of the United States in competition with merchandise produced in other countries by labor whose wages are little more than one-half that which is paid to American workmen.

The principle of protection has been a part and parcel of our fiscal system for so long a time that our whole industrial system has been built up and developed by it. There is not a profession or an industry in the country that is not materially affected by a reduction of the tariff and an increase of the free list. So thoroughly intertwined with our industrial and commercial life is the principle of protection that it has for a long time become one of our established institutions. Now it is proposed to destroy this institution and substitute for it a fiscal system that will require a readjustment of all the lines and methods by which all of our business enterprises have been carried on for the last 50 years. The bill now before the House for consideration is the instrument whereby this revolution is proposed to be brought about. The principal object of this bill is to so lower this existing tariff that foreign-made goods may come into the United States and freely compete with our own products for the mastery of our own markets.

If we are to meet this increased inflow of foreign goods with any degree of success, we must at once begin to lower the cost of production. Since 90 per cent of the cost of producing a finished article is labor cost, expended in securing and assembling the raw material and converting that raw material into a salable article and delivering it to the consumers, it follows inevitably that the readjustment made necessary by this bill must begin by lowering the labor cost and reducing the wages of labor throughout the whole country. And it is certain that the income permitted from capital investments in our manufacturing enterprises under this bill, after deducting ordinary license and income taxes, will be so meager that capital will be discouraged from starting new enterprises or extending old ones. This is not prophecy but a frank statement of the immutable laws of trade. I will not indulge in even a guess as to the effect such a course must have upon the welfare of the people as a whole, because it is different to every man who reflects upon it.

Before entering upon this revolution it seems that plainest consideration of the public welfare would have prompted the friends of this policy to bear in mind the declaration of their party to the effect that in the new tariff which they propose to enact, "No legitimate business of the country would be injured." At least the promise which President Wilson gave to the country in his inaugural address, "That the Democratic Party had come into power not to tear down and destroy, but to build up," would be so respected by that party that the people could believe that the President really meant what he said. The President, when he was a candidate, gave out the following in his public addresses as among the reasons why he should be elected:

> I suspect that the people of the United States understand their own interests better than any group of men in the confines of the country understand them. The men who are sweating blood to get their foothold in the world of endeavor understand the conditions of business in the United States very much better than the men who have arrived and are at the top. * * * It is the point of view of those men (opposing him) who do not wish that the people should determine their own affairs, because they do not believe the people's judgment is sound. * * * No group of men less than the majority has a right to tell me how I have got to live in America. I will submit to the majority because I have been trained to do it, though I may sometimes have my private opinion even of the majority.

It is significant that a majority of nearly a million and a half voters at the last election were in favor of and voted for the principle of protection. This vote is the last concrete and only reliable expression of the public will. Every Democratic Member of this Congress will tell us that the people have a right to rule and govern themselves; and by "the people" he means a majority of the votes cast at the last election. There is no attempt upon the part of the administration or its friends to explain the reasons that prompt them as soon as vested with power to repudiate their own declarations of principle and preachments made in every campaign by every one of them and force upon the country a law involving the establishment of a principle of government which a very large majority of the people have rejected. If a very large majority of the people of this country repudiate at the polls a party and its principles, what moral right has that party to impose the will of the minority as the law of the land if by accident it has the power? Every vote that is cast for this bill says as plain as words can say that the expressed will of a large majority is no longer the guiding star in executing the functions of government. What change has come over their philosophy and the spirit of their dreams I know not.

When the party and their President made their solemn promise to the people that their tariff bills would not injure any legitimate industry nor tear down nor destroy the business of the country, it engendered an abiding hope in every laborer and business man that such promise was to be sacredly kept and faithfully performed. Relying upon their statements the business of the country went on in a normal way after the election practically the same until it became known that the party in power would disturb every business enterprise in the country directly and indirectly. Since the bill was published and its details became known protests have come from nearly every business organization in the country, regardless of politics. There is filed with your Ways and Means Committee, from which this bill emanates, reasons and statements strong as

Holy Writ why this bill should not become law. Already the shadow of its blight is being felt, for the volume of business has been greatly reduced in the last 30 days; orders are being canceled, as people do not know how either to buy or sell; and no new stocks are being laid in. The wheels of industry are slowing down, for this bill must inevitably curtail the power of the consumer to make purchases. Every industry in this country to-day stands in apprehension and fear of the consequences which they realize must follow an invasion of our home markets by foreign-made goods. They know that there will be a readjustment and realignment in our methods of production when goods made by foreign labor and foreign capital begin to displace in our own markets the products of American labor and American capital.

That our country has enjoyed a high state of prosperity in every branch of industrial enterprise under the existing tariff law and its predecessor is not questioned by even the most ardent reformer. The limit of our successes has been marked only by our ability to secure labor and provide the necessary capital. There has not been a day in the last 10 years that a man could not secure employment if he wanted it, and that, too, at the highest wages ever paid for human labor. During this period the farmer has been able to sell everything he produced at the highest price ever paid for farm products. At no time in history has any people ever been so prosperous in its material welfare as the whole people of the United States since the year 1900. The trade and commerce of the people, both at home and abroad, has grown with such rapidity that it is little short of the marvelous. To the statement that labor has not received its share of this prosperity, I point you to the fact that wages have increased constantly, and in a much greater ratio than the price of things that labor consumes. The growth of the deposits made by labor in the savings banks is likewise a complete refutation of this statement. While the friends of this bill admit the prosperous conditions of the country, they attempt to justify their assault upon our industries by saying that this is a "hot-house" prosperity, and, therefore, ought not to be permitted. It is of no consequence what name they may be pleased to bestow upon this country's progress, as long as good times and favorable conditions prevail in every field of human endeavor.

Before these gentlemen should embark on this reckless and daring enterprise they should consider well the effect that their propaganda must have upon the welfare of the people for whom they have power to legislate. Without thought and without consideration, they are glibly indulging in the platitudes that the laborers and the smaller business will be benefited by the operation of this bill. Will these gentlemen explain to us just how the American sugar grower and his thousands of American laborers are to receive benefits by the destruction of a business to which they have given their energies and their lives to build up? We are not told how the blessings will be bestowed upon our wool growers and the vast number of people employed by them. These gentlemen should explain the process whereby the hundreds of thousands of small manufacturers, engaged in producing every character of goods that enter into our civilized life, and their millions of employees are to be helped by greatly reducing the price at which they may sell the product of their labor.

It may be that great concerns like the Steel Co., who own all their raw material and their own transportation facilities, and who receive every particle of profit from the time the ore leaves the ground until the finished product is made and delivered at the consumer's door, can compete with foreign-made goods coming into our markets free of duty or under a tariff that makes substantial free trade. But companies so situated are comparatively few in number. But the great army of small manufacturers are not in a position to practice these economies, and their cost of production in consequence is much greater. They are not and can not be exporters, but must rely and depend exclusively upon the home market for the sale of their products. If driven out of their home market by the fierce competition that will be brought to their own doors by foreign-made goods they must go out of business and their workmen turned away without employment. Already the mills of England, France, and Germany are making preparations to invade the American markets with their goods in anticipation of the passage of this bill. The small manufacturer and business man and his employees will be its first victims. When we realize that these smaller business concerns are located in every city, town, and hamlet in this country, where their laborers have their homes and find lucrative employment, destruction or depression of these mean a nation-wide disaster.

FARMERS.

This bill will operate with as much severity upon the agricultural interest of the country as it will upon the manufacturing industries. No attempt has been made to explain to the farmer how the price of farm products is to be held up and at the same time greatly reduce the price of these products to the consumer. The friends of this bill claim that it is a measure in the interest of the consumer; that it is the consumer who must henceforth become the spoiled and pampered favorite of this Government; that the cost of living must be greatly reduced, so that the consumer may supply himself with the necessities of life at a much less sum than he is now required to pay. We are told that this is a glorious piece of political philosophy, because we are all consumers and therefore the country as a whole will be showered with universal blessings. The hope is held out that under the beneficent operation of this bill when it becomes a law every consumer of the country will be enabled to make all his purchases at greatly reduced prices without at the same time having his income reduced. The folly in this proposition lies in the fact that, with few and rare exceptions, the people of the country produce more than they consume. Their power to consume at all is measured and limited by the value of the thing they produce. This is especially true of those working for wages.

The selling price of farm products determines the farmer's ability as a consumer of the things he must purchase. There is only one contingency wherein he would be in favor of low prices, and that is a farmer who buys more than he raises and sells. Price levels for all commodities under the normal conditions maintain the same relative ratio, and this rule is applicable to wages, except in crop shortages agricultural products rise and fall in value in about the same relative proportion as manufactured products in normal times. The farmer must not expect high prices for the foodstuff that he raises and at the same time expect to purchase shoes and clothing at a very low price. The wages of labor will rise and fall with the rise and fall in the value of the commodity about which he works to produce. The hope that is held out to labor that it may continue to enjoy a high rate of wages and secure food and clothing at a low price is a delusion which the operation of this bill is sure to remove.

That the measure will greatly reduce the price of everything that the consumer requires is one of its principal virtues as advocated by its friends. At the same time, by the operation of an economic law that the fiat of the Democratic Party can neither change nor alter, his earning power will be so reduced that his standard of living will be lowered because of his inability to provide the means with which to make his purchases.

The chairman of the Ways and Means Committee has told us that the object of this measure was to favor the consumer, and that all the industrial interests of this country must be made subservient to that purpose. He states the issue fairly. He assumes that there is an economic conflict between the producer and consumer and that the whole power of government must be used in favor of consumer and against producer, to the end that the producer shall be compelled to feed and clothe the consumer out of the products that his toil and labor creates. Consumers are divided into two classes—those who produce and those who do not. Possibly one in every ten thousand of our population has retired upon a fixed income, who is not engaged in any industry and is exclusively a consumer. Wherever this small number of people can make their purchases at reduced prices they are to that extent personally benefited at the expense of all those engaged in productive enterprises. But the great body of consumers are engaged in industrial and commercial pursuits, and are absolutely dependent upon their earnings to provide that which they consume. The ability to earn fixes and limits the power to consume. They are producers first and consumers afterwards. They must first produce before they can consume. Whenever the right of power of production is limited or restrained it necessarily operates to destroy his ability to consume to the extent that his productive power has been lessened. It is a truism that production must precede consumption.

Senator BURTON expresses my views, perhaps, better than I could myself, and I am going to add what he says on this subject:

It is essential to the business of any country that changes be made gradually with due regard for existing conditions. Whether right or wrong, we have now been living for nearly 50 years under a fiscal system in which high duties on about one-half of our imports are a distinctive feature. The industrial and business interests of the country—indeed, the whole social system—all have adapted themselves to this policy. To make a sudden change, such as that contemplated by the Underwood bill, is like a fundamental change in the form of government. It affects the whole framework of our economic life.

No doubt a very substantial change could be made gradually, but years would be required for an orderly transition to new conditions—that is, if business interests are to be safeguarded and all occupations are to receive due consideration. Thus the first great objection to this bill is the abruptness of the changes proposed.

No doubt the price of some articles is increased by the tariff. The removal of the duty on sugar and on raw wool and the decreased duties on woolen goods will no doubt lower prices somewhat, though not at all in proportion to the proposed decrease in duties. The fact is that we, like all other progressive nations, are living in an era of high prices. These are world-wide and are intimately associated with the beneficial progress of the times. It costs more to live because life means more than it did, and a greater degree of abundance is a possession of nearly all the people. In most instances the tariff is but a trivial fraction which the consumer is compelled to pay. It would be difficult to find an instance in which a more erroneous opinion has gained wide credence than the idea that the tariff has materially increased the cost of living.

I can not help thinking that the framers of this bill made a serious mistake when they refused to accept information that would have aided them in avoiding such mistakes that must necessarily occur in the preparation of a bill of this kind by those unfamiliar with the subject in all of its important details and ramifications. Already in Rhode Island the effect of this bill is felt, and at least three manufacturers have gone out of business and one of them has gone into the hands of a receiver who just a year ago had $146,000 surplus.

The Income-Tax Feature as It Affects Life Insurance Companies.

EXTENSION OF REMARKS
OF
HON. J. A. GOULDEN,
OF NEW YORK,
IN THE HOUSE OF REPRESENTATIVES,
Thursday, May 8, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. GOULDEN. Mr. Speaker, being desirous of making a few observations on the bill now before us, especially on the income tax, must form my excuse for taking up the time of the House.

In my opinion, the entire bill when enacted into law, as it certainly will be done speedily, with a few amendments, must commend itself to the sober thinking men of the country.

It is true that out of the large membership of this House many divergent opinions exist, and if each one had the privilege of writing a tariff bill there would be approximately 435 different bills. All law is of necessity the result of compromise, so that in the bill under consideration it must be give and take all around.

I propose to say something to-day on the income tax as it refers to life insurance, in which I have had some practical experience.

We did well to exempt mutual savings banks, mutual fire insurance companies, building and loan associations, and fraternal orders. Mutual life insurance companies are on all fours with these institutions, possessing equal or greater merit, and should have been treated in the same way.

Had the Committee on Ways and Means, composed of intelligent, well-meaning men, given this subject that careful consideration that was given to other portions of the bill, or had they consulted Members of the House familiar with the matter, based on actual experience, a different result would have been had.

True, some concessions were made in section "G" that tend to improve and remove some of the objections to this matter.

However, the real bone of contention is the fact that the millions of policyholders of the mutual life insurance companies have been discriminated against.

There is no valid reason why these institutions, owned and controlled by their members, the policyholders, should have been made subject to this tax any more than the others named.

It is wrong in both theory and practice, and I fear will do irreparable injury to the Democratic Party.

The total number of persons thus affected exceed 12,000,000, and judging from the number of protests received by the Members of this House and of the Senate there is widespread dissatisfaction.

It will not do to say these protests are the result of activity on the part of the 200 American life insurance companies who make premium abatements or, as they are frequently called, dividends.

The unrest is growing, and I greatly fear that it will become so great in volume that its demands can not go unheeded.

It may be expected—and it seems to me properly, too—that the companies having the best interest of their members at heart will, on every premium receipt going out to these more than 12,000,000 citizens, state the fact that the abatement is less and the premiums higher on account of the income tax levied by the Government. It becomes another added burden on the scanty income of the poor man.

As the Democratic Party, in its Baltimore platform and in the utterances of those on the stump last year all over the country, as well as the speeches made on the floor of this House, whether in caucus or Committee of the Whole, declare for a reduction of the cost of living, what excuses are we to make to our constituents for taxing this great mass of the people?

To me, with a good many years of experience, I greatly fear the result of our attempt to tax the frugality, the thrift, the savings, in fact, of the people and the desire to protect dependent ones.

It comes directly home to the people, and unless I am greatly mistaken will be resented.

It is rather astonishing to hear intelligent, patriotic men on the floor of this House, in the corridors, and elsewhere in and around the Capitol, criticizing life insurance companies, decrying their management, and finding fault with the fair and just salaries paid those who manage these beneficient institutions.

For information for these and others similarly situated it may not be amiss to give some actual statistics taken from official reports.

The admitted assets of these companies on January 1, 1912, were $4,164,491,688.

The reserves necessary for solvency and required by the various State governments amounted to $3,472,811,903.

Counting accumulations on all forms of deferred dividends or abatement-of-premium policies, which amounts to upward of $400,000,000, thus leaving about the same sum of actual surplus, less than 10 per cent of the assets, and necessary for the absolute solvency of the companies, especially in times of financial depressions or panics.

In any event in mutual companies this belongs absolutely to the members or policyholders.

The dividends or abatement of premiums paid by the companies reporting to the insurance department of New York in 1911 amounted to $20,459,583, which is taxed by this bill. The two hundred and odd American life insurance companies since organization have paid to their members in dividends or abatements the sum of $1,039,808,683. The total amount of insurance in force on more than 12,000,000 of our people amounts to eighteen billions.

The figures given stagger the average person and cause the desire on the part of many legislators to take some of it away by taxation. It looks like easy money, but I wish to remind my colleagues that it is a tax on thrift and comes directly from the pockets of the people.

I shall add as a part of my remarks a very able editorial from the Spectator, of New York, a leading insurance journal, under date of May 1, 1913:

AN OUTRAGEOUS AND INDEFENSIBLE TAX.

The income-tax section of the pending tariff bill, at least so far as it applies to the taxation of mutual life insurance companies, is an outrageous measure which should be actively opposed by every holder of a participating life-insurance policy in the country. There is absolutely no excuse or defense for it. No emergency demands it. It is a stupid, clumsy, and unjust attempt to supply a deficit in public revenues created by reductions in the tariff at the expense of a class of citizens already infamously overtaxed by the several States. Its injustice is emphasized by the fact that these same citizens have voluntarily taxed themselves to provide for the future of their dependents and have, to that extent, relieved the State and Federal Governments of the responsibility of caring for them. Its unfair discrimination, even between those who combine to insure themselves, is apparent from the fact that it exempts from its provisions fraternal, beneficiary, and other associations operating for mutual protection and benefit.

There is no precedent for such a measure either in our own country or elsewhere. Even during the Civil War, when the Government was forced to exhaust every available source of revenue to preserve itself, a similar measure was overwhelmingly defeated in the United States Senate when Charles Sumner eloquently denounced its injustice and unreason. In 1894 Senator Sherman fought successfully against including such a provision in the income-tax law passed in that year, which was subsequently declared by the Supreme Court to be unconstitutional. In 1898 a stamp tax was imposed on life insurance companies as a war revenue measure, but no such confiscatory plan as that now before Congress was even considered. It has remained for the present Congress, in a time of peace and general prosperity, to attempt to put this intolerable burden on the backs of the thrifty, home-loving, self-sacrificing citizens who have tried to do their full duty to their families.

Present indications are that this bill will pass the House and that it must be defeated, if at all, in the Senate. It can undoubtedly be defeated, if the opposition to it is organized and intelligent. Every officer and agent of a participating life insurance company should at once make every effort to impress upon the policyholders of his company the fact that a tax upon the company must be paid by the policyholders. Once drive this lesson home and a storm of indignant protest will arise that Congress will not dare to ignore.

The Underwood Tariff Bill.

EXTENSION OF REMARKS
OF
HON. DAN V. STEPHENS,
OF NEBRASKA,
IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. STEPHENS of Nebraska. Mr. Speaker, the people have directed the Democratic Party to reduce the tariff taxes at our customhouses to a revenue basis, and the party is now rapidly fulfilling the commission. Four years ago the people gave the Republican Party the same directions, but that party was betrayed by its leaders into the hands of special interests that have been sheltered behind a tariff wall, and the tariff was raised instead of lowered. These same leaders, or many of them, are to-day offering every obstacle possible to the passage of the Underwood tariff bill, which is a fulfillment of the Democratic pledges made to the people last fall. They have put in every hour possible in debate forecasting disaster to the country and general ruin to our industries. In fact, they have done their best, whether intending to do so or not, to force the country into a panicky condition. The Nation has decided to try out the Democratic method of taxation. For 50 years we have been talking to the people about it, and they have finally decided to take us at our word and see what we can do to improve conditions.

Now, my contention is that every patriotic Republican should sit back and present no obstacles to the fulfillment of the pledges we have made to the people. They should not forget that this is their country even though the Democratic Party is in control of the Government, and that if they bring misfortune upon the country by instilling fear and distrust into the hearts of the people and casting doubt and suspicion upon the Government it will all react upon their party. The Democratic Party should be given a free hand to prove what it has claimed all these years, so that if in the end it fails to make its promises good the claim can not be made by it that it never had a fair show—that special interests defeated a fair test of Democratic policies by artificial panics and depressions in industry, brought about deliberately in order to stampede the people again to supporting a Government in behalf of special interests. The people should not be misled by these prophets of evil. The country may suffer some disturbances in the operation upon the body politic that the Democratic Congress is now performing. Its condition is critical and some old ulcers have to be cut out before it can again be restored to a natural and healthy growth. Our Republican friends of the rank and file want to see this operation effectively performed, for it was they who stood shoulder to shoulder with the Democrats last November in giving the order that the operation should be commenced at once before it was too late. The people are tired of having their Government used as a political football by politicians for the purpose of winning back the offices they have lost, to again use the taxing power of the Government for the benefit of special interests, before this new method of raising revenue can be fairly tested. The Republicans had lost hope in seeing this operation of cutting out the special interests performed by their own party on account of the betrayal of their leaders and were patriotic enough to give their support to the Democratic Party that had been freed from the control of the plunderbund and was therefore in a position to carry out its promises to the people. The Democratic Party owes nothing to special interests and is in a position to cut the tentacles of the octopus that has been feeding upon the lifeblood of the Nation.

The politician out of office will use the weakened condition of the Nation that may result from the shock of change to mislead it in the belief that a change of doctors is desirable before the patient has a chance to show the results of the new method of treatment. In fact, they are even capable of doping the patient for the sake of again getting an interest in the taxing power of the Government for the benefit of special interests that have heretofore been in partnership with the Government in gigantic schemes to fleece the masses of the people through a protective t iff.

This Democratic tariff bill is the first one ever levied in the history of the country in the interest of all the people. In this particular it is the most remarkable of all tariff legislation. The rates in this bill are made for the purpose of raising revenues and not for the purpose of protecting private interests. The Government will no longer be in partnership with one class of its citizens in a scheme to rob another class through the taxing power of the Government. Under this bill it is believed every man has a square deal, and if it is found after a year of operation that some of the rates are wrong the Congress can correct them. But the people should be patient and give the country a chance to adjust itself to the new conditions before it passes judgment on this measure. One thing is absolutely certain, whatever the results may be, the bill was passed by the people for the people through their untrammeled representatives fresh from the people and against the protests of all the corporate interests that have heretofore been fostered by the Government. We have done what the people directed that we should do. If the measure fails after a fair trial, then the people will have settled a great question that has divided the country into two schools of politics since the beginning of our Government.

THE INCOME TAX.

The big outstanding fact of this bill is the income-tax provision, which lifts at one stroke of the pen nearly $100,000,000 in taxes from the backs of the people and places it upon the incomes of the comparatively rich. This income tax makes it possible to place the necessaries of life upon the free list and reduce the tariff on the entire 14 schedules about 25 per cent on an average. This is admittedly the most just tax ever levied by this Nation.

We have accumulated wealth in this country that has been produced by all of the people, but now owned by a comparatively few, amounting to $125,000,000,000. This great wealth does not pay one cent of tax to the support of the National Government for the protection of which the Government maintains an Army and Navy and hundreds of thousands of officers and men of every grade and kind. Few people realize this fact, and are startled when they understand that the Nation gathers its tax from the necessities of the people through a hidden tariff instead of from the surplus wealth that has been produced by all of the people, but who have lost title to most of it to clever men who have been favored by birth and our system of collecting taxes. The people are amazed when they realize that our Navy, for instance, with its dreadnoughts costing $18,000,000 each, was built not by these owners of swollen fortunes whom it protects but by the toll taken from the food and clothing and other supplies that the toilers of this Nation must buy in order to keep soul and body together.

By the raising of revenue through a tariff on customs it necessarily follows that, since the tax is on consumption, and a poor man eats as much as a rich man, a poor man who has no property contributes as much toward the support of the National Government as does a rich man who owns millions of dollars' worth of property. This means that if a man is so poor that he can scarcely get food and clothing enough to keep himself and family alive, and a portion of that food and clothing is taken in the form of a tariff tax, we are literally taxing his right to live. It is a blood tax in effect. He must pay it if he eats, and if he does not eat he dies.

This income tax on the rich and comparatively rich will lift nearly $100,000,000 from the food and clothing tax of the masses. The man who is blessed with an income large enough to come under this tax and understands it and still complains against its payment is not worthy of the responsibility and advantage that goes with the ownership of property. Men of that type produce anarchy among the people who are half housed, clothed, and fed, and my sympathies are with the people and against the man who can bear the burden, but is too greedy to do so. Incomes over $4,000 will be taxed 1 per cent; over $20,000, 2 per cent; over $50,000, 3 per cent; over $100,000, 4 per cent. This tax will compel the Rockefellers, Carnegies, Morgans, and Fricks to pay large sums of money at the rate of 4 per cent on their incomes into the National Treasury for the support of the Government. Some of these gentlemen may have to pay as much as $2,000,000 annually if they are not careful about their earnings hereafter. About the only way they can escape this tax is by not earning the income.

This is the greatest step in reforming our methods of national taxation that has ever been taken in the history of our country. It is the entering wedge to greater reforms that are to follow. The next step no doubt will be a national inheritance tax, such as many of the States now levy. The Nation must protect itself from the menace of abnormal fortunes that corrupt the morals of the people and that will ultimately absorb all of the wealth of the Nation. An example of the rate of increase in great fortunes, if allowed to grow in a natural way without regulation, is shown by the following statement. Capital invested at compounded interest will increase as set forth below:

Capital at 1 per cent will increase two and three-fourths times in 100 years.

Capital at 3 per cent will increase nineteen and one-fourth times in 100 years.

Capital at 6 per cent will increase three hundred and forty and one-half times in 100 years.

Capital at 12 per cent will increase eighty-four thousand six hundred and seventy-five times in 100 years.

Capital at 24 per cent will increase two billion five hundred and fifty-one million seven hundred and ninety-nine thousand four hundred and four times in 100 years.

The difference in the rate of increase at different rates of interest is a most astounding fact. It shows that the great fortunes, if left unchecked, will have absorbed all the property in the world in another century at their usual rate of earnings. These figures show that in the life of a nation a rate as high as even 6 per cent means bankruptcy to the people, and no one will dispute that these great fortunes have increased at a greater rate than 6 per cent annually.

A good, stiff inheritance tax on his property at the death of a plutocrat will have two good results: It will enable the Nation to pay its governmental expenses without taxing the people, and it will leave less money to his heirs for their corruption. The plutocrat taxed the people to get his fortune, then when he dies the Government simply takes a part of it for its expenses instead of taxing the people the second time for that purpose. By this method great fortunes will be gradually broken up or kept down below the danger point.

Recently the Astor estate of nearly $100,000,000, upon the death of John Jacob Astor, descended to his son, Vincent, a boy who probably never earned a dollar in his whole life. Yet the earnings of countless tens of thousands of people are handed down to this boy with a good title to it. Morally, it belongs to the people, and while it paid an inheritance to New York State, the fact that it has reached a total value of nearly one hundred millions is proof that enough has not been taken. According to the table above quoted, in 100 years the Astor estate at 6 per cent compound interest will have increased 340¼ times and reached the magnificent total of $34,000,000,000, or a little less than a third of all the wealth in the United States now. Astor's estate is one of the small ones, too. Three or four such estates will absorb all of our present wealth at the present rate of increase in 100 years if left alone to their own resources. But the Underwood bill will get some of the surplus earnings of Mr. Astor, and no doubt later on his estate will contribute in the proper proportions its share to the Nation's expenses. The establishment of this principle is the greatest reform of a century.

REDUCTIONS IN THE UNDERWOOD BILL.

The average man has neither time nor inclination to pursue a technical discussion of the Underwood bill, but he does want to know in a general way what sort of reductions it makes in the Payne schedules. The following table is instructive in this connection. It gives the average rates of duty for each tariff schedule under the Payne Act and the estimated rates of duty for the Underwood bill, and also shows the percentages of change in the average duties which we propose to make.

Comparative summary of average ad valorem rates of duty by schedules.

Schedule.	Average rate of duty.		Reduction in per cent of duty.
	Payne law, 1912.	Estimates for a 12-month period under H.R.3321.	
A. Chemicals, oils, and paints	25.9	19.6	24
B. Earths, earthenware, and glassware	50.7	33.1	34
C. Metals, and manufactures of	34.3	20.1	41
D. Wood, and manufactures of	12.4	3.5	74
E. Sugar, molasses, and manufactures of	48.1	35.9	25
F. Tobacco, and manufactures of	62.1	84.9	[1] 2
G. Agricultural products and provisions	29.0	16.8	42
H. Spirits, wines, and other beverages	83.9	83.3	0
I. Cotton manufactures	45.5	30.4	33
J. Flax, hemp, and jute, and manufactures of	45.1	26.0	42
K. Wool, and manufactures of	55.9	18.5	67
L. Silks and silk goods	51.5	43.9	16
M. Pulp, papers, and books	21.4	11.8	47
N. Sundries	24.7	33.2	[2] 33
Total, all schedules	40.12	29.60	26

[1] Increase in rate.
[2] Increase due to transfer of laces and embroideries from Schedules I, J, and K to Schedule N, which luxuries pay duty of 60 per cent.

The average protection in the Payne bill for the entire 14 schedules above enumerated is a little over 40 per cent. The average for the Underwood bill is 29 per cent, or a reduction in rates of 26 per cent under the Payne bill. Now, let us see how the various industries have been treated. I represent a district that produces more grain, beef, and pork than any other congressional district in the United States, and it has been especially affected by the Payne tariff because it is a great consumer of the products of manufacturers. My Republican colleagues from Nebraska have been raising a hue and cry about the reductions made in this bill on products of the farm in an effort to mislead the farmers into believing they have not had a quare deal in the framing of this bill. Because a man is a farmer is no reason that he is also a fool. He knows that tariff bills of the past were never written in his interests, nor were his interests ever considered. In the first place, it is only in rare instances that a tariff can be of any use whatever to a farmer anyway, but this has not prevented the tariff makers from placing a high tax on wheat, corn, and other products as a sop to him, so he would not squeal on a prohibitive tax on everything the manufacturers produce which he must buy. None but a tariff trickster with unlimited gall would ever try to make a farmer believe a tariff on corn would shut out importations of corn when no other country in the world produces corn in export quantities. There is not a farmer in the country who has every studied market reports who does not know that the price of his wheat is the price of export wheat, less cost of transportation. The tax of 25 cents a bushel on his wheat has not enabled him to get a single cent more for it than the foreigner gets, less transportation cost. The same is practically true on everything that he produces, although in minor crops the tariff will affect prices to some extent along the border, because it prevents a natural flow of commerce. But in a great country of the extent of the United States the effect is inconsequential on the products of the farm.

But this is not true on the products of manufacturers, because, unlike the products of the farm, they have much competition from abroad, and importations from abroad, free of duty, would tend to greatly reduce prices to the consumers. But these manufacturers have written every tariff schedule through their Representatives in Congress within the last 50 years, and they have put up the tariff to a prohibitive point, so importations could not be made practically at all, and behind this tariff wall they have put up their prices so high that the people complain universally of them. Now, the Underwood bill cuts down the tariff wall one-fourth, so that a foreign manufacturer who is right clever, who is a master in his line, can get over it with his products and compete to some extent with our manufacturers for trade, thus enabling the farmer to buy in a competitive market. True, he will have to add to his selling price the 29 per cent of tariff under the Underwood bill instead of 40 under the Payne bill, which he pays at the port of entry, which will enable every producer of the article in the United States to raise his price up to the level, or just under the foreigner's price, and as a result the home manufacturer will have an incidental protection of 29 per cent. We claim that this is all the protection that any manufacturer ought to ask for.

This Underwood tariff bill cuts the tariff duties on farm products 42 per cent, and, as stated above, the tax on corn and wheat has never enabled the farmer to get a single cent more for his crop than he would have gotten had there been no tax at all, because he is an exporter of these grains. Possibly absolute free trade might have some effect on the price of some minor products along the seaboard, but we do not have free trade in farm products, but instead an average protection of 16 per cent.

WHAT DOES THE FARMER GET?

Then, the question is, What does the farmer get for his share of the advantages under this new bill? First, he gets a reduction in the tariff on all the paints, chemicals, and oils he buys of 24 per cent; earthenware and glassware, 34 per cent; metals, steel, and iron products, 41 per cent; wood, lumber, shingles, furniture, and building materials, 74 per cent; sugar, 25 per cent; cotton goods, and so forth, 33 per cent; flax, jute, hemp, twine, rope, and so forth, 42 per cent; woolen cloth and clothing, 67 per cent; silks and silk goods, 16 per cent. These are the reductions in the tariff that directly affect most everything the farmer buys, and will undoubtedly bring him some relief in reduced prices. If it does not, then we will have learned something about the effect of tariff rates we did not before know.

My distinguished colleagues from Nebraska, representing the Republican Party in Congress, are opposing this bill, which means that they are in effect voting to keep the indefensible Payne tariff rates on the statute books, which levies a tax of from 24 to 74 per cent more than the Underwood bill on everything the Nebraska farmers buy, and offering the excuse for it

that the tariff on farm products has been reduced from 29 per cent to 16 per cent. I deny that these gentlemen are speaking for the farmers of Nebraska. They are speaking for the interests that are sheltered behind the Payne tariff bill, because by their vote they prefer it to the Underwood bill, which reduces the tax on the products the farmer must buy. The country rejected the Payne bill at the last election, yet these gentlemen show by their votes that they think it is better than the Underwood bill, that reduces the Payne rates 26 per cent on an average. Do these gentlemen believe that the people did not want the tariff reduced at least 26 per cent? Did a single one of these gentlemen defend the Payne bill during the campaign last year? Did they not in public speeches declare for a reduction of the tariff? Did not some of them secure their reelection to Congress upon the record they made last year in supporting some of the Underwood tariff bills and the Democratic contention for a revision of the Payne bill? That was the right positon for them to take last year to be elected, as that was the way the people felt about it. But now they are betting that we will have a drought or panic or earthquake which can be charged up to the Underwood tariff bill, which will make the measure unpopular with the people, thus making it safe for them to vote against it. But by voting against this bill they vote against the income tax, which takes nearly $100,000,000 from the backs of the farmers and producers of the country and places it upon the backs of the rich. I apprehend the farmers of Nebraska have been fooled by a tariff sop on corn and wheat about as long as they can stand it. They do not take kindly to the friends of the Payne-Aldrich tariff, and my Nebraska Republican colleagues will no doubt hear from them.

FREE SUGAR.

One of the big features of the Underwood bill that has caused much controversy is the question of free sugar after three years with a reduction at once of 25 per cent. It is admitted that sugar can be produced profitably in Cuba at 2 cents a pound, whereas it costs about 1½ cents in Louisiana. Some claim that free trade would not destroy the cane-sugar industry, but it is now generally admitted that it will; that the industry is not legitimate; that it would be as reasonable to try to grow oranges in a hothouse in Maine by giving it a tariff protection as to try to keep alive this Louisiana industry any longer. It is costing the American people all it is worth every year in the extra price of sugar. Mr. UNDERWOOD estimates that the American people pay at least $115,000,000 a year extra for their sugar as a result of the tariff of nearly 2 cents a pound levied for the protection of this industry. That sum of money is almost enough to buy the whole Louisiana sugar industry, including the lands on which the cane is grown, and yet we have paid for this outfit once every year for the last 10 years, or a total of considerably over a billion dollars in the added price of nearly 2 cents a pound on the sugar we have consumed. But even if we were so impractical as to keep this tariff on sugar for the protection of this cane-sugar industry, it is now admitted by all that the beet-sugar product would drive it off the market anyway, because the cost of beet-sugar production is much less.

The producers of beet sugar claim they need protection, but as a matter of fact every plant in the country is paying a dividend and some of them excessively large dividends on a capital stock that is half or more water. Not only is this true, but the Sugar Refining Trust has a controlling interest in nearly all the beet-sugar plants in the country and now controls the price on domestic sugar. Sugar is sold at wholesale to the groceryman who lives within the shadow of a beet-sugar factory at exactly the import price of sugar plus the cost of freight from the seaboard. The big question is, Can beet sugar compete with foreign sugar? The facts show that it can. The American people have no moral obligation to pay a dividend on at least twice the capital invested in this industry through a protective tariff. This bill may squeeze out some of the water and place the business on a solid foundation, so it will not have to be crying around Congress for a Government partnership in feeding the people. An industry located on the semiarid plains from 1,500 to 2,000 miles from the seaboard with a high wall of freight rates protecting it from competition with foreign sugar is much safer from disaster than the farmers who now compete with the foreigner to whom he sells his surplus wheat, corn, and cotton. The beet-sugar factories will have plenty to do to supply the sugar in this railroad-protected territory. They do not have to sell sugar in a foreign market as does the farmer, and then it is unfair to compel the farmer who must compete with the foreigner to pay out his profits to the sugar producers who have a market at their doors for all the sugar they can produce. The grain and stock farmer hires real American labor and is entitled to a square deal, whereas this protected, trust-controlled, gambling industry employs Japs, Chinese, Hindus, and rag-tag labor from whatever country it can get it. That is the policy of every protection-fatted industry we have in this country.

I would not want to destroy the beet-sugar industry, and I do not believe free sugar will destroy it. It will have three years to adjust itself to this new tariff. Let us see what will happen in these three years.

FREE WOOL.

The corn-belt farmer has been gradually abandoning the growing of sheep for many years. In fact, we have fewer sheep in this country than we had 30 years ago, notwithstanding the fact that both sheep and wool have enjoyed a large protective tariff. The industry of sheep growing has been carried on largely on semiarid lands and in the mountains of the West. Even there in many localities the hazard is very great, as the storms of the mountains and plains district often destroy a large percentage of the flocks. In spite of a 11-cent tariff on wool and the fact that we have to import nearly half of our supply, the sheep flocks have gradually diminished each year, so that we have now some 9,000,000 less sheep than we had 10 years ago. Between the rapacity of the Wool Trust on the one hand, that steals nearly all the benefit of the 11 cents tariff protection to the producer, and the Meat Packing Trust on the other hand, that makes the feeding of sheep a great gambling business, the farmer is gradually going into a business that is safer for him. In my district a farmer who has the nerve to buy a few thousand sheep to feed as a means of disposing of his crop and cleaning up his farm is liable to lose his savings of a lifetime, if he does not lose his farm. The business is so dangerous that only the shrewdest of farmers dare to engage in it. Should he undertake to raise his flocks, he finds that it is so subjected to various diseases that he must be an expert at the business to avoid losing money. These are the reasons that the sheep industry in America is waning.

Our protectionist friends want us to continue to levy a tax of 11 cents a pound on wool. By doing so we would do two things. We would first enable the Wool Trust to get most of the 11 cents and absolute control of the American market; we would force the American people to add 11 cents a pound to the cost of every pound of foreign wool we must import. If the sheep grower got the 11 cents, it would not be quite so bad, but he does not. He ordinarily gets 1, 2, or sometimes 4 or 5, cents more for his wool than the foreigner gets in free-trade England, but even now foreign wool is sold in London at practically the same price as in Boston. In fact, 150 bales of our wool was recently exported and sold in London at a shade better price than it would bring in this country. Where has the 11 cents per pound protection to the grower gone? It simply proves our contention that the tariff creates trusts, and that a tariff on trust-controlled products does not benefit either the consumer or producer.

The next thing we would do, if we kept the 11 cents a pound duty on wool, would be to furnish the woolen manufacturers a logical excuse to come back at us with the argument to the effect that now you tax my raw wool 11 cents for the benefit of the producer, you must give me a corresponding tariff on my woolen cloths so I can get back my 11 cents per pound for the raw material. That would mean, of course, that the 99,000,000 people out of the approximately 100,000,000 in the country, who were not even remotely interested in sheep raising, would have to pay an added price for their clothing to cover this tariff on raw wool. In fact, in the infamous woolen Schedule K the 11 cents is tacked on at every step, in some instances, in this intricate tax, so that it is collected several times in the increased cost of woolen products. It is a parallel to the sugar question. We buy literally many hundred million dollars' worth of woolens annually, and a small per cent of extra cost as a result of this wool tax would buy the whole sheep industry in a single year. Farmers in my district can grow tropical fruits, if they want to buy the heat and protect the plants, but it is cheaper for them to let some fellow raise the tropical fruit where it is naturally easily raised and buy it from him.

The tax on raw wool was the key to a high protective tariff. Since the Civil War this high tariff on woolen goods has been maintained by the union of the wool producers and the woolen manufacturers. This combine has fleeced the American people out of hundreds of millions of dollars since the Civil War. The Wool Trust got its share of the loot, but the woolgrowers got skinned out of theirs by an inside Wool Trust formed by the woolen manufacturers for the purpose of stealing the tariff on raw wool. It has been a confidence game from the beginning; and the woolgrowers and the people have been the victims. But the combine was not able to beat free wool in the House of Representatives, because their Schedule K was too notoriously bad to last forever.

Now, one more defense of free wool and then I must leave that subject. Every country in the world admits wool free of tax save Russia and the United States. In the United States, under a high protective tariff on wool, the sheep flocks have steadily diminished for 30 years. In England, where wool never had protection, the sheep industry has prospered greatly. No country in the world has as good sheep as England, and nowhere are sheep more profitably raised. Let the man who favors a tax on wool because he thinks it will enable us to raise more of our raw product and import less consider these cold facts and change his views accordingly.

WHEAT AND FLOUR.

Another bone of contention between those who speak for the millers and those who speak for the farmers is the question of a 10-cent tax per bushel on wheat and free flour, as provided for in the Underwood bill. The millers contend that since flour is free wheat should also be free, and, as a matter of logic, I think they are correct; but, as a matter of fact, I think their contention is groundless, because free wheat would not help them a particle, for the reason that we do not import wheat, and probably never will. If we ever do have to import wheat, then the contention that free wheat will help them will be correct. The truth is, notwithstanding the fact that there has been a tax of 25 cents a bushel on wheat, for many years the American farmer has been paid the foreign, or export, price for his crop, less the cost of transportation. It has been the tariff sop that the eastern manufacturers have through their Representatives in Congress thrown to the farmers to get them to support their protective theory. Never in the history of the tariff has the farmer gotten a higher price for his wheat as a result of the tariff of 25 cents per bushel; but he has paid his tribute to the eastern factories of the country generously, in the meantime buying his supplies in the highest market in the world, while he sold his products in the cheapest market in the world in competition with the so-called pauper labor of other countries.

But the millers may ask: "Why put a tax of 10 cents per bushel on wheat if it does not help the farmer?" I am free to say that I am a large producer of wheat myself, and I know the tax is of no benefit to me, but I see no reason for taking all the duties off of wheat for no other purpose than to furnish the protectionist a club to frighten those producers of wheat who may not know the flimflam game that has been worked upon them into supporting the protection contention in opposition to this bill. The truth is that while flour is placed on the free list, it is only on the free list with countries that admit our flour free; so, taking it all in all, flour has about the same protection wheat has, for England is the only country that admits our flour free, and therefore it is the only country that can ship flour into this country free in competition with our millers. Does anyone think our millers will suffer in competition with English millers, who must import their wheat to make flour to export to America? If he does, he has a vivid imagination not justified by the facts.

The cereals produced by our farms bear a tax of from 10 to 15 cents a bushel in the Underwood bill, and it is a question whether we are benefited at all as a result of it. The United States is the greatest food-producing country in all the world. We have been large exporters, and would be still larger exporters now if this industry had not been crippled by paying an enormous tribute to the special interests of the country in the form of a tariff. The agricultural industry produces nine or ten billion dollars' worth of wealth every year, and by a clever system of exchange, engineered by various organizations, it gets its food and clothes for its pains and a few dollars besides (sometimes), while we watch the various "big interests" concerns divide up this great wealth in dividends later on. The whole burden of the Nation rests on agriculture, and this system of levying tariffs on the stuff agriculture uses is the method whereby they get our big crop money each year. While the farmer digs and sweats in the fields clever men are begging Congress to help them skin him out of his crop by levying a large tax on everything he must buy, while he must sell his crop for what he can get for it abroad, because he produces a surplus. It is not at all probable that the Old World will ever be able to feed its own teeming millions, to say nothing of their ever overrunning this country with their products.

The favorite argument of the protectionist to frighten the farmer is to refer to importations of cheap wheat from Canada. Of course, anyone who knows the situation knows that the argument is absurd. He knows that the surplus wheat of Canada, the same as the surplus wheat of the United States, finds its market abroad, shipped over parallel railroads on opposite sides of the boundary line, and by ocean steamships, each paying approximately the same freight rates, and sell at the same price in a world-wide competitive market. Then how can wheat be cheaper in Canada? If at certain local stations in Canada the price is lower than in corresponding stations in the United States, it is because of price fixing by grain companies and higher railroad rates, all of which is deducted from the world price before the producer is paid. There are places in Canada where wheat is less than in corresponding places in the States, and the reason is clear to those possessed of the facts. The railroads and grain companies in a newly settled country, where the risks are great, always make larger profits. As an example and proof of this, many of my constituents own stock in a big grain company operating a line of elevators in western Canada. To my personal knowledge these stockholders have drawn from 15 to 50 per cent dividends on their stock during the last five years. A similar grain company in my district in Nebraska does well if it makes 10 per cent. This accounts for the difference in the price of wheat in Canada and the United States, when any difference exists, added to any difference that may also exist in transportation rates. The farmer can take either end of the argument and rest in peace, for he still has a protection of 10 cents a bushel on wheat and the miller has a protection of 10 per cent ad valorem on flour from every country save England, and England admits our flour free.

MEATS ON THE FREE LIST.

While grain and live stock bear a reasonable tax under this bill, meats have been placed on the free list. This is in conformity to the pledges we have made to the people for untaxed necessaries of life. The meat industry of the country is controlled by a great packers' trust, and whatever tariff benefits that may arise from a tariff on meats is absorbed by this trust. It is another proof of the uselessness of a tariff in protecting the producer when the article produced is trust controlled. The American packers sell our beef in London several cents a pound less than the same meat is sold to our own people. The tariff keeps out the competitors of the Beef Trust while the trust fleeces both the producer and consumer here at home and goes abroad and meets the competition there. The exports in beef last year were over $2,000,000. The packers get together every day and agree on the price they will pay for beef cattle and the producer has no choice in the matter. They fix this price at the bottom when the beef producer has his yards full of steers, and when they have all been gathered in and slaughtered at a cut-throat price to the producer they gradually raise the price while his yards are empty to induce him to again fill his yards in the hope that better prices will prevail the next year. But the next year he meets with the same old story, and about the time his beef steers are ready for the market the price begins to fall, by agreement among the packers, and his stuff goes on the market, on an average, at a loss. One of the best feeders I ever knew told me that he had barely broken even on feeding cattle in a run of 35 consecutive years. To-day the price of beef is the highest probably in the history of our country, and yet not half of the feeders, one year with another, can profitably produce beef because of this rapacity of the Packing Trust. This Meat Trust is reaching out to control the products of Argentina and South Africa, and it is only a question of time when they will control the markets of the whole world, and the tariff hastens the day; but in the meantime the American Congress will not permit it to take the Government of the United States into partnership in its schemes to rob both the beef producer and the beef consumer by a tax on meats. The packers have already reduced the beef supply in this country enormously. There is not a neighborhood in my district that you can not count a dozen cattle feeders who have quit the business because of its hazard. One might as well gamble on the board of trade as to fill his yards with stock cattle and take the chances on feeding his corn crop into them and ultimately getting his money back and a profit from the packers. I have tried the business myself, and had only my experience to show for it after several years' effort in producing beef. The result of these methods of the Packing Trust has been to greatly decrease the beef supply in this country. The farmer would not complain so much in producing the beef of the country for his board and clothes, but he objects to having the packers take the price of a small farm sometimes in one of their notorious short deals on the price of a trainload of fat steers. The farmer gets no benefit of the tariff on meats; the packer absorbs it all. Each day the various plants agree upon the price they will pay for beef steers. If a few more farmers get to the market on one day than on another, the packers slash the price, notwithstanding empty coolers, and the farmer is helpless. He can not ship fat steers back to his yards, and if he could he would have to send them back later

to the same market, after hundreds of dollars of extra costs have been charged up against his beef. It is poor consolation to offer the tens of thousands of beef producers of this country to tell them to protect the packers' meat with a tariff so that the packer can pay more for fat cattle.

The farmer knows the packer too well. The packer has had a tariff on his meat for many years, but it did not prevent him from driving beef producers into bankruptcy. Let them sing their plaint of protection to some one who has not produced beef. It may work on them, but it will not work on the one who has been burned. The beef producer is not going to join the packer in urging a tariff on meat for the sole purpose of fleecing the hungry millions who can not buy half enough of it to eat because of the packers' greed.

The cry is raised against cheap meat from Argentina if this bill passes. If we get any meat from Argentina it will be cheap meat in fact, from a scrubby breed of grass-fed cattle. This meat will not compete with our corn-fed beef, no matter what the price may be. If, on the other hand, it cheapens cheap meat to the hungry folks along our seaboard who are at the mercy of the packers, it will be a godsend to them. No well-fed, decent Christian farmer in Nebraska is going to complain about that. If by some chance meat is a little cheaper on our farms, which is wholly improbable, he is not hurt because this bill gives him cheaper machinery, tools, twine, cloth, clothing, rope, wire, building materials of all kinds, which will be a big offset for any loss he is liable to sustain from free meats. There is no use trying to frighten the farmer. He has been burnt too often.

CATTLE AND HOGS TAXED.

A tariff has been placed on cattle and hogs and other live stock, but, as in the case of wheat, corn, and cotton, it does not benefit the farmer to any extent. There is no place importations of this kind can come from save Canada and Mexico, and the whole output of these two countries could not perceptibly affect our markets if it were all thrown onto us at once. The whole cattle supply of Mexico would not supply our markets for a single week. The little dribs of stock that would come into this country from these sources would be a great benefit, as it would consume our crops and bring money to our people. The shortage of cattle in this country is getting to be a serious matter.

PRICE OF FARM PRODUCTS.

When a priest of high protection wants to paralyze a farmer who is complaining of high prices of the supplies he must buy he always propounds this stereotyped question: "Do you want 10-cent corn, 50-cent wheat, and 4-cent hogs again as you had in the Cleveland administration? Look at the price of your wheat, corn, and hogs now and be thankful for the beneficent effects of a protective tariff." This question used to work better than it does now. That reminder has beaten agriculture out of countless millions of dollars in the last 16 years. There never was a more absurd parallel than this. The prices of the farmer's grain has steadily risen for the valid reason that the output has steadily decreased and at the same time the population has increased. During the last 10 years the five principal cereals have decreased as follows:

The corn crop decreased 21 per cent.
The wheat crop decreased 15 per cent.
The oat crop decreased 12 per cent.
The rye crop decreased 5 per cent.
The cotton crop decreased 9 per cent.

The price of farm products has been forced up because of a decrease in quantity and a constantly increasing demand. No man is so stupid as to believe that a protective tariff against a phantom importation of grains had ever affected the price of grains. On the other hand, he knows that a decrease in production with an enormous increase in consumption brought about by increase in population and facilities for better distribution has increased the price of grain, and no other reason need be sought for the increase.

This is not only true of grain, but as pointed out heretofore in these remarks practically all kind of live stock, especially sheep and cattle and hogs, have greatly decreased, and therefore the price has gone up proportionately. The law of supply and demand affects the price of the farmers' products where the trusts have not interfered.

But contrast the farmers' case with the output of manufactures. The increase in the productions of the manufacturers has been fabulous in the last 10 years. They not only have outstripped the consumption of a constantly increasing population, but they have overrun the United States and are shipping abroad and selling to foreigners. The Secretary of Commerce reports that our exports in steel products alone for the last nine months amount to a million dollars a day. Now, has this enormous overproduction cheapened the products of manufactures to the farmers and consumers? I do not need to answer that question. Every man who has a few dollars to spend knows how each year he is confronted with higher prices for the things he must buy. If the law of overproduction produces lower prices, why are the prices constantly rising? There are two big reasons for it in case of the products of manufacturers, namely, a protective tariff and the trusts. The tariff keeps off outside competition while the trust controls the principal sources of production and the prices. The farmers are not in a trust, therefore they are the victims of trusts. But if the tariff and trusts were out of the way the productions of the factory would rise and fall in price as do the productions of the farm according to the law of supply and demand. Unlike the law of gravity, which can not be suspended, a trust can suspend the operation of the law of supply and demand and create artificial prices. The consumers are now paying artificial prices on every article that is produced in export quantities. The increased price of farm products is natural and logical, because the production is decreasing. It is hoped the higher prices will stimulate greater production, and they no doubt will, when the level is sufficiently high to attract men to agricultural pursuits. Up to the present time, however, the fabulous profits made in other industries have been robbing agriculture of its best men. This Underwood bill will help to equalize the distribution of wealth and therefore greatly benefit agriculture that has been the principal sufferer from a protective tariff.

TO CONCLUDE.

Whatever may result from the operation of this bill, it will stand in history as the most sincere effort to write a bill in the interest of all of the people that was ever made by the House of Representatives. The splendid, able, and unselfish leadership of Hon. OSCAR UNDERWOOD and his able and patriotic assistants on the Ways and Means Committee, is most commendable, and they are to be congratulated upon their splendid work. They know and we all know that our political future is at stake upon the operation of this bill. If it fails after a fair and untrammeled test to do what we believe it will do, then we have been wrong in our theories and should immediately correct our mistake. The country will have proved for the first time in history that water will run uphill.

We have prepared the way for this bill as much as possible, looking to the danger of having its good effects destroyed by a concerted move on the part of tariff-fostered industries to lower wages and close shops for the purpose of forcing the country to sustain the Payne rates. Chairman UNDERWOOD served this notice of warning upon them in his closing remarks upon the bill:

I give you notice now that if any manufacturer attempts in the interest of the Republican Party to threaten labor, there is a bureau in this Government, the Bureau of Foreign and Domestic Commerce, created by the Democratic Party, that will go into the factory, make a thorough investigation, and ascertain why.

It is hoped the notice will be sufficient.

Character and Effect of the Underwood Bill.

EXTENSION OF REMARKS
OF
HON. FRANK W. MONDELL,
OF WYOMING.

IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 8, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. MONDELL. Mr. Speaker, within a few hours, thanks to the caucus-bound majority, this bill will pass the House, and if I read the signs aright it will in due course of time pass the Senate without material change, so far as its important features are concerned. We have endeavored in the course of the debate to call attention to some of the fundamental errors, from our standpoint, and some of the inconsistencies, from any standpoint, of the measure.

The debate has been necessarily unsatisfactory owing to the fact that the caucus-bound majority, responsive to the nod of its leaders, has stood ready to vote down and has voted down every one of the hundreds of amendments offered from this side, not only the amendments which sought to change important rates of the bill, but amendments whose object it was to cure the measure of some of its many inconsistencies.

Holding the opinion that I do that this Nation, with its high standards of living, its high wage scale, can only be prosperous and its people steadily employed, with assurance of satisfactory returns for their efforts, under a protective system, I find it impossible to believe that this measure, radical and revolutionary, protective here, free trade there, and neither logical nor consistent from the standpoint of the general public welfare anywhere, can be placed upon the statute books and put into operation without such a destruction in property values, such a disturbance of business conditions, such a lowering of the rewards of labor and enterprise as will bring about nation-wide disaster and distress certain to produce a political revolution that will speedily restore to power, in all branches of the Government, those who believe in the protective system.

It is, of course, in the range of possibilities that the mighty momentum of unparalleled prosperity, the wonderful recuperative qualities of a marvelously energetic and forceful people, the steadying effect of great combinations of labor and capital compelled in self-defense to make the best of the situation, the sustaining energies of great industrial enterprises which have, in a measure, escaped the verdict of destruction which has been pronounced against others, the powerful influence of the press and of enterprises peculiarly favored, may be potent enough to prevent for a time the complete paralysis which the measure threatens, and thus temporarily retain in power the party responsible for this bill.

If such shall be the case, if for the time being the Nation shall escape such unfortunate conditions as shall bring about a speedy political revolution and return to protection, then the passage of this bill marks a more profound, far-reaching, and, in my opinion, unfortunate change in the industrial, economic, and social affairs and conditions of the Nation than we can at this time fully realize.

The measure is neither protection nor free trade; it is neither tariff for revenue or, as the gentleman from Alabama [Mr. UNDERWOOD] puts it, for competition, but a combination of them all, utterly devoid of real underlying principle and certain to start in motion certain tendencies and establish certain conditions, which, in their effect, will constitute a policy whose disastrous consequences will only be measured by the extent to which it progresses.

Under this legislation the activities of the farm and the forest, the range and the ranch, are placed in approximately or absolutely open and unprotected competition with all the world. On the other hand, the great textile and steel and iron industries are left with such measure of protection that the largest and the best financed of them may be able to sustain themselves, and, by further combination at home and abroad, which is inevitable under this legislation, even extend their operations and be permanently successful. A few industries, such, for example, as that of the assembling here of foreign-made automobiles, will receive an impetus and enjoy a profit they have never known.

The result of this is certain to be the enlargement and enrichment of great importing cities, the more or less gradual but certain abandonment of small manufacturing industries all over the country, and particularly in the towns and small cities of the interior and the West, with a resulting centralization and combination of business in great industrial centers. As a necessary corollary of this growth, tendency, and movement will be a checking of that tendency back to the farm which we have noted with vast satisfaction in recent years, and a constantly increasing tide or movement from the farm, the field, and the ranch to the great centers of import and manufacture. This tendency will be but little affected by the fact that the cotton-growing industry will be benefited rather than injured, because that particular industry is the only one in the domain of agriculture which does not in most sections attract the white farmer of small means or the white agricultural laborer. Carried to its logical conclusion this system would ultimately make us a nation of great importing cities, congested manufacturing centers, tumble-down towns, and indifferently improved, poorly tilled, and largely unprofitable farms and ranches.

Whatever the immediate result of the legislation may be, therefore, industrial or political, the inevitable tendency and the final result of this legislation will be as I have suggested. Vast industrial enterprises and combinations in large cities and manufacturing centers, great free-trade ports; diminishing population, vanishing industries, in small cities and country towns; and impoverished and decaying farming communities; this is the inevitable outcome of a combination of free trade in the country, protection in the city, with a steadily increasing proportion of those things the people use and consume made abroad.

A great American once said, "This Nation can not continue half slave, half free." It is equally axiomatic that the Nation can not survive and prosper part free trade and part protective in tariff. As I do not believe the country will become all free trade with its attendant transfer, according to the admission of all, of a large portion of our industries abroad and its accompanying idleness and poverty at home, I have confidence that whatever may be the immediate political effect of this measure, the tendency it creates, the forces it sets in motion, are certain to produce conditions against which the patriotism and the good judgment of the American people will revolt, and that swiftly, I believe; but certainly, in any event, we shall return to the protective policy. We shall reestablish it free from those faults and errors that have temporarily discredited it in the minds of many people, and go forward once again increasing, widening, and diversifying American industries, finding profitable markets for American products of the field, the forest, the farm, and the factory in a splendid era of prosperity and progress.

The Tariff.

EXTENSION OF REMARKS
OF
HON. MARTIN B. MADDEN,
OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 8, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. MADDEN. Mr. Speaker, under the general leave granted by the House to extend remarks in the RECORD, I print the following:

ACTION OF TARIFF CONFERENCE HELD UNDER AUSPICES OF ILLINOIS MANUFACTURERS' ASSOCIATION IN WASHINGTON, MAY 8, 1913.

WASHINGTON, D. C., *May 8, 1913.*

Hon. F. M. SIMMONS,
Chairman Senate Finance Committee, Washington, D. C.

SIR: On behalf of a conference of representatives of some of the largest organizations of manufacturers and producers of the United States, and including the representatives of the Hawaiian Islands and representatives of individual industries, held to-day in Washington, we have the honor to present the following formal request:

Whereas the Underwood bill includes provision for special duties (dumpling and countervailing duties) designed to prevent unfair or guerilla competition and to guard against bounty-paid goods, and these special duties cover only goods on the dutiable list: Therefore be it

Resolved, That the Finance Committee of the Senate be hereby petitioned to so amend paragraph E, Section IV, and paragraph R, Section IV, to provide that these special duties (countervailing and dumping duties) shall be effective for all articles on the free list as well as those on the dutiable list.

Respectfully submitted.

JOHN E. WILDER,
President the National Association of Tanners, Chairman.
J. KIRBY, Jr.,
President National Association of Manufacturers,
JULIAN SCOTT,
Treasurer International Milk Product Co. and Sheffield Farm-Swanson-Derby Co.,
J. L. TWADDELL,
Secretary National Association Shoe Retailers,
WM. G. COOKE (Hawaii),
Alexander & Baldwin (Ltd.),
BENJ. S. GRAVES,
The Biscuit & Crackers Manufacturing Association,
JAMES R. WATSON,
N. K. Fairbanks & Co.,
JOHN M. GLENN,
Secretary Illinois Manufacturers' Association.
Committee.

ACTION OF TARIFF CONFERENCE HELD UNDER AUSPICES OF ILLINOIS MANUFACTURERS' ASSOCIATION IN WASHINGTON, MAY 8, 1913.

WASHINGTON, D. C., *May 8, 1913.*

Hon. F. M. SIMMONS,
Chairman Senate Finance Committee, Washington, D. C.

SIR: On behalf of a conference composed of representatives of some of the largest organizations of manufacturers and producers of the United States, and including the representatives of the Hawaiian Islands and representatives of individual industries, held to-day in Washington, we have the honor to present the following formal request:

"Whereas the acknowledged purpose in the preparation and prospective passage of the pending tariff bill is liberal provision for the freer entrance to the markets of the United States of goods of foreign origin, to be sold in competition with articles of domestic production; and

"Whereas the policy of exchanging concessions in rates of duties is the principle now controlling the international trade relations of most of the leading commercial nations: Be it

"*Resolved*, That in view of the fact that the pending legislation will result in the admission of large quantities of merchandise which will displace articles of domestic manufacture, it becomes the plain duty of the Government to endeavor to utilize the proposed tariff concessions to the fullest possible extent in enlarging our foreign markets, to the end that a freer vent may be found for our own manufactured goods abroad.

"*Resolved*, That it is the sense of this convention that a clause should be enacted in connection with the pending tariff legislation, ex-

pressly providing that the reductions in the dutiable list and the additions to the free list shall be extended, in the case of nations now maintaining tariffs against articles of American production, only so rapidly as such countries agree, on their part, to extend what the President shall deem a fair equivalent for our own large concessions."

The conference was called under the auspices of the Illinois Manufacturers' Association, in response to a strong demand on the part of the industries affected by the free list in the pending tariff legislation. The manufacturers and producers representing this sentiment realize the obligation of Congress to revise the tariff, but they feel that Congress, in meeting the public demand, should guard against sacrificing the industries whose products are on the free list to the advantage of the foreign manufacturer and producer without benefiting the consumer.

The proposed opening of our markets for the exploitation on the part of foreign manufacturers and producers for the sale of their commodities covered by the free list, without first having made trade agreements with such nations for the freer exchange of our products is, in the judgment of your petitioners, against the fundamental principles on which trade agreements of other nations are made.

In other words, the gates of the American markets should be opened to foreign products only in so far as our people will be benefited. It will not be beneficial to admit products free of duty from countries which discriminate against our manufacturers and producers.

We respectfully request international fair play.

JOHN E. WILDER,
President the National Association of Tanners, Chairman.
J. KIRBY, Jr.,
President National Association of Manufacturers,
JULIAN SCOTT,
Treasurer International Milk Product Co. and Sheffield Farm-Swanson-Dirby Co.,
J. L. TWADDELL,
Secretary National Association Shoe Retailers,
WM. G. COOKE (Hawaii),
Alexander & Baldwin (Ltd.),
BENJ. S. GRAVES,
The Biscuit & Crackers Manufacturing Association,
JAMES R. WATSON,
N. K. Fairbanks & Co.,
JOHN M. GLENN,
Secretary Illinois Manufacturers' Association, Committee.

The Tariff and the Philippines.

EXTENSION OF REMARKS
OF
HON. ISAAC R. SHERWOOD,
OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

Wednesday, May 7, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. SHERWOOD. Mr. Speaker, the high cost of living and the unequal distribution of the earnings of the industrial classes are the two foremost vital questions of the hour. The enormous and constantly increasing appropriations for the support of the Government, coupled with the hogishness of the hundreds of great combines fixing and controlling prices, have been and are the chief factors in raising prices of all articles consumed by the masses, adding to the cost of living and causing the general unrest among the wageworkers.

The remedy and the only remedy lies in reducing tariff taxes and in inaugurating a system of rigid economy in Government expenditure.

Let me refer to this startling and sudden increase in Government expenses following our War with Spain and our wicked and cruel exploitation of militarism, imperialism, and vampirism in the acquisition and control of the Philippine Islands.

Let us see what eight years' increase in Army and Navy has cost the American people: The average annual cost of Army and Navy for the eight years preceding the Spanish War (1890–1898), $51,500,000; the average annual cost of Army and Navy for the eight years since the Spanish War (1902–1910), $183,400,000; the average yearly increase in the latter period as compared with the former, $134,000,000; making a total increase in eight years of $1,072,000,000, or 360 per cent; all raised by heart-breaking taxation of the industrial classes.

This eight-year increase exceeds our entire national debt by $158,000,000. It is three times the estimated cost of the Panama Canal, including purchase from the French company. It is $60 for every family in the United States.

NAVY IS TOP-HEAVY.

We have now an immense top-heavy Navy with 57,000 officers and middies, mostly parasites on the body politic, good men and competent, but with nothing useful to do.

Quite recently 12 of our useless and expensive war craft were cast into the junk heap. The 26,000-ton battleship *North Dakota* cost $12,000,000 originally, and when discarded had cost the taxpayers $28,000,000.

This $28,000,000 would build 1,400 churches at $20,000 each; would buy 6,000 farms at $4,000 each; would furnish a college education for 14,000 poor young men at $500 a year.

In 1823 when James Monroe sent his seventh message to Congress embodying the now universally accepted Monroe doctrine, he declared as a basis of that doctrine that as we did not propose to interfere with European policies or politics we do not propose to have the empires of the old world interfere with our policies or politics, or of any country on this hemisphere, and that means North America, South America, and Central America.

This was a defi by President Monroe to the whole formidable array of Old World monarchies, far more defiant and sweeping than Jefferson's defi to Great Britain July 4, 1776.

THE NAVY THEN.

Did we have an adequate Army and Navy at that time? Let us see. We had only 10,000 soldiers in the Regular Army, including Infantry, Artillery, and riflemen. And how about our Navy? We had 7 wooden battleships, 9 small frigates, 2 corvettes (low sloops with one tier of guns), 5 sloops, 2 brigs, and 5 small schooners—30 war craft all told. And how many sea dogs of war did we have then? Let us see. We had 30 captains, 30 master commandants, 9 chaplains, 356 midshipmen, 53 sailing masters, 16 boatswains, and 18 gunners; all told only 512, besides the lieutenants, quartermasters, and Army surgeons. What was the entire population of the United States at that critical period (1823)? By the census of 1820 we had, including Indians, not taxed, 9,633,822. How much did our Navy cost us in 1823? Nine hundred and twenty-nine thousand five hundred and three dollars, all told.

MANY MILLIONS NOW.

These figures are official. How does $929,503, when we defied all Europe, compare with $141,000,000 now (1913), when we are at peace with all the world, with no defies out, inviting war?

Let us see what we have now. In 1913, 29 modern battleships, 9 other battleships, 38 in all; 15 first-class cruisers, 3 second-class cruisers, 14 third-class cruisers, 32 in all; 21 gunboats, 49 destroyers, 32 torpedo boats, 35 submarines, and 10 monitors—whole outfit of war's horrid array, 217 engines of wholesale murder. Who says that it is not time to cry a halt?

JEFFERSON'S WORDS.

In 1801 Thomas Jefferson wrote:

Hamilton is ardent for the introduction of monarchy, eager for armies, making more noise for a great naval establishment than better patriots, who wish it on a national scale only commensurate to our wants and our means. This class ought to be tolerated, but not trusted.

Here is a fateful admonition for this very hour. And I call up Jefferson again. In 1799 Thomas Jefferson wrote to Eldridge Gerry these words of supreme wisdom that every patriotic American should pause and ponder well:

WOULD RELY ON MILITIA.

I am for relying for internal defense on our militia solely till actual invasion, and for such a naval force only as will protect our coast harbors from depredations, and not for a standing Army in time of peace, which may overcome the public sentiment; nor a Navy which by its own expenses and the external wars in which it may implicate us will grind us with public burdens and sink us under them.

We are nearing that time now. A member of the Naval Committee of this House said recently at a public meeting in Washington that the way we are legislating now our naval budget will reach $250,000,000 in five years.

TIME TO STOP.

Do you not think it is time for some one somewhere to brace up and make some kind of an effort to try and scotch this extravagant and demoralizing militarism and vampirism, and do something to cheapen the poor man's breakfast?

I am for Jeffersonian Democracy, Jeffersonian economy, and a real Christian civilization.

THE FIRST FORWARD STEP.

The Underwood tariff bill, now in continental debate, is the first step of our victorious Democracy to stop excessive, unnecessary, and exorbitant taxation.

The income-tax feature, should the bill be enacted into national law, will raise a hundred millions, and lift a hundred millions of burden from the backs of the wageworkers and the men and women of moderate means and place it on easy shoulders that will never feel the burden. And this income tax is bound to be a permanent factor in our fiscal policy in the future. England has had an income tax, on and off, since 1799, first adopted after the Napoleonic wars and the Seven Years' War with the American colonies. For over 50 years it has been an integral part of the fiscal and economic policy of the Empire. To-day every country and empire of Europe, with three exceptions only, imposes an income tax. So does Japan. So do all the continental islands of the Pacific. It is more humane and

just than a tariff tax, as the burden falls on those best able to pay. A tariff tax, whether for protection or revenue, imposes a burden on everything a citizen eats, wears, or consumes. Hence, a poor man with a wife and 10 children, with no income but his wage earnings, pays approximately twelve times as much tax as an idle hermit bachelor with a comfortable income who produces nothing to add to the census or the national wealth.

An income tax also adds an atom to the more general distribution of wealth and is a tax that is based upon the humane idea that under no possible construction can it work embarrassment or hardship to any citizen.

It should be the first business of the Democratic majority to reduce our enormous aggregate of Government expenses. It can be done by at least two hundred millions, without impairing the efficiency or usefulness of any department. It can be done by cutting down our enormous military establishment; and we can save over $50,000,000 a year by carrying into effect the pledge in the Democratic national platform to lift the "white man's burden" in the Philippine Islands. This is a matter of more vital moment than the much-discussed scheme to revise and reform our system of banking and currency.

POOR PROSPECT FOR CALAMITY.

During the long and interesting debate on this bill there has been a bedlam of unmelodious voices on the Republican side shouting calamity. This is both unfortunate and unpatriotic. The distinguished gentleman from New York, the putative sponsor for the Payne-Aldrich tariff law, has often joined these calamity howlers. And yet the law that bears the "Payneful" name of the late chairman of the Ways and Means Committee not only wrecked the Republican Party, but retired to private life all but two of the old-time stalwart leaders who for two whole decades have initiated and dominated the entire legislation of Congress. I refer especially to ex-Speaker Cannon, the Hon. John Dalzell, of Pennsylvania, and the able and time-tried old-timer, the Hon. Ebenezer J. Hill, of Connecticut.

As I witnessed day after day the affable and experienced gentleman from New York arise, serene, sarcastic, ponderous, and overpowering, in the environment of a small and divided minority, I was forcibly reminded of that pathetic poem of Mrs. Hemans':

The boy stood on the burning deck,
Whence all but him had fled;
The flames that lit the battle's wreck
Shone 'round him o'er the dead.

There is no possible excuse for these panic predictions. What is the average rate in this bill? A careful analysis shows an average rate of 24.8 per cent. Is this going to ruin any industry? No man of intelligence thinks so. Take the Walker tariff of 1846. It averaged 24.1 per cent, and it was accepted by the country as a fair rate by manufacturers. That was 67 years ago, before trusts were evolved out of a high protective tariff and when "monopoly" was not a quoted word among our stump orators, either Whig or Democrat. And way back in 1789, or 124 years ago, before we had any infant industries to nurture or protect, in our first tariff bill, signed by George Washington on July 4, 1789, the average rate, on both specific and ad valorem duties, averaged only 8½ per cent. The Walker tariff of 1846, with an average rate of 24.1 per cent, was the most popular tariff ever enacted. The Hon. James G. Blaine, the foremost Republican statesman of his time, Congressman for 20 years, Speaker, and nominee of his party for President, commends the Walker tariff in the highest terms in his valuable history entitled "Twenty Years in Congress."

I quote for the information of all conscientious students of the tariff Mr. Blaine's historic truths. On page 196 Mr. Blaine says:

The tariff of 1846 was yielding abundant revenue, and the business of the country was in a flourishing condition. The principles embodied in the tariff of 1846 seemed for the time to be so entirely vindicated and approved that resistance to it closed not only among the people, but among the protective economists and even among the manufacturers to a large extent.

So general was this acquiescence that in 1856 a protective tariff was not suggested or even hinted at by any one of the three parties which presented presidential candidates.

The Walker tariff was enacted 67 years ago, when all our industries were of the infantile order and when there was no such word as the noun "trust" in Webster's Unabridged Dictionary.

Now, we are leading every country around the world in many manufactured products, notably boots and shoes, and watches, and flour, and automobiles, and retired Army officers.

Do not forget that in the campaign of 1912 all three of the leading parties—Democrats, Republicans, and Progressives—put a tariff-reduction plank in their national platforms.

Again, I repeat, there can be no substantial reduction in our present onerous tax burdens until we reduce our present enormously extravagant military establishment, and this can not be done while we are wasting over $50,000,000 every year on a military force in the Philippine Islands.

Hence the question of surrendering our sovereignty in the Philippines is the most vital question of the hour.

From the start our rule in the Philippines has been marked by incompetency, cruelty, and crooked official conduct of the most flagrant character. Let me illustrate:

Only a short time ago my attention was called by a prominent Republican Congressman from Kansas to a contract for hay for consumption in the Philippines. The Quartermaster's Department let a contract for 15,000 tons of hay for the Philippines to contractors in the State of Washington at $32 per ton, when Kansas contractors had offered to put 15,000 tons of hay down at Manila at $22 per ton—just as good hay.

THE GRAB WAS $150,000.

The difference between the lowest bidder and the "big one" who secured the contract was $150,000.

THE TRAGEDY OF THE MULES.

Judge J. M. Liddell, formerly of Carlton, Miss., a prominent and reliable gentleman, told me that he was in Manila when a $350,000 cargo of mules arrived from the Pacific slope. These were the mules that were expected to eat this $32 a ton hay. When this mulish cargo left the Pacific slope we (Uncle Sam) had our $350,000 invested in these extraordinarily high-priced mules.

When the cargo arrived at Manila there was just one mule left on his legs, and the high-salaried quartermaster general at Manila reported his death two weeks later.

One of those tropical typhoons, typical of the Chinese sea, struck that $350,000 cargo of mules, destined to assimilate our western civilization with Filipino civilization, and the mules that were not thrown overboard or drowned on deck were leg broken, or back broken, or neck broken, and had to be destroyed. Who was responsible for shipping a cargo of mules without protection by stalls, instead of a loose range on the deck of a transport?

Mr. JONES, chairman of the Insular Affairs Committee, in an elaborate and carefully prepared speech on the floor of the House, delivered January 28, 1913, says:

STARVATION MONEY GRAFTED.

President Taft said in New York that "the Philippines have cost the United States to date only $3,000,000 for civil expenses, and that this money was appropriated to save them from starvation." Well do I remember that Congress donated this money to save the famishing Filipinos from starvation, but does President Taft know that a considerable part of it was expended on the Benguet automobile road, of which I have spoken? The act of Congress declared that the money should be expended "for the relief of distress in the Philippine Islands." In the estimation of the commission these starving Filipinos stood more in need of an automobile road than of the rice to purchase which the American people in their generosity gave this money. The Benguet Road is a highway less than 20 miles in length, built at a cost of several millions of dollars in gold through a mountain gorge to a health resort or residential park, called Baguio, to which place, at great expense, the seat of government is transferred from Manila for several months each year, and where American officials have handsome homes, clubhouses, polo grounds, and other sources of recreation and amusement. The Filipinos have from the beginning been violently opposed to these vast and absolutely inexcusable expenditures. Not only has it cost millions to build this automobile road through rugged mountains—a highway that is used solely for purposes of recreation and pleasure—but the cost of its upkeep is perhaps not less than $100,000 a year. Acting under the authority of the provisions of law, which I have just quoted, the Governor General has ordered the appropriation of a sum equal to the total appropriations made in the previous year for the support of the Government. Having thus gotten into his hands more than $12,000,000 in 1911 and somewhat less than $14,000,000 in 1912 of the public revenues of the Filipino people, the Governor General proceeded to expend these large sums according to his own will, and as in his sole judgment seemed desirable, and with an utter disregard for the purposes for which the prior legislative appropriations had been made. Is there, I ask, a Representative upon this floor who, after reading the law under which Gov. Forbes is supposed to have acted, will not denounce his actions as both arbitrary and illegal? Many an official has been impeached for less than this. Baguio and the Benguet Road were, of course, liberally provided for, new offices were created, and the salaries of existing offices increased. It is needless to say that the salaries of the heads of executive departments were not decreased. It is asserted by a former member of the commission that there were as many as 123 new offices thus created, among them a secretary to the Governor General at an annual salary of $4,500, and it is a most amazing and stupendous fact that the expenditures on account of bureaus and offices for the fiscal year ending June 30, 1912, were $9,638,369.80, as against $8,318,051.56 for the next preceding year, the excess being a mere bagatelle of $1,320,318.24 in gold. A people whose self-restraint is equal to orderly and peaceful submission to acts of tyranny and oppression such as these are surely capable of governing themselves.

Chairman JONES, who visited the Philippine Islands and speaks from personal knowledge, gives the items of expenditures of the military establishment in the Philippine Islands, and every dollar of this expense was paid out of the United States Federal Treasury, and all raised by onerous taxes on the people of the United States. He estimated that the Army in the Philippine Islands has been costing us yearly over

$40,000,000, and he gives items to justify these enormous figures. Again I quote from Chairman JONES:

The Army appropriation bill which passed this House on Tuesday last carried an item of $1,069,470.66 for the pay of the Philippine Scouts for the next fiscal year, and another item of $500,000 to be expended for permanent quarters and barracks for our troops in the islands. It will not be contended, I think, that these scouts would be needed or even available were we to withdraw from the Philippines, and in such an event we would not be required to spend half a million dollars a year for the erection of permanent barracks and costly officers' quarters, as we have been doing for years in furtherance of elaborate plans involving an expenditure of millions of dollars.

Mr. HEFLIN. Is it a fact that our Government has to pay a tariff on all of the supplies that are taken to the Philippine Islands from countries other than the United States for the support of the American soldiery in the Philippine Islands?

Mr. JONES. I believe that is true.

These three items alone aggregate $2,574,470.66, a sum which can scarcely be called "practically nothing."

The fortification bill, which we are now considering, carries for fortifications, searchlights, repair of torpedo-repair structures, mining casemates, etc., all to be expended in the Philippines, $782,350. In addition to this sum it contains appropriations aggregating $720,000 to be expended in our insular possessions, the bulk of which is to be spent in the Philippines. The naval, general deficiency, and sundry civil bills, yet to be reported, will carry large items for the Philippines, as has always been the case heretofore.

What it costs to feed, clothe, house, and otherwise care for 6,000 scouts in the Philippines I can not say, but the sum far exceeds their actual pay, which I have shown to be $1,069,470.66 annually.

What the Navy is costing us in the Philippines, Chairman JONES is not able to inform me. The Navy League, which was so persistent and prolific with statistics when the two battleship proposition was before the last Congress, is not furnishing statistics now of the enormous waste of our hard-earned dollars in sustaining our Navy in those far-away islands. The trans-Pacific fleet consists of nine Army transports. The cost of the operation and maintenance of these vessels, which are used in the transportation of troops to and from the Philippines and in transporting animals and supplies for the use of the Army of occupation, is enormous. The ordinary repairs for each one of them for each and every round trip cost about $2,500, and occasionally they require overhauling at an expense of hundreds of thousands of dollars each.

And the coal for coaling our useless battleships and transports in the Philippines is not mined in the Philippine Islands or on the Pacific slope, but at the Pocahontas mines in southwestern Virginia. It is transported to the seaboard at Norfolk, Va., by rail, something over 400 miles, and then transferred to Government transports which sail around Cape Horn and across the Pacific. And yet we were told when we wasted the first $20,000,000 in the purchase of these tropical islands from Spain that these islands were rich in coal and mineral wealth and agricultural resources, and would add millions yearly to the wealth, on land and sea, of this Republic.

And now it seems they can not raise hay in these islands fit to feed an average Missouri mule.

THE ONE FATAL DIPLOMATIC BLUNDER.

The treaty of Paris was the one idiotic, criminal blunder of our century and a quarter of national life. We allowed a whipped nation to saddle those torrid and horrid islands upon the United States, and to extort $20,000,000 besides.

It has been demonstrated that by that treaty we paid $20,000,000 for a tablet upon which to carve by the bloody sword the epitaph of the Republic of George Washington, Thomas Jefferson, and Abraham Lincoln. All this noisy talk after the ratification of this unfortunate treaty that it was a continental movement for expansion, patterned after President Jefferson's Louisiana Purchase or the acquisition of Florida or New Mexico, is fustian falsehood.

In the treaty with France for the great Northwestern Territory, which was negotiated April 30, 1803, was the following provision:

The inhabitants of the ceded territory shall be incorporated into the Union of the United States and admitted as soon as possible, according to the principles of the Constitution, to the full enjoyment of all the rights, advantages, and immunities of citizens of the United States and protected in the religion they profess.

The treaty for the acquisition of Florida, made in 1819 by John Quincy Adams on behalf of the United States and Ferdinand VII on the part of Spain, was for all coterminus territory peopled by men and women anxious to become a part of the United States, and this purchase gave us free, open way to the Gulf of Mexico. Article 5 of that treaty reads as follows:

The inhabitants of the territory which His Catholic Majesty ceded to the United States by this treaty shall be incorporated into the Union of the United States and admitted to all the privileges, rights, and immunities of citizens of the United States.

THE MEXICAN TREATY.

In our treaty with Mexico, after the Mexican War, the same provision was incorporated as into the Louisiana Purchase and Florida, as it guaranteed citizenship to the inhabitants of upper California, New Mexico, and Arizona. This immense territory was purchased from Mexico for $15,000,000, the same amount that we paid France for all that vast region known as the Louisiana Purchase. The Mexican treaty was negotiated on the 4th of July, 1848.

Witness where expansion ends and imperialism—a government of force—begins. In the Treaty of Paris all the former guaranties of citizenship and equality were cast aside. The Filipinos were left exclusively to the mercy of executive force. The following is the only clause in the Treaty of Paris giving the Filipinos any show of right:

The civil rights and the political status of the native inhabitants of the territory hereby ceded to the United States shall be determined by Congress.

Ever since these islands have been governed by military power.

THE TWIN DEVILS OF RAPACITY.

Militarism is the twin devil of imperialism. Imperialism is a government by force, and militarism is that force. In a time of profound peace with all the world, three months after the peace protocol with Spain had been signed, the President demanded an army of 100,000 men. Unless this vast and unnecessary army was to inaugurate a colonial policy—or imperialism—it was for waste and criminal idleness.

The question has been asked time and again, not only on this floor, but in open-field political debates, What is the civil status of a Filipino now? He is not a citizen of this Republic, because he is taxed without representation. Congress has up to date refused to define his civil or political status. The pretense of a civil government on the islands, even for the Christian Filipinos, is a farce, a delusion, and a cheat.

Chairman JONES, of the Committee on Insular Affairs, in a speech delivered on the floor of the House January 28, 1913, says:

The act of Congress under which the Filipinos are governed was passed more than a decade ago, and President Taft, more than any other human being, is responsible for its provisions. The Governor General, vice governor, members of the Philippine Commission, and the heads of the various executive departments are all appointed by the President of the United States. The legislature, since 1907, has consisted of two houses—this appointive commission, which is known as the upper house, and an elective assembly. The commission, under the organic act, is the sole legislative body for the non-Christian and uncivilized tribes and exercises supreme and exclusive legislative authority over all their territory, their lives, their property, and their public revenues. Let us see what has been the practical operation—some of the actual, tangible results—of this anomalous condition of affairs. In the first place, no measure originating in the assembly can become a law unless it meets the approval of the commission.

It will be seen by the above that the Filipinos are taxed inordinately for the support of a civil government in which they have no power whatever. Even their legislative assembly, elected by a restricted electorate, is subject to the absolute veto of a high-salaried commission appointed by the President of the United States. And only 15 per cent of the Filipinos are allowed to vote for members of this powerless, so-called Filipino assembly.

The Hon. MANUEL L. QUEZON, Resident Commissioner from the Philippine Islands, writes as follows in a Washington journal of April, 1913:

There is another point which shows the inconsistency of the position of those who would keep the Philippines under the United States because only 15 per cent of them have the right to share in the conduct of the government. The proposition is that it is not Americanism to permit that so small percentage of the population shall have in their hands the sole guidance of the ship of state. If it is not Americanism to permit 15 per cent of the Filipinos to govern their countrymen, what is it to permit five Americans to govern the whole population? For this is, in fact, the government of the Philippines to-day—an oligarchical government, monopolized by the American commissioners appointed by the President of the United States, acting without ever consulting the will of any Filipino.

THE HOBSON-JAPANESE SCARE.

If Japan ever desired to annex these islands to her Island Kingdom, she could have done so without much of a war any time during the past 50 years, as Spain only kept about 1,200 soldiers on the islands. No European empire, not even Russia, would care to annex a country in the Torrid Zone. It remained for the United States to produce the dazed-headed diplomats who after a brief opera-bouffe war with Spain were induced by the influence of war-crazed jingoes at home to violate all the time-honored and sacred traditions of the Republic and launch the United States into an experimental colonial policy.

It is a historical fact that no tropical colonies have ever paid as subjects of any European empire.

Every student of current French history knows that her African colonies are fast drifting the French Republic into bankruptcy. Not one of the French colonies in Africa pays expenses. France has held territories in Africa for 200 years. She holds about 22,000,000 of alien races in her commercial control. She has no "open door," but monopolizes all the trade she can control. Her exports into all her colonies only aggregate about $10,000,000 per year, while the cost of her civil and military establishment in these colonies is over $14,000,000 per year.

Imperial Germany has not a single colony that pays expenses. In her costly South African colony—costly in blood and treasure—Germany has a fine set of government buildings, with garden spots and harbor improvements in the settlements at Camaroon, and a well-stocked graveyard of what were once good German boys—victims of the deadly climate and the expansion policy. And see what Germany has lost by militarism. Look at the hundreds of thousands of stalwart sons of the Fatherland who have fled from the Empire because of that seven years of imposed service in the German Army and found homes in the United States.

And look at Italy, nearly ruined by militarism and a colonial policy. Every student of history knows the result of colonial wars in ancient Italy, but modern Italy is no better. She has lost yearly not less than $15,000,000 on her possessions along the Red Sea. Italy's entire import trade with Massowah, with its open-door policy, only amounts to about $5,000,000 per year, while Italy's yearly expenditure on account of her possessions along the Red Sea has been $24,000,000 per year. Thirty years ago, under King Victor Emanuel, the new nation was dedicated to liberty and progress. But her rulers caught the imperial fever in the cradle, and she started the military spirit to make Italy a world power by expansion, just as we tried the world-power idea in the Philippines. She raised a big standing army, as we have done, and built the fourth biggest navy in all Europe. They have saddled the people with a public debt of two billion and five hundred millions and the great mass of 30,000,000 people are taxed to a point where hopeless poverty takes counsel of despair. Militarism has ruined millions and sent hundreds of thousands of her paupers to the United States. The military jingoes of Italy brought on the recent war with Turkey, which practically destroyed her navy, killed thousands of the most stalwart men of the Italian Army, and got nothing out of it but a staggering addition to the national debt.

THE PHILIPPINE QUESTION.

The Philippine question is not only an economic question but it is a moral question; a question in the broad and humane domain of civics that touches the very vitals of free constitutional government in the United States. The able and alert and experienced chairman of the Committee on Insular Affairs, Mr. JONES, of Virginia, has a bill fully matured, that has been carefully scrutinized by the champions of Filipino independence not only in the United States but in the Philippine Islands, and there can be no possible excuse for not pushing this bill here and now into national law.

From the start our rule in the Philippine Islands has been a military rule, or a rule of force, and not a rule by consent or approval of the Filipinos. It has cost us already, according to the figures given me by the Anti-Imperialistic League, of Boston, over $1,000,000,000 and the lives of over 16,000 soldiers of our Army, and has added not less than $20,000,000 more to our pension list, and out of it all we have realized nothing but disappointment and recurrent and wasteful and cruel war, in which over 80,000 Filipinos have been slaughtered.

DOES TRADE FOLLOW THE FLAG?

Neither is that catchy philippic true that trade follows the flag. It is not even true of England, the leading commercial nation of the world. England's best trade to-day is where her flag does not float. The per capita consumption of goods and wares in England's great Asiatic possessions, including India, is only 97 cents, while England's trade in the United States, in Mexico, in Brazil, in Central America is 15 times as much. To-day we are literally wasting our substance in policing the Philippine Islands for the benefit of Japan and China and the four leading European powers.

A DISINTERESTED WITNESS.

As an appendix I submit extracts from a very interesting and valuable address by Dr. John McDill, of Milwaukee, a noted physician and surgeon and specialist, who spent 13 years in the Philippines. Dr. McDill is recognized as one of the world's best authorities on tropical diseases. He is also a thorough student of sociology.

The testimony of such a disinterested and competent witness as Dr. McDill will be accepted over that of our high-salaried officials in Manila, who are disinclined to surrender their easy jobs, or the globe trotters and exploiters from the United States who visit Manila as deadheads on a Government vessel, and who, after being wined and dined by the Government officials, civil and military, come back to the States and write glowing reports of our rich find in the Philippines.

THE PHILIPPINES—AMERICA'S LOST OPPORTUNITY IN THE ORIENT.

[By Dr. J. McDill, Milwaukee, Wis. Read before the Milwaukee Press Club Apr. 9, 1913.]

Mr. President and members of the Milwaukee Press Club, I am exceedingly glad of this opportunity to express my opinions on what I find to be a subject concerning which the American people are either indifferent or ignorant or misinformed.

This question of the Philippines is a very serious one, involving our national honor, and with the faith I have in my fellow countrymen I can but conclude that their indifference to it is due to their misinformation and misunderstanding of the facts.

For a proper appreciation of these facts, although at the risk of boring you, I must briefly relate the events that led to our present position in these far-away islands. I want you to consider attentively this relation, because our policy to-day is a corollary of the mistake we made a decade and a half ago.

On April 21, 1898, America declared war against Spain for the purpose of freeing the Cubans from the cruelties of Spanish dominion. In strayed on May 1 the Spanish fleet in Manila Bay. No attempt was made by Admiral Dewey to take Manila or, in fact, any territory outside of the naval station at Cavite. On the receipt of the news of Dewey's victory in Washington President McKinley cabled Admiral Dewey to know how large a military force would be necessary to complete the reduction of Spanish power in the Far East. Admiral Dewey replied, requesting 5,000 men. Meanwhile Aguinaldo was brought down from Hongkong by Admiral Dewey, put ashore at Cavite, and told to raise his army. This Aguinaldo did on the assumption that America would carry on the war in the Philippines with the same object in view that she had in Cuba. So great was Aguinaldo's success that in a few weeks the Spanish forces were driven entirely out of the Provinces, and Spanish power in the islands was confined to the city of Manila, so that on the arrival, by the month of August, of 15,000 American troops, three times the number suggested by Dewey, all that was left for America to do was to capture the city of Manila, which had stood a two-months siege by the insurgent forces.

Accompanying the American troops was a geological expert appointed from Washington to report on the mineral resources in the islands. Meanwhile peace negotiations were under way and the peace protocol was signed on August 13. Now, why did we in these peace negotiations demand the cession of the Philippine Islands?

On account of the reverence in which he is held by the American people, I am aware that any criticism of the policies of Mr. McKinley may be unpopular, but a careful and unprejudiced study of the events of the year 1898, preceding our acquisition of the Philippines, will show that whatever altruistic motives have since been alleged for our action, the motive in Mr. McKinley's mind in the summer of 1898 was the securing of desirable possessions in the Far East. It would appear that, flushed with the victories of our Army and Navy and the sense of might, and lured on by the dream of possible American control in the Orient, Mr. McKinley determined on the acquisition of the most desirable of the Philippine Islands, without any reference to the wishes of the Filipino people, but solely in the interest of trade expansion, after having cabled Admiral Dewey for information as to coal and other mineral deposits and as to what would be the most "desirable" island to retain. President McKinley instructed his peace commissioners as follows: "Incidental to our tenure in the Philippines is the commercial opportunity. The United States can not accept less than the cession in full right and sovereignty of the island of Luzon."

After a consideration of the testimony of Gen. Merritt and other officers, who had been in the islands during July and August, 1898, and who had learned their geography, the American peace commissioners decided that it would not be safe to American interests to demand less than the cession of the whole archipelago. The Spanish commissioners were horrified at this and expressed surprise that the Americans could think of such a thing, as no mention of the surrender of the Spanish sovereignty in the Philippines was made in the terms of the peace protocol. It was not until the offer of $20,000,000 was made that Spain would consider the proposition. That is how we came to pay that $20,000,000. It was not the salve to wounded Spanish pride that it has been reported to have been; it was because we wanted the Philippines for purposes of trade expansion, and had not thought of it when the terms of the peace protocol were arranged.

There is nowhere exhibited in all the inquiries made by the administration any solicitude regarding the Filipinos or their desires and aspirations. It is not apparent from a careful review of the testimony and reports submitted to the Paris Peace Commission that they considered anything but the benefits that might accrue to the United States from the possession of the Philippine Archipelago. All available information concerning especially the mineral resources of the islands, including the report of the before-mentioned geological expert, was collected and incorporated with this data in the official annals and various magazine articles on trade and economic conditions.

Nowhere is there any expert report on which was the most important question of all—what were the wishes of the Filipino people. The peace commissioners, it is true, were concerned only with the separation of the islands from the sovereignty of Spain, which was certainly what the Filipinos wished, but what they further wished and what was just as necessary at the time was a definite authoritative declaration from the lawmaking power of the United States as to just what would be their status in their relations with this Government.

On August 21, 1898, Mr. Hay transmitted to Mr. Day, the president of the Paris Peace Commission, a letter from Gen. Sir Andrew Clarke, whom he calls "one of the greatest living authorities in England on all subjects connected with the government of the islands in the Malay Archipelago."

Gen. Sir Andrew Clarke was the man who initiated the movement for British intervention in the Malay Archipelago, which has resulted in the federation of the Malay States, the romance of whose trade development has astonished the world. Sir Andrew sums up his suggestions in a single sentence: "Enlist native sympathy by fairness and justice and rule through native agents supervised by carefully selected American residents."

Following this in the records of the peace commission is another letter, written by a relative of Sir Andrew Clarke, a Mr. G. S. Clarke, who apologizes for offering his suggestions, but breaks through his British reserve to say in regard to the work accomplished in the Malay States: "How has this almost miracle been accomplished? Not by troops, not by force in any form, but wholly by a policy which I suggest is now open to you. In the main it consisted in admitting native rule, and placing by the side of each native ruler a strong and upright Englishman, who guides and restrains. Here is a protectorate in the best sense, and it does not cost us a farthing."

This was the policy of Imperial England, a policy of conciliation, consideration for, and recognition of, the native ruler. What was our

policy in the Philippines? A complete annihilation of the very efficient native government that had been instituted and an insistence on the recognition of the sovereignty of the United States and an enforcement of it by an Army of 120,000 men at a cost of at least $300,000,000.

Let those who believe in the necessity of retaining the Philippines under the present policy for the purposes of development consider the record of our achievements in trade since our occupation of them, and compare it with what England has accomplished in the Malay States under a mild and diplomatic protectorate such as we might have exercised over the Philippines. In the first 10 years of the existence of the Federation the imports jumped from $788,075 in 1875 to $7,538,855 in 1885, an increase of nearly tenfold; the exports went from $701,430 to $8,429,835, an increase of more than tenfold. From 1890 the sultanate of Pahang is included, so that the area of the Federated States is 27,506 square miles, with a population of 1,056,999. In 1890 the imports valued $13,552,460, the exports $15,218,475; by 1911 the imports had reached $38,810,355 and the exports $67,830,540.

The Philippines, with an area nearly five times greater and a population of seven times as many, had, in 1900, imports to the value of $38,007,380 and exports of $40,123,610. By 1911 the imports had increased to only $48,024,407 and the exports to only $44,887,291. The reason for this poor showing in the trade development of this country, of tremendous possibilities is, of course, to be found in the lack of cooperation which the armed imposition of our sovereignty necessarily entailed. But there is a further reason.

By the year 1902 we seemed to have been stayed in our career of conquest of a weaker people by an awakening of the conscience of the administration to a realization of the incompatibility of our conduct with the principles in which we had been bred and brought up. To make amends to the victims of our ambition, the cry went out, "The Philippines for the Filipinos," and Congress proceeded to enact legislation that would convince the Filipinos of the belated beneficence of our intentions and that we were not there in our own interests. Rigid restrictions were placed on the holding of public lands, mining claims, and stock in corporations by the act of July 1, 1902. This legislation has been effective in preventing the growth of large interests and has also placed a barrier to the development of the country. Many persons in the islands saw in this only the fine Italian hand of the monopoly interests in the United States who when they had looked the ground over carefully would have it repealed. However that may be, this legislation has been a weapon in the hands of the Filipinos to check the spread of our influence through the introduction of American capital. They were not able to resist our arms, but they can and do and will resist the development of their islands by foreign capital while they are under the sovereignty of a foreign power if that foreign sovereignty is made a condition of their development.

But, to go back to the year 1898, to justify our coercion of them the Filipinos were told that being unfit to govern themselves "their islands were being taken over by the American Government to be governed for the benefit of the Filipino people, and that as they developed fitness for partial self-government it should be gradually extended to them." This meant, of course, that we constituted ourselves the judges of their fitness.

In considering this phase of the question I want you to bear in mind that we are an occidental people, and the Filipinos, although a Christian nation, are orientals. We were wholly unacquainted with people of oriental descent and know nothing of their ideals and aspirations, but we proceeded to force upon them our standards of life and happiness on the principle that ours were the only correct ones.

Price Collier, writing recently of oriental peoples, among whom he seems to have traveled and observed much, says: "The peoples of oriental descent number more than one-half of the world's population; we occidentals have overestimated our importance, our influence, and the effect of our impact upon the orientals; we may conquer them, but we can change them but very little; many things that we consider of fundamental importance have no significance with them. Our much-vaunted civilization does not impress them and our strongest prejudices seem silly to the oriental. Long residence abroad by anyone brings more than the suspicion that all of us occidentals are provincials."

As a matter of fact, we knew nothing of the Filipinos or their capacity for self-government when we decided on acquiring their islands, and from what I have been able to gather since my return from 13 years' residence among them the American people have not been permitted to learn much, if anything, about them since. The question has been fairly stated by Judge Blount in his recent valuable book The American Occupation of the Philippines. "It is utterly fatal to clear thinking on this great subject, which concerns the liberties of a whole people, to treat Mr. Taft's reports as commissioner to and later as governor of the Philippines as in the nature of a judicial decision on the capacity of the Filipinos for self-government. When he consented to go out there he went, not to review the findings of the Paris Peace Commission, but at the urgent solicitation of an administration whose fortunes were irrevocably committed to those findings, including the express finding that the Filipinos were unfit for self-government, and the implied one that we must remain to improve the condition of the inhabitants. He was not a judge come out to decide on the fitness of the people for self-government, but an advocate to make the best possible case for their unfitness and its corollary, the necessity to remain indefinitely just as England has remained in Egypt. Unless some one goes out to present to the American people the other side of the case they will never arrive at a just verdict."

The census of 1903 shows the population of the islands to consist of 7,600,000 people. Of these, 7,000,000 are Christians and 600,000 are non-Christians. Of these non-Christians half are Moros or Mohammedans living in Mindanao and the Jolo group and the other half are uncivilized people of the mountains, in tribes living in widely separated districts. These 600,000 people are really a negligible quantity in the general political equation, but, unfortunately, these are the people who, for political reasons, have been the most widely advertised feature of the Philippine Islands.

Their repulsive pictures and habits have been persistently and officially portrayed in the leading magazines of this country and by lecturers until the majority of Americans regard them as typical of the Filipino people. The lecturer in vogue just now in America flashes on the screen a life-size rear view of a geestring-clad Bontoc Igorot at the bat, to show how the Filipinos have taken to baseball. This picture furnished to the dignified Woman's Club of Milwaukee last week their most vivid memory of a lecture on the Philippines. Contrasted with this are pictures depicting the wonderful possibilities of the Islands in hemp, copra, sugar, and tobacco cultivation, with suggestions as to what has been and can be done under American management. The entire issue of last September's National Geographic Magazine was devoted to the Head Hunters of Northern Luzon, and evidently has made a great impression all over the country. This article of a hundred pages and 106 wonderful illustrations portraying the most horrid habits possible to human kind, was written by a prominent Government official, an American member of the Philippine upper house, the man mentioned in Judge Blount's recent book as "the official digger-up of non-Christian tribes" and as "the direct calamity that has befallen the Filipinos since the American occupation." This writer's official reputation for honesty is protected in the inconspicuous closing sentence, which states that "the sometimes highly objectionable customs which have prevailed or still prevail among the million non-Christian inhabitants must not be credited to the Filipinos, the civilized and Christianized inhabitants of the Philippines, of whom there are some 7,000,000." But this obscure note fails to remove the false impression conveyed. The expense of the collection of this and similar damaging propaganda is paid for out of the pockets of the helpless Filipino people.

An exuberant magazine article of last year, referring to Brig. Gen. Clarence B. Edwards's achievements in Philippine affairs, spoke of "the strides we have made in the development of the 8,000,000 naked savages, gory head hunters, grinning Moros, and what not that Dewey pulled out of the wet under our star-spangled umbrella." That is the sort of popular trash with which Americans are blinded to the importance of this great national problem. The Filipino people are now the collection of ethnological curiosities they have been represented to the popular mind. This is a cruel calumny.

What was the estimate of the Filipinos before it became necessary to justify the McKinley policies? Admiral Dewey cabled in 1898 to President McKinley and later reiterated in a letter, "They are far superior in their intelligence and more capable of self-government than the natives of Cuba; I am familiar with both races, and further intercourse with them has confirmed me in this opinion."

George Kennon, after investigating much testimony in 1901 for the Outlook, says: "The American in the Philippines who seems to me to regard the people most fairly and to state his conclusions most frankly is Gen. MacArthur. Gen. MacArthur says of the character of the people, in his report to the Adjutant General, October 1, 1900, 'The Filipinos are not a warlike or ferocious people,' and that 'although the bands of insurgent guerrillas are not soldiers in the true sense of that word, it is a mistake to classify them as Ladrones or armed robbers.' The Filipinos generally he characterizes as 'sensitive, intelligent, generous, and flexible.' In the organization of local administration he declares that 'they have evinced such intelligent capacity as to encourage the expectation of rapid progress in the art of self-government when the larger political administrations are organized.' In the matter of education he describes them as 'eager to receive at once all that can be imparted,' and adds that 'this almost universal aspiration for education should appeal strongly to American sympathy.' Gen. MacArthur in 1901, in a personal conversation in Manila, stated to me that if the United States would fix a time for Philippine autonomy he would like nothing better than the task of assisting them in their problems for self-government."

PERSONAL ESTIMATES.

My personal experience with the Filipinos extended over a period of 13 years, the first 3 years of which I spent in the Army; during the last 5 years I was connected with the civil government as professor of surgery on a semiofficial basis in the University of the Philippines. In the Provinces and in Manila I met men and women of all classes, and I doubt if many Americans came to know them better.

What impresses one on first meeting a Filipino is his self-possession, dignity, and courtesy; he has an exalted idea of good breeding and an intense appreciation of elegance of manner and of dress. Even the ordinary Tao of the lowest class is quick to perceive the difference between the person of breeding and the boor. Their judgments in this regard are unerring. You have frequently heard of their universal love of music as a racial characteristic; among the educated this reaches a high degree of development. An appreciation of and familiarity with the best things in not only music but art is much commoner than in the corresponding social class in America.

The women of the upper and middle classes are notably characterized by an exquisite manner, and in graciousness and poise are unexcelled by the women of any country. If, as John Adams has said, "the manners of women are the surest criterion by which to determine whether a republican government is practicable in a nation or not," the Filipino people are preeminently fitted to govern themselves. It was also the conviction of the Spaniards that the Filipino woman was the mental and intellectual equal if not the superior of the man. When final action on the suffrage question is taken there the women should be given the franchise.

It is nonsense to say that the Filipinos are inscrutable or mysterious; they are nothing of the sort; they are quite understandable and will talk freely and frankly if allowed to be on such terms as permit of freedom and frankness. There is an ample supply of real sympathy between Americans and Filipinos who understand one another. As a race they are never worried by illness, and their malaan tendencies have considerable to recommend them. As laborers and artisans they are capable of high efficiency if properly handled and will take a personal pride in their work. Although the lower classes are subject to impulses of a violent nature, often resulting in personal injuries, it is doubtful if they are more so than the same class in this country.

As a race the Filipinos are conservative; their decisions are arrived at only after a careful consideration of every phase of a question. They are clever lawyers, and their jurists are notably impartial, upright, and profound; their decisions reviewed by superior courts compare most favorably with those of the American members of the bench.

In conclusion, let us look at this question fairly. It seems evident that our Philippine policy has been a mistake. We subjugated these people in what we thought were the interests of trade expansion and the strengthening of our influence in the Orient; we justified our doing so by a hypocritical assumption which the Filipinos resent, namely, that of their inability to govern themselves. We have lost the opportunity of earning a nation's gratitude and love and of assisting them in the proper development of their wonderful country. Our failure to avow authoritatively our intentions has instilled in their minds suspicion and distrust. The great American Republic is holding 7,000,000 people against their will and governing them by a theoretically benevolent but essentially despotic oligarchy of five royally salaried American officials, who firmly insist on our retention of the islands for the betterment of their people. The successors of these officials 100 years from now will sing the same song.

No one will deny that America has done much for the Filipinos, but with much awkwardness and hard feeling and at great cost. The most conservative estimate places the cost at $500,000,000, while Senator Hoar's figures, which have not been disproved, put it at twice that amount. There is always the question, Could it not have been done by the Filipinos themselves at their own expense under wise and amicable guidance from sympathetic Americans, which they would surely have invited?

Whether one agrees or not with our right to decide on the fitness of the Filipinos for self-government, the fact remains that it is left for us to decide, and it is time we took enough interest in them to do it. The Jones bill, which provides for a definite authoritative statement of their status, has been favorably reported to the House, and will be acted upon at the next regular session of Congress.

On the assumption that whatever our Nation has done has been the right thing most Americans have blindly accepted the official statements and interpretations of the facts, and have not troubled to inform themselves of the true conditions. It is the duty of the press to arouse interest in this great question by a publication of the real facts instead of giving currency to the prejudiced statements contained in official reports or the careless comments of globe trotters and irresponsible ex-soldiers.

With the radical change in the administration, which the people so emphatically decreed, there is hope that the question will be treated honestly, without hypocrisy, without a stultification of American ideals, and that the Filipinos will be given a square deal.

"There is no man or set of men wise enough or good enough to govern other men without their consent." (Abraham Lincoln.)

Income-Tax Primer.

EXTENSION OF REMARKS
OF
HON. J. HAMPTON MOORE,
OF PENNSYLVANIA,
IN THE HOUSE OF REPRESENTATIVES,

Wednesday, May 7, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. MOORE. Mr. Speaker, under general leave to extend remarks upon the tariff bill—H. R. 3321—I submit herewith some lay-mind questions and answers in primer form with reference to section 2—the income-tax feature of the bill. I adopt this method because the "Tariff primer," introduced in general debate on the Underwood bill, was fairly successful in inducing people to read up upon the details of this vitally important economic question, which they are so much inclined to disregard except in the heat of political campaigns. The income tax as written into the Underwood tariff bill is another evidence of the ease with which the people put on a boot at the instance of political agitators, though it develops corns and bunions when they undertake to wear it.

The reason the Democrats introduced an income-tax feature in their tariff bill was to make good their pretense that they would "relieve the people" of "the frightful burdens" which they have insisted the tariff imposed upon the people. In reducing the tariff at the expense of American capital and labor they will deprive the Government of at least $100,000,000 of revenue, which is now paid by the foreign manufacturer, or by the American importer who prefers to spend American money in foreign countries, and this loss in tariff revenue will create a deficiency in the running expenses of the Government. In order to avoid such a financial failure the income tax is resorted to as a saving clause.

It is explained by high Democratic authority, supported chiefly by the representatives of States which do not encourage industrial enterprises, that the income tax will smite the rich and relieve the poor. Just how it will relieve the poor is not clear, but the man who is not rich and who has little or no property is assured that while he is to be exempted the income tax will punish those who have acquired property or who have otherwise successfully met the battles of life.

In the accompanying primer I shall undertake to discuss the Democratic method of "punishing the rich and relieving the poor," and shall adopt the simple plan of putting questions and answers, that the average man who is neither a lawyer nor an accountant may understand.

AN INCOME-TAX PRIMER.

Question. What is an income tax?

Answer. It is a tax upon the earning power of the people.

Question. What is the purpose of it?

Answer. In war times it is to raise revenue. In the Underwood tariff bill it is to enable the Democrats to make a pretense of punishing the Carnegies and the Rockefellers and other alleged "malefactors of great wealth."

Question. Do politics enter into it?

Answer. It is suspected politics have much to do with it, because without "malefactors of great wealth" it would be impossible to conduct a Democratic or even an "uplift" campaign.

Question. Will the income tax destroy the wealth of the Carnegies and the Rockefellers?

Answer. No; it will be "nuts and raisins" for them and for their lawyers, their expert accountants, and their bookkeepers. The income tax, as provided for in section 2, will serve principally to harass "the little fellows" who are the ultimate victims of the entire tariff bill.

Question. How will it affect the small business man, the country merchant, the successful farmer, and the man who draws a salary?

Answer. It will give them a fine opportunity to engage lawyers, employ bookkeepers, perjure themselves, or "stand in" with the revenue collectors. They will have to account for what they take in and what they pay out from one end of the year to the other.

Question. But this tax is supposed to be in the interest of the poor man.

Answer. Yes; it is supposed to be, and that is what the people have been made to believe, but even the family man, unless the revenue collector fails to do his duty, will be obliged to keep an account of what he makes and what he spends. In this respect the bill is not only inquisitorial but educational. It encourages every man of thrift to become a bookkeeper or a lawyer. It applies to every man with a net income of $4,000 whether he be engaged in a business, a trade, or a profession. If he be not rated in the malefactor class, which has to pay at the rate of 2 and 3 per cent, he must pay 1 per cent upon all his earnings, denominated "income," above $4,000 per annum. Thus, the numerous small business men bear the heaviest burden of the law and will be subjected to the greatest annoyance. Likewise the expense of catching the small man will be far greater than that of reaching the so-called malefactor.

Question. Is it intended to apply the tax to small business and the heads of families?

Answer. As the bill reads, "the net income of a taxable person shall include gains, profits, and income derived from salaries, wages, or compensation for personal service of whatever kind and in whatever form paid," and it further provides that in computing net income for the information of the revenue collector certain deductions shall be allowed "not including personal, living, or family expenses." If the revenue collector suspects that a man earns from $3,500 to $4,000, or that the members of the family put together earn that much, though he be the head waiter in a city hotel, the manager of a shoe store, or the owner of an automobile truck carrying produce from the farm, the taxable person would be subject to the inquisition and, if found guilty of making a success of his business, made to pay.

Question. Could a rich man evade the tax?

Answer. Yes; because as the bill is written it provides for certain exemptions by which a shrewd investor could cover his tracks. For instance, the bill exempts the holders of national, State, and municipal or county bonds. It may have been intended to encourage the sale of these bonds, with the view of equalizing the distribution of wealth, but whether this was the actuating cause or not it remains that the wealthy investor could escape the tax by transferring his holdings from railroad, manufacturing, or industrial enterprises to bonds of the city, State, or Nation. The effect of such a recourse would be to make it more difficult to obtain money for industrial and railroad enterprises, which give employment to labor, and to encourage investments in municipal and State enterprises, upon which the interest must be paid by the people. It would thus relieve the so-called "idle rich" from assuming the risk that is incident to industrial undertakings and would fasten their hold directly upon the people.

Question. That would not seem to "lift the burden from the backs of the people"?

Answer. No; but it would tend to show the people how they suffer when they destroy the superstructure upon which their prosperity has been attained. A majority of the people voted in November, 1912, for a change in the tariff system which imposed no direct taxes, which closed no mills, but which increased the wage-earning power of the people and kept the Treasury full. It is doubtful if the people understood that the tariff should be so revised as to compel them to stand a direct tax upon their earning power to make up for losses in the reduction of an indirect tax.

Question. Who are exempted from the payment of the tax?

Answer. First, those who do not earn $4,000 a year, and then the President of the United States, who is paid $75,000 a year, the judges of the Supreme Court, and certain other well-paid officeholders, not including Congressmen.

Question. Why will the income tax be oppressive?

Answer. Because it adds to the burden of every responsible man who is already taxed in various ways. The owner of real estate must pay his local taxes, and if he is in business he must pay a mercantile tax, and if the business is incorporated he must pay the corporation tax, both national and local. With the income tax added, those already taxed in one form or another will have to pay more than they do now, and a very large part of what they pay will be expended for the support of the

officers of the law charged to levy and collect the tax. In outlying districts and in States where the population is widely scattered the expense of investigation and collection will be out of proportion to the returns.

Question. Will not this make the tax sectional?

Answer. Whether it is sectional or not, the fact remains that a few of the big industrial States will pay most of the tax for the benefit of the others. It is expected to collect about $69,000,000 altogether to make up the tariff loss of $100,000,000. Of this $69,000,000 one-half is to be collected from New York, Pennsylvania, Illinois, and Ohio; the other States are to pay the other half. The collections expected of New York amount to over $15,000,000, of Pennsylvania to over $8,000,000, of Illinois $7,500,000, and of Ohio $4,500,000. Alabama, the home of the chairman of the Ways and Means Committee, is expected to contribute $324,500, and Tennessee, the home of the gentleman who devised the income-tax clause, is expected to contribute $589,000.

Question. In what respect are heads of families affected by the bill?

Answer. Evidently it is intended that fathers shall account for the family income, including that of minor children, whose aggregate earnings would be taxable if they reached the limit prescribed. Trustees of estates must report therefor, and in certain instances principals and agents and landlords and tenants are susceptible of double taxation, while guardians must report for orphans who in certain instances are treated inequitably. Exceptions are made with regard to income derived from savings banks, mutual fire insurance companies, but policyholders in mutual life insurance associations are not exempt. The bill taxes the savings of the mutual life insurance associations whose membership is said to exceed 6,000,000 persons. All of these adopted the mutual life insurance method of accumulating funds for the benefit of those who would otherwise be left uncared for. In this respect the tax falls upon the poor man who is trying to do the best he can for his family. The mutual life insurance associations are obliged to pay taxes to the State and Nation, and this additional tax must come out of the policyholders.

Question. If the income tax is burdensome, why is it to be imposed?

Answer. For the reason, as stated, that the Democratic Party must "make good" after it destroys the Payne tariff law. The Ways and Means Committee reported its guess that approximately $69,000,000 would be recovered on income tax, and that that, with the Payne law corporation tax, would be sufficient to carry on the Government after the passage of the new law and leave a surplus in the Treasury the first year of $1,335,000. There was a balance of over $37,000,000 in the United States Treasury at the close of 1912, and with the Payne tariff law still in effect that balance will probably amount to $50,000,000 before the close of the fiscal year, June 30, 1913. The inauguration of the policy of the Democratic direct tax against the Republican system of protection, which raises a surplus of revenue at the customhouses, is responsible for the change to so narrow a margin.

Question. Do Democrats generally agree on the policy of direct taxation?

Answer. Not exactly, nor at all times. The gentleman from Alabama [Mr. UNDERWOOD] does not believe in the indirect method except for purposes of revenue. He is opposed to the Republican system of protection, which makes it possible under the Payne law to leave a surplus of $50,000,000 in the Treasury. The gentleman from Pennsylvania [Mr. PALMER], who is credited with so close a contact with the White House as to speak the presidential mind, in opposing an amendment to tax incomes of less than $4,000, argued against the indirect method, holding to the view that "the indirect taxes which the people have been paying heretofore" are "largely consumption taxes," and therefore weigh unduly upon the poor.

Question. What are the views of President Wilson upon this question?

Answer. The President's recent utterances appear to be in line with those of the gentleman from Alabama and the gentleman from Pennsylvania, but as Woodrow Wilson, the educator, in an address to the Tariff Board in 1882, he was not so positive that the General Government should levy direct taxes, but believed direct taxation should be left to the States. In that address Mr. Wilson said:

"The necessities of our Government are the necessities of the revenue; and it is well known that our Government is not embarrassed from any necessities of revenue; on the contrary, it has an immense surplus. It is undoubtedly a part of true wisdom that the taxes laid by the General Government should be indirect taxes. The province of direct taxation should be left to the States, and in order that the two systems may not clash and overburden the people, it is a part of wise policy that the National Government shall make the most of its taxation indirect."

Question. What actuated the Democrats in specializing the tax on incomes at $4,000 and over?

Answer. They were afraid to fix a lower rate. They knew if they taxed incomes of $800 and over, as is done in England and in Wisconsin, they would bring down the wrath of the rank and file of the voters of the country. They did not think it necessary, either, to make any distinction between married men who support large families and single men who do not. This distinction is made in the Wisconsin law. The Democratic leaders admit that to make the tax uniform as is contemplated by the Constitution and public policy would be to take away the valuable campaign asset of "relieving the poor and taxing the rich." They took their chance on the $4,000 limit, believing the great mass of voters of the country would not be affected by it.

THE LESSON AND THE MORAL.

Mr. Speaker, to the foregoing questions and answers I have very little to add. It may be, as many gentlemen have indicated in debate, that the income tax is an ideal method of raising revenue. Perhaps it would be if it were uniform and if the so-called burden were equally apportioned and were not specialized or sectionalized, as in the present bill. There are 30 pages of the income-tax section, of which the gentleman from Tennessee [Mr. HULL] is the author and committee champion, and credit may fairly be given to him for the industry and research he has devoted to so important a proposition. But when this is said we may justly enter upon a criticism of the measure itself. We are aware that an income tax has been discussed by the various political parties in recent years and that Congress was lately authorized by constitutional amendment to levy such a tax if it deemed it advisable. But why should such a tax be levied now, when the country is prosperous and at peace with the world? And why should it be applied to only a few of the people, to the great annoyance of most of the people, as proposed in the present bill? The 30 pages of the income-tax section of the bill are so intricate and legally technical that an income-tax primer such as the foregoing will be even of scant service to the average citizen who has to pay. It is one of our great misfortunes to-day that the average man who wants to act intelligently in public affairs is led to shout for any kind of "reform" in political campaigns, and frequently votes authority and instructions which, enacted into law, increase rather than diminish his burdens. Here we have a case in point.

The average voter is not a lawyer, and the less his daily affairs are hindered by legal complications the better he likes it, but with each political campaign and with each succeeding session of Congress or the legislature, largely as a result of his own action, he finds himself more deeply enmeshed than ever in legal tangles, bounds, and hindrances. The "proof of this pudding" will be found in the eating of the income-tax pie. The lawyers and the revenue collectors will revel in this new institution, and the people who voted for it, believing the Democratic assertion that it would take an "awful burden" from their backs, will have an awakening. When the small merchant, the industrious farmer, and the responsible citizen of moderate means realizes that "the burden" has been put directly upon his back and that it is he who must pay the piper, the meaning of direct and indirect taxation may be better understood.

A TAX OF ABOMINATIONS.

It is not the tax alone that the average citizen must bear; the accounting he must do will be the heavier burden. Accounts must be kept to the satisfaction of the governmental inquisitor of the receipts and expenditures in the business and of the household, and mayhap for the information of the competitor or the knave. But the income tax as proposed by the majority is to come, and the people ought to know that it is directed at them. They are to be "relieved of the tariff burden," which is imperceptible; they are to obtain cheap goods from abroad to the prejudice of American manufactures, which give them an earning power; and they are to keep accounts of what they take in and pay out, that the Government may tax them upon their earnings. It is a fine outlook for expert accountants, lawyers, and revenue officers, but for breadwinners and thrifty business men it is not so pleasant. With a full Treasury, due to the successful operation of a Republican tariff law, the new tax as proposed is economically unpardonable. We are not compelled to levy an income tax to harass men engaged in legitimate enterprises, and we ought not to be forced to commit industrial suicide. But the Democratic Party declares it has been commissioned by the people to destroy protection and to raise revenue by indirect taxation. The people must pay, and when they learn they must pay from an earning power diminished by unwise and unnecessary tariff legislation they may rise in their indignation and smite this Democratic experiment as a tax of abominations.

The Tariff.

EXTENSION OF REMARKS
OF
HON. MARTIN B. MADDEN,
OF ILLINOIS,
IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 8, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. MADDEN. Mr. Speaker, a statement from ex-Congressman Charles H. Weisse, of Sheboygan Falls, Wis., relative to the leather tariffs is instructive as coming not only from a tanner, but from a Democrat of eight years' experience in Congress, and therefore inclined to be without the usual prejudice of the manufacturer.

Mr. Weisse claims that most of the leather which is imported to compete with the American product is of the "luxury" kind, and should therefore be assessed with at least a small duty to insure to the Government just so much more revenue. If all articles used in tanning were on the free list, he would not recommend a duty for sole leather nor harness leather—the kind he produces himself—and the leather used by the common people, but he does recommend a duty for calfskins and sheepskins and all other classes of leather which go into the manufacture of "luxury" leather goods, such as high-grade gloves, high-grade shoes, fancy bags, automobiles, and so forth, for revenue purposes.

Mr. Weisse's statement follows.

Below is a copy, with a few alterations, of the brief presented before the Ways and Means Committee by the National Association of Tanners.

On behalf of the National Association of Tanners, representing a large part of the sole, belting, harness, calf, side-upper, and patent-leather tanning interests of the country, we respectfully urge your consideration of the following facts in revising the duties on these commodities:

WIDE DISTRIBUTION.

The United States census for 1909 reports that the tanning industry represents 919 tanning establishments, controlled by 784 proprietors and firm members, with an invested capital of $333,000,000. The product is valued at $327,000,000. The wages amount to $39,000,000, paid to 66,000 employees. The production is distributed over 39 States, from Maine to California. The industry is one of active, intense competition.

COMPARISON OF DINGLEY AND PAYNE TARIFFS.

The following tabulation shows the duties under the Dingley and Payne tariffs and the percentage of reduction:

	Dingley tariff.	Payne tariff.	Percentage of reduction.
Rough leather	20 per cent	5 per cent	75 per cent.
Sole leather	do	do	Do.
Belting leather	do	do	Do.
Harness leather	do	15 per cent	25 per cent.
Calf leather	do	do	Do.
Side upper leather	do	7½ per cent	62½ per cent.
Patent leather:			
10 pounds weight or less, per dozen	30 cents per pound and 20 per cent.	27 cents per pound and 15 per cent.	10 per cent and 25 per cent.
10 to 25 pounds	30 cents per pound and 10 per cent.	27 cents per pound and 8 per cent.	10 per cent and 20 per cent.
25 pounds and over	20 cents per pound and 10 per cent.	20 cents per pound and 10 per cent.	No change.

LOW RATES ON LEATHER.

You will note from the above table that the rates of duty now in force are extremely low, and are already permitting material competition from foreign markets. We have never sought high duties, but we do contend that this country should not become a dumping ground for the world's surplus of leather. The duties recommended below are as low as can prevent such unfair competition.

DUTIES RECOMMENDED.

After careful investigation, and in full recognition of the general demand for lower duties, we believe we can make concessions to this demand on harness, calf and patent leather, but under no conditions should the duty be lower on sole, belting, rough, and side upper leathers. We recommend the following duties:

	Payne duties.	Recommended duties.	Per cent of reduction.
Sole leather	5 per cent	5 per cent	No change.
Belting leather	do	do	Do.
Rough leather	do	do	Do.
Side upper leather	7½ per cent	7½ per cent	Do.
Harness leather	15 per cent	10 per cent	33 per cent.
Calf leather	do	do	Do.
Patent leather:			
10 pounds weight or less per dozen	27 cents per pound and 15 per cent.		
10 pounds weight to 25 pounds	27 cents per pound and 8 per cent.		
25 pounds and more	20 cents per pound and 10 per cent.		
Classification changed for recommendation—			
Japanned on the grain side		2 cents per square foot and 7½ per cent ad valorem.	About 40 per cent.
Japanned on the flesh side and patent splits		4 cents per square foot and 10 per cent ad valorem.	About 10 per cent.

RATES OF FOREIGN COUNTRIES.

The duties imposed on heavy leather by foreign countries are shown below. The rates on other leather would be as much or greater in each case.

Figures are based on average price of 21 cents per pound.

	Per cent.
Australia	35
Austria-Hungary	13.1–19.8
Belgium	6.2
Canada	17.5
China (about)	5
Crete	11
Cuba	15.0–18.75
Denmark	18.5
France	33.4
Germany	11.3–16.9
Greece	27.2
Italy	18.7–35.5
Japan	27.2
Newfoundland	20
Norway	17.9–26.8
New Zealand	19.0–38.07
Portugal	70
Russia	59.5–109
Peru (about)	14.2
South Africa	15
Tunis (North Africa)	8
Spain	33.3–107
Sweden	20.2–26
Switzerland	6.6–8.3
Turkey (Syria)	8
England	Free trade

With heavy duty into other foreign countries and with free trade into England accounts for the fact that about 87 per cent of our exportations go to England.

Ad valorem equivalents of import duties in the United States and specified foreign countries.

No.	Articles.	United States.	Canada.	Austria-Hungary.	France.	Germany.	Italy.	Russia.
	Leather, and manufactures of:							
207	Leather	12.9	13.5	2.6	4.4	2.1	4.9	18.0
208	Boots and shoes	11.9	28.5	5.7	12.3	6.5	9.5	38.7
209	Gloves	45.7	29.6	2.0	4.0	2.6	6.7	35.2
210	Harness and saddlery	24.4	27.3	9.2	10.2	5.2	7.7	40.8
211	Other manufactures of leather	41.0	28.1	12.6	7.6		7.2	33.4

The table above represents the equivalent ad valorem duties of imports of leather into foreign countries, but does not truly represent the condition. Many rates into foreign countries are prohibitive, which keep out certain classes of leather and bring down the apparent average rate on total importations.

To illustrate, the equivalent Canadian ad valorem duty as above is 13.5 per cent, whereas below the duties chargeable range from 5 per cent up to as high as 25 per cent.

The Canadian customs tariff of 1907.

Items.	British preferential tariff.	Intermediate tariff.	General tariff.
	Per cent.	*Per cent.*	*Per cent.*
604. Dongola, cordovan, calf, sheep, lamb, kid or goat, kangaroo, alligator, and all leather, dressed, waxed, glazed, or further finished than tanned, n. o. p.; harness leather and chamois skin	12½	15	17½
605. Skins for morocco leather, tanned but not further manufactured; belting leather, of all kinds; tanners' scrap leather; leather not further finished than tanned and skins n. o. p.	10	12½	15
606. Sole leather	12½	15	17½
607. Glove leathers, tanned or dressed, colored or uncolored, when imported by glove manufacturers for use exclusively in their own factories in the manufacture of gloves	5	7½	10
608. Japanned, patent, or enameled leather; morocco leather and leathers in imitation of morocco leather	15	22½	25
609. Belting, of leather	15	20	22½

The foregoing table shows the rates on leather in Canada. Most of these grades of leather are free under the Underwood bill, and were reduced from 20 to 5 per cent under the Payne-Aldrich bill, and the importations did not increase nor did it lower the price of leather. The American tanner should have the same protection against Canada that Canada asks of us in order to be on an equal trading basis.

RAPID INCREASE IMPORTATIONS.

To illustrate the growth of importations under a low tariff, we give below the imports of heavy leather during the past five years and during six-month periods during the past year:

Imports for consumption, bend, belting, and sole.

	Values.	Duties.	Rate.
			Per cent.
Year ending June 30—			
1908	$58,862	$10,772	20
1909	88,767	17,753	20
1910	1 955,740	1 49,068	1 5 and 20
1911	611,068	30,552	5
1912	1,049,232	52,461	5
Year ending Dec. 30, 1912	1,578,802	78,940	5

1 11 months at 5 per cent, 1 month at 20 per cent.

You will note that in 1908 and 1909 the importations of heavy leather were insignificant, but that in 1910, after the duty was reduced from 20 per cent to 5 per cent, there was an increase from $88,000 to $955,000. During the 12 months ending December 30, 1912, the importations have increased to $1,578,802. The duties collected on heavy leather have increased from $10,000 in the fiscal year 1908, to $78,940 in the calendar year 1912.

Importations of belting, sole, and rough leather, duty 5 per cent.

Six months ending—	
December, 1911	$314,422
January, 1912	406,406
February	452,565
March	497,558
April	535,615
May	626,349
June	706,492
July	806,891
August	871,398
September	872,528
October	932,200
November	904,594
December	872,310

The total duties collected on leather in the fiscal year ending June 30, 1912, were $849,110, and as foreign tanners become better acquainted with the needs of our market the importations will continue to increase.

LOSS OF REVENUE.

It is our belief that you gentlemen do not wish to see so important and highly competitive an industry threatened. You do seriously threaten it if you put it on the free list. If leather is put on the free list, the reduction in revenue, based on importations of the present year, will amount to about $1,500,000 annually, owing to the fact that you can not expect to put leather on the free list without also removing the duty on tanning materials. In other words, the revenue derived from leather and extracts alone was $1,400,157 for the last fiscal year, exclusive of the duties on oils, greases, chemicals, and manufactures of leather.

The following table shows that the total imports of leather are increasing under the Payne tariff at a much higher ratio than the exports:

Total value of all leather imported (11 months):	
1912	$7,702,992
1911	5,362,148
Increase of all leather imports, 43.6 per cent	2,340,844
Total value of export leather (11 months):	
1912	40,411,591
1911	35,061,731
Increase of all leather exports, 15.1 per cent	5,349,860

The major portion of the labor of our industry is recruited from unskilled labor who have recently come to this country. The efficiency of this labor is but slightly greater in this country than abroad, and in some instances even less so. The recent reports of Mr. Arthur H. Hutman, special agent of the Department of Commerce and Labor, investigating the leather industries in Europe, show that the wages paid the tannery laborers here are about double those paid in European countries to-day. The average wage in this country is approximately $12 per week, against $5 to $6.50 paid abroad. We have no advantage over our foreign competitors in so far as specialized machinery is concerned. The same makes of machines used in this country are also in general use in the foreign countries.

CANADIAN COMPETITION.

The large supplies of hemlock and oak bark, which at one time gave American tanners a great advantage over our foreign competitors, have been almost exhausted. Our tanning industry is now dependent on imported tanning materials, and these materials cost us more than they cost European and Canadian tanners.

Our Canadian competitors have a decided advantage over us, especially in the production of heavy leathers, such as sole, belting, and rough leather, enjoying, as they do, free tanning extracts and cheap bark. Bark is cheaper in Canada than in the United States, and the American tanners, located in the North, are buying bark in Canada and importing it into this country for use in their tanneries. The Canadian tanners also have a decided advantage over us in their imported tanning extracts. These are free of duty in Canada, and here we pay duties which averaged during the fiscal year ending June 30, 1912, 22.08 per cent. In many instances the Canadian tanners are as near to our larger American markets as our own tanners, which puts them at no disadvantage so far as freights are concerned, and makes them extremely keen competitors. The Canadian tanners, on the other hand, are protected against our leather by a 15 to 25 per cent duty.

If the duty is entirely removed from heavy leather, Canada is in position to use us as a dumping ground for their surplus. The capacity of the Canadian tanners is greater than the local consumption. They are large exporters of leather. A removal of the duty will surely build up the Canadian industry at the expense of our own.

PATENT LEATHER.

We recommend that the present obsolete classification of patent leather be changed, as shown above, for the reason that patent leather is no longer sold by the pound.

Patent leather requires a higher duty than any other class of upper leather used in the manufacture of shoes, for the reason that the production cost is about twice the cost of producing other upper leathers. The tanning cost is practically the same, but there is an additional equal or greater amount for the cost of the japanning.

Any purchase of hides or skins under the American method of japanning on the grain side will turn out all grades of leather, from the lowest to the highest, while the foreign method of japanning on the flesh side enables the foreign manufacturer to produce from a hole of skins only the medium and high grades, eliminating the loss of low grades, which we can not do because of our method of japanning on the grain.

We give below percentages of the different items in our manufacturing cost:

	Per cent.
Cost of labor	51.70
Cost of material	34.44
Manufacturing expense	13.86
	100

Below we apply this manufacturing cost to the cost of the finished product (including the cost of the pelt):

	Per cent.
Cost of labor	22.70
Cost of material	15.12
Manufacturing expense	6.08
Cost of raw stock	56.10
	100

In the rates we propose for patent leather we ask for an equalizing duty on labor, which is from 95 per cent to over 100 per cent more here than in foreign countries, and with a relative efficiency in the japanning department in favor of the foreign manufactures. In this connection we call to your attention that in the establishment of Cornelius Heyle, Worms, Germany, the largest foreign manufacturer of patent leather, there are employed about 43 per cent women and children, while in our own patent-leather factories we do not employ women and children. And we ask for an equalizing duty on materials which the foreign manufacturers get free of duty and on which we pay a varying rate of from 20 to 27 per cent.

* * * * * * *

Gentlemen, the leather industry should have the same consideration that other manufacturers have. We are now on a low-tariff competitive, revenue basis. We are willing you should make such further reductions as recommended in this brief, but the tanners of 39 States will feel you do an injustice if you put leather on the free list.

PROPOSED CHANGE IN WORDING OF LEATHER SCHEDULE.

Statistical records of imports and exports of the leather industry are as yet incomplete. In order to prepare for the future in the matter of statistical information and to simplify the work of the appraisers we suggest more detail in the classifications of leather and a demand on the Treasury Department and the Statistical Bureau of the Commerce and Labor Department that accurate and detailed statistics be collected, collated, and published monthly on imports, exports of domestic, and exports of foreign leather. In this manner our industry and the Ways and Means Committee will be better able to judge in the future as to how the leather schedules should be handled.

PROPOSED WORDING.

Sole-leather sides, backs, bends, and offal, ——— ad valorem; belting-leather butts, ——— ad valorem; rough leather, ——— ad valorem; goat and kid leather, tanned, but unfinished, ——— ad valorem; side upper leather other than patent, ——— ad valorem; harness leather, saddlery leather, case, bag, and strap leather, ——— ad valorem; upholstering leather, ——— ad valorem; patent leather, finished on the grain side other than upholstering leather, ——— per square foot and ——— ad valorem; patent leather, finished on the flesh side, and patent splits other than upholstering, ——— per square foot and ——— ad valorem; other upper leather other than patent, calf, and kip, ——— ad valorem; horse and colt, ——— ad valorem; goat and kid, ——— ad valorem; sheep and lamb, ——— ad valorem; glove-leather grains, ——— ad valorem; leather splits, tanned but unfinished, ——— ad valorem; tanned and finished, ——— ad valorem; bookbinder's leather, ——— ad valorem; piano-action leather, ——— ad valorem; chamois leather, ——— ad valorem; all other leather not specially provided for in this section, ——— ad valorem; all the foregoing, whether tanned only or tanned and finished, unless otherwise specified: *Provided*, That leather advanced in process by cutting, stamping, or molding into shapes, forms, blocks, or taps, suitable for conversion into manufactured articles, or by producing an artificial grain by boarding or embossing, shall pay a duty of 10 per cent ad valorem in addition to that imposed by this paragraph on leather of the same character as that from which they were so advanced in process.

And it is hereby provided that all leather entered for export from or for import into the United States of America shall be sworn to in writing before a proper officer of the Government, as belonging under one of the classifications above noted, and the Treasury Department shall keep an accurate record of measures and values of all said exports and imports, and shall furnish said records to the Department of Commerce, to be collated and published monthly in Summary of Commerce and Finance, under the classification headings indicated above, showing exports, imports, and reexports of leather.

Respectfully submitted.

THE NATIONAL ASSOCIATION OF TANNERS,
AUGUST H. VOGEL,
Chairman Tariff Committee.

On May 3, 1913, Hon. ANDREW J. PETERS, of Massachusetts, says in the RECORD:

The following table is instructive in this connection. It gives the average rates of duty for each tariff schedule under the Payne Act and the estimated rates of duty for the Underwood bill, and also shows the percentage of change in the average duties which we propose to make.

Comparative summary of average ad valorem rates of duty by schedules.

Schedule.	Average rate of duty.		Reduction in per cent of duty.
	Payne law, 1912.	Estimates for a 12-month period under H.R.3321.	
A. Chemicals, oils, and paints	25.9	19.6	24
B. Earths, earthenware, and glassware	50.7	33.1	34
C. Metals, and manufactures of	34.3	20.1	41
D. Wood, and manufactures of	12.4	3.5	74
E. Sugar, molasses and manufactures of	48.1	35.9	25
F. Tobacco, and manufactures of	82.1	84.9	2
G. Agricultural products and provisions	29.0	16.8	42
H. Spirits, wines, and other beverages	83.9	83.3	0
I. Cotton manufactures	45.5	30.4	33
J. Flax, hemp, and jute and manufactures of	45.1	26.6	42
K. Wool, and manufactures of	55.9	18.5	67
L. Silks and silk goods	51.5	43.9	16
M. Pulp, papers, and books	21.4	11.8	47
N. Sundries	24.7	33.2	1 2 33
Total, all schedules	40.12	29.60	26

1 Increase in rate.
2 Increase due to transfer of laces and embroideries from Schedules I, J, and K to Schedule N, which luxuries pay duty of 60 per cent.

BUSINESS AND THE TARIFF.

The greatest benefit to the greatest number has been the controlling basis for the changes summarized in the above table. At the same time the committee has not been unmindful of that provision in the Democratic national platform adopted at the Baltimore convention, which stated that our system of tariff taxation is intimately connected with the business of the country and that we favored the ultimate attainment of the principles which we advocate by legislation which will not injure or destroy legitimate industry. Business is too much dovetailed and labor too immobile to justify too sweeping a reduction of the tariff, which, while it would ultimately be a benefit, would in its immediate effect bear so grievously on a minority as to cause inexcusable hard-ship.

On the other hand, the committee has realized that "business" is sometimes guilty of going on what may be called a "sympathetic strike." The Ways and Means Committee has made every effort to get at the facts, and we believe that we are offering a tariff bill which is economically sound, a bill which takes from the minority the discriminatory advantages which they have enjoyed but have not shared, and which gives to the majority its fair proportion of the benefits of our American markets and industries.

Following is a table showing some of the materials which enter into the cost of making shoes on which there will be a material reduction in the rate of duty:

Boots and shoes.

Article.	Rate of duty on ad valorem basis.	
	Under Payne law (fiscal year 1912).	Under H. R. 3321.
Cattle hides	Free.	Free.
Sole leather	5.00	Free.
Grain, buff, and split leather	7.50	Free.
Patent, etc., leather weighing not over 10 pounds per dozen hides	29.55	Free.
Patent, etc., leather, weighing over 10 and not over 25 pounds per dozen hides	24.90	Free.
Patent, etc., leather weighing over 25 pounds per dozen hides	25.60	Free.
Upper leather dressed, n. s. p. f.	15.00	Free.
Calf kips	15.00	Free.
Leather cut into shoe uppers or vamps	15.00	Free.
Shoe machinery	45.00	Free.
Coal, bituminous	13.60	Free.
Coke	20.00	Free.
Borax, crude	11.82	Free.
Nails:		
Wire	7.16	Free.
Cut	13.34	Free.
Hobnails	16.70	Free.
Tacks	14.00	Free.
Wood alcohol	20.00	Free.
Lumber for boxes	20.00	Free.
Studs and rivets	7.60	Free.
Shoe knives	43.58	20.00
Shoe laces, cotton	41.98	27.00
Tannic acid and tannin	53.98	25.00
Castile soap	73.04	16.40
Borax, refined	16.20	10.00
Sal soda	21.22	1.31
Glue	20.83	16.25
Dextrin and substitutes	30.00	10 to 25
Cotton thread	42.42	23.33
Linen thread	31.54	19.29
Silk thread	37.06	25 and 30
	26.00	15.00

Boots and shoes—Continued.

Article.	Rate of duty on ad valorem basis.	
	Under Payne law (fiscal year 1912).	Under H. R. 3321.
Cotton lining cloth	31.50	25.00
Braids	60.00	50.00
Cotton webbings	60.00	25.00
Cotton goring	60.00	50.00
Silk gorings	60.00	50.00
Buttons	60.00	50.00
Hooks and eyelets	45 and 48	15 and 40
	45.00	15.00

It is very plain from a comparison of the above tables that the policy of the Democratic Party in not wishing to injure any industry by too drastic cuts in duty rates was not followed in the case of leather.

List of the principal materials required in the tanning industry, showing the duty under the Payne law and the proposed duty in the Underwood bill.

Items.	Payne duty.	Underwood duty.
Acetic acid	2½ cents per pound	2½ cents per pound.
Alum	½-¾ cent	15 per cent.
Amyl acetate	25 per cent	5 cents or free.
Blues	8 cents	15 to 20 per cent.
Blue vitriol	¼ cent	Free.
Borax	2 cents	⅜ cent.
Bichromate soda	1½ cents	⅜ cent.
Bichromate potash	2½ cents	1 cent.
Coal-tar dyes	30 per cent ad valorem	30 per cent.
Cod oil	8 cents	3 cents.
Degras	¼ to ½ cent per pound	¼ cent.
Extract:		
Logwood	⅜ cent	Free.
Quebracho	½ to ¾ cent	Do.
Hemlock bark	¼ cent	Do.
Mangrove bark	⅜ cent	Do.
Other bark	...do	Do.
Sumac	⅜ cent	Do.
Chestnut	...do	Do.
Other woods	...do	Do.
Fish oil	8 cents	3 cents.
Fusel oil	¼ cent	⅜ cent.
Formaldehyde	25 per cent	1 cent.
Formic acid	...do	1½ cents.
Glycerine	1 cent	1 to 2 cents.
Linseed oil	15 cents	12 cents.
Lactic acid	2 to 3 cents	1½ cents.
Lampblack	25 per cent	15 per cent.
Olive oil	50 cents per gallon	20 per cent.
Oxalic acid	2 cents	2 cents.
Sal soda	¼ cent	¼ cent.
Soda ash	¼ cent	Do.
Sulphate aluminum	¼ to ½ cent	15 per cent.
Sulphur, powdered	34 ton	Free.
Sumac, ground	¾ cent per pound	Do.
Sulphuric acid	½ cent	Do.
Soda sulphide	½ to ¾ cent	¼ cent.
Soap	20 per cent ad valorem	5 per cent.
Sod oil	8 cents	3 cents.
Talcum	20 per cent	15 per cent.

There should be a small duty placed on leather to offset the duties still retained on important chemicals and other materials used in tanning in order to put the American tanner on the same basis with the foreigner.

The following table taken from Hide and Leather shows the price of hides for a term of 10 years, showing that since hides were put on the free list they have advanced steadily to the top price in the fall of 1912 and the early part of 1913. The law of supply and demand the world over has caused hides to advance, and therefore the consumers of leather were obliged to pay higher prices, resulting in higher prices of shoes and all leather goods.

Comparative prices of Chicago packer hides for 10 years, week ending May 3, 1913.

	Spready steers.	Heavy native steers.	Heavy Texas steers.	Light Texas steers.	Extra light Texas steers.	Butt brands.

1897	11½	1887	13½
1896	11	1886	12½

The price of hides is, after all, the best index of supply and demand. It will be observed that South American hides were dearer in 1905 and 1904 than at any time in 20 years. It should be interesting and instructive to readers of Hide and Leather to discover that conditions affecting the supply and cost of hides are substantially the same in South America as in our own country.

THE SUPPLY OF PACKER HIDES.

The actual slaughter of cattle at five leading western packing points for 1905 shows an increase of 295,090 head from 1904, but a decrease of 127,772 head from 1903. This table gives the detailed figures:

Slaughter of cattle at 5 points for 3 years.

	1905	1904	1903
Chicago	2,002,273	1,939,132	2,168,031
Kansas City	1,244,773	1,012,665	1,025,384
Omaha	681,737	642,277	706,870
St. Joseph	307,910	406,407	404,037
St. Louis	765,162	766,292	821,431
Total	5,001,883	4,766,793	5,189,655

It is evident from this showing that the supply of packer hides is not keeping pace with the increased consumption of leather caused by the increased population and prosperity of the country.

MARCH 29, 1909.

Mr. WEISSE. If we would remove the 15 per cent duty on hides, we would give employment to American labor and American capital and make them into leather and leather goods and export the same, thereby producing $5 worth of finished product to every dollar's worth of hides on which a duty of 15 per cent is levied. This 15 per cent compels the foreigner to sell the hides in European markets, and tanners in Europe buy our extracts and tanning materials and tan them there.

I have endeavored to secure statistics from the Animal Industry Bureau, but they have not furnished any information that can be used in a reliable way. I have taken the census report of 1905 of manufactures and compiled the figures that I herewith submit, which are about as near correct as can be obtained anywhere:

Dutiable hides used in 1905	$89,120,593
Large packer produced	44,206,107
Imported	14,949,628
Total	59,156,735

Leaving the kill for the farmer and small packer and butcher about $30,000,000, two-thirds of which, no doubt, is marketed through the butcher and small packer, and the sales of these hides are mostly controlled by the packers, leaving only about $10,000,000 worth to be sold direct by the farmer, which would not net him to the extent of seven to nine millions, or about 10 per cent of the total dutiable hides used.

There were used by the tanners of leather, calfskins, kips, and other skins imported, according to the Commerce and Labor report, 1907, skins to the value of $49,814,518, free of duty, and there were used $6,426,614 worth of domestic skins of the same kind. With this amount of raw material we produced leather and leather goods to the grand total of about $700,000,000, and we exported leather and leather goods made of dutiable hides.

Exports of leather and leather goods, 1905.

Sole leather made from dutiable hides—rebate	$9,444,873.00
Total revenue from duty on hides, 1905	2,185,381.53
Total drawbacks	565,514.99
Net revenue	1,619,866.54

Free of duty.

Patent leather	$166,320.00
Upper and split leather	15,057,791.00
Other leather	1,813,134.00
Boots and shoes	8,057,697.00
Harness and saddles	502,660.00
All leather goods	1,318,046.00
Total	26,915,668.00

[1] From Bureau of Statistics, Department of Agriculture.
[2] Prices taken from Drovers' Journal, the official paper of the Chicago Union Stock Yards.

In order to illustrate the marked decrease in the supply of hides, I show tables below which indicate large increasing imports of cattle into the United States to offset the decreased domestic supply, while at the same time the exports of cattle to other countries have decreased about 60 per cent, further indicating the decreasing domestic supply of the tanners' raw stock.

Imports and domestic exports of the following articles for stated years as follows:

[Data from Department of Commerce.]

ST. PAUL, MINN., *January 19, 1906.*

HON. CHARLES H. WEISSE,
Washington, D. C.

DEAR SIR: Replying to your communication of the 15th, would state the amount of leather used in a heavy team harness ranges, according to the style and dimensions, from 35 to 60 pounds. Think the average for this section is about 45 pounds per set, for two horses, and costs (cut stock), not counting labor for cutting, if average good stock is used, $22.50 at the present price of leather. The labor on an average-priced team harness, by hand, about $6.50 per set. A good ordinary team horse collar has 85 feet of leather, and which is worth $17 per dozen. Labor, from $5.50 to $6.50 per dozen.

It seems to the writer, when we consider, according to the best statistics at hand, there is a world shortage on hides, and especially when the price of cattle is not at all based on the value of the hide, which is considered a by-product only and really benefits only the large packers, who control both the hide and leather market to-day, the tariff ought to come off. There is no considerable number of people benefited by high-priced hides, as the percentage of country hides taken off is very small indeed compared to a few years ago, before the time when large packers inaugurated their present system of furnishing dressed beef to all the small markets throughout the country, thereby cutting off the local killing by the small butchers. The heavy increased demands for different kinds of leathers has, during the past two years, made it very difficult for manufacturers to secure sufficient quantity of certain kinds of leather to supply their needs. Tanners outside of what is ordinarily called the "trust" claim that they are unable to secure hides at a price sufficient to run their tanneries at a full capacity.

Very truly, yours,

CHICAGO, *January 17, 1906.*

HON. CHARLES H. WEISSE,
House of Representatives, Washington, D. C.

DEAR SIR: In reply to yours of 15th instant, the cost of leather in producing heavy farm team harness is from $10 to $20 per set; the labor from $3 to $6 per set. For heavy full-leather horse collars cost of leather is from $15 to $20 per dozen, and labor from $4 to $10 per dozen.

This information is not definite, but there is considerable difference as to both cost of materials and labor, depending upon the grade and heft of the harnesses and collars.

Very truly, yours,

KANSAS CITY, MO., *January 19, 1906.*

HON. CHARLES H. WEISSE,
House of Representatives, Washington, D. C.

DEAR SIR: Replying to yours of the 15th, will say that in a single set of heavy farm team harness there is about 40 pounds of leather, at about a valuation of 45 cents per pound. In a dozen full-leather horse collars there are about 100 feet of collar leather, at 21 cents per foot.

Trusting this will be satisfactory, we remain,

Yours, very truly,

EXHIBIT B.

[Letters from manufacturers of plow shoes and plow boots, showing quantity of leather used and its value per pair.]

MILWAUKEE, WIS., U. S. A., *January 20, 1906.*

MR. CHARLES H. WEISSE,
Sheboygan Falls, Wis.

DEAR SIR: We have your favor of the 15th instant, inquiring as to the amount of leather used in producing heavy grain-leather plow shoe and boot.

It takes fully 2¼ feet to cut a regular height (6 inches) plow shoe, and for the lowest plow boot we make, which is 14 inches, it takes fully 4½ feet of leather. The leather we are using now costs 19 cents a foot.

Yours, truly,

CHICAGO, *January 18, 1906.*

MR. CHARLES H. WEISSE,
House of Representatives, Washington, D. C.

DEAR SIR: Replying to yours of the 15th, figures such as you ask for necessarily will vary in different institutions, according to the size of the last, height of shoe, and quality. Those we give below are the ones in use in our establishment, and apply to standard height, last, and quality made for workingmen.

Six and one-half to 7 ounce western oil grain is used, for which we are asked 183 cents per foot, with the usual discount. It requires about 2½ feet per pair; about quarter of a foot for the gusset, or tongue, which is cut out of 7-cent leather. The strap on leather is usually got out of scrap which falls from the cutting of the sides. On shoes made plain, without any trimmings, the above constitute all the leather in the upper.

In sole leather it is hard to give any idea of the amount, for different stocks are used for outsoles, slip soles, counter, and heels, and the total weight in the shoe can only be arrived at by footing up the estimates for these different parts and dividing by the average cost of the leather. In this way we arrive at about 2½ pounds. As to cost, there is considerable variation, according to the quality of the leather used. An outsole cut from leather tanned from South American dry hides, at 24½ cents per pound, to-day's market, would cost about 24 cents per pair on our dies; inner soles, about 7½ cents; slip soles, 6½ cents; the counter, at 7½ cents; the heel and top lift, 10 cents; total of 56 cents. If domestic-slaughter sole leather is used, about 2½ cents should be added to the allowance for the outsole.

The amount of stock used in boots varies according to the height. We have made boots which take only 5½ feet per pair, and from that up to 6. These would be cut from 7½-ounce oil grain sides, which are to-day quoted at 20 cents per foot, with the usual discount. This brings the cost of the upper from $1.05 to $1.20. To the sole-leather estimates about 12 to 15 per cent should be added on account of the heavier weight required for boots.

Trusting that this information will be satisfactory, and ready to serve you further,

Yours, truly,

APPENDIX K.

EXHIBIT A.

[Telegrams showing weights of western hides.]

MINNEAPOLIS, MINN., *January 17, 1906.*

CHARLES H. WEISSE,
House of Representatives, Washington, D. C.:

Three thousand October hides shipped by one dealer average 50 pounds, including all selections 25 pounds and up.

CHICAGO, ILL., *January 15, 1906.*

HON. CHARLES H. WEISSE,
Washington, D. C.

DEAR SIR: Shipments of hides received from small packer in Montana to-day. After sorted 25 pounds and up, the hides, 1,055 green salted, averaged 56½ pounds.

Yours, truly,

KANSAS CITY, MO., *January 16, 1906.*

HON. CHARLES H. WEISSE,
Washington, D. C.

DEAR SIR: The hides sold in Kansas City during the month of October and September, this year, 25 pounds and up, averaged 48 to 50 pounds.

Yours, truly,

DAYTON, OHIO, *January 16, 1906.*

HON. CHARLES H. WEISSE,

DEAR SIR: Our hide collections in September, 1905, averaged 52 pounds for 25 and upward. Indianapolis collections averaged about the same.

EXHIBIT B.

[Letters quoting freight rates of the Chicago, Milwaukee & St. Paul Railway on green and dry hides.]

CHICAGO, MILWAUKEE & ST. PAUL RAILWAY,
Chicago, January 20, 1906.

Confirming my telephone message of this date, following are present rates from Denver, Colo., to Chicago, Ill.:

Hides, green:	
L. C. L., per 100 pounds	$1.25
C. L., per 100 pounds	.70
Hides, dry:	
L. C. L., per 100 pounds	2.05
C. L., per 100 pounds	.95

CHICAGO, MILWAUKEE & ST. PAUL RAILWAY,
Chicago, January 20, 1906.

Confirming my telephone message of this date, following are present rates from Butte, Mont., to Chicago, Ill.:

Hides, green:	
L. C. L., per 100 pounds	$2.10
C. L., per 100 pounds	1.15½
Hides, dry:	
L. C. L., per 100 pounds	3.10
C. L., per 100 pounds	1.80

CHICAGO, MILWAUKEE & ST. PAUL RAILWAY,
Chicago, January 20, 1906.

Confirming my telephone message of this date, following are present rates from Salt Lake City, Utah, to Chicago, Ill.:

Hides, green:	
L. C. L., per 100 pounds	$2.20
C. L., per 100 pounds	1.38
Hides, dry:	
L. C. L., per 100 pounds	3.30
C. L., per 100 pounds	1.57

EXHIBIT C.

[Letters showing ocean freight rates on green and dry hides, loose and baled.]

NEW YORK, *January 22, 1906.*

Hon. CHARLES H. WEISSE,
Washington, D. C.

DEAR SIR: In reply to your esteemed favor of the 20th instant we beg to quote you the following freights:

Dry hides from Mexico, loose, 20 cents each and 5 per cent primage.

Dry hides from Mexico, when baled up, three-fourths cent per pound plus 5 per cent.

W. S. hides from Mexico, three-eighths cent per pound plus 5 per cent.

Dry hides from Central America, in bales, 1½ cents per pound net.

Dry hides from South American ports, 12½ cents each plus 5 per cent, and lighthouse dues 86 cents per ton, wharfage 12 cents per ton. These are export entry charges.

If we can get you any further information, please command us.

Yours, truly,

NEW YORK, *January 23, 1906.*

Hon. CHARLES H. WEISSE,
House of Representatives, Washington, D. C.

DEAR SIR: Referring to your previous inquiry about freight rates, we give you below the following quotations which we received this morning, and which we hope will be of service to you:

From Calcutta: Buffalo hides, 60s. per 14 hundredweight; goatskins, 70s. per 14 hundredweight.

NOTE.—Sixty shillings equal $14.75; 70s. equal $17.20.

NEW YORK, *January 17, 1906.*

Hon. CHARLES H. WEISSE,
Congress, Washington, D. C.

DEAR SIR: Referring to our communication regarding the freight rates, our freight agent gets us the following:

London to New York, goatskin hides, 15s. plus 10 per cent for 2,240 pounds (on deck).

New York to Milwaukee, goatskin hides, 30 cents per 100 pounds, minimum 30,000 pounds; less than carload, 35 cents per 100 pounds.

London to New York, dry hides, loose, 27.6s. plus 10 per cent; in bales, 22.6s. plus 10 per cent.

New York to Milwaukee, dry hides, loose, 50 cents per 100 pounds; in bales, 35 cents per 100 pounds; minimum, 20,000 pounds.

If we can be of any service to you here, please command us.

We are importing dry Batavia cowhides, very spready, about 8 pounds average, which we have sold very extensively in your neighborhood, and we expect some in next month, and can offer you about 1,000 of them, subject to previous sale, at 36 cents per pound.

If you are interested in them, kindly advise us.

Hongkong-New York rates are not obtainable here, but we estimate 25 per cent for green salted.

Yours, truly.

[According to the above letter of Jan. 17, the rate on green salted hides from London to New York is 15s. plus 10 per cent for 2,240 pounds (on deck), which is about 33 cents per hundred, or 68 cents per hundred to Milwaukee in less than carload lots, against a rate of $2.10 for less than carload lots from Butte, on green salted hides to Chicago, and a rate of $2.20 on less than carload lots on green salted hides from Salt Lake City, making a difference in the stock about the same as the difference in the tariff, or, according to the average country hide prices since the duty has been on, making a difference in the value of hides from there about the same as the duty, and the man from Butte, Mont., doesn't receive any more for his hides if he ships them to Chicago than the man from London, England, who ships to Chicago, which is the greatest hide market in the world. How does the 15 per cent duty protect the man in Butte, and is it not the railroads that fix the price?]

APPENDIX L.

A COMPARISON OF THE WORLD'S CATTLE STATISTICS—TABULATION OF OFFICIAL RETURNS.

[By Alfred Seymour Jones in the London (England) Leather Trade Review. Reprinted in Hide and Leather, issue of Jan. 27, 1906.]

WHY HIDES ARE DEARER.

"I am inclined to say that the increase in cattle has not kept pace with the constantly increasing demand for leather brought about by increase in population, new industries, factories, and wealth." (Alfred Seymour Jones, English leather trade authority.)

Much has been said and written to explain the cause of, or causes for, the advance in the values of hides during recent times. Among the causes advanced the following have been especially urged: That the birth rate of cattle has not kept pace with the birth rate of human beings. That when a country becomes a manufacturing area it does so at the expense of the depletion of the head of cattle. That rinderpest and drought have caused serious losses. That more people to-day buy leather than formerly. That war, during recent years, has, at least in two countries, accounted for large declines in local herds.

In order to ascertain whether these causes are good, we must take the official returns for all those countries which at present furnish them and, at the same time, compare in a relative sense the demands of the population for leather.

In all cases I give the maximum head first, then the minimum, and when necessary the latest returns. The figures are extracted from official returns during the past 25 years. The comments following each are my own.

THE UNITED KINGDOM.

1905	11,674,026
1882	9,832,417

The progress of increase has been steady for over 25 years, and the total head has never been so large as it is to-day.

It is interesting to note and to remember when comparing the figures for the United States that the British board of agriculture say: "The live imports of cattle for 1904 numbered nearly 550,000 head or 27,000 more than for 1903. The increase came from the United States, whence 100,000 more cattle were received than in 1903, equal to 72 per cent."

We will now turn our attention to the four leading continental countries.

Russia in Europe, including Poland and Caucasia.

RUSSIA.

1900	32,913,228
1883	23,628,031
1903	32,791,700
1904 (estimated)	30,858,410

POLAND.

1888	3,013,392
1903	2,887,400
1904 (estimated)	2,340,524

CAUCASIA.

1903	3,625,600
1900	2,515,590
1904 (estimated)	2,892,841

The official Russian returns for 1904 show a decline, and from my knowledge of that country I should put the reduction down to the unsatisfactory political situation which has existed there for some years past, but with the establishment of good government the total head of cattle should be largely augmented. The country is especially suited to the rearing of cattle.

GERMANY.

1900 (latest)	18,939,662
1873	15,776,702

I have gone back 30 years in the case of Germany to ascertain if there is any justification for the plea that "when a country has become a manufacturing area it does so to the depletion of the head of cattle."

I think no one will deny that the Fatherland, since the war of 1870, which brought her unity, has become a large manufacturing country. Yet from 1873 up to date each year shows a steady and progressive increase in her cattle.

FRANCE.

1902	14,928,550
1885	13,104,970
1903	14,103,090

The increase has been continuous up to 1902.

AUSTRIA.

1900 (last)	9,506,626
1869	7,425,212

HUNGARY.

1895 (last)	6,783,365
1870	5,279,193

In the instance of Austria I had to go as far back as 1869 to find the minimum. It is regrettable that both countries afford no later dates than those given, but each country shows a remarkable and steady increase.

In referring to the above countries, the British board of agriculture says: "So far as the head of the five leading European countries are concerned, viz. Russia in Europe, Germany, United Kingdom, France, and Austria, there would appear to have been a general advance in numbers. The combined heads are greater by nearly 22 per cent than they were some 30 years ago. If the older figures may be trusted, the percentage of rise in Austria was the greatest, or something like 28 per cent, as against 20 per cent in France and Germany and 13 per cent in our own country."

UNITED STATES OF NORTH AMERICA.

1900	67,822,336
1870	28,820,608
1905	61,241,907

"The heads of the United States have, according to the official data, shown no growth whatever since this country began," say the British board of agriculture.

It will perhaps be of interest if I give the statistics since 1870:

1870	28,820,608
1880	29,675,333
1890	57,648,792
1900	67,822,336

The above are census figures. The census of 1900 included spring calves, a procedure, it is explained, adopted in only a few instances in the enumerations of 1890, 1880, and 1870.

1902	61,424,599
1903	61,764,433
1904	61,049,315
1905	61,241,907

It appears to me that had the annual census been taken on 1900 basis there would have been no falling off, but a fairly steady total during the past five years.

CANADIAN DOMINION.

1901 (last)	5,576,451
1891	4,120,580

The data collected at the census for the following Provinces do not agree with those published by the provincial governments, consequently are not comparable with above:

ONTARIO.

1904	2,776,104
1881	1,702,167

The increase has been constant annually.

MANITOBA.

1903	310,577
1902	282,343
1904	306,943

NORTHWEST TERRITORY.

1901 (last)	501,730
1891	231,827

NEW BRUNSWICK.

1901 (last)	227,196
1891	204,692

NEWFOUNDLAND.

1901 (last)	32,767
1891	23,828

NOVA SCOTIA.

1891	324,772
1901 (last)	316,174

PRINCE EDWARD ISLAND.

1901 (last)	112,770
1881	90,722

QUEBEC.

1901 (last)	1,365,829
1891	969,312

With the exception of two Provinces, Canada as a whole has steadily, year by year, increased her store of cattle.

Australian Commonwealth.

NEW SOUTH WALES.

1895	2,150,057
1902	1,741,226
1903	1,880,578

This State every three years reaches 2,000,000 head, and in subsequent two years loses ground. Drought possibly has something to do with it.

VICTORIA.

1881	1,286,267
1891	1,782,881
1901	1,602,384
Census taken every 10 years.	

QUEENSLAND.

1895	6,822,401
1903 (last)	2,481,717

This State has reduced her head of cattle steadily since 1895, and appears to be going out as a live-stock producer.

SOUTH AUSTRALIA, EXCLUDING NORTHERN TERRITORY.

1891	359,938
1903	213,343
1904	244,610

This State has been declining in head of cattle for some years, falling below 300,000 in 1897.

WESTERN AUSTRALIA.

1903 (last)	497,617
1887	93,544

This State shows an annual increase since 1887.

PAYNE BILL.

450. Hides of cattle, raw or uncured, whether dry, salted, or pickled, shall be admitted free of duty: *Provided*, That on and after October 1, 1909, grain, buff, and split leather shall pay a duty of 7½ per cent ad valorem; that all boots and shoes, made wholly or in chief value of leather made from cattle hides and cattle skins of whatever weight, of cattle of the bovine species, including calfskins, shall pay a duty of 10 per cent ad valorem; that harness, saddles and saddlery, in sets or in parts, finished or unfinished, composed wholly or in chief value of leather, shall pay a duty of 20 per cent ad valorem.

451. Band, bend, or belting leather, rough leather, and sole leather, 5 per cent ad valorem; dressed upper and all other leather, calfskins tanned or tanned and dressed, kangaroo, sheep, and goat skins (including lamb and kid skins), dressed and finished, other skins and bookbinders' calfskins, all the foregoing not specially provided for in this section, 15 per cent ad valorem; chamois skin, 20 per cent ad valorem; japanned, varnished, or enameled leather, 5 per cent ad valorem; patent, japanned, varnished, or enameled leather weighing not over 10 pounds per dozen hides or skins, 27 cents per pound and 15 per cent ad valorem; if weighing over 10 pounds and not over 25 pounds per dozen, 27 cents per pound and 8 per cent ad valorem; if weighing over 25 pounds per dozen, 20 cents per pound and 10 per cent ad valorem; pianoforte leather and pianoforte-action leather, and glove leather, 20 per cent ad valorem; leather shoe laces, finished or unfinished, 50 cents per gross pairs and 10 per cent ad valorem; boots and shoes made of leather, 15 per cent ad valorem: *Provided*, That leather cut into shoe uppers or vamps or other forms, suitable for conversion into manufactured articles, and gauffre leather, shall pay a duty of 10 per cent ad valorem in addition to the duty imposed by this paragraph on leather of the same character as that from which they are cut.

THE DINGLEY LAW.

[Act of July 24, 1897.]

Leather and manufactures of:

437. Hides of cattle, raw or uncured, whether dry, salted, or pickled, 15 per cent ad valorem: *Provided*, That upon all leather exported, made from imported hides, there shall be allowed a drawback equal to the amount of duty paid on such hides, to be paid under such regulations as the Secretary of the Treasury may prescribe.

438. Band or belting leather, sole leather, dressed upper and all other leather, calfskins tanned or tanned and dressed, kangaroo, sheep and goat skins (including lamb and kid skins) dressed and and finished, chamois and other skins, and bookbinders' calfskins, all the foregoing not specially provided for in this act, 20 per cent ad valorem; skins for morocco, tanned but unfinished, 10 per cent ad valorem; patent, japanned, varnished, or enameled leather, weighing not over 10 pounds per dozen hides or skins, 30 cents per pound and 20 per cent ad valorem; if weighing over 10 pounds and not over 25 pounds per dozen, 30 cents per pound and 10 per cent ad valorem; if weighing over 25 pounds per dozen, 20 cents per pound and 10 per cent ad valorem; pianoforte leather and pianoforte-action leather, 35 per cent ad valorem; leather shoe laces, finished or unfinished, 50 cents per gross pairs and 20 per cent ad valorem; boots and shoes made of leather, 25 per cent ad valorem: *Provided*, That leather cut into shoe uppers or vamps or other forms, suitable for conversion into manufactured articles, shall be classified as manufactures of leather and pay duty accordingly.

M'KINLEY LAW.

[Act of Oct. 1, 1890.]

Leather and manufactures of:

455. Bend or belting leather and sole leather and leather not specially provided for in this act, 10 per cent ad valorem.

456. Calfskins, tanned or tanned and dressed; dressed upper leather, including patent, enameled, and japanned leather, dressed or undressed, and finished; chamois or other skins not specially enumerated or provided for in this act, 20 per cent ad valorem; bookbinders' calfskins, kangaroo, sheep and goat skins, including lamb and kid skins, dressed and finished, 20 per cent ad valorem; skins for morocco, tanned but unfinished, 10 per cent ad valorem; pianoforte leather and pianoforte action leather, 35 per cent ad valorem; japanned calfskins, 30 per cent ad valorem; boots and shoes made of leather, 25 per cent ad valorem.

457. But leather cut into shoe uppers or vamps or other forms, suitable for conversion into manufactured articles, shall be classified as manufactures of leather, and pay duty accordingly.

WILSON LAW.

[Act of Aug. 27, 1894.]

Leather and manufactures of:

339. Sole leather, 10 per cent ad valorem.

340. Bend or belting leather, and leather not specially provided for in this act, 10 per cent ad valorem.

341. Calfskins, tanned, or tanned and dressed, dressed upper leather, including patent, enameled, and japanned leather, dressed or undressed, and finished; chamois or other skins not specially enumerated or provided for in this act, 20 per cent ad valorem; bookbinders' calfskins, kangaroo, sheep, and goat skins, including lamb and kid skins, dressed and finished, 20 per cent ad valorem; skins for morocco, tanned but unfinished, 10 per cent ad valorem; pianoforte leather and pianoforte action leather, 20 per cent ad valorem; boots and shoes, made of leather, 20 per cent ad valorem.

342. Leather cut into shoe uppers or vamps, or other forms, suitable for conversion into manufactured articles, 20 per cent ad valorem.

The above tables show that the lowering of rate did not increase importation of leather and only caused a loss in revenue, as the leather imported is mostly all used in articles of luxury, and free leather will only cause further loss in revenue and no change in price on fine leather and goods made from same, and the tariff should remain on these grades same as recommended by the tanners' association. It will produce a revenue of $500,000 to $1,000,000 or more.

NECESSARIES AND LUXURIES.

In its tariff-revision work the committee has kept in mind the distinction between the necessaries and the luxuries of life, reducing the tariff burdens on the former to the lowest possible point commensurate with revenue requirements and making the luxuries of life bear their proper portion of the tariff responsibilities.

In the following table are presented comparative rates in the act of 1909 and H. R. 3321 levied upon articles which may be properly classed as luxuries:

Comparison by schedules of rates upon luxuries under the act of 1909 and H. R. 3321.

Item.	Act of 1909.		H. R. 3321.	
	Rate.	Equivalent ad valorem, 1912.	Rate.	Equivalent ad valorem.
Schedule A:		*Per cent.*		*Per cent.*
Attar of roses	Free		20 per cent	20.00
Perfumery, including cologne	60 cents per pound, plus 50 per cent	72.08	40 cents per pound, plus 60 per cent	74.29
Ambergris	Free		20 per cent	20.00
Soap, perfumed toilet	50 per cent	50.00	40 per cent	40.00
Schedule B:				
China, porcelain, parian, and crockery ware, painted or decorated	60 per cent	60.00	55 per cent	55.00
Manufactures of glass, ornamented	....do	60.00	45 per cent	45.00
Manufactures of marble, onyx, alabaster, and jet	50 per cent	50.00	....do	45.00
Schedule C:				
Automobiles	45 per cent	45.00	....do	45.00
Shotguns, breech-loading, valued at over $10 each	$6 each, plus 35 per cent	43.69	35 per cent	35.00
Gold leaf	35 cents per 100 leaves	38.77	35 per cent	35.00
Tinsel wire	5 cents per pound	10.59	10 per cent	10.00
Aeroplanes	45 per cent	45.00	25 per cent	25.00
Gold, manufactures of, n. s. p. f	....do	45.00	50 per cent	50.00
Silver, manufactures of, n. s. p. f	....do	45.00	....do	50.00
Schedule D:				
Briar root or briarwood	15 per cent	15.00	10 per cent	10.00
Bamboo porch or window blinds, dyed or polished	40 per cent	40.00	25 per cent	25.00

Comparison by schedules of rates upon luxuries under the act of 1909 and H. R. 3321—Continued.

Item.	Act of 1909. Rate.	Act of 1909. Equivalent ad valorem, 1912.	H. R. 3321. Rate.	H. R. 3321. Equivalent ad valorem.
Schedule E:				
Schedule G:		*Per cent.*		*Per cent.*
Fancy cakes	50 per cent	50.00	25 per cent	25.00
Mushrooms and truffles	2½ cents per pound	17.33	2½ cents per pound	17.86
Caviar	30 per cent	30.00	30 per cent	30.00
Comfits and fruits of all kinds, preserved, containing over 10 per cent of alcohol	$2.50 per proof gallon plus 35 per cent	90.98	$2.50 per proof gallon plus 20 per cent	70.00
Olives, n. s. p. f	15 cents per gallon	32.66	15 cents per gallon	32.14
Game, except birds	2½ cents per pound	10.61	1½ cents per pound	10.20
Schedule H	(1)		(1)	
Schedule I, Nottingham lace window curtains, etc., containing 9 points		52.04	35, 40, and 45 per cent	
Schedule J, pile fabrics	60 per cent	60.00	....do	45.00
Schedule K, oriental rugs and carpets, and those woven whole for rooms	90 cents per square yard plus 40 per cent.	58.10	50 per cent	50.00
Schedule L:				
Pile fabrics		58.64	....do	50.00
Handkerchiefs or mufflers, hemstitched, etc	60 per cent	60.00	....do	50.00
Articles of wearing apparel of silk	....do	60.00	....do	50.00
Schedule M:				
Decalcomanias backed with metal leaf	65 cents per pound	63.34	20 per cent	20.00
Albums	35 per cent	35.00	25 per cent	25.00
Schedule N:				
Beads and spangles	....do	35.00	35 per cent	35.00
Trimmed hats or bonnets	50 per cent	50.00	40 per cent	40.00
Dice, chessmen, billiard and pool balls	....do	50.00	50 per cent	50.00
Firecrackers	8 cents per pound	125.13	6 cents per pound	98.00
Artificial or ornamented feathers, fruits, flowers, etc., n. s. p. f	60 per cent	60.00	60 per cent	60.00
Fans	50 per cent	50.00	50 per cent	50.00
Jewelry		75.74	60 per cent	60.00
Laces and embroideries, silk		63.52	....do	60.00
Gloves		44.15	....do	31.77
Ivory tusks	Free		20 per cent	20.00
Glove leather	15 per cent	15.00	10 per cent	10.00
Upper leather (light skin)	....do	15.00	Free	
Patent leather	27–20 cents per pound and 15–8 per cent ad valorem.	30.00	....do	
Automobile and upholstering leather	15 per cent	15.00	....do	
"All other leather," n. o. s	....do	15.00	....do	

(1) No change in rates except in scrap tobacco, which was reduced from 55 cents to 35 cents per pound.
(2) No change in rates from those of the act of 1909 except in mineral waters.

The complement of the preceding table is one which deals with the necessaries of life and which indicates the consideration the committee has given to the question of the relation of the tariff to the cost of living.

It is obvious from the above that certain "luxury" leathers have been reduced more than is warranted from the "luxuries" theory, as stated above and taken from a statement by Hon. Mr. PETERS. This is especially true with respect to those "luxury" leathers above listed and now proposed for the free list. They should carry a small duty, the same as glove leather, say about 10 per cent, so that the Government may obtain just that much more revenue. They are used in the manufacture of fancy bags, novelties, high-grade shoes, automobiles, and high-grade furniture; but none of them go into the manufacture of the low-grade shoes or harness.

Comparison by schedules of rates upon necessaries under the act of 1909 and H. R. 3321.

Item.	Act of 1909. Rate.	Act of 1909. Equivalent ad valorem 1912.	H. R. 3321. Rate.	H. R. 3321. Equivalent ad valorem.
Schedule A:		*Per cent.*		*Per cent.*
Cream of tartar	5 cents per pound	25.45	2½ cents per pound	17.86
Medicinal preparations	55 cents per pound	58.93	10 cents per pound + 20 per cent	31.11
Castor oil	35 cents per gallon	35.20	15 cents per gallon	15.00
Wash blue	3 cents per pound	23.59	15 per cent	15.00
Saltpeter	¼ cent per pound	9.27	$7 per ton	6.88
Common soap	20 per cent	20.00	5 per cent	5.00
Saleratus or bicarbonate of soda	¼ cent per pound	21.54	¼ cent per pound	8.50

Comparison by schedules of rates upon necessaries under the act of 1909 and H. R. 3321—Continued.

Item.	Act of 1909. Rate.	Act of 1909. Equivalent ad valorem 1912.	H. R. 3321. Rate.	H. R. 3321. Equivalent ad valorem.
Schedule G—Continued.				
Buckwheat flour	25 per cent	*Per cent.* 25.00	Free	*Per cent.*
Macaroni, etc	1½ cents per pound	34.25	1 cent per pound	23.81
Rice, cleaned	2 cents per pound	54.05	....do	33.33
Wheat flour	25 per cent	25.00	Free	
Rye flour	¼ cent per pound	13.69	....do	
Eggs	5 cents per dozen	36.38	2 cents per dozen	14.28
Stocks, etc., of fruit trees	$2 per M	54.44	$1 per M	27.59
Fish, fresh, dried, smoked, salted, or pickled		12.71	Free	
Meats, fresh beef, veal, mutton, lamb, and pork, bacon and hams, meat of all kinds, n. s. p. f.		21.88	Free	
Schedule H:				
Mineral waters		40.26	30 per cent	27.41
Schedule I:				
Spool thread		22.95	15 per cent	15.00
Cotton cloth		42.75		26.44
Cotton clothing	50 per cent	50.00	30 per cent	30.00
Stockings, hose, and half hose, selvedged		75.38	40 and 50 per cent	40 and 50
Men's and boys' cotton work gloves	50 cents per dozen pairs plus 40 per cent.	89.17	35 per cent	35.00
Knit shirts, drawers, etc., and underwear		60.28	30 per cent	30.02
Schedule J:				
Bagging for cotton, etc	⅛ cent per square yard	9.53	Free	
Collars and cuffs	40 cents per dozen plus 20 per cent	49.10	30 per cent	30.00
Schedule K:				
Blankets		72.69	25 per cent	25.00
Flannels		93.29	25 and 35 per cent	25 and 35
Clothing, ready-made		79.56	35 per cent	35.00
Women's and children's dress goods		99.70	....do	35.00
Schedule L:				
Sewing silk		25.00	15 per cent	15.00
Schedule M:				
Printing paper not valued above 2½ cents per pound				
Wrapping paper	35 per cent	14.01	Free	
Books	25 per cent	35.00	25 per cent	25.00
Schedule N:		25.00	15 per cent	15.00
Brooms	40 per cent			
Matches	6 cents per gross	40.00	....do	15.00
Boots and shoes	10 or 15 per cent	27.59	3 cents per gross	14.52
Harness and saddlery of leather	20 per cent	12.14	Free	
Harness and saddlery, other	35 per cent	20.00	....do	
India rubber, manufactures of	....do	35.00	20 per cent	20.00
Lead pencils	45 cents per gross plus 25 per cent	35.00	10 per cent	10.00
Sole leather, belting and heavy	5 per cent	38.88	25 per cent	25.00
Harness leather	15 per cent	5.00	Free	
Side upper	7½ per cent	15.00	....do	
		7.50	....do	

The following rates will provide revenue for the Government and will not make a difference in the cost of common shoes to the consumer; the sole leather of a pair of such shoes (about 2 pounds at 25 cents a pound) would save 2½ cents and the upper would save not to exceed 3¾ cents, a total of 6¼ cents, which would be of no benefit to the consumer because he would not get it:

Sole leather sides, backs, bends, and offal, 5 per cent ad valorem; belting leather butts, 5 per cent ad valorem; rough leather, 5 per cent ad valorem; gont and kid leather tanned but unfinished, 5 per cent ad valorem; side upper leather other than patent, 7½ per cent ad valorem; harness leather, saddlery leather, case, bag, and strap leather, 10 per cent ad valorem; upholstering leather, 10 per cent ad valorem; patent leather, finished on the grain side, other than upholstering leather, 2 cents per square foot and 7½ per cent ad valorem; patent leather, finished on the flesh side, and patent splits, other than upholstering, 4 cents per square foot and 10 per cent ad valorem; other upper leather other than patent, calf, and kip, 10 per cent ad valorem; horse and colt, 10 per cent ad valorem; goat and kid, 10 per cent ad valorem; sheep and lamb, 10 per cent ad valorem; glove leather, grains, colt, calf, goat, kid, sheep, and lamb, 15 per cent ad valorem; horse and cattle, 7½ per cent ad valorem; leather splits, tanned but unfinished, 5 per cent ad valorem, tanned and finished, 7½ per cent ad valorem; bookbinders' leather, 15 per cent ad valorem; piano-action leather, 15 per cent ad valorem; chamois leather, 15 per cent ad valorem; all other leather not specially provided for in this section, 10 per cent ad valorem; all the foregoing, whether tanned only or tanned and finished, unless otherwise specified, provided, that leather advanced in process by cutting, stamping, or molding into shapes, forms, blocks, or taps suitable for conversion into manufactured articles, or by producing an artificial grain by bonding or embossing, shall pay a duty of 10 per cent ad valorem in addition to that imposed by this paragraph on leather of the same character as that from which they were so advanced in process.

[Hide and Leather.]

EXPORTS AND IMPORTS OF HIDES AND SKINS.

We are exporting comparatively few hides and skins (excepting furs). The total for November, 1912, was only $377,000, although these figures are twice the record for November, 1911. For 11 months ending November, 1912, however, our exports were $3,500,000 against $3,800,000 for same period, 1911. These figures indicate high markets at home. We are keeping the great bulk of our raw material for our own use, leaving only scanty offerings for other countries.

Our imports, however, are another story. During November, 1912, we received more than $2,000,000 worth of dry and green salted calf and kip, or a trifle over receipts for November, 1911. For 11 months ending November, 1912, our imports of foreign skins were over 50 per cent larger than for same period the year previous.

Imports of dry and green salted hides last November were more than twice as large as in November, 1911. Receipts for 11 months ending November, 1912, were more than twice as large as imports for same period in 1911.

Imports of goatskins decreased a little last November, as compared with November the year previous, but imports of goatskins for 11 months ending November, 1912, aggregated $22,000,000, or about $2,000,000 more than for similar time, 1911.

Imports of dry and pickled sheep skins have been heavier, and this same applies to receipts of horse hides, colt and ass skins.

Total imports of hides and skins of all kinds (except furs) for 11 months ending November, 1912, were $110,798,562, against $73,223,313 for similar period, 1911.

These heavy purchases of raw stock compensate somewhat for the deficiency in production of hides and skins in the United States.

MORE FOREIGN LEATHER COMING IN.

Imports of leather of all kinds during November, 1912, were about 40 per cent larger than for November, 1911. It is also worthy of notice that our imports of leather and tanned skins for 11 months ending November, 1912, were $7,702,992, against $5,362,148 for similar period 1911.

Although these figures can not be regarded as alarming it indicates that leather from other countries is growing more popular in America. If the new tariff bill still further reduces the duty on leather, importations would probably be larger than ever. This is something for the Ways and Means Committee to ponder over, as the shoe and leather industry was given a severe cut in the bill of 1909, and the tariff should not be further reduced.

It may be interesting to note that the total imports of leather, tanned skins and manufactures of, including boots, shoes, gloves, etc., totaled $16,385,000 for 11 months ending November, 1912, against $13,422,000 for similar period 1911.

FOREIGN SHOE TRADE EXPANDING.

Boot and shoe exports for 11 months ending November, 1912, were about $16,039,000, compared with $13,642,000 for same period in 1911.

This increase in our foreign shoe trade indicates the skill and ingenuity of our shoe manufacturers, in selling abroad in competition with goods made at lower wages than in the United States. This success is probably due to the vigorous and enterprising manner in which some shoe manufacturers are seeking foreign customers as a relief from the competition for orders in the United States.

JAPANESE IMPORTS OF LEATHER AND RELATED GOODS.

[Consul George N. West, Kobe.]

The following table shows the importations into Japan in the fiscal year closed March 31, 1912, of hides and skins, manufactured leather, shoes, rubber boots, and overshoes, as given in the Annual Returns of the Foreign Trade of the Empire. Where no figures are given the imports were unimportant but not necessarily absent altogether.

Imported from—	Hides and skins.	Leather.	Rubber boots, overshoes, and shoes.
Australia	$82,808	$1,491	
Austria-Hungary			$1,936
Belgium		1,837	
British India	8,387		
Canada and other British possessions		3,021	141
Chile	145		
China	99,817	921	2,139
Denmark	716		
Dutch India		5,536	
France	154	7,936	2,839
French Indo-China	39,920		
Germany	2,311	141,714	4,691
Great Britain	27,763	116,813	1,915
Kwangtung Province	52		
Russia:			
European			116
Asiatic	1,736		
Siam	12,713		
Straits Settlements	13,394	54,667	
United States	132,607	976,776	40,617

The amount of leather manufactured from animals slaughtered in Japan is large, but seems to be decreasing. In the years from 1905 to 1909 the figures of production were as follows:

Year.	Families engaged.	Employees.	Value of output.
1905	1,533	5,800	$8,320,470
1906	1,182	5,669	5,419,726
1907	1,162	5,494	4,466,535
1908	1,096	3,954	3,571,523
1909	965	3,780	3,459,739

Of the total in 1908 cow and calf leathers amounted to over $3,200,000, and horse and other leathers comprised the remainder. The principal centers are Osaka, with over $1,740,000 in 1908, and Tokyo and Hyogo, totaling about $1,500,000. Leatherware in the shape of trunks, bags, boxes, etc., is largely consumed in Japan. Leather goods are exported to the value of about $150,000 each year, principally to England. White leathers produced at Himeji are much in demand for making suspenders, corsets, etc.

[Hide and Leather, May 3, 1913.]

FREE SHOES AND LEATHER—COMMENT FROM LONDON TRADE PAPERS—MUCH OF IT INSTRUCTIVE.

MORE TRADE WITH AMERICA.

[Boot and Shoe Trades Journal.]

Naturally the question arises, What will be the effect of the removal of the duties upon shoes and leather? The obvious, if perhaps not exact, answer is that the results will be in our favor; but if the theories held by free traders are true, then we may expect keener competition. The removal of the duty from leather ought, of course, to lead to a bigger traffic in English sole leather. A considerable trade already exists in spite of the duty now prevailing, and the removal of the present charge will no doubt increase the trade. But any additional outlet for the mild tannages of this country will necessarily reduce the quantities available for home consumption and incidentally raise prices. Ultimately it may lead to a larger output and subsequently to a decreasing dependence of this country upon other nations for our supplies; but that effect can only be expected in the dim and distant future. With the shoe trade matters will be different. The removal of the duties ought to lead to big exports from this country. The 10 per cent tax, whilst not being an insurmountable barrier, was a barrier. One shilling upon a 10s. shoe was the difference between a profit for the importer and no profit at all. English boot manufacturers climbed America's tariff wall in 1909, and for a time did a fair trade, but the difficulties in the way of a rapid expansion were due more to the vagaries of fashion and to our unpreparedness than anything else. Much water has run down the Hudson since that time, and many changes have taken place on both sides of the Atlantic. Fashions are not so fickle in the States as they were, whilst our ordinary styles have not only increased in number but have become more American-like than they ever were. We have also progressed in other respects, and believe we are correct in saying we have utilized our machinery to such an extent as to bring costs down to the lowest possible point of production. In a word, then, we are better fitted to do trade with America, and if we were able to sell Americans shoes four or five years ago, in face of the duty and with our then inexperience of the market, we ought to do so now.

SUGGESTS ENGLISH SHOE SHOPS.

[Shoe and Leather Record.]

If shoes and leather go on the free list, American buyers of both will find much to interest them at the October fair. There are those who believe that a big market can be developed in New York and the larger American cities in English-made boots and shoes. This, however, can best be done with the assistance of American merchants who know the requirements of their own people and how best to attract their attention to novelties. It would probably pay to open shops for the sale of British goods only, as was done in this country when American shoes were first introduced here. But we do not recommend British boot manufacturers to embark upon such an adventure with their own capital. Overtures will certainly be received from the other side if real business is to be done. And before October arrives everybody will know for certain what the chances are. We extend our welcome to the fair to all Americans who realize the possibilities of making a market for British boots in the United States. The gathering will give them the opportunity they need of examining styles and comparing values. As to the market for British leather in the United States, we are confident that it must increase rapidly, for the simple reason that the average English tannage is of higher quality than the average American tannage.

ENGLISH LEATHER FOR AMERICA.

[Bristol correspondent of the Leather Trades Review.]

Local tanners keep moderately busy, and there has been quite a good demand during the past 10 days or so for good shoulders for the American trade. There is no doubt that when the duty comes off leather, English tanners will be shipping a good deal of leather to the United States, as there is no surplus stock there from all accounts. English beads of light and medium average are scarce and wanted. Heavy weights have not been in such good request. Bellies have been selling freely, and tanners and factors here are generally short of stock. American hemlock bellies have been advanced during the week to 17 cents in America. Though there is the usual lull in the Kingswood boot trade at this time of the year the Bristol factories are busy.

[Leeds correspondent.]

There has been much conversation in local leather circles during the past few days on the new American tariff bill, and the announcement that boots and shoes and leather are included in the articles to be admitted free of duty has caused general satisfaction. At one time considerable quantities of leather, manufactured in Leeds, were exported to the United States, and it is felt that if the Underwood bill becomes law local manufacturers will again secure some of this business. Anyhow, it is safe to say that every effort will be made to bring about this result.

ANOTHER VIEW.

[Wolsall and Birmingham correspondent.]

Trade has improved somewhat since my previous report. The prospect of a reduction of tariffs in America is already telling, and the local firms who suspended a large number of hands a few weeks ago have now restarted and are working full time. Other fancy leather-goods manufacturers report more doing as the season advances. Two or three more firms are adding fancy leather goods to their list of manufactures, and this branch continues to expand. Harness makers are a little better employed and collar makers have also more orders in hand. Currers and leather dressers are moderately employed.

Tables showing the rates and duties collected under the law of 1897 for the year ending June 30, 1907, also the rates under H. R. 1438 as it passed the House of Representatives, rates and estimated revenues under proposed bill as it passed the Senate, July 8, 1909, and as reported from conference, with tables of imports, production, and consumption.

[Prepared under direction of Finance Committee, Senate, 61st Cong., 1st sess. The ad valorems are based on the dutiable values.]

Net increase			13,223,392.25	3,633,247.01			
Total luxuries, articles of voluntary use, dutiable and free	329,912,382.35	162,495,497.23	173,018,117.82	170,637,370.19	49.25	52.44	51.72
Total necessaries, dutiable and free	1,085,489,902.43	166,623,944.38	169,322,735.54	162,113,318.82	15.35	15.60	14.93
Leather	7,997,060.19			771,194.33			9.64

The above table shows that the average tariff on leather—less than 10 per cent—is lower than the average of all the other schedules.

INTERVIEW OF C. H. WEISSE, FORMER MEMBER OF CONGRESS.

[From Sheboygan Press.]

At the present time there is a great deal said about the tariff, and for the information of the readers I give a few rates of the Payne-Aldrich bill, taken from the report of the Finance Committee, Sixty-first Congress, first session.

The bill contains the following rates:

Schedule N: Sole leather has a rate of 5 per cent, labor cost is about 11 per cent.

Schedule K: Some grades of woolen blankets have a rate of 182.17 per cent, wool hair 252.20 per cent; the labor cost is 18 per cent.

Schedule H: Wine in bottles is 34 per cent; the alcohol which is used for medicinal purposes is 1904.31 per cent, and cherry juice, a rate of 474.86 per cent. Labor cost 9 per cent.

Schedule J: Flax has a rate of from 21 to 189 per cent, and the labor cost is from 5 to 30 per cent.

These figures speak for themselves and show the injustice of the tariff bill.

Comparing the different rates on articles, it has the appearance of the rates charged by a pawnbroker on loans made to different classes of people and depending upon what they can put up for the favor.

The Underwood bill, however, corrects a great many of these rates, but at the same time our Republican friends are saying that it will not protect the American laborer. The average labor cost of all the manufactured articles in America according to the report filed with the Department of Commerce and Labor in 1900, is less than 20 per cent. The tariff rates of the Underwood bill average 29.06 per cent according to the figures given by Mr. Peters, of Massachusetts, which is greater than the total labor cost. It is not alone labor that enters into the manufactured articles. In the tanning business, of which I am a part owner, we pay every year to the railroads for transportation of our goods more than we pay to the laborers in the tannery. Also taking repairs, insurance, and taxes with interest charge is about equal to the labor cost.

We do not fear, so to speak, the foreign competition, when we can buy hides from foreign countries and export the leather to the same countries and pay the duty that they ask. The home competition has been so close that we have 40 per cent less tanneries to-day than we had 10 years ago. Placing sole, harness, belt, and rough leather made from cattle hides on the free list would not injure us, as this is the class of leather we are making. But, however, if the other leathers are placed on the free list it will be a loss of revenue to the Government without any benefit to any leather buyer where used for common use or otherwise. About all the leather imported is used in leather articles of luxury, including automobiles, furniture, bag, belt, and pocketbook leather, and fine French calfskins that are used in the very highest grades of shoes, and that we can not make here. I insert a table to show that the amount of leather imported has not changed since the tariff was lowered.

	Leather imported.	Duties collected.
1896 (Wilson)	$6,099,005	$893,000
1906 (Dingley)	5,612,642	956,000
Payne:		
1911	5,376,175	993,000
1912	6,951,233	860,000

Imports of all kinds of leather.

Year ending June 30—	
1895	$6,863,343
1896	6,098,005
1897	6,337,644
1898	5,625,147
1899	5,237,707
1900	6,519,172
1901	5,701,193
1902	5,021,846
1903	5,173,566
1904	4,900,231
1905	5,612,642
1906	6,670,848
1907	8,071,285
1908	4,852,409
1909	5,313,137
1910	7,007,923
1911	5,376,175
1912	6,951,233

The above table shows the importations of leather with lowering the duties. The only loss sustained was through the loss of revenue. It would be just as well to leave the duty on all light and fancy leathers and secure the revenue. We operated a tannery in North Carolina where we paid laborers $1 a day, and also have a tannery in Wisconsin where we pay $1.75 to $2, and it costs us less to produce leather in Wisconsin with the high-price labor, which goes to show that it takes more than labor to produce goods. It is uncalled for at this time for the manufacturers of this country to threaten to reduce wages on account of the tariff.

Exports of leather and manufactures of leather.

Year ending June 30—	
1891	$13,278,847
1892	12,084,781
1893	11,912,154
1894	14,283,429
1895	15,614,407
1896	20,242,756
1897	19,161,446
1898	21,113,640
1899	23,466,985
1900	27,293,010
1901	27,923,653
1902	29,798,223
1903	31,617,389
1904	33,980,615
1905	37,926,745
1906	40,642,858
1907	45,476,969
1908	40,688,619
1909	42,974,795
1910	52,646,735
1911	53,073,056
1912	60,756,772

According to the foregoing table, hides imports increased and also leather exports increased about 50 per cent over 1908, when hides were dutiable, and hides increased about 40 per cent in value, making higher prices for shoes. Calfskin and all hides under 25 pounds were always on free list, and there should be a small duty on all leather made from skins for revenue only.

[Data from the Department of Commerce.]

Imports of hides and skins.

1901	11,161,740	1,064,952	1910	14,635,075	1,738,216
1902	9,372,747	906,504	1911	44,594,235	4,802,637
1903	12,859,549	1,224,409	1912	25,246,800	3,158,493

The above table indicates a marked increase in imports of hides and skins since they were placed on the free list, which has insured increased employment to American labor and capital.

The Tariff.

EXTENSION OF REMARKS

OF

HON. WILLIAM N. BALTZ,

OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 8, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. BALTZ. Mr. Speaker, the question of how to raise revenue to support the General Government has been a question which has long been discussed by political parties. The Democratic Party has always favored a tariff for revenue, levied, as Jackson stated, in a spirit of equity, caution, and compromise so that the great interests of agriculture, manufacture, and commerce will be equally favored.

Under Republican tariff laws, and especially the Payne-Aldrich tariff law, great combinations of wealth have been welded into a plutocracy. Who is favoring high-tariff laws? The great corporations and wealthy individuals engaged in manufacturing establishments favor a high tariff so that they can increase their gains under the plausible argument that they deserve it in order to pay better wages to their employees. In this manner the laborer was deceived into believing that a high protective tariff is a protection to him. Our high protective tariff laws have not raised wages, but it is self-evident that they have raised the cost of living. The cost of living has increased 50 per cent during the last 15 years, while wages have increased only 15 per cent during the same period. The latter increase is due to the laborer's own efforts and to the labor organizations throughout the country. The best-paid labor in this or any other country is the labor that is not protected, such as the plasterers, plumbers, painters, bricklayers, carpenters, and masons.

The tariff has not protected the laborers, as is evidenced by the fact that the laborer, to protect himself, had to organize against the mighty forces created by the combination of wealth

and capital that were surrounding him. He felt that he could not stand alone as an individual against such forces and he felt the necessity of organization. They organized on the theory that in unity there is strength, and that through such organizations they could secure justice in their struggle for self-preservation. Laborers in this country no longer believe that a high tariff is the cause of high wages. Recent inquiries substantiate that fact. The best-protected industries paid starvation wages to their employees and then had the audacity to ask these laborers to support the high tariff for their own good.

The people protested against the Payne-Aldrich tariff bill two years ago when they elected a Democratic House. The reason for this can not be laid to a schism in the Republican Party. If it can be, then it was due to the dissensions that arose within the Republican Party over the high tariff. To a large number of the Republican Party the obvious reason for a high tariff had vanished, and they can only be termed later-day tariff-for-revenue-only men. It was the principle for which the Democratic Party has been striving all these years that entered a wedge between standpat and liberal-minded Republicans on the tariff question and that so overwhelmingly carried the off-year election for the Democratic Party. The people were clamoring for relief, and the measures framed by a Democratic House intending to give the people relief were vetoed by President Taft. President Taft was elected on the pretext that he favored a revision of the tariff downward, and I firmly believe that he was sincerely in accord with this idea, but the powers that be would not permit him to take such a course. So instead of putting into law the embodiments of the Republican platform, the faithful were given the very opposite of what had been promised to them, and the tariff walls were built higher and higher. The Democrats in that great convention at Baltimore declared in favor of a revision of the tariff downward. The people stood by this platform and elected Woodrow Wilson President and increased the Democratic majority in Congress. This Congress stands pledged to carry out the sacred trust that has been imposed upon them by a misled people. I believe in this tariff bill with the embodiment of the income-tax clause as framed by the Ways and Means Committee. Clauses of it may not be popular in different sections of the country. It is but natural that some objections should be offered to it. It is in the interests of the general public that we must legislate. Our Government has too long been conducted on the theory that we must provide and legislate for the rich and then trust to God that they will take care of the poor. This bill legislates for all. It places the burden where it can best be endured. The reduction of the tariff on the necessaries of life removes the burden of supporting the Government from the toilers and producers of wealth and the income tax places the burden of taxation where it can best be endured. We have been intrusted with this power, and it becomes our sacred duty to carry out the wishes of the masses and ignore the dictates of the classes. It gives me great pleasure to have the honor of being a Member of the Sixty-third Congress and to lend my assistance toward lessening the burdens of the common people by passing this tariff bill.

The Tariff.

EXTENSION OF REMARKS

OF

HON. ANDREW J. PETERS,

OF MASSACHUSETTS,

IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 8, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. PETERS. Mr. Speaker, under the general leave to print I wish to place in the RECORD a memorandum explanatory of the changes proposed by the pending tariff bill in the customs administrative laws. The administrative provisions are now included in section 28 of the act of August 5, 1909, commonly known as the Payne law. In the Underwood bill they form Section III.

The administrative features of the law have received careful consideration by the Ways and Means Committee, and have been changed in several respects. The Treasury Department is faced by many difficult problems in the administration of the present law. The question of undervaluation is a particularly troublesome one.

The increase in the number of the ad valorem duties in the bill now under consideration makes it doubly necessary to strengthen the provisions by which the Treasury Department can determine the proper value of the merchandise imported and enable it to punish frauds effectively. The committee has the fullest confidence in the fairness of the administration of the Secretary of the Treasury, and has increased his powers in full knowledge that they will be used to protect the revennes and in nowise to embarrass us in our relations with foreign countries.

Undervaluations work not only a fraud on the Government, but are a menace to the honest importer, for they give to his less scrupulous competitor an unfair advantage.

I desire to submit a review of the changes which have been made in the administrative provisions, and I am calling attention, briefly, to the alterations, at the same time mentioning the circumstances or the decisions which influenced the committee in making the proposed changes:

B.

It is proposed to change the existing law by adding the sentence—

That for the purpose of this act bringing or causing merchandise to be brought within the territorial limits of the United States shall be construed to be an attempt to enter or introduce the same into the commerce of the United States.

This is to meet the decision in the following case:

United States *v.* Twenty-five Packages of Panama Hats. Castillo, claimant. T. D., 32737, July 23, 1912, Circuit Court of Appeals, Second Circuit.

In this case it was held that the provisions of section 9, customs administrative act, June 10, 1890, as amended by section 28, subsection 9, act of August 5, 1909, are penal in character and must be strictly construed and are not applicable to goods until an entry of the same has been actually made or attempted. In spite of the fact that the foreign consignor or shipper sold or consigned the goods to a resident of this country and filed with the United States consul at Panama, to be forwarded to the collector of customs at New York, invoices in which the merchandise was deliberately undervalued the court held, one judge dissenting, that the goods were not liable to forfeiture. The Government has appealed this case to the Supreme Court of the United States, where it is now pending. If the decision should be affirmed, the Government will be left in a position of complete helplessness with respect to all cases in which fraud is suspected or discovered between the time the merchandise is shipped from abroad and the time of a formal entry thereof being made at the customhouse. (See also Goetze *v.* U. S., 182 U. S., 221; De Lima *v.* Bidwell, 182 U. S., 1.)

C AND D.

These sections have been changed by inserting the phrase "or agreed to be purchased" and similar expressions in defining the distinction between consigned and purchased merchandise. These changes follow the recommendations contained in the appraisement commission's report and are to meet a practice which has grown to very alarming proportions of making entry of merchandise upon the consigned form of invoice where in reality the transaction is a purchase disguised by the consignor and importer for the purpose of preventing the discovery by the appraising officer of the price agreed to be paid for the merchandise in question. This practice increases the difficulties of the appraising officers in getting at the truth concerning values to a very considerable extent, and is not one contemplated by the provisions of the act of August 5, 1909. The amendments proposed will result in requiring the importers to disclose the true nature of the transaction which has taken place with respect to their imported merchandise which is offered for entry.

It is also amended to provide for the consulating of invoices in the consular district where the merchandise is assembled for shipment in case merchandise is purchased in several districts.

F.

Paragraph F takes the place of subsection 5 of section 28 of the present law. It provides that whenever merchandise is imported into the United States a declaration upon a form to be prescribed by the Secretary of the Treasury shall be filed with the collector.

The present law specifies four forms of declaration to be made out for the various transactions involved in importing into this country. The change in the present law recommended by us substitutes for the words "one of the following declarations" the words "a declaration upon a form to be prescribed by the Secretary of the Treasury."

It is proposed by this change to allow the Secretary of the Treasury to prescribe forms which shall be used by the importer, agent, consignee, or owner. The present forms do not cover all the cases, and are conspicuously inadequate in the case of a transaction where the title passes while the goods are in transit. It is impossible at present for an importer to sign one of the four forms prescribed and tell the truth. It is thought best to allow the Secretary of the Treasury to prescribe forms for use in all cases.

The constitutionality of delegating to the Secretary the prescribing of forms of declaration, even though they will be elements of criminal liability, is supported by United States *v.* Grimaud (220 U. S., 506), Brodbine *v.* Revere (182 Mass., 598), and United States *v.* Ford (50 Fed. Rep., 467).

We have also recommended striking out the provision which requires the invoice to be sworn to before a notary public designated by the Secretary of the Treasury. It is thought better to allow this invoice to be sworn to before any notary public. Some abuse of the present law has grown out of the importers simply sending the invoice to a notary designated by the Secretary of the Treasury and that notary taking his acknowledgment on it without the personal appearance of the importer. It is thought to be more effective to allow the Treasury Department to go before the State officials appointing the notary, should he be guilty of the offense, and have his certificate revoked by the State.

G AND H.

The changes in these two sections (which take the place of subsections 6 and 9) were made to meet various decisions of the court in the following particulars:

(a) The case of United States *v.* One Silk Rug (C. C. Appls., third circuit, Jan. 30, 1908, 158 Fed. Rep., 974). In this decision it was held that section 9 of the customs administrative act of June 10, 1890, which was substantially the same as subsection 9 of section 28 of the act of August 5, 1909, defined various offenses against the customs revenue and prescribed two penalties—the forfeiture of the goods and the criminal conviction of the offender. It further held that the same guilty intent must be shown for the former penalty as for the latter, and that to incur a forfeiture there must be a guilty scienter and intent on the part of the forfeitor.

In this case merchandise, which was actually worth and for which the price paid in Egypt was £457, was valued on the consular invoice by the seller at £120. The merchandise, instead of being shipped to the purchaser, was shipped to importing agents with instructions to collect £362, the balance due after the advance payment was subtracted from the original price. The importing agents employed a customs broker to make entry, which was made upon the consular invoice value of £120. The fraud having been discovered by the appraising officer, forfeiture proceedings were brought and the importing agents, together with the customs broker, were named as claimants. The court held that a forfeiture could not be decreed because section 9, containing the criminal clause, must be strictly construed in both the criminal and civil cases, and the court could not exclude a guilty intent when enforcing the latter clause. At the end of the decision the court added:

If, as contended, this construction embarrasses it (the Government) in the collection of its revenue the remedy lies in legislative amendment.

By providing separate sections for the criminal aspect of such cases and for the civil or forfeiture aspect the new bill will enable the Government to succeed in a forfeiture case where there has been fraud without having to bring home to the claimant the fraud of the foreign shippers and other persons interested in evading the proper payment of duties.

(b) The introduction of the words "without reasonable cause to believe the truth of such statement" in the two sections is made to require an importing agent or broker to be put upon inquiry as to the fact concerning the transaction and the value of the merchandise. Under existing laws, and in view of the decision above quoted, and other unpublished decisions, it is at the present time possible for fraud to be practiced with impunity by the simple expedient of having the entry made by the forwarding agent or broker from whom the true facts concerning the merchandise and its value are withheld, either innocently or deliberately. All that he has to do is to make a declaration that to the best of his knowledge and belief the value stated is correct, when, as a matter of fact, to quote the appraisement commission's report, he "has not the faintest semblance of knowledge or the frailest foundation of belief." Under such a state of affairs to-day there is no liability, either civil or criminal, resting upon anybody concerned in the transaction except the foreign shipper, who is without the jurisdiction of the United States. The changes may be briefly summarized as follows:

Section G is amplified and strengthened and applies wholly to the criminal aspect of the case. It replaces subsection 6 of the Payne law.

Section H is strengthened, and applies wholly to the civil aspect of the case, the criminal provisions having been omitted. It replaces subsection 9 of the Payne law. The possibility of doing injustice to innocent importers by the increased severity of these provisions is overcome by the authority vested in the Secretary of the Treasury to remit or mitigate penalties and forfeitures under sections 17 and 18 of the act of June 22, 1874 (18 Stat., 189, 190), and Revised Statutes, sections 5292 and 5293.

I.

The first four lines were slightly changed to conform the law to the department's practice, as stated in article 208 of the Customs Regulations of 1908.

L.

This section is amended by providing that the Secretary of the Treasury may determine the existence or nonexistence of a foreign market. This is rendered necessary by lack of uniformity among local appraisers in determining this question, owing to the lack of knowledge of true conditions and also to prevent the deception of the local and general appraisers by the use of "wash" sales to create evidence of foreign markets.

M AND N.

The requirement of protest and appeal fees is based upon recommendations of the department, also of the committee which investigated the Board of United States General Appraisers. It has been recommended at various times by various Secretaries of the Treasury in their annual reports. It is approved by practically all customs officers. Its object is to cut off the great number of frivolous speculative protests, it being the practice of some brokers to protest against almost every liquidation, in the hope that something may arise or be found to make a case.

All these duplicate or frivolous protests at present require the following handling:

At customhouse: Received, recorded, transmitted to appraiser.
At appraiser's stores: Received, recorded, report of facts to collector, record of return.
At customhouse: Receipt of report of appraiser, formulate collector's report (often rubber stamp), transmitted to board.
At the board: Received, docketed, placed on calendar, called by the board on calendar (and abandoned), decided.
At the office of Assistant Attorney General: Prepared for hearing.
At customhouse: Receipt of decision, record.

M is also amended by the addition of the following words in the fifth, sixth, seventh, and eighth lines:

And no reappraisement or reappraisement shall be considered valid because of the absence of the merchandise or samples thereof before the officer or officers making the same.

This is to meet the decision in the following case: Tilge & Co. *v.* United States Court of Customs Appeals (T. D., 31507), April 10, 1911. In this case it was held that samples selected by the collector at the port of entry and deposited at the public stores should be examined on a reappraisement is a mandatory requirement of the law. Where the goods have gone into commerce on failure to produce such samples it is not permissible for the Government to substitute consular samples. While this decision was somewhat modified and explained in the same case on a petition in behalf of the Government for a rehearing (Tilge *v.* U. S. Court of Customs Appeals, May 31, 1911, T. D., 31676), it apparently still remains true that under the decision there must be some sample of merchandise exhibited to the general appraiser or to the Board of General Appraisers. In the cases of perishable merchandise—of live stock and of other articles of similar character—this requirement precludes a valid reappraisement, and the amendment suggested in this regard is for the purpose of permitting valid reappraisements in such cases. In commenting upon this feature of the case the court, in its decision upon the petition for rehearing, stated that—

that presents a matter of legislation which this court did not create can not remedy. * * * (See also Oelrichs *v.* United States (T. D., 32091).)

N is also amended by inserting the words "if dissatisfied with such decision, imposing a higher rate of duty or a greater charge, fee, or exaction than he shall claim to be legally payable," in lines 21, 22, and 23. This is to meet the decision in the following cases: United States *v.* Schwartz & Co. (Court of Customs Appeals, T. D., 32315, Mar. 12, 1912); American Manufacturing Co. *v.* United States (Court of Customs Appeals, T. D., 33161, Feb. 1, 1913).

In the first of these cases the court—one judge dissenting—held that a person might be "dissatisfied" with the rate or amount of duty assessed by a collector within the meaning of the statute, even though he was a domestic manufacturer importing merchandise similar to that manufactured by himself and desiring to have a higher rate of duty assessed by the collector than was actually assessed by that officer, for the purpose of affording himself a higher rate of protection upon his manufactured product. The result of these decisions is obviously to create fictitious litigation, which has always been objected to by the department. The attitude of the department has been up

to the time of this decision that there was no authority for an appeal by any importer because the rate or amount of duty assessed was too low. Consequently, in doubtful cases the department has always given the benefit of the doubt to the Government, thus permitting the issue to be raised by bona fide importers, and not by domestic interests masquerading as importers.

In the second of the cases above cited the court held—one judge dissenting—that where a domestic manufacturer of imported merchandise had protested against the rate of duty assessed because it was too low, he had a right to have the merits of his contention heard before the Board of General Appraisers, although the Government assented at the time of the hearing to the entry of a decision on his protest, in accordance with the claim made by the protestant. This decision forms a logical sequence to the one first cited above, and places the Government and the Treasury Department in the extraordinary position of being unable to extricate itself from litigation, even when it acquiesces in the contentions raised by the opposing side. The proposed amendment, if adopted, will relieve this anomalous situation.

O.

This section as now drafted qualifies the merchandise concerning which persons may be interrogated by the words "then under consideration or previously imported." This amendment is proposed to meet the decision in the case of United States against Calhoun, United States District Court for the Southern District of New York, January 9, 1911, reported as Treasury Decisions 31730. In the Calhoun case it was held that the collector was without authority to require an importer to answer questions under the citation provided for in subsection 15 of section 28 of the act of August 5, 1909, when the time within which a reappraisement might have been called had expired, although one year from the date of liquidation had not expired, and by implication this decision also is to the effect that neither the local appraiser nor any general appraiser could require the questions to be answered in response to the issuance of such a citation under the circumstances described.

It is also amended by making certain that the testimony taken shall be used in subsequent hearings or trials.

P.

This section is amended in view of the doubts expressed by the court in the case of United States against Bornn Hat Co., decided by the United States District Court for the Southern District of New York, January 9, 1911, Treasury Decisions 31730. The amendment also provides for an effective and summary means of collecting the penalty imposed, with a possible increase of that penalty from $100 to $500, the $100 penalty being obviously a very slight one as compared to the interests of the importer or a witness in keeping hidden from the appraising officers the documents or evidence which would establish the true value of the merchandise entered at an undervaluation.

Q.

This section gives the Secretary of the Treasury clearly joint power with the board in deciding what abstract decisions shall be published, and also requires from the board a statement of facts upon which their decisions are based. Such statements are now furnished in classification, but not in reappraisement cases.

The object of the change is to make these decisions more easily understood by the department, the local appraisers throughout the country, and the importers of similar merchandise, to the end that uniformity of appraisement may be attained. The present practice of publishing the results only is of slight practical benefit to the persons and officers interested.

T.

This section contains an amendment providing that the burden of proof in suits for value shall be upon the defendant as it is under existing law in seizure cases.

There seems to be no reason why the burden of proof should be upon the Government in cases where the property has escaped seizure, when it is not upon the Government if seizure is made. The proposed change places both kinds of suits upon the same basis. It will not only aid the Government in trying its suits for value, but will also be of benefit to the importers by reducing the number of seizures, since the Government officers will realize that they will not jeopardize the interest of the Government's litigation by failure to make an early seizure of the merchandise involved.

U AND V.

These provisions are new and are inserted in view of the great difficulty the Treasury Department has found in obtaining accurate information as to values from both the foreign manufacturers and shippers and the domestic importers. It is strongly urged by the department's appraisement commission in order to prevent undervaluations. With a large increase in the number of ad valorem rates applicable in the new tariff, a proper and just administration of the customs laws will require extremely summary and effective means afforded to the Treasury Department to ascertain actual values and market conditions. It is believed that these sections provide such means and should have the support of all persons involved whose books will disclose values in accordance with the values appearing upon their invoices and entries. In other words, these provisions should have no terrors for the honest exporters and importers.

W.

This section is new and is provided for the purpose of doing away with a considerable amount of litigation caused by the continued recurrence of the question as to whether or not a commission alleged to be paid to a commissionaire is a bona fide commission, and consequently a nondutiable item. This litigation has lasted for years and occupied a great deal of the time of the appraising officers, collectors, Board of General Appraisers, and the department. It has been somewhat fostered by the decisions of the Court of Customs Appeals in the case of Stein *v.* United States (T. D., 31007, Oct. 18, 1910), Stein *v.* United States (T. D., 31525), and United States *v.* Bauer (T. D., 32627). In these cases it was held that where a commission which was added by an importer to an entered value in order to make what he believed the appraiser would appraise as market value, although against the better judgment of the importer, such commission was added under duress and the liquidation should have been made upon the entered value without addition of the amount of the commission. The litigation and inconvenience caused by these decisions and the easy form of subterfuge and fraud offered by the present law governing the nondutiability of commissions will be obviated by the enactment of the proposed amendment.

X.

Paragraph X is also new, and is inserted upon the recommendation of the Appraisement Commission of the Treasury Department. It represents the practice now followed by several large importers. If adopted, it will enable the appraising officers to obtain accurate information concerning the transactions affecting values of merchandise.

REENACTED PARAGRAPHS.

Paragraphs E, J, K, R, S, Y, Z, BB, CC, and DD of Section III H. R. 3321 are essentially the same as subsections 4, 8, 10, 18, 19, 22, 23, 25, 26, and 27 of section 28 of the present law.

The Tariff.

EXTENSION OF REMARKS
OF
HON. FRANK B. WILLIS,
OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 8, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. WILLIS. Mr. Speaker, during the discussion of this bill various opinions have been expressed as to the methods of procedure of the Tariff Board and the conclusions of fact reached by it concerning the production of wool in the United States.

Personally I am strongly in favor of revision of all the various schedules of the tariff in such a manner as to equalize the difference in cost of production at home and abroad, such difference to be ascertained by a scientific nonpartisan tariff commission.

In my opinion the people of the United States are demanding this kind of tariff revision because they know that in no other way can a tariff law be framed that will be based on cold facts collected by scientific, nonpartisan experts and that will be fair and just to all. The pending bill rests on no scientific basis; it is not framed according to any well-defined logical principle; it discriminates against the American farmer and the American laborer; it puts a penalty on the building of industries in our own country and a premium on the building of industries in foreign countries; it furnishes additional employment for no American laborer; it makes a market for no American product; it will lower the prices which the producer receives; it will not permanently benefit the ultimate consumer. Importers and foreign trade journals are gleeful over the prospects of the passage of this bill; our own people are downcast and discouraged under the threat of impending free trade. The only permanent relief that can be obtained from this haphazard method of tariff making is through the maintenance of a reasonable degree of protection based upon facts collected by a tariff commission. As an illustration of how such a commission would work, I submit for publication in the RECORD the following editorial from the National Wool Grower for April, 1913:

WHAT THE TARIFF BOARD PROVED.

Every little while you see some one trying to prove that the report of the Tariff Board showed that the duty on wool should be reduced in order to conform to the difference-in-cost theory. However, anyone who understands the exact findings of the board can not fall into this error.

Now, the board found that the income from sources other than wool in Australia was sufficient to pay the total cost of handling their sheep during the year. This, of course, left the entire wool crop as a profit, and as the income derived from wool alone was found to be $1.31, the net profit per sheep is then $1.51.

In the United States the Tariff Board found that if the income from sources other than wool was deducted from the operating costs, there still remained a charge against a pound of western wool of 11 cents; against a pound of fine eastern wool, of 19 cents; against a pound of crossbred wool in the farm States, nothing. Therefore, to determine what the average cost for the United States is, these three items must be properly weighted by applying them to the number of sheep producing wool at each particular cost.

This then presents the following problem:

Millions of sheep.		Cost per lb.		
35	×	11	equals	385
5	×	19	equals	95
10	×	0	equals	0
50				480

480 divided by 50 equals 9.6.

The above problem gives 9.6 cents as the average cost of producing wool in the United States, even when 10,000,000 sheep are credited with producing wool at no cost whatever. Against this no cost exists for producing wool in Australia when measured on the same basis. Now, before costs of wool production become useful for comparison they must be reduced to the cost of producing scoured wool. As there was no charge against a pound of grease wool in Australia, there is certainly no charge against a pound of scoured wool. In the United States the average charge against a pound of grease wool was 9.6 cents, and as the average shrinkage of our wool is 60 per cent, then the cost of producing a pound of scoured wool is 24 cents, against nothing in Australia. Therefore if we were to be given the full difference in cost of wool production between this country and Australia we would need a tariff of 24 cents per scoured pound.

The woolgrower does not now, and never has, asked for a tariff of 24 cents per scoured pound. What he has asked for in the past has been 18 cents per scoured pound, which is 6 cents per pound below what the board shows he ought to have. However, the woolgrower accepts the spirit of the times, and believes that the party in power desires a reduction in the tariff upon everything, and in accordance with this spirit the woolgrower is willing to stand his share of that reduction and to cooperate with the new administration in bringing this about. But in the readjustment of the schedules the woolgrower will expect to see his industry dealt with fairly. The campaign for the election of President was fought under the promise that the reduction of the tariff would bring injury to no American industry, and the woolgrower expects that in the readjustment of his schedule this pledge will be fulfilled. This is all he is asking.

The Tariff.

EXTENSION OF REMARKS
OF
HON. ANDREW J. PETERS,
OF MASSACHUSETTS,

IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. PETERS. Mr. Speaker, under the general permission to print I desire to extend in the RECORD some comments on paragraph 358 of the tariff bill. This paragraph contains the following provision:

Provided, That the importation of aigrettes, egret plumes or so-called osprey plumes, and the feathers, quills, heads, wings, tails, skins or parts of skins of wild birds, either raw or manufactured, and not for scientific or educational purposes, is hereby prohibited; but this provision shall not apply to the feathers or plumes of ostriches or to the feathers or plumes of domestic fowls of any kind.

I desire to insert in the RECORD, in order that the matter may appear completely, the letters which have been sent criticizing this provision and the replies which seem to me to completely answer the objections made to this paragraph.

In answer to the letter of Alfred L. Simon & Co., of New York, I will insert a letter of Dr. John C. Phillips to me of May 7, 1913. Dr. Phillips is an ornithologist of the highest personal character and standing. His study of bird life and experience entitle his opinions to great weight. His personal observations and his contributions to magazines place him as a recognized authority on the subject.

The second letter which I insert is from the Audubon Society, the principal aim of which is the preservation of our bird life, in the aid of which it has done so much.

Extract from letter to Ways and Means Committee.

DEAR SIR:

(1) We beg to refer to that part of Schedule N of the proposed tariff bill which, if enacted, will prohibit the importation of feathers of wild birds, and we would respectfully call your attention to the hardships which its enactment would inflict on the principals and employees engaged in the feather industry.

(2) We would further add that the millinery trade does not employ song nor insectivorous birds to any extent seriously worth the mentioning, and we are perfectly safe in asserting that the song and insectivorous birds that are used would probably be less than one-fiftieth of 1 per cent of the trade in feathers, and these have only been used in the endeavor to realize on stock bought many years ago.

(3) We have read the testimony and briefs submitted to your committee by Messrs. Hornaday & Pearson, and while we appreciate their humane intentions, yet many of their statements regarding the use of some birds must have been based upon false or exaggerated information.

(4) As we understand it, the proposed bill will prohibit the importation of feathers of all wild birds, which would include feathers of game birds such as phesants, grouse, partridge, and wild ducks, and we believe you will agree with us that it would be very unfair to permit the flesh of such game birds to be admitted, and yet prohibit the importation of their feathers.

(5) These few items which we mention form a very large part of the feathers that are used in our trade, and the feathers of food birds, together with the feathers of such birds as are pests in their respective countries, crows, parrots, etc., together with the feathers of the barnyard birds, and if we except the feathers of the ostrich, egret, and paradise, furnish at least 95 per cent of the material used in the fancy-feather industry.

(6) This statement can be verified, we believe, by referring to customhouse records.

(7) We should like to call your attention to another phase of this proposed measure, and that is the difficulty that the customhouses in various parts of the country would have in determining whether feathers come from wild birds or from barnyard fowl.

(8) It is known in the trade—and every honest ornithologist will acknowledge it—that it is very difficult to determine the origin of many feathers when detached from the birds, and while this is a fact as regards crude feathers, when it comes to determining the origin of feathers that have been dyed and manufactured, it is well-nigh impossible to tell accurately the kind of bird the feathers have come from.

(9) To correctly and impartially enforce this proposed law, and any law that can not be impartially enforced we believe you will concede is a poor law, it will be necessary to have an expert ornithologist at every port of entry, and then there will always be questions of doubt.

(10) In order to enforce the law correctly it would be necessary to examine the feathers on every hat brought into the country, either by merchants, or in the possession of wearers, and it would have to go so far that the examiners would have to look into all kinds of bedding, or materials for bedding, quilts, and muffs that are imported, and even the feathers of the eider duck would be disbarred if this bill were to become a law, for this bird is a wild duck the same as mallards, widgeon, brants, etc.

(11) An item against which there is no prohibition is the ostrich feather, and if such a law as the proposed one had been in force in this and other countries 50 years or so ago the incentive to domesticate ostriches would not have existed, and thus a very important industry—that of ostrich farming—would never have started.

(12) As it is to-day, the important houses of the feather industry (and we might say that the individuals are as humane as the rest of mankind) are decidedly against the destruction of bird species, for if a specie were to be annihilated there would be no merchandise to be sold, and so they are encouraging in every way the domestication of wild birds whose feathers are valuable for millinery.

(13) To show you how important a phase this is on the subject, we can tell you that the rhea, the bird that furnishes feathers for the better grades of feather dusters, and which is used to a very great extent in millinery, is now raised on farms in South America, whereas it was only a few years ago when there were no tame rheas in existence; and as it is with the rhea, so it will be with other wild birds.

(14) If this country, which is probably the most important from the consumption of merchandise standpoint, should enact this proposed law, it will put back domestication of wild birds for many years.

(15) We fully recognize that your committee in formulating a tariff had an immense amount of work on its hands and could not give lengthy consideration to every item in the bill, and yet in a fair sense of justice, which we know you entertain, it is only right that both sides of the question should be heard, especially on a proposition which is not of rates, but of an entirely new feature, which has, in effect, the probable ruination of a trade; and while it appears that Messrs. Hornaday & Pearson appeared before your committee to present their views on the subject, we can not find that any representatives of the feather trade—Mr. Dejonch appeared for the flower manufacturers—were present, nor were asked their views on the subject.

(16) If this part of the tariff bill becomes a law it will not alone mean the loss of capital and perhaps bankruptcy for manufacturers and importers through taking away a large part of their business, but will be the means of closing factories in this country, also in Europe, and throw out of employment many thousands of employees, principally women, many of whom have been engaged in that work for many years and would be incapable of earning a living wage in unaccustomed branches.

(17) We have strong faith in the committee's sense of justice and fairness, and we hope to hear from you that you will use every endeavor to have the paragraph that is objected to eliminated.

(18) After giving attention to what we have written, if there is still doubt in your mind on this subject, may we not ask you to let representatives of this trade have a hearing at some time convenient to yourself, either alone or at the same time with representatives of the

societies, which through good motives of a misguided nature put honorable people in peril of financial straits through an unusual method of legislation?

Thanking you in advance for your kind consideration and response to this communication, we are,

Very respectfully, yours,

ALFRED L. SIMON & Co.,
New York.

—

WENHAM, MASS., *May 7, 1913.*

Hon. ANDREW J. PETERS.

DEAR SIR: I have been especially interested in the "extract from the letter addressed to Hon. OSCAR W. UNDERWOOD" by Alfred L. Simon & Co., of New York.

I have examined this letter with care and have answered the different headings in order. My qualifications for the statements to follow are as you know a general knowledge of ornithology and a great interest and some acquaintance with the subject of conservation of animal life.

I have consulted with our State ornithologist and he has made valuable suggestions.

The following gentlemen have read and heartily indorsed the sentiments following:

Mr. Samuel Henshaw, director of the Museum of Comparative Zoology, Cambridge, Mass.;

Mr. Outram Bangs, department of birds and mammals; and

Dr. Thomas Barbour and Dr. Henry B. Bigelow, both curators in said museum.

A long paper could be written on this subject but I have confined myself to its most important aspects and have been necessarily brief.

1. Of course this will be a hardship on a small class of tradespeople for a short time. This is no argument at all.

2. This is a perfectly loose statement. Many birds which are not ordinarily considered insectivorous nevertheless belong to this class, e. g., herons of several species. The important point is of course the protection of species, whether insectivorous or not, when they are threatened with extermination. The æsthetic side must be considered and we have no right to sacrifice nature to the whims of woman and the good of a small trade.

3. I have not seen the brief mentioned but know Dr. Hornaday and Mr. Pearson and am sure they are accurately posted as to the existing conditions. (See Hornaday's book, Our Vanishing Wild Life, 1912.)

4. The largest part of the game birds now imported come from game preserves of the Old World. This does not mean a depletion at all, e. g., English pheasants, mallards, and Scotch grouse. Feathers, however, are another matter, for these can and do come from various exotic species all over Asia, pheasant species which will never be raised on farms or preserves and which are being rapidly trapped and shot by native hunters for the feather trade. (Tragopans, monaul pheasants, and many others.) (See various articles by C. W. Beebe.) The importation of foreign game as now conducted is a legitimate business and involves no extirpation or diminution of species.

5. I do not believe that any more than a very small proportion of birds used for the millinery trade can be called pests. Gulls, terns, albatrosses, rollers, trogans, humming birds, egrets, birds of paradise, etc., are commonly in use. Crows and starlings might be considered pests by some. The use depends on the fashion. The magnificent goura pigeon of New Guinea is now in great demand. This is a species which will be very easily reduced or exterminated, and is one of the finest birds in the world to-day.

6. Custombouse records might be referred to, but would be entirely untrustworthy on account of the lack of special knowledge necessary for this branch of importation.

7, 8, 9. All that is necessary is to prohibit importation of poultry feathers. We have poultry enough over here and there is no reason why we shouldn't learn to "doctor" their feathers as they do in Paris.

10. Eider-duck down will not be disbarred, as downs are allowed. Eider ducks' feathers are seldom if ever used on hats. They can be obtained by legal methods here in the United States.

11. I see no reason why ostrich feathers should not be imported as they can be easily told from the other feathers. However, if they were disbarred it would be a fine thing for our United States ostrich farmers, though it would raise the price of feathers very much at first.

12. This statement would scarcely "go down" with anyone who is at all acquainted with the subject at hand. Whether the milliners are humane or not may be left on the side, but they are without question contributing at the present time to the extinction, or at any rate great reduction of some of our most highly prized birds; birds which can not possibly be replaced; as soon as one species becomes scarce, another one is taken up and pushed, and this war can continue for a long time. There are multitudes of birds, but the worst of it is our finest species suffer most in this trade. We would not complain if the English sparrow became fashionable.

13. I am not informed as to the rhea, but I should like to hazard a guess that there are no large rhea farms in existence. This matter is interesting and should be looked into. We have never heard of milliners encouraging the domestication of wild birds. Very few plumage birds can even be raised economically on farms, as every aviculturist knows.

14. I may be very dense but I fail to follow this train of reasoning. The proposed law can not have any such effect. The reverse would rather be the case.

15. The millinery business does not depend on bird feathers. All sorts of other things are in use. Besides, the feathers of a large variety of game birds and domestic birds can be used in this country. A new business can be started, the preparing of these feathers.

16. This is probably greatly exaggerated. A few importers will be injured. Somebody has got always to feel a change of law such as this is. In the end this should be an actual benefit to home industries. Only importers have really benefited much by this trade.

18. This could probably have been arranged, but it is too late in the day now.

Sincerely, yours,

JOHN C. PHILLIPS.

—

NATIONAL ASSOCIATION OF AUDUBON SOCIETIES
FOR THE PROTECTION OF WILD BIRDS AND ANIMALS.
New York City, May 9, 1913.

Hon. ANDREW J. PETERS,
House of Representatives, Washington, D. C.

DEAR SIR: One of our members, Mr. Frederic H. Kennard, has kindly forwarded to us copies of letters sent to you by the Jordan Marsh Co. and William Filene's Sons Co., both of Boston, in re Schedule N of the tariff bill. We should like to call your attention to the fallacy of the contentions made against this schedule. These contentions are as follows:

"1. There is no humane reason why the feathers of game birds, whose flesh is proper food, should not be used in millinery. All feathers of game birds are excluded in this proposed bill."—The stimulating of an additional demand for the destruction of game birds will doubtless result in the more speedy extermination of these birds. The result of the extermination of so-called legitimate game birds is to bring about a demand for the including in the class of game birds species which certainly should not be so considered.

"2. There is no humane, or any other reason, why the feathers of birds that are killed because they are pests should not be used. These are also excluded in this bill."—Who is to determine what birds are pests? The milliners would certainly not be competent or impartial judges. A great many of the birds that are considered pests in certain localities are distinctly beneficial in other localities. It is not desirable to create a special demand for the killing of any of these; local laws permit their killing where they are locally obnoxious.

"3. Feathers of game birds and pestiferous birds constitute the most important part of all importations."—We deny this assertion. The plumage of egrets, commercially known as aigrettes or ospreys, birds of paradise, goura pigeon, and a number of others constitute the great bulk of the wild-bird feathers used in the millinery business and of the importations of such goods. None of these birds are pestiferous and few, if any, are properly to be considered game birds.

"4. The provision in the proposed law would cause irreparable injury to all those who have anything to do with the millinery trade, both wholesale and retail."—We deny this statement. If a man has been dealing in illegitimate goods, i. e., in goods the commercial use of which is contrary to public policy, prohibition of such dealing is likely to cause him some loss. Legitimate substitutes for such goods will be readily found and already exist for a continuation of the millinery trade.

"5. It would be absolutely impossible to enforce this law justly and reasonably. It can not be determined whether imported, manufactured, and dyed feathers come from wild birds or not."—We deny this statement. It will not be a difficult matter to so arrange under the proposed clause of the tariff act as to permit of importations of feather millinery with far less complications than exist in customs examinations of thousands of classes of goods to-day.

We also desire to refer to the implication that the feather milliners had no chance to be represented at the hearing on this schedule, and that a representative of the artificial flower manufacturers "appeared with the representatives of the Audubon Society." There was no secrecy about the schedule or the hearing thereon and it was the fault of the feather milliners themselves if they were not represented there. As a matter of fact, the representative of the artificial flower manufacturers spoke also for the feather milliners' interests and was supposed to represent them. In fact, the whole plea of the millinery interests is not made in good faith, but is simply an attempt to introduce amendments to the schedule with a view to destroying its whole object.

We are aware of the fact that the tariff bill has already passed the House of Representatives and therefore that, as far as your vote on this schedule is concerned, this explanation would not be necessary, but we desire to have you know the facts in the case, and they may be of value to you in the event that you are able and inclined to use still further influence in behalf of this schedule while under consideration in the Senate.

We trust and believe that you are a supporter of the principle involved in the introduction of this clause.

Very truly, yours,

T. GILBERT PEARSON, *Secretary.*

The Tariff—Admission of Manufactures of Tobacco Free of Duty from the Philippine Islands into the United States.

EXTENSION OF REMARKS
OF
HON. AMBROSE KENNEDY,
OF RHODE ISLAND,
IN THE HOUSE OF REPRESENTATIVES,
Wednesday, May 7, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. KENNEDY of Rhode Island. Mr. Speaker, the tobacco industry of Rhode Island, comprising 65 establishments whose combined capital amounts to $228,146 and the value of whose products is more than one-half million dollars, in the interest of American labor is opposed to the increase in the quantity of cigars to be admitted from the Philippine Islands into the United States free of duty, as contemplated by the proposed Underwood tariff bill. In behalf of those employed in this industry, I wish to offer the following protests from the Rhode Island State Branch of the Cigarmaker's Union, No. 94, and the cigar makers of Pawtucket, R. I., against any increase in the importation into the United States of cigars free of duty from the Philippine Islands:

PROVIDENCE, R. I., *April 23, 1913.*

DEAR SIR: The following resolution is presented to you for your consideration:

Whereas there is now imported into the United States of America 150,000,000 cigars annually from the Philippine Islands free of duty; and

Whereas these cigars are coming in direct competition with the American workmen; and

Whereas the standard of living of the Philippine workman is below that of the American workman we find that it is impossible for the American workman to compete with the Philippine workman: Be it therefore

Resolved, That the Rhode Island State branch, in convention assembled, protests against the importation of these cigars free of duty from the Philippine Islands; and be it further

Resolved, That we urge the American Federation of Labor to protest to the proper authorities to have the law repealed which permits these cigars coming from the Philippine Islands free of duty.

JOHN H. SHEA,
Cigar Makers' Union No. 94.

—

PAWTUCKET, R. I., *April 30, 1913.*

Hon. AMBROSE KENNEDY,
House of Representatives.

DEAR SIR: We, the cigar makers of Pawtucket, R. I., in mass meeting assembled, protest against any increase in number of cigars admitted free of duty from the Philippines. Wages of orientals, 30 cents a day. New England industry can't compete.

Respectfully, yours,

A. E. HOHLER, *Secretary.*

The Tariff.

EXTENSION OF REMARKS
OF
HON. JAMES R. MANN,
OF ILLINOIS,
IN THE HOUSE OF REPRESENTATIVES,
Monday, May 5, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. MANN. Mr. Speaker, under the general leave granted by the House to print remarks in the RECORD I beg to call the attention of the House to the following instructive statement made by Friedlander-Brady Knitting Mills, Chicago, Ill., relative to knitted gloves and mittens, and of gloves and mittens made of fabric:

THE TARIFF AND ITS EFFECT UPON THE MANUFACTURE OF KNITTED AND FABRIC GLOVES AND MITTENS, COTTON AND WOOLEN, IN THE UNITED STATES.

To the honorable Members of the Sixty-third Congress:

If the tariff bill now before Congress becomes a law the manufacturer in this country of knitted gloves and mittens and of gloves and mittens made of fabric (glove cloth) will be absolutely destroyed. Under the existing tariff foreign-made goods comprise a large percentage of the American consumption of this class of merchandise, and a cut in the duties such as is proposed will entirely remove the American manufacturer as a competitor.

President Wilson has stated that no industry will be ruined by changes in the tariff, and we therefore believe that you will consider our plea, which we know to be a just one.

The manufacture of knitted gloves and mittens began in this country as an industry about 55 years ago. To-day nearly every State has its factories for the making of these goods. Individually the establishments are comparatively small, operating in keen competition with each other, but in the aggregate the investment of capital is large and a large number of people are dependent upon the business for their livelihood.

The Bulletin of the Thirteenth Census of the United States, relating to "manufactures, United States," abstract, page 44, under "Hosiery and knit goods," shows gloves and mittens as follows:

Years.	Pairs.	Value.
	Dozen.	
1909	2,527,889	$7,296,887
1904	2,260,508	5,556,260
1899	1,898,587	4,244,046

Until a few years ago the knitting of double seamless mittens, Exhibit A, comprised the chief article of manufacture in this line, but the knit yarn gloves, Exhibit B, and more recently gloves made of fabric, or glove cloth, Exhibit C, have in a large measure supplanted the knitted mitten.

Fabric gloves are made of finely knitted cloth, but are fashioned in the same way as are fine leather gloves, and those of the better grade have the appearance of suede leather and chamois. In length, buttons, embroidered back, and style of seams the fabric glove closely follows its leather prototype.

The popular demand is for gloves that retail at 25 and 50 cents per pair. For the 25-cent glove the jobber pays from $1.50 to $1.75 net per dozen pairs. For the 50-cent glove he pays from $3 to $3.50 net per dozen pairs. The jobber buys the best value that can be produced at these standard prices.

A glove knitted from yarn or fashioned out of fabric requires skilled labor, and labor is the important element of its cost.

In the United States all knitting and sewing is done at the mills. The time for work is limited to about 50 hours per week, and children are not generally employed. The wages paid for this class of work averages from $8 to $9 per week for females and from $12 to $15 per week for males.

Foreign-made goods, on the other hand, are for the most part produced in the home, where the children often do the work and the hours are not limited. The average wages paid for females is $3 per week and for males from $6 to $7 per week.

Through the Department of Commerce we learned that Thomas H. Norton, United States consul at Chemnitz, Saxony, the home of the industry in Germany, was in the United States on his vacation, and we sent him the following telegram:

CHICAGO, *April 25, 1913.*

To Consul THOS. H. NORTON,
210 Niagara Street, Lockport, N. Y.:

Can you furnish us with information as to wages paid in the knitted-glove industry of Germany? What are the number of hours of work per week, and what are the laws regarding work in the homes and the age at which children may be employed? Kindly wire answer at our expense.

FRIEDLANDER-BRADY KNITTING MILLS.

He replied by letter as follows:

AMERICAN CONSULAR SERVICE,
210 NIAGARA STREET,
Lockport, N. Y., April 25, 1913.

FRIEDLANDER-BRADY KNITTING MILLS, *Chicago.*

GENTLEMEN: Your telegram with inquiries relative to the knitted-glove industry of Germany just received. I take pleasure in furnishing you the following data:

1. The organization of the glove industry in Saxony, in my consular district, is such that the bulk of the work is done by female operatives at home. Factories devoted to the "fabric gloves" are comparatively small. They contain the machines for knitting "glove cloth" in varying degrees of fineness and the necessary equipment for cutting out individual glove. The sewing of the glove, the pointing, hemming, etc., is executed by women and girls, usually in their own homes, at regular rates per dozen pairs. The gloves are returned to the factory to be examined, "finished," attached in pairs, labeled, and packed in cartons ready for shipment. Frequently the dyeing and finishing of the gloves is carried on by a separate dyeing establishment, where often the packing and shipment to customers is effected at fixed rates per dozen. The knitting machines are conducted by male operatives. Hours are usually 60 per week. Wages about $6 to $7 per week. Female operatives in a factory earn about $3 per week. The work of sewers, etc., at home is by the dozen. Women and girls use their time when free from household duties.

2. All-knit gloves are sometimes made entirely in factories; sometimes the yarn is supplied to home workers, who are paid by the dozen. Dyeing, finishing, etc., are performed as above indicated.

3. Laws are now being formulated to bring "home" or "cottage" work more under the control and supervision of factory inspectors. All children must attend school until 14. Practically there is no limitation on the length of time children at any age may be occupied at home in gainful occupations.

4. Very valuable investigations on the extent and character of home industries have been published by trades-union organizations.

I think that my friend Prof. S. P. Orth, of Cornell University, Ithaca, N. Y., has such publications. His recent work on socialism is a notable book, and his studies were carried on at Chemnitz. A prominent Chemnitz editor and author, E. Heilman (address Rerrn Ridakteur E. Heilmann, "Die Volksstemme," Chemnitz, Saxony), could either furnish you with a copy or give you information how to obtain the last annual report on this subject.

The very exhaustive reports on the wage question in this industry were supplied by me to the Ways and Means Committee of Congress in 1908–9 and the "Tariff Commission" in 1910.

I will be glad to furnish you with any additional information required after my return to my post on July 1.

I remain, gentlemen,

Yours, very respectfully,

THOS. K. NORTON.

[See also the Daily Consular and Trade Reports, Jan. 12, 1910, No. 3683, p. 4.]

Because of the great percentage of labor, especially hand labor, which enters into the cost of production, and because of the difference in working conditions and in wages here and abroad peculiar to this business, the manufacture of cotton and woolen gloves and mittens is dependent upon a tariff for the existence of the industry in the United States. While in the past the tariff has encouraged the making of such goods in this country, it has never been sufficiently high so as to exclude foreign importations. Under the existing rate of duty the importations have been quite large, and this is especially true of women's cotton fabric gloves.

Under date of April 26, the Department of Commerce writes us:

"Recurring to your inquiry with reference to the importation of women's cotton and woolen gloves, made on occasion of your visit to this office, I have to inform you that in accordance with our suggestion on that occasion letters were written to the collectors of customs at New York, Philadelphia, Boston, and Chicago, asking for information upon this subject, and copies of their replies are inclosed herewith.

"It is apparent from the statements made in the letters that the collectors of customs do not keep this classification separately, and that statements upon this subject must be compiled from the entries in existence in the various offices. You will see that while the collectors at Boston, Philadelphia, and Chicago have presented figures of imports of a part of all the fiscal year 1912, taken from the entries, the collector at New York states that the preparation of a compilation of this character, to make up for actual entries of the year would be a proposition of such magnitude as to make it a decidedly impracticable measure."

New York is the chief port of entry for gloves and mittens of this class, and figures showing the importations through this port would be very valuable to us, but as these data are not available we must look to the figures furnished by the port of Chicago to the Department of Commerce under date of April 23, 1913, which show the imports for the fiscal year ending June 30, 1912, as follows:

Women's cotton gloves; rate of duty, 50 per cent.

Dozen pairs	64,345
Value	$95,431.00
Duty	$47,715.50

Now, for this same period the value of all imports through the port of Chicago amounted to $23,065,387, while the value of all imports into the United States amounted to $756,200,914.62. Applying the same ratio to women's cotton gloves, it follows that as the importation of women's cotton gloves through the port of Chicago amounted in value to $95,431, the importation into the United States of women's cotton gloves was approximately $3,000,000.

Women's cotton gloves, on which the importations as shown have been very heavy, consist chiefly of fabric gloves. Under the existing tariff rate of 50 per cent ad valorem the manufacture of women's cotton gloves in this country has been small. If the rate is still further reduced, the manufacturing of these gloves in the United States will cease.

As to men's and boys' cotton gloves the tariff handbook (p. 212, par. 265) shows the following:

Item.	Payne tariff.		Estimates for a 12-month period under H. R. 3321.
	1910	1912	
Imports:			
Quantity (dozen pairs)	176,254	86,887	$150,000
Value	$312,947	$88,363	
Average unit	$1.77	$1.03	$52,500
Duties	$218,684	$78,788	(2)
Rate	69.88	(1) 89.17	35.00
Equivalent ad valorem per cent			

[1] 50 cents per dozen and 40 per cent. [2] 35 per cent.

Men's and boys' cotton gloves show imports in 1910 amounting in value to $312,947 (tariff handbook, p. 212, par. 265), or more than double the estimate of $150,000 shown under a rate of 35 per cent ad valorem, as proposed in the Underwood bill. A severe cut in the rate on this class of goods will necessarily stop the manufacturing of men's and boys' cotton gloves in this country.

A tariff rate covering all cotton gloves should take into consideration the present low rate on women's cotton gloves (50 per cent) and the higher rate on men's and boys' cotton gloves (89.17 per cent). A reduction of one third of the rate on men's and boys' cotton gloves and an increase of one-fifth of the rate on women's cotton gloves would give a rate of 60 per cent on all cotton gloves. Under this rate there would still be a chance for the American manufacturer to get a share of the business.

As to woolen knit gloves, it is again necessary to resort to the data furnished by the port of Chicago to the Department of Commerce, which show the imports for the fiscal year ending June 30, 1912:

All-woolen gloves, rate of duty 41 cents per pound and 60 per cent.

Dozen pair	20,083
Weight, pounds	17,443
Value	$27,904.00
Duty	$24,094.20

Using the same proportion as was employed in determining imports of women's cotton gloves, the imports of woolen knitted gloves into the United States during this period amounted in value to over $1,000,000.

As the value of the imports through the port of Chicago amounted to $27,904, and the duties thereon amounted to $24,094.20, the equivalent ad valorem rate of imports on this class of goods figures about 88 per cent ad valorem.

As yarn is the glove knitter's raw material and it is proposed that the tariff on yarns be made 20 per cent ad valorem, the corresponding rate on woolen yarn gloves would figure about 75 per cent ad valorem.

It may be possible for the American manufacturer to operate at a lower rate than 75 per cent, but it will be impossible for him to do so if the rate is reduced under 60 per cent ad valorem.

On silk gloves no data have been obtained.

The following is a tabulation of the results from the data available:

	Manufactures (1909).	Importations (1912).	Payne rate.	Rate H. R. 3321.	Rate recommended.
			Per ct.	Per ct.	Per ct.
Women's cotton gloves		[1] $3,000,000	50.00	35.00	60.00
Men's and boys' cotton gloves		88,363	89.17	35.00	
Woolen gloves		[1] 900,000	88.00	35.00	[2] 65.00
Silk gloves			60.00	60.00	
Total	$7,296,887				

[1] Estimate. [2] Yarns at 20 per cent ad valorem.

Knitted and fabric gloves and mittens should be classified by themselves. They do not belong with "hosiery" or with "knit goods other than hosiery," and under the general division of "clothing or other wearing apparel" the industry is completely lost sight of. The fabric glove has become an important factor in the glove trade. The fine gauge lightweights make an excellent substitute for "kid" gloves in warm weather, while those of heavier material are displacing the less dressy looking yarns gloves. It will be of vital interest to the Government, as well as those engaged in the industry, to have accurate knowledge of the imports and manufactures of such goods.

Cotton and woolen knitted gloves and mittens will probably continue to be retailed at 25 cents and 50 cents, no matter what the tariff may be on this class of goods, for the people who buy them do not use more than one or two pair a year and a cut in price would be no inducement to purchase more. It may mean larger profits to the jobber and to the retailer if they are able to buy their goods in the foreign market at a reduction of 25 cents or 50 cents per dozen pairs, but the consumer will still pay the standard prices of 25 cents and 50 cents.

Whatever may be the case with other wearing apparel, the prevailing prices at which knitted and fabric gloves are sold in the United States are not high, and they have had no part in raising the cost of living. The proposed reduction in the tariff upon these goods means to the consumer a saving at the very most so small as to be negligible, but to the American manufacturer of these goods it means utter impossibility of continuing in the business. This would mean a heavy loss in the value of his materials and merchandise and a total loss of his machinery, while to the skilled operator employed in this industry it means loss of the employment for which he has fitted himself.

Respectfully submitted.

FRIEDLANDER-BRADY KNITTING MILLS,
Chicago, Ill.

The Tariff.

EXTENSION OF REMARKS
OF
HON. JAMES W. BRYAN,
OF WASHINGTON,
IN THE HOUSE OF REPRESENTATIVES,

Friday, May 2, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. BRYAN. Mr. Speaker, throughout the debate on the Underwood tariff bill it has been charged by the Progressives and the Democrats that the Republican Party is so late a convert to the doctrine of a permanent nonpartisan board of tariff experts to report facts relating to rates and to furnish up-to-date information on all the other facts necessary to intelligent tariff revision as to render that party subject to the charge of insincerity and an attempt now to play the opportunist.

It has been pointed out that the Republican Party has had 50 years to establish a tariff board, but that it has uniformly neglected and refused to take steps in that direction, although it had full power so to do.

In turn so distinguished a Member as the gentleman from New York [Mr. FITZGERALD] has asserted that the leader of the Progressive Party in the United States, ex-President Theodore Roosevelt, also failed to suggest that Congress needed such a board of tariff experts until after he left the White House, and the suggestion is made that the Progressive Party is thus chargeable with the same quality of negligence and insincerity as the Republican Party.

The gentleman from New York [Mr. FITZGERALD] is mistaken, and in evidence of his error I submit one of many similar prior utterances of Theodore Roosevelt while he was President of the United States. The following article appears in American Industries, on February 1, 1909:

PRESIDENT ROOSEVELT APPROVES A COMMISSION—WHAT WE REALLY NEED IN THIS COUNTRY IS TO TREAT THE TARIFF AS A BUSINESS PROPOSITION.

A commission of business experts can be appointed whose duty it should be to recommend action by the Congress after deliberate and scientific examination of the various schedules as they are affected by the changed and changing conditions. The unhurried and unbiased report of this commission would show what changes should be made in the various schedules, and how far those changes could go without changing the great prosperity which this country is now enjoying or upsetting its taxable principle.

What we really need in this country is to treat the tariff as a business proposition and not from the standpoint of the temporary needs of any political party. It surely ought not to be necessary to dwell upon the extreme unwisdom from a business standpoint, from the standpoint of national prosperity, of violent and radical changes amounting to the direct upsetting of tariff policies at intervals of every few years.

A nation like ourselves can adjust its business after a fashion to any kind of a tariff. But neither our Nation nor any other can stand the ruinous policy of readjusting its business to radical changes in the tariff at short intervals. This is more true now than ever it has been before, for, owing to the immense extent and variety of our products, the tariff schedules of to-day carry rates of duty on more than 4,000 articles.

Continual sweeping changes in such a tariff touching so intimately the commercial interests of this Nation, which stands as one of the two or three greatest in the whole industrial world, can not but be disastrous. Yet, on the other hand, where the industrial needs of the Nation shift as rapidly as they do with us, it is a matter of prime importance that we should be able to readjust our economic policy as rapidly as possible and with as little friction as possible to these needs.

We need a scheme which will enable us to provide a reapplication of the principle to the changed conditions. The problem, therefore, is to devise some plan by which these shifting needs can be recognized and the necessary readjustment of duties provided without forcing the entire business community, and therefore the entire Nation, to submit to a violent surgical operation, the mere threat of which and, still more, the accomplished fact of which, would probably paralyze for a considerable time all the industries of the country.

Such radical action might very readily reproduce the conditions from which we suffered 16 years ago, in 1893. It is on every account most earnestly hoped that this problem can be solved in some manner into which partisanship shall enter as a purely secondary consideration, if at all—that is, in some manner which shall provide for an earnest effort by nonpartisan inquiry and action to secure any change, the need of which is indicated by the effect found to proceed from a given rate of duty on a given article; its effect, if any, as regards the correction of a substantial monopoly; its effect upon domestic prices, upon the revenue of the Government, upon importations from abroad, upon home production, and upon consumption.

My personal preference would be for action which would be taken only after preliminary inquiry, and upon the findings of a body of experts of such high character and ability that they could be trusted to deal with the subject purely from a standpoint of our business and industrial needs.

The health of the community will be subserved by treating the whole question primarily from the standpoint of the business interests of the entire country, rather than from the standpoint of the fancied interests of any group of politicians.

The Tariff.

EXTENSION OF REMARKS
OF
HON. WARREN W. BAILEY,
OF PENNSYLVANIA,
IN THE HOUSE OF REPRESENTATIVES,

Saturday, April 26, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. BAILEY. Mr. Speaker, in the course of a short address in the House yesterday the Hon. SAMUEL W. SMITH, of Michigan, declared that the Democrats could not point to any free trade or tariff for revenue legislation which did not injuriously affect all our industries. He said:

It is not possible for one of you gentlemen to point to any free trade or tariff for revenue legislation in this country under which we have not had results like we had in 1837, in 1857, between 1893 and 1897, and I am frank to say to-day that I would like to have somebody give to the country some consolation and comfort that we can hope that this bill will be an exception to every other tariff for revenue or free-trade piece of legislation written on the statute books.

Were we to produce the testimony of Democratic authorities or even the testimony of disinterested and impartial observers to prove that the Walker tariff law (under which the lowest tariff duties were levied) produced the greatest period of prosperity this country has ever known, our Republican friends would say that we were attempting to falsify history for political effect.

Therefore I will produce the testimony of a man who for a generation was the acknowledged and undisputed national leader of the Republican Party; he was Speaker of this House, a Member of the Senate, the Republican candidate for the Presidency in 1884, and Secretary of State under two Republican administrations. I have reference to your great popular idol, James G. Blaine. As a philosophical historian he was obliged to confine himself to the facts and tell the whole truth in his admirable work, Twenty Years in Congress. In that great work he said:

The Whig victory of 1848 was not sufficiently decisive to warrant any attempt, even had there been a desire, to change the tariff. Gen. Taylor had been elected without subscribing to a platform or pledging himself to a specific measure; and he was therefore in a position to resist and reject appeals of the ordinary partisan character. *Moreover, the tariff of 1846 was yielding abundant revenue; and the business of the country was in a flourishing condition at the time his administration was organized. Money became very abundant after the year 1849; large enterprises were undertaken, speculation was prevalent; and for a considerable period the prosperity of the country was general and apparently genuine. After 1849 the Democrats had almost undisputed control of the Government and had gradually become a free-trade party. The principles embodied in the tariff of 1846 seemed for a time to be so entirely vindicated and approved that resistance to it ceased, not only among the people, but among the protective economists and even among the manufacturers to a large extent. So general was this acquiescence that in 1853 a protective tariff was not suggested or even hinted by any one of the three parties which presented presidential candidates.*

It was not surprising, therefore, that with a plethoric condition of the National Treasury for two or three consecutive years the Democratic Congress in the closing sessions of Pierce's administration enacted what has since been known as the tariff of 1857. By this law the duties were placed lower than they had been at any time since the War of 1812. The act was well received by the people and was indeed concurred in by a considerable proportion of the Republican Party. * * *

(Page 202.)

The free traders consider the tariff of 1846 to be conclusive proof of the beneficial effect of low duties. They challenge a comparison of the years of its operation, between 1846 and 1857, with any other period of the history of the country. Manufacturing, they say, was not forced by a hothouse process to produce high-priced goods for popular consumption, but was gradually encouraged and developed on a healthful and self-sustaining basis not to be shaken as a reed in the wind by every change in the financial world. *Commerce, as they point out, made great advances; and our carrying trade grew so rapidly that in 10 years from the day the tariff of 1846 was passed our tonnage exceeded the tonnage of England. The free traders refer with special emphasis to what they term the symmetrical development of all the great interests of the country under this liberal tariff. Manufactures were not stimulated at the expense of the commercial interest. Both were developed in harmony, while agriculture, the indispensable basis of all, was never more flourishing. The farmers and planters at no other period of our history were in receipt of such good prices, steadily paid to them in gold coin, for their surplus product, which they could send to the domestic market over our own railways and to the foreign market in our own ships.*

Now, I admit that the low duties under the tariff law of 1833 were a factor in producing the industrial depression of 1837, and that the low duties under the tariff law of 1846 produced the industrial depression of 1857; but they were not produced in the way the Republicans imagine. The fact is that low duties have always and everywhere produced periods of marvelous material prosperity; that this prosperity has naturally and necessarily increased the demand for land; the increased demand for land has increased its economic value, and this in turn has led to land speculation. The speculative advance of land values tends to force capital and labor to less productive fields, thus reducing their proportionate shares in the aggregate wealth produced by their combined efforts. It is evident that speculative rent can only advance at the expense of labor and capital, and that the only way that they can counteract the forcing down of wages and interest is by the cessation of production.

Take any industrial community in which population is increasing and the consequent cooperation of individual powers is developing old industries and creating new ones, and land must increase in value, constantly and continuously. This assured increase of land values naturally leads to speculation, in which future increase is confidently expected, and speculative values are forced beyond the point at which, under the normal conditions of production, their usual earnings would be received by labor and capital. Their failure to receive their just returns disposes them to stop production. This cessation of production at some parts of the industrial system must necessarily show itself at others in a lessening of effective demand, which retards production there, and thus the depression communicates itself through the whole industrial system, resulting ultimately in widespread industrial depression. This is how seasons of marvelous material prosperity and progress have produced industrial depressions and financial panics.

The taxation of land value, irrespective of improvements, would remedy this by destroying the incentive to land speculation.

During this debate much has been heard from the other side of the Chamber regarding the low labor cost of production abroad in comparison with labor cost in the United States. I deny that we are at any such disadvantage, and I reassert the proposition that ours is actually the cheapest labor on earth. And in this connection I want to call attention to the testimony of Mr. Frank A. Vanderlip, a Republican of high standing, formerly a Secretary of the Treasury, and to-day regarded as one of the foremost business men of the country. He went abroad soon after his retirement from the Treasury Department to study the commercial and economic conditions of Europe, and on his return he wrote a series of articles for an American magazine, not included in the "yellow" or muckraking class, on "The American commercial invasion of Europe." Let me quote from Mr. Vanderlip to show the lifeless of the talk on the other side of our inability to cope with European competitors on account of our so-called higher wages and higher standard of living. Here is what that eminent Republican authority says:

THE AMERICAN COMMERCIAL INVASION OF EUROPE.

(By Frank A. Vanderlip, in Scribner's Magazine, January, 1902, p. 10.)

American locomotives, running on American rails, now whistle past the Pyramids and across the long Siberian steppes. They carry the Hindu pilgrims from all parts of their Empire to the sacred waters of the Ganges. Three years ago there was but one American locomotive in the United Kingdom; to-day there is not a road of importance there on which trains are not being pulled by American locomotives. The American locomotive has successfully invaded France. The Manchurian Railway, which is the real beginning of oriental railway building, bought all its rails and rolling stock in the United States. American bridges span rivers on every continent. American cranes are swinging over many foreign moles. Wherever there are extensive harvests there may be found American machinery to gather the grain. In every great market of the world tools can have no better recommendation than the mark "Made in America."

We have long held supremacy as a producer of cotton. We are now gaining supremacy as makers of cloths. American cottons are finding their way into the markets of every country. They can be found in Manchester, as well as on the shores of Africa and in the native shops of the Orient. Bread is baked in Palestine from flour made in Minneapolis. American windmills are working east of the Jordan and in the land of Bashan. Phonographs are making a conquest of all tongues. The chrysanthemum banner of Japan floats from the palace of the Mikado on a flagstaff cut from a Washington forest, as does the banner of St. George from Windsor Castle. The American typesetting machines are used by foreign newspapers, and our cash registers keep accounts for scores of nations. America makes sewing machines for the world. Our bicycles are standards of excellence everywhere. Our typewriters are winning their way wherever a written language is used. In all kinds of electrical appliances we have become the foremost producer. In many European cities American dynamos light streets and operate railways. Much of the machinery that is to electrify London tram lines is now being built in Pittsburgh. The American shoe has captured the favor of all Europe, and the foreign makers are hastening to import our machinery, that they may compete with our makers. In the Far East, in the capital of Korea, the Hermit Nation, there was recently inaugurated, with noisy music and flying banners, an electric railway, built of American material by a San Francisco engineer, and now it is operated by American motormen.

Also, in Scribner's Magazine of February, 1902, page 202:

In Vienna I met an American who is at the head of one of the large boiler works in this country. He has been interested in making comparisons of the cost of labor and of the methods of work in the Viennese factories, and I found him amazed at the wasteful methods and

the high labor cost that resulted from the Austrian manufacturers failing to use modern machinery.

"I was informed in one shop," he told me, "that a boiler of about 150 horsepower cost for labor alone $750." That boiler would have been built in an up-to-date shop in America for a labor cost of $150. In the United States three workmen with modern tools would accomplish as much in one day as would be done by four workmen in a Vienna shop working one week. The cost of labor in the United States would be about $5, the men receiving for this class of rough work a little more than $1.50 a day. Of the four men in the Vienna shop, two would receive 80 cents a day, one 60 cents, and one 40 cents; but even at those low wages the total labor cost there would be $15.60 against about $5 with us. I found an almost total absence of labor-saving machinery in some of the largest shops in Vienna; plates were being handled by hand; there were no riveting machines, no traveling cranes, no modern hoists.

The Tariff.

EXTENSION OF REMARKS
OF
HON. JAMES R. MANN,
OF ILLINOIS,
IN THE HOUSE OF REPRESENTATIVES,

Tuesday, May 6, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. MANN. Mr. Speaker, under the general leave to print granted to Members, I insert herewith in the RECORD an address to the Republicans of New Britain, Conn., by Hon. Ebenezer J. Hill, for many years a Member of this House prior to this session. Mr. Hill was one of the ablest and most industrious and capable Members which the House of Representatives ever possessed. Honest with others and honest with himself, he was an indefatigable digger after facts, especially those which relate to tariff matters, and any statement by him is an enlightening contribution on the tariff subject.

An address to the Republicans of New Britain, Conn., by Hon. E. J. Hill, Tuesday, April 29, 1913.

"WHAT SHALL THE HARVEST BE?"

The campaign of 1912 was won upon an honest declaration in the South that there was no constitutional tariff except a tariff for revenue only, and in the North by the declaration that in attaining it "no legitimate industry would be injured or destroyed."

With all of our industries developed and built up under the policy of protection for the past 50 years the two utterances are absolutely inconsistent, and the victory came, therefore, as the result of conflicting declarations by the party and misunderstandings by the people, of course supplemented by disastrous division in the ranks of the Republican opposition with reference to other questions.

THE OUTCOME.

The outcome is an administration with not a New England man in it for the first time in our Nation's history.

It is composed throughout of those who are honest, conscientious believers in a theory which, from the New England standpoint, is, in its practical operation, far more disastrous than absolute free trade, for a duty which eliminates protection from the finished product and surrenders the home market to a lower foreign cost of production is, under this plan, supplemented by a revenue duty upon raw material, which makes our access to foreign markets impossible to many existing industries.

The election gave to the country a House of Representatives peculiar in many respects.

It is said that for the first time in 50 years there is not a Union soldier on the Republican side and but one on the Democratic.

The last Congress, with 63 Democratic majority, repealed the requirement of proof of loyalty in establishing claims to captured and abandoned cotton at the close of the war, and opened the Treasury doors to demands for the refunding of millions of dollars legitimately expended for national purposes a half century ago.

It authorized longevity pay for Lee and Jackson and all the officers of the Army who resigned to enter the Confederate service.

It spent $87,000,000 more than any Republican Congress ever appropriated.

At the same time and in compliance with party instructions it attempted to pass six tariff bills, which would have decreased the revenue by $65,000,000 annually, and if they had not been stopped by the presidential veto the Treasury deficiency for 1914 would have approximated $150,000,000.

In one of these measures alone nearly five billions of American products would have been put on the free list and exposed to the unrestricted competition of the world.

And yet, in face of such a record, the House majority of 63 was increased to 145 and the Senate was changed to a Democratic majority of 6.

"WHAT SHALL THE HARVEST BE?"

With the cry that the people must rule, a party that is in a minority of 2,000,000 of the popular vote is now doing what it tried to do before the election—reversing the historic policy of the Nation—and doing it by the binding vote of a sectional majority in a party caucus.

On the 3d of March I was talking with a northern Democrat who was about to retire from Congress.

The welfare of his State is largely dependent upon its production of sugar, lead, and wool, and all had been heavily hit by the attempted legislation.

I said to him, "How did you enjoy the privilege of being bound to vote on these things without having seen the bills before you went into caucus, and without being given time to read them when you got there?"

His reply was, "We went into the caucus blindfolded and were carried out hog tied, and I am glad I am through with it."

If the Republican Party had ever attempted to enact tariff legislation in that way it would have deserved and received the severe condemnation of the American people.

The Democratic Party is rewarded by having their majority doubled.

And now, relying as before upon a southern majority secured by a representation which bears no relation to the popular vote, and serenely confident in the persuasive force of patronage withheld from the northern contingent, a slight concession is made to legislative decency, and permission given for a reading of the bill and for amendments to be uselessly offered, because they are foreordained to overwhelming defeat.

A SCREAMING FARCE.

As a good illustration of a screaming farce I quote from recent reports from our local papers:

WASHINGTON, *April 11.*

Representative JEREMIAH DONOVAN made his debut on the floor of Congress when he arose in the Democratic caucus and stated that the manufacturers of hats in his district as well as those of several other industries were of the opinion that the cut in the tariff had been more severe than these manufacturers had wished.

Leader UNDERWOOD good-naturedly responded to the Connecticut Congressman by stating that the Democratic Party had gone before the people with a plan to lower the tariff, and that he believed that Connecticut had wanted it lowered because of the fact that she had sent five Representatives to Congress.

—

WASHINGTON, *April 15.*

The Connecticut Congressmen showed the most spunk of all the Members in the House Democratic caucus Saturday. Congressman REILLY, supported by Congressman DONOVAN, presented amendment after amendment to the Underwood tariff bill, to go down to defeat each time with nearly two-thirds of the Members present standing by the bill as it was presented. The Connecticut Members who want the reduction of the tariff to be on a more gradual scale than the plan proposed took their defeat gamely.

The amendments offered by Mr. REILLY called for an increase in the proposed duties on wood screws, builders' hardware, clocks, double-barreled and breech-loading shotguns, machine tools, and numerous other articles in the iron and metals schedule.

While there were undoubtedly a number of the listeners to the Connecticut Congressmen who believed that there was merit in their arguments, it was quite evident that the whips of the Ways and Means Committee fear that any single amendment to the bill might cause a break in the program that would cause wholesale amending.

Think of it! "Tom and Jerry," the innocent twins, doing the Chinese act called "saving their face."

In the last Congress Mr. REILLY of Connecticut voted to put machine tools on the free list, and for the identical rates on the other things which he now says are too low.

He knew then that the bill would be vetoed by a Republican President.

He knows now that it will be approved by a Democratic one, and he fears the result at home, for I am told that for a week before the last election he advertised in the local papers that he stood for protection to all of the products of Connecticut.

And his colleague, Mr. DONOVAN, also, according to the Bridgeport papers of October 17, 1912, closed a speech that night by saying that "he was a free trader himself when it came down to free beef and the commodities of life, but was for a just protection of all things made in Connecticut."

Their colleague, Mr. LONERGAN, was more prudent, for when he was before the Ways and Means Committee in January he said "he was for protecting Connecticut tobacco," but declined to commit himself on woolen goods until he knew what the committee was going to do about them.

Since I have read the pending bill and found that the present limit of 150,000,000 cigars from the Philippines, for which I voted and for which I was denounced by Mr. DONOVAN to the cigar makers all through the campaign, is now to be taken off so that an unlimited amount can be brought in free, I have wondered if either of them will have nerve enough to bolt the caucus and vote with the Republicans on the final passage of the bill.

Why not be brave like Mr. KENNEDY of Connecticut, who, if correctly reported, says, "He likes his dose," and that a Waterbury manufacturer has told him that it will do no harm, anyway?

Out of 290 Democrats in the House, 5 are from the manufacturing State of Connecticut, nearly 60 to 1 against them from southern cotton fields, from western prairies, and the Mountain States.

If favorites are to be played and fundamental principles ignored, it will be a cold day for the working men and women of Connecticut.

Let our little heroic band come out boldly and stand for their newborn convictions, for they will never be missed among so many.

And if they were, their places will be filled by men from Western States, who were once Republicans and would be now but for the strangle hold with which ambition has fastened its grip upon them.

Last summer I said to one of their leaders: "What are you trying to accomplish?" And his answer was: "I am out to beat Taft and kill your damned New England tariff."

These cases to which I have referred are not isolated ones.

In the tariff hearings last January it was shown that all of the congressional candidates in California last fall—Republican, Democratic, and Progressive—were pledged to protection for the products of California, and left free to exercise their judgment upon the products of other States.

The same thing was said to be true of Louisiana and Florida.

Shades of Washington, Clay, and Randall, men who lived and died in firm belief in the doctrine of protection to American labor and American industry, to such a complexion has your party come at last.

NEW METHODS DEMANDED.

The fact of the case is that with a country as large as ours, with interests so enormous and so diversified, with due regard to the welfare of a hundred million people living under different climatic conditions and reaching halfway round the world, the old ways of political tariff making must stop.

The industrial earthquake which has shocked this Nation four times in the past 20 years, and which we are now having again, is an economic crime which no other people would tolerate and which I am sure no other people could survive.

Great Britain confines her free-trade policy to an area less than that of the single State of California, and permits her self-governing colonies to make tariffs for themselves suitable to their own conditions.

The time must come, and must come soon, when the industrial welfare of this great Nation shall no longer be determined by the guesswork of temporary political favorites, but shall be based upon the thorough, exhaustive, and world-wide study of the basic facts of each industry by a nonpartisan permanent tariff commission.

A public report must be made by them and actual conditions shown to the people, and no changes made except with reference to subjects thus investigated.

This is the practice in Europe now, and it can and should be so here.

When the Philippine tariff was made four years ago it was fully discussed by the Manila Chamber of Commerce before it went to the Philippine Assembly, and when it came here for action by Congress, as chairman of the subcommittee in charge of the bill I called in my Democratic colleagues for joint and open consideration of it, and the same policy was pursued in the conference committee of the House and Senate.

There was no secrecy about it from start to finish, and should be none in making our own tariff.

The injury that is done to great industries by secret conferences, by logrolling and political trade and dickers, is infinitely greater than the entire amount of the tax involved.

No better illustration of this could be found than that afforded by the pending revision.

Six months ago the Democratic Party proposed and voted to put a duty on wool and to make sugar free. To-day the same party proposes to put a duty on sugar and make wool free, and it has no reason to give for either action except political exigencies, utterly regardless of the welfare of either of these great industries.

We collect every year more money from internal revenue than we do from customs, and do it at about one-half the expense.

Nobody dreams of making that a political question.

It is treated as a business proposition purely, and there is no reason why the making and administration of any form of a customs law should not be put upon the same basis.

MISUNDERSTANDING AND ENLIGHTENMENT.

But aside from declaring that there was no legal tariff, except one imposed for revenue only, the Democratic platform promised that in the attainment of that result "no legitimate industry should be injured or destroyed."

What did that mean? Woodrow Wilson knew that it meant that no industry built up on an illegal foundation could itself be legitimate, and he boldly and courageously announced, in his first public utterance after his nomination, that while the business which stood on its own bottom had nothing to fear, others "had everything to fear if all they had under them was the prop of a tax."

But the country understood it to mean that trusts and combinations would receive no consideration, and over and over again in the tariff hearings, Democrats, in their protests against reduction of duties, coupled their assurances of sympathy with the party policy with declarations of the legitimate character of their own industries.

Citrus-fruit growers from Florida and California, manufacturers from Massachusetts and Connecticut, cattle raisers from Texas, sugar planters from Louisiana, and even a member of the electoral college of the State of New York who had stumped the State for Wilson, all asserted that they were carrying on honest business enterprises, and that the elimination of adequate protection would be destruction to their industries and a flat violation of the party platform.

When the committee could stand it no longer, it was authoritatively announced by Mr. FRANCIS BURTON HARRISON, speaking for the committee, that the word "legitimate," as used in the Democratic platform, was interpreted by the committee to be "economically legitimate," and that it bore no relation to trust-controlled products, which another clause of the platform directed to be put on the free list.

This definition put squarely into the class of illegitimate industries every one "sustained by the prop of a tax," and left men who thought they were honest, who believed they were working and struggling for the common good of their State and Nation, to be classed hereafter as outlaws and plunderers of the people.

Men high in the councils of the party did not hesitate to denounce it as an outrage, and declare their intention to repudiate the party which was responsible for it.

Think if you can of any productive industry in this country, where the highest wages in the world are paid, which is not the beneficiary of the protective system.

Over and over again in the hearings men were asked if they could compete on a free-trade basis if they could have the same wage scale as their foreign rivals, and the reply was invariably in the affirmative, but that it was impossible unless conditions were equalized, and that was all they asked.

It inevitably follows, therefore, that if protection is unconstitutional, under the definition of the committee, there is no "legitimate industry in this country," for even the American market place itself is sustained by the prop of a tax on all competing products.

Relying on this promise, manufacturers, hoping for cheaper raw materials and lower wages for labor, and assuming, of course, that their own business was legitimate, voted the Democratic ticket.

Relying on this promise, workingmen, believing that a lower cost of living would result from tariff revision, and if no legitimate industry was to be injured or destroyed, that their own wages could be maintained by the power of their unions, voted the Democratic ticket.

Progressives, sincere and enthusiastic in their desire for many social reforms for which the times seemed ripe, declared for extreme and radical protection in their own platform, and then, relying on this promise, put candidates of their own in the field, thus dividing the protective vote, or went clear over to their old-time opponents and voted the Democratic ticket.

It was a new Armageddon, with the hosts of the Lord on the devil's side.

Never in the history of American politics was a greater bunko game played than that to which honest American business now finds itself exposed, by relying upon the promises of the Democratic Party.

PROTECTION A NATIONAL POLICY.

The purpose of the first tariff act passed by this Nation on July 4, 1789, was declared to be "for the discharge of the debts of the United States and the encouragement and protection of manufactures."

For three-quarters of a century the right of labor to own itself or be owned by a master was fought out with human slavery, backed by the self-styled aristocracy of the South, on one side, and freedom, embodied in the sturdy yeomanry and artisans of the North, on the other, until in '63 slavery went down in war and ruin, and the dignity of free labor became the priceless possession of popular government.

From that day to this our growth has been the wonder of the world.

In the last 10-year census period alone the increase in manufacturing investment has been from nine to eighteen billions, in farm values from twenty to forty billions, in all bank deposits from seven to fifteen billions, and in savings banks alone from two to four billions of dollars.

That Connecticut has had her share of this prosperity is shown by the fact that during this same period her savings bank deposits increased by more than $90,000,000, or more than 51 per cent.

But it is claimed that this great prosperity has not been equally distributed among all classes.

That is undoubtedly true, now, for it always has been and always will be true, under any system of taxation, and is just as true under English free trade as under American protection.

And yet all have been lifted up together.

Those things which were the luxuries of former years are necessities now.

The separate cottage has replaced the tenement house.

Homes are better furnished; there is better food and more of it; wearing apparel more tasty, better designed, and at lower cost; shorter hours of labor, and the children in school with education as a right and not as a privilege; factory inspection and sanitation; compensation for injuries; free hospitals; free libraries; and to those who have lived here long enough to learn American ways and methods, wages with a purchasing power for the necessities of life far beyond that of any time in the history of this Nation and so far beyond that of any other nation that during this same 10-year period 8,000,000 people from other lands have left their homes and come here to share in our prosperity.

Protection gives opportunity to all, but the greatest fortunes of to-day are not the result of protected manufactures.

Vanderbilt, Gould, Huntington, and Harriman gathered their millions in the field of transportation; Morgan, Stillman, and Baker in banking; Astor, Stewart, and Marshall Field in trade and merchandising; Rockefeller and his associates in the collection and distribution of a natural product of the earth; Clark, Hearst, Daly, and the millionaires of the Mountain States from the mines of copper and silver and gold; and Pulitzer, Munsey, and Bennett from publications.

Others, after weary years of toil and struggle, have won success by fortunate inventions and coined their thoughts into untold millions from the patents given them by the laws of every nation.

Others still, by skill and daring on the stock exchange or in the produce markets, have made great fortunes for themselves.

But these were geniuses in their chosen fields, and where a few hundred have been successful a million others have been failures, and the protective system has neither brought success to the one nor failure to the other.

What it has done has been to equalize conditions of production between this and other countries, to protect the standard of wages in a young and expanding nation from the deadly competition of the congested centers of Europe, and to give to countless millions here a fair chance in life for better things than were possible in other lands.

A SURRENDER TARIFF.

To such a nation the order now comes to put on the brakes and reverse the wheels of progress, to surrender the best market place in the world, with one-third of the world's consuming power, in order to secure the effective foreign competition which President Wilson says must be the object of tariff duties henceforth laid—"the whetting of American wits by contest with the wits of the rest of the world."

From such a contest, on equal terms of wages and social conditions, no American has ever shrunk or ever will.

Is it not enough that the gates of Ellis Island are flung wide open to the free admission of those who come from every land to cast in their lot with us and share for good or ill in this Nation's growth?

Shall we add to this the free admission of the products of those who remain behind, held there like slaves at their daily task at a wage which means for them a bare existence only?

It is a contest of wages, not of wits—of the cold, hard facts of life and not of dreams—to which the President invites the working men and women of this Nation, to the end that the importation of foreign products may be increased, for the sole purpose of taxation and increased revenues at the customhouse.

To the men and women of to-day, born and brought up under the policy of a protective tariff, such a statement seems incredible.

During all their life it has been instilled into their minds that, industrially and commercially, it was far better for this Nation to produce those things which our climate, soil, and resources made possible, and so be independent in time of peace and self-reliant in time of war.

In pursuance of this policy luxuries have been taxed by all parties to just short of the point of reduced consumption and diminished returns.

Under Republican policy the things which we can not produce are admitted free of duty and the things the like of which we can and do produce are taxed to the point of equal conditions of production and thus put on a basis of fair competition.

The proposition is now to tax the things which we do not produce and also give to other nations an unfair advantage on the things the like of which are natural products here.

It is precisely what South Carolina demanded for the whole Nation in 1828 and precisely what the Southern Confederacy prescribed for themselves in 1861; and it was right from their standpoint, for with the single product of cotton, in which they had a world monopoly, sold in a free market they felt that they had a right to buy the things they consumed in the free markets of the world.

To the whole Nation to-day, however, it presents the square alternative of salaries, wages, and home standards cut down to the European level or a surrender of the home market to foreign competitors.

The hearings on the proposed bill, the rates of duty in the bill itself, and the provisions for future administration all lead straight to this conclusion.

COMPETITION ENFORCED.

At the hearings on Schedule B, Mr. W. E. Wells, of East Liverpool, Ohio, representing the white and decorated tableware industry, had shown that $22,000,000 worth were imported as against $16,000,000 worth made here.

He declared "that the foreigner has now, as he always has had, the better part, the larger part, of the American market."

In the general discussion which followed Chairman UNDERWOOD said:

I will state, and I think I state correctly the judgment of the committee, that the real issue is whether the present rate is competitive or not. I think the witness has clearly shown competition of a large percentage on the products involved in this industry. That is the governing reason, from our standpoint, in fixing a revenue tariff, because without competition we can not have revenue.

And yet, notwithstanding this showing, this industry was heavily cut in the new bill.

WAGES SACRIFICED TO REVENUE.

In the hearings on Schedule C, during the questioning of Mr. John A. Topping, president of the Republic Iron & Steel Co., the following significant statement was made concerning wages and revenue:

The CHAIRMAN. If we are levying this tax for revenue—and even our Republican friends expect to raise funds to support the Government—you will have to let enough come in to produce revenue. There must be enough importations come into the country to produce a reasonable amount of revenue. If we are not going to allow that, we might adopt the policy of building a Chinese wall of law and say that nothing shall come in.

Mr. TOPPING. Your total revenues under Schedule C in 1911, as I remember the figures, were about $18,000,000. If my figures are correct, and they are approximately so, with our annual pay rolls of approximately $322,000,000, and you bring about a reduction of only 10 per cent in wages, you are sacrificing $32,000,000 in order to stimulate a little increase in your revenues under Schedule C.

The CHAIRMAN. We can not mix up the proposition of benefiting the people by raising wages and losing revenue. As long as we pursue this policy of raising a large portion of our revenue at the customhouse—and I think this committee expects to do so—we must levy on articles at a rate that will produce revenue; and there is no reason why we should raise a large amount of revenue from one schedule and not from another.

Later in the hearing the question of area of competition in this country affected by the bill was under consideration, and Mr. UNDERWOOD said:

We will strike a compromise. Assuming that it was 25 per cent—assuming that in 25 per cent of the market you will have competition that you will have to meet from abroad, are you going to break your price and your chance to make profits on the other three-quarters of the market in order to come down and drive English competition or German competition out of that competitive zone?

Mr. TOPPING. Just as soon as you inject into this market 25 per cent supply of foreign stuff, just so soon will you unsettle the values of the entire market of the United States.

Again it was shown that a surrender of the market was to be made for revenue purposes.

Mr. Topping said:

The return to capital invested in foreign works has been greater abroad than it has been at home. Why should we impair our prosperity by exposing our markets and our labor unnecessarily to this surplus? You only stimulate us to need it by reducing our price and reducing our profit. The Government does not accomplish anything if it is the people that are hurt.

The CHAIRMAN. That is not what we want.

Mr. TOPPING. You want revenue.

The CHAIRMAN. We want you to surrender a very small part of your market for the benefit of the Government.

When Mr. Topping was about to conclude his testimony, the following protest was made:

Mr. HILL. I want to dissent most emphatically from one statement that has been made. I want to enter my protest right now against the proposition advanced here to-night that it is necessary to surrender a material portion, which, I think, has been stated at 25 per cent several times——

Mr. TOPPING. Yes.

Mr. HILL. Of the American markets to foreign producers to raise revenue as a matter of necessity.

Mr. TOPPING. That is right.

That protest was based on the fact that under the present law there had been:

A surplus revenue in 1910 of $15,806,323.94.

A surplus revenue in 1911 of $47,234,377.10.

A surplus revenue in 1912 of $37,224,501.90; and everything pointed to a still larger surplus for 1913.

BEFORE ELECTION AND AFTER.

On Wednesday of last week, Mr. UNDERWOOD, speaking in the House, declared that a new era in tariff making had come upon the country.

I think he misspelled one word.

It should have been "error" instead of "era."

But he ridiculed the idea that it was possible to make a tariff measured by the difference in cost of production at home and abroad.

I cite once more from the hearings to show that Democratic promises concerning "competitive tariffs," as well as "legitimate industries," are one thing before election and entirely another afterwards.

W. C. Temple, an orange grower of Florida, said that he never had voted anything but the Democratic ticket.

He pleaded the promises of the party as follows:

I have before me an alleged interview with Mr. UNDERWOOD, of Alabama, published in the Metropolitan Magazine, in which it is stated that Mr. UNDERWOOD said, and, Mr. UNDERWOOD, I hope you are correctly quoted:

"If you make your tariff rates balance the difference in cost at home and abroad, including an allowance for difference in freight rates, and stop there, the tariff will be competitive. It will permit the growth of free competition."

The CHAIRMAN. I think that is true, but I do not think it is true that you have that condition here now, with exportations and American consumption running into many millions of dollars, and importations fallen off from $3,000,000 down to about $100,000. It seems to me that this tariff is prohibitive, protecting producers' profits, and not competitive. I would like very much for you to suggest to the committee what would be a competitive rate whereby we may get a reasonable amount of revenue.

Mr. TEMPLE. Mr. UNDERWOOD, that is all I ask, and that is all my people ask. If it is true that foreign labor is very much lower than our own, that their cost to produce under present conditions are sufficiently lower on the labor item alone, and their cost of transportation is sufficiently below our cost of transportation to make our present tariff no more than enough to offset that difference, am I not justified in supposing I am in the house of my friends and that they will protect us or recommend protection to that extent?

To which Mr. UNDERWOOD replied in part as follows:

What we want to-day is, in arranging this tariff, and I think what the committee wants to do, and especially in reference to oranges, is to get a reasonable amount of importation, so we can get a reasonable amount of revenue. That is what we expect from the duty. You must take that portion of competition.

Unequal and unfair competition on the things we make; unequal and unfair competition on the wages of the men and women who make them.

This is the harvest which we are to gather from the seed sown last November.

Even the freight rates from foreign factories to our markets are to be in effect eliminated by a 5 per cent discount on the duties in this bill if the importations come in American vessels.

ONLY A BEGINNING.

Now, if the bill which is soon to be passed were the full program for the next four years, I would have less criticism to make upon it, for I am somewhat of a tariff reformer myself, and it would indeed be strange if, among thousands of items in a tariff law, the rates on some of them should not be fairly satisfactory.

But this is not the end, for two provisions are made in the bill itself for readjustment of such rates as permit the American market to be supplied by American producers, so that there is held up to the American manufacturer the delightful prospect of successfully adjusting the organization of his business to one set of tariff rates, only to find himself punished for his enforced economies by another and still lower set.

The first of these is found in paragraph A of section 4, as follows:

A. That for the purpose of readjusting the present duties on importations into the United States and at the same time to encourage the export trade of this country the President of the United States is authorized and empowered to negotiate trade agreements with foreign nations wherein mutual concessions are made looking toward freer trade relations and further reciprocal expansion of trade and commerce: *Provided, however*, That said trade agreements before becoming operative shall be submitted to the Congress of the United States for ratification or rejection.

It is, in effect, a repeal of the present maximum and minimum system.

Now the general rate is the minimum and the maximum is punitive.

This proposition makes the new rates the maximum, and authorizes the President to negotiate trade agreements between this and other nations for still lower ones, such agreements to be approved by a majority vote of each House instead of by a two-thirds vote of the Senate as heretofore. The fact that the Democratic Party can not control a two-thirds vote of the Senate, but can dictate to a majority by party caucus, was probably the reason for this change.

A TARIFF FOR FOREIGNERS.

The second provision for the future is found in paragraph S of section 4, as follows:

S. That the President shall cause to be ascertained each year the amount of imports and exports of the articles enumerated in the various paragraphs in section 1 of this act, and cause an estimate to be made of the amount of the domestic production and consumption of said articles, and where it is ascertained that the imports under any paragraph amount to less than 5 per cent of the domestic consumption of the articles enumerated he shall advise the Congress as to the facts and his conclusions by special message.

Instead of a nonpartisan, permanent tariff commission, making world-wide investigation of an industry, and reporting all of the facts to Congress concerning it, as favored by the Republican Party when in power and by the Democratic Party before they came into power, the failure of foreign manufacturers to ship into this market more than a fixed percentage of the American consumption is to be the determining factor in fixing import duties in future.

During the tariff hearings in January official representatives of the Bermuda and Bahama Parliaments were permitted to come before a committee of Congress and plead direct to the legislative branch of the Government for laws advancing their own commercial interests, instead of presenting their case through diplomatic channels in the usual way. It was the second time in our history that this has been done, the other being in the making of the Wilson bill.

But so far as I know, this is the first time that it is made a part of the statute law that the prices of the products of our farms, our factories, and our mines, the salaries of employees, the wages of the workingmen and women of the country, and the net profits of our industries shall all be made dependent upon the skill and ability of foreign producers to possess and control a certain portion of our home trade, for if the Democratic theory is correct, that domestic competition is of little effect in controlling prices and that the tariff tax is added to the domestic cost, this is precisely what this paragraph means.

What marvelous changes are coming to this great country of ours!

In England, France, and Germany their great captains of industry are honored by those nations and are presented by their rulers with titles of commercial distinction.

Here, ours are presented by our Attorney General to a grand jury for indictment and criminal prosecution under a law which even our Supreme Court has not yet been able to construe.

THE INCOME TAX.

Knowing as I do the binding force of the decision of an irreducible majority of a "hog-tied" party caucus, I shall waste no time in analyzing the rates of the various schedules of the Underwood bill. Its author says that his "party stands for a tariff for revenue only" with the emphasis on the "only."

As such the bill is a complete and total failure, for by his own admission the revenues from it will be nearly forty millions annually less than the present law gives, and the Treasury deficit for the coming year would amount to $70,000,000.

The claim is made that this is a reduction of taxes on the poor and a transfer of the burden to the rich.

What it really is is a transfer of the consumption tax only from the West and South to the accumulated savings of the North and East.

As the bill was originally drawn, and until I called the committee's attention to it, more than three billions of savings banks deposits in New England and New York were made subject to the income tax.

The corporation tax is made a part of the income tax.

Last year Connecticut alone paid $758,235.99 out of a total of twenty-seven millions.

Alabama, Alaska, Arizona, Arkansas, Delaware, Idaho, Mississippi, Montana, New Mexico, North Dakota, Oklahoma, South Carolina, South Dakota, and Wyoming, all put together, paid only $754,420.79.

Alabama, with a population of 2,138,093, as against Connecticut, with a population of 1,114,756, paid only $165,698.04, or a little more than one-fifth of Connecticut's tax.

The population of these States, which, of course, determines the amount of consumption tax now paid by them, is 11,489,100, or almost exactly 10 times that of Connecticut.

If the shifting of a part of the consumption tax on the basis of 10 to 1 is found so easy, how long before the whole of it will go and English free trade in all its glory take its place?—for President Wilson has informed Congress that "we must abolish every semblance of privilege," which is the name he gives to protection, and UNDERWOOD says that "protection is already dead."

GENERAL CRITICISM.

One very unfortunate feature of the bill is its sectionalism.

Why should bagging for cotton be made free and for other farm products be dutiable at 25 to 30 per cent?

Why should a piece of steel, cut to lengths, painted and fitted with buckles for baling cotton, be put on the free list and the same piece of steel unmanufactured be duitable at 12 per cent?

Why should cotton cloth be classified according to fineness and finish and graded duties applied accordingly, and woolen cloth be bunched under one rate without regard to quality?

It makes all the difference in the world as to what a duty should be from the protective standpoint, whether a finished article is principally material, with a little labor added, or principally labor with a little material used.

The committee recognized this fact with reference to cotton, but not with wool, and justify their action in this report, or try to, but refuse to apply the same rule to silk and wool. Why?

WHY?

Why should a farmers' free list be made for the agricultural sections and the manufacturing sections paralyzed by revenue taxes on raw materials, protection taken from finished products, and thrift and industry robbed by an income tax, to make up national deficits intentionally created to secure party support?

FREE FINISHED PRODUCTS, DUTIABLE RAW MATERIAL.

The Democratic Party pledged itself to reduce the cost of living, and it puts forward a new free list in fulfillment of that pledge.

It will not do it, and with one accord their leaders are either now offering excuses or asking for a year's postponement of the happy day.

This free list takes from the dutiable list of the present law a hundred millions of last year's importations, at a loss of sixty millions of revenue, and by so doing exposes about ten billions of American products to absolutely unrestricted competition with the world, and in almost all cases, except lumber and leather, leaves the raw materials out of which they are made on the dutiable list.

More than this, it takes $60,000,000 worth of almost exclusively raw materials from the free list of the Payne bill and taxes them an average of 10 per cent for revenue purposes.

It is like burning the candle at both ends.

The effect of it is to cut out entirely or reduce the protection given under the present law, and at the same time increase, or, what is the same thing, not proportionately reduce the cost of production.

The inevitable result will be that the importer will not be compelled to compete with a reduced cost of the domestic product, which the lowered duties are intended to secure, and as human nature is pretty much alike everywhere, will get all he can, and the reduced cost of living will go a glimmering.

So far as I can see, the importer will be the principal beneficiary of this new system, and the manufacturer and workman will be ground between the upper and nether millstones of lower wages and lessened volume of trade.

The fact is that in this country of ours the tariff has far less to do with the price to the ultimate consumer than many people think.

In the report of the Tariff Board on the cotton industry, prices were carefully followed on a hundred different fabrics, from the mill cost to the consumer.

It was shown beyond dispute that in that industry the manufacturers' profit, including selling expenses, was 11 per cent; the jobbers', 19 per cent; and the retailers', 44 per cent.

Now, it costs just as much to job and retail foreign goods as it does domestic.

I have no doubt but that the products of most industries will show a like cost of distribution.

Indeed, in food products, distributed in far smaller quantities for daily use, the expense is probably greater still.

So that the President and Mr. UNDERWOOD are profoundly wise in now reaching the conclusion, after the election is over, that the reduction in the cost of living will probably be delayed for a year or more, until stocks of goods now on hand are sold out.

In my own business experience, however, I have found that a situation of this kind is generally discounted.

The only chance I can see for a reduced cost of living is in an increased production of the things we need, or the demand decreased, either voluntarily or from necessity, and I sincerely hope that the latter will not be the case.

LESS EMPLOYMENT FOR LABOR.

According to Democratic estimates, the net reduction in the revenues from this bill as compared with the Payne bill will be $37,896,035.

This does not mean lessened taxation to that amount, but only that the method of taxation has been changed.

The estimated increase of dutiable importations under the bill will be $141,790,085.

Add to this the large increase in the articles transferred to the free list and it is fair to assume that from $400,000,000 to $500,000,000 worth of foreign products which have heretofore been made in this country will during the first year of this "new era" be turned out by foreign factories, and the employment of American workingmen reduced accordingly. In my judgment this is a very conservative estimate. The amount will, of course, be enormously increased when they have adapted themselves to our styles and patterns all along the line.

AN IMAGINARY HARVEST.

In return for this, however, the committee solemnly declares that, in their judgment, "the future growth of our great industries lies beyond the seas."

Think of it!

Fourteen Democratic lawyers, eight of them from the agricultural States of Texas, Mississippi, Tennessee, Kentucky, Alabama, North Carolina, Missouri, and Minnesota, sending a message to the captains of industry in New England that if they will wipe out of existence their obsolete plants and methods, replace the machinery which they are told should long since have been relegated to the scrap heap, increase the efficiency of their workmen, and remodel their establishments generally on foreign methods, they shall have the privilege of fighting for the home market—the best in the world—against foreign competition, encouraged by steadily downward revision of duties, and that in return for this they may indulge in the glorious hope that "the future growth of American industries lies beyond the seas."

Is it not manifest that either the free-trade author of this report has a delicious sense of humor in his mental make-up, or that the best and only effective teacher of economics in the school of American industry for the next four years will be a dearly bought experience?

Protection of American Industries, American Labor, and American Homes is the Polar Star of American Prosperity.

EXTENSION OF REMARKS
OF
HON. ADDISON T. SMITH,
OF IDAHO,

IN THE HOUSE OF REPRESENTATIVES,

Wednesday, April 30, 1913.

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. SMITH of Idaho. Mr. Chairman, if I believed that the proposed law would result in reducing the cost of living without reducing the income of the wage earner, or the prices the farmer is now receiving for his products, I would cheerfully give it my support. If I believed that because of the duty on imported articles the price of living was being gradually forced upward in this country, I certainly would not oppose the measure now under consideration.

On the contrary, the advance in the price of commodities, which has been gradual for the last 10 years, affect alike free-trade countries as well as those that have a protective-tariff system all over the world.

REASONS FOR INCREASING PRICES.

An increase each year over the previous year of the quantity of money in circulation is one great reason for the advance in prices. In 30 years the quantity of money in circulation in this country, per capita, has almost doubled, notwithstanding the great increase in population; and our gold supply has more than doubled in the last 15 years.

By selling abroad more than we buy from our foreign neighbors we are constantly adding to our wealth as a Nation; and plenty of money is available for the development of our mines; the building of our mills and railroads; improving our cities, rivers, and harbors; the reclamation of our arid and swamp lands; and other large undertakings. All these enterprises furnish employment to millions of men at good wages, whose necessities our millions of farmers supply at prices which have also enabled them to prosper.

The growing system of doing business on credit, the extra expense of delivering goods to customers, the exquisite and delicate manner of packing goods for retail, the apparent need of so many middlemen in merchandising, the expensive method of advertising in magazines and by elaborate signs, all add to the price of commodities, which burden the consumer must bear. In addition, the trend of the people from the country to the city, curtailing production and increasing the number of nonproducers, has a tendency to force prices upward.

The contention of the chairman of the Ways and Means Committee that the proposed law will be a great benefit to our people by developing a competitive basis for us, so that we can more successfully enter the markets of the world, is most fallacious. Competition in all lines of industry is now most intense, our methods of manufacture the best in the world, and our wage earners receive larger compensation than those engaged in similar employment in any other country on earth. Ours is the best market in the world, which we are asked to share with the foreign producers on a free-trade basis, with the hope of competing in a poorer market, where starvation wages are paid.

WE SHOULD DO OUR OWN MANUFACTURING.

If this bill becomes a law, many of our manufacturers will move their establishments to Europe, Japan, China, and India in order to get advantage of the low-priced labor, and then flood our markets with goods which, under the protective-tariff system of the Republican Party, have heretofore been made in our own country by our own people. Foreign manufacturers who have come to our country to manufacture their goods for our market, and thus obviate the payment of tariff duties, can soon go back to their own country, where labor cost is low. With no tariff duties to pay and with cheap labor, how can our manufacturers continue to compete with them unless the cost of production here is reduced? In that event the price of raw material and labor must be reduced.

We not only lose the revenue produced by the duty, but our money goes abroad for commodities which we can produce and which we are now producing.

WHY THE UNITED STATES IS PROSPEROUS.

According to statistics just announced by the Department of Commerce, the United States has been exporting merchandise at the rate of $7,000,000 per day during the last nine months, and we have been importing merchandise at the rate of $5,000,000 per day. In other words, we sell more than we buy to the extent of $2,000,000 per day and are, as a Nation, that much richer each day than the day before. Just think of it—we are $500,000,000 richer to-day than we were August 1, 1912. If this new law drives many of our factories abroad, as it certainly will, and as the result of foreign competition others are forced to close, we would be buying from foreign producers more than we sell; our money would go abroad, and we would be poorer each day as a Nation. If the income of a family is $1,000 per year and it spends $1,200 it is only a question of time when it will be forced into bankruptcy. On the same principle we must sell abroad more than we buy if we are to continue to advance as a Nation and maintain our present prosperous condition. The change in our fiscal policy as proposed by this bill will certainly have the opposite effect.

The great nation of China, with a population of 400,000,000 people, whose successful struggle for independence commands the admiration of all liberty-loving people, will doubtless soon enter upon an era of manufacturing and commercial activity which will have a marked effect on trade relations. By reason of their great numbers 90 per cent of them have been compelled to struggle for existence, as a drowning man struggles for his life. They have of necessity solved the problem of the high cost of living and exist on a few cents per day. Under the present protective-tariff system they are encroaching on our markets, and as they enlarge and extend their manufacturing enterprises they will soon be most dangerous competitors. The same is true of Japan. If these and other nations can successfully compete with us under the existing law what will be our fate if we must open our markets to them on a free-trade basis?

It seems incredible, Mr. Chairman, that there should be any occasion for any portion of the membership of this body to protest against the assault that is being made through this free-trade tariff bill now under consideration upon the industries of this country which have been built up and developed under the protective-tariff system of the Republican Party until we are now the most prosperous nation on earth.

A MINORITY PARTY IN CONTROL.

If the proposed legislation was in accordance with the wishes of a majority of the American people as expressed at the polls, those who believe in the principles of a protective tariff would cheerfully acquiesce in the will of the majority; but the Democrats find themselves in control of this House and the Senate and the Presidency as a result of an accidental division last fall in the ranks of the Republicans, both factions of which are in favor of that fiscal policy under which this country has made such wonderful progress in manufacturing and in the development of our various resources.

With about two-fifths of the voting population behind them, this Democratic administration is attempting to place a free-trade law on the statute books over the protests of three-fifths of the voters, which whenever heretofore tried in this country has brought years of industrial depression, stopped the wheels of progress, created an army of unemployed men, and brought discouragement and despair upon a happy, prosperous, and contented people.

What a price to pay in order that a theory may be demonstrated! If only those who believe in free trade were made to suffer as a result of such reckless and ill-advised legislation, you would find that those on this side of the House would be perfectly willing to give the supporters all the rope they desired; but, unfortunately, the distress and hardships which will result from the baneful effects of this proposed legislation must be borne by all alike. As is usual, the wise and the foolish, the innocent and the guilty, the just and the unjust, must pay the penalty of the indiscretions and the recklessness of a few. The Democratic leaders are determined to continue their experiments in government regardless of their failures of the past.

MANY DEMOCRATS ARE PROTECTIONISTS AT HEART.

If a secret ballot could be taken on the Democratic side on this bill, I venture to say that at least one-half of the Members would vote against a large proportion of the reductions in the present law, as they believe in protection to American industries and American labor; but in view of the determination of the Chief Executive to force this law on the statute books, and by reason of the binding rules enforced in the secret caucus, every Democrat will doubtless take the dose. Probably but few will make any outward demonstration of protest, feeling that the President must be sustained, regardless of the protests of their constituents and the great injury they believe the proposed law will bring upon them; yet they do not hesitate to denounce the measure in their secret caucus, and many of them denounce it privately outside of the House.

SOME DUTIES SHOULD BE LOWERED.

I am not one of those who believe that the tariff should not be revised. There are many articles on which the duty should be lowered, but what excuse can there be for proceeding blindly? Why did not the committee make use of the valuable data collected by the Tariff Board? If it was because this board was appointed by a former President, why did not the present Executive appoint a board composed of men in whose judgment and integrity he had confidence, to collect data and statistics as to the cost of producing commodities in this country and abroad, upon which a fair, equitable, and reasonable bill could be drawn, and not force a half-baked law upon the statute books?

More than one-half of the cost of commodities is represented by the amount paid for labor in producing them, and without a protective tariff on imports our wage earner will be forced to accept lower wages if we are to compete on a free-trade basis.

In European countries, in many of the trades, the wages received are only about one-fifth the amount paid in this country.

Comparative wages per day.

	Belgium.	Germany.	England.	United States.
Laborers	$0.40	$0.64	$0.80	$2.00
Brick and stone masons	.64	1.04	1.68	4.50
Carpenters	.56	1.04	1.60	4.00
Painters	.50	.96	1.44	3.50
Plumbers	.64	.88	1.69	5.00
Mechanics	.64	1.04	1.36	3.50

It is confidently believed by the masses of business men and thousands of disinterested men of rare judgment that the industrial, commercial, and farming interests of the entire country will be greatly disturbed and injured if this bill is enacted. This will be especially true in the Rocky Mountain country, which is far removed from the large centers of population, and from where freight rates to the markets exhaust a large proportion of the profits. The present prosperous condition of the people of that section can not in the light of past experience be continued if the duty is reduced or removed as proposed and we are forced to compete on a free-trade basis with foreign producers.

A BLOW TO OUR LEAD MINES.

It is proposed in this bill to reduce the duty on lead ore to one-half cent per pound, under which but a few of the mines can be operated. We have in northern Idaho a population of about 12,000 people dependent directly or indirectly on the operation of our lead mines, which produce over 30 per cent of the supply of the United States. Nearly $5,000,000 yearly goes to railroads for freights in transporting the products of the mines and the mills and merchandise needed by the communities which are sustained by this industry. In addition, the wages of the miners, supplies, rents, etc., amount to nearly $10,000,000 per year. This industry has been built up under a protective tariff of 1½ cents on lead ore. In addition to the mines in operation, there are a great many prospective mines which are being developed at great expense, and this development will be abandoned in many instances if the lead producers are compelled to enter the market in competition with Mexican ores. The latest statistics compiled by the census show 2,185 mines reported, and that out of that number only 154 were producing mines. The total capital invested was $72,738,889, 44 per cent of which was invested in prospective mines, all of which would be a total loss if the lead producers are not to have the benefit of existing protective laws. I can not understand how any man who loves his country and who is interested in the happiness and welfare of his neighbors could support a measure which would place them on a par with the cheap laborers of Mexico who receive one-fourth of the wages received by the miners in Idaho.

Observe the comparison between the wages paid in Idaho and Mexico.

	Cœur d'Alene, Idaho.	Mexico.
Miners	$3.50–$4.00	$0.75
Muckers	3.00– 3.50	.50
Laborers	3.00– 3.50	.50
Timbermen	3.50– 4.00	.75– 1.00
Pumpmen	4.00	1.00
Engineers	4.50– 5.00	1.00
Shift bosses	5.00– 6.00	
Truck and pipe men	3.50– 4.00	1.00
Blacksmiths	4.00– 5.00	1.00– 1.25
Blacksmith's helpers	3.50– 4.00	.75
Machinists	4.50– 5.00	1.00
Millmen	3.50– 4.00	.65

Average, Cœur d'Alene, $3.60; day's work, 8 hours.

Average, Mexico, 80 cents; day's work, 10 to 12 hours.

Who would be benefited by the proposed reduction of the duty and the suspension of the lead-mining industry in the United States? Why should we send our money out of the country for these things that are now being produced by ourselves? It will not make lead cheaper to the consumer, but will throttle the industry in the United States and enable the Lead Trust to monopolize the business of importing and smelting lead ores, and when this is accomplished they can dictate prices because of their complete control of the output.

THE WOOL INDUSTRY.

But for the benefits afforded by the protective-tariff policy of the Republican Party the woolgrowers and the wool manufacturing industries could not have been so successfully established and maintained in this country. The report of the Tariff Board proves conclusively that it costs approximately 24 cents more to produce a pound of scoured wool and 9½ cents more to produce a pound of raw wool in this country than in Australia, and without a protective tariff equal to the difference in the cost of production in this country and abroad we can not successfully compete with the foreign producer.

Our President during the campaign led the people to believe that no radical changes would be made in the tariff laws, and in a speech delivered on October 18 in Pittsburgh, Pa., in support of his candidacy, said:

The Democratic Party does not propose free trade nor anything approaching free trade. It proposes merely a reconsideration of the tariff schedules such as will adjust them to the actual business conditions and interests of the country.

If that means anything, it means nothing would be attempted in the way of tariff changes which would jeopardize our farming and manufacturing interests, and yet it is a matter of common knowledge that but for the President's insistence that wool should go on the free list a substantial duty would have been provided.

Many of those who are in favor of placing wool on the free list argue that there are great wool barons in the western country who are amassing large fortunes in the sheep business, and that by placing raw wool on the free list woolen clothing and mutton will be cheaper. As a matter of fact, there are comparatively few wealthy men engaged in the raising of sheep. The risk involved because of the adverse climatic conditions, disease, scarcity of pasturage, and the increasing cost of labor have a tendency to increase the expenses of the business to such an extent that only a reasonable per cent of profit is possible. The wages paid to herders, camp tenders, and the other necessary help is about three times the wages paid for similar work in other countries.

According to the arguments advanced by some of those supporting this bill it would be supposed that the sheepowner is able to enrich himself with the entire amount he receives for his wool and sheep, when, as a matter of fact, he has to pay out nearly the entire amount for labor at an average of $60 per month per man in the Northwest; for taxes, for alfalfa and grain to his neighbor for winter feed, and for freight to the market nearly 2,000 miles away. This money goes into circulation in the community, and all are benefited. The abandonment of the protective duty will result in such injury to the sheep industry that many of those now engaged in it will have to turn their attention to other pursuits, the scarcity of sheep will increase the price of mutton, and the value of the farms will be decreased as the market for much of the hay and grain will be destroyed.

Because of the increasing expense of the business there are now nearly 10,000,000 less sheep in the United States than 25 years ago. Under the free-trade Wilson law production of wool in the United States decreased from 348,538,138 pounds in 1893 to 259,153,251 in 1897. In other words, we produced in this country 90,000,000 pounds less wool in 1897, the last year the Democratic law was on the statute books, than in the last year the Republican law was on the statute books, while the imports of wool the last year the protection-tariff law was on the statute books, in 1894, was 55,152,585 pounds, which increased each year under the Wilson law until 1897, the last year the Democratic law was on the statute books, when we imported 350,852,026 pounds.

Is it not reasonable to assume that the proposed free-trade law will have the same effect?

Our Democratic friends contend that with wool on the free list clothing will be cheaper, and as an illustration of the weakness of their argument I quote from a statement of the facts as contained in a brief filed with the Ways and Means Committee:

For illustration, take the khaki-colored suit worn by the officers of our Army. These suits are of medium weight and made under Government supervision, of the best half-blood wool. No cotton, shoddy, or wool waste enter them. Three and one-fourth pounds of scoured wool is all that is required to make 2½ yards of cloth needed for the average man's suit. The grower received for this wool about 53 cents per pound, or for all the wool in the suit about $1.72. The tariff upon wool has advanced the cost of wool in this suit about 48 cents. However, if you purchase the suit from your tailor it costs from $30 to $40. The Army storekeeper retails it from $25 to $30, yet the woolgrower, with all his tariff, gets but $1.72 out of it. Would your storekeeper or tailor have sold this suit to you for 48 cents less if wool had been on the free list? Such has not been their custom in the past. The man who made this cloth was not responsible for the high price at which the suit sold. The manufacturer sells such cloth at about $1.30 per yard. Three and one-half yards to the suit brings him $4.55 for all the cloth in the suit. Out of this he paid $1.72 to the woolgrower for the wool and about 35 cents to the railroad and commission firms for handling the wool. This left him $2.48 on the suit, out of which must come the entire cost of converting the wool into finished cloth. Thus, we find that the woolgrower and manufacturer combined got $4.55 out of a suit that sells at $25 to $40. The balance went to the tailor and middleman.

The following editorial from the Morning Post, London, April 10, 1913, indicates how the consumer will pay more for woolen clothing instead of less if the Underwood bill becomes a law, and how pleased our English friends are over the prospect of extending their market to the United States unencumbered by tariff duties:

Messrs. Dalgety & Co., of Melbourne and London, who are among the principal authorities in the world on the wool trade, placed at the disposal of the Morning Post representative yesterday their collected information regarding the American situation, from which it would appear that even if wool be not placed on the free list the present heavy duties will certainly be lowered to a point that will materially increase the importation of Australian wools into America and substantially increase prices in the English wool markets.

Although the United Kingdom uses more wool for manufacturing purposes than the United States, the latter country leads all nations of the world in the consumption of wool, the explanation being that we manufacture for export, while the States do not.

Another leading authority informed the Morning Post representative that if the present American demand can so materially affect prices, one can imagine that the result of the remission or reduction of duties will be to materially reduce the production of wool in the United States, while stimulating the output of woolen goods and increasing manufacturers' demands for imported wool. This means increased competition in the woolen market, and must put up prices all round, a state of things that will be aggravated by the fact that there is going to be a serious shortage in the Australian wool supplies coming forward. Altogether it is impossible to avoid the conclusion that if the American wool proposals are ratified the British woolen manufacturer must look forward to considerably enhanced prices for his raw material, at least so far as Australian and New Zealand wools are concerned. As the United Kingdom uses 492,000,000 pounds of wool annually for manufacturing purposes, anything like a permanent increase in the market price of this material must be a serious matter for this great industry.

It has frequently been demonstrated that the placing of an article on the free list does not reduce the cost of that article. In 1909 hides were placed on the free list, but it did not cheapen shoes or harness, as our Democratic friends claimed would result, and we are losing to our National Treasury nearly $3,000,000 per year in revenue. The same is true with reference to many other articles placed on the free list.

THE FARMER NOT APPRECIATED.

The farmers, those who above all others should not be compelled to compete with the foreign producers on a free-trade basis, appear to have been given the worst of the deal by the authors of this bill. Many of their products are placed on the free list or the duty greatly reduced, as will be observed from the following table:

Articles.		Republican, Payne law, 1909.	Democratic, Underwood bill, 1913.
Wool		[1]43.61	Free.
Cattle		[1]27	[1]10
Horses	each	$30.00	$15.00
Sheep	do	$1.50	[1]10
Barley	bushel	$0.30	$0.15
Oats	do	$0.15	$0.10
Wheat	do	$0.25	$0.10
Beans	do	$0.45	$0.25
Hay	do	[2]$4.00	[2]$2.00
Peas	bushel	$0.45	$0.25

[1] Per cent ad valorem. [2] Per ton.

Notwithstanding the present duties on these articles, we imported during the year 1912 $4,000,000 worth of cattle, over $2,000,000 worth of horses, nearly $600,000 worth of sheep, $2,000,000 worth of barley, over $1,000,000 worth of oats, over $2,000,000 worth of wheat, $1,500,000 worth of beans, $6,500,000 worth of hay, and nearly $500,000 worth of peas. With the tariff reduced as proposed is it not fair to assume that the importations will increase, and thus displace to that extent in our own market our own productions?

BEET-SUGAR INDUSTRY.

Mr. Chairman, there has been built up in this country, under the wise legislation of the Republican Party, the great sugar industry, in which is invested over $100,000,000. Seventy-five beet-sugar factories in 18 States consumed last year 5,000,000,000 tons of sugar beets, producing 1,200,000,000 pounds of granulated sugar. Twenty-five years ago there were but two small factories in this country. The McKinley law of 1890, providing a bounty of 2 cents per pound, encouraged the building of four more factories, but not until the Dingley law of 1897, placing a duty on 96-degree foreign raw sugar of 1.68½ cents, did the sugar industry really begin to expand.

Thirty years ago the wholesale price of sugar was 10 cents per pound; in 1890 it was 6.27 cents; in 1900, 5.32 cents per pound; while to-day sugar retails at 5 cents per pound. What possible reason can there be for destroying the home production of this most necessary article of food? How can the consumer be benefited by decreasing the supply of sugar and thus make necessary the importation of the foreign product to supply the needs of the people?

There is no question but that we would soon be producing sufficient sugar to supply our own needs if the existing duty is retained, and thus save for our own people the $100,000,000 which we are annually sending abroad for the purchase of sugar.

In Idaho we have four sugar factories which last year produced 48,000,000 pounds of sugar from 20,000 acres of beets, for which our farmers received nearly $1,000,000. A careful estimate shows that Idaho has over 1,000,000 acres adapted to the growing of sugar beets, 50 times as much land as was devoted to the raising of sugar beets in the State last year. Why should this industry not be protected when its continuance means cheaper sugar and an abundant supply for all our demands?

The following editorials from various sections of the country indicate the ill effect the proposed law will have on the sugar industry in the respective localities. Will our Democratic friends close their ears to all arguments and force the enactment of a law which, according to past experience, will surely result in curtailing home production and force us to buy abroad?

PREDICT HIGHER PRICES—EXPERTS SAY FREE SUGAR WILL CAUSE CONSUMER TO PAY MORE.

The New York Times recently asked the views of wholesale dealers and handlers of sugar as to the effect of the reduction in the tariff on sugar and its entire removal at the end of three years, as contemplated by the Wilson-Underwood bill. These men were asked to speak merely as trade experts. If they have any bias it naturally would be in favor of free sugar, since their business relations are chiefly with the big refiners, who are trying to have the tariff removed for the benefit of their own pockets and who might be expected to pass along a small slice at least of their increased profits under free sugar to the wholesalers and jobbers. Most of these men, thoroughly familiar with sugar-trade conditions, were disinclined to predict lower prices under free sugar, while many of the best informed declared that the removal of the duty would surely increase prices to the consumer in the long run.

The head of one of the largest grocery houses in the city went on record with the prediction that sugar would sell higher before the end of 1913 if the tariff bill went through. The price, he said, would be likely to grow gradually higher until the duty was taken off, and then a material advance would occur owing to the shortage of supplies which he foresaw.

"My views are obtained," he said, "from many years' knowledge of the sugar trade. I have watched the development of our own beet-sugar industry from its beginning to the great proportions that it now has reached in the Western States. A reduced tariff, even though it leaves a duty of 1 cent a pound on imported cane sugar, can not but cause a check in beet growing, and when the products of Cuba are allowed entry into the country duty free, disaster will come upon the beet-sugar industry. Production is bound to suffer.

"The Cuban producers are no fools; as a matter of fact, they are largely American or of American backing. They will realize the state of affairs and be entirely sure that a notable decline in production will have occurred long before free sugar is a reality. What they will do can be predicted easily enough. Supplies will be held back from our market in an increasing ratio. Stocks in the hands of the refiners will quickly melt away, for there will be no accompanying decrease of demand and it will be a matter of a short time only, in my opinion, before the consumer is paying considerably more than he is now."

Another large handler of sugar said that he believed the consumer would derive some benefit from a slight reduction of the tariff, but that free sugar inevitably would result ultimately in higher prices.

"There can be no question," said he, "but that the Louisiana cane output and the beet production of Colorado and California will be seriously affected. Aggregate supplies will, in my opinion, be gradually reduced, and I can not see anything ahead but a higher price for sugar because there will not be enough of it to meet the growing demand."

—

DENVER SEES LOSS TO FARMERS.

The Denver Chamber of Commerce, the largest representative commercial and industrial body in Colorado, has petitioned President Wilson against "any substantial reduction in the sugar tariff." The petition says, in part:

"The sugar industry in Colorado, developed through the efforts of the chamber of commerce, has become, by reason of the tariff, our leading and most important agricultural industry. Any material reduction in the tariff will almost certainly prevent the expansion of the industry and will prevent further operation of existing factories. It will force the price to be paid the farmers for beets to so low a figure that beets can not be produced without loss to the grower."

The board of directors of the chamber has adopted resolutions urging the Senators and Congressmen from the State to oppose free sugar.

—

[San Francisco Call.]

The program for an immediate reduction of 25 per cent and free sugar after three years involves an immediate loss of about $1,100,000 a year to the California beet-sugar industry. It means an ultimate loss, without reference to any development loss, of approximately $4,500,000 a year to the industry in this State.

—

[Mankato (Minn.) Free Press.]

The opposition to free sugar is not limited to any particular section, but is country wide. * * * In Minnesota the raising of sugar beets is still in its infancy. If the duty is permitted to remain on sugar this vegetable will become one of the most productive in the State and the farmers will realize millions of dollars from its sale to the sugar-beet factories that are sure to be built.

—

[New Orleans (La.) Picayune.]

The destruction of the sugar industry of our insular dependencies through the adoption of free sugar would be a serious political mistake without compensating advantages, * * * with every prospect that we will pay more eventually on a free-sugar basis than we do now with the tariff in full force. That was exactly our experience with coffee, for which American consumers pay more now than they did when the Government derived a revenue from coffee imports.

—

[Shreveport (La.) Times.]

Sugar produces more revenue in a month than cattle do in a year. The annual revenue which the tariff on sugar yields amounts to $55,000,000, beside which the revenue produced by the tariff on cattle is a mere bagatelle, and yet it is proposed to wipe out this source of revenue and rely on the income tax to offset it. And Louisiana Congressmen are blamed for raising their voices in protest against an action that is as inconsistent as it is unjust.

[Oshkosh (Wis.) Northwestern.]

Citizens familiar with the subject matter here agree that there is little hope of raising the necessary money with which to erect a beet-sugar factory while there is any likelihood that the tariff will be taken off raw sugar. On the other hand, if Congress had decided to let sugar alone in the tariff legislation, it is confidently believed that this city would have had a $750,000 factory within one year.

[New Orleans (La.) Picayune.]

Despite the fact that the South has done more for the Democratic Party than any other section of the country, this section will be more seriously damaged by the Underwood bill than any other.

INCOME TAX.

Mr. Chairman, there is one feature of this bill which I most heartily approve, and that is the provision for a tax upon incomes of over $4,000 per annum. The prosperous and wealthy corporation and individual, under existing law, are able in many instances to escape paying a just proportion of the burden of defraying the expenses of the Government by investing their money in intangible property. The man who works and earns his bread by the sweat of his brow in the store, shop, mine, and office, as well as those upon the farms, not being able to invest in stocks and bonds, or being disinclined to so manipulate his property as to avoid the taxgatherer, frequently pays much more than his share of taxes. The proposed law will compel the rich to disclose the source of their incomes and to contribute their proportionate share of the taxes.

Under the income-tax provision of the proposed law, all those having an income of over $4,000 per annum must pay 1 per cent of the excess per annum, and 1 per cent additional on incomes from $20,000 to $50,000; on incomes from $50,000 to $100,000, 2 per cent; and on incomes in excess of $100,000, 3 per cent.

A recent issue of the New York World contained the following estimate as to the effect the proposed income-tax law would have on the fortunes of the extremely rich men of this country:

	Capital.	Income.	Tax.
John D. Rockefeller	$300,000,000	$50,000,000	$2,000,000
Andrew Carnegie	300,000,000	15,000,000	600,000
William Rockefeller	200,000,000	20,000,000	800,000
Estate of Marshall Field	120,000,000	6,000,000	240,000
George F. Baker	100,000,000	5,000,000	200,000
Henry Phipps	100,000,000	5,000,000	200,000
Henry C. Frick	100,000,000	5,000,000	200,000
William A. Clark	80,000,000	4,000,000	160,000
Estate of J. P. Morgan	75,000,000	7,500,000	300,000
Estate of E. H. Harriman	68,000,000	3,400,000	146,000
Estate of Russell Sage	64,000,000	3,200,000	128,000
W. K. Vanderbilt	50,000,000	2,500,000	100,000
Estate of John S. Kennedy	65,000,000	3,250,000	130,000
Estate of John J. Astor	70,000,000	3,500,000	140,000
W. W. Astor	70,000,000	3,600,000	140,000
J. J. Hill	70,000,000	3,500,000	140,000
Isaac Stephenson	74,000,000	3,700,000	148,000
Jay Gould estate	70,000,000	3,500,000	140,000
Mrs. Hetty Green	60,000,000	3,000,000	120,000
Estate of Cornelius Vanderbilt	50,000,000	2,500,000	100,000
Estate of William Weightman	50,000,000	2,500,000	100,000
Estate of Ogden Goelet	60,000,000	3,000,000	120,000
W. H. Moore	50,000,000	2,500,000	100,000
Arthur C. James	50,000,000	2,500,000	100,000
Estate of Robert Goelet	60,000,000	3,000,000	120,000
Guggenheim estate	50,000,000	2,500,000	100,000
Thomas F. Ryan	50,000,000	2,500,000	100,000
Edward Morris	45,000,000	2,250,000	90,000
J. O. Armour	45,000,000	2,250,000	90,000

In the $25,000,000 to $35,000,000 class, yielding incomes of $1,250,000 to $1,750,000 and taxes of $50,000 to $70,000, are James Stillman, J. H. Schiff, Charles M. Pratt, J. H. Flagler, Quincy A. Shaw, E. T. Bedford, E. T. Stotesbury, John Cladin, Henry Walters, E. C. Converse, Clarence H. Mackay, Nathaniel Thayer, W. H. Moore, and the estates of H. H. Rogers, Robert Winsor, George Smith, W. B. Leeds, W. Scully, John Arbuckle, J. Crosby Brown, John F. Dryden, W. L. Elkins, and O. H. Payne.

While I am in favor, as indicated, of a tax upon large incomes as a general proposition, I am opposed to including within the provisions of this measure the earnings of mutual insurance companies, fraternal societies, building associations, and similar organizations formed and conducted solely in the interests of its members and not for gain or profit to the organization itself. It would be manifestly unfair to tax the income of such organizations, as to do so would compel the small stockholder to pay an income tax, regardless of how small his share of the earnings might be, as any tax paid by the organization would necessarily have to be apportioned among the stockholders according to the amount of stock owned.

The application of the proposed law to life insurance companies was explained by Mr. UNDERWOOD, chairman of the Ways and Means Committee, when this feature of the bill was under consideration, as follows:

Mr. HULL. I am frank to say that in talking with some insurance men I get quite confused with their definitions of a number of these insurance terms, and I am unable to find many of these gentlemen who agree in every respect in their definition of these terms referred to. And I am slow to adopt a suggestion of terms unless a gentleman presents himself as an expert, with the knowledge of the full signification of the expression he undertakes to write into the law.

Mr. LENROOT. Mr. Chairman, I would like to be recognized in my own right.

It does not require an insurance expert to decide the question of whether a cash-surrender value of a life insurance policy should be regarded as income and taxable under this bill. The law, so far as I know, of every State regulating life insurance provides that there shall be cash-surrender values of policies, and to tax as income the cash-surrender value of an insurance policy is exactly like taxing, not the income upon deposits in a bank, but taxing the deposits themselves.

Mr. MADDEN. Suppose the premium was $500 on a 10-year tontine policy and the cash surrender of that policy at the end of that 10 years was $5,000; if he paid the tax on the $500 annual premium, ought he to be compelled also to pay the tax on the surrender value of the policy? Would not that be paying the tax twice?

Mr. LENROOT. He ought not in any event to be compelled to pay a tax on the surrender value, because he is getting back his capital, his principal, that he has paid into the company, and he is not getting gains, profits, or income, but merely getting his money back.

Mr. UNDERWOOD. Mr. Chairman, I only rise to state what the committee's position is in this matter. As the bill now stands, there is no tax levied on the principal that is paid into an insurance company. There is a tax on the net income. The way we look at the proposition is this: Under the present law the net incomes of these corporations, whether they be insurance companies or not, are taxed 1 per cent. Under the clause of this bill the net incomes of these corporations, whether they are insurance companies or not, will be taxed 1 per cent. Now, there will be no tax whatever on the policy when it is paid on its termination, whether it expires on the death of a person or whether it is a tontine policy and expires before the death of the insured. But in the meantime there is a tax of 1 per cent on the net profits of the corporation, just as they are paid to-day under existing law.

Mr. MADDEN. Does this bill provide for the payment of the tax on the annual premiums paid by the policyholder?

Mr. UNDERWOOD. If they are net profits. I am not going into the question of what they are. We are going to leave that for the Treasury Department and the courts to determine.

If they are net profits on the net profits, or so much of them as are net profits, the tax will rest. If they are simply a return of the principal, the tax will not rest upon them.

When that policy is returned there may be a portion of it that is principal and a portion of it that is profit, and probably there is. Under that contract they will return the principal and they will return some of the profit. Now, the principal returned under the amendment that we adopted this afternoon will not be taxed, but if there is profit returned it will be taxed.

Now, that is all there is to it, and the amendment was framed to cover that.

Mr. LENROOT. Will not the company have already paid a tax on that profit?

Mr. UNDERWOOD. No.

Mr. LENROOT. The company has paid it, and must the insured also pay it?

Mr. UNDERWOOD. The insured pays on the profit he makes, just as you would pay on the profit you make.

Now, if the gentleman will allow me, I can not finish an argument in five minutes if some one else is speaking in my time. Let me give an example. If the gentleman should buy a farm or a storehouse, and he could make profits on that storehouse for a period of 10 years, say, under this bill if those profits amount to more than his exemptions he will pay the tax on it during that time—all his profits above the exemptions. Now, if at the end of 10 years the gentleman should sell his storehouse for twice as much as he paid for it he will not pay a tax on the original principal that he invested in that storehouse, but he will pay a tax on the increased price he may receive for it, or for the profit he may sell it for, if it is profit.

Now, in the case of a life insurance policy it is the same as an investment in a house. The corporation, instead of the insured person, will be taxed on its net profits during the period the insurance runs, and at the termination of the period the insured will not pay a tax on his capital but will pay a tax on the return of his profits, just as the man would pay a tax by the increased value of his storehouse in the case I cited. The two propositions are just the same.

Now, there is only one thing involved in this case. These great insurance companies are trying to get this Congress to unfax them. They are eleemosynary institutions. I have nothing to say against them, but you have the choice whether you will invest your money in a home for your family or in a storehouse to furnish an income for your family and save it for the future, or whether you will invest it in a life insurance policy. You may invest it in a railroad company and get stock, and you do that in order to save it for yourself and your family. You may conclude that you are not as capable of handling your money as one of these great insurance companies is, and you send around and invest your capital in a policy. The only difference in the investment is that one is called a share of stock and the other is called a policy. You invest it for the purpose of profit in the policy, as you would in the stock.

Mr. Chairman, while it may be impossible to secure an amendment in the House making clear the application of the law as it affects life insurance companies and removing some of the objectionable features, it is hoped that when the measure reaches the Senate an amendment may be adopted which will prevent the imposition of an unjust tax upon the income of all associations organized for mutual aid to their members and not for gain or profit to the organizations.

A PROPHECY.

I realize, Mr. Chairman, that there is no argument which can be advanced against the bill under consideration from this side of the House which will deter the Democratic Party from forcing this iniquitous measure through this branch of Congress in its present form. The die is cast. The appeals from the manufacturer, the wage earner, and the farmer will not be heeded; but in the light of past experience we on this side believe that

the radical change in the fiscal policy of this Government which you are about to adopt, the abolition or reduction of the duty on many articles which are now being produced in this country, will result in transforming the unprecedented prosperity which this country has been enjoying for the last 15 years into an era of business stagnation which will throw hundreds of thousands of honest men out of employment. Our importations will increase and our home production will be curtailed. Discouragement and dismay will overwhelm our manufacturing and commercial interests from ocean to ocean and from the Lakes to the Gulf, without any benefits accruing to the great mass of consumers for whose interests you are attempting to legislate.

On the Election of Postmasters.

EXTENSION OF REMARKS
OF
HON. DAN V. STEPHENS,
OF NEBRASKA,
IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 8, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. STEPHENS of Nebraska. Mr. Speaker, the question of post-office patronage has always been a source of great annoyance to Congress and loss to the country every time the politics of the administration has changed. It is a most interesting spectacle to witness the delegation of a great State quit important work and go in a body to see the President or a department head and present in person a candidate for postmaster or for some other unimportant office and urge his selection. It is really nothing short of a burlesque, and yet for years this wasteful system in one form or another has continued. So far as the postmasters are concerned, there is absolutely no valid reason why this particular officer should not be elected by a direct vote of the people in the same manner and at the same time other local officers are elected. In order to bring about this much-desired result I have introduced a bill in the House providing for the election of second and third class postmasters, restricting the candidates to the party in power

BILL PROVIDES.

The bill provides that at least one year before a postmaster's commission is to expire notice of that fact shall be sent by the Postmaster General to the postmaster, who, in turn, shall send it to the local political committee. This committee is given power to call the election, to appoint an election board, and provide for an election. All legal voters who are patrons of the office, irrespective of party, are entitled to vote. The result of the election is to be certified to the Postmaster General, and the winner shall be given a certificate for a four-year term of office.

The power of filling vacancies or removing postmasters for cause is reserved to the Postmaster General.

The provisions of the bill are made to apply only to second and third class postmasters, because a complex and expensive election machinery would have to be devised for the election of postmasters in large cities, and this would open the bill to attack from a quarter in which it is not now vulnerable.

The whole measure is an outgrowth of the plan of postmaster election which I have instituted in the third district of Nebraska.

I doubt if there can be found a sane man in the United States who will hold that the best possible public service can be obtained through our postal department so long as it is used as party spoils. Yet for one reason or another we have never been able to get it out of politics, each party refusing to give or take in agreeing upon a plan. Personally I think the Republican Party, in power for 16 years, should have taken a step in that direction, as it would have been much easier for it to have accomplished the task on a full stomach than it is for the Democratic Party to do so on an empty stomach with the spoils of political warfare within reach. But I have hit upon a plan that will fill the Democratic stomach temporarily and yet remove absolutely the Postal Department from the spoils system and place the election of postmasters in the hands of the people.

This restriction of candidates to the party in power seems necessary to the success of the bill. The Democrats in and out of Congress would feel outraged if the measure would prevent them from realizing the conceded fruits of the election after the Republicans had held these positions during the past 16 years. This sense of fairness would extend to Republicans also, as no fair-minded Republican would contend that the Democrats are not entitled to these positions under existing circumstances.

But when this measure becomes a law and the people elect their first postmasters the Postal Department immediately ceases to be of any interest whatever in national politics, and after that good day comes it will be an easy matter to let down the bars so the office may be sought by candidates from any political party.

SERVE FOUR YEARS.

Under the provisions of the bill the term of office is fixed at four years, and the Postmaster General may remove a postmaster for the good of the service and call upon the patrons of the office affected to elect a new postmaster. This does two important things: On the one hand prevents a life tenure in office with the resulting incompetency of old age, and on the other keeps the service up to a high standard by giving the Postmaster General power to dismiss a postmaster for the good of the service when the people make a mistake in their choice or from any other cause. But the rights of the people are still safeguarded, in that they always choose their servants and their servants are therefore responsive to the people they serve. This makes a double check on the postmaster, and is a guaranty to the people that their interests will be conserved. The idea that the people should pay a man good wages—far above the average wages—to handle their mail and let a political boss hire this man for them has never been so repugnant as it is right now.

Four-year terms are long enough for the good of the service. If a postmaster is worth while he can get an indorsement of the people for reelection; if he is not he goes out. Under the civil-service plan he holds on for life, and the Government now has in its service thousands of old men and women unable to do the work required of them, and the public service suffers. It is not humane to discharge these people who have spent a lifetime in the service and are unfitted for any other work. The only alternative is to pension them, and that is manifestly unfair, for why should one class of servants be pensioned at the expense of other classes? The farmers of Nebraska work 15 hours a day and the clerks and factory hands work 8 to 10 hours a day. Why should they be taxed to support in old age men who work from 6 to 8 hours a day on better wages for the Government? But the biggest objection is the danger to the very existence of our form of government if a public-service pension would be granted.

ARMY OF EMPLOYEES.

There are hundreds of thousands of Government employees scattered throughout the United States. When these folks with a vote demand of Congress favorable legislation along the line of pensions for public servants, just what will happen to the principal idea that our Government is for, of, and by the people? It will cease to be so, and will be a Government of, for, and by the pensioners. If Congress refused an increase in pensions they would defeat it for reelection, and elect instead a Congress that would grant it. We now pay a tremendous total of about $200,000,000 a year for war pensions, and the Philippine war veterans are not yet on the rolls to any extent. Add to these war pensioners the civil pensioners, and the end can easily be seen. This Government, strong as it is, can not resist a strangle hold like that. Yet I feel that all of the people owe the war pensioners all they get, for all of the people were back of the war, but this public-service pension is another matter, and will naturally follow a life tenure of office for Government employees.

This bill which I have introduced into Congress for taking the Post Office Department out of politics is a long stride toward popular government, and whether it becomes a law or not it is safe to say that the people will not accept boss-appointed postmasters much longer.

There is no valid argument against the people's rule. The people learn by doing. They make mistakes, of course, but they have the right to, because they pay for them, and through their mistakes they learn their lessons.

The question is a broader one than at once appears. We found that the framers of the Constitution made a mistake in placing the power of electing Senators in the legislatures of the various States. The people have since corrected this blunder of the fathers by issuing primary instructions to the legislatures, directing these representative bodies whom to elect. It is only one further step for the towns and cities to direct the President of the United States whom to appoint as postmasters through properly constituted primaries.

I greatly question the moral right of a Congressman to pay off his political obligations by giving away post-office jobs. He has about as much moral or legal right to name a postmaster as

he has to choose a ruler of the Fiji Islands. It has been generally considered legitimate to give these places to the party men who have fought the political battles, and there is some reason for this action. But would it not be infinitely better to let party men seek these positions through the votes of the people rather than through political bosses? Is it not a bad thing for the country to have its offices parceled out by a few men who happen to get into the saddle? In Turkey the Government sells the privilege of levying taxes at auction to the highest bidder, and the successful bidder is then privileged to loot the country for all he can get. The fact that this privilege of giving out these post offices has not been greatly abused is a splendid commentary upon our citizenship. It is possible under this system of distributing post offices and other appointive offices in the gift of the President to raise a corruption fund that would control a general national election. The way to cure it is to have the appointive power absolutely wiped out. Let every man who is to serve the people in any capacity secure his commission directly from the people. He will then know that he was elected to office to serve the people.

This thankless job of recommending candidates for postmasters is no part of the constitutional duty of a Congressman, and has been placed upon him by the Executive through force of circumstances, because the President could never have personal knowledge of the merits of the candidates. It has grown to be such a burden on Congressmen the country over as to seriously interfere with the legitimate duties of his office as a legislator. Practically half or more of his time is taken up with this question of ascertaining the merits of candidates and giving every one a fair and impartial hearing, and after he has done his best to recommend the best men for the places he finds the discontent with his selections is almost universal, and at the next election his success or failure to win a reelection depends upon the manner of handling recommendations of candidates for post offices rather than upon his success as a legislator.

This trouble can be wiped out completely by the President ordering the people to choose their postmasters at properly constituted primaries, and thereby get his authority for appointing postmasters directly from the people instead of taking the indorsements of Congressmen. This would be fair to the people and fair to the Congressmen, who are rent in twain as a result of acting as a buffer between the President and the people.

There is no office in the scheme of our Government that comes closer to the people than do postmasters.

Every normal person does business with him. We elect practically every other local officer, yet we permit John Doe to pass out the post office, because the President must depend upon some one's recommendation, since the people have nothing to say about it. The absurdity of permitting any one man or set of men who happen to be in power to pick their postmasters, or any other administrative officers, for them is apparent as soon as the question is examined closely.

I have tested the feasibility of the plan of electing postmasters by ordering voluntary primaries in my district in the towns where vacancies are to occur soon. The results have been very satisfactory, but the critics have been very numerous. In answer to these critics and for the purpose of encouraging those who believe in the principle I issued a circular letter to my constituents, a copy of which I shall make a part of my remarks, as it covers the usual objections to popular elections of postmasters.

ANSWER TO CRITICS ON ELECTION OF POSTMASTERS.

In view of the numerous inquiries and criticisms on my plan for allowing the people to choose their own postmasters, I wish to state for the benefit of those interested in this great reform that the plan is working admirably and that the people are intensely interested in exercising this privilege. We have now held seven elections in all where the people have held open elections or Democratic primaries or caucuses. In every instance there has been a good man chosen for postmaster, and in most instances the vote cast has exceeded that cast at any general election. Even when a Democratic caucus or primary has been held the vote practically equals the total usually cast by all parties at a general election. For example, at the last election for postmaster, where the voting was restricted to Democrats upon the request of the five candidates, there were about 200 votes cast. The local press described it as a most enthusiastic election and says that the streets were blocked by the people and business practically suspended while the people were busy picking a man to serve them as postmaster. In closing, however, the author of the article, who was a defeated candidate, stated that the plan was very unpopular and that many thought if their Congressman did not have backbone enough to appoint a postmaster without bothering the people with it, he did not have backbone enough to serve the people as Congressman. Certainly a candidate who receives less than 10 votes out of a total of about 200 has a right to feel that the people can not be trusted to attend to their own business. But they surely show plainly what they want, and if the people did not want to be bothered with this little matter of choosing their postmaster, they would not block the streets coming out to an election.

THE HOOPER CASE.

Down in Hooper they liked elections so well they held two of them, and some wanted a third whirl at it, but I protested. The Democrats held a caucus, and the Republicans later on held a mass meeting. Everything went off in fine shape, and the critics of the plan have had great fun lying about it. The Democrats held a caucus and elected Mr. Fritz unanimously. The caucus was the only poorly attended meeting of the seven, due to a stormy night; but since there was no other Democratic candidate, another election was not necessary. Mr. Ring, the present Republican postmaster, and a good man, was a candidate for reappointment, and since many Democrats wanted him named I had agreed to recommend Mr. Ring in case a Democratic caucus recommended him to me. The Democratic caucus did not do so, but instead, unanimously recommended Mr. Fritz, whereupon Mr. Ring, through two or three friends, called a mass meeting, and naturally, Democrats refused generally to attend it. Even this meeting, called for the specific purpose of nominating Mr. Ring, gave Mr. Fritz, who was not a candidate before the meeting, 15 votes. No less than 25 newspapers have printed the account of this mass meeting, and the fact that Mr. Fritz received 15 votes to Mr. Ring's 150, and that I refused to appoint the people's choice, and not one of them mentioned the fact that a previous Democratic primary had elected Mr. Fritz unanimously, and that Republicans are barred from being candidates under the rules.

I mention these details to correct the record and to show that the people are as much interested in electing their postmasters as they were in electing a President last fall, and where such interest prevails good results must follow.

THE SHORT-BALLOT CRITIC.

Another critic advances the idea that my plan of electing postmasters is against the latest ideas of government, which is a tendency toward the short ballot—the election of fewer officers instead of more. If he had considered the subject closely he would have seen that the election of postmasters is the short-ballot idea in a nutshell. It is the shortest ballot possible, and the candidates are known to every voter. The evil that argues for a short ballot is the long list of candidates, for instance, that the average voter does not know and which is elected, as a rule, by guess. Whatever merit the question of a short ballot may have it applies forcibly to the election of postmasters, for if the people are not competent to elect their own postmasters from among their friends and acquaintances whom they know almost as well as they do members of their own families, just whom are they competent to elect? They elect now mayors, members of the legislature, and State officers, and they do not come in contact with these officers once a year, whereas they deal with the postmaster daily. Does the fact that they must meet the postmaster daily and stand for everything he does, good or bad, disqualify them for passing upon his merits at the polls? Well, hardly. It puts them in fine shape to pass upon him, and it has a splendid effect upon the postmaster to know he has a boss in the people he serves rather than in some political boss who used to own him.

THE CIVIL-SERVICE ADVOCATE.

The same critic advocates placing the postmasters under the civil service, which again leaves the appointment to the Postmaster General. This simply means changing a political boss who does have a local interest for a post-office inspector boss to recommend the postmaster to the department who does not have. This inspector knows about as much about whom the people want or the efficiency of the man he recommends as any other passing stranger would know, and I deny that any one man knows more about whom the people want and who can serve them best than the people know themselves. To admit that such is true is to admit that our form of government is a failure, and a king could serve us better. The people can change a party boss now and then when they can not stand him any longer and get a new postmaster, but under the civil service a postmaster might be fairly capable but exceedingly offensive to the people and still hold his job in spite of them. But an elective postmaster will try to please the people he serves, because he will want a reelection. Further, a clerk under him in the civil service will be more responsive to the people, because the postmaster over him must be, and the postmaster has influence with the department. On the other hand, if the postmaster was under the civil service the people could rage all they pleased, and the postmaster would stay on—the people be damned—and a clerk who was not utterly bad could not be disturbed.

THE PARTISAN CRITICS.

There is another class of critics, mainly very partisan Republicans, who complain because we do not permit Republicans to compete as candidates. These are the last men who should complain, because they took the offices of the people for 16 years through the operation of a political boss, and now that they have lost control of the Government by abusing the privilege given them they would still like to hold a portion of the offices. No fair-minded Republican objects to the right of Democrats to hold the offices, providing they are decent, capable men; and I feel that the rights of all the people are being safeguarded when I refer the matter for settlement to either a Democratic caucus, where a large percentage of the people vote, or to a primary, where all the people vote. At least the people will not have thrust upon them an objectionable officer through the spoils system. The ideal method is a wide-open election, without restrictions, but any man with gumption enough to have an opinion worth considering knows that to make these offices available to Republicans at this time, after they have hogged every office for 16 years that rightfully belonged to the people and paid bad political debts with them, would outrage the sense of fairness of every man, regardless of politics. It will be an easy matter to throw these offices open to general elections after the people once get used to this new privilege of attending to their own business, even though they must now pick the postmaster from among Democrats. When politicians quit selling these offices for political services the people will be let alone to elect whom they please, regardless of politics. It even strikes me as absurd now to be consulted by the towns of my district on a matter of choosing postmasters for them. Later on, when they get used to picking postmasters for themselves, it would cause a riot for a victorious party to undertake to again sell the people's offices to the highest political bidder. The man who defends the spoils system to-day will be heartily ashamed of it to-morrow.

Then there is another class of critics who complain because Republicans are allowed to vote upon Democratic candidates. Under our rules the candidates, in conjunction with the county chairman, can decide whether a Democratic primary or an open primary shall be held. Personally I very much favor an open primary, but I do not wish to thrust my convictions upon those who do not believe in them. In answer to these critics, I would simply offer the suggestion that possibly the Democrats of those towns in which they have open primaries know what they want, and if they prefer to have their Republican brothers vote with them on this subject I do not know of anyone but a political boss or these same critics who would have the nerve to interfere with their wishes. I never could find any facts to warrant the fear, as charged, that Republicans, if allowed to vote on Democratic candidates, would pick the worst on the list in order to embarrass the Democratic Party by electing a bad man to office. I have never insulted my Republican brothers by considering them so devoid of patriotism and common sense and decency. The charge is a political nightmare and will pass away when the victim of the dream gets out in the sunlight. Nor do I believe Republicans will vote for a milk-and-water Democrat who has never had political convictions or been active in party politics. They will vote for the candidate that they want, regardless of politics or religion. The facts of elections bear out the statement.

Notwithstanding large Republican majorities in Nebraska, the Republicans favored fighting Democrats like Gov. Moorehead, Senator HITCHCOCK, and in congressional districts MAGUIRE, LOBECK, and myself have been elected and reelected over Republican majorities, all disproving the statement that active, fighting Democrats can not receive political support from Republicans. It sometimes happens that an active Democrat is also an exceedingly offensive one personally, and of course he could not be elected and should not be elected. If he were appointed because of service, he would be a thorn in the side of the people and a weakness to the Democratic Party. In one town election an active worker had the Democratic indorsement of the county central committee and a portion of the State committee. He was one of five candidates, and out of several hundred votes he got less than 20. Under the spoils system he would have gotten the job and the will of the people would have been thwarted. I deny that such a man has earned a place by his party service. I deny that a man who can not command a greater support has ever been able to render a great service to his party. The chances are that his activities have annoyed the people and driven support from the party instead of bringing support to it, and he may be a good man, too, but simply unfortunate in his personal appeal.

HAS TRIED THE SPOILS SYSTEM.

I have tried the Democratic primary or caucus, the open primary, and the spoils system, and I am so strongly convinced that the primary method in one form or another is the best method for the people that I shall make no further recommendations where there is a contest without receiving my instructions from the people. Before I decided upon the elective method I recommended candidates in three towns under the old spoils system that my critics so heartily indorse. They also point to this fact to show my inconsistency and how my rule of the people only works where I want it to. There is no doubt about my action in these three cases being wrong in principle, though I am sure I named excellent men, but I suggest that my action in these three cases be used by my critics as a horrible example of the spoils system. They need make no excuses for me, such as having acted before I decided upon the election plan. I am not asking for any quarter in this contest with the bosses.

Now, to conclude, I make this broad assertion, that there are only two classes of people who favor the spoils system of appointing postmasters. In the first class are all who think they or their friends can profit by it in one form or another regardless of the wishes of the people. In the other class are those who do not believe the people are competent to attend to their own business. Those in the first class always favor the spoils system until they find out I am not for their candidate, then they think a chance with the people is better than none. Those in the second class belong to the kingly crowd and have an honest doubt of the ability of the people to govern themselves. At least their motives are not mercenary, even though they are misguided. Let the people take their choice of attending to their own business or letting the bosses do it for them. I am more than pleased to submit the case to the jury.

The Tariff.

EXTENSION OF REMARKS
OF
HON. WILLIAM S. GREENE,
OF MASSACHUSETTS,
IN THE HOUSE OF REPRESENTATIVES,

Thursday, May 8, 1913,

On the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. GREENE of Massachusetts. Mr. Speaker, the importance of the tariff question as a great economic subject was well exemplified by my colleague, Hon. PHILIP P. CAMPBELL, who represents the Third district of the State of Kansas in the House of Representatives, in an address delivered before the City Club, a nonpartisan organization located in the city of Boston, in the Commonwealth of Massachusetts, the day following the presentation of H. R. 3321, known as the "Underwood tariff bill," by Hon. OSCAR W. UNDERWOOD, chairman of the Committee on Ways and Means, to the House of Representatives.

The gentleman from Alabama [Mr. UNDERWOOD] clearly and forcibly expressed his views on the tariff question as embodying the views of the Democratic Party on this important economic subject, explaining why he and they thought the policy of protection to American industries and American labor should be supplanted by the proposed law, which was to provide a tariff for revenue upon a competitive basis, to be established by manufacturers across the seas, and to result, as he hoped and believed, in a substantial advantage to the American consumer. The address of my colleague [Mr. CAMPBELL of Kansas] delivered, as I have stated, before the City Club of Boston, Mass., expounds the policies of the Republican Party and refutes the theories of the Democratic Party, that prosperity can be best secured to American capital and American labor by providing competition from abroad, where the wages of labor are lower and conditions are very much inferior, both in the cost of production and the standard of living, than they are in the United States.

Theories in considering the tariff question may satisfy college professors, importing interests, and doctrinaires, but the plain American citizen understands very clearly that every dollar's worth of products manufactured in other countries and entering this country from abroad because of the lowering of tariff barriers at the ports of entry in the United States, deprives Amer-

lean laborers of employment, and prevents reasonable earnings for invested capital, and the plain American citizen will be heard from at the ballot box. The address of my colleague from Kansas [Mr. CAMPBELL] follows:

Mr. CAMPBELL said:

"Mr. Chairman and gentlemen of the City Club of Boston, I thank you for your cordial greeting and assure you that I esteem it a very great privilege as well as a pleasure to participate in the open and free discussion that you are having of this very important subject. I shall omit the stories that I may have had in mind to tell and go right to the job that I have in hand. [Applause.]

"We are dealing with one of the oldest, if not the very oldest, questions in American politics, and at this moment the most important. It was announced on the floor of the House of Representatives yesterday by Mr. UNDERWOOD, chairman of the Ways and Means Committee and the leader of the Democratic Party on the floor of the House, that the Democratic Party was to inaugurate a new era in the fiscal policy of the United States; that it was going to reverse the policy to which we had adhered for a half century or more; and to begin a policy of competition with the world in the products of our labor and our industry.

"Gentlemen, that is one of the most important declarations made on the floor of the American House of Representatives for a half century. Let us see how important it is.

"First, let me say that two things are essential for the prosperity of the American people: steady employment for its laborers at the highest possible wage; and, second, good prices for the product of American labor on the farm, in the factory, in the mill, and in the mine. You can not have a prosperous country without both of these conditions. The fathers of the Republic believed in building up and protecting American industries. Let us see whether or not they were wise. Let us examine the experience of the American people with the policy of the fathers, as established under the leadership of Alexander Hamilton, renewed under the leadership of the Republican Party, and compare with the people's experience under the policy of nonprotection to American industries, as inaugurated by John C. Calhoun in 1833 and renewed by OSCAR W. UNDERWOOD in 1913.

"We may indulge in all the sophistries that are possible, but when we reach the experience, when we put theories into operation, we find out whether or not they were wise and whether they work to the welfare of the people.

"But before I take up that discussion let me notice some of the things that have been claimed for reduction in the tariff. Your chairman has stated that the Republican Party had promised in the national election of 1908 to reduce the tariff in the interests of the American consumer. Now, gentlemen, who is the American consumer? Why, the American consumer is the American producer—we are all producers and all consumers. We consume your products and you consume ours. We are the producers of things of which you are consumers, and you are the producers of products of which we are consumers, both producers and consumers alike. We produce bread and meat for the employees in your shoe factories, and we consume the shoes that are the product of your factories. And what I say of shoes is equally true of every other product, of every other section of the country, with its factories, farms, mills, shops, and mines.

"But your chairman, who, I understand, is a shoe manufacturer, led me to believe that he thought that a reduction in the tariff upon a given commodity would be a benefit to the consumer. I was one of those who protested against taking the duty off hides. And I say to the chairman and to other gentlemen here that one of the reasons the Republican Party under the leadership of Mr. Taft was not popular in the West, in the Mississippi Valley, was because he took the conferees on the Payne bill into his hands and forced them to take the duty off of hides; but I supported the bill as it came from the conferees with free hides in it, being told that that would result in a reduction in the price of shoes. I ask the chairman now if putting hides on the free list and reducing the tariff on shoes—about 65 per cent, I believe, or 60 per cent—has resulted in cheapening of the cost of shoes to the American consumer? Did it?

"Mr. JONES. It did.

"Mr. CAMPBELL. Where?

"Mr. JONES. Everywhere.

"Mr. CAMPBELL (resuming). Why, sir, every man who buys shoes knows that the price of shoes has advanced since hides went on the free list and the duty on shoes has been reduced. I know it and you know it.

"A VOICE. You bet your life!

"Mr. CAMPBELL. My good wife buys shoes for four children——

"A VOICE. You're all right! [Laughter.]

"Mr. CAMPBELL. I thank you, sir. She went to a shoe dealer of whom she had been buying shoes about six or eight weeks after the passage of the tariff bill—the Payne-Aldrich tariff bill. She found that the price of the same shoes she always got from the same dealer had been advanced from 25 cents to 50 cents a pair. She was surprised and asked why it was. And the dealer said, 'Why, this iniquitous Payne-Aldrich tariff law is responsible for that.'

"I did not know that the tariff had been taken off of hides and that a 60 per cent reduction had been made upon shoes. She paid the increase in the price for the shoes and has continued to do so ever since.

"If a reduction in the tariff on other things does not bring better results to the American consumer than the reduction of the tariff on shoes and putting hides on the free list, it will be of but little benefit to the American consumer. [Applause.]

"Now, it is not my purpose to discuss the 4,000 items embraced in the tariff bill, but I may be permitted to take your time long enough upon one schedule to say that the American shoe manufacturer has had the advantage which was given to him by the Patent Office; he has had the advantage of the inventive genius of American inventors, and patents on machinery have protected him. That is the reason the American shoe manufacturer has been able to manufacture the best shoes in the world and to get those shoes into the markets of the world. And I want to tell my distinguished friend, the chairman, that when the Japanese begin to use on a larger scale American shoe machinery and pay one-eighth of the wages to the men and women and children who operate that machinery—one-eighth of the wages that are paid in Massachusetts—that he will find some difficulty in competing with Asiatic labor in the production of shoes. [Applause.]

"He may not feel that next year, nor the year after, but it is the product that is produced by low-paid Japanese labor that will control the market under free trade.
